The precise meaning of *šīs* is uncertain. The view (a) that it was a burnished metal plate, though commonly accepted, is devoid of philological support; a more plausible meaning would be 'flower' or 'bud' (cp Is. 40:6 f. Ecclus. 43:19, see FRINGES, LOCKS), which suggests (b) a flower-like ornamentation, and (c), a garland, and so a fillet or diadem. In favour of b (which was the view, long ago, of Bishop Horsley) we have the description of Josephus (*Ant.* iii. 76, above § 2), and, on the analogy of the suggested origin of the golden CANDLESTICK (*g.v.*, § 3, col. 647), it would be tempting to find in the symbol a survival of nature-worship. As regards the third view (c)—which virtually identifies the *šīs* with the *nēser*—the chief support is to be found in such a passage as Is. 28:1 (probably of the end of the 8th cent. B.C.), where *šīs* stands in parallelism with *ʿāfirāh* (עֵשֶׂר), 'crown', and apparently denotes a chaplet or garland.² On this view, the *mišnépheth* was probably encircled with a fillet or diadem—the evolution from garland to diadem is easy—agreeing with the representation in Jos. *BJ* v. 57, and with the Persian custom already referred to (§ 2). Finally, early tradition supports the conventional view a, and if it be accepted, it may be plausibly held that the inscribed plate worn upon the forehead is a direct descendant of primitive flesh-cuttings, and a simple variation of the *šāpith* (see CUTTINGS, § 7, FRONTLETS).

The view of Jos. *Ant.*, *l.c.* which distinguishes the *tešāmōn* from the *šēfānos* seems to find support in the evidence cited in n. 3, col. 3156, and n. 1 below, and was apparently held by Ben Sirā, Jerome, Philo, and the Pseudo-Aristeas.³ From the dis-

¹ Did the inscription originally bear only the name יהוה? cp Isid. *Orig.* 29:21 (petalun, aurea lamina in fronte pontificis quae nomen Dei tetragrammaton Hebraicis litteris habebat scriptum), and Jos. *BJ* v. 57.

² In Ecclus. 40:4 the wearing of the *šīs* and *šāpith* (שֵׁשׁ וְשָׂפִית) typifies the man of high estate. Is the reference to priestly or royal authority? In the former case we may infer that the high priest's characteristic ornament could be called variously *šāpith*, *šīs*, or *šēfānos*, and in the latter case we should find an interesting allusion to the sovereign's imperial head-gear, with its distinctive fillet. For the use of *šāpith* to denote a royal or priestly head-dress, see TURBAN.

³ In Ecclus. 45:12 the Heb. reads *וְעֵינַי וְעֵינַי פִּי מְעִיל* *עֵינַי* *פִּי מְעִיל* . . . For *מְעִיל* we must certainly read *מְעִיל* *פִּי מְעִיל* is out of place and has been already mentioned in n. 8. The *šīs*, here, is quite distinct from the *šēfānos* which appears to correspond to P's *נוֹר*. Jer. *Ep.* *lxiv.*, ad *Fabiolanam*: habet cidarim et nomen Dei portat in fronte, diademate ornatus est regio. Philo (*de Mos.*, ed. Mangey, 2152): χρυσῶν δὲ πέταλον,

crepant accounts of Jos. it is obvious that the form of the mitre varied from time to time. Only on this assumption can we understand the statements in P. In Ex. 29:6 the *nēser* is (as we should expect) placed upon the mitre, and this, too, is the position of the *šīs* in Ex. 39:30 f. Lev. 8:9. But in Ex. 28:36 ff. the *šīs* is both on the mitre (cp c above), and on Aaron's forehead (cp a above). These contradictory statements are evidently the result of a conflate text, for a satisfactory solution of which the accessible evidence is insufficient.

In the Christian church the ecclesiastical head-dress is styled *mitra* and *infula*. The former, being originally characteristic of the Phrygians, is sometimes called 'Phrygium' by ecclesiastical writers of the Middle Ages (Marriott, *Vest. Christ.* 220). The *infula* is the long fillet of heathen priests and vestals. It was also a sacrificial ornament of victims (cp CHAPLET).

Polycrates (see Eus. *JIE* 5:24, cp 3:31, Jer. *de Vir. illustr.* 45) mentions that John the apostle became a priest, τὸ πέταλον πεφορεῶς. James, the brother of Jesus, according to Epiphanius (*Hær.* 29:4), was permitted to wear τὸ πέταλον ἐπὶ τῆς κεφαλῆς. The survival of the term πέταλον is of interest, even if it is not to be understood literally.

Gregory Nazianzen († 389 A.D.) uses *kidaris* of the priestly cap (*Orat.* 10:4); Jer. (*Ep.* 6:4 n. 13), on the other hand, employs *tuara*. According to Sinker (*Dict. Christ. Ant.*, s.v. 'Mitre'), there are no real grounds for supposing that an official head-dress was generally worn by Christian ministers during the first nine or ten centuries after Christ.

The mitre is not even now a badge of order, but only of dignity; not only are there mitred abbots, but in certain privileged chapters all the members on certain festivals wear mitres.

For the usages in the church in general cp Bunz, Herzog-Plitt, *RE* 8:44 ff. It is interesting to note that in the early Abyssinian church upon high occasions a turban (*matēmentia*) is worn along with a metal crown.

I. A. (§§ 1, 3); S. A. C. (§§ 2, 4, 5).

MITYLENE (ΜΙΤΥΛΗΝΗ, Acts 20:14 Ti. WH; in classical authors, and on coins, ΜΥΤΙΛΗΝΗ), the chief city of the island of Lesbos, and which in the Middle Ages it gave its own name, as now in its Turkish form, *Midiüllü*; it is itself now called *K'astro*, 'castle', from the Genoese castle which occupies the old acropolis. Its position is accurately marked in Acts, as midway between Alexandria Troas and Chios, viz., one day's run of Paul's vessel from either point. Mitylene lies on the SE. coast of Lesbos, on a peninsula which was once an island protecting two small but excellent harbours. The southern basin held fifty warships, and was closed by a chain; the larger and deeper northern basin, protected by a mole, was reserved for merchantmen (Strabo, 617); a narrow canal connected the two (Paus. viii. 30:2; Diod. 13:77). The roadstead, 7 m. N. of the SE. end of the island, is good in summer (hence Paul's vessel in April lay off the town all night), but in winter is exposed to the violent SE. and NE. winds. The city had from early times an extensive commerce, e.g., with Egypt as early as 560 B.C. (Herod. 2:178).

In the domain of literature Mitylene gained undying fame as the home of Alcaeus and of Sappho (θαυμαστόν τι χρῆμα, Strabo, *l.c.*). Its situation and buildings are often praised (Strabo, *l.c.*; Cic. *Leg. Agr.* 2:40, *urbis et naturae ac situ et descriptione edificiorum et pulchritudine in primis nobilitas*; Hor. *Ep.* 1:11:17; *Mitylene pulchra*; Virg. 1:6). Mitylene, therefore, like Rhodes, became a fashionable resort for Romans compelled to withdraw from public life (Cic. *Ad Fam.* vii. 3:5, *exsulant esse non incommodiore loco, quam si Rhodum me aut Mitylenas contulissent*; cp id. *Ad Fam.* iv. 7:4; *Ad Att.* v. 11:6; Tac. *Ann.* 14:53). In Paul's time it was a free city (Pliny *HN* 5:39, *Libera Mitylene, annis MII potens*), and claimed the title *πρωτη Λέσθου* (see Marq.-Momms. *Röm. Staatsrecht* 1:345).

Description in Tozer, *The Islands of the Aegean*, 134 f.

W. J. W.

ὡσανεὶ στέφανος ἐδημιουργεῖτο . . . мітра δὲ ὑπ' αὐτοῦ, τοῦ μὴ ψάθειν κεφαλῆς τὸ πέταλον, πρὸς δὲ καὶ κίδαρις κατασκευάσθη. κίδαρις γὰρ οἱ τῶν ἑθνῶν βασιλεῖς ἀπὸ διαδήματος εἰσβάσι χορηγοῦνται. Aristaeus (ed. Thackeray, apud Swete, *Introduct. to OT Gr.*), p. 536: ἐπὶ δὲ τῆς κεφαλῆς ἔχει τὴν λεγομένην κίδαριν ἐπὶ δὲ τῆς πύλης τὴν ἀμύγητον міτραν, τὸ καθηγιασμένον (cp Lev. 8:9 G) βασιλείου, ἐκτυποῦν ἐπὶ πέταλῳ χρυσῶν γραμμασιων ἁγίου ὄνομα τοῦ Θεοῦ. κατὰ μέσον τῶν ὀφρύων δὲ ἐξῆ πεπληρωμένον.

MIXED MULTITUDE. See MINGLED PEOPLE.

MIZAR, THE HILL OF (מִצְפֵּה [מִצְפֵּה]; [ΔΠΟ] ΟΡΟΥΣ ΜΙΚΡΟΥ; [*de monte minimo* [Jer.]], Ps. 426 [7]. It being assumed that the text is sound, Mizar has been thought to be the name either of one of the lower hills of Hermon (so G. ASM. *HG* 477; cp Che. *Ps.* ④); Kirkpatrick, Duhm), or of a mountain in the Gileadite ranges (Del., assuming the psalm to be Davidic), and modern names have been indicated which somewhat resemble Miz'ar (G. ASM., *l.c.*; *Th. L.-bl.*, 1882, p. 45, see Now.-Hupf. *Psalmen* 1604). But the conjunction of a little-known hill or mountain with such a famous mountain-range as Hermon is most improbable, and the phrase 'little mountain' (דרר כִּמְצֵר) has, therefore, been taken to be a designation of Zion, which, though outwardly insignificant, to the eye of faith was far grander than Hermon, because Yahwè dwelt thereon (433; cp 615¹⁵ [16] *f.*). In this case we must explain either (Smend, Baethgen) 'I think upon thee (O God!) far from the land of the Jordan and of the Hermons, far from the little mountain' (*i.e.*, though an exile from the land of Israel), or (Hitz.; Che. *OPs.* 115 316 *f.*; We.), 'I think upon thee now that I have reached the land (or 'above [all] the land,' as We.) of the Jordan and the Hermons (*i.e.*, the neighbourhood of the most famous sources of the Jordan), thou little mountain' (omitting the initial מ in דרר as due to dittography). Neither of these views, however, is satisfactory. There must be much deeper corruption than critics have suspected.

The passage (v. 6 [7]) must be treated, as a whole, from the point of view of a keen textual criticism. Probability is all that can be reached; but if we take this passage with others, in which a similar result seems almost forced upon us by criticism, the degree of probability may be considered to be high. Read therefore—

Preserve me, [O Yahwè] my God, from the tribe of the Arabians,
From the brood of the Jerahmeelites [rescue thou me].

The last word, תְּחַלְּטֵנִי, is restored from 431, where nearly the same restoration of the distich is required. כִּמְצֵר כִּמְצֵר is a corruption of a dittographed כִּמְצֵר יְהוּמְלֵימָה. See Che. *Ps.* ④, *ad loc.*

On Pss. 42.43 44 120 137 140, in all of which the Jerahmeelites (*i.e.*, the Edomites), and in some of the Arabians, are referred to, according to a plausibly emended text, as enemies of the Judahites or Judæans; see PSALMS, §§ 28; cp also LAMENTATIONS.

T. K. C.

MIZPAH (מִצְפָּה), 'the watchtower'; cp MIZPEH; ΜΑΨΦΑ [BNAFL].

1. A hill-town of Benjamin, Josh. 1826, where it is called Mizpeh (μασσημα [B], μασφα [A]), near Gibeon (Jer. 4112) and Jerusalem (1 Macc. 346), and, if Eusebius and Jerome may be followed, also near Kirjath-jearim (*OS* 278⁹⁷ 13814). ASA fortified it, 1 K. 1522 (τήρη σκοτιάν [BAL]), and Gedaliah the governor adopted it as his place of residence, 2 K. 25²³ (μασσηφαθ [B]) Jer. 4010 (μασσηφα [N]), but μασσηφαθ [Q] in v. 6 and Qms. 411 (μασσηφαθ [Q] v. 8). Into the great cistern constructed there by ASA, Ishmael, legend said, threw the dead bodies of the seventy pilgrims whom he had murdered after slaying the governor (Jer. 417-9). The hill on which Mizpah stood seems to have been regarded as sacred. The narrative in Judg. 21 (see v. 1) may be partly, and those in 1 S. 73-12 (μασσηφαθ [B] and A in v. 7³) 1017-24 (μασσηφα [A]) even altogether, untrustworthy from a historical point of view (cp We. *ProL.* ④, 258); but they would hardly have contained references to the sanctity of Mizpah if there had not been a holy place there from very early times (cp Bu. *Ri. Sa.* 185). According to Jerome it was one of the places where the ark rested (*Quasi. Heb.* on 1 S. 72; so also Eus. *OS* 278⁹⁷), and—a more valuable authority—1 Macc. 346 describes it as containing an ancient Israelitish 'place of

1 Names with the radicals mentioned by Smith are not uncommon in Palestine (*e.g.*, Wady Za'arah, S. of Baniās).

2 Cp Gen. 1920, where Zoar is called כִּמְצֵר, 'a little thing'; but the text may be corrupt (see *Crit. Bib.*).

3 In v. 5 θ sup ras B¹ 101, μασφατ. A¹ 1; A has v. 6 γ, v. 12 α and in v. 11 A om. In v. 16 A has μασφα.

prayer, 'such a spot perhaps as there was on the Mount of Olives (2 S. 1532, RV). It was at this holy place that faithful Israelites gathered when the SYRIANS had profaned the temple (1 Macc. 346 54). The thrilling account may illustrate Ps. 74 (Che. *OPs.* 94), even if we regard this psalm as pre-Maccabæan (see PSALMS, §§ 8 [β], 17 *f.*, 28 [v.]). We also hear of Mizpah as an administrative centre under the Persian rule (Neh. 37 [μασφα (L)]. BNA om. v. 7; 19 [μασφε (BA)], -α (L), μαμφε (N)). It was Robinson who first saw where with most probability its site may be placed (*BR* 1460)—*viz.*, on the mountain now called *Nehy Samwël*. This noble height rises 2935 ft. above the sea-level, and commands the most comprehensive view in southern Palestine, including within its range Jerusalem, which is only 4½ m. off on the NW. (cp 1 Macc. 346, 'over against Jerusalem'). On a lower hill to the N. lies the village of *el-Fib* (see GIBEON), which reminds us that the men of Gibeon and of Mizpah worked together on the wall of Jerusalem (Neh. 37).

Poels' attempt (*Le Sanctuaire de Kirjath-jearim*, 1894, part ii. chap. 1) to show that Gibeon and the town called ham-Mizpah were two distinct places on the same sacred hill, to which the name ham-Mizpah originally belonged, can hardly be taken seriously.

2. (מִצְפֵּה), Gen. 3149 Judg. 111134; מִצְפֵּה, Hos. 51; מִצְפֵּה גִלְעָד, 'Mizpeh of Gilead,' Judg. 1129). A town in Gilead where Jephthah resided; consecrated in sacred legend, as presented by E, by the compact of LABAN and JACOB. It is the RAMATH-MIZPEH of Josh. 1326, and is most probably to be identified with Penuel—*i.e.*, the citadel and sanctuary of Šalhad—though, to suit the present narrative of JE in Gen. 3146-54, it is plausible to identify it with Sûf, NW. of Jerash (see GILEAD, § 4).

3. A 'land' or district (מִצְפָּה) and a 'valley' (מִצְפֵּה) at the foot of Hermon, to the NE. of the waters of Merom, Josh. 113 (μασσημαν [B], μασσηφαθ [A]) 8 (μασσωχ [B], μασσηφαθ [F], μασ[σ]ηφα [L]). In MT, which is followed by RV, the land is called the 'land of Mizpah' (מִצְפָּה); but obviously the same region is meant, and we must read in both places either 'Mizpah' (L in both μασσηφα) or 'Mizpeh' (so Bennett, *SBOT*). In early times this district was inhabited by Hivites, or, according to a necessary correction, Hittites (see Moore, *Judges*, 81). Probably the Mizpah, or watchtower, was on some hill in one of the valleys of the Upper Jordan above Lake Hüleh. Robinson placed it at the mod. *Mutalleh*, a Druse village, on a high hill, N. of *Abil* and E. of *Nahr el-Hüshany*. This, however, seems to be not far enough to the east. Buhl (*Pal.* 240) suggests the site of the castle on the mountain above *Baniās* called *Kal'at es-Subbéeh*. Certainly the spot well deserves to be called Mizpeh.

T. K. C.

MIZPAR, or rather [RV] **Mispar** (מִצְפָּר; ΜΑΨΦΑ [AL]), a leader (see EZRA ii., § 8e) in the post-exilic list (*ib.* ii., § 9), Ezra 22 (ΜΑΛΦΑΡ [B])=Neh. 77. MISPERETH (מִצְפֵּרֶת; ΜΑΨΦΕΡΑΝ [B], ΜΑΨΦΑΡΑΔ [N], ΜΑΨΦΑΡΑΘ [A])=1 Esd. 58, ASPHARASUS (ΑΨΦΑΡΑΚΟΣ [BA]). This last form suggests a connection with Aspadata (ΑΨΦΑΡΑ) = ασπαδατης (Ctesias); so Marq. *Fund.* 35. Some other names, however, in the same verse favour a connection with Misrephath, another form of Zarephath (?); cp HASSOPHERETH.

T. K. C.

MIZPEH (מִצְפֵּה, *i.e.*, 'watchtower'; ΜΑΨΦΑ [BAL]).

1. A town in the lowland of Judah, Josh. 1538 (μασφα [BA], μασσηφα [L], φασμα [Ba^b mg]), mentioned in the same group with Lachish and Egton. Eusebius records a Maspha or Massema 'in the district of Eleutheropolis on the north' (*OS* 27919). This agrees with the position of Tell es-Sāfiyeh, which is 7½ m. NNW. from Beit Jibrin, and by Van de Velde and Guérin is identified with this Mizpeh (but cp GATH). There was,

however, a second Maspha from the way from Eleuthero-
polis to Jerusalem (Eus.). Jerome (*OS*² 1395) fuses
the two statements of Eusebius into one.

2. A town of Benjamin, Josh. 18:26 (μασσημα [B],
μασφα [A]). See MIZRAH, 1.

3. (מצפה מואב) a place in Moab visited by David in
his wanderings; 1 S. 22:3 (μασσημα [A]). Consistency
requires us to suppose the same place to be referred to
in 2. 5, reading מצפה for מצפיה (Klo., Bu., HPSm.,
Buhl). The geography of the section, however, is im-
proved if for מצפה we read מצור—i.e., the N. Arabian
Musri (see MIZRAIM, § 2 b), 'Adul-
lam' is probably a disguise of 'Jarahmeel,' and 'Hareth'
a corruption of 'Kadesh'; we should expect the original
of MT's 'Mizpah of Moab' to be 'Zephath (or Zare-
phath) of Musri.'

4. Mizpeh of Gilead (Judg. 11:29). See MIZRAH, 2.

5. A region by Mt. Hermon (Josh. 11:8). See MIZRAH, 3.
T. K. C.

MIZRAIM (מִצְרַיִם; ΜΕΣΡΑΙΝ [AE]; مِصْرَائِم mes-
rān; ΜΕΡΧ. var. ΜΕΣΤΡΗ. and [for the 'son' of Ham]
ΜΕΡΣΑΙΟΣ. var. ΜΕΣΡΑΙΟΣ. ΜΕΣΤΡΑΙΟΣ. ΜΕΣΡΑΜΟΣ
[Jos.]), or **Misraim**; the Heb. name for Egypt or
Lower Egypt, and hence, according to the prevalent
view, represented in Gen. 10 as a 'son' of Ham, as a
brother of Cush, and as the father of Pathrusim=
Pathros (Gen. 10:6 [P] 13:14 [J]): Gen. 10:6 ΜΕΣΤΡΑΙΜ
[D], 13 ΜΕΣΡΑΙΜ [E]; ΜΕΣΡΑΙΜ [L in both
verses]).

The termination has been commonly regarded as
dual, and as referring to the division of Egypt into
Upper and Lower. It is better, however,

1. Form and meaning of the name. to regard Misraim as a locative form,
developed out of Misram (see especially
E. Meyer, *GA* 1, § 42).

This view is rejected by Dillmann and König,¹ but gives the
easiest explanation of the facts, (1) that מִצְרַיִם, Misraim, is twice
expressly distinguished from PATHROS (q.v.) or Upper Egypt
(Is. 11:11 Jer. 44:1), and (2) that the collateral form מצור, Māsōr,
is also (see below) used of Lower Egypt. It is, moreover, the
only view which does justice to the Bab. and Ass. forms.²
These are Misri (Am. Tab., 21, etc.), Musur, Musuru, Mnsri,
and (in the Babylonian versions of the inscriptions of Darius)
Misir. There is also an old form Misšari (MI-İS-SARİ), which
occurs once in a letter from the king of Assyria to the king of
Egypt (Am. Tab. 15:2), while the Mitannite letters favour Masri
or Mizirri (Wi. Am. Tab. Glossary, 39³). The form Misšari
seems to Winckler to suggest miššār, מצור, as the right punctu-
ation of the form מצור; the Massoretic pointing māšōr, מצור,
is due to a faulty conjectural interpretation of Masor as
'fortification' or the like (cp Mic. 7:12, 13, and AV). Māsōr
(Misšōr) is generally recognised only in 2 K. 19:24 (= Is. 37:25)
Mic. 7:12 Is. 19:19. Very possibly, however, מצור (מצור) at one

¹ König's argument against Meyer (*Theol. Lit.-blatt*, June
19, 1896) is by no means cogent. That the Phœnician מצרם
might be a dual form, if there were no special reason to the
contrary, may be admitted. But there is such a special reason
(see above). König's reference (made already by Ges.) to an
old Egyptian appellation for Egypt—ta-ui 'the two worlds (or
lands)—is not more relevant than Naville's (in Smith's *DB*²,
861) to another title of Egypt (common in Ptolemaic times)—
Kebhūi, 'the two basins' (rather 'the two cool, or pleasant,
places')—and to the references to the two Niles (of Upper and
Lower Egypt) in the inscriptions. [Egyptian sacred poetry
revels in such allusions to the prehistoric two kingdoms (see
EGYPT, § 43). Egypt has a double Nile, two classes of temples,
etc. But these plays never entered into colloquial Egyptian,
hence they can never have influenced the Asiatics. It is even
questionable whether the designation 'both countries' (*tawi* or
tou) was constructed grammatically as a dual in common parlance
after 1600 B.C.—w. m. m.] Jensen's suggestion of מצרַיִם (*ZDMG*,
1894, p. 439), which is also rejected by König, is, however, not
impossible (in the Amarna inscriptions the usual form is MI-İS-
RI). It had already been made by Reisch (see Ebers, 190)
and Friedr. Delitzsch (*Par.* 309). Cp מצרַיִם.

² See Wi. *AT Unterr.* 168-174, esp. 170, and cp Schr. *KGF*
246 ff.; Del. *Par.* 308 ff.

³ Cp Misr in Minæan inscriptions, and Ar. Misr (Egyptian-Ar.,
Masr). Also old Pers. Mudhraya (from Ass. Musur, Musri),
and the form *Muṣpa* ascribed by Steph. Byz. to the Phœ-
nicians (?).

time appeared more frequently in the Hebrew texts. Sometimes
it may have been distorted or (see Klo., Che. on Is. 59:19)
mutilated by the ordinary causes of corruption; sometimes it
may have been altered into מצרים by editors, who may perhaps
have imagined that they saw a sign of abbreviation after מצר.
As to the meaning of the name we can be brief. Misraim is
certainly not *aque clausæ* (2 K. 19:24, Vg.), a view which
Naville (Smith, *DB*²) adopts, with the explanation 'water
enclosed in dykes or walls, basins or canals' (cp n. 1), nor
'double fortified enclosure' (Ebers, *Aeg. u. d. BB. Mos.* 187).
[W. Spiegelberg, *Rec. Trav.* 20 (1898), 40, attempted an Egypt-
ian etymology מצר, 'fortification, wall,' thinking that the
origin of Mizraim is to be sought for in the fortifications of the
eastern frontier of the Delta, especially at the entrance to
GOSHEN. As long as we cannot prove the use of מצר (?) in the
wider sense, this theory possesses little probability. Besides,
the pronunciation of the Egyptian word is doubtful.—w. m. m.]

Misraim, as the extended application of the name
Musur (Misir) in Assyrian (see §§ 2 a, 2 b) suggests, is
most probably an Assyrian appellative = 'frontier-land.'
See Hommel, *GBA* 550, n. 2; Wi., *AOF* 125; and
below, § 2 b, end.

Schrader long ago pointed out (*ZA*, 1874, p. 53)
that the name Musri in the Assyrian inscriptions did
not always mean Egypt.

2a. N. Syrian Mušri. Winckler, however, to show that there
was not only a N. Syrian but also a N.

Arabian Mušri, and to bring this discovery into relation
to OT criticism.

About 1300 B.C. (Shalmaneser I.) and again about
1100 B.C. (Tiglath-pileser I.) we find the name Mušri
applied to a state in N. Syria, S. of the Taurus, which
also included parts of Cappadocia, Cataonia, and
Cilicia, and reached southward perhaps as far as the
Orontes (see *RP*² 1109 f.; *KB* 135; Rogers, *Bab. and
Ass.* 212). In Ašur-nasir-pal's time it is called Patin (so
Wi., cp PADDAN-ARAM); but under Shalmaneser II.
we again hear of a state—it is a very small one—called
Mušri, which sent auxiliaries to Benhadad at the battle
of Karkar. As is pointed out elsewhere (see JEHORAM,
§ 2), this must be the state referred to in 2 K. 7:6 ('the
kings of the Hittites and the kings of מְצָרִים'), unless
indeed we can believe (as J. Taylor well puts it) 'that
the local Egyptian kings would serve as *condottieri* for
Israel' (*Exp.* T 7406 f.). Such a relation, however,
might quite conceivably have been entered into by the
kings of the Hittite territory and its neighbourhood.
We may even go a step further, and criticise the common
interpretation of 1 K. 10:28 f., 2 Ch. 1:16 f. The question
is, did the agents of Solomon procure horses and
chariots (both for Solomon and—as the text stands—
for the Hittite and Aramæan kings) from Egypt or from
the N. Syrian land of Mušri? It must be admitted
that the critics before Winckler were somewhat credulous.
Certainly, it may be assumed that the Egyptians bred
horses for their own use.¹ But is it in the least probable
that they ever had an export-trade in horses, when we
consider the lack of extensive pastures in Egypt? Now
that we know of a N. Syrian and Cilician Mušri, we
cannot help interpreting the מצרים in 1 K. 10:28 2 Ch. 1:16,
as the name of that region. It would, indeed, be passing
strange if, while the Egyptians themselves imported
powerful stallions from N. Syria,² the Israelites should
have imported horses from Egypt.³ But did Israel
import chariots as well as horses from Mušri? Must the
מצרים of 1 K. 10:29 be the N. Syrian Mušri? We
know that the Egyptians had the most perfect of chariots.
Though in the first instance they had imported chariots
from Syria, their workmen soon became independent
and improved upon their teachers (see Maspero, *i.e.*,
and cp CHARLOT, § 5). If we believe that Solomon
had close friendly relations with Egypt, we may, if we

¹ See Erman, quoted by Wi. (*op. cit.* 173).

² See Maspero, *Struggle of Nations*, 215, with the references.

³ The 'great horses' which Ašur-bāni-pal (Annals, 240; *KB*
2169) took as booty from the Egyptian city of Kipkip may or
may not have been all bred in Egypt. Nowhere is any reference
made by Assyrian kings to Egyptian horses as tribute; the
supply would have been insufficient. Ašur-bāni-pal himself gave
chariots and horses to Necho (Annals, 214; *KB* 2167). See
HORSE.

will, suppose that he procured a few chariots from Egypt as models,¹ and that the compiler of 1 K. 10 28 *f.* interwove a tradition respecting the chariots imported from Mizraim (Egypt) with a tradition respecting the import of horses from the N. Syrian Mušri (and Kuē, or E. Cilicia). The connection of Solomon, however, with Egypt is very disputable; it was probably with the N. Arabian Mušri that he was connected by marriage. Moreover, as we shall see presently, Solomon's agents were not Israelites, but merchants of the Hittites and of Syria. These merchants had of course no dealings with Egypt. The source of supply for Solomon's horses and chariots was the N. Syrian Mušri; not only this district, however, but also the region called Kuē, or Eastern Cilicia. מִצְרַיִם in *v.* 28, as Lenormant (*Orig. de l'hist.* 39) and Winckler (*AT Unt.* 174) have pointed out,² most probably enfolds this long-lost name (Kuē).³ We know from Herodotus (390) that Cilicia was a famous horse-breeding country, and from Ezekiel (27 14) that the Tyrians obtained their horses from Togarmah, at any rate from Asia Minor.

The whole passage should possibly run nearly as follows:—'And the source from which Solomon's horses were derived was Mušri, and the king's young steeds used to be fetched from Kuē. And a chariot was estimated at 600 pieces of silver. And [] pieces of silver (they used to pay) for a young steed to the merchants of the Hittites and of Syria, by whom they were exported.' With Ruben (*JQR* 10 543) read מִצְרַיִם for מִצְרַיִם; the word should close *v.* 28. For מִצְרַיִם read מִצְרַיִם (see Del. *Ass. HWB*, *s.v.* 'Suḥūru'), and for מִצְרַיִם read מִצְרַיִם transferring it to *v.* 26f. Omit וּמִצְרַיִם (Ruben). For מִצְרַיִם read perhaps מִצְרַיִם (Che).

In 2 K. 7 6 (siege of Samaria) we should also apparently read מִצְרַיִם, and explain it of the N. Syrian Mušri (see Jerohoram, § 2).

We turn to another Mušri. It was not, as Schrader (*KB* 221) thought, over the marches towards the 26. **N. Arabian Mušri.** Egyptian Mušri that Tiglath-pileser appointed Idi-bil'il (see ADBEEL) governor, but over a distinct, though not far distant, Mušri in N. Arabia, bordering on Edom. Nor was it in Egypt that Hanunu of Gaza and Yaman of Ashdod sought refuge from the Assyrians, but in a nearer country, the N. Arabian Mušri, which was in Yaman's time under the supremacy of the king of Meluhha (in N. Arabia; see SINAI, map). Further, the king whom Sargon calls 'Pir'u šar (mat) Musuri' was, not the Egyptian Pharaoh (Schr. *KAT* 397), but a N. Arabian king (the next sovereign mentioned is Samsieh, queen of Arabia). This turtan (= tartan, or general, is Sib'e; he joined Hanun of Gaza, and fled from the field of battle; he is commonly but incorrectly known as 'So, king of Egypt' (see SOI. Now it was only to be expected that some references to this Mušri in the OT should become visible to keen eyes. It is with a shock of surprise, however, that we gradually find out how many they are.⁴ We are still further startled to hear that there was not only a Mušri but also a Kus (Cush) in N. Arabia (see CUSH, 2); we find, however, that a flood of light is thrown thereby on a very large group of interesting passages. Caution no doubt is necessary. Winckler's theory, that the belief in the early residence of Israelitish tribes in Egypt arose simply and solely out of a confusion of the N. Arabian with the Egyptian Mušri, is at any rate very plausible (see MOSES, §§ 2 ff., but cp EXODUS i.).⁵ And it is in the

* More than a few chariots for Palestine would have taxed the resources of the Egyptians too much. They were not rich in timber.

² Cp Ki. ('Chron.' *SBOT*), Maspero (*Struggle of Nations*, 740). Maspero's theory of 1 K. 10 28 *f.* is improbable.

³ See Schr. *KGF* 236 ff.; Tiele, *BAG* 153; cp in 1 K. 8 83 ἡ θεοκοινη and the Hexaplar variant ἐκ κοινῆ; Ἐ¹ adds καὶ ἐκ θυμιασκῶν.

⁴ The biblical references which follow are partly due to the keen insight of Winckler. Take them altogether, and they seem almost to open up a new stage in OT criticism and history; but the student will be amply rewarded for the trouble of investigating and appropriating even a few of the chief results.

⁵ It is no drawback to Winckler's originality that an English-

man, Dr. C. T. Beke, in 1834 anticipated him as to the general situation of the מִצְרַיִם of the Exodus (see EXODUS, § 4; MOSES, § 6). Though noticed in due time by Ewald, the leading OT scholar of the day, the suggestion produced no impression upon criticism. Internal evidence was not enough; archaeological data were necessary to complete the proof, or at any rate to enforce a respectful consideration of the hypothesis.

highest degree likely that, in the original tradition, Hagar ham-miṣriṯh (EV 'the Egyptian') came not from Egypt but from N. Arabia (see BEER-LAHMI-ROI), and that the Pharaoh (Pir'u?) or Abimelech (Jerahmeel?) with whom, in duplicate forms of the same story, Abraham and Isaae are brought into connection, was a king of the N. Arabian Mušri (see ABIMELECH, GERAR). In the description of the district which Lot chose it is probably Mišrim, not Mizraim, that should be read, though some will demur to this on account of the interference with the text which Winckler (rightly) allows himself (Gen. 13 10 *f.*). There can hardly be a doubt, too, that ABEL-MIZRAIM [*g.v.*] originally meant 'Abel in the land of Mušri,' and that the phrase אֶבֶל מִצְרַיִם originally meant, not 'the Egyptian Wady,' but 'the Wady (or Torrent) of Mušri' in N. Arabia (see EGYPT, RIVER OF).

The present writer has sought to show that the land to which Abraham was sent with his son Isaac, according to Gen. 22, was Mušri, not 'Moriah' (see ISAAC, MORIAH), and that Dinhabah (Gen. 36 32), and Pethor, and that Balaam came (Nu. 22 5a) are merely corruptions of Rehoboth (by the river of Mušri), and Mezahab and Dizahab corruptions of מִצְרַיִם (Gen. 36 30; Dt. 1 1; see BELA, MATREB, PETHOR, etc.). So too the family of Jarha traced its origin, no doubt, to a Mišrite or Mušrite, not to an Egyptian ancestor (see JARHA, JERAHMEEL). The slave left behind by an Amalekite in the story of the capture of Ziklag (1 S. 30 13), and the tall foe of Benaiah, who was slain by his own spear in the hand of Benaiah (2 S. 23 21), were also both Mušrites. It was the king of Mišrim who gave his daughter in marriage to Solomon and conquered Gezer for his son-in-law (1 K. 9 16; see SOLOMON), and Mišrim, not Mizraim, should be read in 1 K. 5 1 [421] 865. It was also with the N. Arabian Mušri that JEROBOAM [*g.v.*] was connected through his mother, and there he took refuge from the wrath of Solomon; and the same country gave a home to another adversary of Solomon (who likewise had a Mušrite mother), Hadad the Edomite (see HADAD, § 3).

That Mušri had close relations with Palestine in later times, we have seen already (story of Hanun and Yaman). The story of Elijah also contains indications of the same important fact. It was probably 'Arabians,' not 'ravens,' that the original text represented as the friends of Elijah, and the 'brook Cherith' should be the 'wady of Rehoboth' (see CHERITH, RAVEN). A pre-exilic writer too, gives, most probably, a list of districts bordering on N. Arabia as 'sons' of Mišrim (not Mizraim) in Gen. 10 13 *f.*, whilst Mišrim itself is, according to P, a 'son' of Ham (Jerahmeel).¹ P of course is not himself pre-exilic; but we can at any rate refer to the prophecies of Isaiah; Is. 20 in its most original form, and 306 7 a, according to the original meaning, speak of Mišrim not of Mizraim. (See 'Isaiah,' *SBOT* 98, 102. On 1 K. 14 25, see SHISHAK.)

The N. Arabian Mušri is also very probably referred to in Am. 19 and 39,² also, by an archaism, in many other late passages, only a few of which can be mentioned, e.g., Is. 43 3 45 14 (*SBOT*, 140), Joel 3 [4] 19, Hab. 3 7, Lam. 4 21 56, Ps. 60 11 [9] 838 [7] 874 120 5 and, probably, elsewhere in the Psalter (see PSALMS, LAMENTATIONS).

Glancing once more in conclusion at the origin of the form Mizraim, we cannot help seeing how well E. Meyer's view (see § 1) agrees with the theory adopted

man, Dr. C. T. Beke, in 1834 anticipated him as to the general situation of the מִצְרַיִם of the Exodus (see EXODUS, § 4; MOSES, § 6). Though noticed in due time by Ewald, the leading OT scholar of the day, the suggestion produced no impression upon criticism. Internal evidence was not enough; archaeological data were necessary to complete the proof, or at any rate to enforce a respectful consideration of the hypothesis.

¹ According to the view proposed here and in *Crit. Bib.*, Gen. 10 13 *f.* should run thus (on *vv.* 10-12 see NIMROD)—'And Mišrim begat Carmelites, and Meonites, and Baalathites, and Tappuhites, and Zarephathites, and Ziklagites, and Rehobothites, from whence came forth the Pelīšim [to fight with David; cp 2 S. 21 18-22]. All these are places in S. Judah or on its border; the substitution of 'Rehobothites' for 'Caphtorim' and of 'Zarephathites' for Pathrusim may specially deserve attention.

² See the cogent argument of Wl., *Musri* 2 (1898), 8 *f.* It should be noted that Am. 1 10 corresponds with 39 where the 'palaces' or 'fortresses' in the land of מִצְרַיִם are mentioned. The writer assumes that the capital of Mušri was called מִצְרַיִם. See AMOS, § 9.

³ 'O Tyre and Zidon (צֵר וְצִדוֹן) should probably be 'O Mišsur (מִצְרַיִם); N. Arabia is meant. 'Philistia' (פְּלִשְׁתִּים) should perhaps be 'Zarephath,' a place and district which were reckoned to the N. Arabian Mušri. See ZAREPHATH.

above from Winckler. In fact, in a Minæan inscription (*Hal.* 535) we find the terms Miṣran and al-Miṣr used indifferently for the same N. Arabian region (Wi. *AOF* 337). See especially Winckler, *Musri, Meluhha, Ma'in*, I. and II. in the *MIG*, 1898. It should be noticed in connection with this subject (1) that there are textual phenomena—too many to be mentioned here—which strongly favour the theory that מִצְרַיִם is often wrongly pointed בְּצַרְיִם; (2) that historical results are appearing which clear up various obscure parts of the Hebrew historical tradition; and (3) that there are other ethnics and place-names which have been misread in certain contexts, and which, if correctly restored, illustrate and confirm the view here given respecting בְּצַרְיִם, among which may be especially mentioned מוֹאָב for מִצְרַיִם (see MOAB, iii.), שֶׁבַם for בְּצַרְיִם (see SHECHEM, and SHECHEM, TOWER OF), עֲרַיִים for עֲרַיִם, עֲרַיִים for Jerahmeel, Jerahmeim (see JERAHMEEL, MOSES, § 6 f.), כְּרִית, חֲבֹרָה, and כְּרִית for חֲבֹרָה (see REHOBOTH), נִשְׁרָא for נִשְׁרָא (see GESHUR, 2), קִרְיָה for קִרְיָה (see SISERA), etc. It is not necessary to accept all these in order to do justice to the arguments in favour of בְּצַרְיִם (and בְּצַרְיִם); but it is needful to see that the foundations of Israelite history have to be re-examined, and to realise that we have now fully passed the stage of merely speculative inquiry, and are reaching or have reached that of well-assured methodical investigation. If our general theory is sound, nothing indeed is stranger than the regularity with which scribes make their mistakes, and editors, under the influence of historical theory, their conjectural corrections. T. K. C.

The following illustrative passages from the inscriptions, relative to the N. Arabian Muṣri and Kuš, are taken chiefly from Schrader, *KAT*(2):—

1. p. 289, l. 73. Šarrāni māt Muṣri, the kings of Muṣur, mentioned along with the kings of Miluḥḥi (cp 80, 81).
2. p. 255, l. 19 ff., and Wi. *AOF* i. 26. Hanunu of Gaza fed to māt Muṣri. Cp 396 f.; the same Hanunu joins Sab-i, who is called siltannu (or turtannu) māt Muṣri, on which see Wi. *AOF* i. 26 f. Both together march against Sargon at Raphia. In l. 3 of the second inscription pir'u šar māt Muṣri occurs. Pir'u is not, as Schrader supposed in 1883 = Pharaoh, but the name of a N. Arabian king; he is mentioned with a N. Arabian queen, Samsieh, and a Sabæan, Itamar.
3. p. 398, l. 6 f.; cp Wi. 27. Sargon advances against Yaman; who flees 'ana iti māt Muṣuri ša pa-at māt Miluḥḥa innabit'—i.e., towards the district of Muṣur which belongs to Meluḥḥa. See ASHDOD.
4. p. 301, l. 23; Wi. 27; šar māt Muṣuri mentioned between Ashkelon and Ekron-and-Meluḥḥa—i.e., the N. Arabian region, including, as Wi. contends, the lands of Muṣri and Kus.
5. A fragment (Rm. 284) of Esar-haddon's Annals (Wi. *AOF* ii., 17 f.). 'Esar-haddon, king of Aššur, *sakkanak* of Babylon . . . Kus, whither none of my fathers . . . (messengers) had sent, [answer] bad not come back, . . . whither birds do not fly (?).'
- This is illustrated by the description which Esar-haddon gives in a fragment of his Annals (Budge, *Hist. of Esar-haddon*, 114 ff.; cp Wi. *Unters.* 97 f.), in which the king, speaking of his second Egyptian campaign, says, 'From the country of Egypt the camp I withdrew, and to the land of Meluḥḥa I set straight the road (expedition) . . . Four kasbu of ground, a journey of two days, snakes (with) two heads . . . of death, and I tramped upon . . . gazelles, of lizards winged (?). . . The god Merodach, the great lord (to my) help came, he saved the life of my army.' This passage, indeed, is of illustrative value, not only for the frequent relation to Kus just quoted, but also for the striking description in Is. 30 66 7a, which (see ISAHIAH [BOOK], § 11) really refers to the flight of Hanunu of Gaza to Pir'u king of the N. Arabian Muṣri. The Assyrian and the Hebrew descriptions of the inhospitable region traversed are in singular agreement. We should remember, in reading the former, that Esar-haddon sought to bring all Arabia under the supremacy of Assyria.
6. Esar-haddon's account of his tenth campaign (Budge, 117). The phrase 'which (is called) in the language of the men of the land of Kus and Muṣur' can hardly refer, as Budge thought in 1880, to Ethiopia and Egypt. The order of the names would have been the reverse. So Winckler, *Musri* ii., 2, who gives another illustrative passage which need not be quoted.

MIZZAH (מִצְחָה; § 32 n.), one of the four 'sons' of Reuel b. Esau; Gen. 36 13 17 1 Ch. 1 37 (in Gen. MOZE, but MOZAI [D] in v. 17; in Ch. OMOZE [B], MOXE [A], MAZE [L]). See EDOM, and cp GENEALOGIES i., § 7, col. 1665.

MNASON (ΜΝΑΣΩΝ [Ti. WH]), a man of Cyprus, and 'an old disciple,' in whose house in Jerusalem Paul lodged on the occasion of his last recorded visit to that city (Acts 21 16), the apostle and his party having been conducted thither by the friends from Cæsarea.

In EV Mnason is represented as having accompanied the party from Cæsarea; but ἀγορτες παρ' ὧν ξηισθόμεν Μνάσωνί τινι ought rather to be resolved into ἀγ. πρὸς Μνάσ. ἵνα ξηισθόμεν παρ' αὐτῶ, and translated 'bringing us to one Mnason . . . with whom we should lodge.' D Syr. p. marg. for ἀγορτες κ.τ.λ. reads as follows; οὗτοι δὲ ἤγαγον ἡμᾶς πρὸς οὓς ξηισθόμεν, καὶ παραγενόμενοι εἰς τινὰ κώμην ἐγεγόμεθα παρὰ Μνάσωνι Κυπρίῳ, μαθητῆ ἀρχαίῳ. κάκειθεν ἐξίόντες ἤλαθμεν εἰς Ἱερ., ὑπεδέξαντό (Tisch. ὑπέδεξαν) τε ἡμᾶς ἀσμένους οἱ ἀδελφοί—thus making out Mnason to have been Paul's host, not at Jerusalem, but at some village intermediate between Cæsarea and Jerusalem. The reading is accepted by Blass, Holtzmann, and Hilgenfeld; but, as Wendt (*ul. loc.*, 1899), remarks, it is not easy to see how such a reading, had it been the original one, should have disappeared from the received text, whilst, on the other hand, its introduction into the received text may be easily explained as due to a certain difficulty caused by v. 17, which seemed to imply that Paul did not arrive in Jerusalem until after he had been with Mnason.

Mnason is conjectured to have been a Hellenist and to have belonged to that circle of the (Hellenistic) 'brethren' by whom Paul was received gladly the day before he presented himself to James and the (Judaistic) elders (v. 17 f.). The designation 'old disciple' (ἀρχαίος μαθητῆς) is perhaps to be associated with the 'at the beginning' (ἐν ἀρχῆ) of Acts 11 15; he may have been one of the men of Cyprus who were driven from Jerusalem by the persecution after the death of Stephen, and may have been first introduced to Paul at Antioch.

MOAB

Name (§ 1).	Cities (§ 9).
Boundaries (§ 2).	Neighbours (§ 10).
Country (§§ 3-6).	History (§ 11 f.).
People (§ 7).	Moab and Israel (§ 13).
Roads (§ 8).	More OT ref. (§ 14).

The exact form of the name is tolerably certain; Heb. מוֹאָב, Gen. 19 37, and 178 times (acc. to BDB), once

1. Name and geographical terms. מוֹאָב; 2 S. 8 12; Ἔ Μωαβ, Μωαβ- [E]ΙΤΗC, Η Μωαβ[E]ΙΤΙC; Ass. *Mu'-a-ba*, but also *Ma'-ba*, *Ma'-ab*, *Ma'-a-b* (Schr. *KAT* 140, 257, 355 and

Glossary; Del. *Par.* 294 ff.), MΙ Μωαβ. The etymology offered in Gen. 19 37 is hardly sufficient proof that Mō'ab was ever slurred to Mē'ab, though such change was possible (Nestle, *St. Kr.*, 1892, p. 573). The etymology in question is given in the Greek of Gen. 19 37, λέγουσα ἐκ τοῦ πατρός μου, which Ball (*SBOT*) adds to the MT: לאמר מואבי. Neither this derivation, however, nor an alternative of similar meaning (Ges. *Thes.*) can be the real one. The form seems participial, and the Heb. יָמָא, 'to desire,' has been suggested, as if Moab = 'the desirable' land or people. It is more in accordance with what we know of the Moabite tongue to seek for the root in Arabic, where, however, the only possible one is *wa'aba*, 'to be affected with shame or anger.'

To this question is allied the other, of the original and principal object of the name. Some authorities (e.g., Bennett in Hast. *BD* 3493) take this to have been the land. The Hebrew evidence, however, rather points to the people.

It is indeed doubtful whether in any OT passage 'Moab' by itself means the land. BDB s.v. cites Nu. 21 11 as a passage where the land is meant; but in v. 13 Moab is parallel to the gentile Amorite; in v. 15 also it is the people. 'Moab' is not necessarily the land even in Judg. 3 29, nor in Am. 2 1 f., nor Zeph. 2 9 (parallel to Ammonites); and everywhere else the people are obviously meant.

This evidence is confirmed by the facts: that Moab has not survived as a geographical term; that the Greek translators found it necessary to form the geographical expression Μωαβίτης; and that similarly in Hebrew itself when the territory is intended one or other of several compound expressions is used: מוֹאָב אֶרֶץ, 'land of Moab' both in D (and Dt. 1 5 28 9 [29] 1 34 5 f. and Dt. passages in other books, e.g., Judg. 11 15 f.) and

in P (Dt. 32.40); אֶרֶץ מוֹאָב, 'territory of Moab' E (? Nu. 21.20); מוֹאָב in P (Gen. 36.33) and in Ruth 1.17, 6.26. Other names for parts of the territory are אֶרֶץ מוֹאָב, 'the tableland,' in P (Josh. 13.10 to 16.7. 208); probably also שְׂדֵי מוֹאָב (1 Ch. 5.16, cp HG 5.43) from the same root; מְדִבְרַת מוֹאָב, 'wilderness of M.' (Dt. 2.8) = אֶרֶץ קְדֵמוֹת, 'wilderness of Kede'moth' or 'the eastern parts' (Dt. 2.20); אֶרֶצוֹת מוֹאָב, 'steppes of M.,' the parts of the Arabah opposite Jericho on the E. of Jordan: always in P (Nu. 22.1 26.363 31.12 33.50 36.13 Dt. 34.12 8 Josh. 13.32); אֶרֶץ יַאֲזֵר, 'the land of Ja'azer,' is used by JE (Nu. 32.1) for the bulk of the country; and in Ezek. 25.9 we find בְּתֵר מוֹאָב, 'shoulder of Moab,' doubtless meaning the ridge above the Dead Sea.²

The natural boundaries of the land of Moab are well defined except in the N., where there is practically no frontier. To the E. lies the Arabian desert; but even here the line between arable land, on which men may settle, and the real desert suitable only for nomads, is indeterminate.

2. Boundaries. As the ruins of towns, however, all cease before the Hajj (Mecca pilgrimage) road is reached, and as very few of the wadies rise farther E., the road may be taken as a conventional boundary in that direction. On the S. Is. 15.7 gives the נַחַל הַתְּרֵבִים ('torrent valley of the Poplars' - see ARABAH [BROOK]) as the frontier; this is probably the long Wady el Hasy (or Hesi or Hessi of the PEF reduced map, or el-Ahsā of some travellers), running up SE. from the south end of the Dead Sea, and described by Doughty (*Ar. Des.* 126) as dividing the uplands of Moab from those of Edom (the אֶרֶץ עֲדוֹם, 'wilderness of E.,' 2 K. 38). On the W. the boundary was the Dead Sea and the Jordan. On the N. and NE. lay the territory of Ammon; but here there are no natural features conspicuous enough to form a boundary. When Moab's political frontier lay so far N. it probably took a diagonal direction, running SE. from the torrent valley now called W. Nimrin, to the present Hajj road: there are no Moabite towns identifiable at any distance to the N. of W. Hesbān (but see under AMMON and JAZER). Within these boundaries, measuring from the W. Nimrin on the N. to the W. el-Hasy on the S. and from the Dead Sea coast on the W. to the Hajj road on the E., we get a territory about 60 m. long by 30 broad; but the actual utmost length of Moab may have been rather under than over 50 m.; of the breadth, not more than two-thirds was ever cultivated or settled land.

The bulk of this territory consists of high tableland on much the same level as the great deserts to the E.

3. Character of region. of it, but broken by several wide, deep, and precipitous cañons across the greater part of its breadth, and by many shorter, but as abrupt, glens immediately above the Dead Sea.³ In other words, Moab is but the cracked and gaping edge of the great Arabian plateau. The elevation is from 2300 to 3300 above the Mediterranean, or from 3600 to 4600 above the Dead Sea;⁴ rising slowly from N. to S., and as a rule a very little higher along the W. edge (before the promontories run out) than towards the desert, to which there is a slight dip. The geology is the same as that of the range on the other side of the

¹ [It is not impossible that in documents used by the writers of our present Hexateuch the geography differed in important respects from that which we find in this work, and that the geographical difficulties which this work presents are largely owing to this. See special articles on the place-names, and WANDERINGS. Thus 'Moab' may often have come from Mišsur (the N. Arabian Mušri; see MIZRAIM, § 2 b), and 'Arbath-Moab' may have been corrupted out of 'Arāb-mišsur.—T. K. C.]

² See col. 3170, n. 2.

³ The surface falls into two parts: N. of W. Wāleh there is a rolling plain, now part of the Belkā, and probably the *Mišūr* of Josh. 13.10, etc. (see § 1); it is broken only by short glens in the W. From W. Wāleh southwards the surface is broken as far E. as the desert by the great cañons.

⁴ The PEF Survey Maps give the following heights from N. to S.: Elealeh 3064 (on a height above the surrounding plateau); Hesbān 2964, Mt. Nebo 2643 (rather below the plateau); Medeba 2380 (?); other neighbouring figures are 2600, 2700, 2800; Kerak is 3323, Mōteh 2800, Jafar 4114 (?). The figures on the Hajj road from N. to S. run 2400, 2700, 2500, 2900.

great Jordan fault: a basis of Nubian sandstone (as can be seen in the cañons and along the Dead Sea coast) rising to 1000 ft. above the Mediterranean; upon that a crystalline limestone some 1500 ft. thick; and then 500 ft. of soft cretaceous limestone, on which lies the soil of the plateau.¹ The springs all rise at the junction of the hard and soft limestone. Thus the plateau itself is without them; but they are found in all the cañons and glens, which for the most part have in consequence perennial streams. As throughout Eastern Palestine, there are volcanic features: scattered outbreaks of black basalt, many of them with warm and sulphurous fountains. The rainfall is 'fair' (Wilson, *PEFQ*, 1899, p. 309), 'the climate colder than that of W. Palestine, and snowstorms² are not uncommon in winter and spring, and then the easterly winds are very cold. The summer is hot, but the nights cool' (*ibid.*).

Seen from Western Palestine, with the Dead Sea between, Moab presents the appearance of a mountain-wall (mountains of the ABARIM [q.v.]), the red sandstone glowing above the blue waters, and broken only by two or three valleys, of which the Mōjib or Arnon offers the widest gap. Seen from the Jordan valley, the range of 'Abārim breaks up into what seem separate mountains, rising from the Dead Sea by slope and precipice to a height of 3000 and 4000 ft.; but in reality these are not so much mountains as piers or promontories of the plateau, at pretty much the same level as the latter. Behind them runs, a very little higher than they, its long western ridge (already referred to), from which the plateau slopes very gently to the desert.

The general exposure of the plateau is thus eastwards and to the desert; the slight western ridge shuts out the view to the W. From the similar geology, the scenery of the plateau is very like that of the hill-country of Judaea. In most localities one would not know the difference, except that in Judah the inhabitant always feels the great gulf lying to the E. and isolating the land from the rest of Asia; whilst from Moab the open desert rolls eastward without trench or bulwark between. This fact is pregnant with much of the distinction between the histories of the two countries. In Moab you never feel out of touch with Arabia; but Western Palestine belongs to the Levant.

The limestone soil of Moab, though often shallow, stony, and broken by ridges and scalps of rock, is extremely fertile, and produces, without artificial additions, large crops of wheat. Every traveller has been impressed with this. Visiting it in March, Bliss calls it 'the green plateau' (*PEFQ*, 1895, p. 205); even in July (1891), when the present writer was there, though the general aspect was brown and white, the amount of edible grass was considerable and the still un-reaped fields were heavily laden with corn. In the town of Kerak, Doughty says (*Ar. Des.* 122, cp 12 f.) that grain 'is almost as the sand.' Where there is no cultivation the high healthy moors are tolerably covered with rich aromatic pasture and scattered bushes of 'retem' or broom; and in the hollows, upon the non-porous limestone, the grass grows high and thick (*ib.* 27), and even the surrounding slopes are in spring 'staidly green' (Bliss, *op. cit.* 213). With the nomadic character of so many of the present population, there are few vineyards (only about Kerak); but the English survey discovered many ancient winepresses, especially about Hesbān and about Sibmah in the Jordan valley. The plateau itself is almost absolutely treeless,³ and the slopes towards the Jordan valley bear little more than thorns and thistles; but in the well-watered cañons there is much bush, tamarisks are frequent, and especially long lovely groves of oleander; in places rushes and ferns grow luxuriantly. Consequently there is a wealth of bird-life (Tristram, *Land of Moab*); wolves, jackals, hyenas, gazelles, wild cows, and the *beden* or ibex are

¹ Cp Conder, Append. A to *PEFM, Heh and Moab*; Wilson, *PEFQ*, 1899, p. 307.

² In Feb. 1898 Brünnow was delayed by deep snow in the Belkā' (*MDFP*, 1899, p. 24).

³ Whilst Gilead is thickly wooded, the woods cease S. of the Jabok; here the only wood is the Hīsh el-Amriyeh. See *PEF Survey, E. Pal.*, 109, cp group of firs at eš-Šinōbarāt, i.e., 'the Firs' (*idem*, 220).

all found (*Heth and Moab*, 122 f.). Bees abound, and there is considerable cultivation of honey.

The principal valleys with watercourses and intervening mountains or headlands are the following, beginning from the N. First, there are a dozen

4. Watercourses and headlands. or more short watercourses (of which the longest is hardly 16 m.) falling rapidly from the surface level of the hard limestone, 2500 ft. above the Mediterranean, by more or less narrow glens, almost straight into the Jordan valley and Dead Sea, 1290 ft. below the Mediterranean. They contain shallow burns or brooks of water. The chief are the Wādies Nimrīn, Kefreīn, Kuṣeib, Ḥesbān, 'Ayūn Mūsā, el-Jideid, el-Meshabbēh. 'Ain Ḥesbān (see HESHBON) is about 500 ft. below the village of that name, and gives birth to a considerable stream of pure water in a valley with many gardens and some ancient ruins. The headland between Wādī Ḥesbān and W. 'Ayūn Mūsā, el-Meṣūkkār, is probably the biblical BETHPEOR (*q. v.*; מְעוֹר probably = 'gorge' or 'pass'). The next headland, that to the S. of the W. 'Ayūn Mūsā, still bears the name Nebā, and may [as the text stands] confidently be identified with the Mt. Nebo of P, for which E and D give 'the Pisgah' (see *HG*, 563 f.; but cp NEBO, MOUNT). The ASHDOTH PISGAH are the barren terraces and steep slopes, covered with thistles only, which fall down into the W. 'Ayūn Mūsā, and the Seil el-Ḥery or W. Jideid. The W. 'Ayūn Mūsā would therefore be the 'glen' of Nu. 21 20; though some prefer for this the W. Ḥesbān. The headland S. of W. Meshabbēh is taken by Conder and others to be Bethpeor; behind it on the plateau is Mā'in, probably BAALME'ON.

After this series of short watercourses and intervening headlands we have the three large cañons, which, with some of their tributaries, break from the desert itself. At first broad, shallow basins, they slowly shelve westward, narrowing as they deepen to some thousands of feet below the level of the plateau; with colossal cliffs and, in some places before they reach their mouths on the Dead Sea coast, narrow ravines, almost impassable.

The first of these great trenches is the Wādī Zerḳā Ma'in, with sources so far N. as the southern side of the watershed from the 'Amīnān, in Ammonite territory, and draining the whole of the northern plateau. The higher elevation of the plateau to the S. prevents any but the most meagre of tributaries from that direction. Ten miles from the Dead Sea the W. Zerḳā Ma'in is nearly 2 m. wide from lip to lip and 1400 ft. deep. The whole of the stream in the Wādī (not merely the hot wells upon it) appear to be the Καλλιρρόη, Callirrhoe, of Josephus (*Ant.* xvii. 65; *BJ* i. 335) and Pliny (*NH* v. 1672).

Josephus places 'down upon it' (κατὰ) the hot baths to which Herod was carried.¹ *BJ* vii. 63 seems to describe the same wells in the valley to the N. of Machærus (the modern Mḳaur on the headland to the S. of W. Zerḳā Ma'in) under the name of Βαάρας, in which Greek form one may perhaps recognise בְּאֵרֵי. Jerome (*OS s. Beelneon*) gives the name as 'Baaru in Arabia [*i. e.*, in the Roman province of that designation] ubi aquas calidas sponte humus effert' (while under *Cariathain* he mentions Baare to R. m. W. of Medeba). Now 41 m. from the mouth of the W. Zerḳā Ma'in, and due N. from Mḳaur, there are hot wells: four large and some smaller, of which the hottest have a temperature of about 140° F. with strong deposits of sulphur. Ancient roads have been traced leading to the spot (which lies on the N. side of the shallow stream in a ravine 120 ft. broad, with luxuriant vegetation); and Roman medals with tiles and pottery have been discovered (see Setzen, *Reisen*, 2336 f., Irby and Mangles, *Travels*, 144 f., Tristram, *Moab*, Conder, *Heth and Moab*, 145, 149). The identity of the W. Zerḳā Ma'in with Callirrhoe is therefore tolerably certain. Conder suggests the same Wādī and stream as the Nahalīel

¹ This distinction between the stream on which the baths were and the baths themselves is overlooked by those who take Callirrhoe as referring to the baths (so Robinson, *Phys. Geog.* 764), and wonder why Josephus describes them as flowing into the Dead Sea. This removes any reason for finding Herod's Baths at es-Sara (Zarah) farther to the S., as Dechent proposes to do (*ZDPV* 7 196 ff.).

of Nu. 21 19 (see, however, NAHALIEL). S. of the W. Zerḳā Ma'in, the plateau bears one of its few high eminences, Jebel 'Attārūs (c. 4000 ft.); see ATARŪS. In this connection we may refer to Buhl's suggestion (*Pal.* 124) as to the מְעוֹרֵי נֶבֶן of Josh. 18 19 (see ZARETH-SHAHAR; cp Zarah, *PEF Survey*, 289).

The next cañon southwards is the Wādī Mōjīb, the biblical ARNON. The main branch starting in the wilderness of KEDEMOTH [*q. v.*] receives its first considerable contribution of water from the Rās el-Mōjīb, a fountainhead some 5 m. W. of the Ḥajj road. The stream after running through a shallow depression falls in a cascade over 30 ft. high into a valley, which deepens rapidly (Buhl, *Pal.*, after Langer's *Reisebericht* 16 ff.). From the S. it is met by a wādī, in which three have joined: the W. es-Sulṭān, the Seil Lej(j)ūn, with their sources not far from Kaṭrāneh on the Ḥajj road, and a shorter W. Balū'a. See the new survey (which differs from previous accounts) by Bliss, *PEFQ*, 1895, pp. 215 ff., with map, p. 204. Again, about 4½ m. from the mouth it receives from the N. the W. Wāleḥ with tributaries draining the plateau from as far N. as the Kaṭat el Belḳā' on the Ḥajj road. In biblical times all (or at least all except the last) of these branches appear to have borne the name Arnon: cp the plural phrase 'valleys of Arnon' in Nu. 21 14¹ (on *vv.* 14 f., cp VAHEB).

The main valley where it is crossed by the great high road of Moab (about 8 or 9 m. from the Dead Sea) is some 2000 ft. deep, with cliffs which have impressed every traveller: 'the cliff of the valleys,' Nu. 21 15; 'ostendunt regionis illius accolæ locum vallis in prærupta demersæ, satis horribilem et periculosum, qui a perisicæ usque nunc Arnonas appellatur' (Jer. *OS, Arnon*); cp Burckhardt and Setzen's *Travels*, Doughty, *Ar. Des.*, and Bliss (*PEFQ*, 1895, p. 215): 'a thrilling moment of surprise on coming suddenly to the edge of the almost perpendicular cliffs.' From edge to edge of these the distance is over 2 m.; at the bottom the bed is 40 yards wide. The Mōjīb issues on the Dead Sea through a chasm little more than 100 ft. wide. Altogether there is not S. of the Jabok another natural division so decisive and impressive. It cannot, therefore, surprise us that, although lying across the middle of what we have seen to be the land of Moab, the Arnon should so often in history have proved a political boundary.

On the arrival of Israel the Arnon separated the Amorites from Moab, whom the former had driven S. of it (Nu. 21 13² Judg. 11 18). It is also given as the S. limit of Reuben. In 37 A.D. it appears to have been the border between the territories of Herod and those of the Nabatæans, whom Herod had pushed to the S. of it (*Jos. Ant.* xviii. 51; *HG*, 569). Till 1893 the Arnon formed the S. boundary of the Turkish Mutaserrafik of the Belḳā and of effective Turkish rule in E. Palestine;³ and it is still the border between the lands of the Keraki and Ḥamādeh Arabes (Bliss, *op. cit.* 216).

The third great cañon across Moab starts close to Kaṭrāneh on the Ḥajj road as the Wādī 'Ain el-Franjī (perhaps the Brook ZERED⁴ of Nu. 21 11 f.), and then, as the W. Kerak, winds a narrow and deep ravine past Kerak (just before it leaves the plateau) and falls into the Dead Sea N. of the Lisān peninsula. By Kerak there is cultivation of olives, figs, pomegranates, and some vines. Between the Wādies Mōjīb and Kerak are two short glens with [watercourses W. el-Garrāh and W. Beni (Hamid or) Ḥammād; somewhere here was the ascent of LUHITH. S. of the Mōjīb the Jebel Shihān rises above the plateau to a height of about 3000 ft. Between the Wādies Kerak and el-Hasy (or

¹ In *v.* 13 the Arnon crossed by Israel is described as 'in the wilderness which comes forth from the border of the Amorite,' which may refer to one of the branches of the W. Wāleḥ.

² [Elsewhere (see WANDERINGS, and cp VAHEB) it is pointed out that under the present text, which is not free from critical difficulty, there are traces of an earlier narrative in which the place-names belong to the Jerahmeelite and Mīsrīte region. According to this view, Arnon in Nu. 21 13 f. has displaced 'Arām = Jerahmeel, and Moab (as often in the narrative books) is a corruption of Mīṣṣur (*i. e.*, the N. Arabian Muṣri). — T.K.C.]

³ In 1893 a new mutaserrafik was established S. of the Arnon with its centre at Kerak, but taking its name from Ma'in near Petra.

⁴ [The present geography of Nu. 21 11 f. may perhaps be of later origin (cp ZERED); but this does not dispense us from the duty of seeking to understand it.]

Aḥsā) are several shorter watercourses, of which the most important are W. el-Kuneiyeh (?) and W. Numēre, the latter held by many to be the WATERS OF NIMRIM (Is. 15.6 Jer. 48.34).

Along with this great plateau, the people of Moab at certain periods in their history held, and gave their name to, that part of the Jordan valley immediately below its northern section—*i.e.*, opposite to Jericho on the E. of the river. This is what P

6. Moabite portion of Jordan Valley.

calls the 'Arboth Moab' (see above, § 1). The name Moab does not appear here before P; yet earlier conquests of the eastern Jordan valley by Moab are not only asserted by presumably ancient narratives (*e.g.*, Judg. 3.12-30; see Moore's commentary), but were at all times extremely probable from the geographical relations of the Jordan valley to the Moabite plateau. The long level stretch just to the N. of the Dead Sea and E. of Jordan lies as much at the mercy of the occupants of the tableland above it as the opposite plains of Jericho lie open to the highlanders of Judæa and Ephraim. The warmth of the valley makes it an attractive refuge from the winter weather of the plateau, where according to an Arabic proverb 'the cold is always at home' (*HG* 56). Nor is the whole district so barren as the names 'ARABAH, JESHIMON, and BETH-JESHIMOTH [*qq.v.*] would seem to imply. These are terms strictly applicable only to the neighbourhood of the Dead Sea. Farther N. there are many streams, and the soil in the warm air is exceedingly fertile. Irrigation is very easy. At the present day the Arabs of the plateau have winter camps in the valley; and the 'Adwān tribe cultivate fields upon it (as the present writer on a visit in 1891 learned through the absence from the camp in W. Ḥesbān of the chief 'Alī Dhiāb, who was said to be attending to his harvests in the Ghōr). Then the Jordan with its few and difficult fords opposite Jericho forms a frontier, which its more passable stretches farther up, opposite Ephraim, cannot provide. Consequently, even when Israel crossing the latter held Gilead, it was quite possible for Moab to hold the part of the valley opposite Jericho. In every way this belongs to the tableland above it. Similarly Moab must have held the well-watered and fertile land at the S. end of the Dead Sea.

The fertile plateau (see above, § 3) with its extensive pasture-lands, and its much cultivation, producing corn, vines, and many fruit-trees, enjoyed a temperate climate (§ 3). It was therefore able to sustain an abundant population. To this the frequent ruins of small villages and not a few considerable towns still bear testimony. For the most part they evidently date from the Roman and Byzantine periods,¹ when the country was well protected from the desert Arabs by forts and camps, and was traversed by well-made roads (§ 8), with a considerable commerce. Under native kings, or when held by Israel, the land of Moab cannot have been quite so safe, and therefore hardly so thronged; still, we shall not be far wrong in conceiving of the population even then as abundant. In OT times we read of the 'cities of Moab'; and the people are pictured in multitudes and always as aggressive and tumultuous ('sons of tumult' Nu. 21.17 [see SHETH], cp Is. 15.6 Jer. 48.45).

If we were sure of the exact character of the many dolmens and cromlechs scattered over the NW. of the plateau (Conder reckons 200 in the portion he surveyed) we might add these to the proofs of a large population in the very earliest period. On the other hand, we must keep in mind that very large stretches of the plateau must always have been pastoral with few inhabitants. The figures on the Moabite Stone are puzzling; in *l.* 16 Mesha claims to have put to death in one place no fewer than 7000 Israelites; but again in *l.* 20 the forces he led against Jahaz consisted only of 200 men, taken 'from all the clans of Moab.'

The disposition and nature of the land cannot have been without effect on the character and manner of

¹ Cp Brūnnow, *MDPI*, 1898, p. 34.

life of the inhabitants. So tempting a province, so open to the desert, must always have had a large portion of its population in various stages of transition from the nomadic and pastoral to the settled and agricultural conditions of life. So they are pictured throughout history and so they are to-day. The OT recognises Moab as a Semitic people, therefore of nomadic and Arabian origin, who had settled in their land shortly before the arrival of Israel.¹ It mixes up Moab and Midian (Nu. 25). From the fifth century onwards we find them dispossessed or overrun by 'Arabs' and 'Nabateans.' The Roman Empire—by means of chains of forts and several large and heavily fortified castles like those whose ruins are now called Lej(j)ūn, Kaṣr Bsh̄r, and perhaps also Meshetta (Bliss, *PEFQ*, 1895, with plans and views)—kept the nomads back; and hence villages and cultivation multiplied in Roman times more than other periods. Under the nominal government of the Turks the bulwarks gave way; and to-day we find the pure Arab tribes like the 'Anazeh harassing the E. border; whilst within it other Arabs like the 'Adwān are settling to the cultivation of definite lands. Thus there must have been many successive deposits on the broad plateau from the restless human tides of Arabia. This may partly explain the noisy, aggressive character attributed to Moab by the OT (see above). The story of the origin of the nation (Gen. 19.30ff.) and other passages in the OT (Nu. 25 Jer. 48.26) seem to charge them with drunkenness and licentiousness. We have seen that the vine was extensively cultivated, and in the portion of the land surveyed by Colonel Conder's party many winepresses were discovered both on the plateau (especially about el-Meshakkar and Ḥesbān and at Sūmiā). The heat, too, of the Jordan valley enervates and demoralises: it was on its plains that Israel gave way to the impure rites of Beth-peor. Altogether we see from the geography, and from the OT pictures of Moab, a wild Arab race decadent under the first temptations of vine-culture and a relaxing climate.

The main lines of wayfaring and traffic across Moab have always been very much the same; and now the

less important tracks of ancient times are still discernible. From the fords of Jordan opposite Jericho (there were four or five, all difficult) and the bridge which in Roman times (according to the recently discovered Mosaic map, see MEBEBA) spanned the river in the neighbourhood of the present bridge, various roads crossed the Jordan valley to the E. and SE. In contrast to the W. coast of the Dead Sea the E. coast gives no room for a road at the level of the sea; for the most part the cliffs come down to the water's edge (see a paper by Gray Hill in the *PEFQ*, 1900).²

Yet a track runs somewhat up the side of the hills as far as the W. Zerḳā Ma'in; and some distance above it, just after the W. Ghuweir is passed, there is a stretch of ancient road marked on the PEF reduced Map at a level of 183 ft. below the Mediterranean or about 1000 ft. above the Dead Sea. It appears again on the S. of the W. Hawārah, and must have led to the healing springs in the valley of Callirrhoe (see § 5), converging on which several ancient tracks have been discovered. One must have continued at least to Machærus.

All the other roads from the Jordan made for the slopes and passes leading to the plateau. One, at present much frequented, by which the present writer travelled, climbs the ridge of Rās Ḳuseib and then curves S. towards Ḥesbān. But there are tracks, with remains of ancient roads,³ apparently Roman, up the W. Ḥesbān, from which a road led through a steep rock-cutting upon Ḥeshbōn on the edge of the plateau. Another ancient track passed by el-Meshakkar (§ 4) on Ḥeshbōn (*PEFM E. Pal.* 151); another by the W. 'Ayūn Mūsā to Nebo (?); and another by W. Jideid

¹ Compare, however, GAD, § 8.

² N. of the W. Zerḳā Ma'in there is a broad shelf before the plateau itself is reached.

³ Also near Sūmiā.

to Medeba or Ma'in. The name of the lower stretches of the latter Wādy (Ghuweir, 'the little Ghôr' or 'chasm'), suggests to Conder (*PEFM*) the Heb. מַחַר, with probably the same meaning, and therefore the 'ascent of HORONAIM [*g.v.*] (Is. 15 Jcr. 485).¹ Less plausible is the same explorer's suggestion of Tal'at Heisah or el-Heithah (a glen running up from W. Jideid upon Nebo) for the 'ascent of LUHITH' (Is. 15 Jer. 485).

All these roads from the Jordan valley struck a trunk road running S., along the whole extent of the plateau by Elealeh, Heshbon, and Medeba, across the W. Wāleh, by the W. of Dibon close by Kašr el-Besheir, across Arnon, by Rabbah to Kerak, and so ultimately across Edom to the Gulf of 'Akabah. Its course is marked by Roman milestones, many still *in situ*, and other ancient remains. In the Wādies Mōjib and el-Ijēsi 'the gradients were laid out with great skill' (Sir Ch. Wilson, *PEFQ*, 1899, p. 309). A branch connected this road with Ma'in (Bliss, *PEFQ*, 1895, p. 213), which lies to the W. of it. Other branches struck N. and NW. from Heshbon to Rabbath-Ammon, and can still be traced past Kh. el-Amriyeh, and to the NW. of Umm el-Hanāfish (PEF red. Map). Other branches struck across the country to the second great N. and S. road along the borders of the desert, represented to-day by the Hajj road.² Whilst the remains of all these ancient roads are Roman, dating from the Antonines, the great road-makers in Syria, they probably represent still older lines of travel. Whilst the western trunk road must always have been the more secure from the nomad Arabs, the deep cañons which it crosses make it much the more difficult. The line of Israel's passage N. lay along the E. trunk road till at least the W. Wāleh was passed, when it turned NE. upon Heshbon, and so down either the W. 'Ayūn Mūsā or the W. Hešbān to the Jordan Valley (see *HG* 564).

Of the 'cities of Moab' we have first of all a group in the Jordan valley: BETH-NIMRAH [*g.v.*] at Tell Nimrīn; BETH-HARAN [*g.v.*] at Tell-Rāmeḥ; both of which, though they are mentioned in the OT only in connection with the Amorites and Gad, must have belonged to Moab at many periods (cp NIMRIM of Is. 156); BETH-JESHIMOTH [*g.v.*] at Suwceimeh; HORONAIM [*g.v.*] on one of the passes leading up to the plateau (see above, § 8). According to Eusebius BETH-PEOR [*g.v.*] lay between Beth-nimrah and Beth-haran; but see above, § 4. SEBAM or SIBMAH [*g.v.*] is placed by Conder (*PEFM* 221) at Sūmia in the W. Hešbān, 2 m. from Hešbān.

On the plateau N. of W. Zerkā Ma'in were situated the following towns, beginning from the N.: ELEALEH, HESHBON, NEBO, MEDEBA, BETH-MEON. These are either on high sites on the promontories and considered as sacred, like Nebo and Beth-meon, or on mounds by the main road, like Elealeh, Heshbon, and Medeba. Kh. 'Abū Nalkeh Merrill identifies with the 'Moabite town' Νέκλα of Ptolemy; in es-Sāmik, a few m. E. of Hešbān, here see Samaga, taken along with Medeba by John Hyrcanus (Jos. *Ant.* xiii. 9 i). Kefeir el-Wusta and Kefeir 'Abū Sarbūt, on the main road, must have been considerable towns in Byzantine times and perhaps earlier (*PEFM E. Pal.*). Ka'at Zizā, about 4 m. to the W. of the Hajj road, was a military post of the Romans (*Not. Dignit.*). On Mashetta or Umm Shetta, to the E. of the Hajj road see Tristram (*Land of Moab*) and Bliss (*PEFQ*, 1895). On Ka'at Belkā, a castle on the Hajj road, see Doughty (*Ar. Des.* 113 19).

¹ Jos. *Ant.* xiii. 154 mentions Oronas as a town of Moab.

² A third Roman road N. and S. appears to have run from Rabbath-Ammon by el-Kahf, Umm el-Walid, Remeil, Trayya, Kašr Bsh̄r and Rujūm Rishān to Lejjūn. On this, and on the line of forts protecting the springs to the E. of it, and on the Roman roads S. of Lejjūn, see Brünnow's papers in *MDPV*, 1898-1899.

Between the W. Zerkā Ma'in and the W. Wāleh there were no towns on the main road; but to the W. lay 'ATAROTH [*g.v.*, modern 'Attārūs], KIRIATHAIM [*g.v.*, modern Kiri'yāt], and the strong fortress of MACHÆRUS [*g.v.*, and cp ZERETH-SHAHAR].

South of the W. Wāleh lay DIBON [*g.v.*], the modern Dhibān to the E. of the main road, on which farther S. are the ruins of the Roman castle, now called Kašr el-Besheir. North-east of Dibon is el-Jumeil, identified by some with BETH-GAMUL of Jer. 48₂₃: cp the el-Gamila of Idrisi (*ZDPI* 8128). Buhl, however, puts Beth-gamul S. of Arnon. East of Dibon (Bliss, *op. cit.*, 227) are the important ruins of Umm er-Reṣāṣ reckoned by some to be KEDEMOTH [*g.v.*]; JAHAZ [*g.v.*] (which Eusebius places between Dibon and Medeba) must also have lain about here; and MEFHAATH (Josh. 1318 Jer. 4821), according to Eus. a castle on the edge of the desert. Upon the main road just as it dips into the precipitous W. Mōjib lay AROER [*g.v.*].

In the valley of the Arnon there apparently lay 'the city in the midst of the valley' (Josh. 139): see AR.

Of the sites S. of the Arnon the following lie on or near the great trunk-road. On the S. edge of the W. Mōjib are the ruins, Melhātet el-Hajj, which Tristram and others propose to identify with AR. To the W. of the road at the foot of the hill called Shiḥān are ruins of the same name; and farther S. on the road others at Haimer, Eriḥah, Beit el-Karm, called also Kašr Rabba with 'tanks and a great building evidently Roman' (Irby and Mangles, ch. 8), and Hemēmat with a tower, Misde (also at Mejdelein, west of the road). Then come the more considerable remains of Rabba (*ib.*, 'two old Roman temples and some tanks' but no trace of walls; Brünnow, *MDPV*, 1895, p. 71, notices 'a kind of forum'). This appears to be Rabbath (*i.e.*, chief town of) Moab (see OS) to which the Greeks gave the name of Απεόρολις (see AR). Buhl (*Pal.* 270) thinks it possible that we have here KERIOTH and KIR-MOAB (see KIR-HERES); but KIR-MOAB, known also as KIR-HARESETH, is placed by most at Kerak,¹ for a description of which see KIR-HERES. To the proofs of the identification of KIR-HERES with Kerak, given there, add the name (hitherto overlooked in this connection) of Wādy Harasha (with a ruin Kašr H.) which is applied, according to Brünnow (*MDPV* 1895, p. 68) to the lower part of the Wādy Kerak. Some 12 m. E. of Kerak lies the ruin Lejjūn, for the exact orientation of which, with plans, see Bliss, *PEFQ*, 1895. South of Kerak Eusebius places EGLAIM [*g.v.*].

Indeed, this district of Moab, 'a country of downs with verdure so close as to appear almost turf and with cornfields,' is 'covered with sites of towns on every eminence and spot convenient for the construction of one . . . ruined sites visible in all directions' (Irby and Mangles, ch. 7, May 14 and 15). Here was the scene of the first encounter of Moslem troops with the Romans and their defeat at el-Mūteb; Dāt-rās on the N. edge of the W. el-Asi is the Thorma of the 'Itinerary' (Wilson, *PEFQ*, 1899, p. 315).

From Kerak a Roman road led SW. into the Ghôr (Brünnow, *MDPV*, 1895, p. 68) by Dera'a on the W. Harasha² (see above); and on this flank of Moab also not a few remains have been noted by travellers (see LUHITH, NIMRIM, and cp Tristram, *Land of Moab*, 57; Buhl, *Pal.* 272).

In the time of Josephus there lay at the S. end of the Dead Sea a town Ζωαπα (*BJ* iv. 84, v. 11. ζωαπα, etc.). In OS under βαλα, Eusebius calls it σπηγωπα and ζωαπα, and describes it as lying on the Dead Sea, with a garrison: 'the balsam and palm grow by it.' It is the same, which under the name Zughar, Şughar, or Suḡar is mentioned by the Arab geographers (Le Strange, *Pal. under Moslems*, 286 ff.), as a station on the trade route from the Gulf of 'Akabah to Jericho, one degree of lat. S. of Jericho. They describe it as on the Dead Sea, near the desert, overhanging by mountains, near el-Kerak,

¹ Besides Irby and Mangles (*Travels*, ch. 7 f.), cp A. L. Hornstein in *PEFQ*, 1898, pp. 93 ff., with views.

² Here some place the 'descent of Horonaim'; but see § 8.

with a hot and arid climate; the people thickset and swarthy. The Crusaders knew it as Segor (Röhrich, *Gesch. Königr. Jerus.* 15, 409, 411; see also *ZDPV* 14, the Florentine map) but called it Palmen (Will. of Tyre, 108 22³⁰), Villa Palmarum, and Paumer. It is curious that Napoleon should mention the place under its biblical name 'at the extremity of the Dead Sea 20 leagues from Hebron, 15 from Kerak' (*Guerre d'Orient, Camp. d'Égypte et de Syrie*, vol. ii. 12 f.). Where did he get this information? Irby and Mangies (*Travels*, 1st June, 1818) place it in the lower part of the W. Kerak. Clermont Ganneau (*PEFQ*, 1886, p. 20) proposes a site near the Tawāhin es-Soukhār in the Ghōr es-Sāfieh; Kitchener (*PEFQ*, 1884, p. 216) found many ruins of great antiquity under the name Kh. Labrush. See also Reland, *Palest.* 577, 957, and Robinson, *BR* 648 ff. The Arab geographers identify it with the Zoar of Lot and this is accepted by those modern authorities who place the 'cities of the plain' at the S. end of the Dead Sea. See further ZOAR, SODOM. G. A. S.

Moab and Ammon (children of Lot) constitute along with Edom and Israel (children of Isaac) that group of

10. The four Hebrew peoples. four Hebrew peoples which in early antiquity had issued from the Syrian-Arabian wilderness, and settled on the border of the cultivated land eastward of the 'great depression.' According to Genesis, they had come out of Mesopotamia, and so were precursors of the larger wave which followed from the same quarter, forming the most southern outpost of the Aramaean immigration into the lands of Canaan and Heth (see AMORITES, CANAAN, CANAANITES). The aborigines in whose lands the B'ne Ammon and Moab and the B'ne Israel successively settled were not extinguished by the conquest; they even exercised a far-reaching influence over their lords. The Moabites, and doubtless also the Ammonites and the Edomites, spoke the language of Canaan as well as the Israelites. They must have learned it from the Canaanites in the land eastward of Jordan. Our knowledge is extremely imperfect as regards other departments of the Canaanite influence; but in religion it has left a noticeable trace in the cultus of BAAL-PEOR (*q.v.*), which was carried on in Moabite territory but was certainly of Canaanite origin. The special god of Moab, however, was Chemosh. Just as Israel was the people of Yahwē, and Ammon the people of Milcom, Moab was the people of Chemosh (כִּמּוֹשׁ, Nu. 21.29). The kingship of Chemosh was regarded as thoroughly national and political in its character, but did not on that account exclude the institution of a human king, which appeared in Moab much earlier than in Israel; in the time of Moses the Moabites had a king, and the institution was even then old. The capitals of the kingdom were 'Ar Moab and Kir Moab, S. from the Arnon; these were not, however, the constant residences of the kings, who continued to live in their native places, as, for example, Mesha in Dibon.

The historical importance of the Moabites lies wholly in their contact with Israel.¹ After the Israelites had

11. Early Moabite history. quitted Egypt and passed a nomadic life for about a generation in the neighbourhood of Kadesh, they migrated thence into northern Moab, dispossessing the Amorites, who had made themselves masters of that district. The interval from Kadesh to the Arnon could be passed only by a good understanding with Edom, Moab, and Ammon,—a proof that the ethnical relationships, which at a later period were expressed only in legend, were at that time still living and practical. In

¹ [Three kings of Moab (Ma'ba, Mu'aba, Ma'ab) are mentioned in the cuneiform inscriptions,—Salmamu who was subdued by Tiglath-pileser in 733; Kammušanadbi (Chemoshnadab), who paid tribute to Sennacherib in 701; and a king of uncertain name who warred against the king of Kedar in the name of Asur-bāni-pal (Schr. *KAT*², 251, 291, Wl. *GT* 110. f.).]

all probability the Moabites called the Israelites to their aid; they were not as yet aware that this little pastoral people was destined one day to become to them a greater danger than the Canaanites by whom they were threatened at the moment.¹

As the story of Balaam indicates, the Moabites would willingly have been rid of their cousins after their service had been rendered, but were unable to prevent them from settling in the land of Sihon. The migration of the tribes of Israel into western Palestine, however, and the dissolution of their warlike confederation soon afterwards made a restoration of the old frontiers possible. If king Eglon took tribute of Benjamin at Jericho, the territory between Arnon and Jordan must also have been subject to him, and Reuben must even then have lost his land, or at least his liberty. It would appear that the Moabites next extended their attacks to Mount Gilead, giving their support to the Ammonites, who, during the period of the judges, were its leading assailants. So close was the connection between Moab and Ammon that the boundary between them vanishes for the narrators (Judg. 11). See AMMONITES, JEPHTHAH.

Gilead was delivered from the Ammonites by Saul, who at the same time waged a successful war against Moab² (1 S. 14.47). The establishment of the monarchy necessarily involved Israel in feuds with its neighbours and kin. The Moabites being the enemies of the Israelite kingdom, David naturally sent his parents for shelter thither when he had broken with Saul (1 S. 22.3 f.; see, however, MIZPEH, 3); the incident is precisely analogous to what happened when he himself at a later period took refuge from Saul's persecution in Philistine territory, and needs no explanation from the book of Ruth. As soon as he ceased to be the king's enemy by himself becoming king, his relations with Moab became precisely those of his predecessor. The war in which apparently casual circumstances involved him with the Ammonites really arose out of larger causes, and thus spread to Moab and Edom as well. The end of it was that all the three Hebrew nationalities were subjugated by Israel; the youngest brother eclipsed and subdued his seniors, as Balaam had foreseen. Both Ammon and Moab, however, must have emancipated themselves very soon after David's death, and only now and then was some strong king of Israel able again to impose the yoke for a time, not upon the Ammonites indeed, but upon Moab. The first to do so was Omri, who garrisoned some of the Moabite towns and compelled the king to acknowledge Israel's suzerainty by a yearly tribute of sheep—a state of matters which continued until the death of Ahab ben Omri. That brave king, however, fell in battle with the Aramaeans at Ramoth Gilead (about 850 B.C.), and Mesha of Dibon, then the ruler of Moab, succeeded in making himself and his people independent. In his famous inscription (see MESHHA) he gives his patriotic version of the story; in the book of Kings we find only the curt statement that Moab rebelled against Israel after the death of Ahab (2 K. 11); on the other hand there is a full narrative (2 K. 3) of a vain attempt, made by Jehoram ben Ahab, to bring Mesha into subjection. See MESHHA, § 6, and JEHOAM, § 4.

As the Moabites owed their liberation from Israelite supremacy to the battle of Ramah—that is, to the Aramaeans—we find them (as well as the Ammonites) afterwards always seconding the Aramaeans in continual border warfare against Gilead, in which they took cruel revenge on the Israelites. With what bitterness the

¹ The facts as a whole are indubitable; it cannot be an invention that the Israelites settled first in Kadesh, then in northern Moab, and thence passed into Palestine proper. The only doubtful point is whether the song in Nu. 21.27 ff. is contemporary evidence of these events.

² [There is indeed, as so often, a doubt whether the original document did not refer rather to MIZPEH (see MIZRAIM) than to Moab. See SAUL, § 3.—R.K.C.]

Israelites in consequence were wont to speak of their hostile kinsfolk can be gathered from Gen. 19³⁰ ff.—the one trace of open malice in the story of the patriarchs, all the more striking as it occurs in a narrative of which LOT (*q.v.*) is the hero and saint, which, therefore, in its present form, is of Moabite origin, although perhaps it has a still older Canaanite nucleus. Of these border wars we learn but little, although from casual notices it can be seen (2 K. 13²⁰ Am. 1¹³; cp 2 K. 5²) that they were kept up long, although not quite uninterruptedly. When at length the danger from the Aramæans was removed for Israel by the intervention of the Assyrians, the hour of Moab's subjection also came; Jeroboam II. extended his frontier over the eastern territory, as far as to the 'Brook of the Poplars'¹ (Am. 6¹⁴; but cp ARABAH, BROOK OF THE).

It would seem that subjugation by the Assyrians was not as heavy a blow to the Moabites as to some neighbouring peoples. Probably it helped to reconcile them to the new situation that the Israelites suffered much more severely than they. From these their deadly enemies, they were henceforth for ever free. They did not on that account, however, give up their old hatred; they merely transferred it from Israel to Judah. The political annihilation of the nation only intensified the religious exclusiveness of the Jewish people. Terrible expression was given by the Edomites and the Moabites to their malignant joy at the calamities of their kinsfolk.²

¹ Because Moab saith: Behold the house of Judah is like all the other nations, therefore do I open his land to the Bne Kedem, says the prophet Ezekiel (25⁸ ff.). His threat against the Moabites, as well as against the Edomites and the Ammonites is, that they shall fall before the approach of the desert tribes (see EAST, CHILDREN OF THE; KEREM). Probably in his days the tide of Arabian invasion was already slowly rising, and of course it swept first over the lands situated on the desert border. At all events the Arab immigration into this quarter began at an earlier date than is usually supposed; it continued for centuries, and was so gradual that the previously-introduced Aramaising process could quietly go on alongside of it. The Edomites gave way before the pressure of the land-hungry nomads, and settled in the desolate country of Judah; the children of Lot, on the other hand, appear to have amalgamated with them—the Ammonites maintaining their individuality longer than the Moabites, who soon entirely disappeared.³

Israel and Moab had a common origin, and their early history was similar. The people of Yahwè on the one hand, the people of Chemosh on the other, had the same idea of the Godhead as head of the nation, and a like patriotism derived from religious belief—a patriotism that was capable of extraordinary efforts, and has had no parallel in the West either in ancient or in modern times. The mechanism of the theocracy also had much that was common to both nations; in both the king figures as the deity's representative, priests and prophets as the organs through whom he makes his communications. Still, with all this similarity, how different were the ultimate fates of the two! The history of the one loses itself obscurely and fruitlessly in the sand; that of the other issues in eternity. One reason for the difference (which, strangely enough, seems to have been felt not by the Israelites alone but by the Moabites also) is obvious. Israel received no gentle treatment at the hands of the world; it had to carry on a continual conflict with foreign influences and hostile powers; and this perpetual struggle with gods and men was not profitless, although the external catastrophe was in-

¹ Perhaps the song in Nu. 21²⁷ ff. refers to these events; some critics will add Is. 15¹⁻¹⁶ 12.

² Zeph. 2⁸ ff. 2 K. 24² and Ezek. 25⁸ ff. It need hardly be said that the Moabites shared the fate of all the Palestinian peoples when supremacy passed from the Assyrians to the Chaldeans, and that, notwithstanding their hatred of the Jews, they had no difficulty in seeking alliances with them, when occasions arose on which they could be made useful (Jer. 27³). [The prophecy against Moab in Jer. 48 cannot be the work of Jeremiah. See JEREMIAH II., § 20, ix.; col. 2392.]

³ We. *Kleine Propheten*(2), 296 (on Oladiah): [on certain references to the Moabites in late OT writings—Ezra 9¹ Neh. 13¹ Is. 25¹⁰ f. Ps. 83⁷ [6]—cp Intr. Is. 159, 161].

evitable. Moab meantime remained settled on his lees, and was not emptied from vessel to vessel (Jer. 48¹¹), and corruption and decay were the result. This explanation, however, does not carry us far, for other peoples with fortunes as rude as those of Israel have yet failed to attain historical importance; they have simply disappeared. The service the prophets rendered at a critical time, by raising the faith of Israel from the temporal to the eternal sphere, cannot be exaggerated (see PROPHECY).

J. W.

The authors of the above sections are scholars who have a right to speak, and whose writings will not soon be forgotten. A union of forces, however, seems necessary in order to take a fresh step in advance. The geographical section would be very incomplete without

14. More on biblical references.

The historical section will add somewhat to its usefulness. For there is a preliminary inquiry, which no good scholar in recent times has altogether neglected, but which requires to be taken up in a more thorough and methodical manner—the state of the texts on which our geography and our history are based. It must also be confessed that our criticism of the narratives has been, until very lately, too literary, and not quite sufficiently historical. A criticism of the local names may not have led as yet to as many important results as the criticism of the personal names of the OT; but an examination of the special articles dealing with the names of the 'cities of Moab' (§ 9) will show that an inquiry which cannot safely be ignored is being made, and that identifications have in the past too often been tried, and views of the route of the Israelites in their migration taken, which presuppose doubtful, even if ancient, readings. Textual criticism, too, has objections to make to some of the historical inferences of earlier eritics because of their precarious textual basis. It is obvious that if 'Moab' and 'Miššur,' 'Midian' and 'Miššur,' 'Ammon' and 'Analek,' 'Edom' and 'Aram' (=Jerahmeel), are liable to confusion, the greatest care becomes necessary in steering one's way between the rocks. Mistakes will sometimes occur, as when, after correcting some of the most corrupt names in Gen. 36³¹⁻³⁹, 'Edom' is retained by the author of the article BELA (col. 524) in v. 31 f. and 'Moab' in v. 35. For these two (corrupt) ethnic names 'Aram' and 'Miššur' should probably be substituted. The historical result would be that it was not Midian and Edom but Midian and Jerahmeel that fought together in the early times referred to, and that the territory that was contested was the highland of Miššur, not the plateau of Moab.¹ The story of Balak and Balaam also needs to be re-read in the light of text-critical discoveries. It is most probable, from this newer point of view, that Balak, with whom the Israelites are said to have had to do, was king, not of Moab, but of Miššur. It is doubtful, too, whether in its original form the story of Eglon and Ehud represented the former as being of Moab and not rather of Miššur (note that Eglon gathers 'the b'ne Ammon and Analek,' really, the b'ne Jerahmeel, and that they occupy 'the city of palm trees' (*i.e.*, really, the city of Jerahmeel).² Even if in this instance we adhere to MT, Winckler (*GI* 1205) will probably still be right in using the narrative as an evidence of the lateness of the Moabish people as compared with the b'ne Israel. More probably, however, Eglon was a Mišrite king. Nor can we at all trust the records of the conquests of Saul and David. A group of phenomena make it very nearly certain that in 1 S. 14⁴⁷ 2 S. 8² 'Miššur' has been transformed into 'Moab.'

That Saul conquered either the Moabites or the Mišrites is of course most unlikely; but the probability is strong even against

¹ Cp Judg. 5⁴, where we should probably read 'Miššur' (not 'Seir') and 'the highland of Aram' (= Jerahmeel).

² See JERICHO, § 1. The 'city of Jerahmeel' may quite as well mean Kadesh-barnea ('barnea' should be read 'Jerahmeel') as Jericho.

the view that David had to do with the Moabites. The whole passage (2 S. 8:1-3) first becomes intelligible when we read it thus, 'And David smote the Philistines, and took the Maacathite country out of the hand of the Philistines. He smote Mišsur and Jerahmeel and the Zarephathites, and those of Mišsur became servants to David, bringing tribute.' If we are reluctant to admit the change of 'Moab' to 'Mišsur,' let it be remembered that the same textual criticism dispenses us from the obligation of pronouncing David guilty of barbarity to the conquered—to a people from whom, according to one tradition, his parents had received hospitality.¹ The right reading was probably known to the writer of Nu. 24:17.²

Thus it is probable that the first trustworthy notice of contact between Israel and Moab is in 2 K. 1:1. This notice, however, as Kittel points out, is very isolated (cp § 11), and we naturally infer that a record of wars between the two peoples has been lost. Moab, then, is at any rate a younger people than Israel.

What event is referred to in Is. 15:1-16:12 has been much disputed. According to Duhm and Marti, the foes of Moab are the NABATÆANS (*q.v.*). Diodorus (1994) says of these nomads that they regarded it as wrong to plant wheat and trees and wine. This would make the destruction of the vines referred to in the prophetic elegy intelligible. If so, Is. 15:1-16:12 may be referred to the fifth century; the postscript (v. 13f.) will be later (time of Alexander JANNEUS [*q.v.*]?).

There is little more to add by way of supplement to §§ 10-13. The absence of the name of Moab in the list of the vassal states of Bir-'idri (*KB* 2:173) is accounted for by Winckler (*GI* 1:207) by the supposition that 1 Moabite contingent was included among the troops of Ahab, who is mentioned (see AHAB, § 4f.). Whether the Moabites are rightly included in 2 K. 24:2 among the peoples which sent 'bands' against Judah in the reign of Jehoiakim may be doubted. A comparison of passages in the Psalms, Lamentations, and later prophecies and narratives irresistibly leads the present writer to the conclusion that the right names are Cushites, Jerahmeelites, and Mišrites (see OBADIAH [BOOK]). It is also very possibly an error to suppose that the Moabites are specially referred to in the Book of Nehemiah; this, however, is partly connected with the question as to the ethnic names in the narrative of the migration of the Israelites. There is, at any rate, much confusion in the names mentioned in Nehemiah, and elsewhere (see SANBALLAT) it is maintained that both 'Sanballat' and 'Horonite' are probably miswritten: the one for 'Nebaiothite' (= Nabatean?), the other (which is to be taken with the miswritten 'Tobiah') for 'Rehobothite.' Cp also RUTH [BOOK].

Winckler (*GI* 1:204) makes the striking remark that Moab at the time of its immigration was probably just such a small tribe as the Calebites and the separate Israelitish tribes. In civilisation and racial consciousness there was no difference, and in language none worth mentioning, between them and the Israelites. Nöldeke (*Die sem. Sprachen*, 17) also remarks that the style of the inscription of Mesha is essentially that of the OT, and allows us to infer the existence of a similar literature among the Moabites. As Nöldeke also points out, the only important un-Hebraic feature of the inscription is the occurrence of the eighth Arabic 'conjugation' (with *t* after the first radical). The inscriptional style may, however, have differed considerably from the type of the actually spoken tongue. Cp MESHÄ, § 4.

G. A. S., §§ 1-9; J. We., §§ 10-13; T. K. C., § 14.

MOADIAH (מֹאדִיָּה), §§ 33, 72, 'Yahwè promises?'), a priestly family temp. Joiakim (EZRA ii., § 6b, § 11), Neh. 12:17 (om. בְּנֵי אֵלֶּיךָ; ΕΝ ΚΑΙΡΟΙΣ [N^{c.a} mg. inf.]; ΜΑCΔΑ [L]); cp MAADIAH.

¹ 1 S. 22:3, where read 'Zephath (Zarephath) of Mišsur.' See MIZPEH.

² מֹאדִיָּה (Jer. 48:45) is accepted by Di. for מֹאדִיָּה, however, as also in Am. 2:2, comes from מֹאדִיָּה (the N. Arabian Cush), which at once suggests מֹאדִיָּה for מֹאדִיָּה.

MOCHMUR (ΜΟΧΜΟΥΡ [B; om. A], ΜΟΥΧ. [N*], ΜΟΚ. [N^{c.a} vid.], machur [Vet. Lat.]; מֹחְמוֹר [Syr.]), a brook upon which stood CHUSI (Judith 7:18). It was situated near to EKREBEL (mod. 'Akrahēh), whence Schultz has identified it with *Makfūriyeh* close to 'Akrahēh.

MODIN, a city or village of Judæa. Most modern authorities (*e.g.*, Grimm, Schürer, Zöckler) rightly prefer the form Mōdein or Modem.

♠'s readings vary considerably; μωδειν [N^c 1 Macc. 2:1, N^c.b 164 V 9:19]; -ειν [A 2:1 etc.]; -μ [A 2:23 9:10]; -ειν [N^{c.a} 2:1, 8 9:19 etc.]; -μ [A 16:4]; -ειν [V 2 Macc. 13:14]; -μ

1. Name. [A *ib.*]; -ιν [N* V 16:4]; -μ [V 2:15 2:23]; -ω [V 2:1]; other readings are μωδαις [Jos. ed. Niese, *Ant.* xii. 6:1], -ειμ [ib. 11:2], -ν [B 1:1 3]; in O^s 28:1 59 140 20 μηδεειμ *Modem*; *Modin* [Vg., whence EV].

The later Hebrew form (which often has the article also) varies. Pal. Mishnah (ed. Lowe) reads מֹדִיָּה (Mōdi'ah) *Pes. ih.* 9:2 (*Talm. Bab.* 93b), *Hag.* 3:5 (*Talm. Bab.* 25b). Other readings are מֹדִיָּה, מֹדִיָּה, מֹדִיָּה.

In the Medeba mosaic (see MEDEBA) the reading Μωδιθα occurs, and this seems to point back to the Hebrew Mōdiith.

In 2:17 Modin is called a *city*, πόλις (so in *v.* 15 εἰς Μωδειν τὴν πόλιν). Josephus, on the other hand, describes it as a *village* of Judæa (ἐν Μωδαί, κώμη τῆς Ἰουδαίας, *Ant.* xii. 6:11 2). Eus. (*κώμη*) and Jer. (*vicius*) agree with Josephus; so Jerome on Dan. 11:38. In Vg. it is referred to as a *hill* (*in monte Modin*), and this, curiously enough, reappears in later Rabbinical authorities. See Grimm on 1 Macc. 2:1, and Rashi on T. B. Bābā Bathrā 10 b. Naturally the place was of most importance in Maccabæan times; by the time of Josephus it may have dwindled. The ruins at el-Medyeh, with which Modin is usually identified, seem to point to an ancient collection of villages, a fact which the *plural* form of the name also attests. Grimm reconciles the two statements by describing Modin as a *κωμόπολις*.

The interest in Modin arises from its association with the Maccabæan history. The place is not named in

2. History. MT (though curiously enough Porphyry on Dan 11:38 read Modim for the difficult מֹדִיָּה. See Jer. *ad loc.*). We first hear of Modin in 168 B. C.; it became the residence of Mattathias, when he felt it no longer safe or honourable to remain in Jerusalem (1 Macc. 2:1). By Simon's time Modin was the special city of the Hasmonæans (τῆ πατρίδι, Jos. *Ant.* xiii. 6:6); but even in Mattathias's day it must have been the permanent home, not merely the temporary asylum, of the family; Mattathias (1 Macc. 2:17) is termed 'a ruler and an honourable and great man in this city.' From another passage (1 M. 2:70) it appears that the sepulchres of Mattathias's ancestors were situated in Modin.

Modin was the scene of the outbreak of the revolt against Antiochus IV. Epiphanes. Here it was that Mattathias was summoned by a Syrian officer to follow the general example and offer a pagan sacrifice. He refused, and his slaying of an apostate Jew at the altar erected in Modin was the first act of armed rebellion (1 Macc. 2:15-28). Mattathias then fled from Modin; but the place was not garrisoned by the Syrian forces, for, on his death shortly afterwards, his sons buried him there (1 Macc. 2:70 Jos. *Ant.* xii. 6:4). Modin is again mentioned in 2 Macc. 13:14. Judas Maccabæus is there reported to have fixed his headquarters at Modin before his victorious night attack on the army of Antiochus V. Eupator. When Judas subsequently fell in battle at Elasa his body was recovered by his brothers Jonathan and Simon, and buried at Modin (1 Macc. 9:19 Jos. *Ant.* xii. 6:2). Simon rendered a similar service to Jonathan (1 Macc. 13:25) and he erected in Modin a splendid monument to his illustrious family (13:27-30). See below § 3.

At Modin Judas and John, sons of Simon, passed the night before making their successful attack on Cendebæus (1 Macc. 16:4) whose headquarters were at Cedron (Κατρα) in the Philistine lowlands. In Rabbinic times Modin was regarded (Mishna, *Pesāhim* 9:2) as fixing the legal limit of distance with regard to the injunction in Nu. 9:10. Rabbi 'Aqiba held that any Jew who happened to be as distant from Jerusalem as Modin might be regarded as 'on a journey afar off.' The

Bab. Talmud (*Pēsāhim* 93b) explains that this distance was 15 m. In another case of ritual law Modiith is cited by the Mishna (*Hag.* 35), and from this passage it has been inferred by some Rabbinical authorities that the city or district of Modin was the centre of the pottery industry.

A Rabbi Eleazar of Modin (contemp. with 'Akiba, 2nd cent. A.D.) is quoted with respect in the Mishnah (*Ḳōḇḇ* 35) and Talmud (T. B. *Shabbāth* 55b. *Bābā Bathrā* 104). He is sometimes designated simply *Ham-modai* or *Ham-mudai* 'the man of Modin.' (Clermont-Ganneau found that the modern ethnic name of the inhabitants of Medyeh is Midnāwy, pl. Medāwneh.)

The monument which Simon erected (see above) was lofty, of 'polished stone behind and before.' Seven pyramids, over

3. Simon's mausoleum.

against one another, commemorated Simon's father, his mother, and his four brothers; the remaining one being designed for himself. Stanley (*Jewish Church*, 3318) describes the mausoleum as a square structure surrounded by colonnades of monolith pillars. The pyramids were ornamented with bas-reliefs of weapons.¹ Mindful of the commercial use to which the Phœnician coast was put by the Maccabæans, Simon added carvings of ships *εἰς τὸ θεωρεῖσθαι ὅσο πάντων τῶν πλείονων τῆρ ἁλάσσαν.* This phrase is commonly rendered 'that they should be seen of all that sail on the sea.' As the sea is at least 13 m. from Medyeh (and farther still from any other site with which Modin has been identified) this statement has given considerable trouble. Josephus, it may be observed, omits this detail (*Ant.* xiii. 66). Commentators explain, 'only in its main outlines, and not in its minor features could this monument be visible from the Mediterranean' (*Camb. Bib.*, ad loc.). But the association of the 'ships' with the 'seafarers' raises some difficulty against accepting this theory. E. le Camus (*Rev. Biblique*, 1209, 1892), explains the Greek to mean that the ships were so naturally carved that they won the admiration of expert seamen. This is certainly ingenious, and Buhl (*Pal.* 198) adopts the theory of Le Camus on this point though he contests the same writer's other objections to the identification of Modin with Medyeh. The writer of 1 Macc. (about 100 B.C.) tells us that the monument was standing in his day, and Josephus repeats the assertion nearly two centuries later. Eusebius and Jerome also seem to declare that the monument was still intact, though the language they use is not conclusive. (As the passage from the *Onomast.* is of importance for the discussion that follows it is cited in full: *Μωδέειμ, κώμη πλησίον Διοσπόλεως, ὅθεν ἦσαν οἱ Μακκαβαῖοι, ὧν καὶ τὰ μνημεῖα εἰς ἐτι νῦν δεῖκνυνται. Μοδείμ vicus juxta Diospolim, unde fuerunt Maccabæi, quorum hodieque ibidem sepulchra monstrantur.*) Sufficient remains of the monument have been shown at Soba, while Guérin in 1870 created some sensation by claiming to have discovered the Mausoleum at Kh. el-Gherbāwi in the neighbourhood of Medyeh. The structure so identified by him was, however, shown by Clermont-Ganneau to be of Christian origin. There is certainly nothing at Medyeh above ground or (as yet) excavated that in the slightest degree resembles the description in 1 Macc.

The geographical position of Modin cannot be determined with absolute certainty. Šōbā, about 6 m.

4. Geographical position.

W. of Jerusalem, was long identified with Modin; but this identification has nothing but a late tradition in its favour. The proposal of Robinson (*BR* 3 151 f.; cp. on Šōbā, *ibid.* 26) to locate Modin at Lātrūn has won little support. It is now very commonly believed that the village of el-Medyeh marks the site of the old home of the Hasmonæans (Conder, *PEF.* 12297 341-352; C. Clermont-Ganneau, *Arch. Res. in Pal.* 2359). The identification was first proposed by Ein. Forner in 1866, and a little later by Neubauer (*Géog. du Talmud*, 1868, p. 99), and by Sandrecki (1869), who located the mausoleum at the Kaḇūr el-Yahūd, a little to the SW. of Medyeh. El-Medyeh is a large village a little off the old Roman road which passed from Jerusalem to Lydda through the two Bethhorons (see EPHRAIM, map; Midieh). It is about 16 m. NW. of Jerusalem, and 6½ m. from Lydda. The village proper is separated on three sides from higher ground; to the W. lie several ruins, among them the Kh. Midyeh, Kh. el-Himmām, and especially the Sheikh el-Gharbāwi where Guérin erroneously thought in 1870 that he had discovered the Maccabæan Mausoleum. (*La Samarie*, 2401; *Galilée*, 1, 47.) South of the village is a conical knoll called er-Rās, ('the head'), about 700 ft. high, and this has been taken by Conder and others as the most likely spot for Simon's monument. Er-Rās has the appearance of

¹ [It may be noted that for *πυραμίδας* the Syr. has *nahšāthā*, perhaps 'grave-stones,' and *μηχανήματα* may have been simply machines for raising the pillars.]

having been artificially cut. The village is shut in by the surrounding heights; but there is a fine view obtainable from er-Rās, and Jaffa and the sea are clearly seen. From the sea the bare outlines of Simon's monument would have been visible when the sun was behind the observer.

There are many tombs in the neighbourhood, deeply cut in the rock, the openings covered with great stones. Nothing has so far come to light, however, to suit the description in 1 Macc.; hence it may be said, that a personal visit to Medyeh, while revealing no valid objection to its identification with Modin, does not produce a sense of absolute conviction. Medyeh certainly fulfils all the other requirements. Though we must eliminate the condition of visibility from the sea, Modin probably stood on a hill. It is unlikely that Simon would have erected a monument, meant to be conspicuous, unless it was so situated as to be clearly seen from afar. Moreover, the most natural inference from 1 Macc. 164 is that Modin stood near the plain, but not in it. Medyeh admirably suits this inference. The statement of the Talmud that Modin was 15 m. from Jerusalem, and the assertion of the *Onomast.* that Modin was near Lydda, both support the claims of Medyeh. The identity of name is also a weighty support. Clermont-Ganneau (*PEF.* 1897, p. 221) asserts the general rule that the Aramaic termination *-itha* becomes regularly *-i* in Arabic. Hence *Μωδέθα* (see § 1) would be represented by the Arabic *Mediē* (pronounced, according to Ganneau, Meūdiē). (The present writer, when in Judæa in 1898, came across an Arab in Jerusalem who suggested as the site of Modin a high hill just above 'Amwās. This hill is locally known as Medemneh. An examination of the site revealed some, but very few, ruins of ancient buildings.) Le Camus (*loc. cit.*) objects to the identification of Modin with Medyeh: (a) that Medyeh was in Dan, not Judæa, (b) that 1 Macc. 164 requires a more southerly position than Medyeh, and (c) that Medyeh is not sufficiently central to have formed the headquarters of the revolt. These arguments are none of them conclusive.

I. A.

MOETH (מֹועֶת), 1 Esd. 863 = Ezra 833, NOADIAH (1).

MOLADAH (מֹולָדָה; usually מֹולָדָה), a place in S. Judah towards Edom mentioned in (a) Josh. 1526 מֹולָדָה [A], (b) Josh. 1927, קֹולָדָה [BA], ΔΑΜ [B^a per ras], ΜΩΛΑΔΑΜ [B^a (vid.) mg.]; (c) 1 Ch. 428, ΜΩΛΑΔΑ [B], ΜΟΥΛΑΔΑ [L]; (d) Neh. 1126 (Bⁿ*A om.). The notice in (c), however, is admitted to be derived from (b), and the words 'and Shema and Moladah' in (a) are an interpolation (see SHEMA) from Neh. 1126 (see Bennett, *SBO T* 'Joshua'). The two remaining passages (b and d) tell us this—that Moladah was first Simeonite, then Judaite (see *St. G. V. i.*, 154), and that it was in the neighbourhood of Shema or Sheba and Beersheba. Originally it was probably Jerahmeelite, as its name appears to indicate (see MOLID). Moladah is very possibly the Malatha or Malaatha in Idumæa, to the 'tower' of which Agrippa at one time retired (*Jos. Ant.* xviii. 62). Respecting this Malatha, Eus. and Jer. tell us (*OS* 872, 21455, 11927, 25578, 1333, 26642) that it was 4 R. m. from Arad and hard by Ether (Jattir). If this statement is correct, it is fatal to the identification (in itself phonetically difficult) of Moladah with *Kh. el-Milāh* (13 m. E. of Beersheba), which has been adopted from Robinson (*BR* 2621 f.) by Guérin, Mühlau, and Socin (cp *SALT, CITY OF*). The fortress of Malatha seems to have been entirely razed. The ruin of *Derējās* or *Darējāt*, on the slopes and summit of a knoll, with caverns, referred to by Buhl (*Pal.* 183), seems too insignificant. It is, however, in the right district, being NW. of *Tell 'Arād* towards *'Atir*. Cp *JERAHMEEL*, § 2.

T. K. C.

MOLE, מֹולָה (מֹולָה פְרוֹת); but some MSS, Ibn Ezra, and the moderns read מֹולָה פְרוֹת, from מֹולָה, 'to dig?'—only in plur., cp Theodot. Φαρφαρωθ; τοῖς ματαδοῖς [BNAQT]; Is. 220†). The idolaters, say the commentators, will have to throw their idols into the holes burrowed by moles. The genus *Talpa* (mole) has not been found in Palestine; but its place has been taken by the mole-rat, *Spalax typhlus*. Mole-rats are common about ruins and the outskirts of villages, etc. They are considerably larger than moles. Their eyes are completely covered by skin; the ear conchs are small and the incisor teeth large and prominent. They

form long burrows, sometimes 40 ft. in length and about 18 in. below the surface, in which they live gregariously, seldom, if ever, coming to the surface. The objection is (1) that the existence of a word חמץ, 'moles,' is uncertain, and (2) that the common view makes a miserable sense. One can hardly doubt that there is a textual corruption, and that the 'moles' and 'bats' have to disappear. Read 'In that day men shall cast away the idols of silver and gold which the Jerahmeelites (יהרמאליים) made for them to worship'; cp v. 6, where ערפתיים, as usual, is a popular corruption of צרפתיים, 'Zarephathites' (often a synonym for 'Jerahmeelites'; see PELETHITES).

2. In Lev. 11:30 occurs חַמְצֵט, which is now generally explained 'chameleon' (see LIZARD, 6). Onk., however, gives אַיִטוֹת, 'the mole,' with which Vg. (ἀἰσινάλας, *talpa*) agree. Did O., Onk., read in this passage חַמְצֵט (or אַיִטוֹת)? In v. 18 חַמְצֵט evidently means some kind of bird, and it is unlikely that this name was really given to animals belonging to quite different categories. It is noteworthy that Tg. reads חַמְצֵט, 'mole,' instead of MT's חַמְצֵט, in Ps. 58:9 (see OWL, § 1 [c]).

3. On the proposed rendering MOLE for חַמְצֵט in Lev. 11:29, see WEASEL.

T. K. C.—A. E. S.

MOLECH, MOLOCH.¹

Heb. חַמְצֵט, Lev. 20:5, in MT always pointed with the article except in 1 K. 11:7; ⚭ in Pent. ἀρχων, ὁ ἀρχων [= חַמְצֵט, as in Gen.

49:20 Nu. 23:21 Dt. 17:14, 15, etc.), in 1 K. 11:7 (חַמְצֵט, 1. Name. μελοχία, Jer. 32:35 βασιλευς, which was probably the original rendering in all passages in Kings and Prophets where later Greek translators find Molech;² Aq. Symm. Theod. Μολοχ, which has intruded into ⚭ as a doublet in Jer. 32:35 [⚭ 39:35] and in different manuscripts in a number of other places; in some cases it has supplanted the rendering 'king,' as in ⚭, etc., in Jer. 32:35, ⚭ Ab 2 K. 23:10 [⚭ Meλοχου, cp v. 13], ⚭ 20:1. om. Am. 5:25 [see Hexapla]; Pesh. in Pent., following an old Jewish exegesis,³ interprets of impregnation of a heathen woman; 2 K. 23:10 Jer. 32:35 'amlek [1 K. 11:7 Am. 5:26 Zeph. 1:5 malkom, Milcom]; Tgg. חַמְצֵט.

The name of a deity to whom the Judeans in the last ages of the kingdom offered their own children in sacrifice with peculiar rites. The places in which the name Molech occurs in MT are Lev. 18:21 20:2-5 1 K. 11:7⁴ 2 K. 23:10 Jer. 32:35 [= ⚭ 39:35]; Greek translators have Molech also in Am. 5:26 Zeph. 1:5. Allusions to the worship of Molech are recognised by many modern scholars in Is. 30:33 57:9 (EV 'the king'); but the view of Geiger, who found references to this cult in a much larger number of passages, has been generally rejected.⁵ The evidence of MT and the versions, a brief summary of which is given above, shows that the older interpreters took the word (חַמְצֵט, חַמְצֵט) not as a proper name, but as an appellative or a title used in the cultus (see below, § 5), and read it *mōlek*, 'ruler, king'; the pronunciation *mōlek*⁶ is probably an intentional twist, giving the word the vowels of *bōseth*, 'shame.'⁷

The oldest witness to the pronunciation *mōlek* is the text of Acts 7:43. The name does not occur in Philo, Josephus, or any of the remains of the Jewish Hellenistic literature of the time, and is not found even in the Greek *Onomastica*. In Jubilees 30:10 the Ethiopic text has Molech, but the Old Latin version *alienigena* (see footnote 3 below).

¹ Molech, EV Acts 7:43, AV Am. 5:26.

² Cp the variants of ⚭ and the Hexapla in Zeph. 1:5 Am. 5:26—where the testimony is confused under the influence of Acts 7:43—Is. 30:33.

³ Cited to be condemned in *M. Megilla*, 46; cp Tg. Jer. 1 on Lev. 18:21; see Geiger, *Urschrift*, 303. *Ad Jul.* 30 to Lat. *alienigena*.

⁴ In 1 K. 11:7, Molech is an error for Milcom; cp MILCOM, § 1.

⁵ Geiger, *Urschrift*, 306 ff.; against Geiger, Oort, *Menschen- offer.* 66 ff.; Kuenen, *Th. T.* 2:562 ff.; Eerdmans, *Melchidenst.* 24 f.

⁶ Μολοχ, Molech, by vowel assimilation; cp Boos, *Αχσοομ*, etc.; Frankel, *Forstadien*, 119.

⁷ Geiger, *Urschrift*, 301 (1857); Dillmann, *MBAW*, 1881, June 16; G. Hoffmann, *ZATW* 3:124 (1883); WRS *Rel. Sem.* (2) 372 n., and many. Cp the substitution of *bōseth* for *baal* in Jer. 3:24 11:13 Hos. 9:10; also ⚭ ἡ αἰσχρὴ, ἡ Βααλ (ἡ Μολοχ) ⚭ 2 K. 23:10. See IDOL, § 3.

The term regularly employed to describe the rites of Molech worship is חַמְצֵט (he'ebir), cause to pass, make

2. The sacrifice. 'give' or 'pay' (in sacrifice);¹ thus, to Yahwē (firstlings), Ex. 13:12; to Molech, Jer. 32:35 Lev. 18:21 (in the latter 1 doublet or gloss to 'give,' cp Ezek. 16:21); cp 'give to Molech,' Lev. 18:21 20:2-4; 'make over' victims to idols, Ezek. 16:21 23:37; frequently, 'make over, offer, by fire' (without the name of the deity), Dt. 18:10 2 K. 16:3 17:17 21:6 2 Ch. 33:6 Ezek. 20:31 (⚭ generally διάγειν ἐν πυρὶ); 'make over by fire to Molech (2 K. 23:10).' The common rendering, 'make (a son or daughter) pass through the fire to Molech' (so EV), is also possible, if 'to Molech' be understood not locally but as the dedication of the sacrifice. The verb occurs so constantly in this connection that were it not for Ex. 13:12 it would doubtless have been regarded as belonging distinctively to the Molech cult.

The words חַמְצֵט rendered 'cause to go through the fire,' have often been thought to describe a ceremony of consecration or februation by passing through fire,² such as has been practised in different forms and on different occasions in all parts of the world,³ the Roman Palilia being a familiar example.⁴

Thus Theodoret (*Quest. 47 in ἱ. Reg.*) brings to the explanation of the phrase customs which had fallen within his own observation: 'I have seen in some cities once in the year fires lighted in the public squares, and persons leaping over them and jumping—not merely boys but grown men, while infants were handed through the flame by their mothers. This was regarded as an expiation and purification.' The 6th Canon of the Concilium Quinisextum (692 A.D.), in forbidding under severe penalties the ancient custom of leaping over bonfires in the streets at the new moon, quotes as warrant for the prohibition 2 K. 21:6.⁵

This interpretation is old; it is expressed in ⚭ Dt. 18:10, 'No man shall be found among you who purifies his son or daughter by fire';⁶ cp Vg. Jer. 32:35 *ut initiarent filios suos et filias suas Molech*. The Mishna seems to understand the rite as an initiation—not as a sacrifice;⁷ in the Babylonian Talmud Rabbi Abaye (4th cent.) explained the custom as he imagined it: there was a row of bricks with fires on both sides of it, between which the child must pass. His contemporary Raba compared it to the Jewish custom of swinging over the Purim bonfires.⁸ Similarly Jewish interpreters in the Middle Ages—e.g., Rashi on Lev. 18:21: the father handed over his son to the heathen priests; they built two large fires between which the boy was made to pass.⁹ It is generally assumed that the child went through unscathed (so Rashi, Maimonides); but others believed that the ordeal had a more serious ending: the child was compelled to go back and forth till the flames seized him or he fell into the fire;¹⁰ or at least that the trial was sometimes fatal. Another old interpretation of the laws in Lev. 18:21 20:2-5 (commerce with heathen women) has been mentioned above (§ 1, n. 3).

The testimony of both the prophets and the laws is abundant and unambiguous that the victims were slain and burnt as a holocaust: see Jer. 7:31 19:4-6, cp 32:35 Ezek. 16:20 f., cp 23:37-39 (? 24:6 ff.), Dt. 12:31. cp 18:10; also 2 K. 17:31; see further Jer. 32:34 Is. 57:5 f. 9 Ps.

¹ For this interpretation see Vitrina, *Obs. sacr.*, lib. 2, chap. 1; Kuenen, *Th. T.* 1:66 ff. (1867); Dillmann, *Exod.-Lev.* (2) 141 f. 599; Eerdmans, *Melchidenst.* 7 f.

² Cp Nu. 31:23, of the spoil of war whatever will stand fire, חַמְצֵט וְיָדָה, 'ye shall pass through the fire and it shall be clean'; cp the following clause on purification by water.

³ On fire festivals and ceremonies see Mannhardt, *Laumkultus*, 497 ff.; Frazer, *Golden Bough* (2), 3:237 ff.

⁴ Ovid, *Fasti*, 4:721 ff. ⁵ Mansi, 11:973.

¹⁰ See *Aruch*, l.c.

10637 *f.* These passages, it will be observed, prove also that the children were not burnt alive, but were slaughtered like other sacrificial victims; see especially Ezek. 1620 *f.* 2337 *f.*, cp also Gen. 22. Josephus, therefore, correctly interprets 2 K. 163 when he says of Ahaz, 'he also sacrificed his own son as a burnt offering to the idols (*δολοκαύτωσε*), according to the custom of the Canaanites.' Some of the midrashim give gruesome descriptions of the roasting of children in the arms of the idol of Molech (see below, § 3).

Ibn Ezra bluntly explains the word *הקביר* as equivalent to *הקרי*, 'burn,' 'for thus was the cult.'¹ Many scholars have endeavoured to reconcile these conflicting views in the theory that children were sometimes only 'passed through' the fire in rites of initiation or februation, sometimes actually burned. Analogies have been cited both for the attenuation of a sacrifice to a symbolical delivery to the flames, and for the growth of a real offering out of a more harmless rite.²

The only seat of this cult of which we have certain historical knowledge is Jerusalem. The catalogue of

3. Seat of the worship. the sins for which the northern kingdom was destroyed, 2 K. 177 *ff.*, in which the Israelites are charged with offering their sons and daughters by fire (*ויעבירו*), was drawn up by a deuteronomistic writer (in the sixth century) from Dt., Jer., and Ezek. The prophets of the eighth century, in their indictment of contemporary Israel, say nothing of such sacrifices. (On 2 K. 1731 and Is. 573 *ff.* see below, § 4.)

In Am. 526, *והשחיתו את כבוד מלכיהם*, *Ⓢ* has *τῷ Μολοχ* (cp Acts 743), *Vg. Moloch* (Aq. *Μολοχ*, Pesh. *malokim*), and many interpreters down to our own time find here the name of Molech (see AV), some—chiefly older scholars—thinking that the idolatry of the forefathers in the wilderness is meant,³ others, foreign cults of the author's own time. If, however, 'Siccuth' (Sakkut) is, like 'Chiun' (Kaiwān), the proper name of a Babylonian deity, as is now the generally accepted and most probable opinion, *והשחיתו* can only be appellative, 'your king,' and thus, apart from the question of the genuineness of the verse, the reference to Molech disappears; see CHIUN, and AMOS, § 13 [but cp MOSES, § 11; SHECHEM, ii.]. Even with the appellative interpretation of *כבוד*, 'tabernacle,'⁴ the verse would testify only that to some (unnamed) god the epithet 'king' was applied; there is no allusion to the peculiar rites of Molech worship. Hos. 132 has been understood to refer to human sacrifice⁵ to the calves of Israel (not Molech); but the better interpretation is, 'Human offerers kiss calves!'⁶

The place of sacrifice at Jerusalem was in the Valley of Ben Hinnom (see HINNOM, VALLEY OF; JERUSALEM, col. 2423 *u.* 7), just without the city gate 'Harsith' (Jer. 192), not far from the Temple, and is called 'the Tophet' (*התפת*).⁷ This pronunciation of the name is probably, like 'Molech,' one of the cases in which MT has given a word of idolatrous association the vowels of *bōseth* (Geiger; see above, § 1); cp *Ⓢ* *θαφεθ, ταφεθ, θαφεθ*, Pesh. *tappath*. On the derivation and meaning of the word see TOPHET. If we may connect it with Aram. *תפא* (Jer. Tgg., Talm.) and the cognate words (see especially *RS*⁽²⁾ 377 *u.*), *תפת* (pronounced *tēphath*) is a loan word of Aramaic origin (cp Heb. *'āpōth*, and the denom. vb. *šāpāth*, set (a pot) on the fireplace).⁸ The meaning 'fireplace' would agree well with Is. 3033, the only passage in the OT which seems to describe Tophet.

¹ Geizer's surmise, on Lev. 1821 (*Urschrift* 305), based on MT 2 Ch. 283 (against all the versions) compared with 2 K. 163, that the original reading was everywhere *הקביר*, 'consume' by fire, for which *הקביר* is a euphemistic substitute, is generally rejected.

² See G. Voss, *De origine . . . idolatriæ*, lib. 2, ch. 5; Spencer, *De legibus ritualibus*, lib. 2, ch. 13, § 2. Braun, *Selecta Sacra*, 471 *ff.*; Witsius, *Miscell. Sacra*, lib. 1, diss. 5, § 18 *f.*

⁴ So, most recently, Nath. Schmidt, *JBL* 139 *f.* (1894).

⁵ So Oort, Kuenen, Eerdmans (23).

⁶ Wellhausen, Stade, Nowack, and others.

⁷ On human sacrifices outside of cities see WRS *Rel. Sem.*(2) 371 *ff.*

⁸ The supposed Aramaic origin of the word seems at variance with the probably Phœnician origin of the cult; see below, § 6.

Whatever explanation be given of the form, the word *tophthē* is obviously synonymous with *תפת*; it is a fireplace, apparently a pit or trench—'deep and wide'—in which the fuel was piled.¹ Compare the *χάσμα πύρος* in Diodorus' description (probably from Duris of Samos) of the child sacrifices of the Carthaginians (2014), and the lines of Euripides, *Iphig. in Taur.* 621 *f.*, quoted by Diodorus in the same connection, where Orestes, about to be sacrificed asks, *Τίφος δὲ ποῖος δεξέται μὲ ὄταν θάνα;* Iphigenia answers: *πῦρ ἱερὸν εἶδον χάσμα τ' εὐρωπῶν πέτρας.*²

The language of Jeremiah when he says that the people of Judah had built 'high places of Tophet' (731), or of Baal (195 3235), does not contradict this inference, for these expressions mean no more than a 'heathen sanctuary' (see HIGH PLACE, § 5).

There is nothing in the OT about an image at this sanctuary; Ezek. 1620 *f.* is hardly—in this rhetorical indictment—to be put into such close connection with *ז' 17*, that we should understand the 'images of a male' in the latter verse of a Molech idol to whom the children were sacrificed;³ and the author of 2 K. 2310 would scarcely have failed to mention the image, if one had been there.

The descriptions of the idol of Molech in *Ēchā rabbāthi* on Lam. 19, and *I'alkū* on Jer. 731 (from Midrash *Y'lammoconu*, cp *Tanchuma*, ed. Buber, *Debarim*, fol. 8a) which have been repeated by many Jewish and Christian authors, are not only much too late to have any value as evidence to the fact, but are manifestly derived from Greek accounts of the image of Kronos to which the Carthaginians burned their sons.⁴

That the 'Tophet' was to the Molech worshippers a very holy place is evident from 2 K. 2310, but especially from Jer. 732: in the day when the Valley of Ben Hinnom shall be called the Valley of Slaughter, they shall bury the slain in Tophet for want of room, and thus be constrained themselves to defile it (cp Ezek. 97, of the temple), Jer. 1912 *f.*

The testimonies in the OT concerning the sacrifice of children to 'Molech' with peculiar rites—the question is not here of the antiquity of human

4. Age of the cult in Judah. sacrifice in general⁵—relate chiefly to the seventh and the beginning of the sixth century B.C. We have, indeed, a statement

that Ahaz (reigned from about 734) 'offered his son by fire' (2 K. 163, *הקביר*), and many scholars are accordingly of the opinion that the cult was introduced in the eighth century—most likely by Ahaz himself, whose penchant for foreign fashions in worship is known (2 K. 1610-16). There is no intrinsic improbability in this; but we may hesitate to affirm the fact on the sole testimony of the author of Kings (end of 7th cent.) in his pragmatic judgment of the reign of Ahaz (2 K. 161-4). The prophets of the eighth century—in striking contrast to those of the next—make no mention of child sacrifices in their enumeration of the sins of their contemporaries; and, if Ahaz really offered up his son it would be more natural to regard it as a last resource in desperate straits,⁶ like Meshah's sacrifice (2 K. 326 *f.*), than as an early instance of the 'Molech' cult.

Is. 3033 (cp § 3) obviously plays upon this cult: for the enemies of Judah a vast fire pit is prepared (*tophthē*), like the Tophet in the Valley of Ben Hinnom; 'this, too, is for the king,' as that Tophet for the king-god ('Molech'). The elimination of the latter clause (Duhm) removes but half the difficulty. If the horrid rites of Tophet had been as familiar in Isaiah's day as this verse implies, is it conceivable that we should have but one reference to them, and that in sarcasm rather than in abhorrence? The difficulty would not exist if

¹ See Che. *Isaiah* (*SBOT*) 157.
² Examples of burning men in fire pits are cited from Arabic literature by WRS *Rel. Sem.*(2), 377.

³ Kuenen, *Th. T.* 257 *ff.*, cp 574 *f.* Oort, *Menschenoffer*, 79 *f.* thinks that Molech was properly the name of the image, which was arranged to serve as an altar.

⁴ See Moore, *JBL* 1610 *ff.* (1897). For the Greek and Roman testimonies see Maximilian Mayer, in Roscher, *Lex.* 2 1501 *ff.* See also WRS *Rel. Sem.*(2), 377 n.

⁵ See SACRIFICE, § 13.

⁶ As the occasion we should probably think of the invasion of Judah by Pekah and Rezin (Is. 71 2 K. 165). But it would be strange that we find no allusion to the deed in Is. 7 *f.*

we could assume that *tophèt* was a common name for a fire pit, which only later became specifically associated with the offerings to Molech, but the probability is that *tôpheth* (*tôphâth*) is a foreign word which was adopted with the cult (see above, § 3); the corresponding Hebrew words have not developed similar meanings.

1. 30-27-33, as a whole, is regarded by several recent critics as 'post-exilic' (Guthe, Hackmann, Cheyne), and this may be confidently affirmed of v. 30; the tone of the allusion is rather that of a writer remote from these atrocities, than of a prophet in the midst of the struggle against them.

In the last half century of the kingdom of Judah the denunciations of the prophets (Jer. 7:31 19:5 ff. 32:35, cp 3:24; Ezek. 16:20 f. 36 20:26 31 23:37 39, cp Mic. 6:6-8) and the prohibitions of the legislation (Dt. 18:10, cp 12:31; Lev. 18:21 20:2-5)¹ prove that the sacrifice of children was a common thing, not on occasions of extremity, but as part of an established cult. The victims were frequently, if not always, firstborn sons or daughters of their mother (Ezek. 20:26, cp Mic. 6:7; see below, § 7). The author of Kings, in his recital of the sins of Manasseh for which Judah was doomed (2 K. 21:2-9, cp Jer. 15:4), includes the offering of his son by fire (v. 6, מִבְּנָיו, see also 23:10), and although the verse is little more than an application to Manasseh of Dt. 18:10 f. and the testimony of such catalogues of crimes is always to be taken with caution, in this case it may very well be true. A public cult of this kind is more likely to have been introduced from above than to have sprung up from below; particularly if, as we shall in the sequel find reason to think probable, the peculiar rites came from abroad.

The sacrifices were suppressed and the sanctuary dismantled and defiled by Josiah in 621 (2 K. 23:10); but the worship was revived under Jehoiakim and continued till the fall of Jerusalem (Jer. 11:10-13 Ez. 20:30 f.). Is. 57:5 has sometimes been thought to attest the survival—or revival—of the sacrifice of children among the descendants of the ancient Israelites at a very late date;² cp v. 9 where the 'king' is understood of the divine king ('Molech,' Ewald); but the evidence is of doubtful interpretation, and it is uncertain how far the writer is describing cults of his own time.

It has generally been held that these sacrifices were offered to a foreign god named Molech, cognate or perhaps identical with the Ammonite

5. To whom were the sacrifices offered?

Milcom, whose worship for some reason received a great impulse in the last century or two before the fall of Judah. The language of the prophets seems to confirm this view: Jeremiah calls the place of sacrifice 'the high place of the baal' (*i.e.*, a heathen deity, Jer. 19:5 32:35), 'the baal' (MT *bôseth*) had devoured the children of the Judæans (3:24); Ezekiel speaks of sacrificing children to idols (23:39, *gillûlîm*), and characterises the worship as fornication (*e.g.*, 16:20) or adultery (23:37), expressions which since Hosea had been standing metaphors for apostasy. There can, indeed, be no question that to the prophets this cult was an apostasy to heathenism; as little can we doubt that the rites were introduced from a foreign religion (see below). But we cannot be equally certain that the judgment of the prophets accurately reflects the intention of the worshippers; we shall find evidence in the prophets themselves that those who brought these sacrifices devoted them to no foreign god.

The pronunciation 'Molech,' as we have seen (§ 1), is a figment of Jewish readers; the word was originally spoken as it was meant by the writers, *ham-mêlek*, 'the king,' a title or *ἐπίκλησις*,³ not a proper name. There is a strong presumption that the deity who was thus

¹ Perhaps only 20:22 is the old law; see LEVITICUS, § 18.

² Verse 5 is regarded by Duhm and Cheyne as secondary in a late context. That Is. 56:9-11 is not a fragment of a prophet contemporary with Jeremiah and Ezekiel, as was thought by critics of the last generation, is now generally recognised.

³ On the religious importance of these *ἐπίκλησις* see Farnell, *Cults of the Greek States*, 135.

addressed in Jerusalem was the national God, Yahwê. The title 'king' implies the belief that the god to whom it is given rules the destinies of the people; and whatever foreign deities Manasseh admitted to his pantheon, he and his people never ceased to acknowledge Yahwê as the god of Israel.

The king' (*mêlek*) is, in fact, a common title of Yahwê: see Is. 6:5, 'the king, Yahwê of Hosts'; Jer. 40:18, 'As I live saith the king, whose name is Yahwê of Hosts' (cp 48:15); Is. 44:6, 'Yahwê, the king of Israel' (cp 41:21 43:15 Zeph. 3:15); a contemporary of Jeremiah bears the name Malchiah, 'my king is Yahwê' (Jer. 21:1 38:1), nor is there any reason to think that in the older names Malchishua (son of Saul, 1 S. 31:2), Abimelech (Judg. 9:1), Ahimelech (a priest of Yahwê, contemporary of David, 1 S. 21:1 f. 2 S. 17:7), *mêlek* is to be understood otherwise; note the analogy of baal-names (see BAAL, § 5).¹

This presumption is strongly supported by the testimony of Jeremiah and Ezekiel. Jeremiah is constrained to protest repeatedly that Yahwê had not enjoined these sacrifices: the people of Judah built the 'Tophet' sanctuary in the valley of Ben Hinnom 'to burn their sons and daughters with fire; a thing which I commanded them not, nor did it enter into my mind' (7:31, cp 19:5 32:35). The prophet's emphatic denial is the best evidence that those who offered these sacrifices offered them to Yahwê, as they believed in obedience to his command. This conclusion is confirmed in a remarkable way by Ezekiel: the people had obstinately disobeyed the good laws which Yahwê had given them (20:18 ff.), therefore 'I gave them statutes not good and ordinances whereby they cannot live, and defiled them by their sacrificial gifts in offering every firstborn, that I might fill them with horror' (Ezek. 20:25 f., cp v. 31). The prophet does not, like Jeremiah, deny that Yahwê had commanded any such thing; he declares that these bad and destructive laws were what the people had deserved by rejecting better ones. He leaves us in no doubt what the law was, for he uses the very words of Ex. 13:12, 'Thou shalt offer every firstborn to Yahwê' (ומקדוה כל פטר רחם ליהוה); see below, § 7. The prohibition Lev. 18:21 also shows that the 'Molech' sacrifices were offered to Yahwê: 'Thou shalt not give any of thy children [offering them to יהוה, gloss] to the king, and shalt not [thus] profane the name of thy God.' Cp also Mic. 6:6 f. Gen. 22.

The natural, and indeed almost inevitable, inference from the facts that have been brought out in the foregoing paragraphs—the place at which the sacrifices were offered, the peculiar rite, the time in which the worship first appears—is that the offering of children by fire at the 'Tophet' in the Valley of Hinnom to Yahwê the king was a foreign cult introduced in the reign of Manasseh. And, inasmuch as in this age, when the relations of Judah to Assyria were uniformly friendly, the influence of Assyrian civilisation—which, as always, necessarily includes religion—was at its height, and since other cults which then came into vogue can with much probability be traced to Babylonia,² it is not surprising that many scholars should have thought that the 'Molech' worship came from the same quarter.³ This conjecture seemed to be confirmed by the fact that the colonists from Sepharvaim—long identified with Sippara in northern Babylonia—are said in 2 K. 17:24 31 to have burned their sons to their gods ADRAMMELECH and ANAMMELECH (*qq.v.*), whose names are obviously compounded with *mêlek* (Adarmalik, Anumalik). The divine name or title *malik* was read in many Assyrian inscriptions;⁴ texts were

¹ On these names see Gray, *Hebrew Proper Names*, 115 ff. 138 ff. 146 ff.; Kerber, *Hebräische Eigennamen*, 37 ff. [Cp also MALCHIAH, SAUL, and *Crit. Bib.*, where an attempt is made to go behind MT, and recover more original forms of the names.—T. K. C.]

understood to speak of human sacrifice;¹ reliefs and figures on seal-cylinders were thought to represent it.

The progress of investigation has left but little of this seemingly sufficient demonstration. Sefharvaim is not the Babylonian Sippara (Abū Habba), but a city in Western Syria (see SEFHARVAIM); the texts supposed to speak of human sacrifice were wholly misinterpreted; the representations in art are more than doubtful.² *Malik* is an epithet of various gods, probably not, however, in the meaning 'king' (*šarru*; e.g., *šar ilāni Ašur*; id. *Marduk*; *šin šar ilāni ša šamē u iršitim*),³ but 'counsellor,' 'decider' (prop. *mālik*),⁴ or perhaps 'prince.' The cases in which *Malik* appears alone as though a proper name, particularly the inscription of Nabu-bal-iddin from Sippara (col. 55 40 67),⁵ where it occurs in connection with Šamaš and Bunēne, are variously explained;⁶ but it is at least certain that if *malik* ever became locally a proper name, the god to whom it was given occupied no such conspicuous place in the Assyrian pantheon as to make it probable that his worship should be taken up with so much zeal in distant Palestine, and, so far as our evidence reaches, there is no trace in Babylonia of the peculiar child sacrifices of the 'Molech' worship.

The OT represents these sacrifices as Canaanite.⁷ The value of this testimony is diminished by the fact that from Hosea onwards the contaminating influence of Canaanite culture was the common prophetic explanation of the religious corruption of Israel; and the late date at which the peculiar Molech cult appears forbids us to suppose that it was adopted, like the baal worship, from the old population of the land in the period of occupation and settlement. But if we may take Canaanite in the larger sense in which it includes the Phœnicians,⁸ this theory of the origin of the cult is probably true. For, though there is sporadic or inferential evidence of child sacrifice in many parts of the world,⁹ the Phœnicians and their colonists, especially the Carthaginians, are the one civilised people of antiquity of whom we know that the sacrifice of their own children was practised, not as an occasional recrudescence of savage superstition, nor in the hole-and-corner rites of some abominable mystery, but as an established and prominent part of the public religion. These sacrifices seemed to the Greeks so remarkable in their atrocity, that no author who touches upon the history or customs of the Phœnician race fails to mention them. And it is of great significance for our question that in the descriptions of these rites, whether in mythical or historical form, the pit of fire constantly recurs.¹⁰

The deity to whom these sacrifices were offered is

called by the Greeks Kronos. Philo of Byblos tells us that the native name of the Phœnician Kronos was El (*frag.* 214, *FHG* 3 572, cp *frag.* 4, *ib.* 570 f.), and relates of this god that he killed a son and a daughter with his own hands, 'so that the other gods were amazed at Kronos' disposition' (*frag.* 218, *lc.* 568); and that in a time of plague he sacrificed his only son to his father Ouranos (*frag.* 224); another passage narrates the sacrifice of his only son when great peril of war threatened the country (*frag.* 4 f., *lc.* 570 f.); human sacrifices to Kronos, of which, according to Porphyry, the Phœnician history of Sanchoniathon was full, followed the example given by the god himself. It would be too much to infer from our evidence that the 'Kronos' sacrifices were always dedicated to the one god El; indeed, in the light of what we know of the Phœnician religion this is altogether improbable. Human sacrifices were offered to other gods, for example, to Melkarth, the city god of Tyre, whom the Greeks called Herakles.¹

Many Phœnician proper names are compounded with *melk*, *milik*, 'king.'² The title, like *ba'al*, was doubtless given to the divine rulers of different cities; whether in time it attached at least by eminence to certain among them is not proved, though inherently probable enough. In particular we do not know that the god (El) or gods to whom children were sacrificed were specifically invoked with this *ἐπικλησις*. At this point the chain of evidence connecting the Molech sacrifices of the Israelites with the Phœnician cult is not complete. It is perhaps not irrelevant to observe, however, that not only does the Kronos-El of Philo of Byblos reign upon earth in a way that no other god in his pantheon does (*frag.* 226; cp 24 28 etc.), but that in Greek authors also the epithet *βασιλεύς* is applied to Kronos in a much more primitive sense than to Zeus.³

We should err widely if we imagined that these heart-rending sacrifices were introduced, like Ahab's new altar,

in idle imitation of a foreign fashion. The spirit in which they were offered is expressed in the words which the author of Mic. 6 7 puts into the mouth of the people: 'Will Yahwè accept thousands of rams, myriad streams of oil? Shall I give my firstborn for my transgression, the fruit of my body for the sin of my soul?' The sacrifice of the firstborn, the dearest thing on earth, is the most costly and therefore the most efficacious piaculum by which the wrath of God can be averted. It is not strange, therefore, that these sacrifices should have been multiplied in the last age of Judah, when disaster after disaster proved how heavily the anger of Yahwè rested upon the nation.⁴ If their neighbours, at such a time, offered to their gods this uttermost atonement, would Yahwè expect less of his people? Nay, did not he demand as much? We have learned from Jeremiah and Ezekiel (above, § 5) that their contemporaries alleged a law in which Yahwè claimed these sacrifices, and Ezekiel quotes the law: 'Thou shalt offer every firstborn to Yahwè' (Ex. 13 12).⁵ In the law books as we have them, this and the parallel laws are protected by clauses prescribing the redemption of firstborn children (see, however, Ex. 22 29 [28]). If these provisions attached to the laws from the beginning,⁶ the worshippers may have treated them as permissive, and thought that a more unreserved devotion would not avail itself of the privilege of substitution. More probably the safeguarding clauses were added to exclude the interpretation of the law—not contemplated by its framers—which became current in the seventh century, according to which it demanded the actual sacrificing of the firstborn of men as well as of beasts.

A story repeated by Dionysius of Halicarnassus presents a

striking analogy:¹ the Tyrrhenians [Dionys. 'Pelasgians'] in a time of scarcity vowed to Zeus, Apollo, and the Kabiri to sacrifice tithes of all their increase. Their prayer having been heard, they offered tithes of their cattle and the fruits of the soil. A direr famine, with many other signs of the wrath of the gods, came upon them, and when they consulted the oracle they received this response: It was because, when they got what they desired, they did not pay what they had promised, but were still owing the most valuable part of all. They did not understand the response, but one of the older men interpreted it: The gods were just; they had indeed paid the first-fruits of their property honestly, but they still owed the tithes of human kind, which the gods prized above all.² There was a division of opinion about this interpretation, some rejecting it as given with evil intent; but a second appeal to the oracle confirmed it.³

If our hypothesis is correct, the religious motive of the child sacrifices in Judah came from within; and the form of the piacula was foreign, probably Phœnician.

MOLI, AV, 1 Esd. 8:47 = Ezra 8:18, MAHLI.

MOLID (מוליד), a name in the genealogy of Jerahmeel; 1 Ch. 2:29† (מωחל [B], מωλδδ [A], מωωלי [L]).⁴ The name of his brother is Ahbar (so read, with C^b). Ahbar and Molid are, with the help of transposition, carved out of Jerahme'el, like Jerah and Almodad (probably) in Gen. 10:26. This does not exclude the possibility that Molid, or perhaps Molad (cp A), may have been regarded as the 'father' of MOLADAH [q. v.], which is indeed probably another record of Jerahmeel. Cp JERAHMEEL, § 2 a. T. K. C.

MOLOCH (Am. 5:26 AV and RV^{mk}, Acts 7:43†). See MOLECH and CHIHU AND SICCUTH.

MOLTEN IMAGE (מלכת), Dt. 9:12. See IDOL, § I, e.

MOMDIS, 1 Esd. 9:34 = Ezra 10:34, MAADAL.

MONEY. As in the case of metals, it has been judged best not to give a long comprehensive article, but to treat the subject in a series of special articles (see especially MANEH, PENNY, SHEKEL, STATER; WEIGHTS AND MEASURES).

The Hebrew narrators (J, E, P) who recast the Hebrew legends relating to primitive times had not forgotten the advanced civilisation prevalent in Canaan when their forefathers entered it; they presuppose the existence of a metallic currency, in harmony with the ancient Egyptian tribute lists and the Tell el-Amarna letters.

A favourite opinion connected with the patriarchal story must, however, be abandoned. The notion that the *kēšitah* of Gen. 33:19 and two other passages was a piece of precious metal, with the stamp of a lamb, indicative of its value, is based on the fact that C, Vg., and Onk. render 'lamb' or 'sheep'—a very insufficient ground (Che.; for a better explanation, see KESITAH).

There is no passage in the OT suggestive of anything like the Assyrian ingots stamped with 'the head of Ištar of Nineveh,' to which Babelon (58, quoted by Kennedy) refers. At the same time, there can be no doubt that in-

¹ *Antiq. Rom.* 123 f., from Myrsilos of Lesbos; see *FHG* 4:445 ff.

² Cp Varro's explanation of child sacrifice cited in Aug. *Civ. Dei*, 7:19: quod omnium seminum optimum est genus humanum.

³ See also what follows in Dionysius.

⁴ C^b suggests (but cp Ki. in *SBOT*) that the ך is intrusive.

got of fixed weight were in use among the early Israelites (see, e.g., 1 S. 9:8), and in those transactions in which the strictest accuracy was required, the money was specially weighed. Hence כֶּסֶף (*kēšal*), properly 'to weigh,' often means 'to pay'—e.g., Gen. 23:16 Ex. 22:16 1 K. 20:39 Is. 55:2 Ezra 8:25. Gen. 23:16 is especially interesting, from the vividness of the description of a business transaction in the course of which it occurs. The meaning, however, is hardly given correctly by the commentators whom Kennedy (Hastings, *DB* 3:420 o) follows. Methodical emendation of the text brings out a meaning which is far more satisfactory and suggestive (see KESITAH).

The clue to the problem of the *kēšitah* has been given by a misreading of C in Chronicles, and in solving this problem light has been thrown on another passage (Gen. 23:16), where the phraseology had not been questioned. It was for four Carchemish-minæ of gold that Abraham, according to P, purchased Machpelah (Gen. 23:16), and for one mina of Carchemish that Jacob, according to E, bought a piece of land at 'the city of Shechem' (Gen. 33:19, cp Josh. 24:32; but see SHECHEM). How important the Carchemish mina was, is seen by the fact that it was carried by Phœnician traders to Greece. The description of the purchase in Gen. 23 reminds us of many Assyrian documents in which the mina of Carchemish is expressly mentioned as the standard of money payments (*KB*, vol. iv.).

Literature.—To ascertain the value of the coins in use among the Jews in the post-exilic age, we must have recourse to metrology. Works relating to this subject are therefore to be included here. See especially J. Brandis, *Das Münz-, Maas- u. Gewichtswesen in Vorderasien* (1866), and 'Literature' under WEIGHTS AND MEASURES.

On the Egyptian and Babylonian use of the precious metals for the purposes of exchange, cp Maspero, *Daun of Civilisation*, 324 ff. 749 ff.; and on the question, 'Did the Assyrians coin money?' see the essay by C. H. W. Johns, *Expos.*, Nov. 1899. On Jewish coins, see Madden, *Coins of the Jews* (1881); Lévy, *Gesch. der jüd. Münzen* (1862); de Saulcy, *Recherches sur la numismatique judaïque* (1854), and *Numismatique de la Terre Sainte* (1874); and Th. Reinach, *Les monnaies juives* (1887). See also A. R. S. Kennedy's excellent monograph 'Money' in Hastings, *DB* 3:417-432. On the statement of Herodotus (1:94) that the Lydians first coined money see LYDIA, § I.

MONTH, the period from the first appearance of one new moon to that of the next—in other words, the period of a lunar revolution. Naturally, there-

1. Meaning of terms. lunar months can be meant; or of any such artificial product as the so-called 'solar' month the ancient Israelites took no more account than do the modern Jews in arranging their calendar. Both the OT words for month—*hōdeš* (חֹדֶשׁ) and *yerah* (יָרַח)—correspond to the natural definition given above. *Hōdeš*, the commoner and specifically Hebrew name, denotes originally the new moon (the 'new' light), a meaning which the word retained throughout in Phœnician (cp the n. pr. חֹדֶשׁ = *Novunquios*, of the inscr.); *yerah*, the word for month common to all the Semitic languages (cp Phœn. ירח, Aram. ירח, Assy. *arhu*, etc.), though comparatively rarely employed in the OT (Ex. 2:2 Dt. 21:13 33:14 1 K. 6:37 38:8 2 K. 15:13 Job 36:7 3 29:2 39:2 Zech. 11:8 Ezra 6:15 and Dan. 4:26 [29]), tells the same story plainly enough by its close relationship to *yārāh* (יָרַח), the word for moon. The appearance of the new moon (חֹדֶשׁ) inaugurated a new period, a new month, and was festally observed by the Israelites from ancient times (cp, e.g., Am. 8:5 Hos. 2:11 [13] Is. 1:13 f.). See NEW MOON.

The mean length of such a month is 29 d. 12 h. 44 m. 2.82 sec., and accordingly it was impossible that the determination of the month, as long as it rested on direct observation only, could arrive at any absolutely uniform result; the observed months inevitably varied in length between twenty-nine and thirty days, and the order in which the months of twenty-nine days (חֹדֶשׁ קָטָן) alternated with those of thirty days (חֹדֶשׁ מְאֵר) had not yet been fixed even at the time when the Mishna

MONTH

was composed; even at that late date, in the second century A.D., the point was decided by the first visibility of the new moon (cp also Jer. 316). It was only with the introduction of a fixed calendar in the fourth century, that a regular order was determined in this matter also (see YEAR).

The oldest names of months of the year preserved in the OT are the following four:—(1) **אֲבִיב** (Abib), always with **חַדֵּשׁ** preceding), Ex. 134 23 15 34:8 Dt. 16:1, *i.e.*, the month of the ripening ears of corn, ear month; (2) **זִיב** (Ziw) **חַדֵּשׁ** (Ziw), I K. 6:37, and **חַדֵּשׁ זִיב**, I K. 6:1 [where also, however, **חַדֵּשׁ** ought probably to be read]], the month of splendour, flower month; (3) **אֶתְחָנִים** (Ēthānim) **חַדֵּשׁ**, I K. 8:2, perhaps meaning the month of perennial streams, the month, that is, in which only such streams contained any water; and (4) **בּוּל** (Bul) **חַדֵּשׁ**, I K. 6:38, probably meaning rain month, but according to others, with less likelihood, the month of growing crops. Plainly these four names were originally Canaanite, and were taken over by the Israelites when they settled in that country; **Ēthānim** and **Bul** are met with on still extant

2. Old (Canaanite) names.

Phoenician-Cyprian inscriptions (ירח בל, *e.g.*, at the beginning of the inscription of Eshmunazar; ירח אתנם; C/S 1, no. 86 a), and the meaning of all four, so far as can be seen, has reference to the regular rotation of the seasons of the year as experienced in Palestine.

Other Phoenician names of months are preserved on Phoenician-Cyprian inscriptions, but partly only in mutilated form (their interpretation also still remains very problematical): **כרפא** (C/S 1, no. 11); **כרר** (C/S 1, no. 92); **כפ** (C/S 1, no. 4); **כפ**, perhaps = **כפ** (ib., no. 88); and **בוחשמש** (C/S 1, no. 13).¹

It is not probable that the Canaanites understood by *yerah* a solar month, and had thus accepted the Egyptian year. In any case the old names **Abib**, **Ziw**, etc., do not point to an Egyptian vague year, the employment of which would have involved such a displacement that at the end of every 120 years the names of the months would have been a whole month too early. A further evidence that the Canaanite months were originally lunar is undoubtedly suggested by the fact that in Phoenician inscriptions, **בחדש ירח**, 'on the new moon of the month,' denotes the first day of the month in question (cp C/S 1, p. 92 ff.; the monument is referred to the first half of the 4th cent. B.C.).² Further, that the

MONTH

Phoenician-Cyprian inscriptions (ירח בל, *e.g.*, at the beginning of the inscription of Eshmunazar; ירח אתנם; C/S 1, no. 86 a), and the meaning of all four, so far as can be seen, has reference to the regular rotation of the seasons of the year as experienced in Palestine.

Other Phoenician names of months are preserved on Phoenician-Cyprian inscriptions, but partly only in mutilated form (their interpretation also still remains very problematical): **כרפא** (C/S 1, no. 11); **כרר** (C/S 1, no. 92); **כפ** (C/S 1, no. 4); **כפ**, perhaps = **כפ** (ib., no. 88); and **בוחשמש** (C/S 1, no. 13).¹

It is not probable that the Canaanites understood by *yerah* a solar month, and had thus accepted the Egyptian year. In any case the old names **Abib**, **Ziw**, etc., do not point to an Egyptian vague year, the employment of which would have involved such a displacement that at the end of every 120 years the names of the months would have been a whole month too early. A further evidence that the Canaanite months were originally lunar is undoubtedly suggested by the fact that in Phoenician inscriptions, **בחדש ירח**, 'on the new moon of the month,' denotes the first day of the month in question (cp C/S 1, p. 92 ff.; the monument is referred to the first half of the 4th cent. B.C.).² Further, that the

NAMES OF MONTHS

CANAANITE.	No.	BAB.-ASS.	HEBREW.	LXX, ETC.	MACEDONIAN.	SOLAR.
אֲבִיב	1	Ni-sa-an-nu	נִיסָן, <i>nīsān</i> (Neh. 2:1)	Ν(ε)ισάν (in Esth.)	Ξανθικός	April
זִיב	2	Ai-ru	אֶיֶר, <i>ayār</i> (Targ. 2 Ch. 30:2)	Ἰάρι (Jos. Ant. viii. 3:1)	Ἀρτεμίσιος	May
	3	Si-va-nu, or Si-man-nu	סִינָן, <i>siwān</i> (Esth. 8:9)	Σ(ε)ιουάν (Bar. 1:8 and Esth. 8:9 [N ^{ca} mg.])	Δαίσιος	June
	4	Du-u-zu	דּוּמָזוּ, <i>tammūz</i>		Πάνემος	July
	5	A-bu	אָב, <i>āb</i>		Λῶσος	August
	6	U-lu-lu	אֱלּוּל, <i>ēlūl</i> (Neh. 6:15)	Ἐλούλ (1 Macc. 14:27, not N)	Γορπαιῖος	September
אֶתְחָנִים	7	Taš(tiš)-ri-tum	תִּישְׁרִי, <i>tišrī</i>		Ἰπερβερεταῖος	October
בּוּל	8	A-ra-ah sam-na	מַרְחֶשְׁוָן, <i>marhešwān</i>	Μαρσούνης (Jos. Ant. i. 3:3)	Δίος	November
	9	Ki-[i]s[i]-li-mu	כִּסְלֵו, <i>hislew</i> (Zech. 7:1 Neh. 1:1)	Χασελεύ or -αλ. (1 Macc. 1:54)	Ἀπελλαῖος	December
	10	Ṭe-bi-[e]-tu[m]	תֵּבֵת, <i>tēbēt</i> (Esth. 2:16)	Τεβέθος (Jos. Ant. xi. 5:4).	Αύδωναῖος	January
	11	Ša-ba-ṭu	שֶׁבַט, <i>šēbāt</i> (Zech. 1:7)	Σαβάρ (1 Macc. 16:14)	Περίτιος	February
	12	Ad-da-ru	אָדָר, <i>ādār</i> (Esth. 3:7)	Ἀδάρ (1 Macc. 7:43)	Δύστροπος	March
Inter-calary.		Ar-ḥu ma-aḥ-ru ša Addaru	אָדָר בְּתִרְאָה, after Adar, or שֵׁנִי, second Adar.			

¹ To these add (Lidzbarski, *Nordsem. Epig.* 412) **חַדֵּשׁ חַדֵּשׁ** (Lidzbarski, *Nordsem. Epig.* 412) **חַדֵּשׁ חַדֵּשׁ**, which Moritz Schmidt's not quite certain restoration of the Cyprian-Greek text in the inscription known as Idallensis 1. (C/S 1, p. 104 ff.), a bilingual in Phoenician and Cyprian Greek dating from the fourth century B.C., according to which the inscription would contain reference to five supplementary days, could not in any case be accepted as convincing evidence regarding Canaanite usage.

² Even though Dī. doubts this translation and maintains that the expression means simply 'on the new moon that happens in the month in question,' the words cannot be employed as an argument for the solar month theory. The expression could be used only as long as one new moon alone in a month was possible, or 'new moon' must have lost its original meaning, and in that case must be interpreted as meaning simply the first day of the month, just as the Gk. *νομηνία* does in later usage. But even this later usage also shows that originally the new moon

marked the beginning of the month and that the months were lunar. Moritz Schmidt's not quite certain restoration of the Cyprian-Greek text in the inscription known as Idallensis 1. (C/S 1, p. 104 ff.), a bilingual in Phoenician and Cyprian Greek dating from the fourth century B.C., according to which the inscription would contain reference to five supplementary days, could not in any case be accepted as convincing evidence regarding Canaanite usage.

³ **חַדֵּשׁ חַדֵּשׁ** according to Dalman.

mourning period of thirty days, spoken of in Dt. 21 13 (cp Nu. 20²⁹ Dt. 348), should be called 'a month of days' (יָרַח יָמִים) is not impossible where reckoning is made by lunar months, and does not necessarily imply acquaintance with the solar month of the Egyptians.

With the exile, and the shifting of the beginning of the year (borrowed from the Babylonians) to the spring season, the old names of the months began to be abandoned and their place was taken by the ordinal numerals. Abib now became the *first* month (cp Ex. 13⁴ with 12²), Ziw the *second* (1 K. 6¹), Éthänim the *seventh* (1 K. 8²), and Bül the *eighth* (1 K. 6³⁸); the numeration started from the new beginning of the year—viz., spring. In course of time the Assyrian-Babylonian names for the months began to gain currency; but without addition of their numbers they are met with only in Ezra 6¹⁵ (Aramaic) and in Nehemiah (1¹ 2¹ 6¹⁵).¹ The latest date at which they can have first come into use among the Jews could be fixed with certainty if in Zech. 17 and 7¹ the names really dated from the time of the prophet Zechariah. That, however, is not probable; and we must, therefore, content ourselves with the general statement that they can hardly have come into use with the Jews before the fifth century and even then were far from being exclusively employed. They are not all of them met with in the OT; but their Hebrew form can be recovered from post-biblical literature, for example, from the *Roll of Fasts*, an Aramaic document dating from 66-70 A.D.² The name of the eighth month (see the table given above) shows very clearly on the one hand that these names are not of Persian but of Babylonian-Assyrian origin, and on the other that they assume the year to begin in spring; for A-ra-ah-sam-na means the eighth month (*arah* = יָרַח and *samna* = שְׁבַע־תַּיִם). Moreover the name of the intercalary month betrays its character by its dependence on the name of the preceding (twelfth) month; it is no more than a second closing month that is occasionally tagged on.

These Babylonian-Assyrian names have held their own in the Jewish calendar down to the present day.

4. Macedonian names. It was only for a short time that they found rivals in the Macedonian names. One certain trace of this use of the Macedonian calendar we have in 2 Macc. 11³⁰ where the month corresponding to Nisan is called *Ξανθικός*. It is not quite certain whether in 2 Macc. 11²¹ the name of the month *Διοσκορπιότιος*, as it is now read, is merely a corruption of text for *Δύστροπος* (a name which occurs in Tob. 2¹² [N]), or whether it is due to an oversight of the author, or whether it is the name, otherwise unknown, of an intercalary month to be inserted between Dystrus and Xanthicus. Josephus still employs at pleasure the Macedonian names for the Hebrew. Finally, in 3 Macc. (6³⁸) we meet with two Egyptian months: Pachon (Παχών; not in V), the ninth Egyptian solar month (of thirty days), and Epiphi (Ἐπιφ[ε]ί), the eleventh.

In the foregoing table the post-exilic usage is followed and the year reckoned as beginning in spring.

5. Comparative calendar. According to the autumn reckoning which was afterwards returned to and still rules in the Jewish calendar, the seventh month was the first in the year and the insertion of the intercalary month was made accordingly in the middle of the year. For the mode of insertion see YEAR. It will of course be understood that the months named in the last column, being solar months, correspond only roughly and in a general way to those in the preceding columns, which are lunar.

The month was divided into decades ('*āsūr*, קִבּוּר) or into weeks (*šābū*, שַׁבּוּעַ). It would be too bold an under-

¹ In Esth. 9¹⁵ 17 19 21 the number is not given with the name, because in 9¹ it is given, once for all, for Adār.

² See Dalman, *Aram. Dialektproben* (1896), pp. 1-3; 32.

taking to seek to prove from the division into decades that the Israelites were acquainted also with the Egyptian month of thirty days, and thus had at one time even reckoned by solar months. The division of the month into three thirds of ten days each could have commended itself to the Israelites just as easily as one into four fourths of seven days each, inasmuch as they too had months of 30 days as well as months of 29 days. It is only in one passage (Gen. 24⁵⁵), however, that '*āsūr* means a space of ten days; everywhere else, where the word is applied in relation to time, it means 'the tenth day' (Ex. 12³ Lev. 16²⁹ Josh. 4¹⁹ 2 K. 25¹ Ezek. 20¹ 24¹ 40¹). On the division of the month into weeks, see WEEK. These divisions were never made use of for dating the day of the month; thus it never was said 'on such and such a day of such and such a decade' or 'on such and such a day of such and such a week.' Dates were given simply by the number of the day of the month.

MONUMENT. On 2 K. 23¹⁷ RV (יָזִי) and Is. 65⁴ AV (צִלְיָרִים) see TORII; on 1 S. 15¹² RV (רָךְ) see SAUL.

MOOLI (μοολεῖ [BA]), 1 Esd. 8⁴⁷ RV. See MAHLI.

MOON. The words are: (1) יָרַח, *yārāḥ*, from a root יָרַח (see BDB), probably connected with אָרַח, to travel, wander (so MV, Buhl, *Lag. BN* 46, and cp the Eg. name for the moon Hunsu, 'the wanderer').

2. לְבָנָה, *lebānāh* (√ 'to be white' or 'pale') occurs three times, Cant. 6¹⁰ Is. 24²³ 30²⁶. New moon is חֲדָשׁ, *ḥādāš*, from the root חָדַשׁ, to be new, whilst full moon is כֶּסֶף, *kešēf*; cp Ass. *kešē'u* (= *agru*), a cap or tiara, the god at full moon being supposed to have his tiara on.

In Gen. 1¹⁴ ff., where the story is told of the creation of sun and moon and stars, the moon is not mentioned by name; she is the lesser of the two great lights set in the firmament to give light upon the earth (*vs.* 16 f.), and rules the night (cp Ps. 136⁹ Jer. 31³⁵), apparently in independence of her fellow. According to the priestly writer the oldest Hebrew month and year were lunar (see MONTH, YEAR), so that the words of *v.* 14 (cp Ps. 104¹⁹), 'Let them be for signs and for seasons, for days and years,' would have a special force when applied to the moon. How far the Hebrews attributed to her a permanent influence on things terrestrial—that is to say, whether they planted and sowed, reaped and felled and sheared, according as she waxed or waned—we do not know; in one passage only (Dt. 33¹⁴) is the growth of vegetation apparently ascribed to her influence;¹ but the correctness of the text is very doubtful. It is certain, however, that the day of new moon (חֲדָשׁ), and in a lesser degree that of full moon (כֶּסֶף, cp Ps. 81⁴ [3]), if the usual reading and interpretation are correct) were marked with red in the Hebrew calendar. (For חֲדָשׁ as a religious festival cp 1 S. 20⁵, and || שֶׁבַת, 2 K. 4²³ Am. 8⁵; || מוֹעֵד, Is. 1¹⁴; || חֲדָשׁ, Ps. 81⁴ [3]; see NEW MOON.) In Ps. 121⁶ (we can hardly quote Hos. 5⁷, a very doubtful passage) we find a malignant influence attributed to her; the reference may be to the blindness that results from

¹ AV has 'for the precious things put forth by the moon'; RV, '... of the growth of the moons.' AV therefore covers over the difference between the singular יָרַח in *a*, and the plural יָרָחִים in *b*. In the || passage Gen. 49, 25^a and *b* together are represented by 'blessings of the breasts and of the womb' (יְרֵכָה יְרֵכָה), again an inconsistency of number, but one that is of no exegetical significance. גֵּרֵשׁ, *gērēš*, rendered in RV 'growth,' is a *ām. ley.*, and is suspicious.

sleeping in the moonlight with uncovered face (so Carne, *Letters from the East*, 77; but see Macrob. *Satur.* 1.16.26). The word *σεληνιαζόμενος* in Mt. 4.24 and *σεληνιαίεται* in 17.15 testify to the prevalence of the belief that the moon caused epilepsy.

References to the moon are frequent in Hebrew poetry. She is the emblem of beauty (Cant. 6.10), and of the order that does not change (Ps. 72.57, 89.37). That she should stay her course (Josh. 10.12f., Hab. 3.11) is a crowning evidence of God's might; that she should suffer eclipse (Is. 13.10, 24.23, Joel 2.10, Mt. 24.29, etc.) or turn to blood (Joel 2.31, quoted Acts 2.20, Rev. 6.12) betokens that the day of God's wrath is at hand. The moon shall not 'withdraw herself' (Is. 60.20), but 'her light shall be as the light of the sun' (cp Enoch 72.37), when 'Yahweh binds up the breach of his people and heals the wound of its stroke' (Is. 30.20).

The moon's very splendour was a danger for religion (Dt. 4.19, cp Wisd. 13.2f.). The Assyrians and Babylonians had for ages been addicted to the

2. Moon-worship.

worship of the heavenly bodies, and such a name as BETH-SHEMESH [*q.v.*] suggests that sun-worship was practised among the Canaanites, possibly through early Babylonian influence; the names JERICHO and JERAHMEEL [*qq.v.*] we abstain from quoting. 'Among the Hebrews,' says Robertson Smith (*Rel. Sem.*⁽²⁾, 135, n. 2), 'there is little trace of [astral worships] before Assyrian influence became potent,' and he would be a bold man who would argue from the problematic astral elements in some of the OT narratives (cp Winckler, *GI2*), or from doubtful proper names like LABAN, MILCAH, SARAH, or from the real or supposed origination of the Hebrews in two famous seats of moon-worship (UR [*q.v.*] in S. Babylonia and HARAN [*q.v.*]) that moon-worship—a religion of more venerable antiquity in Babylonia than sun-worship—must have been one of the chief temptations of the primitive Hebrews. Something, at least, we do know: from the time of Ahaz onwards a syncretistic tendency, though checked for a time by Josiah, gained more and more ground in the kingdom of Judah. Striking evidence of this is given in Jer. 8.2, 19.13, and even though 2 K. 17.16 comes from a late writer (see Kittel in *HK*), the truth of its statement cannot be doubted (Am. 5.26 is not here quoted for a special reason; see PHENICIA, § 12). Certainly, moon-worship is but once explicitly mentioned in the OT; but the one proof-passage, though post-exilic, is of great importance. It is the famous passage in Job 31.26 relative to the hand-kiss to sun and moon. We must not say that the language is merely dramatic, as if the writer aimed dispassionately at reproducing primitive times with strict accuracy. In this section of Job, especially, the poet is thinking of his own time; his heart throbs as he writes. We may add that the imported cultus of Tammuz, which is attested by Ezek. 8.14, almost certainly presupposes moon-worship, Tammuz and the moon, as Winckler has pointed out, being closely related. Nor is it unfair to suggest that the crescents worn by the women of Jerusalem in later times (Is. 3.18, part of an inserted passage¹) had a heathenish connection.

The QUEEN OF HEAVEN mentioned in the Book of Jeremiah (7.18, 44.17) forms the subject of a special article. On the name SINAI, see SINAI.

See Jensen, *Kosmologie der Babylonier*, 101-108; Z.A., 1896, pp. 298-301; Winckler, *GI2* (e.g., 23 ff., 57 ff.); Hommel, *AHT*, and *Aufsätze*, bk. II (1906), also *Der Götterdienst der alten Araber* (a lecture, 1906); G. Margoliouth, 'The earliest religion of the ancient Hebrews,' *Contemp. Rev.*, Oct. 1868; Goldziher, *Hebrew Mythology*, 71-76, 204-6, 351 f. The mention of these books by no means implies acceptance of the theories, sometimes not very strictly critical, expressed in them.

A. C. P.

MOOSIAS, RV Moossias (MOOCC[E]IAC [BA]), 1 Esd. 9.31 = Ezra 10.30 MAASIAH, 13.

MORASTHITE, THE (מֹרַשְׁתָּה מִיָּבֵן; ΤΟΝ ΤΟΥ ΜΩΡΑΣΘΕΙ [B], ΜΩΡΑΣΘΕΙ [AQ*], ΜΩΡΑΣΘΙΝ [Qm*], in Jer. 26.18 ΜΩΡΑΣΘΕΙΤΙC [BNAQ]), a phrase used of

¹ See Che. *Intr. Is.* 19.f.; Marti, *Jes.* in *KIIC* 44.

Micah (Mic. 1.1 AV, RV *Morashtite*), and supposed to mean a native of a place called Moresbeth, a dependency of Gath, in the maritime plain (so Driver, *Intrud.*⁽⁶⁾, 326; cp MORESHETH-GATH). This, however, is not very plausible; it would seem that 'Gath' (גַּת) in Mic. 1.14 must necessarily be corrupt. In Mic. 1.13 Lachish is called the prime occasion of sin to the people of ZION (צִיּוֹן). Then Micah continues, 'Therefore (*i.e.*, because of the sin which spread from Lachish) thou wilt have to bid farewell (lit. to send a parting present, as to a bride) to Moresbeth, O people of Zion' (גַּת was corrupted into גַּת, and צִיּוֹן fell out of the text).¹ Moresbeth, or rather Morashah, appears to be another form of Mareshah, adopted to suggest the meaning 'betrothed' (בְּתוּרָה). It corresponds to *mo'ares* (מֹאֲרֵס) in v. 15, which should most probably run thus:—

עֲרִיבְרָשׁ אֲבִיךָ יִישָׁבַח מֹרַשְׁתָּה
עֲרִיבְרָשׁאֵל יְבֹאֵ כְבוֹד יִישָׁבַח

'Unto a (new) betroth will I conduct thee, O community of Mareshah;
To Jerahmeel shall the glory of Israel come.'²

That in much later times a place with a name like Morasthi (?), distinct from Mareshah, was pointed out to Jerome, does not prove that this is the place intended in Mic. 1.14, or the place of which Micah was a native.

Robinson's reasons (*BR* 2.423) for distinguishing Moresbeth from Mareshah are, (1) the difference of the names, which come from different roots (but this is surely a mistake; Mareshah is properly מֹרַשְׁתָּה, Josh. 15.44), and (2) that they are both given in the same context (but the writer had an interest in pronouncing the name the second time Mareshah—viz., to produce a fresh paronomasia). Robinson, however, may be right in thinking that the church which, according to Jerome, covered the site of the supposed sepulchre of Micah, was the church 20 minutes SSE. of Bêt Jibrin, the ruins of which are now called Sanda Hanna or St. Anne (see ELEUTHEROPOLIS). 'Close by,' he says, 'are the ruined foundations of a village, which may or may not be ancient.' This village may in truth have been early Christian, and have been called Morasthi to please pilgrims. Cp Che. *JQR* 10.576-580 (1898). T. K. C.

MORDECAI (מֹרְדֵכַי) [Baer, Ginsb.], §§ 43, 83,

ΜΑΡΔΟΧΑΙΟΣ or -ΧΕΟΣ [BNAI]).

1. The cousin and foster-father of Esther, and one of the chief personages in the book of Esther [*q.v.*] (Est. 2.5, etc.). He is described as Jeminite (יֵמִינִי), *i.e.*, virtually a Benjamite, and as descended from Jair, Shimei, and Kish, the last two of which are well-known Benjamite family names. His name, however, if correctly transmitted, is genuine Babylonian (cp Bab. *Mardukêa*), and means 'belonging to MARDUK' (see MERODACH).³ The day of 'Mardocheus' (RV 'of Mordecai'⁴ (2 Macc. 15.36, τῆς μαρδοχαϊκῆς [A, but μαρδοχουκῆς V] ἡμέρας) is a designation of the 14th of Adar, the first and greatest of the days of Purim; see ESTHER. The fact, however, that in Esth. 2.15 (cp 9.29) Mordecai's uncle is called Abihail⁵ (אַבִּיהַיִל), which is most probably a popular corruption of Jerahmeel (see NABAL), that Shimei is an ethnic = Shimeoni, and that Kish probably = Cushi, makes it highly probable that Esther's foster-father derived his name not from Marduk but from Jerahmeel—*i.e.*, that he belonged to a family of old Jerahmeelite extraction. His true name may be Carmeli or some one of the parallel forms.

This result compels us to give serious consideration

¹ The alternative is, if we keep the text, to make גַּת a vocative: 'Therefore shalt thou, O Gath, bid farewell to Moresbeth' (so We. Nowack), which seems to have no propriety in this context. G. A. Smith (1896) finds no satisfactory explanation of MT.

² A captivity in N. Arabia (here called Jerahmeel) is in the mind of the writer, who is probably not Micah, but a post-exilic writer. See MICAH II, § 4.

³ Tg., perhaps avoiding reference to a heathen deity, sees in the name מֹרְדֵכַי מִיָּבֵן, 'pure myrrh,' a figurative description of Mordecai.

⁴ MARDOCHEUS is the form of the name in the AV apocrypha.
⁵ אֵ's 'Aminadab,' if we prefer this reading to 'Abihail,' is also an ethnic name = מֹרְדֵכַי, cp NADAB.

to a view which would otherwise be, not indeed absurd (there being analogies enough for it), but at least unnecessary—viz., that the original story of Esther (as perhaps also that of Judith) is to be included among the records of the oppression of the Jews, after the fall of the kingdom, by the N. Arabian populations. See **ORADIAH** (BOOK).

The difficulty caused by the statement in Esth. 26, which apparently makes Mordecai a fellow-captive of Jeconiah, is dealt with at length by Ryssel, who offers the suggestion that מֹרְדֵכַי may really refer to Mordecai's family. There is, however, a ready explanation if the Book of Esther is based on an earlier narrative (see **ORADIAH**). If the king of Geshur or Jerahmeel is the oppressor of the Jews in the intention of this narrative, it was possibly said that Carmeli (?) was one of those carried captive by the Jerahmeelites. See **PURIM**, § 6.

2. A Babylonian Jew (Ezra 22 Neh. 7, μαρδαχίαιος, μαλδοχέος [B], βαγδοχίαιος [K in Neh.]); in 1 Esd. 58 ΜΑΡΔΟΧΕΥΣ. T. K. C.

MOREH (ΜΩΡΕ), Mt. 522 RVmg, EV FOOL (g.v. end).

MOREH, THE HILL OF (הַבְּרִיחַ הַמִּזְרֵה, 'the soothsayer's hill' ? ΓΑΒΔΑΘΑΔΑΜΩΡΑ [B], ΤΟΥ ΒΩΜΟΥ ΤΟΥ ΔΒΩΡ [A], ΒΟΥΝΟΥ ΤΟΥ ΔΜΩΡΕ [L]), in a description of the position of the Midianitish army (Judg. 7). Usually identified with the hill above Shunem, now called *Nabi Dahī* (so Baed. ¹², 243; G. A. Sm., *HG* 397; Buhl, *Pal.* 103), though G. F. Moore supposes the hill intended to be near Shechem. The phrase, however, is simply an editor's ingenious attempt to make sense of a corrupt passage. Cp **HAROD** (THE WELL OF), I. 'Moreh' or rather 'Hammoreh' should be 'Gilboa'; both forms are among the many corruptions of 'Jerahmeel.' On the true site of 'Gilboa' see **SAUL**, § 3 f., and on the origin of 'Moreh' see following article.

T. K. C.

MOREH, THE PLAIN OF (אֲלֵן מֹרֵה; ΤΗΝ ΔΡΥΝ ΤΗΝ ΥΨΗΛΗΝ [ADEL]; cp **MORIAH**), Abraham's first resting-place in Canaan; it was at the spot where Shechem afterwards stood (Gen. 126; but see **SHECHEM**). AV's rendering 'plain,' however, is inadmissible; it is borrowed from Jerome, and ultimately from the Aramaic translators (Onk., Jon., Sam., Tg. (בישרא), who may have wished to save Abraham from the suspicion of tree-worship. RV renders 'the oak (mg., terebinth) of Moreh.' So Tuch (1838), comparing 'the oaks of Mamre (Gen. 13:18 14:13). Most recent writers prefer 'the oak (sacred tree) of one who gives oracles,' and compare 'the oak of augurs' (Judg. 9:37 RVmg.); see **MEONENIM**. This is no doubt a possible meaning. Cp הָרָה קָטַן 'to give directions' in Dt. 33:10 Mic. 3:11 (of priests), Is. 9:14 (of prophets). The analogy of 'Moriah' (הַבְּרִיחַ, Gen. 22:2), however, which is certainly the corruption of a proper name (see **MORIAH**), suggests that Tuch and the earliest scholars may be right, and G's rendering seems to point to an early reading בִּישְׂרָא, for which we may also perhaps quote the Syriac rendering, 'the oak of Mamre' (מבשרא).

The easiest solution would be אֲמֹרֵי, 'Amorite.' יִרְחֵמְעֵלִי, 'Jerahmeelite,' however, is just as possible, and is favoured by the circumstance that the king of Shechem in Judg. 9 bears a name (Alimelch) which is most probably an early distortion of Jerahmeel, and by the prominent position of the Jerahmeelites in early legend (see **ISAAC**, **JACOB**, and cp **SHECHEM**).

The same tree is referred to again in Gen. 35:4 as האלה, and in Dt. 11:30, where (with Sam., G) we should perhaps read אֲלֵן in the singular. Cp **GILGAL**, § 5.

T. K. C.

MORESHETH-GATH (מִשְׁרֵת גַּת, 'possession of Gath'; ΚΛΗΡΟΝΟΜΙΑ ΓΕΘ [BAQ]; *HEREDITAS GETH*), a place in the Shephelah or Judæan lowland near the Philistine country (Mic. 1:14). Though the name has disappeared, the context forbids us to doubt where the place lay, and Micah's surname 'the Morasthite' implies that it was the home of that prophet. The

paronomasias of the section make the interpretation difficult, and in 1:14 none of the ancient versions surviving recognises Moreseth Gath as a proper name. The word Morasthite (*Morasthi*) was therefore obscure to them; but this only gives greater weight to the traditional pronunciation, with *o* in the first syllable, which is as old as G, and goes against the view, taken by the Targum both on Micah and on Jeremiah, and followed by some moderns (including Roorda), that Micah came from Mareshah (cp v. 15).

When Eusebius (*OS* 282:74) places *μωρασθει* near Eleuthropolis it is not likely that he is thinking of Mareshah (Maresa), for he speaks of the former as a village, and of the latter as a ruin 2 m. from Eleuthropolis. Jerome, too, in the *Epitaph. Paula* (Ep. 108), speaking as an eye-witness, distinguishes Morasthim, with the church of Micah's sepulchre, from Maresa. This, indeed, was after the pretended miraculous discovery of the relics of Micah in 385 A.D.; but the name of the village which then existed (*Præf. in Mich.*) can hardly have been part of a pious fraud.

W. R. S.

MORIAH, or rather 'the Moriah' (הַמִּזְרֵה), the name of the mountain on which the temple at Jerusalem was built, Gen. 22:2 (in its present form), 2 Ch. 3:1.

Gen. 22:2, Sam. ארץ המורא; Sam. Vv. חויתה, 'vision'; G, *תְּהַן יָרֵךְ תִּן הַבְּרִיחַ* (cp their rend. of מֹרֵה in 12:6 [see **MOREH**]); Aq. (τ. γ.) *τὴν καταφανή*; Symm. (τ. γ.) *τῆς ὄπτασίας*; Vg. *terram visionis*, connecting with רָאָה, 'to see'; Pesh. *לְרֵעָא דְּבִישְׂרָא*; Onk. *לְרֵעָא פֹלְחָנָא*, connecting with רָאָה, 'to fear'; Jon. *לְרֵעָא מִזְרֵה*, 2 Ch. 3:1, *ἀμορ(ε)ία* [BAL]; 'mountains of the Amorites' [Pesh.]; *Moria* [Vg.]. Whether the Pesh. rendering in Gen. is rightly claimed by Di. and Ball in favour of a reading *הַמִּזְרֵה*, seems doubtful; the plural points may be due to a later misunderstanding (see Geiger, *Urschrift*, 278 f.). Deimel, however (*ZTK*, 1899, p. 3), still takes virtually the same position (מִזְרֵה, comparing Pesh., and even Ass. *Martu*). For Midrashic explanations of 'Moriah,' see *Ber. rabba*, § 55 (Wünsche, 263 f.). The explanation of the Chronicler (2 Ch. 3:1) is also of the Midrashic type; 'Moriah' is the mountain where Yahweh (see G Chron.) appeared to Solomon's father, David.

Great obscurity hangs about this name, which only occurs in these two passages, and in extra-biblical passages (Jos. *Ant.* i. 13, 1, τὸ Μώριον ὄρος) based upon them. Until quite lately, in fact, it has been generally assumed¹ that Moriah was the ancient name of the temple-mountain. This view, however, only goes back to the Chronicler, who may have derived the name from the narrative in Genesis (cp Baudissin, *Studien*, 2252). That the editor of JE, who gave Gen. 22:1-19 its present form, meant to attach the interrupted sacrifice to the temple-mountain is highly probable; but he suggests rather than states this, and the fact that he does not make Abraham call the sacred spot 'the Moriah' but (if the text is right) 'Yahwè-yir'è' ought to have opened the eyes of the critics. The only satisfactory solution is that, in the copy of E used by the editor of JE, the word following אֶל-אֲרֶזֶן in v. 2 was indistinctly written. That word was surely not חֲמִים (Wellh. *CH* 21), as if Shechem were meant, for the Samaritan tradition is ultimately based on a confusion between the spots mentioned in 1:26 and 22:2 respectively. Nor was it חֲמִי (Di., Ball), which is not definite enough.

The true reading must be one of the names which specially belong to the southern border of Canaan—viz., either מִצְרַיִם (= the N. Arabian Muṣri; see **MIZRAIM**, § 2 δ) or יִרְחֵמְעֵלִי. The proposal to read *Misrim* has been approved by Winckler, both privately and in print (*GI* 244, n. 1); the *y* in מִצְרַיִם would easily fall out after אֲרֶזֶן. Our explanation of the story of the sacrifice of Isaac (see **ISAAC**, **JEHOVAH-JIREH**), however, favours 'Jerahmeel.' That the scene of the story is to be placed in the Negeb has been seen by Bacon, who rather too arbitrarily reads הַנֶּגֶב; cp 20:2162 Nu. 13:29 (see his *Genesis*, 141, n. 3;

¹ Philo, however (*De Abr.* 32=225, ap. *Lag. Orient.* 255), evidently did not share the common view. His words are, *σφαγιασάσι ἐπὶ τινος ὑψηλοτάτου κολωνοῦ, πορρωτάτω πλέως ἀποστάτα τριῶν ὁδῶν ἡμερῶν.*

the Hebrews, as we are expressly informed was the case among the Romans (see MILL), is shown by an interesting example of conservatism in religious practice, similar to the late retention of stone knives for the rite of circumcision (Josh. 5.3, cp Ex. 4.25). In the legislation of Leviticus, it is required that the offering of the first-fruits shall consist of early ears of wheat roasted at the fire, and then crushed in the mortar (2.14; cp Servius's statement quoted under MILL). A. R. S. K.

MORTER. מֹרְתָר, *hōmer*; ΠΗΛΟΣ; *lutum* (Gen. 11.3 [cæmentum], Ex. 1.14 Is. 41.25 Nah. 3.14). The builders of the tower of Babel are said to have used bitumen (EV 'slime') instead of mortar (see BITUMEN). In Palestine the usual material is clay (Ar. *ḥīn*). This is mixed with chopped straw which serves the same purpose as the ox-hair which our plasterers mix with their plaster. Besides this, there is a mortar made from sand, ashes, and lime, well pounded and mixed with oil. 'Nothing affords a stronger manifestation of persevering and patient labour than the long-continued and repeated beatings to which the Orientals subject the plaster (of lime, ashes, and straw), which is more especially intended to resist wet, and which does most effectually answer that purpose' (Kitto, *Pict. Bib.*, Ezek. 13.10); cp HOUSE, § 1. Mortar is usually trodden with the feet (Nah. 3.14); but wheels may also be used.

2. מֹרְתָר, *āphār*; χοῦς; *lutum* (Lev. 14.42-45). See above.
3. In Ezek. 13.10 f. 14. f. 22. 28f מֹרְתָר is used, for which EV has 'daub with untempered [mortar]' (cp Ar. *tafil*, 'dry loam or clay'). This rendering goes back to Vg. 'linire luto absque paleis' (once), 'linire absque temperamento' (thrice); but the figure seems to be that the prophets whitewash, or give sanction and plausibility to, the popular scheme (likened to a mud wall). So Θ (*ἀλειφειν*) and the moderns.
4. מֹרְתָר, *mōlet*; ΕΒΝΑ2 om. (Jer. 48.9f RV, AV clay). Reading uncertain (see CLAY).

MOSERA, RV Moserah (מֹסֶרָה); ΜΕΙΣΑΔΔΑ [BA], ΜΙΣΑΔΔΕ [L]), Dt. 10.6†, or **Moseroth** (מֹסֶרֹת, ΜΑC-CΟΥΡΩΘ, -ΡΟΥΘ [BF]), ΜΑC-CΟΥΡΟΥΘ [A], -ΩΘ [L]), Nu. 33.30 f.†, a station in the Wilderness of Wanderings (see WANDERINGS). The termination -ah in Moserah, however, is locative. The name seems to be really traditional, and it is difficult not to place it in the neighbourhood of Kadesh. If so, Mōsēr may be a corruption of מִשְׁרָה, *Miṣṣur*—*i. e.*, the N. Arabian land of Muṣri. This is a conjecture; but we are bound to give at least a conjectural explanation of the statement 'there Aaron died, and there he was buried' (Dt. 10.6). Cp Nu. 20.22-28, and see HOR, MOUNT. 1. T. K. C.

'There hath not arisen a prophet since in Israel like unto Moses, whom Yahwé knew face to face' (Dt. 34.10).

1. Earlier criticism.

This is the enthusiastic eulogy of a late editor, reflecting on the beautiful picture of an ideal 'man of God' presented in the composite narrative. Every true Jew and every true Christian must read it with reverence and sympathy. Still, true devoutness does not exclude historical criticism, and as critical students we are bound to remember that every religion which is not simply autochthonous and primitive displays considerable eagerness in doing honour to its real or supposed founder. Now, the influence of great personalities—too great to be altogether

tied down by tradition and convention—upon the religions of the most gifted races cannot indeed be overlooked; but it is only too easy for the adherents of a religion to assign too many achievements to its rightly or wrongly assumed chief prophet and legislator.

Feeling this tendency very strongly, Ewald endeavoured to reduce the prophetic and legislative work of Moses to 'those essential truths and social arrangements which constitute the motive power of the whole history.' 'We must not,' he says, 'be startled by the grandeur of the former or the wonderful nature of the latter, so as to reject anything because it appears incredible. For all the greatest and most enduring ideas that actuate and glorify the subsequent history, must have arisen in that sacred birthday of the community; and at such extraordinary epochs, and among a people such as Israel then was, the most wonderful things became possible' (*Hist.* 2.107).

Few of us are still satisfied with the mixture of abstract religious philosophy and arbitrary criticism furnished by Ewald. His notion of what 'Israel then was' being purely imaginative, there can be no sound or durable basis to his reconstruction of Moses and his teaching. To the Israelites, as we now begin to know them from a truly historical criticism, the 'abstract ideas which Ewald finds in 'the Mosaic economy' would have been 'a stone instead of bread.'¹ If such a person as Moses existed, he can, in working for such a people as the Israelites, only have occupied himself with the practical questions of the time; otherwise indeed the subsequent history of Israel is inconceivable. He had to unite the tribes on a permanent basis, and this basis could only be a religious one. He must therefore have been a worshipper and spokesman of Yahwé in some special sense, and have devoted himself successfully to the task of making this God more generally worshipped. In order to do this, however, he must first of all have brought the scattered clans of Israel together, and, if we assume that some of them were in the land of 'Goshen,' that Goshen was in Egypt, and that the Egyptian authorities hindered the removal of the clans, Moses must have had the greatest difficulties to cope with, and very justly, from a teleological point of view, may his success appear an extraordinary divine interposition. More than this we cannot venture, even from a moderately conservative point of view, to assume.² That there was a marked difference between the religion promoted, as is supposed, by Moses and that of (say) the Kenites, cannot be asserted. That morality counted for more with Moses than (say) with Jethro, is inconsistent with the facts recorded in the Book of Judges, from which facts we may infer with some degree of accuracy what the moral state of the Israelites before the entrance into Canaan must have been. Morality, indeed, cannot as yet have emerged from rule and tradition, nor can the decisions given by Moses beside the sacred tree and well safely be regarded even as its germs.³

The historical character of Moses, however, has been rather postulated than proved by recent critics. Without it, they find it difficult or impossible to explain the ethical impulse and tendency which, at any rate from the time of the prophet Amos (and Amos, be it remembered, presupposes that this impulse is no novelty), is conspicuous in the history of Israelitish religion. Moreover, the name 'Moses' not only represents a great though little-known personality; it is also a symbol of a colossal fact asserted by the later tradition—*viz.*, the deliverance of the clans or tribes of Israel

¹ Cp Wellh. *Hist. of Israel and Judah* (2), 16 (1891); *IJC* 17 (1894).

³ See Budde, *Rel. of Isr.* 33 f. Note that 'law in the English edition of this book corresponds to *Recht* in the German.

from Egyptian bondage, and the recognition of Yahwè by these united clans as the deity who had proved himself mightier and consequently more divine than the gods of Egypt (cp Ex. 18¹⁰ f., J), and required from them a gratitude and an obedience, out of which in the fulness of time a true ethical consciousness and an ethical monotheism might be expected to develop.¹

The task at present before scholars is to examine these assumptions of recent criticism, and since criticism is bound to be progressive and to correct its own errors, we shall proceed to study various unobserved or neglected facts, which, it will be seen, are adverse even to the highly mitigated traditionalism to which critics twenty or even ten years ago were addicted. We shall not forget the need of circumspection; but our circumspection will have to apply itself in as yet unfamiliar ways.

First of all, however, we must deal with the name 'Moses' and the other related names, and ask, What do they mean? and what have they to teach

2. Names. The name of Moses appears in the OT as מֹשֶׁה, Mōšè; the Arabic form of this is Mūsā. In Josephus and Philo, and in MSS of the LXX and NT generally, we meet with the Græcised form μωσής (cp Vg. *Moses*); there is a constant variant, however, μωυς. If the OT form were correct, and the name Hebrew, the obvious meaning would be 'deliverer' (מֹשֶׁה, 'to draw out'; cp 2 S. 22¹⁷ = Ps. 18¹⁷). There is no trace, however, of such an explanation anywhere in the OT. Pharaoh's daughter, who is supposed to speak Hebrew, calls the foundling Mōšè, 'because I drew him out of the water' (Ex. 2¹⁰ [E]). That E had any thought of an Egyptian origin is improbable; the name Mōšè is strikingly unlike any of the names given as Egyptian in the story of Joseph, and the Hebrew connection suggested for the name by E has no parallel in the Joseph story except in the accounts of non-Egyptian names like Ephraim and Manasseh.

At a much later time it became important to tighten the connection between the Jews and the Egyptians; on the Ethiopian war of Moses, see § 21. Josephus (*Ant.* ii. 96; *c. Ap.* 131) and Philo (*Vit. Moys.* 14) therefore were dissatisfied with the vague statement of Pharaoh's daughter, and explained the name Moses as = 'saved from the water,' a theory to which Jablonski (*Opusc.* 152 ff.) gave a quasi-philological character. Hence for a time the Coptic etymology, *mo* 'water,' and *usè* 'rescued,' obtained general currency, though a genuine Egyptian name meaning 'saved from the water' would be quite differently formed (*ZDMG* 25¹⁴¹).

At present, a more plausible etymology (suggested by Lepsius, *Chronologie*, 326; cp Ebers, *Durch Gosen*, 525 f.) is in vogue. There is an Egyptian word *mes* or *mesu*, meaning 'child,' which sometimes occurs as a name by itself, and sometimes as the second part of a theophorous name (e.g., in the royal names Thotmes, Ahmes, Ramessu). Dillmann (*Ex.-Lev.* 16) would take 'Moses' = *mesu* to be the original name; Renan (*Hist.* 176) and Guthe (*GVZ* [1899], 20) prefer to take it as an abbreviation of a theophorous Egyptian name.

The special objection to these widely held views² is fourfold. (1) The vowel in *mes*, *mesu* (or, according to W. M. Müller, *mose*) is short, whereas the corresponding vowel in Mōšè is long, and the sibilants in the two words are different.³ (2) The Hebrews would surely not have accepted a name for their hero from their

¹ So Budde, *op. cit.*, 35-38.

² Giesebrecht, *Geschichtlichkeit des Sinaibundes* (1900), p. 1, regards the 'Egyptian name' of Moses as a fact which confirms the statement that Moses came forward in Egypt; and Wellh. (*IJGH*) 14, n. 1) appears to be untroubled by doubts. Holzinger, however (*Ex.* 6), says that the name מֹשֶׁה is 'unexplained.'

³ From a private communication of Prof. W. Max Müller.

Egyptian oppressors; ¹ the supposed Egyptian etymologies of PHINEHAS and HOR are not safe enough to be quoted on the other side as parallels. (3) A close examination of the traditions respecting Moses connects him much more certainly with N. Arabia than with Egypt. (4) The points of contact between Israelitish and Egyptian religious customs are few and unimportant, which would be strange, if Moses had received a name which naturalised him as an Egyptian.

It remains to interpret the name of Mōšè on the analogy of the names of Moses' nearest relations which express ethnic, more precisely, the present writer now thinks, N. Arabian affinities.

These names, with the explanations here suggested, are (1) Amram, probably a development of Jerahmeel; (2) JOCHEBED (*q.v.*), perhaps the original of the tribal name known to us as Ja'akob (Jacob); (3) Aharon (Aaron), probably a distorted fragment of Jerahmeel; (4) MIRIAM (*q.v.*), a distortion either of Merari [Mišri] or of Amramith; (5) ZIPPORAH (*q.v.*), probably = Zarephath—*i.e.*, a personification of the Zarephathites, a branch of the Mišrim of N. Arabia (see ZAREPHATH); (6) Gershom²—*i.e.*, belonging to the Girsu or Gšūru or Gešurim of the Negeb of Palestine (see GIRZITES).

If the explanation of these names now suggested be accepted they record the early connection of the Israelites with populations of N. Arabia, where Horeb (the sacred mountain with which Moses is so closely associated) was situated (see SINAI). The presumption therefore is that מֹשֶׁה, Mōšè, also is N. Arabian. It might be connected with מִשְׁרָי, 'Mišrite,' Miššūr being the general name of the country referred to (see MIZRAIM). Mōšè is virtually identical with Mūšī, which, in Ex. 6¹⁹ [P], is the name of a son of Merari b. Levi; indeed, in 1 Ch. 24²⁷ (cp *v.* 26), SHOHAM (*i.e.*, Mōšè, corrupted by transposition) occurs in lieu of Mūšī. The other son of Merari is called Mahli (elsewhere explained as = Jerahmeel), and we may assume that Mōšè, Mūšī, and Merari are all developments or distortions of some collateral form of Mišri³ (*i.e.*, 'one belonging to the land of Miššūr').

It may be objected to this view that in the earliest tradition (J), as it now stands, the father, the mother, and the sister of Moses are nameless, and that Aaron appears in this document 'only to disappear' (see AARON, § 4). The answer is (1) that the want of names in Ex. 2¹⁴ may be due to R_p, who found the original names inconsistent with his material in chap. 6 (so Bacon), and (2) that, on the theory advocated above, the tradition of the migration led by 'Moses' is in fact necessarily without personal names, the names Moses, Amram, Jochebed, etc., being all ethnic, and not really borne by individuals. All that the earliest tradition knew was that a tribe closely connected with the Mišrites and Jerahmeelites, and specially addicted to the worship of Yahwè, the god of Horeb, played a leading part in the migration of the Israelites into Canaan. This earliest tradition comes to us in part through P, whose lateness as a writer does not detract from the value of any information which he cannot have invented, and probably derived from early traditional sources.

The tradition respecting the child Moses in the box (basket?) of papyrus-reeds (EV 'ark of bulrushes'; see

3. The ark of bulrushes. RUSHES, 1) is told only by E. According to this writer, Moses, the child of a man and a woman of the tribe of Levi (see JOCHEBED), was hidden among the reeds by the Nile, on account of a cruel edict that all male children of Hebrews should be put to death (cp Mt. 2:16).

¹ According to Manetho (in Jos. *c. Ap.* i. 26 f.) the Egyptian name of the leader of the 'Iepers' was Osarsiph; but when he went over to τούτο τὸ γένος, he received the name of Moses. Cp JOSEPH ii., §§ 1, 11. Chærenon (*ib.* 132) makes the Egyptian name of Moses Tisithen.

² Zipporah's second son Eliezer is only a doublet of Aaron's son ELEAZAR (*q.v.*, 1), the ethnic origin of whose name may be presumed, but is not definitely explained.

³ We can hardly therefore look for an Assyrian etymology of Moses (e.g., *masā*, to be bright). Cp Sayce, *Rel. Ass. Bab.* 46 ff.

Moses' sister watched him, till the daughter of Pharaoh¹ saw the weeping child, and had compassion on him. Through his sister's cleverness he enjoyed maternal nursing, but was afterwards adopted as her son by Pharaoh's daughter.

This charmingly told story is of mythic origin.² The tale of the setting adrift of a divine or heroic infant on water is also a tradition of the Babylonians, the Greeks, the Romans, the Germans, and even the Japanese.³ It is significant that the Hebrew word for 'ark' occurs only twice—in Ex. 235 and in Gen. 614 ff. (Deluge)—and we may venture to suppose that the story of Moses had absorbed one of the details of a popular story either of Creation (cp the Japanese myth) or of the Deluge (which is a second Creation, cp DELUGE, § 19). The story gained immensely by this. The hero who was destined to lead his people through a 'sea,' and to be worsted by no obstacles, ought, in poetical fitness, to baffle his enemies even in infancy.

Of the parallel non-Jewish stories it is only necessary to quote one—that of Sargon of Agadé. This remarkable tale, which boldly claims the authority of Sargon, begins thus (cp BITUMEN, col. 589)⁴ :—

'Sargina, the powerful king, the king of Agadé am I. My mother was poor, my father I knew not; the brother of my father lived in the mountains. . . My mother, who was poor, conceived me, and secretly gave birth to me; she placed me in a basket of reeds, she shut up the mouth of it with bitumen, she abandoned me to the river, which did not overwhelm me. The river bore me away and brought me to Akki the irrigator. Akki the irrigator received me in the goodness of his heart. Akki the irrigator reared me to boyhood. Akki the irrigator made me a gardener. My service as a gardener was pleasing unto Ištar and I became king.'⁵

Such a story as this, apart from the detail about the gardener, was probably floating in popular Hebrew tradition, and when men began to ask what happened to Moses before he became Hobab's (or Jethro's) son-in-law, it occurred to a narrator to transfer it to the biography of Moses. When the tradition was thus enriched, it of course stated that Moses drew his first breath in the land of Egypt. The story of the 'ark' is adapted only to the region of the Nile or the Euphrates, and J, though in its present form his account of Moses begins (apparently) with the aid rendered by Moses to Hobab's daughters⁶ (Ex. 216 f.), distinctly states that Moses had fled to Midian⁷ (or rather Mušri) from Egypt.

It is not, however, an easy matter to understand how Moses can have left his fellow-tribesmen in Egypt and settled with Hobab.⁸ The narrator who made him the adopted son of Pharaoh's daughter only increased the difficulty; for if Moscs had been reared as an Egyptian, he would naturally have received an Egyptian office and an Egyptian wife. Moreover, let it now be noticed that we have in 1 K. 1117 ff., in its present form, the account

4. Born in Egypt or in Musri.

1 Josephus (*Ant.* ii. 95) calls her Thermutis; Artapanus (in *Eus. Praep. Ev.* 427) Merris. Cp col. 2090.

2 Ewald (*Hist.* 242) long ago saw this; so also Ebers, *Durch Gosen* (1872), 72.

3 The Japanese myth is that the first child born to the divine pair, Izanagi and Izanami, the parents of gods and men, was set adrift in an ark of reeds. The story (which is admitted as genuine by Tylor, *Remarks on Japanese Mythology*) is told in connection with an account of Creation. For a wider circle of kindred stories see A. Bauer, *Die Cyros-sage und Verwandtes*; K. Schubert, *Heradsots Darstellung der Cyrossage*.

4 Note that no name is mentioned (apart from Akki) hut that of Sargina. So in the story of Moses in Ex. 2 no name is given but that of Moses. The cause of Sargina's exposure is not mentioned.

5 R. W. Rogers, *Hist. of Bab. and Ass.*, 1362; cp *KB*, iii. a 100; *Del. Par.* 208 f. Note that *intu* is not 'princess' (as G. Smith) but 'poor'.

6 In *115f. Hex.*, however, vv. 11-15a are assigned to J (cp Wellh., *Corn*).

7 מדין, like מדין, is sometimes an error for מצור—i.e., Mušri.

8 The story in Ex. 212 is not in character with the Moses of the later period. 'He looked this way and that way, and when he saw that there was no one,' etc. One may defend the story of the flight of Moses by the Egyptian story of Sanehat or Sinuhit (*RP*(2), 218 f.), but not the cause of the flight.

of an Edomite who fled into Egypt, and was there hospitably received by Pharaoh, who gave him the queen's sister to wife, and that underlying this is an earlier and more authentic story that the asylum found by the fugitive was in the N. Arabian Mušri.¹ The suspicion naturally arises that the earliest tradition respecting Moses represented him as an Israelite, who, together with his clan, had been admitted to the *jus connubii* by a tribe of Midianites, or rather (see HOBAB) Mišrites, which dwell not far from Horeb, the sacred mountain of Yahwè. The story of his chivalrous conduct towards Hobab's daughters seems to have been suggested by that of Jacob's friendliness to Rachel at the well (Gen. 292-10 J). Jacob marries Rachel; so Moses marries Zipporah, who is one of the seven daughters of the priest of Midian (Mušri?). Who are these seven daughters, we ask? Surely they represent the seven districts of the Mišrite territory, one of which—that nearest Canaan—had, we hold, for its centre Zarephath. ZIPPORAH (*g.v.*) is, in our view, a mis-written Zarephath, just as Rachel is a distortion of Jerahmeel. Further, let us not forget that Elijah, who is in some important respects the double of Moses, is closely connected by tradition with 'Zarephath which belongs to Mišsur' (1 K. 1710, revised text; see ZAREPHATH). The only doubt is whether Moses (*i.e.*, the clan) acquired Zarephath by the cession of a Mišrite chieftain, or by conquest (see § 17).

The story in Ex. 424 ff., being deeply corrupt, is of no value for the story of Zipporah, and the description of her in Nu. 121 as a 'Cushite woman' adds nothing to our knowledge. Some indeed (*e.g.*, Ewald, *Hist.* 2177 f., n. 3) have supposed that it is not Zipporah who is meant, but an Ethiopian concubine whom Moses took after the death of Zipporah. It is not, however, the Ethiopian but the N. Arabian Cush (see CUSH, 2) that is referred to, and Hobab, father of Zipporah (Zarephath), dwelt in Mušri² which adjoined Cush.

By this connection the clan of Mōšè (Mišri?), as it was now called, and apparently the whole tribe of Levi³ became a priestly and in a wide sense

5. A Yahwè prophetic tribe, devoted to the worship of Yahwè.⁴ This is thoughtfully described by E in Ex. 3140669-14 as a new and solemn revelation of God to Moses by the name Yahwè at 'Horeb the mountain of God.' J also describes a solemn call to Moses, but presupposes that Yahwè is already known to the elders of Israel in Egypt (316). J also speaks of the mountain as הַר סִינַי, 'mount Sinai'⁵ (הַרְמֵל, EV 'the bush,' is less probable); it burned, and was not consumed. The mountain (called Horeb [mutilated from 'Jerahmeel' ?] by E and Sinai by J) is described, according to a very plausible emendation of 31, as in 'the wilderness of Jerahmeel' (הַרְמֵל הַבְּשֵׁי); it may be Jebel Muweileh which lies NE. of 'Ain Gadis, E. of the Wādy eš-Šerāif, but is more probably some mountain-group nearer to Kadesh.⁶ Horeb or Sinai was virtually guarded by a tribe of Yahwè-worshippers which is variously called Kenites, Jerahmeelites (?),⁷ and Mišrites (scarcely Midianites).

We are further told that Yahwè commissioned Moses

6. Misrim. Egypt, so that they might worship Yahwè on 'this mountain' (so E), and that he promised

1 See HADAD, and cp *JQR* 11 [1899], 551-556; Beke, *Origines Biblica*, 1 [1834], 307, n. 4.

2 Read מדין מצור (see preceding col. n. 7).

3 'Levi' is doubtless an older name than Mōšè. On its origin see LEVI.

4 So Bateson Wright (*Was Israel ever in Egypt?* 164) finds 'traces of a tradition that this tribe (Levi) is of Kenite origin.'

5 So in Dt. 33 16 read, with Renan, שֵׁבִי סִינַי. See BUSH, and note the differences of scholars as to the exact sense of שֵׁבִי, a word which we certainly do not expect just here, and find only once again in a dependent passage, Dt. 33 16. Bacon's theory, adopted by Bennett (Hastings, *DB* 3 349 a), is therefore excluded.

6 Therefore not SE. of Elath (as Wellhausen). See SINAI, and cp BEER-LAHAJ-ROI, JEHOVAH-JUREH.

7 'Ben Reuel,' Nu. 10 29, = 'ben Jerahmeel.'

to give them a home in a land flowing with milk and honey (so J). The present writer regards it as probable that this land was described in the text which underlies Ex. 38 as 'the land of the Kenite, the Rehobothite, the Jerahmeelite, and the Zarephathite';¹ that the 'land flowing with milk and honey' was in the Negeb² (Nu. 1321 *f.*, revised text; cp ESHCOL, PARADISE, REHOB, ZIN); and even our present narrative is not without some indications that the Exodus known to the original tradition was a peaceful one, and that the land which was migrated from was not Goshen but Cushan (the N. Arabian Cush)—not Misraim (Egypt) but Mišriin (Mišri). Of course it is not inconceivable (cp EXODUS i., § 3) that some clans of Israel may have been in Egypt, and may have removed from that country to join kindred clans in N. Arabia, one of which—the tribe of Levi or Mōšē—may even have gone to the land of Goshen to escort their brethren to Kadesh. But is there not something artificial in this construction of history?

It is true that the story of Joseph represents Simeon as having been kept in bondage in Egypt (Gen. 4224), and that we naturally suppose Simeon and Levi to have shared the same fate (cp Gen. 4952). The ethnic connections of Simeon and Levi, however, to judge from the valuable material in the genealogies of 1 Ch. 4 6, appear to have been N. Arabian; the name Phinehas is not to be quoted as suggesting an Egyptian element in Levi, for it is more probably of Jerahmeelite than of Egyptian origin (see PHINEHAS). As Moses is a member of the tribe of Levi (so closely connected by tradition with N. Arabia) we cannot expect to find him in Egypt, though he (*i.e.*, his clan) may, as we have admitted, possibly (not probably) have made an expedition to the Egyptian frontier.

That the Moses-clan was at any rate composed of fearless warriors (cp Ex. 3226 *f.* and contrast the timid

7. Ex. 424-26. Moses of Ex. 212) is shown by the story which underlies the certainly corrupt narrative in Ex. 424-26. As it now stands, the narrative relates in most obscure terms how Zipporah protected her husband against the angry Yahwè (!) by circumcising her son (see CIRCUMCISION, § 2). Really, however, in our view, the passage describes a feat of martial prowess comparable to that ascribed to Shamgar in Judg. 331 (see *Crit. Bib.*).

We read thus, 'And it came to pass in the wilderness of Jerahmeel that Jerahmeelites (*i.e.*, Amalekites, raiders who had no fixed settlements) fell upon him and sought to slay him. And he took an ox-goad, and smote the Jerahmeelites, and thought, I have wiped out the Jerahmeelites' (cp Ex. 17 14 *f.*, 'I will wipe out the name of Amalek,' etc.). To explain this it may be noted that the word 'Jerahmeelites' has, we believe, a twofold meaning: (1) those of Jerahmeelite origin, (2) Bedouins.

The tradition of the Exodus, as we now have it, is indeed extremely inconsistent. At one time it delineates

8. Elaboration of story. a Moses who must be an individual (*e.g.*, Ex. 3-423); at another, it enables us to see plainly that Moses is no individual, but a clan. We need not wonder at these variations. The original tradition, which had to do chiefly with tribes, was too strong to be altogether transformed; but the tendency of storytellers to individualise altered the primitive tradition in many points. Here is an instance. We have seen how the infancy of Moses was glorified; tradition was equally careful to give the hero a suitable equipment as a prophet of Yahwè. A prophet, according to the primitive notion, must be a thaumaturgist; Moses therefore needed a wonder-working staff.³

¹ In Ex. 38, as it now stands, these names have become 'Canaanite, Hittite, Amorite, Perizzite'; 'Hivite' and 'Jebusite' have been added.

² So in 1 S. 18 25-27 the 'hundred foreskins' (כַּמָּת עֲרִיבִים) may have come by corruption from 'Jerahmeelites' (יִרְמְיִיטִים). The whole story becomes quite plain and natural. Cp SHECHEM, and see *Crit. Bib.*

³ In Ex. 4 20 6 paraphrases τὴν βάβδον τὴν παρὰ τοῦ θεοῦ.

According to J, Yahwè vouchsafed to give a supernatural power to the shepherd's staff in the hand of Moses (4 2 *f.*); but J gets rid of the thaumaturgic element as soon as he can. E, on the other hand, states that God entrusted Moses with a staff which he had not previously possessed, to perform his wonderful works (4 17; cp 206), and that of the five plagues inflicted upon the Egyptians by Moses four (*i.e.*, all except the death of the firstborn) were brought by his lifting up or stretching out his staff, and the striking story of Rephidim turns entirely on the uplifting of the hand with the staff. P, too, attaches much importance to the staff, though it is of Aaron's staff that this writer speaks. Four out of the six plagues were inflicted by its means, whilst in the case of the fifth, the boils were brought about by Moses throwing soot into the air before Pharaoh. So too at the passage of the *yam sūph* (see below, § 10), E tells us (14 16) of a command of God that Moses should lift up his staff (over the sea), whilst P (*ib.*, cp 21) is content with the stretching out of the hands; in either case the phraseology has an implication of magic art. Cp PLAGUES [TEN].

The demand addressed to Pharaoh by Moses next requires attention. J puts it thus, 'And they said, The

9. Interviews with Pharaoh. God of the Hebrews has met with us; let us go three days' journey into the wilderness, and sacrifice to Yahwè, lest he fall on us with pestilence or with the sword' (5 3 [2]; cp 3 18 8 27); and again, 'And Moses said, We will go with our young and with our old, with our sons and with our daughters, with our flocks and with our herds will we go; for we must hold a feast to Yahwè' (10 9); and yet again, 'And Moses said, Thou must also give into our hand sacrifices and burnt offerings. . . Our cattle also shall go with us; there shall not a hoof be left behind; for thereof must we take to serve Yahwè our God; and we know not with what we must serve Yahwè till we come thither' (10 25 *f.*).

Elsewhere (see PLAGUES, TEN) we have commented on the imperfect truthfulness of these demands; here, therefore, it is enough to refer to the phrase *hag Yahwè*, 'feast of Yahwè' (10 9). This phrase confirms our previous suspicion that the Egyptian training of Moses is not a feature of the original tradition, the notion which underlies the word *hag* (*i.e.*, probably, a solemn circuit round a sacred object) being specially Arabian (cp DANCE, § 3). The phrase 'three days' journey' also deserves notice. It might indeed be a mere stylistic idiom (cp Gen. 30 36 Nu. 10 33); but it is expressly put into Moses' mouth by Yahwè (3 18); accordingly it is used by Moses twice. Moreover, when Moses 'led Israel onward from the *yam sūph*, and they went out into the wilderness of Shur (Mišsur?),' we are told that 'they went three days in the desert, and found no water' (Ex. 15 22); shortly afterwards they came to Sinai. It is possible, then, that Horeb or Sinai was represented in the primitive story as three days' journey in the desert of Mišri. Yet it was certainly much more than three days' journey from the Red Sea. This may perhaps favour the view, to which the

10. The *yam sūph*. manifold difficulties of the story of the passage of the sea give some plausibility, that the *yam sūph*, like the waters of MARAH [*q.v.*], had originally no existence outside the ideal wonderland to which we are introduced in Gen. 2. If this view be accepted, the traditional story of the passage of the sea (religiously so impressive) has come out of a myth which like that of the 'ark of bulrushes,' originally floated in tradition apart from any historical setting¹—a myth of the destruction of certain enemies of Yahwè in a 'sea of reeds' by a great wonder-working prophet. Perhaps, if the reading *yam sūph* is the original one (see § 10), no better explanation is available. We are at any rate liberated by it from a view of the early history of the Israelites which is encompassed with difficulty.

It has indeed been ably attempted elsewhere (see

¹ In the Syriac version of the Legend of Alexander (37; Budge's edition, 1 90) we read, 'We saw in that river a reed the height of which was thirty cubits, and its thickness as that of a garland which a man puts on his head. The whole city was overshadowed by these reeds.' Cp the suggestive remark in Wi. *GI* 2 92.

It has indeed been ably attempted elsewhere (see

EXODUS i, §§ 10-16) to make the story of the *yam sūph* (interpreted as the Red Sea) geographically, and therefore to some extent also historically, intelligible. The attempt could only be made provisionally. From Egyptian sources we have no confirmation of the story, nor is there the least chance of our getting any, and to rely on the unconfirmed accounts of such comparatively late writers as J and E, and on a supposed fragment of a commemorative song from the 'Mosaic age'¹ (Ex. 15:1-3), would not be a critical procedure. Investigation had to proceed tentatively, and since the first efforts have met with doubtful success, we must now try again, and enter on paths partly marked out long ago by an English scholar, confident that religion can only gain by the fullest investigation of its history. See, further, RED SEA.

The story of the 'Plagues of Egypt' will receive separate consideration (see PLAGUES [TEN], especially 11. N. Arabian § 5). Suffice it to say here that the original tradition was probably ignorant of the existence of ill-feeling between Mišrites and Israelites. It is as friends that the Mišrite and the Israelite women part. They have long been neighbours or even housemates, and the Mišrites who stay behind do not grudge their precious jewels to their departing friends (Ex. 3:22). Indeed, some of the N. Arabians (ערב רב, MT of Ex. 12:38; AV 'mixed multitude') or Zarephathites (זרפתיים, MT of Nu. 11:4; AV 'mixed multitude'), especially Hobab (Nu. 10:29, Judg. 1:16 4:11), accompany the Israelites. See MINGLED PEOPLE. Nor need we trouble ourselves too much about the names Goshen, Pithom, Rameses (Raamses), Pihahiroth, Baal-zephon, Succoth, Etham; for, in spite of a prevalent opinion which is deserving of all respect, it is probably best to explain them as names of the Neg'eb of S. Palestine or N. Arabia.²

(a) It is, at any rate of the highest importance that a number of OT passages become satisfactorily clear only when we assume them to refer to a sojourn of the Israelites in Arabia. The witness of Jeroboam, son of Nebat, depends, it is true, on emendations of the text of 1 K. 12:25-33 (see SHECHEM); but the emendations are such as cannot safely be disregarded, and they appear to prove that Jeroboam uttered these words, speaking of the golden calf,³ 'Behold, thy god, O Israel, who brought thee up out of the land of Mišrim.'

(b) In Am. 9:7 emendation is again employed; but the obscurity of the passage fully justifies it. 'Have not I brought up Israel out of the land of Mišrim, from Rehoboth of Jerahmeel,' follows naturally on v. 9, 'Are ye not as the bnē Cushim (the Cushites of N. Arabia) to me, O ye bnē Israel? saith Yahwē.' See REHOBOTH.

(c) The passage Am. 5:25-27 is hardly intelligible as it stands. When emended, it becomes full of suggestion. Read, 'Do ye bring me sacrifices and offerings in the wilderness of the Arabians, O house of Israel? Then the Cushites, the Jerahmeelites, and the Kenites, and the Salmēans (see SALMA) shall take you away, and I will carry you into exile beyond Cusham, saith

¹ See the commentaries of Baentsch and Holzinger, and cp *OT's* 31, n. g. It seems hazardous to make the 'Song of Moses' earlier than the earliest of the psalms in the Psalter.

² Cushan, (Sare)phathim, Jerahmeel, Rehoboth, Zaphan (inferred from Zephani[ah]), Maacath, Ethan are the possible originals. Of course, it is also possible that the names were inserted to make the Exodus from Egypt plausible. When, however, we remember the result mentioned above, of the N. Arabian affinities of the personal names connected with the Exodus (Moses, Aaron, Miriam, Hur, Phinehas, etc.), we naturally incline to interpret the local names in a similar way.

³ Possibly the idea that there were *two* calves arose when 'Bethel' and 'Dan' were supposed to be different places; really 'Bethel' may have lain close to 'Dan' (see SHECHEM). The story in Ex. 32:48 favours the view that there was but one calf, and so does 1 s. 57:8, if the text has been rightly emended (see MEMORIAL, 2).

Yahwē.¹ There are parallels for this in the book of Amos itself (see the next passage, and PARADISE).

(d) Now, too, it becomes plain how Am. 2:10 was originally read. 'But it was I that brought you up out of the land of Mišrim, and led you through the wilderness of the Arabians.'²

(e) A similar statement is made in Mic. 6:4, where according to an emendation that seems to be called for, the right names are probably Mišrim, Arbhim, Mišrim, Jerahme'elim (see MICAH [BOOK], § 3 [f.], 1).

Thus the prophets, if we have recovered their text, are on the side of the new theory. It is only in post-exilic passages like Is. 10:26 11:5 f. 43:16 f. 51:10 63:11 Ps. 66:6 77:17 f. 20 78:13 53 106:79 114:35 136:13 Neh. 9:11 that we find unmistakable allusions to the Exodus from Egypt. It is also a prophet (see above, c) who enables us to trace the genesis of the story of the forty years' wandering in the wilderness. It arose in an ancient scribe's chamber, and was the result of reading ארבעים, 'forty,' instead of ערבים, 'Arabians' (cp Kirjath-arba, 'city of four,' for Kirjath-arāb, 'city of Arabia'?). If the reader will now turn to Ex. 13:14 20:2, Dt. 5:6 6:12 8:14 13:5 10, Josh. 24:17, Judg. 6:8, he will be struck by the great improvement effected by simply reading ערבים, 'Arabians,' עבדים, 'servants'; the 'house (=territory) of the Arabians' is clearly a much better parallel to 'the land of כערים' than the phrase which now stands in the text—viz., 'the house of bondage' (rather, of servants). Unfortunately, we cannot also remove the 'forty years' from most of the Hexateuch passages in which the phrase occurs, because the legend had already fixed itself in the literary circles to which the writers of those passages belonged. In Nu. 14:33 (J), however, on which 32:13 is dependent, it is quite possible. The legend is therefore subsequent to J, and anterior to the parænetic part of Dt. and to P.

So far as the residence in a Mišrim (מצרים) which was not Egypt is concerned, we have the support of Beke, who attempts, it is true, to rescue far too much of the traditional narratives, but is on safe ground when he argues that 'the land of Goshen or of Rameses was an integral and, as I should contend, a principal part of the kingdom of Mizraim' (*Origines Biblica*, 1:277). His geographical definition of מצרים is too wide; but without the help of Assyriology it could not have been otherwise.

The traditional details of the journey from the *yam sūph* to the sacred mountain now lose, not indeed their religious,³ but at any rate their historical interest. It is probable that no such journey was known to the original tradition.

It is possible that *yam sūph* (ים סוף) is an early corruption of ים־הַיַּמִּים, 'sea of Zarephath,'⁴ a synonym for ים־הַיַּמִּים = ים־הַיַּמִּים, 'sea of Jerahmeel,'—i.e., the Dead Sea (see SALT SEA), and that the names MARAH (q.v.) and ELIM (q.v.) are but fragments of the ethnic plural 'Jerahme'elim,' such as we often find side by side in the genealogical lists of a later age. MASSAH AND MERIBAH (q.v.), and REPHIDIM,⁵ to which traditions of more value were attached, were certainly in the territory sometimes described as Jerahmeelite; Massah was apparently by the rock of Kadesh (see SELA), and Meribah was more fully designated Meribah of Kadesh (a variation of Kadesh of Jerahmeel [?]).⁶

¹ The reference is to the cultus of Bethel, Gilgal (=Cusham-Jerahmeel=Dan?), and Beersheba. Do ye fall back to the religion of the Cushites? 'Then these very people shall take you away.' Read—

וַיִּטְאוּ אֹתָם בְּפִשִׁים וּרְחֵמֵי־אֱלֹהִים וְיִשְׂרָאֵל
וְהַגִּילָדִים אֹתָם בְּרִבְעָה לַיּוֹשָׁבִים:

² אֲשֶׁר is an erroneous gloss. It now becomes unnecessary to reject the whole of 2:10 as a later insertion (Nowack's theory).

³ Cp PILLAR OF CLOUD.

⁴ Cp Dt. 1:1, where the text of the document used by the later writer whom we call D₂ probably read '... in Arabia of Jerahmeel, opposite Zarephath,' etc. See SUPH. Perhaps the writer who fused the Mišrite and the Egyptian forms of the tradition found יַם־הַיַּמִּים indistinctly written, and confounded the 'sea' with a mythical 'sea of reeds' (see § 10).

⁵ The Rephidim story is apparently the justification of the long feud between Israel and Amalek in later times. Cp JEHOVAH-NISSI.

⁶ Mr. S. A. Cook acutely compares Meribah with Meri(b)baal

While the Moses-clan and those associated with it were at the sacred mountain, they were of course profoundly influenced by the Kenites. This is suggested symbolically by E's statement (J may have said the same thing), that Moses received a visit from his father-in-law, who gave him important advice relative to his administration of justice.²

This account, however, is placed out of the proper order; the visit was originally supposed to have occurred near the close of the sojourn at Horeb (see Ex. 18, end). (On Massah and Meribah, and on the gift of manna and of quails, see special articles.)

We have now arrived at the great Theophany and the 'b'érith' (see COVENANT). It is important to use the

13. Accounts of Theophany. results of critical analysis, and to keep the three accounts separate. According to J, after the preliminaries described in chap. 19, Moses, who alone approached Yahwè, received from Yahwè the Ten³ Words, 'the words of the covenant' (concerning ritual), which, at the divine command, he wrote down upon two tables of stone. 'He was there with Yahwè forty days and forty nights; he neither ate bread nor drank water' (34 28). When the time for departure comes, the people are troubled, and put aside their ornaments,⁴ and Moses asks Yahwè whom he will send with him to lead Israel to its resting-place. The answer is given, 'My *pānim* (manifestation⁵) shall go with you' (33 14). Early the next morning Moses ascends the mountain, and another favour is granted; 'Yahwè passed by.' The noble declaration of Yahwè's ethical nature in 34 6 f. belongs to a redactor; as Battersby has noticed, it is the expression of a school of religious thought later and wiser than the Yahwist's (*Oxf. Hex.* 2134).

According to E, after the due preliminaries, there was a great thunderstorm, and Moses brought the people to the foot of the mountain to meet God. Affrighted at the storm and the 'trumpet,' the people fled from the mountain, and Moses alone drew near to the darkness in which God was. The words spoken were, as the text now stands, the famous Decalogue adopted by the Church (see DECALOGUE). The probability, however, is that E's original Decalogue (if the number ten may be assumed⁶) is to be found in the cultus laws (20 22-26 22 29-31 23 10-19 [20-33]).

After reporting the words of God to the elders, Moses, attended by Joshua, again ascends the mountain, and remains there forty days and forty nights, during which time, it is probable, he has received instruction in the 'judgments' or decisions (*mishpātim*) in 21 1 22 16. Finally he receives the two tables of stone, on which the fundamental words of God have been written by the divine hand.⁷ (The story of the GOLDEN CALF [*g.v.*] may be passed over.⁸) An altar is erected, and burnt offerings and peace offerings are offered. The people are besprinkled with the 'blood of the covenant' (24 8; see COVENANT, § 5, end), so that, on the basis of their promise of obedience, their communion with the deity is assured.

According to D, the sole foundation and contents of the covenant at Horeb was the (expanded) Decalogue.

(MASSAH, § 3, end); now Meri(b)baal is one of the many distortions of Jerahmeel (see MEFIBOSHETH).

¹ Probably Ex. 18 contains some elements from J's parallel account which RJE has worked into I's narrative. So Di., Bacon (*Trip. Trad.*, 1894), Carpenter-Battersby (2 108).

² Moses then is the sheikh of his clan. Presumably the place of judgment is the sanctuary of Yahwè, near Horeb. According to Judg. 4 11 (cp Nu. 10 29-32, J), the father-in-law of Moses accompanied Israel to the Promised Land. Cp the statement about עַרְבֵי רֵיב.

³ The number ten is only probable.

⁴ So J's part of 33 4. The trouble was caused by the prospect of going to a distance from the god of Sinai, and as a consolation the ornaments are probably to be devoted to the decoration of the sacred tent and of the Ark. See Dillmann and Baentsch *ad loc.*

⁵ Cp the pillar of cloud and fire (Ex. 13 21).

⁶ For Wellhausen's reconstruction see DECALOGUE, § 5.

⁷ See Battersby on Ex. 24 12, but cp *Oxf. Hex.*, *ad loc.* (2 110).

⁸ The allusion to the golden calves (or calf?)—see SHECHEM of Jeroboam is unmistakable.

According to P, the glory of Yahwè was for six days hidden in a cloud on the top of Sinai. On the seventh day Moses was called into the cloud (Ex. 24 15 f.-18 a), where he received instructions as to the tabernacle and its furniture, the priests and their vestments, the altar of incense, etc. (25 1-31 17 f.). There Moses received the two 'tables of the testimony' (see ARIK, § 3); his face shone so that he veiled it (cp HORN). The tabernacle was eagerly constructed, furnished, and sanctified. Aaron and his sons were consecrated as priests (Nadab and Abihu can be passed over). From time to time the various laws of the Book of Leviticus were communicated.

What is the element of historical truth, whether large or small, which forms the kernel of these various narra-

14. Historical element. tives? Here as elsewhere in the primitive story the object of the narrators is, 'not to relate what actually occurred, but to shape traditions of the past for the good of the present.'¹ If it was really a primitive tradition that, under the conduct of the clan or tribe of Mōšè, certain Israelitish tribes left the Egyptian territory and went to the land of the Kenites, where their conductors had long been settled, it stands to reason that the new-comers would have to adopt the religion of the Kenites. In any case the Mōšè-clan and the clans which gathered round it from whatever quarter must have taken this step.² The 'pomp and circumstance' of the so-called 'covenant' was unnecessary. What may have occurred is described in a passage which is one of the most antique portions of the narrative of JE (Ex. 18 12, E):—

'And Jethro, Moses' father-in-law, took a burnt offering and sacrifices for God; and Aaron and all the elders of Israel came to hold the sacred meal before God' (= at the sanctuary). Jethro (or perhaps Jethru), the priest of 'Midian' (Mušri) is about to bring his visit to Moses to an end (18 27). Before he does so, he offers sacrifices to Yahwè his God, and invites the representatives of Israel to assist at the ceremony and the feast. Before they could do this, the Israelite clans must have been solemnly incorporated with Yahwè's people. This incorporation is now solemnly recognised by Jethro. It is a sacrifice of initiation.³

May we venture to say that there was already an essential difference between the religion of the Kenites and that of the new worshippers of Yahwè? There was—if we may assume that in some wonderful way, explicable only as an intervention of Yahwè, certain newly arrived Israelites had been delivered from the very jaws of death.⁴ If, however, we cannot venture to assume this, the origin of the difference which subsequently existed between the Yahwism of the Israelites and that of any other people which recognised a god named Yahwè must be referred to some later period. It may be noticed, however, that even critics who as regards the story of the *yam siph* may be called relatively conservative, distinctly hold that the original Yahwism of the Israelites had no ethical character. All that they can say is that the claim upon Israel's fidelity constituted by Yahwè's great mercy at the Red Sea had an ethical character, and that the desire to satisfy this claim was a potent impulse to the gradual moralisation of Israel's religion.

It has been pointed out already that the sacred mountain must have been at no great distance from Kadesh—*i.e.*, the southern Kadesh called Kadesh-barnea or rather (see NEGEB, § 2) Kadesh-jerahmeel.

¹ Guthe, *GVI* 23.

² 'A tribe that changes its seats changes its gods' (W. R. Smith).

³ Perhaps, as Budde (*Religion of Israel to the Exile*, 23) remarks, this is the reason why Moses is not mentioned as taking part in the sacrifice.

⁴ 'The Kenites served their god because they knew no better; because he was of their blood-kindred, and had grown up in inseparable union with them. . . . But Israel served Yahwè because He had kept his word; because He had won Israel as his possession by an inestimable benefit' (*ibid.* 35 f.). But can we be sure that the Kenites had experienced no divine mercies which awakened the same ethical impulse as the deliverance at the Red Sea (*ex hypo.*) awakened in the Israelites? If the tribal name 'Jerahmeel' was interpreted by the Jerahmeelites to mean 'God has mercy,' they had. But it would be very unsafe to lay stress upon this.

It was in the neighbourhood of this mountain that the new Yahwè-worshippers settled. We therefore set aside the notion of a long journey from Sinai or Horeb to Kadesh, and at the same time that of the early construction of a surrogate for the mountain shrine of Yahwè (the Ark). As long as the clans or tribes remained within easy distance of God's mountain, the need of a portable sanctuary could not have been felt. It was when they began to push forward into new territories (perhaps even 'three days' journey,' Nu. 10³³, would disquiet them) that this want would begin to be noticed. Whether the construction of the Ark was an Israelitish idea, or due to imitation of the Kenites or Mišrites, we cannot say; the Hebrew narrator had not a historical object in ascribing it to a divine revelation to Moses. At any rate, the idea of Renan and Guthe that the Ark of the Israelites was suggested by Egyptian prototypes is not plausible, the connections of Moses being not Egyptian, but Arabian.

If we add that we also dismiss certain traditional

**15. Meribah,
Dathan;
Aaron and
Miriam.**

stories relative to the journey from Sinai to Kadesh (see KIBROTH-HATTA'AVAH, MANNA, QUAILS, MERIBAH), it is only from the point of view of students of the early history. There is something to learn from each of these traditions, and the picture of the great leader as it was painted by the later narrators possesses a special interest of its own. Whether 'very meek' is what E meant to say in Nu. 12³ may be doubted (cp POOR, § 1); but certainly *ἐρησποφώρησεν* (Dt. 13⁵; Acts 13¹⁸) may fitly describe the Leader's uniform gentleness and love towards his people (see especially the sublime as well as beautiful passage, Ex. 32³²). P, it is true, reports an exception to this at Meribah, where, in his impatience, Moses exclaims to the assembly of Israel, 'Hear now, ye rebels' (Nu. 20¹⁰); but it may reasonably be doubted whether P has accurately reproduced the tradition which had reached him.

The reason for doubting is as follows.—In Gen. 33¹⁰ 34^{f.} *ירחמאל* is, we believe, miswritten *חמרי* (one of the many distortions of this ethnic). This suggests the possibility that *חמרים* in *למען יצאנו* (Nu. 20¹⁰) may have been corrupted out of an indistinctly written *ירחמלים*. It is probable that Jerahmeelites (Kenites) accompanied the Israelites from Kadesh. Now the rock of Meribah (=Kadesh-jerahmeel?) was their own rock. The original story may have traced the sacred fountain of Kadesh to a stroke on the rock given by the staff of Moses. In this story Moses probably addressed the Jerahmeelites (*למען יצאנו*). The mistaken reading 'ye rebels' (*חמרים*) probably led to a recast of the tradition. Cp, however, MASSAH AND MERIBAH.

Certainly one whom 'Yahwè knew face to face' (Dt. 34¹⁰) could not have the ordinary human weaknesses. Nor do we find that Moses was wanting in mercifulness even under great provocation (see Nu. 12¹³ [E], 16²² [P]). The narratives as we have them represent Moses and his opponents as individuals. It is very possible, however, that relations of clans are symbolised by these personal narratives.¹ The Reubenites (=Dathan and Abiram) may have resented the superiority of the Mōšè clan on the ground that Reuben and Levi were equally descended from Leah, and the clans of 'Miriam' and of 'Aaron' may have become jealous of the prosperity of the kindred clan of Mōšè. To go farther than this and conjecture (with Guthe, *GIJ* 2125) that Moses, as well as Joshua, belonged to the tribe of Joseph, which traditionally derived its origin from Rachel, seems unwise. Indeed, the supposed connection of Joshua with Ephraim is probably due to a later misapprehension. See JOSHUA.

With the settlement of the confederated clans of Israel in Kadesh and its neighbourhood the story of Moses ought, one would have thought, to have ended. It is not at all certain that it did not once do so, and that the mountain from

¹ 'It is the most probable thing in the world that actual history underlies this representation' (Budde, *Rel. of Isr.* 82).

which, according to tradition, he surveyed the land which was about to be occupied, was not in Mušri rather than in Moab (another case of the confusion of *מוֹרִי* and *מוֹאָב*). The reason of this statement is as follows:—When the Israelites, unaware that Yahwè's power extended beyond Kadesh, murmured at the report of the spies, and talked of returning into Egypt, Yahwè in his wrath threatened to destroy them, and to make Moses (*i.e.*, the Moses-clan) into 'a nation greater and mightier than they' (Nu. 14¹²). Ultimately, we are told, Yahwè decided that only Caleb, who was of 'another spirit,'¹ should, with his posterity, possess the land. This certainly points forward to the occupation of Hebron, or perhaps rather Rehoboth,² by the Calebites (see CALEB). Theoretically, then, Moses should henceforth have disappeared, and it is very possible that the primitive tradition made him at this point surrender his authority to Joshua (=Abi-sheba or Eli-sheba [?]), and patiently wait for his approaching end.

It is true, the tradition in its present form gives Moses still some opportunities of guiding and directing Israel. The episode of Balaam the soothsayer and Balak the Moabite king comes into the existing biography of Moses. It is very probable, however,

**17. Balak;
Moses-clan
at Zarephath.**

that the original story of Balaam and Balak was rather different from that which our text presents. Balak is called a 'son of ZIPPOR' (*g.v.*); in our view, the original phrase was most probably 'son of Zarephath.' Balaam on the other hand dwelt, not at a doubtful Pethor on the Euphrates, but at Rehoboth by the River of Mišrim. See REHOBOTH. It is possible that, according to one tradition, the Mišrites grew tired of the Israelites, and that Balak their king sought the aid of a great prophet or diviner—a worshipper of Yahwè—against his unwelcome visitors. It may have been at this period, according to the early tradition, that Moses (*i.e.*, the Moses-clan) gained possession of Zarephath. Two inconsistent stories respecting the occupation of this place were probably current, corresponding to the inconsistent narratives of the capture of REHOBOTH [*g.v.*]. One represented Zephath or Zarephath as won by force (Judg. 17⁷), the other as acquired by an amicable compact (Gen. 33¹⁸, revised text; Ex. 22¹). At any rate we may (or must) suppose that the wandering Levites, who at a later time sought employment from Israelitish families as priests of Yahwè (this is vividly brought before us in Judg. 17⁷⁻¹³), had Zarephath for their centre. One part of the Moses-clan therefore (to which clan, be it noted, the Levite of Judg. 17⁷ belonged) remained in Zarephath, while another part accompanied other clans in expeditions of conquest, precisely as we learn from Judg. 16⁶ that Judah was accompanied in one of its campaigns by a branch of the Kenites. Representatives of the Moses-clan would naturally guard the portable sanctuary (the ark), which was an inseparable accompaniment of the leading Israelite clans so soon as they journeyed far from Kadesh. It was from these that the reputation of the Levites as a warlike tribe (Gen. 34 Ex. 32²⁶⁻²⁸) must have been derived.

The statement (Dt. 2²⁴⁻³ 17) that Israel under Moses conquered the territory of Sihon and Og, the two

**18. Conquest
of Cushan.**

tribes, seems to be due to a misunderstanding of the early tradition (see OG, SHON). All that any form of the primitive legend knew of was the conquest of the Jerahmeelite or Arabian land of Cush, and the Jericho spoken of in Josh. 2-6 was really some important Jerahmeelite city, such as Zarephath or

¹ See ESCHATOLOGY, col. 1342, midway.

² There are traces of an early tradition that the land 'flowing with milk and honey,' explored by the spies, was to the S. of the Negeb of Judah (see NEGEB, § 7). Cp PARADISE.

Halūšah.¹ The story in Josh. 2-6 makes Joshua the leader of Israel when 'Jericho' (Jerahmeel) was taken. This is surely the correct traditional view. 'Moses' took no part in any migration from Arabia. To tread the land of promise was denied him; this is distinctly stated in the traditions. The editors could not alter—they could but attempt to explain this fact. It was 'on your (Israel's) account,' said some (Dt. 1.37 326); it was because of something wrong in the conduct of Moses, said others (Nu. 20.6 12 Dt. 32.51 Ps. 106.33). Cp MASSAH AND MERIBAH. The true reason, however, was forgotten. It was because the Moses-clan was the clan of Yahwē, and Yahwē, as late as the time of Elijah, was the God of Horeb. At least a part of the Moses-clan, as we saw just now, probably remained at Zarephath.

It thus becomes probable that, in the primitive tradition, Moses, Aaron, and Miriam 'the prophetess' (Ex. 15.20, E) passed away as individuals in the same region: Miriam at Kadesh and Elijah (Nu. 20.1, Aaron either at Moserah (Dt. 10.6), or at Mount Hor (Nu. 20.28 33.38), and Moses on the top of 'the Pisgah.'²

The Pisgah-view enjoyed by Moses has been considered elsewhere (see PISGAH). We have only to add that, according to Dt. 34.6, 'no one knows of his sepulchre unto this day.' The Jewish comment on this is that this was designed in order that the Israelites might not raise a sanctuary at the grave of Moses, or because no sepulchre could be worthy of him. But the question is whether some primitive story which would account better for the circumstance has not been omitted. Moses and Elijah are two parallel heroes (cp Mal. 4.4 f., with Lk. 9.30), and are both connected with Zarephath and with Horeb.³ In the story of Elijah's decease it is said that fifty men were sent to find Elijah, but in vain, because he had gone up in a whirlwind, accompanied by chariots and horses of fire, into heaven. It appears likely that a similar tale was originally told of Moses.⁴ It would be a fitting close to the career of the prophet of Yahwē, who was originally known as the storm-god. We may add that this view is at least analogous to the early Christian belief in a spiritual assumption of the great legislator.⁵

It has been said of Elijah that his end corresponds with singular exactness to his beginning, that he appears in the history of Israel like a meteor, and disappears as mysteriously. The same thing may perhaps be said of Moses, for no one will say that the story of the 'ark of bulrushes' is more historical than that of the great prophet's burial. Primitive tradition knew nothing either as to his birth or as to his death, and altogether was too scanty to please posterity. Hence speculation busied itself in filling up the gap. See especially Josephus (*Ant.* 2.9 and 10; *c. Ap.* 1.26 f.) and Philo (*i. l. Moysis*). On the Midrash called the Petirath Mōšē see Zunz, *Gottesdienstl. Vorträge*(2), 154; for the *Assumption of Moses*, see Charles's edition (1897), especially the appendix on the original Assumption (cp APOCALYPTIC, § 59); on later legends in general, see Beer, *Leben Moses nach Auffassung der jüd. Sage* (1863), and on the legendary graves of Moses and Aaron, Goldziher, *Hebrew Mythology*, 281 f.

Of references to Moses in the OT outside of the Hexateuch specially deserving attention we may notice Ps. 99.6, 'Moses and Aaron among his priests'; Is. 63.12, 'that caused his glorious arm to go at the right hand of Moses'; Jer. 15.1, 'though Moses and Samuel stood

¹ Hardly Kadesh, as suggested in JERICHO, § 2. Halūšah (Ziklag) was possibly the city conquered by the Danites, according to Judg. 18.27-29. See ZIKLAG.

² MOSERAH [*y. v.*] = Mišsur (Mušri); Hor and 'the Pisgah' both come, the present writer thinks, from Jerahmeel. The current views are scarcely tenable. See NERO, MOUNT.

³ According to Renan, 'Le géant du Sinai parait une création de l'école d'Élie. Les deux légendes se compénètrent. Élie a dans le Horeb des visions qui ont avec celles de Moïse au même lieu les plus grandes ressemblances' (*Histoire*, 2.28).

⁴ Winckler's theory that Moses is 'the returning Tammuz, the sun of spring and summer' (*Gl.* 289 284) implies too great a confidence in the mythological key to ancient legends.

⁵ See Clem. Alex. *Strom.* 6.15, quoted by Charles, *Assumption of Moses*, 107.

⁶ A parallel Midrash relative to the decease of Aaron is probably later (Zunz).

before me'; Mic. 6.4, 'I sent before thee Moses and Aaron and Miriam'; Mal. 4.4, 'remember the law of Moses my servant'; to which we may add the title of Ps. 90, 'A prayer of Moses the man of God.' In some

of these passages the text is doubtful. It is not likely, for instance, that Moses would have been called a priest; for בְּקָרְבָנוּ we should probably read בְּקָרְבָנוּ 'his chosen ones' (cp 106.23, said of Moses). Nor is it probable that Aaron and Miriam were given a share of the leadership specially belonging to Moses (see MICAH, § 3 [f.], 1). The title of Ps. 90 will be referred to elsewhere (PSALMS [BOOK], § 26 [17]).

The references in the NT are comparatively less important, because, where not simple abstracts of OT statements, they merely reproduce late Jewish traditions. The extraordinary beauty of Moses (Acts 7.20; cp Heb. 11.23) reminds us of Jos. *Ant.* ii. 9.7 (μορφῇ θείου). In Acts 7.22 we have allusions to the tradition of Moses acquaintance with Egyptian magic arts, and of his warlike prowess (see below, § 21).

In *v.* 23 *θεοσεβασιατέλης χρόνος* may be illustrated by *Ber. rabba*, par. 100 (on Gen. 1.14), 'Moses stayed in the palace of Pharaoh forty years, and in Midian forty years, and for forty years he ministered to the Israelites.' In *v.* 22 and in *v.* 38, 53 we find a reference to the tradition that the law was proclaimed through the ministry of angels (cp 5, Dt. 33.2 Gal. 3.19 Heb. 2.2, with Del.'s note). On 2 Tim. 3.8 f. see JANNES AND JAMBRES, and on Jude 9 see APOCALYPTIC, § 59.

We referred just now to a statement in the speech of Stephen (Acts 7.22) relative to Moses as a warrior.

**21. Hellenistic and Moham-
medan legends.** This may refer to such stories as that of Artapanus in *Eus. Præp. Ev.* 9.27; see HISTORICAL LITERATURE, § 19, iii., col. 2090; which some considered to be based on the reference in Nu. 12.1 to Moses' Cushite wife, whilst Wiedemann (*OLZ*, May, 1900, pp. 173 f.) conjectures that some tradition of Mesui, who held the office of prince of Cush, under Ramesses II. and his successor Me(r)neptah (cp Ebers, *Durch Gosen*, 526) may have reached later writers through one of the many Egyptian legendary tales, and have had some share in the formation of the story. This latter theory, however, presupposes the Egyptian origin of the name Moses.

The references to Moses in the Koran are many; they illustrate the unoriginality of Mohammed, who gives us mere recasts of the biblical narratives, expanded by the help of the traditions current among the Arabian Jews. The most remarkable is in Sur. 18, where Moses is brought into connection with the mysterious personages el-Hîr (on whom see DELUGE, § 15, ELIJAH, § 4) and 'the two-horned' (Alexander the Great?—see HORN).

From all these legends we turn back with renewed interest to the old biblical narratives, and our sympathy is great with those who (like Giesebrecht¹) feel compelled to treat Moses as to some extent a historical personage as a protest against a meagre evolutionary view of Jewish religion.

22. Important positive truth remaining. If it was not an Exodus from an Egyptian 'house of servants' that awakened the sense of an almighty and all-righteous protector of Israel, and if it was not through Moses that the meaning of the event was brought home to the people, what other deliverance and what other deliverer are we to set in their place? There are no great heroes of popular tradition to whom we can point but Samuel and Elijah. The former is brought into connection with the war with the Philistines, which certainly appears to have stirred up religious fervour in no slight degree;² the other, with the persecution of Yahwē-worshippers by Ahab.³ Our knowledge, however, respecting these personages is very slight. Samuel and Elijah have apparently both been much idealised, and sober history cannot venture to admit that Ahab really destroyed the altars of Yahwē and slew his prophets. The fact,

¹ *Die Geschichtlichkeit des Sinai-bundes* (1900).

² Cp Budde, *Religion of Israel*, 101.

³ Cp Kuenen, *Religion of Israel*, 1.361.

however, need not be doubted that through the chequered experiences of the national history the representatives of prophetism arrived at the apprehension of a truth which had hitherto been practically unknown, viz., that to ensure prosperity it was not enough to worship Yahwé alone; his one immutable requirement was righteousness. Is it not reward enough to the critical student to have made this historically plain, and so to have rescued all that was indispensable in the imaginative popular biography of the ideal 'man of God'?

T. K. C.

MOSOLLAM (ΜΟΣΟΛΛΑΜΟΣ [BA]), 1 Esd. 9:14 = Ezra 10:15, MESHULLAM, 11.

MOSOLLAMON (ΜΟΣΟΛΛΑΜΟΝ [A]), 1 Esd. 8:44 AV, RV **Mosollamus** = Ezra 8:16, MESHULLAM, 10.

MOTH (מֹת; חַמֵּץ,¹ but in Is. 51:8 ΧΡΟΝΟΣ, CP WORM; *tinea*; Job 4:19 13:28 27:18 Ps. 39:12 [11] Is. 50:9 51:8 Hos. 5:12 [on C see SPIDER *ad fin.*], Eccles. 19:3 [cp C] 42:13 Bar. 6:12 [C Βρωμάτων] Mt. 6:19 f., Lk. 12:33).

The moth naturally occurred to Hebrew writers in search of a symbol for the perishableness of man and his possessions. It need hardly be remarked that there are various species of the genus *Tinea*, which are destructive of woollen fabrics and of furs. We cannot select any one of these as more likely than the rest to represent the biblical moth.

Nor need we make any special reference to biblical passages, except to those in which the moth appears only through a corruption of the text, מֹת, 'moth,' being really a relic, in one place (Job 13:28) of מֹתֵל, 'caterpillar' (see LOCUST), in others of מֹתְבָבֵעַ, 'spider' (see SPIDER).

1. Job 27:18a, where EV, following MT, brings the house of the rich man into some not very clear connection with the moth. Accepting this, prosaic persons have imagined an allusion either to the cases made of leaves, etc., in which caterpillars of certain species shelter themselves, or to the cocoons which they spin before pupating. The corruption of מֹתֵל into מֹת, is however, so easy that we need not defend the traditional reading at the cost of such an unnatural conjecture (see Merx, Budde, Duhm). On the other hand, we may safely restore the moth in Job 27:18b.² The whole verse should probably run thus, 'He builds his house as the spider; he has laid up his store for the moth' (רָבַחַּת שָׂרְיָהּ לְמֹת).

2. On Ps. 39:11 [12] we may refer to what is said elsewhere (OWI). The ordinary view that the psalmist compares the divine chastisements to the operations of a moth (cp Hos. 5:12) has serious exegetical difficulties. In two passages, however, the moth may on grounds of textual criticism be restored (Is. 51:6 Ps. 37:20; Che. *SBO*, *ad loc.*, and *Ps.*(2)).

T. K. C.

MOTHER (אִמָּה). A very few points of Hebrew usage need be here indicated; for further information see the related articles DAUGHTER, SON, and especially FAMILY, KINSHIP, and MARRIAGE (with reference to the so-called Matriarchate or Mutterrecht). When precision was necessary, the fact of uterine brotherhood was expressed by such a phrase as 'his mother's son' (Gen. 43:29; cp Judg. 8:19) and a stepmother was distinguished from the womb-mother by the name of 'father's wife' (Lev. 18:8). The word 'mother' could also of course be used widely for 'ancestress' (Gen. 3:20; on 1 K. 15:10 see MAACHAH), also for the people personified (Is. 50:1 Jer. 50:12), and consequently, in the symbolic language of ethnic genealogies, for one of the tribes or races of which a composite population was composed (cp also GENEALOGIES I., § 1). Hence in Ezek. 16:3 the mother of Jerusalem is called 'a Hittite' (see, however, REHOBOTH), thus suggesting one of the elements in the early population of Jerusalem. In Judg. 5:7 Deborah is called 'a mother in Israel,' which may either mean 'a benefactress' (cp 'father,' Job 29:16) or be regarded as an indication that 'Deborah' (but cp OPHRAH) was the name of a town or a clan. In 2 S.

¹ מֹתֵל also represents מֹת in Is. 51:8 and מֹתֵל in Prov. 14:30; cp WORM.

² This has been overlooked by the critics. C gives ἀράχνη beside σῆρες; Pesh., too, implies מֹתֵל (instead of מֹת). C is nearer the true text than either MT or Pesh.

20:19, at any rate, the phrase 'a city and a mother in Israel' means 'a prominent, influential city' (C. πῶλον καὶ μητρόπολιν). In the language of strong emotion Shē'ol can be called a 'mother' (Job 1:21b, cp 17:14). The 'parting of the way' (Ezek. 21:21 [26]) is in the Hebrew 'the mother of the way'—a transparent symbolic phrase.

MOUNT, MOUNTAIN (הַר). Where AV has 'mount' RV has a marked preference for 'mountain' or 'hill-country'—e.g., 'hill-country of Ephraim' (Josh. 19:50 20:7), 'mountain of Gilead' (Gen. 31:21), 'hill-country of Naphtali' (Josh. 20:7), 'hill-country of Judah' (*ib.*), though 'mount Seir' is retained. See EPHRAIM, etc.

The uncertainty whether 'mountain' means a single eminence or a mountain range or district must be always borne in mind, both in the OT and in the NT. This affects the possibility of the identification of the 'Mount of the Beatitudes' (Mt. 5:1) and the Mountain of the Transfiguration (Mt. and Mk. give εἰς ὄρος ὑψηλόν, but Lk. 9:28 εἰς τὸ ὄρος). Cp Weiss on Mt. 5:1. For phrases into which 'mount' or 'mountain' enters, see CONGREGATION, MOUNT OF; CHERUB, § 2, and SINAI (Horeb, 'mountain of God'); COPPER, § 5 ('mountains of brass'); DESTRUCTION [MOUNT OF].

Mountains are referred to as monuments of the might of the Creator (Ps. 65:6 [7]; cp Is. 40:12); hence, according to most, they are called 'the mountains of God' (Ps. 36:6 [7]; cp 'the trees of Yahwé,' Ps. 104:16). They were, as Job 15:7 and Prov. 8:25 appear to state, the earliest created objects; so ancient is their date that to express God's everlastingness in the past a psalmist declares that God existed even 'before the hills were brought forth' (Ps. 90:2). When God touches them, they smoke (Ps. 104:32 144:5); when he appears, they melt like wax (Judg. 5:5 Ps. 97:5 Is. 64:1 [63:16] Mi. 1:4), or skip like lambs (Ps. 114:4 6). They shudder at his judgments (Ps. 18:7 [8] Mi. 6:1 f.); but they rejoice when Israel's redemption draws nigh (Ps. 98:8 Is. 44:23 49:13 55:12).

Mountains are also symbols of kingdoms—e.g., of Israel (Ezek. 17:23 20:40), and especially of the Divine kingdom (Dan. 2:35 44); the latter representation seems to have mythological affinities (cp CONGREGATION [MOUNT OF]). In Jer. 51:25 Babylon is called a 'destroying mountain' (see DESTRUCTION [MOUNT OF]); but in Is. 41:15 the mountains which Israel is to 'thresh,' and in Zech. 4:7 the 'mountain' which is to become a 'plain' before Zerubbabel, are probably symbolic terms for obstacles to the activity of the people of God. With the former passage cp Is. 40:4; with the latter, Mt. 17:20 21:21 1 Cor. 13:2.

For 'mount,' (1) מִצְבֵּת, *muṣṣāb*, Is. 29:3 RV 'fort,' see FORT; and for (2) מַבְצֵב, *sābtāh*, 2 S. 20:15 etc. (AV sometimes 'bank'), see SIEGE. For **Mountain of God** (Ezek. 28:14), see CONGREGATION, MOUNT OF.

MOURNING CUSTOMS. Both before and after the burial, sorrowing for the departed found expression in remarkable customs which, in part at least, Israel had in common with other nations.

One of the most usual was that of rending the garments (2 S. 1:11 3:31 etc.), a practice afterwards

1. **Biblical references.** Instead of the usual materials sackcloth (קָפָר) was worn (2 S. 21:10 Is. 15:3). This was a rough garment of goat-hair or camel-hair, in form somewhat resembling a modern shirt, but without long sleeves; originally, perhaps, it was merely a body-cloth like the *ihām* of the Arabs (to which we shall refer again, § 2). The mourners went bareheaded and barefoot (Ezek. 24:17 2 S. 15:30), or covered the head, or at least the beard (Ezek. 24:17 Jer. 14:3 2 S. 15:30), or laid the hand upon the head (2 S. 13:19); they sat in dust and ashes, and sprinkled themselves (Is. 3:26 47:1 Job 23), and especially their heads, with these (Josh. 7:6 2 S. 1:2 etc.). Various mutilations also were practised (Jer. 16:6 41:5

475 etc.; see CUTTINGS OF THE FLESH, § 1). It was also the custom to fast for the dead (1 S. 31¹³ 2 S. 335); after sundown the fasting was closed (or, if the fasting lasted several days, broken) by a funeral feast (Hos. 9.4 2 S. 335 Jer. 167 Ezek. 24¹⁷ 22); cp FASTING. Food was placed upon the grave (Dt. 26¹⁴). Tobit indeed (Tob. 4¹⁷) was commanded to place food only upon the grave of the righteous; the ungodly were not to be so kindly treated; the son of Sirach, however, ridiculed this custom altogether; 'of what use,' he asks, 'is such an offering to a spirit?' 'Like dainties to a closed mouth are offerings laid on the grave' (Ecclus. 30¹⁸). The burning of spices as practised by the nobles in later times (Jer. 345 2 Ch. 16¹⁴ 21¹⁹) is also to be regarded as a form of offering to the dead. The customary lament for the dead was certainly more than a natural expression of sorrow. Besides the women of the house, who sat weeping upon the ground, professional women mourners were called in. Probably to some fixed melody, the peculiarly rhythmical dirge (קִינָה) was sung (cp LAMENTATION, POETICAL LITERATURE, § 4 [I]). Zech. 12¹⁰⁻¹⁴ makes for the view that the lament for the dead was a religious ceremony conducted under rules handed down by tradition. The dirge might be accompanied by flutes (Jer. 48³⁶; Jos. B¹/iii. 95). Cp MUSIC, § 4.

Several of these customs (especially that of wearing mourning) may be accounted for simply as being expressive of grief, and the explanation of their prohibition on the other hand (Lev. 19²⁸ 21⁵ f.; Dt. 14¹ f.) has been sought in the supposition that as wild excesses they were not pleasing to Yahwè. In the majority of cases, however, this interpretation of the practices in question can hardly be allowed. How could mutilation of the person, shaving of the head, cutting off the beard, come to be expressive of sorrow? That this was not the light in which they were viewed by the Law is shown by the reason given for their prohibition—viz., that they were sacrilegious, unbefitting Israel, the people of Yahwè, and in every respect defiling (Lev. 215). In point of fact they were forbidden as being ceremonies originally occurring in the worship of heathen gods. This conclusion is abundantly proved by the offerings to the dead. Such are even now brought by the Bedouins. Very similar is the custom still in vogue among civilised races of placing food and drink on the grave, as to the origin of which there can be no doubt. Just as in the last case the offering to the dead has been changed into a burial feast, so the burial repast grew out of a sacrifice. The text of Jer. 167 is in all probability corrupt; but the statement of the offerer of the tithe (Dt. 26¹⁴), that none of it has been given to the dead, can only refer to an offering to the dead or a funeral feast, whilst the latter, again, is shown to be of the nature of a sacrifice to the dead by the fact that the funeral bread is impure and contaminating (Hos. 9.4). In agreement with this we find that with many nations, particularly the ancient Greeks, sacrifices to the dead occurred in connection with funeral feasts. Cutting the body with knives is mentioned in 1 K. 18²⁸ as a religious ceremony. Cutting off the hair of the head and the beard corresponds to a similar custom among the Greeks, who laid their hair with the dead in the grave (*Iliad*, 23¹³⁵). The shaving of the head as a religious ceremony was also in use among the ancient Arabs, perhaps as a sign of devotion to the service of God.¹ It is a suggestive conjecture of W. R. Smith² that the dust which was strewn upon the head was taken from the grave, and the ashes from the funeral fires (2 Ch. 16¹⁴ 21¹⁹). It is chiefly among races having a form of worship of the dead that we find a dirge sung according to fixed forms. The shades of the departed, to whom the future was known (כַּחַם, מְיָקָה), were either consulted at the grave

(Is. 65.4) or summoned through exorcists (Is. 8¹⁹ 29.4 1 S. 28). Covering probably takes the place of cutting the beard as a form of diminished severity. That mourning clothes have their origin in some religious ceremony seems likely; cp the religious habit 'ihram worn by the Muslim pilgrims in the sacred precinct of Mecca. However, the effort to trace back all these customs to a religious origin seems unlikely to succeed.

J. G. Frazer (*Journ. of the Anthropol. Inst.* 15, 164 ff., 1885) explains a large proportion of the mourning customs of various peoples as typifying a complete renunciation of the spirit of the departed. Mutilation of the body and the wearing of special mourning apparel were, he thinks, originally meant to render the survivors unrecognisable by the spirit of the departed if he should at any time return. For Semitic peoples, however, such an explanation of mourning customs is impossible. On the contrary, the aim of the mourner was to maintain his connection with the dead. So in the old Arabian custom of erecting a tent on the grave of a venerated person and staying there, or the oft-recurring apostrophe to the dead in Arabic elegies: 'depart not.' The Hebrews located the graves of their family as near as possible to their homes (1 S. 26¹ Ezek. 43⁷; and see TOMB). See further CUTTINGS, ESCHATOLOGY, §§ 7-9, LAMENTATION.

Even though the mourning customs owe their origin to some form of worship of the dead, it does not by any means follow that the knowledge of this was retained in later times. It is more probable that, on the introduction of the religion of Yahwè, the original meaning was gradually forgotten and a new signification (as an expression of sorrow) more and more took its place. Only by some such transformation could the old customs succeed in maintaining themselves in the religion of Yahwè; and those of them (mutilations) which from their nature were most in danger of leading back to the old conceptions were, accordingly, forbidden by Deuteronomy and the Priestly Code, as heathen abominations.

MOUSE (מְיָקָה; ΜΥΣ; *mus*). Seven species of the genus *Mus* found in Palestine are described by Tristram, and to these may be added many other small rodents, field-mice, dormice, etc. All these were no doubt included under the Hebrew term 'akbār, and were regarded by the Jews as unclean. We hear indeed of certain persons who ate the mouse; but this was a sign of apostasy from Yahwè (Is. 66¹⁷). Evidently these persons regarded the mouse as a sacred animal, the eating of whose flesh consecrated the eater (see SACRIFICE). The Arabs, too, frequently ate mice. Arabic writers, when satirising the Bedouins, are wont to call them 'mouse-eating'; once we even find the epithet 'field-rat-eater' justified by a positive statement that 'the Arabs of the desert eat field-mice.'¹ The jerboa is still eaten by the Arabs of the desert, and the hamster in Northern Syria. Many of the smaller rodents live on the succulent underground tubers and bulbs of the desert flora. Three species of the hamster (*Cricetus*) are known; they lay up such large stores of grain as to cause serious loss to farmers. The jerboa (*Dipus*) is remarkable for its 'gambols and kangaroo-like bounds.'

Of the devastation caused by field-mice there is abundant evidence (see, e.g., *Ælian*, 17.41). Small votive offerings in the shape of mice have even been

¹ Wellh. *Ar. Heid.* (I) 118.

² *Rel. Sem.* 413; so Schwally, *Das Leben nach dem Tode*, 15.

¹ Goldziher, *Mythology among the Hebrews*, 83, n. 2 (chap. 4).

MOWINGS

found (see Frazer, *Paus.* 5290), and it is possible that the worship of mice (especially white mice) may have originated not so much from the survival of a mouse-totem as to propitiate mice in general and to induce them not to ravage the cornfields (cp Frazer, *Paus.* 5289f.). On the story in 1 S. 6 and the significance of the golden mice see EMERODS, PESTILENCE, HEZEKIAH, § 2, n., and ARK. § 5.

In Heb. עֲבָרָה *ACHBOR* (g.v.), occurs as a name (cp Phœn. עֲבָרָה יָרָא, יָרָא, and in Ar. the equivalent, 'ahbar, is applied to the mule jerboa, which is borne as a name by an Arabic tribe, the 'Amr. b. Yarbū'. Robertson Smith mentions that the 'mother' of this tribe was a lightning-goddess, and so akin to the divine archer Cozah, who has so many points of resemblance with Apollo (*Kin.* 302f.).

For an original theory as to the meaning of עֲבָרָה ('mouse') in 1 S. 6 see *Nature*, 57 (1898) p. 618, where it is suggested that the sufferings of the Philistines were caused by the bites of the Arachnid *Solpuga*. These spider-like animals can readily be mistaken for mice. Critically, however, the theory is very weak.

A. E. S.—S. A. C.—T. K. C.

MOWINGS occurs in the expression 'king's mowings'

(הַמְּוִנֵי הַמֶּלֶךְ; ΓΑΓΓΟ ΒΑΔΙΛΕΥΣ [BAQ]; *tonsionem regis*), Am. 71. The only certain meaning of *gēz* (גֵּז), however, is 'fleece' (=הֵזָה), and both in Am. and in Ps. 726 (where EV gives 'mown grass') the text is disputed (see LOCUSTS, § 3, and Che. *Ps.* (2)). Hoffmann defends the sense of wool-shearing for *gēz* even here (*Z. A. T. W.* 3117), but without plausibility (see Nowack on Am., *l.c.*). Most scholars find a reference to the king's right of cutting the grass in spring before others, on which see GOVERNMENT, § 19.

MOZA (מוֹצָא, 'sunrise,' § 72).

1. Son of Caleb b. Hezron by his concubine Ephah (1 Ch. 246, מוֹצָא [A], -ו [B], מוֹצָא [L]). Same locality in Judah is probably intended; cp the place-name MOZAH.

2. b. Zimri a descendant of Saul mentioned in a genealogy of BENJAMIN (g.v., § 9, ii. β), 1 Ch. 836f. (מוֹצָא [BA]; sup M vestigia appar rus et litur in B), מוֹצָא [L])=1 Ch. 942f. (מוֹצָא [B], מוֹצָא [NA] מוֹצָא [L]).

MOZAH (מוֹצָא), a Benjamite locality, grouped with Mizpah and Chephirah (Josh. 1826 [P], ΔΜΩΚΗ [B], ΔΜΩΣΑ [A], ΜΑΚΚΑ [L]). A Mozah, situated below Jerusalem, is mentioned in *Sukka*, 45; it was the place from which willow-branches were fetched for the Feast of Tabernacles. The Genāra adds that it was a 'colonia' (קרייניא). Now, on the way to Qaryat el-'Enab, N.E. of Jerusalem, we find the two neighbouring places named respectively Kulōnieh and Bēt Mizza (cp Bād. 17). Buhl (*Pal.* 167) would identify the latter with the Mozah of Josh. and of the Mishna. Certainly Kulōnieh is not the Kulon of 5's addition to Josh. 1559 (see EMMAUS, KULON). When, however, we consider similar cases of double representation of the same place in P's lists, and notice corruption close by, it seems best to regard the הַמְּוִנֵי as a corrupt dittogram of הַמִּצְפָּה, 'the Mizpeh' which precedes. See MIZPAH. A. K. C.

MUFFLERS (רְעָלוֹת), Is. 319f EV, AV^{mg}. 'spangled ornaments.' See VEIL.

MULBERRY (ΜΟΡΟΝ) 1 Macc. 634f, and **Mulberry trees** (בְּכַיִּים), 2 S. 523f. 1 Ch. 1414f., and AV^{mg}, Ps. 846 [7], where AV^{mg} virtually reads *bēkād'im* (בְּכַיִּים). At BETHZACHARIAS (g.v.) the elephants in the Syrian army were shown 'the blood of grapes and of mulberries' (see ELEPHANT). No doubt the fruit of the black mulberry-tree (*Morus nigra*; מור) is meant, the juice of which suggests an apologue illustrative of Gen. 49 in *Ber. rabbā*, 22. The juiciness of the mulberry also suggested AV's rendering of *bēkād'im* (from בָּכָה, 'to weep') in 2 S. 523f., which is adopted from the Rabbins, but is a worthless conjecture.

Targum gives the general term 'trees' (עֲרָבִים); 5BA (in Ch.), Aquila in 2 S. 523, and Vulgate (in S. and Ch.) give, for no

1 So Bochart, Gesenius, and Knobel all understand the עֲבָרָה to be the jerboa. It may be noticed that 'adal, the field-mouse, occurs also as an Arabic clan-name.

2 'Lectio suspiciōne non vacat' (Field, 1554).

MULE

good reason, ἄμροι, *fyri* (i.e., pear-trees), which, however, grow only in N. Palestine.

Celsius (1138 ff.) identified the *Baka* tree, as we may provisionally call it, with a tree or bush of the same name (*baka*) known to Arabian writers. Mr. M'Lean writes, 'It is, according to Abulfadl, similar to the *bas'am* (*Balsamodendron opobalsamum*), and grows in the district round Mecca. It differed from the balsam tree in having longer leaves and a larger, rounder fruit. From it a juice or resin (his language is not clear, but he connects the distillation with the severance of the leaf) was obtained which was a remedy for toothache.'

To this identification (accepted by many, including Del. Ps.) it is a conclusive objection that no such tree is known in Palestine. Nor is it easy to see how a tree which grows in the hot dry valley where Mecca lies, can have grown in the highland plain of 'Rephaim', whether we place this near Jerusalem or in the Jerahmeelite Negeb (see REPHAIM, VALLEY OF). It is possible of course that the same name (the 'weeping' tree) may have been borne by some gum-exuding variety of the acacia. Apparently the trees referred to in 2 S. *l.c.* were sacred trees, and in the Sinaitic peninsula at any rate we know that the *seyāl*-acacia is often a sacred tree (H. J. Palmer, *Sinai*, 39; cp Doughty, *Ar. Des.* 1273). Several species of acacia are found in Palestine (see SHITTAH TREE). We might further suppose that BOCHIM (g.v.) is a popular corruption of *bēkād'im* ('weeping trees'). See also POPLAR.

However, the corruptions suspected elsewhere in this narrative (see REPHAIM, VALLEY OF) suggest caution. The text may be corrupt. The two narratives in 2 S. 517-25 are clearly parallel. Very possibly for בְּבָאִים we should read בְּרִמְסֵי אֵלִים, 'Perez (=Zarephath) of the Jerahmeelites,' and בְּרִמְסֵי אֵלִים should be בְּרִמְסֵי יִרְהָ, 'in Perez of the Jerahmeelites.' This gives another play on the name Perez or Perazim, for the next words are, וְיִשְׁבַּח ה' (as read with Grä.), 'then shalt thou break forth.' See PERAZIM. The key to the narrative is the theory that the fighting referred to was for the possession of the Jerahmeelite cities (see 1 S. 3029); the combatants were David's men on the one hand, and the Zarephathites on the other.

The case of Ps. 846 [7] requires separate consideration. The rendering of Baer, Kautzsch, 'going through the vale of tears,' is supported by all the ancients, but will hardly stand (for another view see König, 2a 174). 5's טֹס קְלוֹבִּים points to the הַבְּכִיִּים, *hab-bōkīm*; *hab-bōkīm* might come from *hab-bēkād'im*, so that the Valley (Plain) of 'Rephaim' might be meant, if that valley is rightly placed near Jerusalem. More probably, however, there is a corruption in the text, and for הַבְּכִיִּים we should read הַבְּקִיעֹת; the passage will then run, 'Who going through a region of vales drink from a fountain' (see Che. *Ps.* (2)); cp Is. 4118, 'I will open . . . fountains in the midst of the valleys' (הַבְּקִיעֹת).

T. A. C.

MULE (פָּרֶד, *péred*, ΗΜΙΟΝΟΣ). The Hebrews do not seem to have been familiar with the mule before the establishment of the monarchy. Long

1. History. before this, however, mules had been in use in Egypt and Assyria; their sure-footedness, hardiness, and endurance making them handier, and often more valuable than the horse, which was reserved for military expeditions and wars (see HORSE).

Mules are first met with in Asia Minor, and the highlands to the N. of Mesopotamia. In Homer they are associated with the Paphlagonian Enetæ (*Il.* 2872), and the Mysians (*Il.* 24277). The Phœnicians (and through them doubtless the Hebrews) carried on a trade in mules with TOGARMAH (Ezek. 2714, om. 5B); and the same region on more than one occasion furnished the Assyrians with supplies of these animals.

In the OT the mule is first mentioned in the time of David.¹ It is the animal ridden by the king's sons (2 S. 1329 189; the *pack*-animal is the ass, cp 161), while for

¹ For 1 S. 217 [2] where Doeg, according to 5BA, was Saul's mule-keeper, see DOEG. 5 again finds an allusion to mules in Neh. 28 where נֹכְרֵי ל (not BA) display the reading נֹכְרֵי הַפָּרָדִים by the side of the MT הַפָּרָדִים, 'the keeper of the king's park. The latter is, of course, correct.

MUNITION

the king's use upon state occasions the female animal seems to be preferred (1 K. 133 ff.). Mules were among Solomon's yearly presents (1 K. 10₂₅ 2 Ch. 9₂₄), and henceforth became widely used. Mules together with asses, camels, and horses, in large numbers, were carried off by Sennacherib after his invasion of Judah (*Prism-Inscr.* 318 ff.). Further references are made to the use of the mule as a beast of burden (2 K. 517¹ cp Judith 15₁₁), as a baggage animal in war (Judith 217), and as harnessed to a LITTER (γ. v.). The breeding of mules would be prohibited in post-exilic times by the law in Lev. 1919.

The usual name for the mule in Heb. is מִרְכָּבָה, *mired*, a word of uncertain origin, cp Syr. *hardūna* 'mule, beast of burden.' This word lies at the bottom of the mid. Lat. **2. Names.** *burdo*, O. Eng. 'burdown' (the offspring of the stallion and ass; Engl. *hinny*), and is transferred from the pilgrim's mule to his staff in the O. Eng. 'bourdon' (cp the diverse meanings of the Span. *muleta*). For this and other vicissitudes of the word, see the New English Dictionary, s. 'bourdon', 'burden.' It is interesting to find that Wyclif in his translation has actually used *burdown*, *burdones*, to render the Heb. מִרְכָּבָה of 2 K. 517. Other Hebrew words rendered 'mule' are מִרְכָּבָה, *haryyūmin*, Gen. 36₂₄ (see ANAH), מִרְכָּבָה, *rekeš*, Est. 81014 and מִרְכָּבָה, *Est.* 810; see HORSE, § 1. Among other Semitic terms for 'mule' may be noticed the Ass. *kudinnu* (cp Muss-Arn. with refs.), cp Syr. *kūdanayā*; and *farū* (but according to Jen. *Kos.* 109 f. 'horse'). The Syr. *baglā* 'mule,' as also the Ar. *bagl*, are conceivably derived from μῦλος (of Phocian origin, so Hesych.); from which, in their turn, come the Lat. *mulus* (properly the offspring of the ass and mare), and our own 'mule.' A. E. S. — S. A. C.

MUNITION (מִצֻנָּה), Is. 3316 EV; מִצֻנָּה, Is. 297 AV; מִצֻנָּה, Nah. 21[2] EV; see FORTRESS, col. 1552, and, for Dan. 1138 AV^{ms}, MAUZIM.

MUPPIM (מִפִּים); ΜΑΜΦΕΙΝ [AD]; -ΕΙΜ [L], one of the sons of Benjamin (Gen. 46₂₁). The name seems to be a corruption from the SHEPHUPHAM of Nu. 2639 (SHUPPIM in 1 Ch. 712); see AHIRAM.

MURDERER. MANSLAYER. See GOEL; also ASYLUM, and LAW AND JUSTICE, § 13.

MURRAIN (מִרְרָה), Ex. 93. See DISEASES, col. 1105, and cp PLAGUES, THE TEN.

MUSHI (מִשֵּׁי, מִשֵּׁי) 'Mosaic' [§ 9] or 'Moses-clan' [MOSES, § 2]; in Nu. 333, 2658, מִשֵּׁי, the Mushites), a Levitical (Merarite) family; Ex. 619; Nu. 32033; 2658; 1 Ch. 61947 [432]; 232123; 242630 (usually μουσ[ε]ι, or, especially in L, μουσ[ε]ι, occasionally μουσ[ε]ι[ε]); in 1 Ch. 647 [32], B has μουσ[ε]ι. Cp MERARI, GENEALOGIES, I, § 7.

MUSIC

Rhythm, melody (§ 1).	Orchestration (§ 11).
Instrumentation (§ 2).	Development of music (§ 12).
Percussion (§ 3).	Character (§ 13 f.).
Wind (§ 4 f.).	Christian hymns (§ 14, end).
Strings (§§ 6-10).	Melodies (§ 15).
Literature (§ 16).	

Music is the art of the expression of the feelings by means of rhythmical and melodious sound. Its

1. Rhythm, origin is lost in the night of antiquity; but it is safe to assume from a study of **melody,** the development of the art among savage peoples that the first music was a system of rhythmical intonation. There can be little doubt that melody or tone-variation in singing was a comparatively late development from this original rhythm, a sense of which is inborn in all races. As soon as man reached a stage of cultivation where he was able to repeat his experience to his fellows, to give an account of his own passions or to tell of the heroic deeds of others, the need must have been felt of a declamatory style, a method of reciting which would not only impress the words of a tale on the hearers, but would also enable

¹ Cp Heb. מִצֻנָּה (Ar. *uatar*), Ps. 459 1504, 'strings of a musical instrument,' properly 'bow-strings.' [The correctness of MT, however, is not beyond doubt. See PIPE.]

² הָךְ, from תָּפַח, 'to strike'; Ar. *duff*; Gk. *τύπανον*. הָךְ in Ezek. 2813 probably means the setting of a jewel (cp Cornill); on תָּפַח Job 176 where AV finds a 'tabret,' see Budde, *H106*, 89.

MUSIC

the reciter himself to remember his theme more easily. This mnemonic stye, which must have been a method of intonation and emphatic accentuation of the most important words or phrases of a story, was the beginning of what we now call rhythm. It may be supposed that the reciter intoned his song in a monotone, marking it, both by means of his own voice and artificially, with a strong rhythmic beat, but that in the course of time it was discovered, possibly at first accidentally, that an occasional inflection or tone-variation would hold the attention of the hearers more satisfactorily. Finally, a distinct melody proceeding from two to five notes was probably evolved, which became the foundation for further modulations.

The development of instrumentation, although undoubtedly very ancient, must have begun some time

after the rise of rhythmic intonation. It **2. Instru-** was probably customary among the very earliest declaimers, as it is to-day among barbarous peoples, to emphasise the rhythmic beat of a song by stamping, by clapping the hands, or by striking the breast at proper intervals. Such an action would have suggested the first artificial instrument of music—the hand-drum or tambourine. The discovery by primitive man of his power to produce a whistling noise with his own mouth, which he was perhaps impelled to do in imitation of the wind, was in all likelihood the first step towards the invention of wind instruments. The most ancient instrument of this sort must have been a simple reed with a slit cut in it. Stringed instruments, which were probably developed last of all, may have been suggested by the accidental tone produced by the twang of a gut bow-string,¹ which impelled some inventive genius to create musical tones by means of similar cords strung tightly across a resonant piece of wood or bladder.

Percussion, wind, and stringed instruments are all mentioned in the OT; but as we have no ancient pictorial representations of any of them, it is impossible to do more than conjecture concerning their form and musical compass in early times. It may be assumed, however, that during the period covered by the OT history (from about 1300 B.C.) there was a distinct musical development, especially of the wind and stringed instruments. The only authentic pictures of Jewish instruments known at present are those of the citterns on certain late coins, probably not older than the time of the Jewish rebellion against the Romans in 68-70 A.D., and those of the later form of trumpet on the arch of Titus (79-81 A.D.). There is every reason to believe that the art of music among the early Hebrews was essentially the same as that of the Egyptians and the Assyrians, of whose musical performances there are many representations. These may be used quite legitimately, therefore, to illustrate the character of the ancient Hebrew instruments.

We begin with instruments of percussion. (1) The most primitive Hebrew instrument was perhaps the

3. Instruments hand-drum or *tōph*² (EV 'tabret' or of percussion. 'timbrcl'). This was simply a ring of wood or metal, covered with a tightly drawn skin, occasionally provided with small pieces of metal hung around the rim, exactly like those on the modern tambourine, of which the *tōph* was the prototype. The instrument was held up in one hand and struck with the other, as may be seen from the accompanying illustration (fig. 1) of an Egyptian woman playing it. Both Egyptians and Assyrians seem to have had, as well as the *tōph*, a drum which was supported against the performer by a belt and beaten

¹ Cp Heb. מִמִּימ (Ar. *uatar*), Ps. 459 1504, 'strings of a musical instrument,' properly 'bow-strings.' [The correctness of MT, however, is not beyond doubt. See PIPE.]

² הָךְ, from תָּפַח, 'to strike'; Ar. *duff*; Gk. *τύπανον*. הָךְ in Ezek. 2813 probably means the setting of a jewel (cp Cornill); on תָּפַח Job 176 where AV finds a 'tabret,' see Budde, *H106*, 89.

MUSIC

with both hands (fig. 2). Among the Hebrews the hand-drum was played chiefly by women, but sometimes by men (1 S. 10:5). It was used at festivities of all sorts—e.g., at weddings (1 Macc. 9:39), in public processions (2 S. 6:5)—as well as in ordinary song (Gen. 31:27). It was also employed in religious music of a joyous and

FIG. 1.

FIG. 2.

popular character (Ex. 15:20 Ps. 81:2), but probably not in the Jerusalem temple worship, as it is not mentioned in 2 Ch. 5:12 f., where we should expect to find it along with the cymbals.

2. The cymbals (*mšālāyīm*, מְשָׁלָיִים; AV and RV 'cymbals'; Gk. *κύμβαλα*) which were used in the temple to mark time (Ezra 3:10) were bronze discs struck together by the performer (Jos. *Ant.* vii. 12:3). They must have had outside handles. Whether they were sometimes bell-shaped like those on the Assyrian reliefs (fig. 3) it is of course impossible to know. The late Hebrew tradition asserts, perhaps correctly, that cymbals

FIG. 3.—Eastern Cymbals.

were used in religious worship in David's time (1 Ch. 25:16). The *šēšēlīm*, שֶׁשְׁעֵלִים (2 S. 6:5; *šēšēlē-shēma'*, Ps. 150:5, AV 'loud cymbals'; RV 'high sounding cymbals'), were probably the same instrument, although some scholars translate this word in Ps. 150:5 'castanets.'

2 Finger-castanets like those now in use among the Arabs (fig. 4) may have been employed by the Hebrews to accompany their popular dances; but there seems to be no word in the OT to denote the instrument.

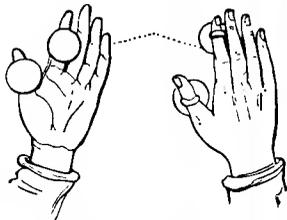

FIG. 4.—Arab Castanets.

3. *Mēnā'anē'im*, מְנַאֲנְעִים; (*κύμβαλα*, 2 S. 6:5; RV 'castanets'; AV 'cornets'), were probably an instrument for shaking, like the *sistrum*⁴ (Gk. *σείστρον*), which among the Egyptians consisted of an oval frame with iron rods lying loosely in holes in the sides. Rings were suspended from the ends of these rods and a handle supported the whole (fig. 5). These *sistra* were used in Egypt in religious services, and especially at the Isis dances (Juvenal, 13:93 f.). The Hebrew *mēnā'anē'im* were very probably similar to the Egyptian *sistra*, if not exactly like them.

4. The correct translation of the name of the fourth and last Hebrew instrument of percussion, *šālīšīm* (שָׁלִישִׁים, *κύμβαλα*, 1 S. 18:6; EV 'instruments of music'), is more difficult to determine. The etymology shows plainly that they were in some way connected with the numeral three. It has been conjectured, and it seems

¹ From שָׁשׁ, 'to jingle, clash.'

² Jahn, *Haust. Alt.* 1, 105; Pfeiffer, *Musik d. Hebräer*, 55.

³ *Pilpel*, participle of שָׁן, 'to shake.'

⁴ So RVmg., 2 S. 6:5, and Vulg.

MUSIC

likely, that they belong to the same class as the *sistra* and resembled the modern triangle,¹ being made of metal, but hung with rings and shaken instead of being struck with a metal bar. The only objection to this view is that there is no proof of the existence in the ancient East of triangular instruments of percussion. According to Athenæus (*Deipn.* 4:175), instruments for

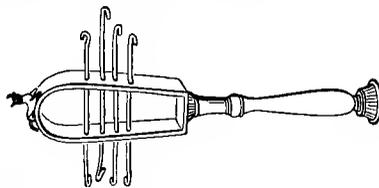

FIG. 5.—Egyptian Sistrum. From SBOT (Eng.) *Psalms*.

shaking like the *sistra* came to Greece from Syria, and were used, as in some modern European regiments, for military field music. Nowack supposes, with little foundation, that the *šālīšīm* were cymbals with three parallel bars (*HA*, 273).² That they were triangular harps like the Gk. *τρίγωνος*³ is also unlikely, because the context leads us to suppose that they were instruments of percussion. Luther's rendering *Geige*, 'viol,' is impossible, as there were no bowed instruments in early times.

Of wind instruments we may take first those of the flute class. (a) Of these the most ancient was probably

4. **Wind instruments: flute class.** The Hebrew flute was originally made of reed, but afterwards

of wood bored through—e.g., of box, lotus, laurel—and later even of ivory and metal. There were many varieties of this instrument in use among the Assyrians, the Egyptians, and the Greeks. Some flutes were played either like the modern Arab flute (fig. 6), or as a flageolet with a mouthpiece

FIG. 6.—Arab Flute. From SBOT (Eng.) *Psalms*.

of wood or metal like that of a whistle. This was the case, for example, with the Egyptian and the Assyrian double flute (fig. 7) still used by Palestinian shepherds; but other varieties like the Egyptian long flute (fig. 8) were played obliquely through a lateral blow-hole. Flutes varied greatly in length, tone, and number of finger-holes. The most primitive instruments had probably only two or three holes; but the later flutes seem to have had seven, covering the entire octave. It is uncertain whether the

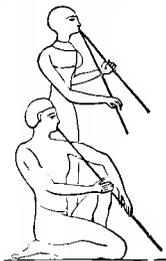

FIG. 7.

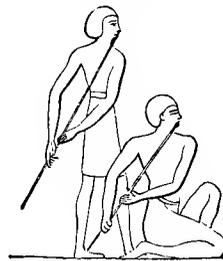

FIG. 8.

hālil was a single straight pipe, a double flute, or a genuine horizontal or oblique flute. In fact, the word may have been applied as a generic name to these three kinds of instrument.

¹ See RVmg., 'triangles,' 'three-stringed instruments'; Vulg. *in sistris*.

² ⚭ and Pesh. make them a sort of cymbals.

³ Haupt, 'Psalms,' *SBOT* (Eng.), 233.

⁴ But see Baethgen, *Psalmen*, 11.

The *hālil* was essentially peaceful. It was used at feasts (Is. 512), festal processions (1 K. 140), pilgrimages (Is. 3029), and to accompany dancing (Mt. 1117). Besides this, it was the characteristic instrument of mourning (Mt. 923).¹ Even the poorest Hebrew had to have two flute-players and one hired female mourner at his wife's funeral.² There were probably no flute-players in the original temple orchestra, although the Talmud, referring to the Maccabean and later temple, states that from two to twelve flutes were used at the regular sacrifice.³ These were employed during the Passover and the following season, and also during the night services of the Feast of Tabernacles,⁴ when a flute was blown at the altar to repeat the final tones of the *Hālil*. The associations with the flute, however, were evidently quite secular, as Clement of Alexandria objected strongly to its use at Christian love-feasts on the ground that it was a worldly instrument.

The word *nékeb*, נֶכֶב (Ezek. 2813; EV 'pipes'), is probably not the name of a variety of flute,⁵ but a technical expression for a jewel setting or box.

(b) The '*ūgāb*'⁶ (AV 'organ,' i.e., 'pan's-pipe'; RV 'pipe'), and the *mašrōkitha*⁸ (only Dan. 357 10 15; EV 'flute'), were in all probability one and the same instrument—some development from the double flute, such as a mouth-organ or pan's-pipe,⁹ the favourite pastoral instrument, which consisted of from seven to nine reed pipes of varying lengths and thicknesses tuned in a simple scale. This is the traditional interpretation of '*ūgāb*'. The word seems to be used in Gen. 421, however, as a generic term for all wind instruments. If this is so, it may have been applied later especially to the pan's-pipe, which, strangely enough, was the parent of the most elaborate modern instrument, the pipe-organ, a nearer approach to which may have been reached in the *magrēphah* of the Herodian temple.

The *magrēphah* seems to have been a pipe-work with bellows of elephant's or bull's hide and a wind-box with ten openings, into each of which was fitted a pipe with ten holes, so that it was possible to obtain from it one hundred distinct tones.¹⁰ Unfortunately, the accounts regarding this instrument are so contradictory that but little can be known about it definitely. Thus, according

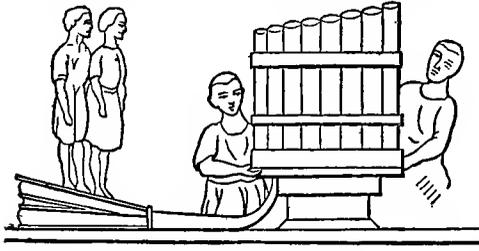

FIG. 9.—Primitive Pipe-Organ.

to some, it was small enough to be moved about by a single Levite, whilst others state that its thundering tones were audible on the Mount of Olives. This has caused some scholars to doubt its existence altogether. It is very likely, however, that wind-organs were known before the discovery by Ctesibias about 250 B.C. of the hydraulic organ. There is nothing improbable in the idea that such a wind instrument might have

⁸ *W*, in Ps. 150, שָׂרָקָה, *Jer. organum*, Judg. 5 16, probably refers to the piping of a flute, syrinx, or bagpipe (שָׂרָקָה, *W*, ὄργανον) not 'beatings.' שָׂרָקָה, *Jer.* 18 16, however, means 'object of hissing.'
⁹ *ἄγκυρα, fistula Panis*. ¹⁰ *Arākh*. 10 11 a.

been used in the later temple. The Hebrew name *magrēphah*, which means 'a fork' or 'tined shovel,' would seem to be due to the form of the instrument, the pipes of which were thought to resemble tines. How it was played cannot be determined; but of course it had no keyboard,¹ which was a very late development. The accompanying illustration of a primitive pipe-organ (fig. 9) is copied from the Constantinople obelisk erected by Theodosius, who died in 395 A.D.

The '*ūgāb*' was essentially an instrument of joy (Job 21 12 30 31), and was used in praise services (Ps. 150 4). It was probably not a bagpipe as one tradition makes it. This would have been too secular for use in the worship of Yahwē. The modern Jews call pianos *mashrokiten*.

(c) The last example of flute-like instruments is the *sumpōnyā* of Dan. 3 5 15, incorrectly translated 'dulcimer'² by EV (see BAGPIPE). *Sumpōnyā* is an Aramaic loanword from the Gk. συμφωνία, which in later Greek may have been used to denote the ancient bagpipe,³ an instrument whose form possibly resembled the modern Spanish *zampoña* (Ital. *sampogna*), the name of which is clearly a derivative from συμφωνία. It was probably a goatskin bag with two reed pipes, the one used as a mouth-piece to fill the bag, which in Roman times had a *porte-vent* to relieve the strain on the player's throat, and the other, employed as a chanter-flute with finger-holes. The Arab bagpipe *ghaita*, also used in Spain, has seven finger-holes. The combined chanter mouthpiece and the three drones of the modern Scotch war-pipe are of course a peculiarly national development. It has been suggested that *sip(ō)nyā* Dan. 3 10, undoubtedly used of the same instrument *sumpōnyā*, may be derived from the Gk. σίφων, 'tube, pipe,' and may thus be the correct form of the word.⁴ It is much more likely that *sifonyā* merely represents an Aramaic mispronunciation of συμφωνία. The whole question is doubtful, because συμφωνία in classical Greek meant a concord or unison of sounds (cp Lk. 15 25),⁵ and appears only in the later language in the sense of a special musical instrument.⁶ It is not likely that the συμφωνία was a sistrum.⁷

The bagpipe was popular in Rome (under the Emperors), where it was called *chorus* or *tibia utricularia*.

Of instruments of the trumpet class two are mentioned in the OT, (a) the *shōphār*, שֹׁפָר, 'horn' (EV 'trumpet, cornet'), and (b) the *hāšōšerāh*, חֲשֹׁשֶׁרֶת (EV 'trumpet').

(a) *Shōphār*.—Synonymous with the *shōphār* was the *hēren*, קֶרֶן, 'horn' (Josh. 6 5 1 Ch. 25 5). The *hēren* was primarily a simple ram's-horn (Josh. 6 4 ff.), and according to the Talmud was crooked in shape. In later times, however, *shōphārōth* seem to have been made of metal⁸ and straightened. This caused them to be confused with the *hāšōšerāh*, which was essentially the priestly instrument. The primitive *shōphār* is still to be seen in the Synagogue ritual horn (fig. 10), which is the oldest form of wind instrument in use to-day.⁹ The early *shōphārōth*, however, were used chiefly for secular purposes

—e.g., by watchmen (Am. 36), for battle alarms (Judg. 327), in assemblies (1 S. 133 ff.), and at coronations (2 S. 1510)—although in very ancient times they were employed also in ritual; thus, to announce the Jubilee (Lev. 259), which takes its name from the instrument,¹ and at the approach of the Ark (2 S. 615).

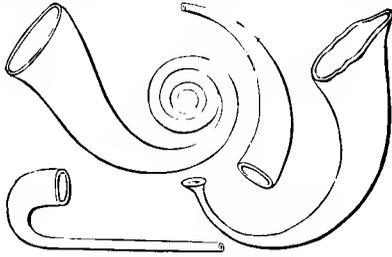

FIG. 10.—Horns and curved Trumpets

(b) The *hūsōsērāh* was a straight metal trumpet (*tuba*), according to Josephus (*Ant.* iii. 126), nearly a yard long, and but little wider than a flute, with an embouchure and a slightly flaring bell-like end. On the relief of the Arch of Titus two trumpets of this sort are shown leaning against the golden table of shewbread (fig. 11). The use of the *hūsōsērāh*, in distinction from that of the *shōphār*, was almost entirely religious. In fact, during the time when the post-exilic temple flourished, *hūsōsērōth* might be blown only by priests. Thus, there were in the temple two silver trumpets, which were

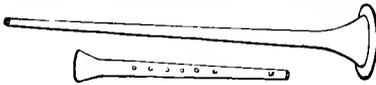

FIG. 11.—Straight Trumpet and Pipe.

sounded especially to announce festivals (Nu. 102 316), and according to the Talmud two priests stood in the temple hall blowing trumpets when the drink-offering was presented (cp Ecclus. 5016 ff.). One hundred and twenty priests are said to have blown *hūsōsērōth* in Solomon's temple (2 Ch. 512). A secular use of the instrument, however, is mentioned in Hos. 58, where it is to be blown as a war-signal, and in 2 K. 1114 and 2 Ch. 2313, according to which it would seem that *hūsōsērōth* were blown also by laymen. It is possible that the instrument referred to in these passages was not the priestly *hūsōsērāh*, but the straight later form of the *shōphār*, which, owing to its similarity of shape, might have been confused with the religious instrument.

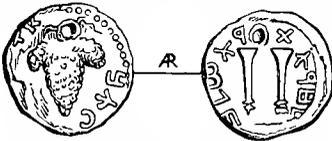

FIG. 12.—Trumpet on Jewish Coin. From *SBOT* (Eng.) *Psalms*.

A coin, dating from the reign of Hadrian (131-135 A.D.), shows an example (fig. 12) of this trumpet, which was probably used in war. It will be noticed that these trumpets differ considerably in form from the sacred *hūsōsērōth* of the Arch of Titus. It would appear, however, from 1 Macc. 440 533, that the later Jews also used trumpets in worship, either the straight war instrument or the real *hūsōsērāh*.

Neither form of trumpet was, properly, a musical instrument, as both were used merely in signalling or in connection with other instruments to augment a joyous uproar of the people, not to accompany any melody (Ps. 936 1503). They were essentially instru-

¹ See Josh. 65 Lev. 2513; cp JUBILEE.

ments of *tērū'āh*, noise. Three distinct methods of blowing them are recorded: *tāka*, 'in blasts'; *māsāk*, 'sostenuto'; and *hērā'*, 'with vibrating tones.'¹

Stringed instruments may be divided into two classes: harps, on which the strings are strung perpendicularly or obliquely from a sound-frame either above or below them, and lyres and lutes, on which the strings run horizontally, generally lengthwise across a sound-body. Only three stringed instruments are mentioned in the OT, the *kinnōr* and the *nēbel* (§§ 7-9), and the *sabbēkhā* (§ 10), of which the first two were native and the last foreign. On 'Neginoth' (EV 'stringed instruments') see special article.

There can be no doubt that the very earliest Semitic and Egyptian stringed instruments were always either swept or plucked with the fingers. Later, however, as may be seen from the monuments, use was made of a plectrum. This was probably made at first either of wood or of bone, but subsequently of metal. Although there is no direct proof of the use of such a contrivance by the Hebrews, there is no reason to doubt that it was known to them. It is scarcely necessary to remark that bowed instruments were a very late development, and are not mentioned in the OT at all.²

The Hebrew musical strings were probably generally of gut, and hardly ever of metal as in the modern Arab lutes. The statement in 2 S. 65 that the wood of which the Jewish instruments were made was cypress seems to depend on a textual error;³ but in 1 K. 1012 2 Ch. 911 it is recorded that Solomon had harps and psalteries made of sandal-wood (EV ALMUG, ALGUM TREES, *q.v.*). This was very likely imported from India and Ethiopia.

There is some confusion as to the exact nature of the *kinnōr*⁴ and the *nēbel*,⁵ and as to the distinction between them, one instrument being apparently

7. Psaltery and harp. sometimes called by the name of the other. The *kinnōr* (and its synonym *kithāris*,⁶ Dan. 35 ff.) is translated 'harp' by EV, whilst the *nēbel* (and its equivalent, *pesantērīn*,⁷ in Dan. 35 ff.) is called by EV 'psaltery,' except in Is. 1411 Am. 523 65, where *nēbel* is rendered by 'viol' (in Is. 512 AV 'viol,' RV 'lute.')

The two instruments represented on the late Jewish coins (fig. 13) mentioned above strongly resemble the Greek lyre and cittern, which were closely allied to each other.⁸ In the former the frame is square, the body oval, and there is a kettle-shaped sound-body below. In the latter the sides of the frame are curved and connected across the top by a bar, which supports the upper ends of the strings. The sound-body, as in the lyre, is below, but is vase-shaped. This resemblance to the Greek lyre and cittern is, of course, striking, but is in itself no proof that the instruments figured were essentially Greek not Jewish. So conservative a people as the later Jews would never have depicted instruments which did not resemble very strongly those in use in their own worship at the time, and they would certainly not have used foreign instruments in their services. The number of strings on both instruments

¹ Cp on the ancient trumpet, Ambros, 492.

² In spite of AV in Is. 512.

⁴ כנור, ἑ κithāra, but in 1 S. 1623 κυθώρα. Also Josephus. ⁵ כנור, ἑ ψαλτήριον in Ps. 813.

⁶ בכל, ἑ ψαλτήριον; but once, κithāra (Ps. 813), and in Am. 523 65 ὄργανον.

⁷ קיתרה, a loan-word from κithāris. Not קיתרה as in MT. The *Ḥerē* changes it to the usual קתים of the Targums.

⁸ The form פסנתרין with ט in Dan. 37 is really more correct than פסנתרין with ת in 35, as in Aramaic and late Hebrew ת generally represents θ and ט = τ; cp תאמרון=θέατρον; but we do find תרניה=τράγμηα (see Strack, *Neuheb. Gr.* 13, § 6). Cp DANIEL [BOOK], § 11.

⁸ *Lyra* and *kithāra*. The latter must not be confused with the German *zither*. The name guitar is a derivative from *kithāra*. The guitar itself is a development of the lute.

MUSIC

seems to vary between three and six. It is impossible to determine definitely which of the instruments figured is the *kinnôr* and which is the *nêbel*, or whether they are

FIG. 13.—Cittens on Jewish Coins. From *SBOT* (Eng.) *Psalms*.

both varieties of the one or the other; but the probability is, as will appear presently (§ 9), that they represent two sorts of *kinnôr*.

Any comparison of either *kinnôr* or *nêbel* with the many varieties of Assyrian and Egyptian

8. Their relation to foreign instruments.

of course, be purely conjectural, as we have practically only statements of the Fathers to guide us.

Augustine, Eusebius, and Hilary distinguish between an instrument with a drum-shaped sound-body below, with the belly turned downwards (*kinnôr*), and an instrument with a sound-frame above, which covered the ends of the strings (*nêbel*).

Jerome compared the shape of the *nêbel* to a Δ , and in his explanation of Ps. 332 also mentions the difference in the position of the sound-body. Of course the Church Fathers could have known only the late form of the Jewish instruments which had come under Greek and Roman influence; but it is highly improbable that the fundamental character of the instruments had changed materially, except, possibly, as to size and the number of the strings.¹

These descriptions certainly seem to show that, in the form in which the Fathers knew the instruments, the *kinnôr* was a lyre and the *nêbel* a pure harp.

FIG. 14.—Egyptian Lyre.

Whatever the character of the *kinnôr* may have been, the class of instruments which it represented was certainly very ancient, as its invention is attributed to

¹ The theories of the later Jews are not trustworthy.

MUSIC

Jubal in Gen. 4:21 (see *CAINITES*, § 11). The constant translation of *kinnôr* by *kithara* (lyre), as well as the descriptions of the Fathers, makes it highly likely that

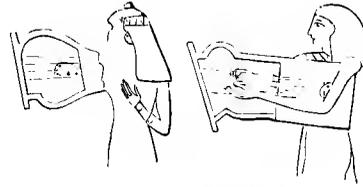

FIG. 15.—Later Egyptian Lyre.

the instrument belonged to the lyre class. It was certainly not a lute,¹ although the lute is a development from the primitive lyre.

The oldest form of the lyre appears on an ancient Egyptian relief (fig. 14), showing the peaceful immigration into Egypt of a family of Semitic Bedouins during the twelfth dyn. (see *JOSEPH* ii., § 8, col. 2591, and col. 19, n. 2). One of the immigrants is carrying a rudely-formed stringed instrument, consisting of a long four-cornered board, the upper part of which is cut into a four-cornered

FIG. 16.—Semitic captives playing Lyres. From a slab in the British Museum.

frame, on which are strung seven or eight strings, all of equal length, running parallel to the long sides of the board. The player carries the instrument braced against his body horizontally and plays it with a black plectrum. His left hand is pressed against the strings, probably in order to secure the correct tone by damping them. This ancient representation of the lyre shows that it must have been originally a Semitic instrument, although the Egyptians developed it still further, as may be seen from the accompanying illustration of one of their later lyres (fig. 15).

An interesting illustration of a Hittite lyre appears on a relief slab now in the Metropolitan Museum, New York (see Humann and Puchstein, *Reisen in Kleinasien u. Nordsyrien*, Pl. xlvii. fig. 2).

The Assyrian horizontal harp, which was played in exactly the same manner, but was essentially different in form, must not be confused with the lyre.

The *kinnôr* was probably the Hebrew form of the lyre, and this view is strengthened by an examination of the interesting relief (fig. 16) showing an Assyrian warrior guarding three Semitic captives, playing on

¹ The translators of the Arabic version of the London Polyglot render כנור by *ʿunbūr* (*ʿinbār*), which is a stringed instrument of the lute species. They use also *el-ʿūd* (Port. *alaude*, Sp. *laud*, Eng. *lute*).

MUSIC

lyres held obliquely. The dress seems to indicate that they were Israelitish prisoners, possibly in the same unhappy condition as that of their Judean kinsmen (in later days), who are made to complain in Ps. 137 *ff.* that they had hung up their *kinnōrōth* in sad despair, because their captors required of them songs (cp, however, PSALMS, § 28, ix.). The instruments on this relief, like the lyres of the Jewish coins, seem to have four or five strings. Josephus states, however (*Ant.* vii. 123), that the *kinryra* (*kinnōr*) had ten strings and was played with the plectrum, whilst in 1 S. 16²³ we read that David played the *kinnōr* 'with his (own) hand,' which may mean simply that David himself and no other played the instrument. This does not imply that he did not use a plectrum. Jerome, commenting on Ps. 33², asserts that the *kinnōr* had six strings. The probability is that the earlier Hebrew stringed instruments were much simpler in construction, and had fewer strings, than the later forms. That there was a distinct development of the Greek lyre and cittern may be seen from the fact that the lyre had originally only four strings (Diod. 3:16), but later seven (*Eur. Iph. in Taur.* 1129), whereas the cittern, since Terpander's time (700-650 B.C.), had seven strings (*Eur. Ion.* 881), which were afterwards increased to eleven (*Suidas, s.v.* 'Timotheos').

The cittern (*kithara*) mentioned in 1 Macc. 454 may have been the *kinnōr*.

The idea that the *nēbel* was a sort of lute¹ with convex belly, in distinction from the *kinnōr*, which was supposed to be a harp, arose from the meaning of the Hebrew word *nēbel*, 'water-skin, jug,'² which would seem to imply that its sound-body was shaped like a vessel of this sort, as is the case with the citterns on the Jewish coins. This meaning of *nēbel* might also indicate that the chief part of its sound-body was an animal membrane (?). It is much more likely, in view of the testimony of the Fathers, that the *nēbel* was a harp-like instrument, a fair idea of which can be got from the representations of the Assyrian portable harp (fig. 17), although the sound-frame of the *nēbel* may have been shaped

differently from that of the Assyrian instrument. Furthermore, the Δ shape of the *nēbel* mentioned by Jerome agrees with the appearance of the Assyrian harp. Jerome's statement may have been due, however, to a confusion of the *nēbel* with the Gk. *τρίγωνος*.

Varro's name for the *nēbel*-psaltery, *ortho-psallium*, 'erect stringed instrument,' shows plainly that it could not have been a lyre, which was played in an oblique or horizontal position. As both *nēbel* and *kinnōr* were portable instruments (1 S. 10:5 2 Ch. 20:28) the *nēbel* could scarcely have been the same as the great bow-shaped Egyptian standing harp (fig. 18). Harps of all sizes³ were in use among the Assyrians and the Egyptians, and there is no reason to doubt that many varieties were used also by the Hebrews.

¹ The Jewish tradition that the lute was David's favourite instrument is based on a misinterpretation of Am. 6:5 (see DAVID, § 13, n. 3).

² The etymology is uncertain. Gk. *νάβλα, νάβλας, νάβλιον*, are simply Semitic loan-words. There is no reason to suppose that *nēbel* is a loan-word from Eg. *nfr*, 'lute' (We. 'Psalms, SBOT [Eng.] 222, n. 8).

³ Cp the illustrations in Wellhausen, *SBOT* (Eng.) *Psalms*, 224-232.

FIG. 17.—Assyrian Harp. From a slab in the British Museum.

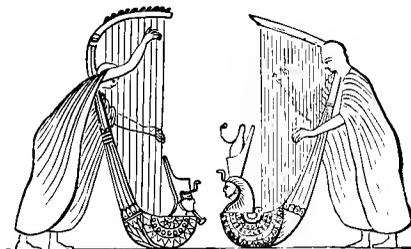

FIG. 18.—Egyptian standing Harp.

tally over a flat, dish-shaped sound-body. The Assyrian artist could not represent this properly, owing to his ignorance of the laws of perspective. This instrument was probably the predecessor of the Arab *sanfir*, which some expositors have sought to identify as a form of the *nēbel*. The *sanfir* has now practically given place to the kindred *kānūn*. The twenty-stringed Greek *magadis*¹ and the forty-stringed *epigoneion*² were developments from some earlier instrument of the dulcimer-*kānūn* class. The psaltery of the later Greeks,³ which was an instrument of the same sort, survived in a somewhat modified form into the Middle Ages under the same name, and is found to-day in the Hungarian *czimbal*.⁴ This mediæval psaltery or dulcimer (fig. 20) was the instrument known to the translators of the AV.⁵ One form of it, the *testa di porco*, was triangular, a fact which, probably owing to Jerome's giving this form to the *nēbel*, seems to have caused some confusion. Of course, it is not quite impossible that the *nēbel* may have been something like the Assyrian dulcimer; but such an idea is in direct contradiction to the descriptions

FIG. 19.—Assyrian Dulcimer.

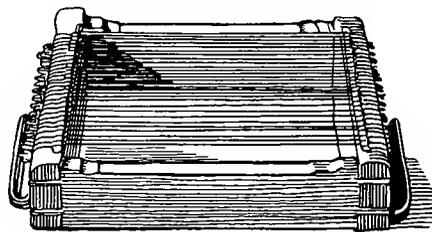

FIG. 20.—Mediæval Psaltery or Dulcimer From *SBOT* (Eng.) *Psalms*.

of the Fathers, and could be only feebly supported by the meaning of the name when not applied to a musical

¹ Not to be confused with the Lydian flute of the same name.

² See Ambros, *l.c.* 474.

³ The instrument, whose tone-changes are alluded to in Wisd. 19:18, was probably the Greek psaltery.

⁴ See Wetzstein; Del. *Isaiah*⁶⁰, 703.

⁵ The *ceballo* of Boccaccio and the *santrie* of Chaucer (cp Wasiliewski, *Gesch. d. Instrumental-musik im 16ten Jahrhundert* [1878], 78 *ff.*).

nstrument. At first, the *nēbel* may have had only a small number of strings, like (fig. 21) the Babylonian harp (five); but, as its musical possibilities became apparent, the number was increased. Josephus asserts (*Ant.* vii. 123) that the *nēbel* of his time had twelve notes and was played *with the fingers*. This latter statement certainly seems to confirm the theory that the *nēbel* was a harp, as it would have been difficult, if not impossible, to get a satisfactory effect from an instrument of the dulcimer species without a plectrum. In Ps. 33 we find mention of a *nēbel* with ten strings. The perfected Assyrian harp had sixteen strings (two octaves), which would cover the range of the ordinary human voice.

FIG. 21.—Babylonian Harp. From *SBO T* (Eng.) *Psalms*.

Athenæus (4175), quoting from Sopatros, gives an obscure verse from which some have sought to show that the *nēbel* was a pipe or flageolet. The allusion, which is to a pipe-shaped part of the instrument, probably refers merely to the hollow curved sound-body.¹

It is quite possible that *kinnōr* and *nēbel* may have been generic names, the former for all instruments of the lyre class, and the latter for all instruments of the harp class.

Although the lute does not appear in the OT as a

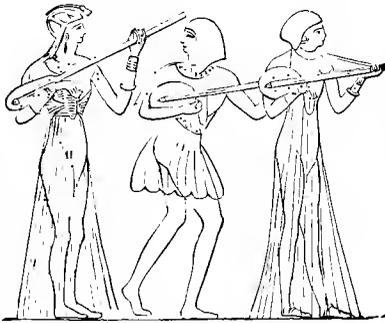

FIG. 22.—Egyptian Stringed Instruments.

native instrument, there is every reason to believe that the Hebrews knew and used it, as it was well-known both to the Assyrians and to the Egyptians in practically the mediæval form (fig. 22). The modern Arab lute came from Persia, although the Arabs attribute its invention to Pythagoras. It is highly probable that the lute was brought to Persia from Assyria or Egypt.² Its convex gourd-shaped belly is an indication that its sound-body may have been originally a membrane drawn across a gourd like a drum-head.

Neither *kinnōr* nor *nēbel* was used for mourning;³ their use was always on joyous occasions (Gen. 31 27 Is. 248), as at feasts (Is. 512) and at all kinds of religious services (Ps. 33 434). The instruments are named together in nearly every passage referring to the national worship (2 Ch. 29 25 Ps. 92 108 2 150 3). The *kinnōr* was undoubtedly more generally used, as it is mentioned in the OT 44 times and the *nēbel* only 27. The use of these two instruments may be compared to that of the *shōphār* and the *hāsōsērah*. The *kinnōr* had certainly the more secular character of the two, as Is. 23 16 implies that it was a favourite instrument of harlots. Of course it was also very extensively used in religious services, as

¹ An exhaustive treatise on *kinnōr* and *nēbel* will be found in Riehm, *HVB*(3), 1028 ff. (2) 1042 ff.

² Cp Ambros, 112 ff., who ascribes to Cambyses its introduction from Egypt into Persia.

³ Cp Ps. 137 2 Job 30 31. It is interesting to note that Jer. 48 36, repeating Is. 16 11, changes *כִּנּוֹר* to *חָלִיל*.

the above passages show. The *nēbel* on the other hand, like the *hāsōsērah*, seems to be the more solemn instrument, devoted exclusively to religious use (Am. 5 23 Ps. 141 9); in fact, it was a desecration to sing popular melodies to its accompaniment (Am. 6 5 Is. 14 11). Another difference appears to be indicated in 1 Ch. 15 20 ff., which points out that the *nēbel* was used to accompany song in the higher notes (*ālāmōth*) and the *kinnōr* in the lower tones (*shēmīnīth*). *Ālāmōth* means 'girls,' and the statement here may imply that the strings of the *nēbel* were tuned as high as the tones of the female voice. In Ps. 46 1, Gratz's rendering of *עַל עֵלְעַל*, 'with a *nabla* in the Elamitic form'¹ has little to support it. That high-pitched instruments should be spoken of as similar to female voices (see *ALAMOTH*) has an exact parallel in the Greek description of the shriller flutes *γυναικῆοι παρθενικοί αὐλοί*. It is of course unnecessary to assume that the *nēbel* was used only to accompany women. The word *ālāmōth* might have been used as a general term for high tones like those of women and could thus have been applied equally well to male falsettos or tenors. *Al shēmīnīth* may mean in this connection 'according to the eighth' and indicate that *kinnōrōth* were tuned an octave lower. Other renderings of *shēmīnīth* are 'eight-stringed instruments,'² or 'in the eighth mode.'³ This last translation is very doubtful, as we know nothing of the ancient Semitic musical modes. [To these difficult terms we return in special articles, from a text-critical point of view; see also conspectus of new explanations in *PSALMS* (BOOK), § 25 f.]

The *šabbēkhā* (שַׁבְּכָה [Gi. Bā. 4], Dan. 3 5 7 10 f) was not a Hebrew instrument (EV 'sackbut'); it was probably of Syrian or late Egyptian origin. It seems to be the same as the Greek *σαμβύκη* (Latin *sambuca*), which was a sharp-toned triangular musical instrument with four strings, according to Strabo (471) of 'barbarous' origin. It was said to resemble a military siege-instrument of the same name.⁴ It is possible that the *σαμβύκη* was originally Egyptian and came into Syria under the Seleucids, which would account for its appearance in Daniel. Riehm suggests⁵ that it may have been the same as the lute-shaped Egyptian hand-harp, which was a hybrid creation with a lute belly (fig. 23), but strung as a harp. Its shape agrees with the statements regarding the *σαμβύκη*.

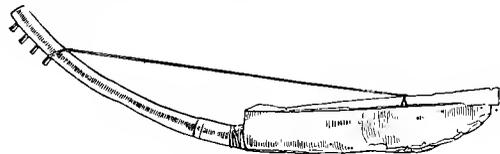

FIG. 23.—Egyptian lute-shaped hand-harp. From the British Museum.

The expression *k'lē šīr*, 'instruments of song,'⁷ which occurs in several passages of the OT as a general

11. **Orchestra.** term for all kinds of musical instruments, shows plainly that the ancient

Hebrews used instrumental music solely to accompany singing. Indeed, the idea of independent orchestration is a comparatively modern development. In very early times, songs were accompanied only by tambourines beaten by women (Ex. 15 20 ff.); but in later days we find various combinations of the Hebrew musical instruments. Thus, in 2 S. 6 5, strings,

¹ *Psalmen*, 85. He thinks (71) that *ālāmōth* cannot mean *vox virginea*, because it refers not to voices, but to instruments (?). Instruments were used, however, only to accompany voices.

drums, and cymbals, augmented by instruments for shaking.

The accompanying illustration (fig. 24) of an Assyrian quartet of two lyres, a drum, and cymbals should be compared here. On a relief of an

FIG. 24.—Assyrian Quartet. From *SBOT* (Eng.) *Psalms*.

Assyrian orchestra (fig. 25), dating from the time of A-ur-bāni-pal (668-626 B.C.), there are seven portable harps, one dulcimer, two double flutes, and a drum, all played by men, but accompanied by women and children clapping hands to mark time. One woman is evidently singing in a very shrill tone, as she is compressing her throat with her hand just as Oriental women

FIG. 25.—Assyrian Orchestra. From a slab in the British Museum.

do to-day, in order to produce a high *tremolo*. In a similar representation of an Egyptian band, we note a large standing harp, a lyre, a lute, an oblique shoulder harp, and a double flute, all played by women, and only one woman clapping her hands (fig. 26). The Assyrian band is marching to greet the victorious monarch; but the Egyptian orchestra is stationary. These illus-

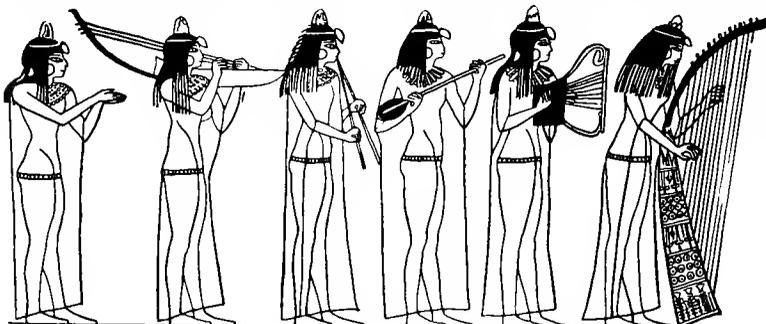

FIG. 26.—An Egyptian Band. From *SBOT* (Eng.) *Psalms*.

trations show combinations of various stringed instruments with wind and percussion; but in both instances the only wind instrument is the double flute. Analogous to these combinations are the harp, timbrel, flute, and lyre (*nēbel*, *tōph*, *hālil*, and *kinnōr*) of 1 Sam. 10₅ (a

band of prophets) and Is. 5₁₂ (at table). Although the combination of flutes and strings is mentioned only rarely in the OT, there is no reason to think that it was unusual.

We must suppose that nearly all the performers in these Assyrian and Egyptian representations are singing and accompanying themselves (except of course the flute-players), a fact which the artist did not represent except in the case of one member of the Assyrian full band. The use of trumpets with other instruments does not appear until quite late (2 Ch. 5_{12 ff.} 20₂₈ 29_{26 ff.}), and then they were employed only in the pauses of the song.

It is of course impossible to state anything definite regarding the origin of the music of the Hebrews.

According to their own tradition, instrumental music was invented by Jubal (see *CANTITES*, § 11), who was the father of all such as handle the lyre and the double flute (or pan's-pipe); all who played on stringed and wind instruments (Gen. 4₂₁). In early times such instrumental music as there was—songs accompanied by the hand-drum, flute, or simple form of lyre—was probably purely secular, used as it is today among the Bedouins at pastoral merry-makings (Gen. 31₂₇ Job 21₁₂). The Hebrew, like all other primitive music, stood in the closest relation to poetry, as may be inferred from the mention of musical accompaniment to song (Ex. 15₂₀ 1 S. 18₆). It was used extensively at festivities, but does not escape the severe condemnation of the prophets (Am. 6₅ Is. 5₁₂). In the Greek period the popularity of secular music appears to have greatly increased (Ecclus. 32₄₋₆), nor can this be unconnected with the Hellenising movement among

the Jews. According to Josephus, however (*Ant.* xv. 8₇), it was Herod the Great who first introduced Greek songs accompanied by instruments.

Of the music in use at Canaanitish shrines we know absolutely nothing. Without some notion of that, however, we cannot continue to speak positively as to that used at the Israelitish sanctuaries. All that the OT

gives us is a few hints respecting the use of music for religious purposes in the prophetic schools (1 S. 10₅ 19₂₀). This suggests a native Israelitish musical movement which may have combined with outside influences to produce a ritualistic musical service of unnecessary elaborateness. The development of the temple music cannot be here described. There was no doubt a period

in which Babylonian influence counted for something, and another in which Greek influence profoundly modified the earlier system (see *PSALMS* [BOOK], § 9, ii.). All that we are concerned to maintain here is that the development was continuous. We may conjecture that

the only music originally enjoined by the Hebrew ritual was the blowing of trumpets by priests at the new moons (Lev. 23²⁴ 25⁹) and at feasts; but we may be sure that in the royal sanctuary at Jerusalem an orchestra of instruments would not be wanting. Whatever the pre-exilic musical system was, we know that it did not die out during the exile, for we find that a number of singers and musicians returned to Palestine with Zerubbabel (Ezra 2⁴¹ Neh. 7⁴⁴). We can also easily credit the statement that music enlivened the ceremony of the laying of the corner-stone of the second temple, and of the consecration of the city walls (Ezra 3¹⁰ ff. Neh. 11²² 12²⁷ ff.), and it is doubtless a historical fact that the rededication of the temple under Judas the Maccabee was celebrated with vocal and instrumental music (1 Macc. 4⁵⁴).

In studying the character of the ancient Hebrew music we are limited to conjectures based on our some-

13. Its character.

what uncertain data regarding the nature and the use of the instruments and of the temple ritual. That music was regarded as a noble art may be seen from Ecclus. 44⁵, where the composition of melodies is spoken of as a high accomplishment. Although the music was no doubt extremely crude from a modern occidental point of view, it certainly had considerable effect on the hearers (1 S. 16¹⁶ ff. 2 K. 3¹⁵). Most modern writers on this subject are liable to err in one of two directions. They either, like many Jewish Rabbins, exalt the character of early musical art in Israel, or they are too apt to dismiss it as a mere barbarous system. In much the same way the average occidental traveller of the present day is almost sure to undervalue from an artistic point of view the shrill unison singing of the Arabs. The probability is that the Hebrew music like that of the modern Arabs was rhythmical rather than melodious. The Arab tunes consist generally of well marked rhythmical cadences following a somewhat monotonous melody always sung and accompanied in unison. That unison singing and accompaniment was characteristic also of the ancient Israelites is seen from 2 Ch. 5¹³: 'and both the trumpeters and the singers were as one making one sound to praise and exalt Yahwè.' This simply means that the trumpets all played together on the same note at the proper pauses of the song and that the voices sang the air in unison. There can be no doubt that a modern well-balanced oriental chorus singing in unison, accompanied by strings, wood-wind, and percussion, has a powerful artistic effect even on a European listener, provided that he is sufficiently unprejudiced to lay aside for the moment his harmonic training and allow himself to be swayed by the quavering movement of the shrill but rarely untrue voices and instruments, accentuated by the ceaseless thrum of the tambourines. The character of the melody itself becomes quite secondary in such a case and only the general effect is felt. The Hebrew songs and psalms must have influenced the listener in much the same way as the modern Arab is affected by his music.

Harmony was as unknown to the ancient Israelites and Greeks as it is to-day to the Arabs, Turks, and

14. **Harmony.** Persians. Its beginnings are traceable, however, in melodies where the lower voices and strings dwell on the dominant or fifth, producing an effect like the drone of a bagpipe, while the higher parts render the air with striking distinctness and accuracy. European harmony began about the tenth century A. D.

We may suppose that the Israelitish choirs sang and played in octaves,¹ as the terms *'šlāmōth* and *šhēmīnīth*, mentioned already (§ 9), as referring respectively to the high and the low pitched instruments, would seem to indicate. It is probable that in the temple worship the higher vocal parts were taken by male falsettos and

¹ The strings of the twenty-stringed *magadis* were tuned in octaves. *Μαγαδίσειν* means 'sing in octaves.'

tenors, rather than by women, who do not appear at all in the temple service. The three daughters of Heman mentioned (1 Ch. 25⁵), are not meant to be included in the list of temple ministrants any more than are the singing women referred to in Ezra 2⁶⁵ (cp Neh. 7⁶⁷ 1 Esd. 5⁴²). The girls playing on tabors (Ps. 68²⁵) figured simply in a procession. The boy choir mentioned in the Talmud as standing below the main chorus is not referred to in the OT.

In spite of lack of harmony, the ancient Hebrew singing was not a mere monotonous cantillation. Excellent effects could, no doubt, be produced by means of antiphonal choruses which must have been used extensively both in the secular and in the religious music—thus, in secular music in 1 S. 18⁶ ff. Ex. 15²¹, and devotionally in the various antiphonal psalms (Pss. 20 21 118 136). The parallelism so common in the sacred poetry seems to point to such antiphonal usage. In many cases the psalms were sung by two answering choirs; both of which must frequently have united, however, in rendering the effective finale (cp Ps. 121). Both the Assyrians and the Egyptians probably sang airs of all kinds in this way.

The Christian hymns mentioned in the NT (see HYMNS), which were no doubt of Hebrew origin, were in all likelihood sung in the same manner (Eph. 5¹⁹ Col. 3¹⁶). In fact, we know¹ that the early Christians had an antiphonal system which still survives in the Gregorian and oriental psalmody.²

Very little can be stated with certainty regarding the character of the melodies themselves, as we have absolutely no specimens of them. Unlike

15. Melodies.

the later Greeks,³ the Semitic races never invented a system of musical notation whereby their airs could be recorded, and the modern oriental systems of this kind are few of them older than the seventeenth century of the present era. Nothing is known of the Hebrews' scale or modes except that, as stated before, their musicians must have been familiar with the octave which was a very ancient development in music. It was the basis of Terpander's scale of seven notes, and appears doubled at the time of Aristoxenus, the pupil of Aristotle, when a scale of fifteen tones was in use.

The Hebrew religious scale was probably diatonic, as Clement of Alexandria and Augustine both warned the faithful to avoid the heathen chromatic style of singing and advised them to return to the simple psalmody of David. It is clear, therefore, that they thought this to have been diatonic—*i. e.*, proceeding according to the signature of the prevailing key. They reasoned, no doubt from the accepted contemporary Jewish usage, which was probably diatonic. Clement likens the style of the current Hebrew music to the Greek Doric mode which Aristotle said was the only musical style giving perfect calm to the soul. The Doric and the Phrygian were minor modes and the Lydian was exactly equivalent to the modern major.

The most ancient connected specimen of music which we have is the famous Greek pæan to Apollo in the Phrygian scale of the Doric mode, which was discovered at Delphi in 1893 by the members of the French school of Archæology at Athens.⁴ The following few bars may prove of interest, as the hymn, which is in the regulation five-time peculiar to the pæan,⁵ is undoubtedly very ancient, although it may be doubted whether the air is as old as 277 B. C., the date of the establishment of the Soteria festival at which it was sung.⁶ The ode was accompanied by the flute and *kithara*.

On the various musical headings in the Psalms (cp 9 22 45 etc.), apparently indicating the name of melodies or styles according to which the respective poems were to be sung, see the commentaries [but cp PSALMS, § 26].

The modern synagogal tunes, although some of them may be ancient, can give us no clue as to the nature of the original temple music. They are regarded by all trustworthy authorities as a post-Christian development. Leyrer says of them that they are the echo of the spiritual death of the early music.² The following specimen may serve to give some idea of their general style:—

Finally, the cantillatory modulations represented by the accents are also of late origin. Of these there are three distinct styles; one for reading the Torah, one for the Prophetic books, and one for the Psalms, Job, and Proverbs. The accent-signs do not have the value of musical notes, but are simply a mnemonic rhythmic system intended to aid the reader in remembering melodies which he has already learned orally. These chants have become much changed in the course of time and vary in different countries.⁴

The following works give lists of the older literature:—Forkel, *Allgemeine Gesch. d. Musik*, I 173-184; Leyrer, *PKE*(²) 10 387-398; Ugolini, *Theol.* 33 G; also Ambros, *16. Literature. Gesch. d. Musik*; Benz, *HA* (1894); Brown, *Musical Instruments and their Homes* (N.Y. 1888); Del. *Physiologie u. Musik* (1868); *Psalmen*, 25 ff.; Ew. *Die Dichter d. Alten Bundes*(¹) 1 209 ff.; Now. *HA* 1 270-79; Pfeiffer, *Die Musik d. Alten Hebräer* (1779); Riehm, *HWB*(¹), 1028-45, (²) 1042-59; Saalschütz, *Arch. d. Hebr.* (1855); Schenkel, *BL* 4 250-264 (1872); We. 'Psalms' in *SBOT* (Eng.); Winer, *Bibl. Realwörterbuch*, 2 120 ff.; F. L. Cohen, 'Rise and Development of Synagogue Music,' *Anglo-Jewish Historical Exhibition Papers* (1888), 80-135. J. D. P.

MUSICIAN, TO THE CHIEF (לְמַנְצִיחַ); Θ εἰς τὸ τέλος; Aq. τῷ νικητοῦ; Sym. ἐπινοικός; Theod. εἰς τὸ νίκος; Jer. victori or pro victoria; Tg. אֲדָלָאֲדָא, 'ad laudandam').

The expression occurs in the headings of fifty-five psalms, and in the subscription of the prayer or psalm of Habakkuk (Hab. 3 19). Tradition is divided. Θ adopts the sense of 'eternity,' reading most probably לְמַנְצִיחַ, לְעוֹלָם—i. e., 'with reference to the period of the end.

Cp Dan. 11 13, where לְמַנְצִיחַ, 'at the end of the times' (RV), is rendered in Θ κατὰ συντελειαν καιρῶν (see Rus. etc., *ap. Dcl.*, and cp Mt. 13 39, etc.), and by Theod. εἰς τὸ τέλος τῶν καιρῶν.

¹ This section is taken from the middle of the hymn before the first pause. The musical text is illegible in several places. *Revue des Etudes Grecques*, 7 40-42.

² *PKE*(²) 10 389.

³ For further specimens, see De Sola, *The Ancient Melodies of the Spanish and Portuguese Jews* (1857).

⁴ For specimens, cp Japhet, *Die Accente d. Heiligen Schrift* (1896), 170 ff.

Aquila, Symmachus, and Theodotion adopt the sense borne by מְנַצֵּחַ in Mishnic Hebrew, Jewish Aramaic, and Syriac. The Targum comes the nearest to the prevalent modern interpretation, which is 'for the precentor, or director of music,' and is supported by מְנַצֵּחִים, *m'nass'him*, which clearly means 'superintendents' (cp 1 Ch. 23 4), 2 Ch. 21 [2] 17 [18] 34 13, and, according to most, by the use of the infinitive מְנַצֵּחַ, *m'nass'ehh*, in 1 Ch. 15 21 in a specialised sense for leading in the liturgical service of song. Olshausen, however, long ago pointed out that 'for the precentor' is a very superfluous direction, and various attempts have consequently been made to provide a more satisfactory explanation, based on the view that מְנַצֵּחַ, *niss'ehh*, had the specialised sense referred to. Ewald takes *m'nass'ehh* as an abstract form meaning 'performance with temple music' (so also Ges.-Bu.), whilst BDB, on the analogy of *kdavid*, דָּוִד, suggests, 'Belonging to the Director's Collection of Psalms.' These explanations are based on the MT of 1 Ch. 15 21. For a more probable though still not certain explanation see PSALMS [BOOK], § 26 (19), with note, where the subject is discussed afresh. Cp also MASCHIL.

T. K. C.

MUSTARD (CINΔΑΤΙ; Mt. 13 31 17 20 Mk. 4 31 Lk. 13 19 17 6 f.). In all five passages the minuteness of the seed is referred to, whilst in three the seed is spoken of as growing into a herb large enough to be called a tree and to have applied to it an echo of the phrase in Dan. 4 12 [9] 'the birds of the heaven dwelt in the branches thereof' (cp Ezek. 17 23). The former detail presents no difficulty, for although there are in fact several seeds smaller than the mustard, it is certainly one of the smallest, and 'a grain of mustard seed' was a proverbial expression for a minute quantity, found both in the Talmud (*e.g.*, *Ber.* 51) and in the Korán (*e.g.*, 21 48). On the other hand, that it should be spoken of as growing into a tree gives rise to difficulty, and has led many (*e.g.*, Royle) to suppose that the reference is to *Salvadora persica*, a tree which the Arabs call by the same name as mustard (*hardal*), and which Irby and Mangles (*Travels in Egypt*, 108) found growing on the southern shores of the Dead Sea. This, however, is most unlikely, for *S. persica* is of rare occurrence in Palestine and probably never travelled farther N. than the Dead Sea.¹ The mustard plant, which is common throughout the country, has often been found growing to a height of 8 to 12 ft., and great numbers of small birds alight upon its stalks in order to pluck the seeds (cp Furrer, *BL* 5 281; Tristram, *NHB* 473). An unlikely hypothesis is that adopted by Holtzmann and B. Weiss that in Lk. the tree is meant, whilst in Mk. the writer is rather thinking of the herb.²

The mustard plant common in Palestine is the black species, *Brassica nigra*, Boiss. S. M.

MUTH-LABBEN, TO (עַל־מוֹת לְבָן), a difficult phrase or note, occurring only in Ps. 9 title [1] (ΥΠΕΡ ΤΩΝ ΚΡΥΦΙΩΝ ΤΟΥ ΥΙΟΥ [B.A.L. R omits ΤΟΥ ΥΙΟΥ] . ΝΕΑΝΙΟΤΗΤΟΣ Τ. Υ. [Aq.]; for these renderings cp ALAMOTH; Hexapl. ΔΑΛΜΩΘ ΒΕΝ. Sym. ΠΕΡΙ ΤΟΥ ΘΑΝΑΤΟΥ ΤΟΥ ΥΙΟΥ, Theod., Quint. ΥΠΕΡ ΔΚΜΗC ΤΟΥ ΥΙ., Sext. ΝΕΑΝΙΚΟΤΗC Τ. ΥΙ.). *Al-muth*, מוֹת, is a corrupt form of 'al-'*alimōth* מוֹת עַל־עֵלְמוֹת (see ALAMOTH); but the meaning of *Labben* (בֶּן om.), if the reading is correct, is unknown. Following the MT (for the death of . . .) the Targum refers it to Goliath, the 'is *habbē'āyim*, אִישׁ גִּבּוֹר, of 1 S. 17 4; other Rabbinic writers not less improbably identified the name with the questionable BEN (*q.v.*) of 1 Ch. 15 18, or with Nabal (בָּנָב by metathesis). Most moderns (*e.g.*, Hitzig, Hupfeld, Delitzsch, Beer) suppose *muth labben* (מוֹת לְבָן) to be the opening words of an air, to the melody of which

¹ [Cp Jülicher, *Gleichnisreden*, ii. 575.]

² [An Oriental who was no botanist might well call the mustard plant a tree, remarks Jülicher, *op. cit.*, 575.]

the psalm was to be sung. The analogy of many other enigmatical insertions, however, suggests a more plausible theory. One of the guilds of singers bore the name Salmath; we should perhaps read, for על־מִתּוֹ לְבָנֵי שַׁלְמַת, 'of the sons of Salmath.' See PSALMS (Book), § 26 (1, 18). T. K. C.

MUTILATION. See CUTTINGS OF THE FLESH; also LAW AND JUSTICE, § 11.

MYNDUS (ΜΥΝΔΟΣ). A city on the Carian coast, at the extreme western end of the Halicarnassian peninsula, N. of the island of Cos; only mentioned in 1 Macc. 15:23, as a place in which Jews were settled (139 B.C.). From early times Myndus possessed a fleet (Herod. 5:33=about 500 B.C.). The town suffered from the proximity of Halicarnassus, and never became important—this is indicated by the fact that its coinage does not begin until the second century B.C. The civilisation and importance of the Carian coast declined throughout the Roman and Byzantine periods. It is now *Gumushli* (or *Yemishli*, Murray, *Handbook to A.M.* 113), a name derived from the silver mines worked in the neighbourhood, both in ancient and in mediæval times.

On the site, see Paton in *Journal of Hellenic Studies*, 1887, p. 66; 1896, p. 204. W. J. W.

MYRA (Acts 27:5 ΜΥΡΑ [LP, Blass], ΜΥΡΡΑ [B Jer., Lachm., Tisch., Treg., WH], and, according to D in 21:1 εἰς πατᾶρα καὶ μύρα). Myra (mod. *Demòre*, from corruption of ΤΗΝ ΜΥΡΑΝ)¹ in Lycia stood on a lofty hill at the angle of the gorges of the Myrus and the Andriace, 2½ m. from the sea (20 stades, Strabo, 666). Its port was Andriace at the mouth of the river of the same name (mod. *Andraki*. Cp Appian, *BC* 4:82, Δέντρος, ἐπιπεμφθεῖς Ἀνδριάκῃ, Μυρέων ἐπιπνεῖω, τὴν τε ἄλυσον ἔρρηξε τοῦ λεμένου, καὶ ἐς Μύρα ἀνῆει). Myra was of no special importance during the Greek period; but its importance continually increased under the Empire and through the Byzantine period, until at last it became the capital and metropolis of Lycia (Hier. 530): the monastery of S. Nicolas (born at Patara, bishop of Myra 3rd cent.) on the road to the port was probably the cathedral. This importance arose from the intimate connection of the town with the maritime traffic which developed under the Ptolemies between the eastern Aegean and Egypt (cp Paton and Hicks, *Inscriptions of Cos*, p. xxxiii: 'there must have been daily communication between Cos and Alexandria'; see also Rams. *St. Paul the Traveller*, 298). When, under the Empire, the Egyptian trade, especially that in grain, was diverted to Rome, this connection still continued. For although Μύρα lies nearly due N. of Alexandria, the corn-ships, owing to the westerly winds prevailing in the Levant in the summer months (Purdy, *Sailing Directions*, 197, 1841; cp Acts 27:4), ran straight across to Lycia, and thence to the S. of Crete. Hence Paul, on his voyage to Rome, 'sailed over the sea of Cilicia and Pamphylia' and 'came² to Myra' where an Alexandrian corn ship (πλοῖον Ἀλεξανδρινόν, v. 6; cp v. 38) was found, on the point of sailing for Italy:³ the centurion could certainly count upon

¹ The form of the name invites discussion. In Acts it is neut. pl.; but many authorities have the fem. sing. Μύραν or Μύρασαν. The passages of Strabo (666) and Ptolemy (v. 36), which have Μύρα, do not assist us; but we find the plural form in Ptol. viii. 17:23 and Pliny *HN* 32:2; and so also in *CIG* no. 4288, and *Notitia* (which have ὁ Μύρασαν; see table in Rams. *Hist. Geogr. of A.M.* 424). The Byzantine authors in general use the plural form—e.g., Zon. 3:589 and Malalas 448 (but cp *id.* 365, τῇ Μύρα). Hence we infer that the proper form was τὰ Μύρα, the feminine form ἡ Μύρα being vulgar but gradually asserting itself. The same difficulty is found in the case of Lystra (which see, and cp Rams. *St. Paul the Traveller*, 128 f.).

² In fifteen days from Caesarea, marg. WH from West. text and Vss.—'which appears to have a reasonable probability of being the true reading'; cp the corn ship in Lucian, which took ten days from Sidon to the Chelodonian islands 20 m. E. of Myra.

³ Cp the voyage of Vespasian to Rome (Jos. *BJ* vii. 2:1), and that of Titus (Suet. *Tit.* 5).

finding a westward-bound ship in Myra, and there was no change of plan on his part as Lewin (*St. Paul*, 2716) supposes.¹

The port of Myra must have been at least sighted, and was probably visited, by the ship in which Paul sailed to Palestine from Macedonia (Acts 21:1; note the insertion in D, as above). The importance of Myra lasted into the Middle Ages, when it is described as the 'harbour of the Adriatic' (*portus Adriatici maris, i.e., the Levant*). St. Nicolas usurped the place of the pagan deity as the patron of sailors in this part of the Mediterranean: the name of this patron deity in ancient times is not known (probably Apollo; but Tozer, in Finlay's *Hist. Greece*, 1:124, suggests Poseidon).

The many magnificent rock-tombs with sculptures and painting, the imposing theatre, and the remains of buildings near the port, among them those of a granary built by Trajan, 119 A.D., bear witness to the importance of the city.

See views in Spratt and Forbes, *Travels in Lycia*, vol. i. *front.*; Fellows, *Account of Discoveries in Lycia*, 198 f. Most recent are Benndorf's *Lycia*, and Tomaschek's 'Historische Topogr. von Kleinasien im Mittelalter' in *SWA II*, 1891.

W. J. W.

MYRRH (מֵר or מִר, *môr*; ΜΥΡΡΑ Ex. 30:23 Ps. 45:8 [9] Cant. 3:6 4:6 5:15 13:2 and ΜΥΡΡΙΝΟΣ Esth. 2:12. ΚΡΟΚΟΣ or ΚΡΟΚΙΝΟΣ Prov. 7:17, 1. OT *môr*. ΣΤΑΚΤΗ Cant. 1:13†). *Môr* was one of the ingredients in the holy incense, and is often mentioned as a valuable and choice perfume. The word is generally identified with Arab. *murr* (Aram. *môrâ*, Gk. *μύρρα*,³ מֵר, with the sense of bitterness), and the substance meant taken to be the myrrh of modern commerce (Ar. *murr*). The botanical origin, however, of the modern myrrh has, according to Schweinfurth, been misunderstood. According to this eminent authority, true Arabian myrrh is the product, not of *Balsamodendron Opobalsamum* (which yields balsam of Mecca; see BALSAM) but of *Balsamodendron Myrrha*. The old view of Nees and Ehrenberg is thus vindicated.

At the same time, it becomes thereby all the more probable, according to Schweinfurth, that Mecca balsam is the OT *môr*. 'מֵר' (*môr*), he argues 'is always referred to in the sense of an aromatic liquid [cp BALSAM], whilst [modern] myrrh is a solid body, entirely or almost devoid of aroma, but rather, as used in medicine, of a disagreeable odour.' This revolutionary theory deserves serious attention; Kautzsch has been among the first to profess his adhesion to it. We should not, of course, require to suppose with Schweinfurth that Heb. *môr* is a different word from Arab. *murr* (the modern myrrh). The two words agree exactly in form, and there are many instances in botanical history of a name being transferred from one plant or substance to another which is different though similar. Certainly the mentions of 'flowing *môr*' (Ex. 30:23) and 'liquid *môr*' (Cant. 5:5:13) favour the new view, whilst the reference to a 'bundle (or, 'bag') of *môr*' in Cant. 1:13 (if the text is correct) may be held to tell against it. Whatever the *môr* of OT may have been, the *μύρρα* of NT is most probably the same.

For מֵר, *lôt* (Gen. 37:25 43:11), rendered 'myrrh' in EV but 'ladanum' in RVmg, see LADANUM. N. M.

MYRTLE (מִרְיָה, *hidas*; ΜΥΡΤΙΝΗ, Is. 41:19 55:13; Zech. 1:8:10 f. Neh. 8:15†; in Zech. 6: τῶν ὀρεῶν). Branches of myrtle are included among those of which the booths of the Feast of Tabernacles were made in

¹ See on this point, Smith, *Voyage and Shipwreck of St. Paul* (9), 68 f.; Rams. *op. cit.* 319. The voyage of the Egyptian corn-ship described in Lucian's dialogue, *The Ship*, well illustrates this section of Paul's journey.

² *μύρρα* also Ecclus. 24:15 Mt. 2:11 Jn. 19:39 and ἑσπυρισμένος Mk. 15:23.

³ It is noticeable that *μύρρα* occurs nowhere either in the LXX or in NT; *μύρρον* (supposed to be derived from מֵר), on the other hand, is met with frequently, as also its derivative *μυρρεῖος*; *μυρίζω* and *μυρισμός* occur each once.

the time of Ezra. On the other hand, in Lev. 23⁴⁰ (a passage of the Holiness-law [H]), the list of trees prescribed does not include the myrtle (see TABERNACLES, § 5). Nor can we safely quote the original name of Esther as evidence for the existence of the myrtle in Palestine, for Esther (at least if the text has not suffered change) is represented as a Jewish maiden dwelling at Susa. The reference to the myrtle in Zech. (*l.c.*) must also probably be abandoned, *hūdassim* being surely a misreading for *hārīm* (see COPPER, § 5). In Is. 41¹⁹ 55¹³, the myrtle is mentioned among the choicest trees by the writer or writers of Is. 40-55. It is true, Is. 40-55 is a late exilic work (expanded still later); but the relations of the Israelites with neighbouring peoples under the later kings were so close that we must not give too much weight to the silence of pre-exilic records. The name HABAKKUK (*q.v.*), some think, is corrupted from a Babylonian plant-name, and we could easily believe that later kings of Judah interested themselves in acclimatising foreign trees and shrubs. The myrtle was certainly not common in Palestine when the Holiness-law was written, otherwise its branches would surely have been prescribed for the festive wreath.

If Jensen is right¹ in connecting the Assyrian *hadassatum* (a syn. of *kallatu*, 'bride') with the Heb. *hadas*, 'myrtle', it may seem to favour the hypothesis that the myrtle was introduced into Palestine from Babylonia (cp *Jutr. Is.* 274). But though recent critics have found a connection between Hadassah and *hadasi* (the mythic name of the bride of the Babylonian Sun-god; see ESTHER), it is disputed whether *hadasi* is so called for an etymological reason (as if=*hadassatum*) or on mythological grounds (הדס, 'myrtle', corresponding to Daphne in the myth of Apollo). The connection proposed by Jensen is hardly in itself very plausible. For the name הדס (not הדרם) is identical with its S. Arabian appellation (*hadā*): the Aramaic (and N. Arabic) word was different, though possibly connected—viz., *āṣā*, which, according to Fränkel (138), came into Arabic as a loan-word.

The myrtle was sacred to Astarte, and hence, also, according to Winckler (*op. cit.*), to Rammān or Tammuz, whose sanctuary near Antioch was called by the Greeks Daphne (הדרם?). The fragrance of its leaves and blossoms naturally suggested consecration to Astarte. Not less naturally the Jewish authorities appointed or sanctioned the use of myrtle branches at the Feast of Booths (cp TABERNACLES, § 7). *Sukka* (34) says that three myrtle branches are required for the wreath, and the tradition is still faithfully preserved by the Jews.

The myrtle is a low evergreen shrub with dark and somewhat thick leaves, elegant white flowers, and dark brown berries. Its leaves are studded with numerous receptacles for oil, which produces its pleasant perfume. It grows wild in many of the glens about Jerusalem, and is cultivated in every garden. It flourishes, too, in the valleys about Hebron, on the sides of Carmel and Tabor, in the clefts of the Leontes, and in the dales of Gilead (Tristram).

T. K. C.

MYSIA (Η ΜΥΣΙΑ, Acts 167*f.*). An ill-defined district in the N.W. corner of Asia Minor. The difficulty of drawing a precise line of demarcation between it and Phrygia gave rise to a saying (*Χωρὸς τὰ Μυσῶν καὶ Φρυγῶν ὁρίσματα*: Strabo, 564, 572). This was a result of the chequered history of this part of the peninsula, as Strabo says (565). The Phryges crossed from Thrace by the Hellespont, and at a later period fresh swarms of invaders from Europe, the Mysi, penetrated into Asia, pushing the Phryges inland and settling among them (cp Rams. *Hist. Geog. A.M.* 146). The general result of the data furnished by the geographers is that Mysia lay surrounded by Bithynia, Phrygia, and Lydia, extending both to the Propontis and the Aegean (cp Strabo, 564). Towards Bithynia, the Mysians seem to have occupied the country as far as the lake Ascania, whilst on the S. they extended to the river Caicus. On the W. lay the Troad, which was sometimes regarded as part of Mysia, and sometimes distinguished from it, the boundary in the latter case being the river Esepus (Strabo, 560). On the E. lay that part of Phrygia which was called Phrygia Epiktetos, or 'Ac-

¹ *WZKM* 6211; but cp *Wi. AF* 2417*f.*

quired Phrygia,' a district once largely Mysian, but taken from Bithynia by the Pergamene kings (cp Rams. *Hist. Geog. A.M.* 145). The whole region called Mysia was commonly regarded as falling into two divisions—Mysia Olympēnē ('Ὀλυμπηνή) in the neighbourhood of Mt. Olympus, and Mysia Pergamēnē (Περγαμηνή) on the Caicus (Strabo, 566, 571). Other parts of Mysia also bore special names. It will be seen from this, that, of the places mentioned in the NT, Assos, Adramyttium and Troas were in Mysia. The name Mysia, having a purely ethnical significance, was not adopted in Roman official usage; but the district was part of the great province of Asia (cp Strabo, 629). See ASIA, LYDIA.

The relation of Mysia to the NT narrative is parenthetical, but important. Paul, after a visitation of the churches founded on his first journey, was intending to follow the great road leading to Ephesus in order to 'preach the word in Asia,' but was forbidden to do so (Acts 166). Turning northwards, Paul and his companions 'when they were come over against Mysia' (*v. 7*, RV; but AV 'to Mysia') attempted to enter Bithynia (*i.e.*, the western part of the Province Bithynia-Pontus, second only in importance to Asia itself), but were 'forbidden' to cross the frontier. Accordingly, 'passing by Mysia' (*v. 8* EV) they 'came down to Troas.'

Two questions arise:—(i.) The meaning of the expression *κατὰ τὴν Μυσίαν*, (ii.) the meaning of the expression *παρελθόντες τὴν Μυσίαν*.

i. The use of the preposition *κατὰ* in NT Greek requires elucidation.¹ Here we must acquiesce in the explanation given by Ramsay (*Church in R. Emp.*⁽⁶⁾ 75, n.)—'when they reached such a point that a line drawn across the country at right angles to the general line of their route would touch Mysia,' *i.e.*, when they were in the *latitude* of Mysia, which lay to the left (for this sense of *κατὰ*, cp Herod. 176, Thuc. 665¹⁰⁴, Acts 277, *κατὰ τὴν Κνίδον*). Paul must have diverged from the road to Ephesus either at Iconium or at Antioch, and travelled northwards along the direct road to Bithynia through Nakoleia and Dorylaeum (*Seidi Ghazi* and *Eski-Shehr*).² Why Paul went northwards is not explained; nor can explanation be wrested from the text, as it is clear that the resolve to enter Bithynia was not formed *until the point indicated by the words κατὰ τὴν Μυσίαν was reached* (see GALATIA, § 7 [also § 11]). This point was probably Dorylaeum, which lay only about 20 m. S. of the frontier. Mysia, as ordinarily understood, lay then so far away to the left that it is hard to see why reference to it rather than to the name of the town itself should have been made. When, however, we remember that Dorylaeum lay in the heart of the region called Epiktetos,³ which was at one time, and by some writers, reckoned part of Mysia (cp *HGA.M.* 146), it is not difficult to understand how Lk. may have been actually under a slight misapprehension as to the extent of Mysia.

ii. When, at Dorylaeum, it was found that there could be no further progress northwards, Paul turned westwards. Whether he traversed the valley of the Rhynadacus (*Edrenos Chai*), or took some more direct route, he could not reach Troas without going through some part of Mysia. Hence *παρελθόντες τὴν Μυσίαν* cannot be translated 'passing without entering,' or 'passing along the edge of Mysia.' The sense here must be 'neglecting' (in obedience to the general prohibition to 'preach' in Asia of *v. 6*). The western text has *διελθόντες*, which in its literal sense is good.⁴ Still, it must be

¹ Cp the difficulty of interpreting the expression *κατὰ λίβρα καὶ κατὰ χῶρον* in Acts 27 12. See PHENICE.

² It is possible, as Ramsay (*op. cit.* 76 n.) says, that Paul took the longer western road by Cotyzeum (*Kutaya*), which town, in that case, would be the point of second divergence.

³ Phrygia Epiktetos contained the six cities, Midezum, Dorylaeum, Cotyzeum, Nakoleia, Aizani, and Cadi (Strabo, 576).

⁴ Nevertheless, it would overthrow the canon which Ramsay

conceded that the sudden change to the *metaphorical* meaning in the case of *παρελθόντες*, immediately after the occurrence of *διήλθον . . . ἐλθόντες* in the *literal* sense is a stylistic defect. And this criticism applies in a special degree to this entire passage.¹

Ramsay mentions a tradition that, on this journey, Paul travelled by Artemæa, a town 'sacred to Artemis' near the hot springs on the river *Ἄρπυς*, and founded a chapel in the neighbourhood (*St. Paul the Traveller*, 197; *Exp. l.*, 1898, p. 495). This and other similar traditions may well preserve an echo of the truth, for the route down the Rhyndacus and along the southern shore of the Propontis was that most likely to be chosen, and this would take Paul through Artemæa. Although preaching in Asia was forbidden, there is no doubt that the prohibition applied only to public work on a large scale, not to the private intercourse of Paul with his hosts on his journey. Possibly it was under the influence of the tradition mentioned above that the western text made the change to *διελθόντες* in v. 8. The 'door' that 'was opened' to Paul at Troas (2 Cor. 2:12) would imply an extension of the new teaching eastwards through Mysia in the natural course of things (cp the case of Ephesus).

W. J. W.

MYSTERY. In the religious life of the ancient world in its period of decline, perhaps the most characteristic

feature was the ardour of its craving after the mysterious. Conscious weakness and failure of self-reliance were betrayed in the comfortless gloom that followed every attempt to peer beyond the lowly round of everyday life. The questions whence life comes and whither it goes had to be answered at any cost; but men despaired of being able to reach such answers, each for himself by his own unaided thought. Resort was, accordingly, had to the mysteries—those secret cults, some of them of hoary antiquity, others as recent as Christianity itself, in which, with a lavish employment of symbolism, the candidate for initiation received the desired instruction from the duly consecrated priest (hierophant), and was provided with sacramental guarantees extending both to this life and to the next. There was hardly a deity in connection with whose service some subsidiary cult of this sort did not arise; a cult in which the chosen ones—for admission was not a matter of course—strictly marked off from outsiders, and, keeping scrupulously secret the knowledge imparted at initiation, in spite of many follies and excesses, preserved a certain vitality for the pagan religion. These guilds were themselves called mysteries; so also were the secret doctrines imparted within them; finally, and above all, the methods of symbolism and allegory, by means of which philosophical or religious and ethical instruction was obtained from the old mythologies, to meet the wants of a new age, went by this name.

The Wisdom of Solomon shows its author to have been acquainted with this Greek institution; in 14:15-23

(cp 12:5) the origin of the mysteries is **2. Jewish** euhemeristically explained, but the existence of the inner mystery is not at all denied; in 2:22 allusion is made to the mysteries of God, and in 8:4 wisdom is spoken of as 'one initiated (*μύστις*) into the knowledge of God.' In marked contrast, however, with the heathen mysteriosophists, wisdom declares to her hearers (6:22), who are by no means to be regarded as a community of *mystæ*, that she will not hide mysteries from them, but will set forth in clear light a full knowledge of the truth. In a number of passages in the LXX the word *mystery* is used in the colourless sense of a secret idea or plan (*e.g.*, in 2 Macc. 13:21; but not only do we find 3 Macc. 2:30 speaking of one who has been duly consecrated in accordance with the prescribed ritual, but also in Dan. 2:18 f. 27-30 46 (the last passage only in Theod.) the Greek translation is obviously influenced by the religious phraseology of the same heathen circles, when it speaks

would establish—that the verb *διαθεῖν* with the accusative of the country signifies 'to make a missionary tour'; for here this sense would be impossible, in the face of the prohibition of v. 6.

¹ See, however, the judgment of Ramsay, *St. Paul the Traveller*, 195 f.; *Church in R. Empire*, 434.

of Nebuchadrezzar's vision as a 'mystery' which is 'revealed' to Daniel by the God of heaven, to whom alone this prerogative belongs. The dream as such is not called a mystery; it is a mystery because it contains a series of symbols which yield up their deeper meaning to interpretation and the allegorical method. Among Jewish writers the great master in the art of allegorising, so as to extract unsuspected meanings from the letter of Scripture, is Philo.

When, for example, in *De Cherub.* 12 ff., or in *De Sacrif. Abel et Caini*, 15 f., he sets forth his astonishing exegeses of Gen. 4:1 18 6, he is a genuine hierophant or teacher of mysteries; and he himself feels that he is such, using, as he does, of set purpose, the terminology of the mysteries. That he does not deal with Orphic myths, does not alter the fact. He even openly demands that what he is revealing be kept secret from all the profane (*De Cherub.* 14), though, when he has occasion to dwell on the contrast between Mosaism and heathen piety (*De Victim. offer.* 1 f.), he can allow himself to repudiate entirely all secret initiations and mysteries, and to insist upon perfect straightforwardness and honest publicity.

Christianity, in like manner, did not simply repudiate the influence of this revealing tendency of the age.

When the synoptists (Mt. 13:11 Mk. 4:11 3. **Christian.** Lk. 8:10) speak of the mysteries, or the mystery, of the kingdom, a knowledge of which is given to some but withheld from others (see Gnosis), and represent the parables as designed in some cases to reveal, and in other cases to conceal still further, what had hitherto been hidden, they can hardly be taken as exactly reflecting the mind of Jesus on the matter, but must be regarded rather as giving involuntary and unconscious expression to their own feeling on finding themselves chosen for the honour of initiation. Perhaps the writer of 1 Tim. 3:16 gives quite unconscious expression to the same feeling when he speaks of Christ as the mystery of godliness, or instead of the faith speaks of the mystery of the faith. As for the Apocalypse, it is almost entirely made up of mysteries, and it is surprising to find it only once (10:7) calling attention to a fulfilment of the mystery of God.

The usage in 1:20 17 5 7, where the word *mystery* is employed to denote a figure, such as that of the seven stars, which requires interpretation, comes near Eph. 5:32, where Gen. 2:24 is called a great 'mystery,' because it has to be understood not literally of a man and his wife, but allegorically of Christ and the Church.

Most interesting of all is the attitude of Paul. In 2 Thess. 2:7, indeed, when he speaks of the mystery of iniquity or lawlessness as already at work,

4. Paul. but still restrained by one that restrains (*ὁ κατέχων*: ANTICHRIST, § 7), 'mystery' is used merely as a synonym for something still hidden and invisible as against the manifestation shortly to occur. On the other hand, when in 1 Cor. 15:51 he introduces a piece of his characteristic gnosis concerning the last day with the words, 'behold, I tell you a mystery,' one feels that here he is a mystagogue speaking to a circle of *mystæ*; and in the many passages where he introduces the idea of 'a mystery' in connection with the gospel he proclaims, the derivation of his language from the mysteries so eagerly resorted to by the heathen who were seeking salvation can hardly be mistaken. He who in the spirit speaks with tongues (1 Cor. 14:2) utters mysteries; in 1 Cor. 13:2 'all mysteries and all knowledge' (*gnosis*) sum up the highest conceivable attainment of human learning—it is precisely what is hidden from others that is known to the true gnostic; and in 1 Cor. 4:1 Paul claims to be recognised by all, not only as a servant of Christ, but also as a steward of the mysteries of God. It does not signify that elsewhere he always speaks in the singular of *the* mystery of God or of Christ or of the gospel—in some cases even without the added genitive—as, for example, in Col. 2:2 4:3 1:26 Eph. 6:19 3:4 9 Rom. 16:25; in all cases he intends the saving purpose of God whereby in the fulness of the times redemption is offered to all men, Jews and Gentiles alike, in Jesus Christ—the single plan of salvation, which, however, is carried out in a multiplicity of saving deeds. This purpose of

salvation not only remained a secret hidden throughout the ages before the life and death of Christ (Rom. 16 25), it remains so for unbelievers to this day; and many details connected with it, such as the problem of the hardening of Israel, are hidden even from believers for the most part (Rom. 11 25); he who by the spirit of God has become acquainted with them must exercise prudence in communicating the gnosis thus gained; he must impart it only to such as are 'perfect' (1 Cor. 26 ff.), to those who from being babes in Christ have grown up to be veritably spiritual men (3 1), and instead of milk can endure strong food (3 2; see GNOSIS).

Lightfoot¹ justly observes that the apostle has borrowed from the terminology of the ancient mysteries not only the word 'mystery' (μυστήριον), but also 'perfect' (τέλειος, Col. 1 28), 'instructed' (μαρτυροῦμαι, Phil. 4 12), 'sealed' (σφραγισθεῖσθε, Eph. 1 13); the references could be multiplied, and at least one expression added to the list—'present you as a pure virgin' (παραστήσαί ὑμᾶς παρθένους ἀγνῆς) of 2 Cor. 11 2. It does not seem, however, to the present writer that in making use of these figures Paul is deliberately uttering a paradox, in so far as what elsewhere was called a mystery was kept closely confined to a narrow circle, whilst the Christian mysteries are freely imparted to all. True, Paul had the desire to bring the gospel to all, and that no one should be left outside in the darkness; but for the terrible chasm between his ideal and the reality he consoles himself like Philo with the lofty feeling of belonging to a community, small, indeed, but possessed of unutterable secrets; and just as he is still a gnostic, though confessing the imperfection and transitoriness of his gnosis as compared with that of the coming age, so he is not without a real intention—to be explained by the current tendencies of his time—of still maintaining 'the

idea of secrecy or reserve' in connection with his exposition of the truths of the gospel.

The words, so free from paradox, of Clement of Alexandria (*Protrept.*, § 120), on the true holy mysteries, are conceived entirely in the spirit of Paul. The mysteries are not themselves the last word, the thing which permanently remains; but it is only through the mysteries, and through knowledge of them, that entrance can be gained into the eternal light.

At a later date the sacraments of the Church, especially Baptism and the Lord's Supper, came to be compared to the ancient mysteries, and, indeed, the word mystery ultimately came to be applied exclusively to these; but not a trace of this is to be found in the NT. The apostle who in 1 Cor. 1 14 ff. so eagerly and joyously affirmed that Christ had sent him not to baptize, but to preach the Gospel, certainly did nothing to promote any tendency that may have existed in his day to regard the sacramental acts of the Church as in any way resembling certain ceremonies of initiation observed in heathen mysteries; with him acts of worship are never mysteries.

See G. Wobbermin, *Religionsgesch. Studien . . . zur Frage der Beeinflussung des Urchristentums durch das antike Mysterienwesen*, 1896; and for the mysteries in general, see Réville, *La Rel. à Rome sous les Sévères*, 1886, 5 7; Cheetham, *The Mysteries, Pagan and Christian*, 1897. A. J.

MYTILENE. In NT spelled MITYLENE (*q.v.*).

N

NAAM (נַעַם), 'pleasant' ? **NOOM** [BL], נַאֲמָא [A], a son of Calcb and brother of יהוֹיָדָע—*i.e.*, יְהוֹדָה, Jerahmeel (כ and ם confounded), 1 Ch. 4 15 f. In 1 Ch. 4 19 we meet with Naham, and in Gen. 36 13 with Nahath; the three clan-names may have the same origin. See NAAMAN *i.*, end. T. K. C.

NAAMAH (נַעֲמָה), 'pleasant,' § 67. 1. Daughter of Lamech, Gen. 4 22 (νοεμα [AE], -μμα [L]; νααμα Jos.; *Noema*, cod. Am. *Noemta*). See CAINITES, § 9, n. 4, but observe that if 'Lamech' is really a mutilated form of 'Jerahmeel,' 'Naamah' is probably a clan-name (cp NAAMAN *ii.*).

2. An Ammonitess, mother of Rehoboam, 1 K. 14 21 31 (μααχαμ [B], νααμα [A], νααβα [L], *Naama*; in 5 31 ^{BL} omits clause), 2 Ch. 12 13 (νοομμα [BA], νααμα [L]; *Naama*). It is questioned whether 'Ammonitess' is not due to a scribe's error; Naamah may have been the true name of the 'Shunammite' (1 K. 13). See REHOBAM, SHULAMMITE. T. K. C.

NAAMAH (נַעֲמָה), a town in the lowland of Judah, Josh. 15 41 (νομαν [B], νομα [A], νομα [L]). ^B suggests Naaman, and this we might identify with N(u)māna or with Nāmāna in the name-list of Thotmes III. (nos. 83 f.; *R^P 2*, 5 49), which Maspero and Tomkins connect with Dēr Nāmān and 'Arāk Nāmān respectively. The place was certainly in SW. Palestine, and near ΜΑΚΚΕΔΑΗ (*q.v.*). Warren (*PEF* 2 403) thinks of Nā'aneh, 5 m. NE. of el-Mughār; but the resemblance of the names is slight. T. K. C.

NAAMAN (נַעֲמָן), 'pleasant,' § 67, perhaps derived from a divine name, see ADONIS; Gen. 46 21 νοεμαν [A], νοεμ. [D], νοεμα. [L]; Nu. 26 40 [31], νοεμανει [B], νοεμα [A], -ν [FL]; 1 Ch. 8 4, νοεβα [B], μααμαν [A], νοεμει [L]; 2 7, νοεμα [BA], νααμαν [L]; the patronymic is **Naamite**, נַעֲמָנִי, but Sam. נַעֲמָנִי, Nu. 26 40, νοεμαν[ει]; [Ba mg. inf. AFL]. 1. A Benjamite clan, 'son' of Benjamin in Gen. 46 21 (MT), but of Bela b. Benjamin in Nu. 26 40 [44] 1 Ch. 8 4, and in Gen. 46 21 ^B (see *JQR* 11 100). Possibly to be grouped with the name NAHAMANI (*q.v.*); cp NAAM.

2. (NAIMAN [BA], NEEM. [L]), general of the king

¹ *St. Paul's Epistles to the Col. and Philem.*, 1882, pp. 167 ff.

of Syria, miraculously healed by Elisha of his leprosy, 2 K. 5 (see LEPROSY). We hear of his successes as leader of the Aramæan troops (*v.* 1); of his easily ruffled temper (*v.* 11 f.); of his deference to wise counsel even when offered by subordinates (*v.* 13 f.); of his gratitude to Elisha (*v.* 15 23); and of his new-born conviction that there was no god worthy of the name in all the world but Yahwè (*v.* 15). Being compelled officially to visit the temple of RIMMON (*q.v.*), and there to prostrate himself, he asks indulgence of Yahwè's prophet. His private worship shall be reserved for Yahwè, and since Yahwè is specially the god of Canaan, he begs that he may take home two mules' burden of earth, that he may offer sacrifices to Yahwè on Canaanitish soil. Elisha, with his 'Go in peace,' implicitly grants his request, and, according to EV, 'he departed from him (Elisha) a little way' (*v.* 19). This, however, is a poor close of the section. The text is corrupt (cp Klo.), and the right reading seems to be 'with a possession of Israelitish earth.' That Naaman journeyed home with his mules' burdens, the narrator certainly meant to say.

The supposed word בְּרַחַת is really non-existent (on Gen. 35 16 48 7, see RACHEL). ^B reproduces it as δεβραθα; ^{FL} as χαβραθα; ^{BA} has, in *v.* 19, και ἀγγαθεν ἀπ' αὐτοῦ ἀπὸ τῆς γῆς Ἰσραὴλ. The latter reading cannot be entirely right; but 'land of Israel' is a contribution to the probably true reading, which we take to be וְיָרַד סָמֹנִי בְּמִאֲחָז אֶרֶץ יִשְׂרָאֵל. Klo., less probably, 'ש' סָמֹנִי כִבֵּר סָמֹנִי, 'and he carried away from him about a "load" of (lit. out of) the earth of Israel.' It is not surprising that ^{FL} seeks to soften the shock to the reader of *v.* 18 by προσκνησῶ ἅμα αὐτῷ ἐγὼ και κυριῶ τῷ θεῷ μου. T. K. C.

NAAMATHITE (נַעֲמָתִי), Job 2 11 etc. See ZOPHAR.

NAAMITE (נַעֲמִי), Nu. 26 40. See NAAMAN, 1.

NAARAH (נַעֲרָה), cp MAARATH in S. Judah or NAARATH? ΝΟΟΡΑ [A], ΝΟΕΡ. [L], ἄωδα [B, with *d* for *r*], and Helah, wives of Tekoa (cp also COZ), apparently the names of two Judæan clan-divisions (1 Ch. 4 5 f. f). On the names of their 'children' (which in some

¹ On the whole it is less likely that ἄωδα represents HELAH (*q.v.*). ^B seems to have placed Naarah before Helah in *v.* 5 (ἄωδα κ. θαῶδα) to agree with their order in *v.* 6 f.; in the end of *v.* 6 ^B seems to have read ἄωδας.

NAARAH

cases have affinities with S. Judean names), see ETHNAN, ZERETH, HAASHATARI, and cp TEKOÄ.

NAARAH (נַעֲרָה), Josh. 167 RV, AV NAARATH (*q.v.*).

NAARAI (נַעֲרָי), § 79; rather נַעֲרִי, 'my lad' [Nöld.]; נַעֲרָי [BN], נַעֲרָי [A], נַעֲרָי [L], one of David's 'thirty' (1 Ch. 1137), see PAARAI.

NAARAN (נַעֲרָן), 1 Ch. 728. See NAARATH, end.

NAARATH, RV NAARAH (נַעֲרָתָה), *i.e.*, 'to Naarah,' נַעֲרָתָה, a point on the boundary between EPHRAIM (*q.v.*, § 11) and Manasseh; Josh. 167 (ΔΙ ΚΩΜΑΙ ΑΥΤΩΝ [B], *i.e.*, נַעֲרָתָה, interpreted like נַעֲרָתָה [cp. *q.v.*, 1 Ch. 728]; ΝΑΡΑΘΑ ΚΑΙ ΔΙ ΚΩΜΑΙ ΑΥΤΩΝ [A], ΔΙ Κ. ΑΥ. ΚΑΙ ΕΙΣ ΑΝΑΡΑΘΑ [L], נַעֲרָתָה and נַעֲרָתָה [Pesh.]). Identified by Jer. and Eus. with the Naarath or Noopath of their day (=the Neara of Jos., *Ant.* xvii. 131; cp JERICHO, § 7), a village within 5 m. of Jericho (OS 283 11 1422), perhaps the *Kh. el-'Aujeh*, 6 m. N. of Jericho in the plain. So Conder, *PEF.*, Jan. 1877, p. 27. Guérin, however (*Simm.* 1201 ff.), places it by the *Au Simich* in the W. el-'Aujeh, about 7 m. NW. of Jericho, where there are ancient remains and considerable traces of water-works. In 1 Ch. 728 the name appears as Naaran (נַעֲרָנָה [B], נַעֲרָנָה [A], נַעֲרָנָה [L], Pesh. om.). Cp Neub. *Géogr.* 163.

NAASHON (נַחֲשׁוֹן), Ex. 623 AV, RV NAHSHON.

NAASSON (ΝΑΑΣΣΩΝ [Ti. WH]), Mt. 14 Lk. 332 AV, RV NAHSHON (*q.v.*).

NAATHUS, one of the sons of ADDI (*q.v.*) in 1 Esd. 931 (ΝΑΘΟΣ [B], ΝΑΑΘ. [A], ΕΛΝΑΘ or ΟΙΔΙΔ [? L]). The name is perhaps a transposed form of Adna (Ezra 1031).

NABAL (נָבָל; ΝΑΒΑΛ), 'a man in Maon, whose business was in Carmel, rich in sheep and goats, the

first husband of Abigail (1 S. 253 ff.). As his name is, so is he,' says Abigail, playing upon his name, which might mean 'fool' (NAMES, § 67) or perhaps rather 'shamelessly immoral' (אִישׁ הַבִּיטִי לַעֲוֹנוֹ 252; cp BELIAL, FOOL). The *nabal* (נָבָל), or 'shameless impropriety,' ascribed to Nabal (*v.* 25), consisted in his exclusion of David and David's men, who had conferred benefits on Nabal, from the traditionally binding hospitalities of the sheep-shearing, as if they were outlaws, men deprived of the protection of their class, worse off even than 'sojourners.' David on his side had claimed (not improbably) to be Nabal's 'brother' (*v.* 6, reading לְאָחִי, with We., Dr., Bu.; cp Vg., Klo.); both, in fact, it is possible, were Calebites.¹

The story of Nabal is graphically told; but it is not on that account to be accepted as literally true.

We receive gratefully the picture of the better side of a free-boater's life, and of the delicate, tactful character of a Hebrew woman of the higher class. The 'son of Belial,' however, who is so violent that his own people scarcely dare to speak to him, and who holds a feast 'like the feast of a king,' at which he drinks to excess, while mischief (as he must know) is brewing against him, and who becomes 'like a stone' when he hears of the danger which his wife has surmounted for him, till, ten days after, a divine stroke falls upon him, and he dies, is a masterpiece of Oriental romance, in which it is not impossible that there are some features ultimately derived from primitive mythology (see § 2).

This, however, may be historical—that David obtained the territory of a rich man of Maon (doubtless the chief of the tribe [*gens*] dwelling there) by marrying his wife, and so himself became a powerful chief. See ABIGAIL, ISRAEL, § 14.

Thus the political meaning of the legend of Nabal is

¹ Cp DAVID, § 1, n. 2; KIRJATH-SEPHER. In the latter article David's home is placed conjecturally at Kirjath-sepher, otherwise called Beth-zur or Beth-el (?). In 1 Ch. 245 Maon (Nabal was of Maon) is called the 'father of Beth-zur.'

NABATÆANS

sufficiently clear. To explain how David effected this

2. Origin of legend. master-stroke of policy, tradition (according to W. *GL* 2187 ff.), in producing a legend, borrowed from the famous myth of the drunken giant of the sky, whom the Greeks called ORION and the Hebrews Késil. The chief or sheikh is called Nabal ('fool'), which is a paraphrase of Késil. The tribe over which he ruled was probably, thinks Winckler, called Habal=Abel, the brother of Kain (*i.e.*, the Kenites). The theory is brilliant. We may do well to admit that some current folk-story was probably attached to the person of the sheikh; but since *nabal* (נָבָל) and *késil* (כֶּסֶל) are hardly quite synonymous, it is better to look for another explanation of 'Nabal.'

It is in accordance with analogy to suppose that 'Nabal' has been (humorously) substituted for 'Nadab' which occurs as a Calebite name in 1 Ch. 22830, close to 'Abihail.' It is probable that Abigail in the story of Nabal should rather be Abihail, and that the tribes (*gentes*) of Nadab and Abihail were united (hence 'Nabal'—*i.e.*, Nadab—is called the husband of Abigail—*i.e.*, Abihail). And plausible as it is to explain נָבָל in 1 S. 253 (Kr.) as 'Calebite,' it is a little more probable that נָבָל is miswritten for נָבִיחַל, and that in the original story the passage ran thus, 'Now the name of the man was Nadab, and he was chief (רֹאשׁ) of Abihail.'

For the convenience of the legend Abihail (Abigail) was transferred, we must suppose, to the sheikh's wife. The humour of Nabal's name now becomes still more manifest. Not 'liberal' (Nadab) nor Abihail (popularly explained, 'strong father?'), but Nabal ('reckless, violent').

With regard to the so-called gloss in 1 S. 253, it may be well to correct a misapprehension. The interpretation, 'and he was a Calebite' (וְהָיָה כְּלֵבִי), is sometimes supported by a reference to 2 S. 38, 'Am I a dog's head,' which is thought to allude to David's Calebite origin and to the violent, intractable character of the Calebites (such as Nabal). This is altogether a mistake, and so also is the view that נָבָל is a gloss to account for the violence of Nabal by his being of the dog tribe (cp 1 S. 253, and 1 S. 253 is explained above, and in 2 S. 38 we should almost certainly read thus, אִמְרֵי חֵילָה אֲנִי אִשֶׁר חָסַד אֱלֹהִים אֵתָּה, 'Am I the captain of thine army (2 S. 242), who show sacred loving-kindness (2 S. 93).')

T. K. C.

NABARIAS (ΝΑΒΑΡ[Ε]ΙΑΣ [BA]), 1 Esd. 944f. A corrupt name; see HASHBADANA (end).

NABATÆANS (ΝΑΒΑΤΑΙΟΙ or -ΤΕΟΙ [ANV], ΝΑΒΑΤΑΙ [N in 525], -ΒΑΤΑΙΟΙ [V in 525], 1 Macc.; ΝΑΒΑΤΑΙΟΙ, ΝΑΒΑΘΗΝΟΙ [Jos.]; Nabathites AV, Nabathæans RV), a well-known Arabian people, friendly to Judas and Jonathan the Maccabees (1 Macc. 525 935). In 1 Macc. 525 the Nabatæans are met with in the desert, three days' journey beyond Jordan; in 1 Macc. 935, not far from Medeba, in the N. of Moab. In the time of Josephus (*Ant.* i. 124; cp Jer. *Qu. in Gen.* 25) their settlements gave the name of Nabatean to the borderland between Syria and Arabia from the Euphrates to the Red Sea. The language of Josephus suggests, and Jerome, apparently following him, directly affirms, that the name is identical with that of the Ishmaelite tribe of Nebaioth (see ISHMAEL, § 4). This view has been widely adopted, but is phonetically difficult,¹ the name Nabatæan being properly spelt with *t* not *t* (נַבְטָו) in the inscriptions (Arabic *Nabat*, *Nabit*, etc.).

The history of this remarkable people cannot with certainty be carried back beyond 312 B.C., at which date Athenæus the general of Antigonos, and after him Antigonos's son Demetrius, in vain attempted their subjugation (cp SELA). At that time they already occupied the old country of the Edomites. How long they had been there, we know not. We may be certain, however, that the beginning of their migration from their

¹ [We can hardly say 'phonetically inadmissible,' the interchange of *n* and *t* being not unexampled (see Lag. *Übers.* 51 n., Buhl, *Edomites*, 52, n. 6). The Nabaiti or Nabaiaiti of the Ass. inscriptions = נַבְטָו (Schr. *KGF* 104).]

earlier home in the wilderness synchronised with the first Edomitish incursions into southern Judah, occasioned by the humiliation of the Jews by Nebuchadrezzar. Its closing stage is referred to by the Jewish prophet Malachi (11-5), who regards it as the just punishment of Edomitish wickedness (the wickedness of occupying the soil of Judah).¹ As a consequence of this change of abodes the Nabatæans became masters of the shores of the Gulf of 'Akaba and the important harbour of Elath (cp Agatharchides, *Geog. Gr. Min.* 1178).

The Nabatæans have already some tincture of foreign civilisation when they first appear in history. Though true Arabs (as the proper names on their inscriptions show), they came under the influence of Aramæan culture. Naturally, therefore, Syriac was the language of their coins and inscriptions,² when the tribe grew into a kingdom and profited by the decay of the Seleucids to extend itself over the country E. of the Jordan. They occupied Haurān, and about 85 B.C. their king ARETAS (*q.v.*), became lord of Damascus and COELESYRIA (*q.v.*). Allies of the first Hasmonæans in their struggles against the Greeks, they became the rivals of the Judæan dynasty in the period of its splendour, and a chief element in the disorders which invited the Roman intervention in Palestine in 65-64 B.C. The Nabatæans had to give up Damascus; but as 'allies' of the Romans they continued to flourish throughout the first Christian century. Petra their capital became a great commercial centre, which was, however, reduced in the time of Trajan when he, most unwisely, broke up the Nabatæan nationality (about 105 A.D.). See ARABIA, § 3, DAMASCUS, § 13, ISHMAEL, § 4.

For the inscriptions and coins of the Nabatæans see De Luynes, *Rev. Numism.*, 1858; Levy, *Z.D.M.G.* 14 363 f.; De Vogüé, *Mé. d'Arch. Or.*, 1868; *Syrie Centrale*, 1866-77; and *Inscr. Sémitiques*, 1868-77; Euting, *Nab. Inscr. aus Arabien*, with excursus by Gutschmid on the Nabatæan kings; also Nöld. *Z.D.M.G.* 17 705 f., 25 122 f., *Sém. Sprachen*, 31; Glaser, *Séizze*, 2418. See also Nöld. 'Nabatæer' in Schenkel's *BL*, and F. H. Vincent, 'Les Nabatæens,' *Rev. biblique*, [1898] 567-588.

W. R. S.—T. K. C.

NABOTH (נָבוֹת), 'height,' § 74, but cp NEBAT; ΝΑΒΟΥΘΑΙ [BAL.], -ΘΑ [A* 1 K. 21 3]; *Nabuthesus*, the owner of a 'field' near Jezreel, or of a 'vineyard' near Ahab's palace (? in Samaria), whose story and its sequel are told in 1 K. 21 ff. 2 K. 9 21 25 f.† Cp ELIJAH, § 3, and, on the criticism of the passages, KINGS, § 8, also AHAB, § 2, n. 3.

NABUCHODONOSOR (ΝΑΒΟΥΧΟΔΟΝΟΣΟΡ [BAL]), 1 Esd. 1 40 = 2 Ch. 366, NEBUCHADNEZZAR; see NEBUCHADREZZAR.

NACHON, RV *Nacon* (נַחֲשׁוֹן). According to 2 S. 66 it was at the threshing-floor of Nachon that Uzzah was smitten for putting forth his hand to the ark.

The Gk. has ναθαβ [B], ωθαβ [Bb], ναχων [A], οργα του Ιερουσαιου [L], χειδων [Jos. Ant. vii. 4 2]. The translations of Aq. (εως αλωνος ετοιμης) and Pesh. yield no sense, and involve a questionable use of נָכוֹן (cp Dr. *ad loc.*).

It is evident that some proper name or closer designation of the 'threshing floor' (cp, e.g., Gen. 50 10) lies at the bottom of the MT reading. The parallel passage 1 Ch. 13 9 has חידון (חֲדִיֹן; χελω [A], om. Bb, χεδω [L]), which may be a corruption of נָכוֹן (נָכוֹן = כֶּן = כָּן), cp We. *TBS* 168). 𐤒𐤋's identification is 'an evident correction intended to make the ark select its permanent abode thus early' (H. P. Smith); but it may conceivably rest upon an old tradition.

Nākōn, נָכוֹן, recurs as the corruption of some place-name in 1 S. 26 4^s (cp RV^{mg.} 'to a set place'). The readings of B^A (ετοιμος εκ κελια, a doublet; cp We.)

¹ [See Grätz, *MGH*], 1875, pp. 60 ff.; Che. *Proph. Is.* 1 104; *Intr. Is.* 211; *ZATW*, 1894, p. 142; *JBL*, 1898, p. 207; We. *Die kl. Proph.* (3), 213 f.; *I/G* (1), 147; Buhl, *Edomiter*, 79; and especially Torrey, *JBL*, 1898, pp. 16 f.]

² See ARAMAIC LANGUAGE, § 4.

³ נָכוֹן in 1 S. 23 23 (RV^{mg.} 'to a set place'); 𐤒𐤋 εἰς ετοιμου) occurs in a clause which 𐤒𐤋 omits, and is an obvious gloss; cp Wellhausen, *Bu.*, *SBOT*. It may come from 26 4.

and of 𐤒 (δπισω αυτοῦ εἰς σεκελαγ; cp v. 3δ) show how apparent the difficulty was to the translators. It is possible that *nākōn*, נָכוֹן, is a corruption from *mi'ōn*, מִיֹּוֹן, based on 23 25δ, and that the clause is an addition (cp 4δ with 3δ). H. P. Smith suggests נָכוֹן אֵל, 'to the point just before him.'

S. A. C.

NACHOR (נַחֲוֹר), Josh. 24 2, ΝΑΧΩΡ Lk. 3 34), AV, RV NAHOR.

NADAB (נָדָב), according to most scholars, shortened from JEHONADAB or NEDABIAH; but the common origin of all these forms seems to be the ethnic Nadabu [see NODAB]; Jehonadab and Nedabiah represent 'נָדָב' 'a Nadabite,' and similarly Abinadab and Aminadab represent 𐤒𐤁𐤁𐤁, Nadbam [Che.]; ΝΑΔΑΒ [BNFAL]).

1. Son of Aaron (Ex. 6 23, αδαβ [B^s], 24 1, δαδαβ [F], 28 1, etc.), see NADAB AND ABIHU, and note that Abihu, like Nadab, probably represents an ethnic (αβιουδ = Jerahmeel [Che.]).

2. Son of Jeroboam, king of Israel, slain by BAASHA (*q.v.*) whilst besieging Gibbethon (1 K. 14 20, om. BL, ναβαρ [A]; 15 25 ff., ναβαθ [B], ναβαρ [Bab. rev. 25 27 and B in v. 31], ναβαδ [A v. 27]). See CHRONOLOGICAL, § 32; ISRAEL, § 29.

3. A Jerahmeelite (1 Ch. 2 28 30).

4. Son of Jael in a genealogy of BENJAMIN (*q.v.*, § 9, ii. β), 1 Ch. 8 30 (αδαδ [B], 9 36). See *JQR* 11 110-112, §§ 10 ff., also KISH, NER.

NADAB AND ABIHU (נָדָב וְאִבְיָהוּ); on the names see above, and ABIHU, the two eldest sons of Aaron. The names occur in Ex. 24 1, and, although the origin of the passage to which this verse belongs has been much disputed, we may with a fair measure of confidence attribute it to the Yahwist, whose narrative, if we assume the results of criticism, is to this effect.¹

Whereas the Elohist makes the Israelites tremble at the thought of approach to God, the Yahwist represents Yahweh as bidding Moses take precautions against their overweening confidence and rash curiosity. The people are to be kept back under penalty of death from touching the mountain; but on the other hand the priests are to sanctify themselves and ascend Sinai with Moses. Accordingly Aaron, with Nadab and Abihu and seventy elders of Israel, accompanies Moses, and, though left behind by Moses when he receives the revelation of the 'ten words' as given in Ex. 34, they see the God of Israel and partake of a covenant meal.

Here we have, as marks of the Yahwist's style, the use of the divine name, the mention of Sinai instead of Horeb, the mention of priests as in Ex. 19 22, and the strong anthropomorphism of the theophany. With this the use of Elohim in 24 9-11 is quite consistent. It is the approach of mortal man to the deity that the narrator desires to accentuate. The mention of the 'elders' in 24 1 may suggest an admixture of documents, for they have not been mentioned in 19 20-25, and they are generally regarded as indicating the hand of the Elohist (Di. on Exod. 23; Kue. § 8, 14; but see Ex. 3 16-18 in Bacon, 17, 283; Comp. Holzinger, 211).

After all, even if 19 20-25 24 1 29-11 be from the Yahwist, it is still possible to believe that the names Nadab and Abihu have been interpolated by an editor who was familiar with P (so Now. *Heb. Arch.* 2 99, following Jülicher and Kue.). In that case the names must have been substituted for a bare mention of the priests which is requisite after 19 22 24. It is not inconceivable, however, that P himself borrowed the names 'Nadab and Abihu' from the Yahwist.

For the rest, the names Nadab and Abihu occur only in P—viz. Ex. 6 23 28 1 Lev. 10 Nu. 3 24 26 60 f.—and in 1 Ch. 6 3 [5 29] 24 1 f.† They represent an extinct clan of the Aaronidæ, for we are told that they died before their father and left no issue. P (Lev. 10) characteristically explains their death as a penalty for transgressing the ritualistic regulations. On the day of their entrance on the priestly office they laid incense on their fire-pans and offered 'strange fire,' and were

¹ Clearly vv. 1 f. and 9-11 are connected (Bu. *ZATW* 11 233), and had at first nothing to do with vv. 3-8, which have been interposed from another source. It seems scarcely less certain that 24 1 f. 9-11 are the sequel to 19 20-25 (Bacon, *Triple Trad. Exod.* 96), and the general consent of critics, with, however, the notable exception of Kuenen, sees in this latter passage the characteristic style of the Yahwist.

NADABATH

themselves consumed by fire from Yahwè. The expression 'strange fire' is enigmatical. Dillmann takes נָאֵב as equivalent to נֶפֶס, and understands an offering by fire which Yahwè 'had not commanded, and which was not made according to rule. Their brethren were warned against similar audacity in the rhythmical oracle:

In them that come near me will I show my holiness,
And before all the people will I manifest my glory.

Their bodies were removed by Mishaël and Elzaphan, Aaron's cousins, and lamentation, in which, however, the priests were forbidden to share, was made by the people. W. E. A.

NADABATH, AV **Nadabatha** (ΝΑΔΑΒΑΘ [A], ΓΑΒΑΔΑΝ [N], ΝΑΒΑΔΑΘ [V], נָאֵב [SYR.], *Nadaba* [Vg.]; Jos. *Ant.* xiii. 14, ΝΑΒΑΘΑ [so Niese, etc., ΓΑΒΑΘΑ, ΒΑΘΑΝΑ]), a place E. of Jordan mentioned in connection with Medeba (1 Macc. 9:37), from which the b'ne Janiri were returning when they were surprised by Jonathan (see JAMBRI, THE CHILDREN OF). Clermont-Ganneau (*J.J.*, May-June, 1891, pp. 541-543) proposes to read the name as *βαβαθά* (cp *αχαρ*, Θ¹, Josh. 7:1, for *achan*), and to identify the town with Rabbath Ammon, which is sometimes written *βαβαθ* in Θ (cp RABBAH). This is ingenious. A direct road connected Rabbath Ammon and Medeba, and we are told that the bride was 'the daughter of one of the great princes of Canaan.' A 'great prince' is more likely to have lived at Rabbath Ammon than at NEBO (*q.v.*), with which some have identified Nadabath. AV^{ms} gives 'or, Medeba' (after Jer.); but the bridal party was going, it seems, to Medeba. W. H. A.

NAGGE, RV **Naggai** (ΝΑΓΓΑΙ, according to Dalm. *Gramm.* 143, u. 5, for נַגְגַּי = נַגְגַּי, cp נַגְגַּי, NOGAH), a name in the genealogy of Jesus (Lk. 3:25). See GENEALOGIES ii., § 3.

NAHALAL, rather, as RV, **Nahalal**, as if 'a drinking place for flocks' (נָחַל לַאֲוִי, Josh. 19:15, ΝΑΒΑΛΛ [B], ΝΑΔΑΛΩΛ [A], ΔΑΔΑΛΩΘ [L]; 21:35, CEΛΛΑ [B], ΔΑΜΝΑ [AL]), or **Nahalol** (נָחַל לֹל, Judg. 1:30, ΔΩΜΑΝΑ [B], ΕΝΑΜΜΑΝ [A; ? = EN ΔΑΜΜΑΝ], ΔΑΜΜΑΝ [L]), a town in Zebulun, mentioned between Kattath and Shimron. In Talm. J., *Meg.* 1:1, it is identified with Mahlul—*i.e.*, probably *Ma'lul*, a village W. of Nazareth, in which view Schwartz, van de Velde, and Guérin concur; see, however, MARALAH. A hint may be gained from Θ¹ at Judg. 1:30 (see above), which suggests the reading 'Dimnah' instead of 'Nahalal.' These two place-names are in fact given together in Josh. 21:35, and the probability is that each name represents a fragment of Jerahmeel—*i.e.*, נַחַשׁ יְרַחְמֵל became נַחַשׁ = נַחַשׁ, and also נַחַשׁ = נַחַשׁ (see DIMNAH). And the question is whether Maralah and Nahalal (both from Jerahmeel) do not mean the same place. Double representation is not infrequent in the lists of P and Ch. T. K. C.

NAHALIEL (נָחַל יֵל), as if 'torrent-valley of God'; ΜΑΝΑΗΛ [B], ΜΑΝΑ[ΝΑ]ΗΛ [B^ab vid.], the Μ in these two forms representing the previous preposition נָחַל, ΝΑΔΑΛΙΗΛ [A], ΝΑΧΑΙΗΛ [L]), a station of the Israelites N. of RAMOTH, Nu. 21:19. Conder (*Heth and Moab*, 141 ff.) and G. A. Smith (*HG* 561 f.) identify it with the *Wady Zerkā Ma'in* (famous for its hot springs); but cp Oort, *Th. T.*, 1885, p. 247. Probably, however, Nahaliel is a corruption of Jerahmeel (cp NAHALAL); the text should run 'And from there to Beer-jerahmeel, and from Beer-jerahmeel to Bamoth.' Bamoth was near 'the Pisgah,' and both, according to the original story, seem to have been in the Jerahmeelite highlands. See BEER; NEBO, MOUNT, § 2; MOSES, § 16; WANDERINGS.

According to Conder (*Heth and Moab*, l.c.) 'the valley in the land of Moab, over against Bethpeor,' in which Yahwè (?) buried Moses (Dt. 34:6) was probably Nahaliel, 'God's valley'!

NAHAM (נָחַם; ΝΑΧΕΘ [B], -ΧΕΜ [A], ΝΑΟΥΜ [L],

NAHOR

a Judahite (1 Ch. 4:19). See NAAM, NAHATH. A connection with MANAHATH may be suspected. See also NAHUM, NEHEMIAH.

NAHAMANI (נָחַמָּנִי, § 62), a leader in the great post-exilic list (EZRA ii., §§ 86, 9), Neh. 7:7 (*ναμαν[ε]ι* [BA], *νααμ. [N]*, *ναμ. [I]*; cp RAAMIAH, end), || Ezra 2:2 omits (but Θ¹ *ναμαν*) = 1 Esd. 5:8 ENEMNIUS, RV ENEMNEUS (*ενημος* [BA], *μασανιμισος* [Bab^{ms}g.], *ναμαν* [L]; *emmanius* [Vg.]). Cp NAAMAN.

NAHARAI (נָחָרַי in 2 S., נָחַרַי in 1 Ch.), a Beerothite (see BEEROTH i.), Joab's armourbearer, 2 S. 23:37 RV, AV **Nahari**¹ (*γελωρε* [BA], *ariaia* [L]), 1 Ch. 11:39 (*ναχωρ* [BN], *ναραι* [A], *νοαραι* [L]).

NAHASH, CITY OF (נָחָשׁ יְשֵׁר), 1 Ch. 4:12 EV^{ms}g, EV IR-NAHASH.

NAHASH (נָחָשׁ, 'serpent,' § 68; ΝΑΔΑ [BNAL]). 1. An Ammonite king in the time of Saul (1 S. 11:1 f.; cp 12:12).

The present writer sees reason to think that, as in some other passages, 'Ammon' is misread for 'Amalek,' and that 'Jabesh-gilead' should be 'Beth-gilgal.' 'Amalek' and 'Jerahmeel' are ultimately the same name. 'Nahash' (see 2) was perhaps the king of Rehoboth. The principal family of Rehobothites bore the name Nahash or rather, as one should probably read, Achish; cp 1 S. 21:11 etc. 1 K. 2:39 f., where נַח, as often, is miswritten for נַחֲשֵׁי—*i.e.*, Rehoboth. See SAUL, § 1.

2. An Ammonite king, the father of HANUN, 2 S. 10:2 1 Ch. 19:2 (*ανα* [B]). The statement that he had 'shown kindness' to David has been much discussed. The 'kindness' cannot have been passed over in the records, and yet where does the traditional text mention it? The conjectures offered by Thenius and others are of no weight.

The text may contain some corruptions. 'Ammon' should probably be 'Amalek' and 'Jericho' (*v.* 5) should be 'Jerahmeel'—*i.e.*, Carmel in Judah. 'Achish king of Gath'—*i.e.*, Nahash king of Rehoboth—is probably the king who 'showed kindness' to David. See further, SAUL, § 1; MAACAH i.; SHOBACH.

3. The father of Shobi of Rabbath Ammon, 2 S. 17:27. The passage, however, is very corrupt (see SHOBI).

4. The name of the first husband of David's mother (Köhler), or of a second wife of David's father (Thenius), or of an unknown person (a Bethlehemite?) who was Joab's father (*We. JIG*⁽²⁾, 57, n. 1), 2 S. 17:25. But see ZERVIAH; there is deep corruption of the text.

Others think that 'Nahash' is a corruption produced by 'Nahash' in *v.* 27, and read 'Jesse' (see ABIGAIL), or, with Wellhausen (*TBS* 201; cp Gray, *HPV* 91), omit נַח נַחֵשׁ נַח as a corruption of נַחֵשׁ נַח (*v.* 27). This hardly goes far enough.

T. K. C.

NAHATH (נָחָת, ΝΑΧΕΘ [L]). 1. b. RUEUL (*q.v.*), b. Esau; Gen. 36:13 (*ναχομ* [A], *ναχθ* [D^{sil}.E], 17 *ναχθ* [A.D.], *ναχωρ* [E]), 1 Ch. 1:37 (*ναχες* [B], *ναχεθ* [A*], *ναχεθ* [A^a vid.]). Probably the same as NAHAM [*q.v.*] in 1 Ch. 4:19 (*We. de Gent.* 38) and NAAM (*q.v.*). Naam, Nahath, and Naham are all represented as Jerahmeelites (Che.).

2. An ancestor of Samuel (1 Ch. 6:26 [11], *καυαθ* [BA], *vaath* [L]); cp JAHATH, TAHATH, TOHU, EPHRAIM, § 12.

3. A Levite overseer (2 Ch. 31:13, *ναθ* [B]; see MAHATH, 2, *vaeth* [A], *vaath* [L]).

NAHBI (נָחְבִי; ΝΑΒ[ε]ι [BF], -Βα [A], -Βια [L], NAHABI [Vg.]), the Naphtalite sphy (Nu. 13:14 f.).

NAHOR (נָחֹר; ΝΑΧΩΡ [1:NADEL]), father of Terah, and grandfather of Abraham (Gen. 11:22-25, P; cp 1 Ch. 1:26), also represented as Terah's wife and Abraham's brother (Gen. 11:26, P; Josh. 24:2, redactional insertion). By Milcah he had eight sons, and by Reumah four more (Gen. 22:20 ff.). Among the former was BETHUEL (*q.v.*). We also hear of the 'God of Nahor' (Gen. 31:53, E) and the 'city of Nahor' (Gen. 24:10, J). 'Nahor' must, therefore, have filled an extremely important place in the old Hebrew traditional legends, and the difficulty of accounting for the name is surprising. 'Once,' says Dillmann, 'it must have been the name

¹ But NAHARAI in AV of 1611 A.D.

of a people of some importance'; but he grants that the echoes of the name which some have found (e.g. Maspero, *Struggle of the Nations*, 64) in the name of the village of Haura in the district of Sarāj (Sérūg), or in that of Haditha en-Naura, to the S. of 'Ana, are scarcely probable. It is much more natural to conjecture that the name is that of an Aramæan deity (Jensen, *Z. I.*, 1896, p. 300); but the true explanation is probably to be sought in another direction. Comparing the following clauses from Gen. 24¹⁰ and 27⁴³ (both J), 'He arose and went to Aram-naharaim, to the city of Naḥor,' and 'Arise, flee thou to Laban my brother, to Ḥaran,' we may be inclined to suspect that (in spite of the *h* in Naharaim), Naharaim, Naḥor, and Ḥaran are connected, and the considerations offered under GALEED may lead us to the conclusion that נַחֲרַיִם, נַחֲרֹר, נַחֲרָן and נַחֲרָן are all corruptions of נַחֲרָן. In Gen. 24¹⁰, Grätz and Ball have already corrected 'city of Naḥor' into 'city of Ḥaran'; they have thus taken the first step towards the emendation here proposed. Cp HARAN. Whether all the phases of the tradition of Haran and Naḥor have thus been recovered is doubtful. Cp JACOB, § 3, and for a further inquiry *Crit. Bib.*

As a consistent mythologist, Winckler (*G* 297) makes 'Naḥor' originally a form of the sun-god, adopting of course the plausible view that Milcah means 'queen (of heaven)'. T. K. C.

NAHSHON, or, in Ex. 623 AV, NAASHON (נַחֲשֹׁן), נַחֲשֹׁן [C]CΩN [BNAFL], b. Amminadab, brother-in-law of Aaron, and (in Nu., Ch.) 'prince' of the tribe of Judah; also (in Ch., Ruth, Mt) ancestor of David (Ex. 623 Nu. 17 [ναασων, B] 23 7 12 17 10 14 1 Ch. 210 f. Ruth 4 20 Mt. 14 f.). Cp ELISHEBA, JOSHUA.

The name might mean 'little serpent' (§§ 68, 77). If, however, a 'serpent-clan' is improbable, and if the affinities of 'Nahshon' and the names grouped with it are N. Arabian, it is a reasonable conjecture that Nahshon has arisen, partly by corruption, partly by expansion, out of חוּשָׁן (חוּשָׁן), Husham (Hushan), an Edomite name in Gen. 36 34 f. See NUN (end). T. K. C.

NAHUM (נַחֲוּם, § 62; ΝΑΟΥΜ [BNAQ]), 'rich in comfort, comforter' [is God]; cp נַחֲוּם [נחום] and see Stade, *Gram.*, § 227). The name occurs nowhere else in OT (נחום, Neh. 7 7 is a miswriting for נחום, Ezra 2 2; cp Neh. 10 26), but is found in Phœnician inscriptions (*CIS* 1, no. 123; cp נחום in 93 f.; cp A. Jeremias, *Beitr. zur Ass. u. sem. Sprachwissenschaft*, 3 [1894], 91).

The heading of the book is twofold. The first part is evidently late (note *masā*, and see ISAIAH ii., § 9); it describes the reference of the prophecy,

1. Heading. and is suggested by 28 [9] 37. The second part will become identical in form with the headings of Isaiah and Obadiah, and almost so with that of Habakkuk in its original form (cp also Am. 1 1), if we regard the opening word *sēpher* (סֵפֶר), 'book,' as a late editorial addition. The concluding word, 'the Elkoshite,' gives the name of the prophet's home, which lay, probably but not certainly, in the southern kingdom (see ELKOSHITE).

Nahum is mentioned in Tob. 144 [K] Sinaiticus; but only as the author of oracles on Nineveh, the fulfilment of which is yet to be expected. Of Nahum's life all that even the *Vita Prophetarum*

2. Date of prophecy against Nineveh. can tell us is that his prophetic message was confirmed by the wonder of the fall of Nineveh, and that he was buried in his native place—therefore not in Assyria (see ELKOSHITE). These statements have no point of contact with history. It is, however, a safe inference from the book itself that the decline of Assyria had begun in the prophet's lifetime. The capture of No-amon (the Egyptian Thebes) was already past (38 f.), and the capture of Nineveh by Cyaxares and Nabopolassar was still future when the prophecy was written. Thus we get both an upper and a lower limit of date for the composition of the work. We have next to ask which capture of Thebes is intended. The Egyptian Thebes was twice

captured by AŠUR-BANI-PAL (*q.v.*, §§ 1, 3). It is, however, only the second of these events (about 663 B.C.) that was a real conquest and corresponds in its details to the description in Nah. 38 f. (cp the inscription on the Rassam cylinder translated with parallels by Jensen, *KB* 2 160-169; also Schr. *KAIT*², 450 f.). Wellhausen (*KL Proph.*² 164) objects that the conquest of Thebes could not be meant, as in that case to the question 'Art thou better than No-amon?' Nineveh might with good reason reply, 'Obviously, for No-amon itself fell before me.' It is, however, as 38 f. clearly shows, on ability to resist an enemy, above all on natural strength of position and resources, that the comparison rests, and such a comparison is valid even if Thebes did fall before the Assyrians. Still, should new monuments bring to light a conquest of Thebes by some other power at a more suitable date, a rather improbable supposition, this would naturally be preferred. It is only if the prophecy of Nahum had to be assigned a date as near as possible to the conquest of Thebes by the Assyrians, that Wellhausen's objection would have to be allowed some weight, as in that case the abstract and impersonal nature of the comparison, and the absence of the taunt 'As thou hast done to her, so will others do to thee' would certainly be remarkable.

However, the fact that we know of only one imperial city and one great fortress adapted for Nahum's comparison by no means shuts us up to one of these two alternatives,—(a) to fix the date of his prophecy immediately after 663 (Schr., Kautsch, *Wi.*), and (b), if we insist on giving it a later date, to assume also a later capture of Thebes (We.). On the contrary, the catastrophe of the year 663 might very well be referred to even several decades later, more particularly if the city 'never recovered from it' (E. Mey. *GA* 354 [1887]).

On the other hand, it is intrinsically probable that the prophecy belongs to a time moderately near the actual fall of Nineveh, or at least when the fall of the Assyrian power might reasonably be hoped for. Such an occasion, indeed, Winckler¹ thinks he has found not long after 663 in the revolt of Šamaš-šum-ukin of Babylon against his brother Ašur-bāni-pal of Assyria (see Ašur-bāni-pal's account of it, *KB* 2 182 f.; cp also 3 1 194 f.), in which many of the vassals of Assyria, amongst them 'the West land' and thus *perhaps* also Manasseh of Judah, took part.

The situation may very well have been for a short time quite threatening for Ašur-bāni-pal, and a Judæan prophet—whether his own king were involved in the struggle or not, matters not—might very well look forward to the success of the revolting powers. In that case, however, in the opinion of the present writer, the prophecy must have been directed rather against the reigning king in his own person than against the capital of his kingdom. If Ašur-bāni-pal's twin brother really succeeded, what his success meant was the end of the Babylonian vice-regency and his own mounting the throne in Nineveh; no one could in such a case expect a real fall of Nineveh itself from its position as ruler of the world. Moreover, Nahum's description does not read as if Nineveh's own subjects or a great confederacy were marching against it; on the contrary, the reference appears to be to a single, unnamed, perhaps newly-risen nation, against which Nineveh, like Thebes (39), could at first oppose the masses of its own vassals (29 3 15 6-17).

Glad as we should be, then, to follow Winckler in using the book of Nahum to impart life to the dreary days of Manasseh, the intrinsic probabilities of the case furnish no support for his ingenious hypothesis. It was probably only with the death of the powerful Ašur-bāni-pal (626) that Assyria showed any visible decline in strength. It may have been shortly after this that Nahum uttered his prophecy, which would thus fall in the days preceding the first siege of Nineveh by Cyaxares. Absolute certainty with regard to the date is unattainable. Nor yet can we be sure whether Nahum had any definite hostile force in view, whether Mede or Scythian.

The date thus fixed can hardly be applied to the

¹ *AT Unters.* (1892), 124; *GI* (1895), 101. [So too, before Winckler, Prof. A. R. S. Kennedy, *Good Words*, Nov. 1891, p. 743.]

whole of the book. In chap. 1:1-2:3 Bickell and Gunkel, following up a hint first given by G. Frohnmeyer (see Del. on Ps. 9), have discovered 1:1-2:3 an alphabetical acrostic.¹ The order, it is true, has been dislocated; it is seen most clearly down to the letter י (א [v. 1], ב [v. 3], ג [v. 4], . . . ק [v. 7] and י [v. 5], ו [v. 6], ח [v. 7]); but no attempted restoration will lead to adequately certain results. This much at least must be conceded, however, to Bickell and Gunkel, that there once was a complete alphabet, and for this at least the whole of chap. 1 is required. Now, throughout the whole of this chapter there is no reference to Nineveh, and the (better preserved) first part is rather colourless and academic in tone. What it speaks of is not a particular but a universal judgment, resting upon the fundamental laws of the divine government (v. 7f.). We find here an approach, on the one hand, to the manner of the didactic alphabetical songs of a later age, and, on the other hand, to that of certain eschatological and apocalyptic appendices by the insertion of which the framers of the prophetic canon sought to adapt other older prophetic books (especially those nearest to Nahum—viz. Micah, Habakkuk, Zephaniah) to the tastes of the readers of their own day. This section of Nahum, therefore, we must, with Gunkel and Bickell, assign to a late date; Wellhausen had already observed, on 17, that 'the language of the Psalms here begins to make its appearance.' The editor of Nahum in this case has for once prefixed the more generalising supplement to the ancient oracle, instead of (as was usually done) making it an appendix; the reason perhaps being that Nahum's genuine prophecy had already been mutilated at the beginning. He did not, however, make the supplement himself; he found it among materials already before him; he himself attached no importance to its alphabetical form, and in its closing portion he obliterated this in the course of a revision which from v. 12 onwards is clearly designed to form a transition leading up to the special subject of the divine judgment. We cannot hope, therefore, that any attempt at restoration can be rewarded with full success.

The prophecy against Nineveh as we now have it begins with 2:2, immediately followed by v. 4 (cp We.). 2:4-11 (on the text of v. 4 see STEEL) predicts vividly and picturesquely the assault upon Nineveh (which is named in v. 9), the capture and sack of the city. Verses 12-14 contain an oracle of Yahwé against the king of Assyria, who is likened to a lion seeking its prey (in v. 14 read with Buhl and Wellhausen masc. suffixes of the 2nd pers.). 3:1-7 again prophesies war, desolation, and the deepest humiliation for Nineveh (named in v. 7) as punishments for its deeds of violence and treachery. Verses 8-11 (not necessarily the beginning of a new section) justify the prophecy by reference to the similar fate of the Egyptian Thebes (see NO); vv. 12-14, again, contain very vivid touches drawn from incidents of the war, especially the defence by the besieged; vv. 15b-17 picture the melting away of the Ninevite forces by comparing them with swarms of locusts vanishing as quickly as they have come. Finally, vv. 18 f. are addressed to the king of Assyria after his power has fallen to ruin.

Thus the entire prophecy of Nahum admits of division into three sections, each of which may perhaps have originally been a separate prophecy:—2:2 4-11 2:12-14 3. The last of these is possibly made up of several pieces. Billerbeck (ap. Jeremias, as above) proposes to introduce 3:12-15a (ח [v. 7]) after 2:4 so as to bring together in one

¹ Cp ZATW, 1893, pp. 223 ff.; SHAW, Phil.-hist. Classe, 1815, 1894; Gunkel, *Schöpfung u. Chaos* (1895), 102. Further attempts are made by Nowack, *Kleine Propheten*, 1897, and O. Happel, *Der Psalm Nahum*, 1900. See also G. B. Gray, *Expos.* Sept. 1898; Cheyne, *ib.* Oct. 1898 (who contribute fresh suggestions); W. R. Arnold, ZATW, 1901, pp. 225-265.

place the descriptions of war and siege with the effect of enriching them; but this is surely quite unnecessary.

All the pieces in question, by their similarity of spirit, as well as by the richness of fancy and power of

5. Possible restoration of text.

poetical representation which they exhibit in common, declare themselves as a whole to be the work of a single writer who in 1 is designated as Nahum of Elkōsh or Elkēshē (see ELKOSHITE, b). In details we are left uncertain as to what really ought to be assigned to the author, by many corruptions of the text. The unusual difficulty of the book arises from the same cause, in part at least. The corruption is of ancient date, for G gives but little help.¹ Valuable contributions towards a restoration have recently been made by Buhl (ZATW 5:179 ff. [1885]), and still more by Wellhausen (AZ. Proph. [3]) on chap. 1, compare also Bickell and Gunkel [see note, col. 3259; also, on chaps. 1:12-2:14 and chaps. 2:3, Ruben's articles cited at end of article]. Much, however, still remains to be done.² [Ruben has also restored the text of chap. 3; but his results are still unpublished. He has succeeded in emending the impossible מנורח of 3:17, as pointed out in SBOT on Is. 33:18; cp SCRIBE.]

It was indicated by the writer of the present article, as far back as 1882, that in chaps. 2 and 3 there occur occasional examples of the *kīnā* or elegiac

6. Metre.

verse—the halting verse with two members, a shorter and a longer. Two such verses are found in 2:2, one in v. 7, two in v. 9 (as restored), two in v. 11, with a supernumerary member, two in v. 13, two in 3:8 (as restored), four in v. 11 f., three in v. 14 15a, five in v. 18 f. (delete עילך in v. 19). Are we to suppose that the 'elegiac' metre was still more prominent in the original text, and that therefore the attempt to recover this text must include the search for 'elegiac' verses (cp *New World*, 1893, pp. 46 ff.), textual criticism being thus supplied at once with a standard and an instrument? In some cases this question must be answered affirmatively. Thus, 2:12 cannot possibly have had a different metre from vv. 11 13; 3:9 10 13 were of course constructed on the same model as 3:8 11 12 14 15a and still show unmistakable traces that this was the case; the same assumption is very natural for 2:8 and 2:10. To apply this method further is tempting, but not free from risk. If the description in 3:1-7 and in the (closely related) threatening in 2:14 [13] were originally written in 'elegiac verse,' their present form shows that they must have been greatly modified by an editor. This is also the only portion of the prophecy against Nineveh which contains the divine name (2:14 [13] 3:5), and which has a certain theological colouring, reminding one of Ezekiel; elsewhere the prophet expresses simple human indignation at Nineveh's violent deeds, and describes war as if it were a natural phenomenon—a storm which no one thinks of seeking to explain.

² In 2:8 the word מלכה, 'queen,' seems to have dropped out before לוחה, although the text is not quite healed by its restoration. [For העלחה Paul Ruben, *Acad.* March 7, 1896 (cp June 20), suggests העלחה, 'the Lady'; cp Ass. *ctellu*, fem. *ctellitu* (see ATHALIAH); we must then suppose העלחה to be a corruption of some verb parallel to לוחה, and insert מלכה as proposed already.] In 2:9 restore (after G) מלכה והנה, and then delete מלכה as (correctly) explanatory of והנה; it may be presumed further that after the second מלכה אמתו has fallen out; in 2:14 perhaps we ought to read מלכה רבקה instead of the רבקה of G assumed by Buhl and Wellh.; in 3:8, adopt Wellh.'s emendations, but also delete הן מים מביב as a gloss. [On 2:1 cp Cheyne on Is. 52:7 SBOT.]

NAIDUS (ΝΑΙΔΟΣ [B], ΝΑΕΙΔΟΣ [A]), 1 Esd. 9:31 = Ezra 10:30. BENAIAH, 8.

NAIL. 1. נַיִל, *yāthēd* (πάσσαλος, *pasillus*), a peg, pin, or nail, driven into the wall (Ezek. 15:3, EV 'pin,' Is. 22:25) or more especially a 'tent-pin' driven into the earth to fasten the tent (Ex. 27:19 35:18 38:31 Judg. 4:21 f. Is. 33:20 54:2); see TENT. Hence to drive a pin or fasten a nail can mean to give any one a firm and stable abode (Is. 22:24), an image still frequent among the Arabs (examples in *Gen. Thes.*, s.v.). The figure of a pin or nail is also applied to a prince (so *Co* par-phrases Is. 22:23 25) on whom the care and welfare of the state depend (Zech. 10:4, || מָנָה, see CORNER-STONE).

2. פַּסְסָרוֹת, only in pl. פַּסְסָרוֹת, *masmērōth* (Jer. 10:4), *mismerōth* (3 Ch. 8:9), פַּסְסָרוֹת, *masmērīm* (Is. 41:7), פַּסְסָרוֹת, *mismerīm* (1 Ch. 22:3) (פָּסָר; cp Jn. 20:25) applied to nails of iron; פַּסְסָרוֹת, *masmērōth*, used metaphorically in Eccles. 12:11 (see RV).

NAIN (ΝΑΙΝ [Ti. WH], some MSS ΝΑΕΙΝ, ΝΑΕΙΜ), a city (note the 'gate' and the 'great multitude' of v. 12) where Jesus restored to life a

1. Geographical problem. dead man who was being carried out to burial (Lk. 7:11 f.). According to Eusebius (*OS* 285 41) it was 12 (but Jerome [143 22] says 2) R. m. S. of Tabor, near Endor. This may be held to point to the hamlet now called *Nain*, which is at the base of the Nely Dahi (or Little Hermon), and is a most miserable nook, though the associations of the gospel-story enable one easily to forget this; the situation, too, is charming—on one side the western base of Little Hermon, on the other the broad expanse of Esdraelon. But is the site correct? Though there are rock-tombs near the modern Nain, this is not enough to prove that there was ever a walled city on this site. The Midrash (*Bēr. rabba*, 98, on Gen. 49:15) does indeed mention a locality called Nain; but this may be identical with the land of Tin'am (תַּנְעַם) mentioned just before. There is also a special reason for doubting the accuracy of the traditional text. The parallelism between the miracle of the raising of the widow's son of 'Nain' and that of the widow's son of ZAREPHATH (*q. v.*) is so close (cp 1 K. 17:8-24) that one is justified in suspecting that there has been a combination of the story of Elijah's merciful miracle with the similar one of Elisha (2 K. 4:18-37), and that Nain, or Naim, should rather be Shunem (שׁוּנַם; for a parallel see SALIM). Nain or Naim may be a scribe's correction of the fragmentary שׁוּנַם. He knew that Jesus had to pass by Esdraelon, and that there was a locality called Nain in the old territory of Issachar (see the Midrash above), and fixed its site not so very far from the true scene of the narrative, for it is but a short hour's ride from Shunem to the modern Nain.¹

Nestle (*Philol. Sacra*, 20) ingeniously, but less plausibly, suggests that Nain might perhaps be transliterated נַיִם, and rendered 'the awakened.' It is satisfactory that Nestle, too, recognises the doubtfulness of the locality assigned in Lk.

It should be noticed in conclusion that if Tischendorf's reading 'τῆ ἡμέρας' (AV 'the day after') be accepted in v. 11, the evangelist did not know the distance between Capernaum and Shunem. This will not at all impair the effect of his narrative, for the combination of the Sermon in the Plain, the Capernaum cure, and the still greater marvel of 'Nain' is the finest possible preparation for the message in Lk. 7:22. We may indeed save Lk.'s credit as a geographer by adopting the alternative reading ἐν τῷ ἑξῆς (RV, 'soon afterwards') with Treg., WH, and B. Weiss. Perhaps neither reading is correct, and we should restore ἐν τῇ ἡμέρᾳ (9 37).

It is true, Lk. states his object to be to produce an orderly recital of the things most confidently received among Christians (Lk. 1:1); but the principle of this arrangement was not purely historical: ideas had an overpowering influence on the

2. Method of Luke. ¹ It is probably true that the gospel narratives (and not in their earliest form) influenced some of the place-names in Palestine in the early Christian period.

mind of the arranger. Jesus could not, he felt, be inferior to Elijah and Elisha, and a miracle like those of Zarephath and Shunem must necessarily have followed the wonderful cure at Capernaum. According to a saying of Jesus current in some circles the Master had remarked on the limitations of the beneficent activity of Elijah and Elisha. It is Lk. who transmits this saying (Lk. 4:25-27), though he gives it a setting which makes it seem unnecessarily and unintelligibly provocative. If we place this saying in connection with such a narrative as that of 'Nain,' we shall no longer find it unintelligible. Lk. is the Pauline evangelist, and expounds by narratives the universality of the grace of Jesus Christ. Not of the gracious Master could it be said that the only leper healed by him was a Syrian, or that the only widow's son restored by him to life was a Sidonian. Whether Lk. himself devised the 'Nain' story, is uncertain. We do know, however, that he devised an introduction to the message to John the Baptist (*v. 22*) already recorded in Mt. 11:4 *f.*, which, however harmless in its intention, cannot be based on facts because it radically misunderstands the symbolic language of that grand Messianic utterance. It is possible therefore that the beautiful 'Nain'-story (or rather Shunem-story?) is in no sense traditional, but the expression of the tender and deeply thoughtful nature of Lk.

T. K. C.

NAIOTH (נַיִית [Driv.] or נַיִית [Kön.] Kt.; נַיִית, Kr.; [Ν]ΑΥΑΘ [BL], ΝΑΥΙΩΘ [A], נַבְנָה [Pesh., transposing ' and '], ΓΑΛΒΟΥΑΘ [Jos. Ant. vi. 115]; *nuath* [Jer. in *OS* 36 12]), usually supposed to be the name of a place in Ramah, where David and Samuel took refuge when Saul was pursuing David, 1 S. 19:19 22 *f.* (*dis*), 20:1. Except in 19:18 it is always followed by נַבְנָה, 'in Ramah,' and in this passage too Wellhausen following G, would restore נַבְנָה. It is most unlikely, however, that a place within a place would be specified, especially in this late narrative (cp SAMUEL, BOOKS OF, § 4). Tg. Jon. explained the word 'school' (בֵּית מִשְׁנָה), thus making נַיִית an equivalent of בֵּית מִשְׁנָה in 2 K. 22:14 (AV, following Tg., COLLEGE [*q. v.*]). This view, however, though supported on grounds of its own by Ewald (*Hist.* 3:49 *f.*), is philologically too fantastic to be adopted (see Driver, *TBS* 125), though it may safely be added that no explanation of the word can be made more probable.

Plainly the word is corrupt, and the best emendation of נַיִית is perhaps נַבְנָת הַיְהוּא, 'Gibeah of Jerahmeel' (cp Jos. γελβουαθ). The place intended is that mentioned in 1 S. 10:5, where MT and G read הַיְהוּא 'נ' (EV 'the hill of God'), but where we should (supported by several parallel cases) certainly read נַבְנָת הַיְהוּא, 'Gibeah of the Jerahmeelites.' What the Jerahmeelites have to do in this connection is explained elsewhere (see SAUL, § 2). Cp H. P. Smith, *ad loc.*, who, however, cannot throw any light on the word.

T. K. C.

NAME. 'Name' and 'names' are inseparable departments of the same subject. The conception

1. Name= nature. of 'name' ideally precedes the production of names; the very first name that can be supposed to have been given presupposes the conception of 'name.' When (the Hebrews said) the first man called the beasts and birds by their names (Gen. 2:20) it was because, as Milton (*Paradise Lost*, 8:352 *f.*) puts it, he 'understood their nature'—because the (Hebrew) names he gave them were the natural and adequate expressions of their innermost beings. And the wise man commonly known as the Preacher assures us (Eccles. 6:10a) that 'whatever comes into being, long ago has its name been pronounced.' When, however, nothing had come into existence, there could be no names, as indeed there could be no name-giver. As the Babylonian creation-epic says:—

There was a time when, above, the heaven was not named,
Below, the earth bore no name.

NAME

We can now consider the terms for 'name.' In Hebrew, as in Assyrian, there are two synonyms. (1)

2. **Terms.** זָכַר, *zāker*, is commonly rendered 'remembrance,' but is certainly connected with the Ass. *sikīru*, 'to name,' 'mention' (whence *sikru*, 'name'); (2) זָמַר, *šēm*, corresponds to the Ass. *šumu*. For *zāker* we may quote Ex. 17¹⁴, 'I will blot out the name (EV remembrance) of Amalek from under heaven'; Ps. 34¹⁶, 'to cut off their name (EV the remembrance of them) from the earth'; Ex. 3¹⁵, 'this is my name for ever, and this is my title (EV my memorial) unto all generations'; Ps. 30⁵ and 97¹², 'give thanks to his holy name' (so RV; AVMS 'to the memorial of his holiness'); Hos. 12⁵[6], 'Yahwè is his name' (EV 'his memorial'). The same word *zāker* may be used of the recital or solemn mention of God's titles to honour and gratitude in the cultus; hence a psalmist says (Ps. 6⁵[6])—

In (the world of) death there is no mention (EV remembrance) of thee;

In Sheol who will give thee thanks?

The other word (*šēm*) is much the commoner. The root-meaning is uncertain, nor is there any valid reason for thinking that the primary meaning in usage is 'monument' (as if from 'to be high'?).

In 2 S. 8¹³ the text is certainly, and in Gen. 11⁴ most probably,¹ corrupt. In Is. 55¹³ we read that the new

3. OT references. splendour of nature which will accompany the deliverance of Israel 'will be to Yahwè for a name, for an everlasting sign that shall not be cut off.' 'Monument' would not be unsuitable here; but the familiar sense 'renown' will do perfectly well (cp Dan. 9¹⁵ EV, 'thou hast gotten thee renown'). In Is. 56⁵, 'a memorial (see HAND) and a name better than sons and daughters,' the word 'name' implies ideas more mystic and primitive than would be suggested by the simpler word 'monument.' The idea seems to be that God-fearing eunuchs will, even in the world of death, enjoy the consciousness of the honour still paid to them upon earth by the congregation of worshippers in the temple. The popular religion clung to the primitive veneration of ancestors (cp 1 S. 24²² 2 S. 18¹⁸, with H. P. Smith's notes), and the prophetic writer appears to mean that no cultus of dead ancestors will give such satisfaction to those ancestors as the honorific mention of the names of pious proselytes in the community of Zion will give to these proselytes even in death. This may seem to us a strange idea; but the passage quoted above from Ps. 6⁵ (cp 88¹¹) may strike us as still stranger, if we consider what it implies. Why should the great God, Yahwè, be moved to pity by such a consideration as the psalmist offers? We must not weaken the passage too much. It certainly contains the idea that worshippers are needful to Yahwè, because the divine life would lack some touch of perfectness without the tribute of reverent and grateful praise. This idea may be unphilosophical; but it is profoundly religious. In some form, the idea of sacrifice is essential to a fervent religion, and to the noblest psalmists true sacrifice is the recital of Yahwè's gracious acts, each of which calls for the ascription to Yahwè of a new title. Now, to primitive men the name is the expression of the personality. Yahwè's worshippers, therefore, from a primitive point of view, enable God's personality to find that fuller expression which it constantly needs.

The truth of the statement that the name is (ideally at least) the manifestation of the personality, and consequently may even be prophetic of the fortunes of the person named, will be clear if we look at a few of the OT narratives; see, e.g., Gen. 35¹⁰, 'Thy name shall no more be called Jacob, but Israel shall be thy name,' and *ib.* 18, 'she called his name Ben-oni, but his father

¹ Probably no one practised in textual criticism will fail to see that זָמַר וְיָשָׁרָה לְפָנָיו שֵׁם comes out, a variant to זָמַר וְיָשָׁרָה which precedes. מִן

NAME

called him Benjamin. It is true, this intimate connection between name and character or fortune is not always prominent. Names are often given, according to the narratives, for some apparently accidental reason; it is when the person named has some special dignity or pre-eminence among the leaders of Israel that the name has evidently a mystic significance. The prophets make great use of the idea. Thus—

Is. 1²⁶, 'afterward thou shalt be called The city of righteousness, the faithful city.'

96[5], 'his name shall be called Wonderful, counsellor (?), etc.'

63¹⁶, 'thou, O Yahwè, art our father; our redeemer from of old is thy name.'

Jer. 38¹⁶, 'this is [the name] by which she shall be called—Yahwè is our righteousness.'¹

Ezek. 48³⁵, 'the name of the city from that day shall be, Yahwè is there.'

Mt. 1²¹, 'thou shalt call his name Jesus, for he shall save his people from their sins.'²

This connection of name and personality leads to a singular use of *ὄνομα* in the NT. In Acts 1¹⁵ and Rev. 3⁴ 11¹³, *ὄνόματα* has the sense of 'persons' (cp, however, Nu. 1²⁰); Deissmann produces unexpected parallels for this from the Egyptian papyri (*Neue Bibelstudien*, 24 f.).

Before passing on to the great religious phrases, 'the name of Yahwè,' 'the name of Jesus,' we must not

4. Idiom 'to call a name upon.' omit to mention the idiom, 'to call the name (of some one) over.' For examples see, first, 2 S. 12²⁸, where Joab in his message to David respecting Rabbath-ammon says, 'lest I take the city and my name be called upon it.' Here we see one of the most obvious secular applications of a phrase which OT writers most frequently employ in a religious context. Eastern warriors were accustomed to change the name of a conquered city. The citadel of the Jebusites, conquered by David, became 'David's burg'; exactly similar cases occur in the Assyrian inscriptions. Joab—that daring Miṣrite adventurer (see ZERUIAH)—threatens David that he will not allow Rabbath to go out of his hands if he, not David, is the conqueror; 'Joab's burg' shall become its name.³

The other passages are 2 S. 6² Is. 4¹ Dt. 28¹⁰ 1 K. 8⁴³ (= 2 Ch. 6³³), Jer. 7¹⁰ f. 14³⁰ 14⁹ 15¹⁶ 25²⁹ 32³⁴ 34¹⁵ Am. 9¹² Is. 63¹⁹ 2 Ch. 7¹⁴ Dan. 9¹⁸ f.; cp Ps. 49¹¹[12].⁴ Of these, Is. 4¹, like 2 S. 12²⁸, gives the phrase a secular application. In the depopulated condition of Jerusalem, seven women will say to one man, 'Only let thy name be called over us'—i.e., 'let us enjoy the benefits of having a husband for owner and consequently for protector.' In Am. 9¹² another secular application is implied. Although it is Yahwè who speaks, and a relation of Yahwè which is described, the form of expression is distinctly secular. 'The remnant of Edom' has, at least in one sense of the words, no religious relation to Yahwè; it is as Yahwè's property that his 'name' is said to have been called over it (and over the other hostile nations); for the sufferings involved for Edom in its anticipated subjugation by the Jews Yahwè, as here represented, has no sympathy.

All the other passages, however, imply that ownership involves an interest in the welfare of the persons or things owned. The complaint of the Jewish community in Is. 63¹⁹ is, not that they are owned by Yahwè, but that, although his property, they are treated by him as if his 'name' had not been 'called over' them; compare this with Yahwè's statement in Jer. 25²⁹, and Daniel's prayer in Dan. 9¹⁸.

¹ The name surely belongs to Jerusalem, not to the ideal king, as in the second form of the same prophecy (23⁶). See *Jew. Rel. Life*, 95.

² We may treat these words, put into the mouth of an angel, as prophetic.

³ Joab is wise enough to give David a chance of averting from himself this dishonour. Not improbably, however, Joab's reported message to David (27. 26 f.) is due to an editorial desire to reconcile two different traditions of the capture of Rabbath-ammon (if we assume that to be the right reading; see, however, *REHOBOTH*).

⁴ Cp Kautzsch, *ZATW* 6 18 f. (1886).

NAME

In Dt. 28¹⁰ we read that all the other peoples will be afraid to touch righteous Israel, because they will see, by Israel's prosperity, that Yahwè's 'name' must have been 'called over' it; in *v.* 9 the parallel phrase is 'a holy (*i.e.*, consecrated) people,' and in Jer. 14⁹ for Israel to be the bearer of Yahwè's name is synonymous with having Yahwè in its midst, and gives a right (but not an indefeasible right) to protection; the same idea is expressed in 1 K. 8⁴³, where (as in Jer. 7¹⁰, etc.) it is the temple over which the divine 'name' has been called.

It is plausible to give a similar interpretation to the phrase descriptive of the ark in 2 S. 6², in spite of the difficulty caused by the position of וַיִּקְרָא (see Wellh. *TBS*, *ad loc.*). See also Bar. 2¹⁵ 26¹ Macc. 7³⁷, and, in the NT, Ja. 2⁷ (on which see CHRISTIAN, § 1, col. 752), Acts 15¹⁷ (= Am. 9¹²).

There still remain two passages, Ps. 49¹¹ [12] and Jer. 15¹⁶. Of the passage in Ps. 49 there are several renderings. That of Wellhausen in *SBOT* is, 'even should they have called whole countries their own,' which implies that עַל כָּל אֶרֶץ בְּיָמָיו may have the same meaning (so, too, Hupfeld). There is good reason, however, for thinking that this is not what the psalmist meant; the text is more than probably corrupt.¹ The passage in Jer. 15, if correctly transmitted, is singularly beautiful as a record of prophetic experience. Jeremiah says that not only externally but also internally he has become entirely the possession of his God—'thy word (= revelation) became to me a delight and the joy of my heart, for thy name has been called upon me, O Yahwè Šebäöth.' Probably, however, for וַיִּקְרָא 'and . . . became,' we should read וַיִּהְיֶה 'and let . . . become,' making it a prayer of Jeremiah (cp Cornill and Duhm *ad loc.*).

In this connection we may refer to the naming of a son by the father. It is true that the name might be given by the mother (Gen. 29³⁰ 35¹⁸, 1 S. 4²¹), and no doubt was given by her generally in the primæval period of matriarchy (cp KINSHIP, § 4); but in the period of monandrous 'baal'-marriage (KINSHIP, § 9 *ff.*) the priority of right belonged to the father (Gen. 16¹⁵ 17¹⁹ Ex. 2²² 2 S. 12²⁴² Is. 8³ Hos. 1⁴ *ff.* Lk. 1¹³ 6³), who could, if he chose, alter the name given to the child by the mother (Gen. 35¹⁸). The son, in fact, should theoretically have been named by the father, as a sign of lordship.

Another phrase which may be quoted here is 'a new name.' In Is. 62² it is said of Jerusalem that at its restoration it shall be called by a new name (שֵׁם נְכוֹחַ, *ὄνομα καινόν*), and, according to Is. 65¹⁵, Yahwè will call his servants by another name (שֵׁם, again, *ὄνομα καινόν*). Further, in Rev. 2¹⁷, we hear of a 'new name which no man knows but he that receives it.' It is doubtful whether this means a new name for each believer, or the new name of Christ (cp 3¹² 19¹²). The former view is more probable. When born into a new world, each believer will need a new name, suggestive of his new character and standing. We may venture to compare the giving of a new name to kings (as notably in Egypt) at their accession; cp 2 K. 23³⁴ 24¹⁷.³ The new name in Rev., *i.e.*, is also said to be hidden from all but its bearer. This reminds us of the feeling, so widespread among savage tribes, of the danger of disclosing one's name, because this would enable an enemy by magic means to work to one's personality some deadly injury (cp Frazer, *Golden Bough*⁴, 1⁴⁰⁴ *ff.*).

We now pass on to those great religious phrases 'the name of Yahwè,' 'the name of Jesus' (or, of the Christ). The 'name' of a god is properly his manifestation, and since one form of this manifestation is the name (presumably a revealed name) given to him in the cultus, the 'name' of Israel's god is Yahwè, as the name of Moab's god is Chemosh. Whatever the primitive meaning of the Heb. *šm* and the Ass. *šumu* may have been, it was not merely 'name' in our sense of the word, but something much fuller which would be applicable to all forms of divine manifestation. 'Name,' 'glory,' 'face,' are parallel terms. The divinity in the so-called *Mal'āk* or 'Angel'¹ of Yahwè (cp ANGEL, § 3) is sometimes called the *pānim* (פָּנִים) 'face,' sometimes the *kābōd* (כְּבוֹד) 'glory,' sometimes the *šm* (שֵׁם) or 'name' of Yahwè (Ex. 23²¹ 33¹⁴ 18²² *ff.*; cp 32³⁴ and Is. 63⁹). The ark, too, is described as a dwelling-place of the 'glory' (1 S. 4²²), and of the 'face' (Nu. 10³⁵, פָּנֵי, 'from thy face'), but not of the 'name,' of Yahwè. The reason is that the 'name' of Yahwè came to be specially connected with the cultus—*i.e.*, with the temple, where the solemn invocation of Yahwè took place. The connection of the 'name' of Yahwè with the *Mal'āk* or Angel was too primitive to be abandoned; but the ark of Yahwè, not being as primitive in conception as the Angel, never succeeded in annexing the third of the synonymous terms—*viz.* 'name.' As time went on, however, this term, which was originally associated with the cultus at all sanctuaries (Ex. 20²⁴), became more and more closely attached to the temple (see 1 K. 8¹⁶ 29⁹ 3³, Is. 18⁷, Jer. 7¹²). And how does Yahwè continue to make known his name? By answering the prayers offered in (or, towards) the temple—*i.e.*, by delivering his people (Is. 52⁶ 64¹). Hence, in Ps. 20¹ [2], 'The name of the God of Jacob place thee in security' means, 'The God whom thou hast invoked answer thy prayers.' Indeed, in all such passages (*e.g.*, Ps. 20⁷ [8] 44⁵ [6]) we may safely say that there is a tacit reference to the invocation of God's name in the sanctuary. Thus the prayers of faithful Israel are a substitute for the presence of the ark in the Israelitish host, and by prayers are meant invocations of Yahwè as the promise-keeping God of Israel.²

¹ The number of conflicting explanations is significant.
² Kt. וַיִּקְרָא; Kt. וַיִּקְרָא, with reference to *v.* 25⁶.
³ There is surely some mistake in the document. Either the names given by Necho and Nubuchadrezzar respectively, were not those here given (cp the case of the son of Necho I., *KAT*², 166), or else the change of names was not due to these sovereigns of Judah but to the religious authorities. See MATTANIAH, SHALLUM.

NAME

name of Yahwè, 'the name of Jesus' (or, of the Christ).

The 'name' of a god is properly his manifestation, and since one form of this manifestation is the name (presumably a revealed name) given to him in the cultus, the 'name' of Israel's god is Yahwè, as the name of Moab's god is Chemosh. Whatever the primitive meaning of the Heb. *šm* and the Ass. *šumu* may have been, it was not merely 'name' in our sense of the word, but something much fuller which would be applicable to all forms of divine manifestation. 'Name,' 'glory,' 'face,' are parallel terms. The divinity in the so-called *Mal'āk* or 'Angel'¹ of Yahwè (cp ANGEL, § 3) is sometimes called the *pānim* (פָּנִים) 'face,' sometimes the *kābōd* (כְּבוֹד) 'glory,' sometimes the *šm* (שֵׁם) or 'name' of Yahwè (Ex. 23²¹ 33¹⁴ 18²² *ff.*; cp 32³⁴ and Is. 63⁹). The ark, too, is described as a dwelling-place of the 'glory' (1 S. 4²²), and of the 'face' (Nu. 10³⁵, פָּנֵי, 'from thy face'), but not of the 'name,' of Yahwè. The reason is that the 'name' of Yahwè came to be specially connected with the cultus—*i.e.*, with the temple, where the solemn invocation of Yahwè took place. The connection of the 'name' of Yahwè with the *Mal'āk* or Angel was too primitive to be abandoned; but the ark of Yahwè, not being as primitive in conception as the Angel, never succeeded in annexing the third of the synonymous terms—*viz.* 'name.' As time went on, however, this term, which was originally associated with the cultus at all sanctuaries (Ex. 20²⁴), became more and more closely attached to the temple (see 1 K. 8¹⁶ 29⁹ 3³, Is. 18⁷, Jer. 7¹²). And how does Yahwè continue to make known his name? By answering the prayers offered in (or, towards) the temple—*i.e.*, by delivering his people (Is. 52⁶ 64¹). Hence, in Ps. 20¹ [2], 'The name of the God of Jacob place thee in security' means, 'The God whom thou hast invoked answer thy prayers.' Indeed, in all such passages (*e.g.*, Ps. 20⁷ [8] 44⁵ [6]) we may safely say that there is a tacit reference to the invocation of God's name in the sanctuary. Thus the prayers of faithful Israel are a substitute for the presence of the ark in the Israelitish host, and by prayers are meant invocations of Yahwè as the promise-keeping God of Israel.²

Against one serious temptation the Israelitish thinkers and writers were consistently proof; they never allow us to think that the 'Name of Yahwè' is a separate divine being from Yahwè. Like the *Mal'āk* Yahwè (in whom, indeed, according to Ex. 23²¹, Yahwè's name is), the Name of Yahwè is virtually equivalent to Yahwè (note the parallelism in Ps. 20¹ [2]). Such a phrase as 'Ashtoreth, the name of Baal' (עֲשֵׂתוֹרֵת שֵׁם בַּעַל, *C/S* 1, no. 3, l. 18) has no analogue in Hebrew writings. Certainly in Is. 30²⁷ we find the startling expression 'the name of Yahwè cometh'; but the context shows that Yahwè himself is meant, and in the || passage, 59¹⁹, 'the name' alternates with 'the glory' of Yahwè (cp Ex. 33¹⁸ *ff.*).

In Lev. 24¹¹, Dt. 28⁵⁸, we find שֵׁם used independently (in Lev. 24¹⁶, however, שֵׁם should be 'שֵׁם', see § Vg.).

7. Name The son of an Israelitish woman whose father was an Egyptian (so EV; but מִצְרַיִם = Yahwè. might mean a Muṣrite; cp MIZRAIM, § 2^b, MOSES) blasphemed the name and cursed; therefore (*v.* 23) he was stoned; so P. Another late writer makes Moses exhort the Israelites to 'fear this glorious and fearful name, Yahwè thy God. With this, G. Hoffmann (*Ueb. ein. Phön. Inschriften*, 47 *ff.*) compares

¹ The use of the term מַלְאָכִים as a term for the temporary manifestation of Yahwè as a director and agent has not yet been explained. Great difficulties in expounding the biblical notices consistently will be overcome if we suppose that the term originally employed was, not מַלְאָכִים, 'messenger,' but מְלָכִים, 'king.' The inferior divine beings, afterwards described as 'angels,' were—if this is correct—originally designated מְלָכִים, 'kings.' The objection to calling them either 'gods' (אֱלֹהִים) or 'kings' (מְלָכִים) naturally led to the abandonment of the former term (אֱלֹהִים), and the modification or transformation of the latter (מְלָכִים).

² Cp Lagarde's explanation of the name Yahwè as 'promissorium stator.'

NAME

a passage in the inscription of Eshmun'azar (*CIS* 316 *f.*) which he reads אֱשְמוֹן אַזָּר (a title appended first to מַלְכֵי, Astarte, and then to אֱשְמוֹן, Eshmun), and renders as 'supreme Person' (*uomen = numen*). He remarks that the object of the phrase was to avoid seeming to bind the entire divinity to the spot where the temple was, and illustrates the form of the expression by Ps. 47 to 926 on the one hand, and Ps. 718 93 922 on the other; in the latter passages, following Hitzig, he thinks (but here perhaps few will follow him) that מִלְכֵי is to be connected adjectivally with אַזָּר.

The exegesis of the NT passages in which the term 'name' occurs is not always easy. We have no right to presume that OT presuppositions by themselves are sufficient to account for the expressions. Passages like Acts 19:17 ('the name of the Lord Jesus was magnified') cause no difficulty; but what is to be said of certain phrases in the same chapter, 'they were baptized into the name of the Lord Jesus' (v. 5), and 'to name over those who had the evil spirits the name of the Lord Jesus' (v. 13)? Elsewhere the use of the formula, 'to be baptized in the name of the Lord Jesus' (βαπτίζεσθαι εἰς τὸ ὄνομα [or ἐν, or ἐπὶ (τῷ) ὀνόματι] κυρίου Ἰησοῦ), has been fully treated from the point of view of the history of the rite of baptism (col. 473 *f.*); but it still remains to consider the possible meaning or meanings of the phrases. The formula 'baptize in the name of Jesus' (βαπτ. εἰς τὸ ὄνομα Ἰ.) has no doubt an analogy in the phrase 'believe in the name of Jesus' (πιστεύειν εἰς τὸ ὄνομα Ἰ.), which means to believe that Jesus is what Christian teachers say that he is—*i.e.*, that he is the Christ, or in the case of the Fourth Gospel (where, however, the phrase is not prominent, see FAITH, § 3) that he is the only-begotten Son of God; and we have reason to think that the expression of faith in the Lordship or Messiahship of Jesus was the condition on which, in the earliest times, the rite of baptism was administered. Baptism, therefore, might be simply the consummation of discipleship—the outward and visible sign of the entering on a new life characterised by self-purification, and the opening of one's heart to the word of God; and such it doubtless was in the primitive Jerusalem community. Largely owing to Paul, however, baptism became much more than this. Paul's Hellenic converts needed mysteries, and such mysteries he (and perhaps others before him) provided for them by expanding the significance of Baptism and the Supper of the Lord.¹ Necessarily 'in the name' (εἰς τὸ ὄνομα) and the similar phrases now obtained a mystic meaning. The gift of the Spirit was communicated at baptism, no doubt on ethical conditions—at least according to Paul—but not without the invocation of the name of Jesus. It is difficult to feel sure that all Paul's disciples followed him in this. We find in Acts 3:16 4:10 (as well as in Lk. 10:17, cp also the late passage, Mk. 16:17) clear traces of a belief that wonderful works would be performed by pronouncing the name of Jesus; and we must therefore regard it as one of the possible meanings of the phrase before us, 'to be baptized, pronouncing the wonder-working name of Jesus.' (Cp EXORCISTS.) We assume that Paul can be adequately known from the epistles most commonly assigned to him, and we fully grant that whatever mystic effects the apostle may have ascribed to the name of Christ were, in his mind, conditional on the presence of a certain moral attitude in the baptized. We also maintain, of course, that the Jewish Christian Church, which continued the OT tradition, was entirely free even from a moralised mysticism.

Two NT passages need special, however brief, reference. In Mt. 28:19, we find a formula of baptism (εἰς τὸ ὄν. τοῦ Πατρὸς

¹ The attitude of the writer of the Fourth Gospel is not quite so obviously sacramentarian as has been supposed. He had disengaged himself from the sacramental forms in about the same degree, perhaps, as some of the psalmists have disengaged themselves from the sacrificial forms of early Judaism.

NAME

κ. τ. λ.) which is admittedly late (see BAPTISM, § 3). Conybeare, however, has shown (*ZNTW*, 1902) that an earlier text (repeatedly attested by Eusebius) gave μαθητεύσατε πάντα τὰ ἔθνη ἐν τῷ ὀνόματι μου, without the phrase which all critics admit to be late. In Phil. 2:10 all beings of heaven, of earth, and under the earth are bound, it is said, to show the same reverence to Jesus, who has, by the divine gift, 'the name (τὸ ὄνομα [NAB]) which is above every name,' as Lord of all, and seated at God's right hand, that they show to God himself (Is. 45:23; cp Eph. 1:20).

The study of proper names (personal and local) requires, however, much more than a perception of the mystic significance attaching to names. It may be questioned whether in the pre-exilic

9. Proper names.

period nearly as much thought was bestowed on the naming of children as has been supposed. It is far from the present writer's intention to adopt a controversial attitude towards theories, many of which he has himself till lately shared, and on the elaboration of which treasures of scholarship have been lavished. He must express his conviction, however, that the theories referred to presuppose a view of the traditional Hebrew text which is almost too optimistic. So far as he has been able, he has based the explanations of names given by himself in various articles on a critically emended text; but it is only in a part of them that he has been able to assume a well-grounded and far-reaching theory, which, though it does not, of course, affect all OT names, transforms our view of not a few of them. Without meaning to say that all the new interpretations of names advocated by the present writer come under this head, he may presume to mention as deserving prolonged and special consideration the theory referred to, *viz.*, that certain ethnics, in a variety of corrupt and distorted forms, underlie a great many of the names commonly explained either quite arbitrarily from other Semitic languages, or as expressions of religious feeling. In particular, names of the types 'Jehoiakim,' 'Obadiah,' 'Nethaneel,' have to be received with the greatest caution. It is probable that in post-exilic times a thorough revision and indeed transformation of ancient names was effected. This can be shown most plausibly in the name-lists of the Chronicler; but there are few books which do not supply striking evidence of this fact. It would be satisfactory to exhibit in orderly arrangement all the names on which a methodical and consistent textual criticism throws a perfectly new light. By this means the old theory and the new would be conveniently compared, and the unavoidable clash of opinion would doubtless serve the interests of truth. All that can be done, however, is to urge the reader to study the etymological introductions to the articles in this volume seriously and in connection, and not to make up his mind hastily. Criticism of a new theory is useless until the point of view which leads to it is gained, and until the facts have been mastered. There are numerous facts connected with proper names which are as much hidden from adherents of the older theories, as the facts connected with the older documents which enter into our present OT books are hidden from adherents of a conservative school of criticism. It may be said in conclusion that geography is in some directions hardly less the gainer than history by the results of the new criticism, though chiefly by the more consistent application of the ordinary principles of textual correction. There is nothing surprising in this, for the later editors knew comparatively little about the older geography; and will regard to modern geographers, even when they are in sympathy with modern criticism, it does not follow that they superadd to the rare faculty of catching and of making others catch the chief physical aspects of a region, the equally rare faculty of seeing what is possibly or probably the real form of a place-name in an old document. Once more, the reader is requested, in his own interest, to give a careful study to the new details here put before him. The best way to learn a new method is to watch the application on an extended scale. Offhand criticism of details gives little help.

---	---

A. PERSONAL NAMES.

Each of the many names of persons in the Bible must, of course, originally have had some special meaning. To discover this meaning is of great importance, since much light may thereby be thrown upon the manners and thought both of the ancient Hebrews and of the neighbouring peoples, not to mention the linguistic interest which attaches to such investigations. In the more ancient parts of the OT itself etymological explanations of names begin to occur (*e.g.* Gen. 4: 29); but these artless attempts, it need scarcely be said, have no more scientific value than the etymologies of Plato. The more systematic explanations given by Philo are likewise, as a general rule, mere plays upon words, and are moreover based upon a very inadequate knowledge of the language. They nevertheless exercised great influence during some fifteen centuries, owing to the fact that they served as the principal foundation of various Greek Onomastica and of the Latin Onomasticon of Jerome;⁴ similar works were likewise produced among the Syrians. Moreover, the explanations of proper names in the sixth and final volume of the Complutensian Bible are, for the most part, derived from Philo. It was not till later that the subject began to be treated in a scientific manner (especially after the appearance of the great works of Hiller⁵ and of Simonis⁶), and thus many points have been satisfactorily cleared up. Important contributions have been made quite recently by various authors,

¹ The whole plan of the present work (see vol. i. p. ix [second paragraph], p. xvi, § 5) rendered it necessary that the article NAMES should be one of the first written and forbade any subsequent modification of its general structure. On the relation of the article to the separate articles on individual names see (in addition to the passages in the preface referred to above) below, §§ 87, 107, note, and CP NAME, § 4.

² This table of contents does not everywhere follow the actual order of the article. It is to a certain extent a compressed subject-index (arranged logically, not alphabetically).

³ See the footnote to this heading *in loco* (col. 3320).

⁴ See Lag. *OS* (1870), 2nd ed. (1884).

⁵ Hiller, *OS*, Tüb. 1706.

⁶ Simonis, *OS*, Halle, 1741.

especially by G. B. Gray (*Studies in Hebrew Proper Names*), who carefully and with marked success determines what kind of name-formation prevailed in the various periods. To a very large extent the present writer agrees with his result. It must be admitted, however, that very much still remains obscure, far more than was supposed by Gesenius,¹ for example, and even by the sceptical Olshausen.²

We are here met by two great difficulties, the fact that the Hebrew language is but imperfectly known, and, what is much more important, the fact

2. **Difficulties.** that the traditional forms of the names are often untrustworthy. In the first place, we cannot fail to perceive that the vocalisation of the less known names is, in many cases, chosen arbitrarily. This is sufficiently proved by the manifold inconsistencies in the treatment of analogous and even of identical names:

3. **Vocalisation.** for instance, by the side of the correct form *Michâyâhû*³ (מִיכַיְהוּ); 2 Ch. 13: 177) we often find *Michâyêhû*; by the side of 'Āder (עֲדֵר, 1 Ch. 8: 15), the pausal form of 'Eder, we find 'Ēder (עֲדֵר, 1 Ch. 23: 24 30), and so forth. It was impossible to ascertain from tradition the exact pronunciation of names no longer in use, particularly of such as occur in the ancient lists in Chronicles, Ezra, and Nehemiah; accordingly, the scribes used to content themselves with the shortest possible vocalisation, as was first remarked by Wellhausen (if the present writer be not mistaken). The LXX version often exhibits a different pronunciation, which, in some cases, is preferable

4. **Consonants.** to the Massoretic. Even the consonants, however, are sometimes far less trustworthy than we might at first suppose. It is enough to compare

¹ See the explanations of proper names in his monumental work, the *Thesaurus*.

² See his *Heb. Gramm.* 609 ff. This section, however, is remarkably instructive, in particular the introductory portion.

³ The names in this article are, as elsewhere, for practical convenience generally spelled as in AV, unless there is strong reason for following RV or giving a new transliteration. Long vowels are often marked as long, *shewas* as short—mainly to avoid ambiguity, the Hebrew being, as a rule, unvocalised. Absolute consistency has not been aimed at.

the list of David's warriors in 2 S. 23 with those in 1 Ch. 11 and 27, referring also to the Greek text; many of the names are quite different, and some are perhaps in no case handed down correctly.

Instead of צלמון (2 S. 23 28) we find עילי in 1 Ch. 11 29, whilst עב in 2 S. appears to read ΕΑΛΩΝ¹ (see ZALMON). Instead of עברון (2 S. 23 31), which is omitted in 1 Ch. (unless it appears at the end of the list as γαβαβονα υἱός [B], cp γαας αβηα [I. H. A. L.] of 1 Ch.), we find אביאל in 1 Ch. 11 32; it has been conjectured that the original form was אביבעל, but this cannot be regarded as absolutely certain (cp ABIBALBON). In 2 S. 33 David's second son is called זיאב, which is, no doubt, a corruption due to the following word זיאבני (see DANIEL, 4), just as in Gen. 46 10 Ex. 6 15 זיאב seems to be a corruption of זואא (Nu. 26 12; 1 Ch. 4 24; cp also Nu. 26 9), through the influence of the following זוא (cp NEMUEL, 1); but the Δαδουα of 1 Ch. (AL, and in 2 S. B) and the זואיא of 1 Ch. 3 1, which take the place of זיאב, are likewise open to suspicion (for a suggestion as to the true reading, see DANIEL, 4).

In the much later list also of those who returned from the Exile, twice cited by the Chronicler from the memoirs of Nehemiah (Ezra 2 = Neh. 7; cp 1 Esd. 5), we may observe slight divergences. Even the list of Saul's family in 1 Ch. 9 39 ff. differs in several points from that given in 1 Ch. 9 33 ff. of the same book. The carelessness with which the Chronicler treated the lists of names is shown by the fact that on more than one occasion he quotes the same piece twice; especially in regard to our knowledge of the proper names the inaccuracy of this compiler is much to be deplored. Even in the documents from which he copied, however, some of the names may have been already grievously distorted. Hence in the case of names which occur only once in Chronicles, Ezra, or Nehemiah, the greatest possible caution is necessary. We have still more reason to regret that the books of Samuel contain so many corrupt readings, which, even with the help of 1 Ch. can be emended only in part; the proper names in particular, which were many and invariably genuine, have suffered much in consequence.

We may note, for example, that the same man is called אורנה (א.ר.נ.) in 2 S. 24 16, אורנה (א.ר.נ.) in 1 Ch. 27 18, אורנה (א.ר.נ.) in 2 S. 20 (bis) 22 23, whilst in Chronicles he always appears as Ornan (אורן), in 1 Ch. always as Orpa (once Orpva [accus.] in 1 Ch. 21 21), and in Josephus, it would seem, as 'Opovās (Niese, Opovās or Opivās). What was his real name? (For a plausible conjecture see ARAUNAH.)

Even in books of which the text is, in general, much better preserved, however, the forms of the proper names cannot always be trusted.

When we find יר in Gen. 46 13 corresponding to יר in Nu. 26 24 (י.ר. in 1 Ch. 7 1, א.ר.), the mistake can be easily corrected, the more so as the Sam. text and 1 Ch. likewise read י.ר. in this passage (cp JASHUB, 1). But the list in Gen. 46, as compared with Nu. 26, presents some other variations which prove the existence of early corruptions in one at least of these texts. Hence we have no guarantee that names which occur only once in the Pentateuch, not to mention the Book of Joshua, are correctly written.

It must be remembered, furthermore, that in all probability many proper names which now contain vowel letters were written defectively in the more ancient documents (see WRITING, § 15).

We cannot, therefore, feel at all sure that in every instance the vowel-letters were inserted as correctly as in the case of the well-known דוד (instead of the more ancient ד.ד., on which see DAVID, Dodo, DODAI, DODAVAH). The sovereign who is called משה (Meshah) in 2 K. 3 4 appears as מ.ש. in the inscription set up by himself; his name in 1 Ch. is מושה (but Josephus has M[ε]σ[α]ς) [BAL], i.e., מושה, and this would seem to be the correct form. The name of the king of Tyre in 1 K. 5 24 32 [10 18] is חירום, but elsewhere, in Samuel and Kings, חירם, with which 1 Ch. 14 1, Kt. agrees; in the latter passage the Kr. is Hürām (חורם), and elsewhere, in Chronicles, this form is invariably used. The

¹ In citing Oriental words from 1 Ch. aspirates and accents are here omitted, since they were introduced into the text at a time when the real pronunciation could no longer be ascertained.

² Another Mēshā' (מ.ש.) in 1 Ch. 2 42 whose name, for some unknown reason, is written with א, while that of the Moabite king has א, is called Μαυσα(ς) in 1 Ch. 18 17 with a confusion with the Mareshah who comes later in the same verses.

Tyrian tradition followed by Josephus (c. *Ap.* 1 17 ff. 21) has Εἰρωμος, or Ιρωμος, and so we should read in Herod. 7 98 (cp 5 104), instead of Σίρωμος. Hence it follows that חירום is the only correct form, and that חירום can be nothing but a blunder. Such being the case, what reason have we for believing that the names of less celebrated persons, such as Bāni (בני), Bunni (בוני), Binui (בניני), are always correctly vocalised, especially as the Bani of 2 S. 23 36 seems to become Mibhār (מבחר) in 1 Ch. 11 38? (for an explanation see MIBHAR, HAGRI).

On the other hand, there may be many cases in which the Massoretes failed to mark the long vowels because

6. Greek versions. the names in question had been handed down without vowel letters. It is of less importance that in certain names the Greek texts exhibit a somewhat older pronunciation than that recognised by the Massoretes.

Thus the Greek forms often preserve the vowel *a*, particularly in unaccented closed syllables, where the Massoretic form has *i*, in accordance with the latest phonetic development of Hebrew; for example, Μαριαμ—i.e., Maryām or rather Maryam (מריאם), the only form known to the Syrians and the Arabs—is, of course, more primitive than Miryām. Cp also *Marthabias*, *Marrabias* with Mattithyāh (מתיחיה), Γαλααδ with Gil'ād (גלעד) etc. Similarly the *a* in Αβελ, Γαβελ is more primitive than the *e* (ב) in Hebel (הבל), Geber (גבר); but in the majority of such forms 1 Ch. has the later pronunciation with *e*.

From all this we may conclude that in the case of obscure names we have no right to assume the traditional punctuation to be correct, and must always make allowance for considerable changes.

Since, moreover, our knowledge of the Hebrew language, as has been remarked above, is very im-

7. Meanings obscure. perfect, and since we cannot hope to discover the particular circumstances by which this or that name was first suggested, it follows that even when the form of a name is fairly certain its meaning is often unintelligible. This applies even to such names as Judah (יהודה), Aaron (אהרן), Rēchāb (רכב), Ruth (רוּת) etc.¹ By a comparison with the cognate languages we frequently obtain nothing better than an interpretation which is barely possible. It is, for example, conceivable that the Hebrews once used the verb ברע in the Arabic sense 'to rise,' 'to be prominent,' and that hence the name Beriah (בריעה) was formed; but this is very far from being certain. The reader must therefore bear in mind that many of the explanations given below are merely tentative, even where doubt is not positively expressed. Furthermore, many names which at first seem to admit of an easy explanation prove, on closer inspection, to be either very obscure or transmitted to us in a doubtful form. In general, it may be said, compound names are more easily explained than simple ones (cp § 88).

Among the persons mentioned in the OT we find a considerable number of *eponyms*—i.e., representatives of families and tribes. It is certain, or at least highly probable, that some of these were originally names of countries or places, for both in ancient and in modern nations there has been a widespread tendency to assume that a people, a tribe, a family, or a country must derive its name from some individual. In Gen. 10 the genealogy of Noah's descendants includes even plurals such as Ludim (לודים) and Pathrūsīm (פתרושים), as well as countries and cities, such as Egypt (מצרים) and Zidon (צידון). Here the fictitious character of the list plainly shows itself. Similarly 'the Jebusite,' 'the Arvadite' (i.e., native of Aradus), and others who appear in the same chapter, are to be understood, in accordance with the genuine Hebrew usage, as collective terms for the tribes, or rather inhabitants, of the places in question. In like manner we are to explain the *gentilicia* (i.e., adjectives derived from proper names) with the ending *i*, which are enumerated among the posterity of Jacob in Nu. 26 15 ff. Perhaps even

8. Eponyms. families and tribes. ¹ To suppose that here a *y* has been dropped is contrary to the laws of the language.

NAMES

Levi (לֵוִי) and Naphtāli (נַפְתָּלִי) may belong to the same class.

The name Mushi (מֹשִׁי) which occurs, together with Meriri (מֵרִירִי) and Mahli (מַחֲלִי), in the pedigree of the Levites, is rightly regarded by Wellhausen as a derivation from Moses (מֹשֶׁה); מֹשִׁי is that part of the priestly tribe which claimed descent from Moses himself (cp. *MOSES*, § 2). That in the later system the name occupies a different place, and that the vowel has been slightly changed, is not to be wondered at. The expression 'the sons of half the tribe of Manasseh' (בְּנֵי חֲצִי שֵׁבֶט מְנַשֶּׁה; 1 Ch. 5:23) may serve as a warning against explaining such 'fathers' literally; for no one, of course, can have imagined that חֲצִי שֵׁבֶט מְנַשֶּׁה was an individual.

Among the descendants of Jacob there are also, it would seem, several names of places; Hezron (חֶזְרוֹן), a grandson of Judah, represents the place

10. Place names. bearing this name in the Judæan territory (*Josh.* 15:25)—the word signifies 'enclosure' (which is the original sense of the English 'town') from the same root as Hazor (חֶזֶר, see *HAZOR*), and some other Semitic names of places, for instance, the well-known Hatra in the Mesopotamian desert.

In 1 Ch. 2 names of places such as Hebrōn (חֶבְרוֹן) and Tappūah (תַּפּוּחַ) are cited as persons; Hebron (חֶבְרוֹן) appears also as a grandson of Levi (*Exod.* 6:15), since Hebron was a Levitical city. The Manassite Shéchem (שֵׁכֶם; *Nu.* 26:31; *Josh.* 17:2, cp. 1 Ch. 7:19) and the non-Israelite Shéchem (שֵׁכֶם; *Gen.* 33:18; *Josh.* 24:32; *Judg.* 9:28), alike represent the city of Shechem. Shimrōn (שִׁמְרוֹן), a son of Issachar (*Gen.* 46:13), is probably to be pronounced Shōmērōn (שׁוֹמֵרוֹן), and stands for the city of Samaria; that this place derives its name from a man called Shemer (שֶׁמֶר; 1 K. 16:24) is very unlikely. The Josephite tribes, it must be remembered, were in part settled on the ancient territory of Issachar (and Asher), cp. *Josh.* 17:11-14. The other capital of the northern kingdom, Tirzah (תִּרְצַח), is represented by a daughter of the Manassite Zelophehad (זֶלּוֹפְחָד; *Nu.* 26:33, and elsewhere). Many similar instances might be adduced. It is even possible that the Judæan Ethnān (אֶתְנָן; 1 Ch. 4:7) may stand for the Judæan city Yithnān, EY Ithnan (יִתְנָן; *Josh.* 15:23). In the case of some names mentioned in the earlier parts of Chronicles we cannot determine whether they were intended, at least by the original narrator, to represent places or persons; 'sons of So-and-so' may very well mean 'inhabitants of such-and-such a place.'

Most of the family names and tribal names which occur in the OT are formed exactly like the names of persons. Among the Arabs there are very many names which are borne by tribes and individuals alike, and often the name is such as properly applies to an individual only. In a large number of cases 'the sons of So-and-so' are really descendants of the man in question, though they sometimes include adopted members. In other cases, a whole tribe takes the name of a famous chief or of his family, and the old tribal name gradually falls out of use. Such processes may be observed in Arabia even at the present day. Other causes also may operate in producing these changes. At all events we are justified in treating the names of real or supposed ancestors as individual names, unless their appearance indicates the contrary.

11. Tribe names. A considerable number of names in the OT must be regarded as fictitious. Not to mention the names in the lists of mythical patriarchs down to Abraham, who are perhaps, in some cases, of non-Hebrew origin, we meet with various names which were invented in order to fill up the gaps in genealogies and the like. Such names appear in the middle books of the Pentateuch and are particularly numerous in Chronicles. The so-called Priestly Code—which gives not only the exact measurements of Noah's ark and of the scarcely less fabulous Tabernacle, but also impossible statistics as to the numbers of the Israelite tribes—mentions many representatives or chiefs of the tribes, and there is every reason to suspect that some of these personages had no existence. Their names are indeed generally formed in the same manner as the names of real men; but they sometimes exhibit certain peculiarities; it is, for example, only here that

1 See, however, *ASHER* (§ 3).

12. Fictitious. we find names compounded with Shaddai (שָׁדַי; see *SHADDAI*) and Šūr (שׁוּר; see *ZUR*, *NAMES WITH*). The main object of the compiler of Chronicles is to glorify the Levites, and especially the families of temple-singers and door-keepers, and thus, in treating of the times of David and Hezekiah, he mentions many Levites, whose names rest upon no better documentary evidence than the descriptions of the religious services, performed by the said Levites according to the post-exilic ritual. Names coined by prophets or poets (such as the author of Job) belong, of course, to a different category.

The present article includes those OT names which were in use among the nations bordering on Israel—names formed according to ordinary Hebrew analogy. On the other hand, the names of Assyrians, Babylonians, Egyptians, and Persians are excluded (see *ASSYRIA*, § 22, *EGYPT*, § 40).

At the present day we are acquainted with very many personal names that were current among other Semite peoples. The Arabic names known to us are particularly abundant; these include the great majority of the names found in the *Nabatean* inscriptions (of which the *Sinaitic* inscriptions are a subdivision), and also a large proportion of the *Palmyrene* names. Many Arabic and Aramaic names have been preserved in the Greek inscriptions of Syria and of the neighbouring countries.¹ As to the pronunciation of most Arabic names we are accurately informed, thanks to the industry of Mohammedan scholars. But this knowledge unfortunately throws very little light upon Hebrew proper names, owing to the fact that the nomenclature of the Arabs differed widely from that of the

13. Cognate dialects. Israelites. To the latter the *Phœnician* is much more nearly akin. The *Phœnician* inscriptions contain many proper names; since, however, vowel letters are very rarely used, the exact pronunciation cannot be ascertained, nor is much information to be derived from the transcriptions which occur in Greek and Latin documents. These transcriptions, moreover, vary considerably. The *Phœnician*, particularly in Africa, appear to have had a somewhat indistinct pronunciation and a fondness for dull vowels, so that the sounds are reproduced by Greeks and Romans in an uncertain manner.

14. Arabic. Thus the Punic name מתן (Heb. מַתָּן, *Mattān*) figures in the Latin inscriptions of Africa as *Mettunnus*, *Mettun*, *Motthun*, *Mutun*, *Mytthun*; *Jos. c. Ap.* 1:21 has *Μύττωτος*; Polybius ix. 22:4, *Μύττωτος*; *Livy* 25:27, *Muttines*; and perhaps we may add the *Marriv* of Herod. 7:98.

It must likewise be remembered that of the *Phœnician* language extremely little is known. With respect to *Aramaic* names we possess very much fuller information; a considerable number may be found in inscriptions and literary works, and the pronunciation is, for the most part, fairly certain. The names in the *Sabaean* inscriptions agree to some extent, it is true, with the Arabic (in the narrower sense), or at least are formed according to Arabic analogy; but many of them have an antique character, unknown in classical Arabic, and these latter names exhibit many features which appear also in Hebrew nomenclature. The *Sabaean* pronunciation, however, is but very imperfectly known, and even those who are really acquainted with the inscriptions (which is far from being the case with the present writer) understand still less of the language than students of the *Phœnician* monuments understand of *Phœnician*. The formation of *Abyssinian* proper names, as they are coined even in our own time, offers very instructive analogies to the Hebrew (see below, §§ 21, 22).

The fact that it has been found necessary to exclude

15. Phœnician.

16. Aramaic.

17. Sabæan.

18. Abyssinian.

¹ Such names will here be cited in the genitive case, whenever the nominative is uncertain.

NAMES

Assyrio-Babylonian and Egyptian names¹ from this article, doubtless constitutes a serious defect, for, quite apart from general analogies, it is not impossible that the two ancient centres of civilisation, Babylonia and Egypt, exercised a direct influence on the mode of coining names among the neighbouring Semitic peoples. The present writer, however, is not in a position to verify the statements of Assyriologists and Egyptologists, still less to throw fresh light upon such matters. Furthermore, it would seem that the proper names of the Assyrians and the Babylonians sometimes differed essentially from those of the Hebrews. It may be noted, in particular, that there was a liking for very long names. The names of the non-Semitic Egyptians probably diverged still more from the Hebrew type. In consequence of some attention devoted to *Greek* proper names—a study which the work of Fick² has now greatly facilitated—it has been thought permissible to cite a few illustrations from this department. Some surprising analogies will here be found, in spite of the great dissimilarity of the two races.

Very many Hebrew names are formed by composition from two or more independent words. We will first consider these compounds from the point of view of their form, before treating of their signification. Such names, according to the Massoretic vocalisation, undergo various contractions, which must be based, to a large extent, upon sound tradition, or at least upon correct analogy; but some of the details are uncertain.³ A compound name may consist of (a) two substantives, the second being in the genitive (§ 20 f.), or else it may form (b) a complete sentence (§ 22 ff.).

a. To the class of compounds consisting of two nouns, in the nominative and the genitive respectively, belong such names as Jedid-iah (יְדִידִיָּהּ), 'beloved of Yahwè,' Matthiah (מַתְּתִיָּהּ), 'gift of Yahwè,' Esh-baal (אֶשׁ-בַּאֵל), 'man of Baal,' Obadiah (עֲבַדְיָהוּ), 'servant of Yahwè,' etc. In many proper names the first part ends in *i*. This is mostly to be regarded as the suffix of the first pers. sing.,⁴ but sometimes as a mere appendage of the construct state—a formation of which we occasionally find examples elsewhere, and a survival, it would seem, of some old case-ending. A few of these instances are open to question, in consequence of the general uncertainty of the vowels.

If the form Abdi-ël (עֲבַדְיָאֵל) in 1 Ch. 5.15 (equivalent to Abdël [עֲבַדְיָאֵל] in Jer. 36.26) be correct, it can mean only 'servant of God,' just as Zabdël (זַבְדֵּיָאֵל) in Neh. 11.14 (1 Ch. 27.2 (cp. Zabdël [זַבְדֵּיָאֵל] אֶל אֲבֹתָי, 1 Macc. 11.17) means 'gift of God.' Hanniel (חַנְיָאֵל) is 'favour of God,' like the common Carthaginian name Hannibal, Ἰαννίβαλ.⁵ So also Melchizedek (מֶלְכִּי-צֶדֶק) is probably 'king of righteousness,'⁶ and the name of the angel Gabriel (גַּבְרִיאֵל), 'man of God.'

The use of this old termination *i* in names formed at a late date may be due to an imitation of antique names. Archaic forms have an air of solemnity, for which reason the same ending *i* is sometimes added to ordinary nouns in the construct state by later poets. Similarly the *u* before the genitive in another common Punic name *Azrubal*, Ἀζρὺβαλ, *Hasdrubal*, Ἰσδρὺβαλ, 'help of Baal,' seems to occur in a few ancient biblical names—e.g., Samuel (שַׁמּוּאֵל), 'name of God.' In some names a preposition stands before the noun in the construct—e.g., Bësödê-iah (בְּסוּדַיָּהּ), 'in the secret of

¹ See ASSYRIA, § 22, EGYPT, § 40.
² Die griechischen Personennamen⁽²⁾, Fritz Bechtel and Aug. Fick, Gött. 1894.

³ Contractions so violent as the Phœnician *Bomilcar*, *Boncar* for *Geson*, *Gison* for *Bodostor*, *Bodostor*, *Bostor* for *Bodostor*, seem to have been quite unknown in Hebrew.

⁴ For an alternative view see AB, NAMES WITH, § 3.
⁵ *CIS*, 1661 appears doubtful on account of the frequent *Matthunbal* without *i*.

⁶ See, however, MELCHIZEDEK.
⁷ On the meaning of this and similar names see SHEM, NAMES WITH.

NAMES

Yahwè,' Bëzäl'el (בְּצַלְאֵל), 'in the shadow of God'; cp the

Phœnician בְּרִיאֵל, 'in the hand of God.'¹ Such formations are common among the Abyssinians—e.g., *Baldä Märjäm*, 'by the hand of Mary,' *Basalöta Mikääl*, 'by the prayer of Michael,' etc.; cp also the Sabæan *l'icē*, 'to the life of Athar.' Single nouns with prepositions appear in Lälē (לַאֵל), and Lēmōel (Prov. 31.4, MT לְמוֹאֵל), or Lemüel (לְמוֹאֵל), 'to God' (i.e., belonging to God), as also in Bera (בְּרַעַ), and Birsha (בְּרִשְׁעַ), 'with (or, in) evil,' and 'with (or, in) wickedness,' the names of the legendary kings of Sodom and Gomorrah. Similar are the foreign names Bishlām (בִּשְׁלָמַ), 'with peace' (Ezra 4.7), and Ethbaal (אֶתְבַּאֵל), 'with Baal' (1 K. 16.31), unless the latter be equivalent to Ἰθώβαλος (according to the Tyrian tradition in Jos. c. Ap. 1.18; Ant. viii.13.2, cp c. Ap. 1.21; Ant. x.11.2), which probably means 'with him is Baal.' On such Semitic names with prepositions see *WZKM*, 6.314 ff.

b. The use of complete sentences as proper names is common to all Semites. Among the natives of central and northern Arabia, it is true, such formations appear only as sporadic

survivals, in nicknames (e.g., *T'abbata šarra* [ʔ], 'he has mischief under his arm,' *Jā'a kamlūhu*, 'his lice are hungry'), and in names consisting of a single verbal form (e.g., *Yuzid*, 'he augments'). But among the Syrians these names were freely coined, even in Christian times (e.g., *Šlibhā sakhē*, 'the cross conquers,' *Ķāmishō*, 'Jesus is risen,' *Šubhā imāran*, 'praise to our Lord!' etc.)

Similar are the Abyssinian *Takasta bërhan*, 'the light has been revealed,' *Madkhanina Egi*, 'our Redeemer is the Lord,' *Malak samra*, 'the angel has pleasure in her,' *Yemrahana Krēstos*, 'may Christ have mercy on us!' etc., and the modern Amharic *Dēwanbara*, 'victory is her throne' (name of the wife of Muhammed Graf, the enemy of the Christians), *Alam ayahu*, 'I have seen the world' (name of a son of King Theodore), *Wandemu nar*, 'I am his brother'; cp also such cases as *Tawabach*, 'she is beautiful' (name of the wife of Theodore), *Abarash*, 'thou (fem.) hast enlightened,' etc.

To these correspond the Hebrew Hephzibah (הֶפְצִיבָה), 'I have my pleasure in her' (2 K. 21.1, cp Is. 62.4); Azrikam (אֶזְרִיקָם), 'my help has arisen'; Col-hozeh (כּוֹל-חֹזֵה), 'he sees all' (?); Jushab-hesed (יִשׁוּב-חֶסֶד), 'kindness is required.' Even the tribal name Issachar (יִשַׁשַׁכַּר) seems to belong to this class, since it can scarcely be anything else than ישׁ שַׁכַּר, 'there is a reward,' although it must be admitted that the meaning appears somewhat strange (see ISSACHAR, §§ 3, 6). In like manner Isaiah expresses one of his fundamental ideas in the name which he gives to his son, Shear-jashub (שְׂאֵר-יִשׁוּב), 'the remnant shall be converted'; and another son he ventures to call Maher-shalal-hash-baz (מַהֵר-שָׁלַל-חָשׁ-בָּז), 'plunder has hastened, booty has sped.'² Ezekiel forms the name Oholi-bah (וְהִי בָהּ), 'my tent is in her,' cp Lo-ruhāmah (לֹא-רוּחָמָה), 'she has not found mercy,' in Hosea. Joshbekashah (יִשְׁבְּקָשָׁה), in 1 Ch. 25.424, seems to be *yashib kashah*, 'שוב קָשָׁה,' 'He (i.e., God) brings back hard fate.' Instead of Hazzēleponi (RV), הצִיִּלְפוֹנִי (fem.), in 1 Ch. 4.3, we should perhaps read *Häsel-pānai* (הַצִּלְפוֹנִי) or *Häsel-pānai* (הַצִּלְפוֹנִי), 'Do thou shadow my face!' We must of course regard as a fiction the statement in 1 Ch. 25.4, where the sentence Giddālti wē Rōmāmti 'Ezer [יִשְׁבְּקָשָׁה] מַלְלוֹתֵי הוֹתִיר מַחֲזוֹזֹת עוֹרָה מְלוֹת הוֹתִיר) גדלת ורוממת עור' have helped me (cp v. 29) and have held mightily (v. 31), I have fulfilled (? v. 26) abundantly (v. 28) visions (v. 30), 'is cut up in order to furnish names for the five sons of Heman, one of the Levitical singers (see HEMAN). The name of another Levite Shēmīrāmōth (שְׁמִירָמוֹת) appears also to have been borrowed

¹ On an intaglio—a term used in this article to include inscriptions on seals, scarabs, and gems, such as those published by M. A. Levy (*Siegel und Gemmen*), de Vogué (*Intailles*), and Ganneau (*Stceaux et cachets*).

² Here קָשָׁה is probably to be taken as a perfect.

³ Here יִשְׁבְּקָשָׁה has been interpolated.

NAMES

probably a mere mistake for Azriel (עזריאל), or Azarēel (אזריאל), as the LXX seems to indicate (Ⓞ^L, however, in 1 S. 28:11). The same meaning, it would appear, is conveyed by Jeshā' (ישע), Shua' (שוע), Sha' (שע, cp תשועה) in Isaiah (Yeshā'yāhū ישעיהו), Hoshaiāh (הושעיהו), יִשְׁעִיָּהוּ (on an *intaglio*), Jehoshua (יהושע), Jeshua (ישוע), Elishua (אלישוע), Elisha (אלישא); similarly Reḥabiah, רחבה, 'wideness' (i.e. help, cp ישע) through Yahwē. *God is with man*—Immanuel, אֱמַנּוּאֵל, and perhaps Ithiel, אִתְיָאֵל (Neh. 11:7). Conversely Azaliah, אֲזַלְיָהוּ, 'with Yahwē' (?).

God confers benefits—Gamaliel [EV], גַּמְלִיֵּאל, Mēhū-tabēel, מְהוּטָבְאֵל (Edomite) fem.

God is good, kind—Tābēel, תָּבַעַל (altered purposely by the scribes into תָּבַעַל, Tābēl, which was intended to signify 'not good'), תָּבַעַל (Tob. 1:1), Tobiah, תּוֹבִיָּהוּ.

God sustains—Saniachiah (סנכיהו), Sachiachiah (סכיהו), cp סכיהו (on an *intaglio*).

29. Strength. *God bears*—Amas-iah (עמשיהו), cp the Phoenician אַמַּסְיָהוּ.

God holds fast—Jehohaz, יהוחזק, Aḥaziah, אַחַזְיָהוּ (the king who bears this name is called יהוחזק in 2 Ch. 21:17-25), Hezekiah, חֲזַקְיָהוּ, Hezekiah (חֲזַקְיָהוּ), which also occurs [see HEZEKIAH], can scarcely be correct), Ezekiel, חֲזַקְיָהוּ.

God is strong, and strengthens—Uzziel (עוזיאל), Azaziah (אזזיהו), Uzziah, עוֹזְיָהוּ (on an ancient Hebrew *intaglio*, עוֹזְיָהוּ). Cp the Phoenician עוֹזְיָהוּ (Aξέμικλος, עוֹזְיָהוּ, cp the two last are on *intaglios*), the Sabæan אַזְזִיָּהוּ (Eλεάζος, Θεοκρατής, Ποσειδοκρέωσ, etc. The names Jaaziel (עוזיאל), Jaaziah (יעוזיהו), should perhaps be added; so also Amaziah (אמשיהו).

God is a refuge—Maḥseiah (RV) [Bā.]. Instead of Maaz-iah (מַעֲזִיָּהוּ), and Elūzai (אֱלֻזַּי) we should probably pronounce Mē'ōziyyah (מַעֲזִיָּהוּ) and El'ōzi (אֱלֻזַּי) respectively. Cp Aḥḥalos (Miller) and numerous Arabic names derived from هوى = Heb. עוּז 'to take refuge'; the Aramaic עוֹזְיָהוּ; Ζηρικέτης, Ἐρμακέτης. Similarly Bēzalēel (בַּעַזְלֵאֵל), 'in the shadow of God,' and Elizur (אֵלִיזֹר), 'my God is a rock.'

God delivers—Elpalet (אֵלְפַלֵּט), Elipelet (אֵלִיפֵלֵט).

30. Deliverer. Paltiel (פִּלְטִיָּאל), Peltiah (פֶּלְטִיָּהוּ). The same meaning it would seem belongs to Mēlāṭiah (מַלְאֲטִיָּהוּ), and perhaps to Delaiah (דֵּלְיָהוּ), 'Yahwē has drawn out.' We may include, with certainty, the name of the Herodian Φασάηλος—i.e., פַּסְיָהוּ—the Palmyrene פַּסְיָהוּ (Φασαίηλη, Φασήλη, fem.) cp Φασάβαλος (Miller), i.e., פַּסְיָהוּ. So also Meshēzabēel (מֶשֶׁזַּבְעֵל). Cp the old Aram. צַלְמִשׁוֹב, 'in the shadow of God,' and Elizur (אֵלִיזֹר), 'my God is a rock.'

God comforts—Nēhemiah, נְחֻמְיָהוּ (on an *intaglio* נחמיהו).

God heals—Rephāel (רַפְּאֵל), cp the Palmyrene רַפְּאֵל, Rephēlou, and the old Aramaic רַפְּאֵל, which coincides with the name of the city, Irpēel EV (רַפְּאֵל), Josh. 18:27; Rephaiah (רַפְּיָהוּ). Cp the Palmyrene רַפְּאֵל, רַפְּאֵל (Rēphābālou), cp רַפְּאֵל (= רַפְּאֵל); the Phoenician רַפְּאֵל.

God redeems—Pedah-el, פְּדָה־אֵל (on an *intaglio*; פְּדָה־אֵל), Pedaiah (פְּדִיָּהוּ), Iphdē-iah RV (פְּדִיָּהוּ). Cp the Phoenician פְּדִיָּהוּ.

God preserves—Shēmariah (שְׁמַרְיָהוּ). Cp the Phoenician אֲשֶׁר, etc.; the Nabataean נִרְאֵל (Narā-ḥalos); the late Greek Θεοφύλακτος.

God keeps in safety (?)—Mēshelemiah (מְשִׁלְמִיָּהוּ). Cp the Phoenician מְשִׁלְמִיָּהוּ, בעלשם (Εὐνομελήμου).

God conceals (i.e., presumably 'defends')—Elzāphān (אֵלְצַפְּחָן), Zēphaniah (צִפְּחָיָהוּ), which occurs also on an *intaglio*. Cp the Phoenician צִפְּחָיָהוּ (frequent both as masc. and fem. = Sophoniba³). So also El-iahba

¹ The name cannot be אֱתִיָּאֵל, 'God has brought' (Aramaic), since in Nehemiah's time the older form אֱתִיָּאֵל would have been used.

² Or perhaps 'requites.'

³ Mis-spelt Sophoniba. The vocalisation agrees with that of

NAMES

(אֱלִיחַבָּא), and Hābaiah (חַבִּיָּהוּ), probably to be read חַבִּיָּהוּ. Cp the Talmudic חַבִּיָּאֵל.

God makes—Elēāsah (אֱלֵעָזָה), Asāhel (אֲסָהֵל), Asiel (עֲשִׂיָּהוּ), Ἄσιήλ (Tobit 1:1), Asaiah (עֲשִׂיָּהוּ).

31. Maker. Jaasiel RV (עֲשִׂיָּהוּ), Maasē-iah (מַעֲשִׂיָּהוּ). Cp the Phoenician אֲסָהֵל, Θεοῦργος, Διεργίς.

God accomplishes—Gēmariah (גְּמַרְיָהוּ). Cp Θεοτέλης. *God creates*—Bera-iah (בְּרָאִיָּהוּ), 1 Ch. 8:21 (probably apocryphal).

God builds—Bena-iah (בְּנִיָּהוּ), so also on an *intaglio*, Ibnē-iah (בְּנֵיָּהוּ). Cp Κόσβανος (Miller); the Nabataean בְּנִיָּהוּ; the Aramaic (בְּנִיָּהוּ = בְּנִיָּהוּ); Θεόκτιστος.

God sets up, establishes—El-īākim (אֱלִי־יָקִים), Jeho-īākim (יהו־יָקִים), mis-spelt יָקִים, Jokim in 1 Ch. 4:22. Also Jecam-iah (יַעְקָם־יָהוּ), the vocalisation of which can scarcely be correct. Cp the Sinaitic יַעְקָם־יָהוּ; the Sabæan יַעְקָם־יָהוּ. Furthermore קוֹנֵיָהוּ (Kt.)—i.e., Conan-iah קוֹנֵיָהוּ (the forms Kānan-iah, קַנְנָיָהוּ, Kēnāniah, קַנְנָיָהוּ, are less probable), Jeho-iachin (יהו־יָחִין), Jecan-iah (יַעְקָן־יָהוּ), in Jer. 22:28 Con-iah (נִיָּהוּ).

God determines fate—Gaddi-el (גַּדִּי־אֵל).

God brings back—El-īāshib (אֱלִי־יָשִׁיב). Cp the Phoenician יַשְׁבַּע, which name, as Geiger has remarked, should be restored in 2 S. 2:38, the received text having יַשְׁבַּע, Ⓞ^L Ἰεσοθε, and the parallel passage 1 Ch. 11:11 יַשְׁבַּע, which point to an original יַשְׁבַּע, or more correctly יַשְׁבַּע, so Ⓞ^L, Ἰεσοθαλ, 2 S.; Ἰεσοβααλ, 1 Ch. (see JASHOBEAM). Shūbā-el (שׁוּבָאֵל), Shebu-el (שְׁבּוּאֵל), seems to mean 'O God, turn again (i.e., forgive),' or, if we pronounce Shābē-ēl (שְׁבַע־אֵל), 'God has forgiven.' So also Shābiah (שְׁבַח־יָהוּ), 1 Ch. 8:10 (which is preferable to the reading Sachiah (שַׁכְּיָהוּ), cp Ⓞ^L Σαβιά, Ⓞ^A Σεβια; see SHACHIA). Whether the Sabæan שְׁבַח־אֵל has the same meaning is uncertain.

God places (?), *sits on the throne* (?)—Joshib-iah RV (יֹשִׁיב־יָהוּ), 1 Ch. 4:35), of which Joshaviah (יֹשִׁיב־יָהוּ, 1 Ch. 11:46) and Joshah (יֹשִׁיָּהוּ, 1 Ch. 4:34) are presumably corruptions. Also Jesimi-el, יַעֲשִׂימִי־אֵל (pronounce Jesimē-ēl, אֵל־יַעֲשִׂימִי?),² 1 Ch. 4:36.

God causes to groan (?)—Yashwahyah (יַשְׁוָה־יָהוּ), as we should perhaps read instead of Jēshōhā-iah (יַשְׁוָה־יָהוּ) in 1 Ch. 4:36.

God knows—El-īāda (אֱלִי־יָדַע, a name borne also by an

32. Knower. Aramaean, in 1 K. 11:23), Jeho-īāda (יֵהוּ־יָדַע), Jeda-iah (יַדְעִיָּהוּ), Jedia-el (יַדְעִיָּהוּ). Cp the Palmyrene יַדְעִיָּהוּ (Ἰεδεβήλος); the Sabæan יַדְעִיָּהוּ; Θεόγνωστος, Διδόγνωστος.

*God remembers*³—Jozchar (יֹזְכָר),⁴ Zechariah (זְכַרְיָהוּ). Cp the Sabæan יַזְכָּרִיָּהוּ; Θεόμνηστος, Διδόμνηστος. So also, it would seem, Hāshab-iah (חַשְׁבִּיָּהוּ), and Hāshab-nē-iah RV (חַשְׁבִּנֵיָּהוּ), further corrupted into Hāshhad-dānah RV (חַשְׁחַדְדָּנָה),⁵ and Hāshabnah (חַשְׁבִּנָּה), for which we should read Hāshabni-jah (חַשְׁבִּנִּיָּהוּ), 'God has taken account of me.'

God weighs—Āzaniah (אֲזַנְיָהוּ), Jaāzan-iah (יַאֲזַנ־יָהוּ), Jēzan-iah (יֵזַן־יָהוּ). Cp יֹזַן, on a Phoenician *intaglio*.

God sees—Hāzā-el (חַזָּאֵל, חוּזַא, a native of Damascus), Jahāzi-el (יַחַזִּיָּהוּ), of which Hāzi-el, חוּזַא, 1 Ch. 23:9, and Jezū-el, יֵזֻז־אֵל, 1 Ch. 12:3 Kt. or Jezī-el [יֵזִי־אֵל] Kt. may be corruptions), Hāzā-iah (חַזָּאִיָּהוּ), Jahzē-iah RV (יַחַזְעִיָּהוּ); and יַחַזְעִיָּהוּ.

Σαφονίας in Ⓞ; since, however, the Punic *o* can scarcely correspond to the Hebrew *o*, we may conclude only that in this, as in some other names, the first part was regarded as a verb by the Massorettes, but as a noun by the Greek translator, in accordance with the Punic form.

¹ This, it is true, may also mean 'Baal dwells.'

² Variant יַשְׁוָה־יָהוּ. The punctuation varies also between יַשְׁוָה־יָהוּ and יַשְׁוָה־יָהוּ.

³ See Nestle, *l.c.*, who rightly refers to Gen. 80:22. The mother is primarily the object of the verb.

⁴ Ginsb. יֹזְכָר.

⁵ Unless 'h' may be due to dittography; see HASHBADANA.

Jeziah, RV Izziah, יזח, Ezra 10:25¹. Also יזחיה, יהזיה (Réāiah), יהזיה (Irijah EV), יריה (Jeriah).

God *hears*²—Eli-shāma (עלי־שמע), which occurs also on an *intaglio*, probably of ancient Hebrew origin, אלשמע; cp Sabæan אלשמע, Ishmael, ישמעאל, (cp Sabæan ישמעאל, Hoshāma (הושמע) i Ch. with man.

33. **Treats with man.** 3:18 (for Joshama יהושמע, or Joshama, ישמע, Ishmaiah (ישמעיה). Cp the Phœnician ישמעיה, etc.; the Sabæan יזחיה).

God *answers* (properly, by an oracle, hence, 'He grants a petition')—Anāhā, unless connected with אנה (see Swete, 'Av.) Tobit 1:21, Ana-iah (עניה). So also Anan-iah (עניה), which should probably be pronounced Anāni-jah (עניה). 'Yahwē has answered me.' Cp the Syriac 'Anāni-shō' 'Jesus has answered me.'

God *speaks* (by an oracle)—Amar-iah (אמריה). Cp the Talmudic אמרי (= אמר); the Phœnician אמרי, 'Baal reveals.' 'Baal reveals.' Perhaps we may add the Phœnician אמרי, from the verb ארר; Θεόφρητος, Διόφρητος, Θεόφρατος, Θεόφρητος, etc. Possibly the name Kola-iah (קולה) also refers to an oracle.

God *swears* (?)—Eli-sheba (אלישבע), Jehoshéba (יהושבע) (both feminine). In Jehoshabéath (יהושבעת) and the NT name 'El(ε)σαβέτ [BNA] (so in Ex. 6:23 [VF]; cp Ελευσαβέθ, Ex. 6:23 [B]). the feminine ending appears, which is quite contrary to rule; the grammatical form presents great difficulties.

God *promises* (?)—Noad-iah (נועריה), Mōad-iah (מועריה), Neh. 12:17, for which נ. א. has Maad-iah, מאעריה (cp the Phœnician מאעריה).

God is the object of *hope*—EV Hachaliah (חכליה), see above, § 23), RV El-icho-ēnai (אליחוכני), 'towards Yahwē are mine eyes turned.'

God is the object of *praise*—Jéhallel-ēl RV (יהלליה), Mahal-ēl RV (מחלליה), Hōdāv-iah (הודוויה), Hodi-jah (הודיה), Hodevah (הודוה), pronounce Hōdū-jah, הודווה, הודיה).

God is the object of a *request*—Shēalti-el (שאלתיאל). God *admits into his confidence*—Bēsōdē-iah (בסודיה).

God *comes*—Eli-āthah (אליאתה), i Ch. 25:4 (= El-īāthah, אליאתה, in v. 27).

God *passes by* (?)²—El-ādah (אלעד), i Ch. 7:20, for which v. 21 has Eleād (אליעד), Adiel (אדיאל), Ada-iah (אדיה), Jeho-addah RV (יהועד), i Ch. 8:16 *twice* (for which 9:42 has Jarah, ירה, *twice*). Possibly Laadah (לאדה), i Ch. 4:21, may be for אדיעה.

God *dwells* (among his worshippers)—Shēchān-iah (שכניה).

God *lives*—Jēhi-el (יהיאל, also in Palmyrene), Jehi-eli (יהייל), Hi-el (היאל, i K. 16:34), probably to be read Hay-el (היאל), which has אַחַ[ע]יָא, but יהיאל occurs in Sinaitic inscriptions). Cp יהיאל in an *intaglio* which is probably Moabite), the Phœnician יהיאל.

God *meets* (with his worshipper?)—Pagi-el (פגעיאל). God *contends*³—Jeho-iārib (יהויריב), probably also Israel (ישראל), Sera-iah (שריה),⁴ and perhaps Mēra-iah (מריה). 'Yahwe has withstood.'

God *shoots*⁵—Jeremiah (ירמיה), *Yirmēyāhu*. The same meaning perhaps belongs to the Phœnician ירמיאל (a very favourite name, transliterated *Balsillec*, i.e., Βασίλλης in Josephus, c. 1:1, 1:21) and אשמיעל.

God *thunders*—Raam-iah (רעמה), Neh. 7:7, for which Ezra 2:2 has Rēlaiah (רעליה).

God is *glad*⁶ or, more probably, *gladdens*—Jahdi-el (יהדיאל), Jehde-iah (יהדוה), *Yehde-yāhu*.

¹ Possibly יהזיה and יזח may be connected with זוח; cp זוח, Mizzah, Gen. 36:13 = i Ch. 1:37.

² That is, *primarily*, He 'hears' the mother's prayer for a son.

³ Cp Ex. 34:6, i K. 19:11.

⁴ See Ex. 15:3, Ps. 24:8, etc.

⁵ *Yermēyāhu*, which occurs on an *intaglio*, seems to be quite different.

⁶ See Ps. 7:14 [13] 18 [15] 14], Deut. 32:24, etc. Originally, these expressions had a literal sense, as in the case of Apollo.

⁷ Scarcely in the sense of *κνέει γαίω*, said of Zeus.

God *is mighty* (?)—Jecholiah (יכליה), the vocalisation of \mathfrak{C} ('Ιεχελια [AL]) can hardly be correct, as the name so pronounced would signify 'Yahwē comes to an end'; perhaps the genuine form was Jéchallē-iah (יכלליה), 'Yahwē destroys.' With Jecholiah we may compare Jehūcal (יהוכל), Jer. 37:3 = Jūcal (יכל), Jer. 38:1. The Sabæan יכלליה may be something altogether different.

God *rises* (like the sun)—Zērah-iah (זרחיה), Jezrah-iah (זרחיה). Cp the Sabæan ירחיה. So also זרחיה may perhaps mean 'Yahwē is the dawn.'

God is *light*—Nēriah EV (נריה). Cp Διοφάεις, Φανόθεος (i.e., 'divinely bright'), etc.

God is *fire*¹—Uri-jah (אורייה); perhaps Āri-el (אריאל), Ezra 8:16), and Ar-ēli (אריאלי), Num. 26:17) may be corruptions of Uri-el² (אריאלי). Cp אריאל of Byblus, written *Urumilku* in the cuneiform inscriptions (KB290); the Palmyrene נורי (Νοῦρβηλος) 'Bel is fire.'

God *judges*—Eli-shaphat (אלישפט), Jehoshaphat (ישפט).

36. **Sovereign.** Phœnician ישפט. Cp the Daniel (דניאל), דניאל, which occurs likewise in Palmyrene), and perhaps Pēlal-iah (פלליה).

God is *just*—Jehozadak (יהוזק), Zedekiah (זכריה), Šidkiyāhu). Cp the Sabæan יהוזק, in the ancient Aramaic name זכריה (CIS 273), the letters זק are not quite certain.

God *rules, is king*³—Ēli-melech (אלימלך), which occurs also in ancient Aramaic), Malchi-el (מלכיל), cp the Palmyrene מלכיל, Malchi-jah (מלכיה), Cp the Edomite *Kaushmalaka* (KB 220), i.e., Κοσμάλαχος; so also 'Elμάλαχος⁴ (Miller); the Phœnician מלכיל, the Egyptian Aramaic אסמלך. So also the Phœnician מלכיל.

God is *possessor*—El-kanah (אלקנה), Miktō-iah (מקניה). Cp the Sabæan יהוזק, in the Bœotian Θεόπαστος (in an inscription).

God is *Lord*—Adoni-jah (אדונייה), Bēal-iah (בעליה), i Ch. 12:5). Cp the Phœnician אדונייה, אדונייה, etc. The form *Adnibal*, though it occurs only in late times, is important on account of the second *i*, which must be the suffix of the first person, 'my lord is Baal' (or Yahwē, as the case may be).

Thus *man* is regarded as the *servant of God*—Abd-ēl (אבדיאל, which occurs also in Edessene); Abdi-el (אבדיאל), Obadiah (עבדיה), which occurs also on two ancient Hebrew *intaglios*); the

37. **Man a servant.** Massoretic pronunciation of this last name is עבדיה (*Ωβεδίας* in Jos. *Ant.* viii. 134); but \mathfrak{C} usually has 'Abδ(ε)ία(s) [BAL], though 'Oβδ(ε)ιου [BNA] also occurs.

Among the Phœnicians, Aramæans, and Arabs, names compounded with 'Abd (عبر) are much commoner than among the Hebrews; among the Abyssinians the synonymous term *Gabra* is used instead. Names compounded with the corresponding feminine term אמת occur frequently among most Semitic peoples but are wholly wanting in Hebrew. In Greek, names compounded with δούλος appear only in Christian times. The name Nēriah (נריה) can scarcely have this meaning; derivatives from the root נר are found in other Semitic names, but the sense is always uncertain.

Man is likewise regarded as *belonging to God*—Lāēl (אלל), Lēmūēl (למואל, see above, § 21). Cp the Palmyrene אלשמע (Λισάμσου) and the Phœnician אלשמע, if at least the reading Λασσάπρου, in Jos. *Ant.* 1:18 be correct.

At the same time God is the *portion* of man—Hilkiah (חלקיה); a *costly possession*—Magdi-el (מגדיאל); a *delight*—El-nām (אלינאם); *health*—Shelūmi-el (שלמיאל). God is great—Gēlal-iah (גלליה), for which Jer. 35:4

38. **Divine perfections.** has Igdal-iah (יגדליה). The vocalisation is that of the perfect tense, which can scarcely be right here; \mathfrak{C} usually

¹ See Ex. 3:2 ff. Dt. 4:24, 'the pillar of fire,' etc.

² See also ARIEL, i.

³ See Ps. 27:4 ff. etc.

⁴ These forms have the pronunciation of the perfect tense, see Ps. 47:93 i 96 i 97 i 99 i.

has Γοδολία(s)—*i.e.*, where *gēdhol* seems to be a contraction of גְּדוֹל. Cp רבאל ('Ραβήλου, 'Ράβυλος), which occurs in Palmyrene, Nabataean, and Sabæan, as well as other compounds with רב; likewise the Sabæan אלנבר.

God is *perfect*—Jōthām (יֹתָם); possibly, however, this is not a compound but a single word meaning 'orphan' (like אֹתָם).

God is *high*—Jehoram (הוֹרָם), Ram-iah (רַמְיָה), unless this be a corruption of Jeremiah, or Rēmā-iah, רֵמְיָה. Cp the Phœnician רבמעל on an old Aramaic (?) *intaglio*; the Sabæan אירם; the Sinaitic רמאל. So also the Syriac *Rāmishō* 'Jesus is high.'

God is *in front* (?)—Kadmī-el, (קדמיאל). Cp the Sabæan אקרמא.

God is *glorious*—Jochēbed (יֹחֶבֶד fem.), which we should probably pronounce *Jōchābēd*.

God is *blissful* (?)—Jehoaddin RV (יְהוֹאֲדָן fem.), 2 K. 12 (Kt., for which the Kr. substitutes יהוהן, Jehoaddān AV, according to 2 Ch. 25). Perhaps we may add Ladān RV (לְדָן), which occurs several times in Chronicles), a contraction, it would seem, of אֲדָנָן.

God is *incomparable*—Micha-ēl (מִיכָאֵל), Michaiah (מִיכָיָה), which occurs also on an ancient Hebrew *intaglio*.

His *Godhead* is expressly affirmed in Ēli-jah (אֱלִיָּהוּ), 'my God is Yahwē'; we even find Eli-el (אֱלִי־אֵל), 'my God is God.' Cp the Egyptian Aramaic גבואלה, the Palmyrene אלה-ב, Ἐλαβηλος. Whether Jo-el (יֹאֵל) belongs to this category is doubtful, since it may perhaps correspond to אואילו (fem. אואילה), the commonest of all proper names in the Sinaitic inscriptions, the Arabic *Wā'il*—*i.e.*, 'he who seeks refuge (with God)'; see above, § 14. We may add Elihu (אֱלִיהוּ), and probably Jehu (יְהוּ), for Johu, יהוה, like Jēshūa, ישוע, for Joshua (יֵשׁוּעַ).

Some other names compounded with El (אֵל) or Jeho (יְהוֹ) are very obscure. Thus Jahziel (יַחְזִיאֵל), Jahzē-ēl (יַחְזֵאֵל).

39. Obscure. (אֵל) means 'God halves'; but how is this to be explained? Nor is it easy to account for אֱלִיָּהוּ, Samuel, 'name of God,' though in Syriac we find אֱלִיָּהוּ, name of his house,' and in a recently discovered Phœnician inscription, אֱלִיָּהוּ fem., not to mention several other Syriac names compounded with אֱלִיָּהוּ, and Sabæan names compounded with אֱלִיָּהוּ.² Possibly אֱלִיָּהוּ may signify 'bearing the name of God'; cp Ἀπολλώνιος, Ἐκατόνιος, 'named after Apollo (Hekate).' In the case of so well-known a name it is scarcely permissible to alter the pronunciation into Shēmōl, 'his name is God,' although the 'Letter of Aristeas,'³ probably composed in the first half of the first century, B.C., mentions in its list of translators two men called Σομόηλος as well as one called Σαμούηλος; see, however, below, § 42. Another obscure name is Misha-el (מִישָׁאֵל), which seems to be compounded with אֱלִיָּהוּ, since there is a name Mēsha (מֵשָׁא), and in Palmyrene we meet with מֵשָׁא fem. (= *Maïsa*, the name of the Syrian grandmother of two Roman emperors). So also Bakkuk-iah (בַּקְּבֻקִיָּה) can scarcely mean 'pitcher of Yahwē,' though the simple Bakkūk (בַּקְּבֻק, § 71) undoubtedly means 'a pitcher'; on the other hand the name Bukkiah (בֻּקְיָה) might be connected with the Syriac verb בַּקַּ, and if read as Bēkāyāh, would signify 'Yahwē has tested.' Elihōreph (אֱלִי־הוֹרֵפֶת) cannot possibly be interpreted as 'my God is winter';⁴ and to translate the Edomite name, Eliphaz (אֱלִי־פָז), by 'my God is pure gold' likewise sounds very strange. Of Jareshiah RV

¹ So Nestle, *loc. cit.* 132. The Phœnician אֱלִיָּהוּ is, however, not a complete name, but only the beginning of one; hence nothing can be concluded from it.

² See further *SHEM* (NAMES WITH).

³ See the edition of Moriz Schmidt in Merx's *Archiv*, i. p. 22 ff.

⁴ אֱלִיָּהוּ is in Hebrew the opposite of קִיץ and therefore cannot mean 'the time of ripe fruits.'

(יְעֻשִׂיָּה) and Shērēbīah (שֵׁרְבִיָּה) no plausible explanation has as yet been offered. That the consonants of Shēbānīah (שְׁבַנְיָה) and Rēmāliah (רַמְלִיָּה) are correct is proved by *intaglios* bearing שְׁבַנְיָה, שְׁבַנְיָה, and רַמְלִיָּה; but the Masoretic vocalisation here gives no sense. The writer of the present article is inclined to read *Shābānī-jah*, 'Yahwē has brought me back,' and *Rāmī-jah*,¹ 'Yahwē is exalted for me,' but this is very far from being certain. Similarly the unintelligible Tēbal-iah (טְבַלְיָה) should perhaps be read Tōbli-jah, 'Yahwē is gracious to me.' In Athāliah (אֶתְלִיָּה), also the word אֱלִי may be contained, and in Othni-el (אֹתְנִי־אֵל), the suffix יָה, cp Athā-iah (אֶתְיָה, Neh. 11.4); the meaning of אֶתְיָה in this connection remains, however, quite obscure. Finally Hābazzīnīah RV (חַבְצִיָּנִיָּה, Jer. 35.3) may perhaps stand for Hābāzānī-jah (חַבְצִיָּנִיָּה), 'Yahwē has reduced me to straits.' On the whole, it can hardly be doubted that the suffix *anī* is contained in some names where the Masoretic pronunciation conceals the fact. A few other names compounded with אֱלִיָּהוּ or אֱלִיָּהוּ—Uēl (אֹמֵל)—must here be passed over in silence; several of these are no doubt corrupt. Names compounded with words expressing relationship will be mentioned later (§ 43 ff.).

Other appellations of the Deity than Yahwē or El are comparatively rare in Israelite proper names. Ādōnī

40. Other divine names: Adonī (אֲדֹנִי), 'my Lord,' occurs, *e.g.*—in Adonīkam (אֲדֹנִיקָם), 'my Lord has risen up,' and in Adonīram (אֲדֹנִירָם), 'my Lord is exalted'; Adonīram appears in 2 S.

20²⁴ and 1 K. 12¹⁸ as Adoram (אֲדֹרָם), but אֲדֹנִי [A, and B in 2 S.] Ἀδωνιράμ; see ADONIRAM. Whether Adonīzedek (אֲדֹנִיזֶדֶק), the name of a mythical king of Jerusalem, means 'the Lord of righteousness,' or whether we should read some such form as Adonī-zaddīk, 'my Lord is righteous,' cannot be decided (see ADONIZEDEK).

The word מֶלֶךְ, 'King,'² as a name of God, is found in Nāthan-melech (נָתָן־מֶלֶךְ), 'the King has given,' Ebed-melech (עֲבֵד־מֶלֶךְ), which occurs also in

41. Melech. Phœnician, sometimes shortened into מֶלֶךְ; cp the Mohammedan name, 'Abd-almalik, and Regem-melech (רֵגֶם־מֶלֶךְ), which seems to have the same meaning as Jeremiah (יְרֵמְיָהוּ), the first part being probably verbal, 'the King has hurried.' Malchī (מַלְכִי), 'my king,' is found in Malchī-ram (מַלְכִי־רָם), Phœnician, 'my King is exalted,' and Malchī-shua (מַלְכִי־שׁוּא), 'my king is help' (?).

Baal (בַּעַל), 'lord,' which occurs so frequently in Phœnician proper names, may in early times have been used to a large extent by the Israelites also.

42. Baal. In the OT, however, names formed with Baal are rare. Thus we find Esh-baal (אֵשׁ־בַּעַל), 'man of Baal' (1 Ch. 8.33 and 9.39), which stands for אֵשׁ־בַּעַל, ISH-BAAL (*g.v.*), 'man of Baal,' and in other passages is purposely altered into Ish-bosheth (אֵשׁ־בוֹשֶׁת), or even Ishui (אִשׁוּי, 1 S. 14.49), while in 1 Ch. 4.21 it is wrongly spelt אֵשׁ־בַּעַל, Ashbēa (cp the Phœnician אֵשׁ־בַּעַל and such Arabic names as אֵשׁ־בַּעַל, which occurs in Palmyrene inscriptions, perhaps also the Phœnician אֵשׁ־בַּעַל, if at least the reading Μεθουάστρατος in Jos. c. Ap. 1.18 be correct); Bēēl-īāda (בַּעַל־יָדָא), 'Baal knows' (where the Massoretic vocalisation intentionally disguises the word בַּעַל; the name is altered into El-īāda [אֱלִי־יָדָא] in 2 S. 5.16 [but see LXX], and in 1 Ch. 3.8); Jerubbaal (יֵרֻבְבָּאֵל), 'Baal contends' (explained away even in the biblical narrative so as to mean 'he contends against Baal'); in 2 S. 11.21 it is distorted into Jerub-besheth (יֵרֻבְבֶשֶׁת). The same meaning belongs to Mērib-baal (מֵרִיב־בַּעַל, 1 Ch. 8.34 and 9.40), once wrongly spelt Meri-baal (מֵרִיב־בַּעַל), and in all other passages corrupted into מֵרִיב־בֶּשֶׁת, Mephi-bosheth (*g.v.*). To these must be

¹ It is impossible for us to discover to what extent vowels originally long may have been shortened in the ordinary pronunciation of proper names.

² In those cases where the later Jews recognised מֶלֶךְ as the name of a (beathen) god they altered it into Μολάχ, Molech.

added the Edomite Baal-hanan (בעלחנן, Gen. 36:38 ff.), 'Baal has been gracious,' and perhaps the Ammonite Baalis (בעלים), a name of which the meaning is unknown.

The Babylonian form Bēl (בַּל), may perhaps be contained in Ashbēl (אשבעל, for Ish-bel, 'man of Bel'), unless the name be a mere corruption of אשבעל Ishbaal; a more probable instance is בילדד (q.v.), 'Bel has loved' (?).

שָׁדַי, of which the traditional pronunciation, Shaddāi, can scarcely be correct,¹ is found in the following names only—Shēdē-ūr (שְׁדַי אֲדָר), 'שְׁדַי is fire,' Zūrishaddai (זִרִישַׁדַּי), 'my rock is שְׁדַי' (Zarishaddai [B], or Ζαρισσαδαί [N], Judith 8:1; and Ammishaddai (עַמִּישַׁדַּי); see below, §§ 45 and 117. None of these names seems to be really ancient, and the same may be said of Pédahzūr (פְּדַחזֹּר), 'the Rock (i.e., God) has redeemed.'

In Zēlōphēhād (זֶלְפַחָד, more correctly Salpahad, Σαλπαδῶδ), the word פָּחַד (pahad) should probably not be taken as a name of God (cp פָּחַד יִצְחָק, the *pahad* [fear] of Isaac, Gen. 31:4253), since פָּחַד seems to mean 'shadow (i.e., protection) from terror.'

Although Gad (גַּד) is the name of a deity in Is. 65:11 (cp the Syrian name גַּדִּיב, 'God has given'), Azgad (אֶזְגַּד) appears to signify only 'fate is hard.'

In Shēmīda (שְׁמִידָה), the word *shem*² may possibly be a divine appellation, as in the Syrian אֲשִׁימָה (cp אחיה, Ahijah), and בְּנֵי אִיָּה (cp בְּנֵי אִיָּה).

On names formed from names of the Egyptian gods, see below, § 81.

The name of a foreign deity occurs in Obēd-ēdōm (עֹבַד אֲדָם), but whether the vocalisation be correct is doubtful (see OBED-EDOM); עֹבַד אֲדָם is also a Phœnician name. In the following names borne by foreigners we likewise find mention of foreign gods—Tabrimmōn RV (טַבְרִימֹן), 'good is Rimmon'; Benhādād (בֶּן הַדָּד), 'son of Hadad'; Hadadēzer (הַדָּד עֹזֵר), 'Hadad is help.' Possibly Hadad occurs also in Hūnādād (חֲנַדָּד), which is usually explained as standing for הַדָּד, 'favour of Hadad'; if this be so, we must suppose the name to have been adopted during the Exile by an Israelite who was not conscious of its real meaning, as happened in the case of the name Mordecai (מֹרְדֵכַי) and others.

We have next to discuss a group of proper names which consist of a noun expressing relationship coupled either with the name of a god or with some other word.³ The interpretation of these names involves peculiar difficulties, owing chiefly to the fact that the commonest of the nouns in question, namely Ab (אב), 'father,' and אָח, 'brother' take in the construct state the termination (*i*) which serves also as the suffix of the first person singular. Modern discoveries have proved beyond all possibility of doubt that, strange as it may appear to us, names expressing 'brotherhood' or some other relationship with a god were current among the ancient Semites (see ABI [NAMES WITH], § 4 f., and cp AMMI, HAMU). The feminine proper name אֲחֵימֶלֶךְ, on an ancient *intaglio*, names of Punic women such as חַמְלִיקָה and חַמְלִיקָה, as well as the masculine name חַמִּילְכֹן (*Himilcon, Imilcon*, etc.), in which the two component parts are of different genders, cannot be translated otherwise than 'sister of Melk,' 'sister of Melkart,' 'brother of Milkath,' respectively. So we find the Abyssinian names Ahwa Krestōs, 'brother of Christ,' Ehta Krestōs, 'sister of Christ.' So also חַמְלִיקָה must mean 'brother of Melk.' Hence, too, the Hebrew Ahijah (אחיהו), and אֲחִיו, Ahio;

¹ This pronunciation is based upon the impossible view that שָׁדַי means 'One who suffices,' Gr. *ικανός*. The original pronunciation was probably שְׁדַי, Shēdi (see SHADDAI).

² On names compounded with this word see SHEM, NAMES WITH.

³ Cp WRS R.5² 52 ff., and see also ABI- and AHI-, AMMI-, and HAMU, NAMES WITH.

see above, § 24) is 'brother of Yahwē,' not 'my brother is Yahwē,' which of course would come to the same thing, while Joah (יֹאחַ) can signify only 'Yahwē is (my) brother.'¹ The names Abiel (אבִּיאֵל), Abijah (אבִּיחַ), Abimelech (אבִּימֶלֶךְ), as also the Phœnician אבִּיבַעַל (on an ancient *intaglio*), אבִּיבַעַל, Αβιβαλος (Jos. c. Ap. 1:17 ff., *Ant. viii. 53*), אבִּיבַעַל, and Abillahas (CIL, 8:9598) — i.e., *אבִּיאֵלַחַס (probably the name of a Syrian)—are all more naturally explained as meaning 'my father is God, Yahwē, Melek,' etc., and with this it agrees that Abijah (אבִּיחַ) is also used as a feminine name, like the Sabæan אבִּימֶלֶךְ, אבִּיבַעַל; the Phœnician אבִּיבַעַל, moreover, undoubtedly signifies 'our father is Baal' (cp Θεοπάτρα), and Abihu (אבִּיהוּ), which can be nothing but 'my father is He.' We also find Abi (אבִּי) and Ahi (אחי) used in proper names precisely like El (אֵל) and Jeho (יְהוֹ), and we are therefore obliged to regard them as appellations of the Deity—Abidan (אבִּידָן) corresponding to Daniel (דַּנְיֵאל), Abida (אבִּידָה), Midianite) to Jeho-iada (יהוֹיָדָה), Abi-nadab (אבִּינָדָב) and Abinadab (אבִּינָדָב) to Jehonadab (יהוֹנָדָב), Abiezer (אבִּיעֶזֶר), of which Iezer, אִיעֶזֶר, is a contraction, as Ewald has shown)² and Ahiezer (אֲחִיעֶזֶר) to Eliezer (אֵלִיעֶזֶר), Abiram (אבִּירָם) and Ahirani (אֲחִירָנִי) to Jehoram (יהוֹרָם), Abi-asaph (אבִּיאֶסָפִי) and El-asaph (אֵלֶּסָפִי) to El-iasaph (אֵלִיאֶסָפִי), Abishua (אבִּישׁוּעַ), on an *intaglio*, to Jehoshua (יהוֹשׁוּעַ), Abiner (אבִּינֵר) and Abner (אבְנֵר) to Neriah (נְרִיָּה), which is synonymous with אֲחִישָׁפֶרֶץ in Judith 5:5 ff.), Ahisamach (אֲחִישַׁמַּח) to Sémach-iah (סַמְחִיָּה), Ahikam (אֲחִיקָם) to Adonikam (אֲדוֹנִיקָם), Ahishahar (אֲחִישָׁהָר) to Shēhar-iah (שְׁחָהָר יָה). Compare likewise ABISHUR (q.v.), אבִּישׁוּר, 'my father is a wall,' with the Palmyrene בִּישׁוּר (Βηλσούρου), 'Bel is a wall.' Abiathar (אבִּיתָר), *Ebyāthār* appears to mean 'my father is eminent,' and so *tar* is used in several Sabæan names. Ahishar (אֲחִישָׁר) should perhaps be read Ahisar (אֲחִישָׁר), 'my brother is a prince.'³ Cp the Sabæan names אֲמַרְיָה (like Hebr. אַמְרִיָּה, Amariah), 'the brother raises' (like Hebr. יְהוֹיָכִים, Jehoiakim), 'the brother is princely,' etc. The very ancient name, Abram (אֲבְרָם), Abraham (אֲבְרָהָם), however, must signify 'high father,' since it stands in connection with Sarai (סָרַי), Sarah (שָׂרָה), 'princess,' and Milcah⁴ (מִלְכָּה), 'queen.'

In those cases where the second part of the name is an abstract term the grammatical analysis becomes more difficult. Here the rendering 'my father is —,' 'my brother is —,' appears to be supported by the following two considerations. Firstly, the use of 'father' in the sense of 'possessor,' 'one who has to do with a thing'—a use which in ancient Arabic is rare,⁵ though it is common in the Arabic of the present day—does not occur in Hebrew, unless we reckon the obscure expression, אבִּיעֶזֶר, 'father of eternity,' in Is. 9:5 [6].⁶ To employ 'brother' in the vague sense mentioned above would likewise be contrary to Hebrew usage. Furthermore, names with the prefix אבִּי or אֲחִי are borne, in some cases, by women.⁷ Hence Abihud (אבִּיהוּד), Ahihud (אֲחִיהוּד), must mean 'my father, brother, is glory,' and similarly Abitub (אבִּיתוּב), Ahitub (אֲחִיתוּב) (where *tub*, *tūb*, is to be rendered 'happiness,' or else changed into טוב, *tōb*, 'good,' as seems to be indicated by the ancient Aramaic name, compounded with קָטָב, 'good'), Abinoam (אבִּינוֹם), Ahinoam (אֲחִינוֹם, 'pleasantness'), Abihail (אבִּיחַיִל, masc. and fem., 'strength'), Abigail (אבִּיגַיִל, fem., 'exulta-

¹ For another view see ABI (NAMES WITH), § 1).
² *Hebr. Gram.* ed. of 1863, p. 667.
³ For another suggestion, see AHISHAR.
⁴ On these names see also the special articles.
⁵ This use is a development of the *kunya*, a form of nomenclature peculiar to the Arabs.
⁶ For another suggestion see ABIHUD; ABI, NAMES WITH, § 1.
⁷ It is true that the modern Arabs, in certain districts, apply *abū*, 'possessor,' even to a woman, e.g., *abūl-ayyūn al-ayyūn*, 'the woman with languishing eyes.' The same meaning belongs to the Neo-Syriac phrase *mar enē marān*, where *mar*, 'master,' stands for 'mistress' (see Socin, *Neuararamäische Dialekte*, 135, 10). It is very improbable, however, that this usage existed in Hebrew.

tion'), Abishalom (אבישלום) or Absalom (אבשלום; 'health', 'peace'), which latter form is supported by 1 Macc. 13:11 Ἀψάλωμος (one of the Hasmonæans, see Jos. Ant. xiv. 4.4), and Ἀψάλωμος (see Miller), whilst the spelling Ἀβεσσαλώμ in 6 (BA and sometimes L) is by no means inconsistent with it. To these may be added Ichābōd (איכבד), 'my father is glory,'¹ and the feminine Abīṭal (אביטל), 'my father is dew.'² In some cases, of course, the real meaning is doubtful. Thus Abishai (אבישאי), Abshai, RV^{mg} (אביש), Ithāmār (איתמר), Abishag (אבישג, fem.), Ahimaaz (אחימזק), Ahi-thophel (אחיהפלי), Ahimān (אחמן), Ahbān (אהבן, cp Eshban, אשבן), are all obscure (see the several articles); others are quite uncertain.³ Ahimoth (אחימות) may perhaps mean the twin brother of a child born dead, or of a child who died immediately after birth.⁴ Ahilud (אחילוד) is probably nothing more than 'a brother is born'—i.e., Ah-yālūd⁴ (אחיילוד). The name of the Phœnician woman Jezebel (איזבל) can scarcely belong to this category (see JEZEBEL); cp two other Phœnician names, בעיאזובל and שובל (both fem.).⁵

It is therefore in accordance with analogy to interpret Hamnu-el RV (המניאל) as standing for Hāmū-el (המניאל), so already AV) 'brother-in-law of God,' like the Sabæan (המניאל) חמנעה (see further HAMU, NAMES WITH). The Sabæans also use ḥāl 'avunculus,'⁶ as an appellation of the Deity, in the names אהלירע, אהלירע, אהלירע just as they use עמ 'patruus' in אהלירע, אהלירע, etc. This word עמ ('amm') 'patruus' is common to all the Semitic languages and must at one time have been employed in Hebrew also; in certain phrases of the OT it still retains the general sense of 'a kinsman by blood.'⁷ Hence we are led to interpret עמ עמי ('ammī), in certain Hebrew names, as 'my kinsman,' and to refer it to some deity (see further under AMMI, NAMES WITH). Ammi-nadab (עמינדב) corresponds exactly to Abi-nadab (אבינדב) and Jeho-nadab (יהונדב). Ammi-zabad (עמיזבד) to Jeho-zabad (יהוזבד), Am-mohud (עמיחוד) to Abihud (אביחוד). The name Eliam (אליאם) in 2 S. 11.3, instead of which 1 Ch. 3.5 has אמיאל, Ammi-el (found in several other passages), can hardly mean anything but 'my God is the kinsman,' or, if we follow the other reading, 'my kinsman is God.' In the case of Ammishaddai (עמישדי), it is possible that the narrator who coined the name intended עמ to be understood as 'people,' and the name of David's son, EV Ithream (יהיטעם), may naturally be explained as 'the people is eminent,' although the analogy of Abiathar (אבייתר) tells in favour of the other interpretation (see further ITHREAM). The names of the two rival kings Rehoboam (רעבועם, Rēhob'am) and Jeroboam (ירבועם, Yārob'am), however, certainly appear to mean 'the people is wide' and 'the people increases'; it is conceivable that they adopted these names on coming to the throne, or that one of them, at his accession, adopted a name formed in imitation of his rival's.⁹ On שבעם see above, § 30.

Perhaps Dodāvah (דודווא) in 2 Ch. 20.37 (דודווא) may be a mistake for דודיהו (Dōdiyyāhu) 47. Dod, etc. 'my cousin (or friend) is Yahwè'; on shorter forms of the same see below, § 51 (end). More-

¹ If the forms are not corrupt (see ICHABOD, ABITAL).
² The ancient Aramaic אהליבד and the Palmyrene אהיתור are also of doubtful meaning.
³ Unless the word is corrupt; see AHIMOTH.
⁴ For another suggestion see AHILUD.
⁵ It should be mentioned that the real sense both of זבל (Zebūl) and of Zebūlōn (זבולון) is unknown.
⁶ See Praetorius, *Neue Beitr. zur Erklär. der himjar. Inschr.* 25.
⁷ Cp מל. Krenkel, *ZATW* [88], 280 ff. With some details in this paper the writer of the present article is, however, not able to agree.
⁸ Cp the Phœnician אמיאל, and also אמיאלים which seems to occur on an *intaglio*. The עמ which stands at the beginning of some other Punic names is merely a false spelling of אמ, i.e., אמה, 'handmaid.'
⁹ For another suggestion see JEROBOAM.

over, the name of the Edomite clan Ohōli-bāmah RV (אהליבמה) appears to contain a word corresponding to the Arabic *ahl* 'kindred.' A similar formation is Ohōli-ab RV (אהליאב), whether it be genuine or not; on the other hand, in Ohōli-bah RV (אהליבה), coined by Ezekiel, the word *ahl* obviously has the sense of 'tent.' The ancient name רעואל (REUEL, *q.v.*) we may suppose to mean 'companion of God.' Compare such Abyssinian names as Arka Dengel, 'friend of the Virgin (Mary),' Bitza Hawārcyā, 'companion of the apostle.'

Ben (בן) 'son' appears nowhere as an integral part of a Hebrew proper name except in the case of Benjamin

48. Son. (בניסין), which perhaps means originally 'those who dwell to the right'—i.e., the most southern portion of the tribes who went by the name of Joseph (2 S. 19.20 [21]). In the NT we find the Aramaic forms Barsabas (Βαρσαββᾶς—i.e., ברשאב, *Barshabbā*), 'born on the Sabbath' and Βαρσάβας, a surname of which the sense is obscure (see BARNABAS). There are several instances of Aramaic names which designate the bearer as the 'son' of some god; but the only example in the OT is the Damascene בן הדר, Ben-hādād (*q.v.*). Compare such Abyssinian names as Walda Le'ūl, 'son of the Most High,' Walda Māryām, 'son of (St.) Mary,' Walda Gabre'el, 'son of (the angel) Gabriel,' etc. Cases in which a man is called not by his own name but by a patronymic (as happens several times in 1 K. 4; cp Βαρισησούς, Acts 13.6 and probably Βαρσάββᾶς also), do not, of course, belong to this category. Bath (בת) 'daughter' occurs in Bath-sheba (בת שבע) and Bath-shua (בת שוע); but whether these really signify 'daughter of the oath' and 'daughter of help' may be questioned. Bith-iah (*q.v.*) would mean 'daughter of Yahwè'; but the name is doubtful, though supported by the analogy of the Phœnician בת בעל, Compare such Abyssinian names as Walata Māryām, 'daughter of (St.) Mary,' Walada Madkhen, 'daughter of the Saviour.'

In all languages there is a tendency to shorten, or otherwise to modify proper names. This phenomenon,

49. Abbreviated names. which has so often been observed in the Indo-European languages, is likewise conspicuous in the languages of the Semites. To this cause it is largely due that, in the vast majority of cases, Arabic proper names take the form of nouns pure and simple. Thus when we find the name Sa'd, 'fortune,' used side by side with Sa'd Manāt, 'fortune from (the goddess) Manāt' (cp the Nabatæan טער עתור, טער אלהי, טער אלהי, etc.), there can be no doubt that the simple Sa'd is an abbreviation. The same thing applies to Wahb and Aus, 'gift' (which are used sometimes alone and sometimes with the name of some god), as well as to many other words. Even a name like 'Ali, 'high' (cp the Nabatæan עלי, 'Alēlu) may be a shortened form of עליאל (which also occurs in Nabatæan) 'God is high,' or of some similar compound; the Hebrew אלי (אלי) is perhaps to be explained in like manner, and so also Rām (רם, as compared with יהורם, Jehoram). An analogous case is the Greek Ἰππᾶτος ('Ἰππάρης, Ἰππᾶτος), contracted from Ἰππατόδωρος; these names were current at Thebes, where Zeus Ἰππᾶτος was worshipped (Fick, 271). The fact that the shorter name, taken by itself, offers a plausible sense constitutes no valid objection, for it not infrequently happens that proper names, with or without change of form, acquire a meaning different from that which they originally conveyed.

Particularly clear examples of abbreviation are to be found among the Abyssinians, who often use part of a compound as a proper name, without further modification—e.g., Sēbhat, 'praise,' shortened from Sēbhat la-Ab, 'praise to the Father,' Tasfā, 'hope,' shortened from Tasfā Māryām, 'hope in Mary,' or Tasfā Hawāriyāt, 'hope in the Apostles,' etc.; often, however, the termination ā, ē, or ī is added—e.g., Khailū, Khailiē, for Khaila Mikā'el, 'power of Michael,' etc., Habtū, Habtō, Abtū, for Habta Māryām, 'gift of Mary,' etc., Tansiō for Tansā Krestōs, 'Christ is risen,' and so forth. To these may be added

'resists,' and Mēra-iah (מְרִיָּה), Yahboh (יַחְבֹּה), 'hides' (1 Ch. 7.34, Kt.; see JEHUBBAH), and El-iahba (אֱלִיחַבָּא), on an *intaglio*, and Ezekiel (אֶזְקִיֵּל). The following names presuppose the Deity as the subject, and perhaps originally contained some divine appellation—Jair (יָאִיר), 'enlightens'; Jābin (יָבִין), 'distinguishes,' 'perceives'; Igal (יְגָל), 'ransoms' (cp פְּדִיָּהוּ, Pēda-iah); Jamlēch (יַמְלֶךְ), 'gives dominion' (cp the Palmyrene *Imlān*, 'Iáμλaxos, in Greek literature 'Iáμβλaxos¹); Imna (יַמְנָא), 'wards off'; Imnah (יַמְנָה), 'determines' (properly, 'counts'); Jaālah (יַעֲלָה) or Jaāla (יַעֲלָא), 'is high' (cp the Arabic *Ya'ālī*), which last name, however, may possibly be from the Aramaic, and signify 'mountain-goat' (see below, § 68). Jaroah (יָרוּחַ) should perhaps be read *Yarwah*—i. e., '(God) enlarges'—cp the Sabæan *Jardab*. To the same class may belong Jeush (יְעוּשׁ) or Yeish, if it be really the equivalent of the Arabic *Yashūth*, 'Éγούθος in Miller—i. e., 'helps,' cp the Phœnician *Yer*, and also Jair (יָעִיר, 1 Ch. 20.5), 'awakes.'

On the other hand, the bearer of the name seems to be the subject in the following:—Jābām (יַבְאָם), 'is fragrant' (?), cp Bāsēmāth (בִּשְׁמַת), 'Aρωματωμένη (?), Jaālam (יַעֲלָם), 'is youthful' (?), Jashub (יָשׁוּב),² 'returns' (cp Εἰσσοστος), Imlā (יַמְלָא) or Imlah (יַמְלָה), 'is full' (cp יָמלא as well as יָמלא, Malāh in Palmyrene), Jephunneh (יַפְנָה), 'is brought back' (?), Izhār (יַצְהָר), 'shines' (or 'oil'), Ishbāk (יִשְׁבַּק), 'leaves behind,' 'outruns'³ (?), Ishūā (יִשְׁוּא), 'is worthy' (?), from which Ishūī (יִשְׁוּי) was probably formed by the addition of the adjectival ending, Isaac (יִצְחָק), 'laughs' = יִצְחַק, 'sports,'⁴ Jacob (יַעֲקֹב), 'follows'; the last two appear to have been originally names of gods. The following names, nearly all of which occur only once (in Chronicles), are altogether obscure—Ishpān (יִשְׁפָּן), Idbāsh (יַדְבָּשׁ), Idlāph (יַדְלָפ), Jāziz (יַזִּיז), Jālōn (יַלּוֹן), Jaakan (יַעֲקָן or יַעֲקֹן), Jachan (יַחְחָן), Ishbah (יִשְׁבָּה). The same may be said of the national name Jētūr (יַעֲטוּר), if at least it be derived from *Yar* and not from *Yar*.

A feminine form of this class is Timna (תִּמְנָה), Edomite, which perhaps originally presupposed some goddess—

55. Prefixed t. e.g., Ashtōreth (אֲשֶׁתֹּרֵת)—as the subject. In the case of Tahan (תַּחַן), the true pronunciation is possibly Tāhōn, 'she is gracious,' Tēmān (תִּמְנָן), 'south,' is primarily the name of a place.

Instead of a sentence, a simple participle or adjective expressing the same idea may often serve as a proper name; in such cases the Deity is usually the logical subject. Thus we find Zābūd (יַזְבֹּד), 'given (by God)'; fem. Zēbidah (יַזְבִּידָה) (RV following Kt. and B, and Zēbūdāh (AV following Kt. and B, 2 K. 23.36 (cp the Aramaic *Zēbeidās*, the Arabic *Zabīd*, also *Δῶρος*, *Δωρῶς*, the Aramaic *Zabid*, etc.); Bārūch (בָּרוּךְ), 'blessed'; Rēhūm (רְהוּם), Hānūn (חַנּוּן), 'pitied' (cp the Talmudic *Rāphū* (רַפְּאָה), 'healed'; Gāmūl (גַּמּוּל), 'benefited' (scarcely 'weaned,' cp נִמְלִיָּאֵל; David (דָּוִד), 'beloved';⁵ probably Mōdād (מֹדָד), as the Samaritan text and the LXX read in Nu. 11.26 *ff.*, instead of the Masoretic Medad (מֵדָד); perhaps Hobab (חֹבָב), cp the Aramaic and Arabic *Hobāb*, etc., חַבְבִּי *intaglio*, also *Φιλοῦμενος*; names which at least, in certain cases, may have been intended rather to express love on the part of men); Sēthūr (סֶתוּר), 'hidden' (cp the Talmudic

¹ *Iamlicus* in *CIL* 8.3332, is probably a Palmyrene. The Arabic name *Tamlik* (fem.) means only 'she has power,' 'she rules.'

² But *Yashub*, which is found on an ancient Hebrew *intaglio*, may be *Yashub*, i. e., 'Eliashib' (for אֱלִישִׁיב, Eliashib), according to 1 Ch. 7.1 (Kt.)

³ Cp *Sābik* which exactly corresponds to the Arabic *Sābik*.

⁴ It would seem that the roots *צחק* and *צחק* were originally distinct.

⁵ For another possible explanation see DAVID (beg.).

⁶ For other suggestions see HOBAB.

סֶתוּרָא). To the same class belong, in spite of the different vocalisation, Zaccūr (צַכּוּר), 'remembered'; Azzūr (עֲזוּר), 'helped'; Shammūā (שַׁמּוּא), 'heard' (or rather, 'one with reference to whom a prayer is heard,' the prayer primarily being that of the mother);¹ Hasshūb (חַשְׁבּוּ), 'thought of'; Jaddūā (יַדּוּא), 'known'; Amōs (אֲמוֹס), 'borne.' Probably we may add Meshullam (מֶשׁוּלַם), fem. Meshullemeth (מֶשׁוּלַמֶת), 'kept safe'; and Shallūm (שַׁלּוּם). A slightly different example is Sālū (שַׁלּוּ), 'asked' (cp שְׁאַלְתָּאֵל, Shēalti-el, with its exact equivalent in Aramaic *Shēlā, Shēlās* (Σελῆλας, Σιλῆλας), cp Θεατήρος, Ἐπεικτος, etc.

It is possible that in several other cases laudatory titles, used as proper names, were originally understood

as referring to some deity whose name was contained in them (see above, § 49).

57. Possible abbrev. This might apply to *Āmōz* (אֲמוֹז), 'strong' (cp אֲמַזְיָהוּ, Āmaz-iah); Zādōk (צַדּוֹק), 'just' (cp יהוֹזָדָק, Jehozādāk); Ram (רָם) and Sēgūb (שֶׁגֻב or שֶׁגֻב), 'lofty' (cp ותִּשְׁבַּע יְהוָה, Is. 2.17). More doubtful cases are Adin (עֲדִין), Adina (עֲדִינָא), and Eḏen (עֵדֶן), 'blissful' (in spite of יהוֹעֲדָן, Jehoaddin RV; יהוֹעֲדָן, Jehoaddān AV); Pārūah (פְּרִיחָה), 'blooming' in spite of the Talmudic (פְּרִיחָה); Hārīph (חֲרִיף), Hārēph (חֲרֵף), 'sharp' (in spite of אֱלִיהֶרֶף, Elihoreph); Hēthān (חֵתָן), 'perpetual.' In the case of the Edomite Hādād (הַדָּד), the name of the god is all that has remained of the original compound, and the same remark may apply to Melech (מֶלֶךְ), 'king' (cp Eli-melech), Malūch (מַלְכּוּ), Baal (בַּעַל), cp Baal the Tyrian, Jos. c. Ap. 1.20), Addon (אֲדוֹן) and Addan (אֲדָן), cp the Palmyrene *Adōn*, for which we should probably read *Ādōn*. It is quite possible, however, that these latter names mean nothing more than 'master,' as applied to human beings, like the Aramaic *Brāthā*, fem. *Mārṭha*, and its variations. The personal name Gad (גַּד), and Gādi (גַּדִּי) is probably to be regarded as the abbreviation of a compound in which *gā* was either a god or else 'fortune.' The tribe of the *gā* may also have derived their name from the god.

Thus, there can be no doubt that very many Hebrew proper names are in reality abbreviations. Among these must be included those reduplicated

58. Reduplicated forms. forms which originate with small children (after the manner of 'Lili' for 'Elizabeth,' 'Mimi' for 'Marie,' 'Lulu' for 'Louisa')—e.g., Shavsha (שַׁשְׁשָׁה),² Shisha (שִׁשָּׁה), Shēshai (שִׁשַׁי), Shāshai (שִׁשַׁי), Shēshān (שִׁשְׁנָן), Shashak (שַׁשָּׁק), Zaza (זָזָא), Ziza (זִיזָא).⁴ To discover the original forms of such names is, of course, impossible. In Bēbāi (בְּבִי) we seem to have the same term of endearment which, in the form *Babba*, served as the nickname of a well-known Arab,⁵ and is found also in a N. African inscription—*Babbe* (for *Babbæ*) *f(i)lius*, see *Ephem. epigr.* 5.256; the word is ultimately identical with Engl. *baby*, Fr. *bébé*, words formed in imitation of an infant's first attempts to speak.

Of the names hitherto enumerated the vast majority have a religious meaning, and this is true even of many

59. Character of these religious names. of those in which no god is expressly mentioned. The same thing may be said of the Semites generally; nor shall we be wrong in supposing that such was

once the case among the Arabs, though long before Islām a great change had taken place in consequence of the growing tendency in favour of simple names. In Greek names also religious ideas are prominent, but less so than in the names of the Semites.⁶ Great importance, moreover, must be attached to the fact that, as the above

¹ Such abbreviations are common in names of this sort.
² No importance can be attached to the fact that the Massoretic vocalisation distinguishes Gad the idol, as well as Gaddi (Nu. 13.11), from the other Gād, Gādi (see GAD, § 1).

³ For another explanation see SHAVSHA.

⁴ On reduplicated forms in the language of Arabian children, see Goldziher in the *ZDMG*, 33.607.

⁵ He derived the name from a verse uttered by his mother when he was an infant.

⁶ It is remarkable how few theophorous names occur in Homer.

parallels show, the names of the Hebrews hardly differ at all from those of the other Semites with respect to the religious conceptions therein expressed. These formations, it is to be remembered, go back to a remote antiquity; we must therefore be careful not to interpret them in too spiritual a sense. Names like 'God has helped,' 'God has delivered,' etc., referred no doubt originally to the help afforded by the Deity to the mother in granting her a child or in averting the peril of death. It is true that from the time of the prophets onward a more spiritual or at least a more general conception began to prevail. But a name like the Palmyrene בולחא (= בולחא), 'Bol has wiped away, effaced,' also belongs to a more advanced stage of religious development, since the reference is to the effacing of sin.

We may now pass on to names of other kinds, mentioning some of those categories which are most important and most clearly defined. In well-nigh every case these names consist of a single member only, though it will sometimes be necessary to include compounds, and even to refer back to names which have a religious meaning. It may be taken for granted that the meaning of a name applies, in strictness, only to the first individual who receives it. When once a name has been coined, it is liable to be used indiscriminately, that is to say, without any special reference to its original significance. We must admit, however, that among the Hebrews the real meaning of indigenous names could never be forgotten to so large an extent as has been the case among the nations of modern Europe.

Some names refer to the special position which the new-born child occupies within the family. If we were better acquainted with the circumstances

61. First-born. in which names have been coined, we should doubtless perceive that this class of names is really much larger than might appear at first sight. Thus, as was mentioned above, it is clear from Gen. 30²² that Jephthah (יפתח = יפתח), Yiftah-el) means the first-born. The same meaning obviously belongs to Becher (בכר, from which is derived the adjectival form בכרי, Bichri), the equivalent of the Arabic *Bakr*, found also in Nabataean and Sabæan; cp *Πρωτογέννης, Πρωτοκλήτης, Πρώγονος*. For בכור, I S. 9¹, some MSS. of \mathfrak{S} have Βαχ(ε)φ, *i.e.*, בכר, In 1 Ch. 8³⁸ (= 9⁴⁴) Böcheru (בכרו) is expressly stated to be the name of a man, but it was no doubt originally בכרו, 'his first-born,' cp 8³².

In the Semitic languages we find a considerable number of names from the root חלף, whereby a child is designated

62. Substitution. as a substitute for one lost. The Nabataean חלפאלי, 'substitute of God' (*i.e.*, given by God), proves that these names also originally had a religious sense, like *Ἀντίδοτος, Ἀντίδωπος*, which presuppose a giver; cp likewise *Ἀντίγονος, Ἀντιφάνης, Ἀντιφαντος*. Among the Jews the earliest specimens of names formed from the root above mentioned are Χαλφει (Chalphi RV), 1 Macc. 11⁷⁰ [AV], and Alphæus, Ἀλφάιος in the NT, which corresponds to חלפאי in the Talmud. Probably, however, the same meaning underlies several other names—*e.g.*, Mānasseh (מנשה), 'he who causes (a loss) to be forgotten,' Menahem (מנחם), 'comforter' (found also in Phœnician and ancient Aramaic, cp fem. מנחמת on an ancient *intaglio*, which is Palestinian but probably not Israelite), Nahūm (נחום), Phœnician נחם, *Náoumos* of Aradus, CIG, 2526), also vocalised Nēhūm (נחם) and Naham (נחם), so likewise נחמני (Nahāmāni) derived from נחמן, Tanhūmeth² (תנחמת), 'comfort,' evidently an abstract noun (cp the Talmudic תנחום, תנחומי, *Θανούμου*), Nehem-iah (נחמיה), in which the reference to God still appears. The names Réphā-iah (רפיה), Réphā-el (רפאי), cp Arabic *Yarfā*, perhaps convey a similar idea; so also certain derivatives of שוב—*e.g.*,

¹ For other readings see ECHORATH.
² The vocalisation can scarcely be correct.

Mēshōbab (משובב), Shōbāb (שובב), and, if it be really pre-exilic, El-iāshib (אישׁיב). This last, at a subsequent time, no doubt, was supposed to denote restoration from the Exile. Rēūbēn (רואבן) probably belongs to the same class, and may be explained as 'reparation' like the Palmyrenian רובה, *Rubatis*, the Arabic *Ru'ba*; but the interpretation, 'behold a son!' is also possible. The Arabic names 'Lyād, *Budail*, the Abyssinian *Fantō, Fantū, Tikkū, Alatakko, Kāsī* (the real name of King Theodore), likewise signify 'compensation.'

Jeshebb-ab [יזב] (= יזבאב, 1 Ch. 24¹³) appears to be יזבאב, 'he brings back the father' = *Ἀντίγονος*. It is true that Ἰσβαάλ in \mathfrak{S} ^{AL} seems to presuppose ישובעל (*i.e.*, Baal); but in this case Baal must be a scribal error, for the Chronicler would scarcely have bestowed such a name on a Levite.

Posthumous (Ἐπιγέννης, *Μετάγονος*, etc.) is the most probable rendering of Akkūb (עקוב), Jacob (יעקב). In the case of the latter the essential point is that he was born after his brother.

The root עקב, which appears also in the Palmyrene עקבא (*Ἀθράκαβος*), the Syriac עקבא, the Talmudic עקביה, the Arabic *Oḳba, Oḳāib*, admits of various other senses, and may perhaps also mean 'compensation.'

Twin occurs first in the NT name, *Θωμάς* (Thomas),

63. Circumstances of birth. explained as *Διδύμος* (Didymus), which is itself a Greek proper name, corresponding to the Phœnician תומא. *Θωμάς* is תומא, a Hebrew form with the Aramaic termina-

tion; the later pronunciation is תומא.

Azūbah (עזובה), 'forsaken,' perhaps means a girl whose mother died in giving birth to her. The same idea may be conveyed by Azmāveth (עזמאת), 'death is cruel,' by Gēnūbath¹ (גנובת), cp the Talmudic and Syriac גניבת, and by the Aramaic form, Hatīpha (חטיפא), Ezra 2⁵⁴ = Neh. 7⁵⁶).²

The name Geber (גבר, 1 K. 4¹³ 19) expresses the joy of the mother on having a *male* child; cp **64. Child names.** Job 8³, הרה גבר. It is of course possible that we should pronounce *Gibbār*, 'hero.'

Cp the Palm. גבר, the Ar. *Jabr*. On *Āhīmoth* (אחמיתא), see above, § 45 end.³

Bēn (בן), 'son,' in 1 Ch. 15¹⁸, is very doubtful; perhaps it should be read בני—*i.e.*, it may suggest more or less distinctly the idea of 'my son,' like the Abyss. *Gōbāzō*, 'my boy.' Cp also the Talm. גוּבא, 'suckling,' בורא, 'little son,' and the Ar. *Walīd*, 'son.'

Naārah (נערה), 'girl,' occurs in 1 Ch. 4⁵ *f.*, and corresponds to the Talm. לירא (ילרא). Cp the Nabataean בנית, 'little daughter.'

Jādlām (יעלם, see above, § 54) may mean 'youthful, strong,' and Jāphia (יעיף), 'tall of stature,' a name of this kind being often bestowed upon an infant as a *bonum augurium*.

Instead of Ahiam (אחיאם), we should probably read Ahi-ēm (אחיאם), 'mother's brother,' and instead of

65. Relationship. *Āhūmai* (אחומי), the form אחומי, according to \mathfrak{S} ^{AL} (*Ἀχουμαι*)—*i.e.*, אחי אמי, (Ahi-inimi), 'my mother's brother.'

So also in Aram. we find אחומי, not to mention other varieties of spelling; on this and similar expressions of relationship used as proper names, see an essay by the writer of the present article in the *WZKM*, 6³⁰⁷ *f.*⁴ The idea is that the new-born child will at some future time stand by his mother, as if he were her brother. To this corresponds Ahab (אחאב), 'father's brother,' of which the more correct form is

¹ See also GENUBATH.

² On the other hand the Palmyrene name גנבא means 'thief' like the Arabic *Sārīk*. Such a name might perhaps have been used by Israelites also at a very early period, when skill in stealing, or at least in robbing, was very highly esteemed.

³ Instead of *Gibbār* (גבר), Ezra 2²⁰, we find in Neh. 7²⁵ Gibeon (גבעון), the name of a place, which is probably the right reading.

⁴ A considerable number of fresh details might now be added.

NAMES

probably Ahi-ab (אחאב), since 'Αχλαβος was the name of a nephew of Herod, and in Jer. 29:21 f. [BNAQ] has 'Αχλάβ. Cp the Aram. אַחאב רמתי and several varieties of the same name. To the same class belongs Ah-iān (אחינן) = Syr. אחינא, 'relative, cousin,' which also occurs as a proper name.

We now turn our attention to a group of names descriptive of physical peculiarities. Some of these may have been originally nicknames, like the corresponding names in Latin,¹ but Arabic usage seems to show that such terms, even when they are far from flattering, often served from the first as proper names in the ordinary sense.² This applies also to many Hebrew names of other kinds, such as those borrowed from animals.

66. Physical peculiarities. Hakkātān (הקטן), Ezra 8:12, 'the small one'; the article is here not easy to explain. Cp the Phoen. קטן (doubtful), קטנא, the Talm. ועורא, etc., also *Pumilio, Pusilla*. Hābakkūk (החבקוק), or (after G's αμβακουα) חבקוק (Habākuk), might be explained as 'dwarf,' from the Arabic; but the meaning is extremely doubtful.³

The very ancient name, Laban (לבן), 'white,' corresponds to the Ar. *Abyad*, to λεῦκος and to *Albinus*.⁴ The Levitical name, Libni (לבני), Ἰβνία Λοβεν[ε]ίη, which has the adjectival ending, may perhaps convey the same sense. Hārūz (חרוז), probably 'yellow' (= *Flavius*?), and Zōhar (צוהר), 'reddish white'; cp the Talm. צוהר, the Ar. *Amar, Kāmat*, the Lat. *Rufus*, all of which mean 'red.' On an ancient Hebrew *intaglio* we find the name יחורר, 'blackish,' like the Syr. אַחַרְרָא, the Ar. *Aswad, Sūhaim* (which is also Sab.), etc., Μέλας, *Niger*.

Hārīm (הרים, הרים) might be derived from הרם in its usual meaning, 'invulnerable,' 'holy,' etc. Since, however, Hārūnaph (חרוניף) is probably to be explained, with Gesenius, as הרום אף, we may conclude that the former name also signified 'with pierced nose,' like the Ar. *Afram*.

Heresh (הרש, more probably Hērēsh, חרש, or, in its Aram. form, הרשא, Harsha (cp the Palm. הרשא, 'Apsā), 'dumb,' = Ar. *Ahras*. Chīmhām (כמהם), Chīmhān (כהון, in Jer. 41:17 Kt. כמהם), 'blind' (?). Ater (אתר = ἰτῆρ), 'left-handed,' Σκαίος, *Scævola*. Pasēah (פסא = Πισσαή), 'halting,' Ar. *A'raj*, etc., *Claudius*.

Kārēah (= קרעה = קרעה, קרעה), 'bald,' cp the Palm. קרעה, the Ar. *Akra*, etc., *Calvus*. The Sinaitic קרעה, admits of another meaning. Kōrah (קרעה) appears to have been originally the name of a place ('bare surface').

Ikkēsh (עקש), 'crooked,' cp Ar. *Aṣ'ar, Su'air*.

Gideōn (= גידעון) = Ar. *Jud'ān*, 'maimed.'

Gārēb (גרוב), 'scabby,' cp Palm. גרובא, Ar. *Juraib, Jarbā*.

Zerūah (צדועה), 'leprous' (fem.), like the Ar. *Abras*.⁵

Among laudatory names may be mentioned Job (איוב), 'assailant,' i.e., 'brave warrior' (cp Ar. *Muḥarib*); Bārāk (ברק), 'lightning';

67. Laudatory. Mered (מרד), 1 Ch. 4:17, 'resistance,'⁶

unless this be the name of a place, of which in Semitic countries there are several derived from the root מרד. To these may be added כלכב, CALEB [*g.v.*] (of which Chēlūb, כלוב, and Chēlūbai, כלובי, are probably incorrect variations), 'raging with canine madness'; a brave warrior may be compared to a mad dog, as is shown by the corresponding Arabic name *Aklab* (which occurs also in Nabataean). On the other hand, Nabal (נבל), 'fool,' can hardly have been the real name of the foolish man who refused his services to David. On laudatory proper names, see also above, §

¹ For what follows many English, German, and other modern European family names might be quoted.

² Cp such names as Πανίσχυρος, Αἰσχύλος in Greek.

³ See also ΗΑΒΑΚΚΟΥΚ. ⁴ For another view see LABAN.

⁵ See, however, ZERUAH. ⁶ For another view see MERED.

NAMES

57. To the same class belong Nēzīah (נציח), 'excellent' (Aram.); Naāmān (נעמן, cp Ar. *Nu mān*), and the fem. Naāmāh (נעמה), 'pleasant,' together with several other Arabic names from the root נעם; Dēlilah (דליה), probably 'delicate.' We might add Asher (אשר), which perhaps means 'happy'; but it may also be taken as an abbreviation of the obscure name which appears as Āsar-ēl RV (אשראיל) and Āsri-el (אשריאיל) in the MT. The notion of 'long life' seems to be expressed in Huldah (הולדה, fcm.), Heled (הלד, very doubtful), and Heldaj (הלדי); cp Arabic *Hālid, Alahlad, Yaḥlud*. Similarly Amōn (אמן), AMNON (*g.v.*, אמנטן), may signify 'safe,' out of danger.

Names borrowed from animals (not always, it should be observed, of the nobler and stronger kinds) are found among the Hebrews as well as among the Arabs and other races. That the name of the 'lion' is so used does not appear certain, since Arieh (EV אריה), 2 K. 15:25, may be open to question, on account of the article.² 'Ari, Josephus, *Bf*, vi. 18 vi. 26 vii. 5,5, may be an abbreviation. Instead of Laish (ליש) of 1 S. 25:44 we find ליש in 2 S. 3:15 Kt., and Ἰσ² diverges in both passages; but ליש, corresponding to the Ar. *Laith*, 'lion,' is probably the right reading. The same meaning belongs to *Asad* ('*Asados*, Miller), a favourite name with all Arabs; cp *Léon, Leo*. Zēēb (זאב, a name said to have been borne by a Midianite prince) is 'wolf'; cp Arabic *Dhī'b*, also *Lúkos, Lupus*. Zibēōn (צבעון), 'male hyæna';³ cp Arabic *Dudā'a, Dubā'a*. Shuāl (שועל), 'fox'; cp Ar. *Thū'al*, Gk. Ἀλώπηξ.

Eglah (עגלה, fem.), 'cow,' cp Ar. *'Ijl* (masc.), *'Ojail*, Palm. עגילו ('*Ἰγίλου*, fem. '*Ἰγίλη*), Sab. עגלם, Gk. *Ilópus, Dámalis*, etc., *Vitulus*.

Zibiah (צביה) fem. (צביא, Zibia, masc. 1 Ch. 8:9), in its Aram. form *Taβithá* (Acts 9:36), 'gazelle.' Cp Phoen. צבא, Ar. *Zabya*, etc., also *Δορκάς, Νεββίς*, etc. Similarly Ēpher (עפר), and the diminutive form Ephrōn (עפרון), seem to mean 'young gazelle'; cp Ar. *Ghazāla Farḡad*, etc. Some animal of a kindred species is denoted by Dishōn (רשן, רישון), Dishān (רשן). In like manner Lēah (להא, fem.) perhaps means a kind of gazelle, corresponding to *La'y, Luwaiy* in Arabic; Ārōn (ארון), Ārān (ארן, according to the Syr. *Arnā*), is 'mountain-goat,' like jāēl (יעי, fem.), of which Jaala (יעלא), Jaalah (יעלה), may be the Aram. form (see above, § 53); cp Arabic *Wā'la* (masc. form *Uwā'lu*). The Arabic *Badan* and *Arwā* (fem.) have the same meaning.

Immēr (אמר), 'male sheep,' corresponds to the Arabic *Hamal*; and Rachel (רהל), 'ewe,' to the Arabic *Ruḡaila* (diminutive form).

Hāmōr (המור), 'ass' = Arabic *Himār*, Lat. *Asellus*. Hēzīr (חזיר), 'boar' = Arabic *Hūsīr*, and still at the present day *Hansīr*.⁴ The name חזיר, which may seem strangely inappropriate in the case of the Jews, is confirmed by an inscription of this very family; the pronunciation Hēzīr, which is also that of Ἰσ², has been adopted in order to distinguish the name from Hāzīr. By the 'boar' is here meant the wild boar, as a type of combativeness. The names *Kápros, Aper* were similarly used; the corresponding term *Varāz* appears frequently as a proper name among the aristocracy of the Sasanian Empire.

Shaphan (שפן), the name of an animal similar to the marmot (hyrax)—cp the synonymous Arabic names, *Wabr, Ubair*.

Achbōr (עכבור), 'mouse'—cp עכבר, an Israelite *intaglio* and several times in Phoenician inscriptions,

1 But see also HULDAH, HELED, HELDAJ.
2 See ARGOB, 2.
3 The many animal names among the inhabitants of Seir (Gen. 36) have been noticed by WRS (*Kin.* 218). In some points, it must be admitted, he has gone too far, and his explanation of the facts does not appear satisfactory to the writer of the present article.
4 See Jones in the *Record of the Bombay Government*, 48 60.

Arabic *'Akbar* and the synonymous *Fa'r*, etc., also *Mūs. Mus.*

Aiah (איה), 'hawk,' or some such bird of prey, corresponds to the Arabic *Hida'*, *Ḳash'am*, Gk. *Ἰέραξ*.

Or'eb (ערב), a name ascribed to a Midianite prince, 'raven' = Arabic *Ghurāb*, Gk. *Κόραξ*, Lat. *Corvus*.

Jonah (יונה), 'dove,' is a man's name, like the corresponding Arabic names *Hamām*, *Ḥamāma*. The Arabic *Fāhila*, Gk. *Περυστέρα*, *Τρυγών*, *Φάτιον*, are names of women.

Hoghlah (חגלה), partridge'—the word may have the same meaning when it is the name of a place, shortened from בית חגלה.

Zippōr (צפר, צפור, fem. Zippōrah, צפורה, 'small bird' = Palm. *צפרא* (*Σεφφρα*), Arabic, *'Usfūr*, Gk. *Πίπτος*, *Στρούθος*.

Nahash (נחש), 'serpent,' with its diminutive *Nahshōn* (נחשן), corresponds to the Arabic *Haiya*, *Ḥanash*, *Afā*, etc., Gk. *Δράκων*. *Nēhushta* (נחושתא, fem.) is doubtful. *Saraph* (שרף) also denotes some kind of serpent.

Nūn (נון, Nōn, נון), 'fish.' So ancient a name may perhaps be connected with the worship of fish-deities which is known to have prevailed in those countries; to this Exod. 204 refers, 'or that is in the water under the earth.'

Hagab (חגב), and, in its Aram. form, *Hāgaba* (חגבה), *Hāgābah* (חגבה) (cp *AGABA*, *AGABUS*), 'grasshopper,' corresponds to the Arabic *Jarād*, *Jandūb*, Gk. *Ἀκροδίνου*. *Gazzām* (גזז) is probably another form of *gāzām*, which has the same meaning (e.g., Joell 14).

Dēbōrah (דבורה, רבורה, better it would seem, *Dibbōrah*, רבורה, according to *Ḳ's* form *Δεββώρα*), 'bee,'—cp *Μέλισσος*, fem. *Μέλισσα*.

Parosh (פרעש), 'flea,'—cp *Ψύλλος*, *Ψύλλα*, and the African priest, L. Cæcil. Saturninus *Pulex* (*Ephem. epigr.* 5656).

Gaal (געלי) is explained by Wellhausen (*IJG* 26, 2nd ed. 44) as equivalent to the Arabic *Ju'al*, 'dung beetle'; but this is uncertain, although Josephus seems to have the form *Γυάλης*. Cp *Κάνθαρος*, fem. *Κανθάρια*, *Σήραμβος*.

Tola (חולע), 'worm,'—the Arabic names, *Du'ād*, *Dūdān*, perhaps have the same meaning.

Names borrowed from plants are much rarer. *Tāmār* (תמר, fem.), 'date-palm,' seems to have no equivalent among Arabic proper names;

69. Plant names. since names of this class are many in Arabic, it must appear strange that the queen of trees is unrepresented. *Allōn* (אלון), 'oak' or 'terebinth,' i Ch. 437, is perhaps properly the name of a place, like *Elōn* (אילון, אילון), *Tappūāh* (תפוח, see § 10), and *Eshcōl* (אשכול, Gen. 141324), the representative of the *valley of grape-clusters*; Wellhausen is probably right in identifying *Anub* (ענוב, i Ch. 48), with the place called *Ānāb* (ענב) in *Josh.* 1121 1550 (*De gent.* 34 f.). *Lēbānā* (לבנא), *Lēbānah* (לבנה), is perhaps 'poplar,' properly 'the white tree,' like the Aram. *Ḳurā*; elsewhere the poplar is called *libneh* (לבנה).

Rimmōn (רמון), 'pomegranate,'—cp *Pōios*, fem. *Pōiō*. *Zēthān* (זיתן), *Zēthām* (זמת), may signify 'olive,'—from a similar form is borrowed the Arabic word *Zaitūn*. *Hādassāh* (הדרסה), 'myrtle'; cp *Μύρτη*, *Μύρτιον*, *Μυρίνη*.

Σωσάννα, *Σουσάννα* (*Susanna*), in the apocryphal addition to Daniel and in the NT is שושנה or שושן; 'lily'; this name appears as *Σωσάννη*, in the old Semitic myth from *Ctesias*, *Diod. Sic.* 26; cp *Λείριον* (fem.).

Kōz (קוז), b'ne *Hakkōz* (בני הקוז), 'briar'; many Arabic proper names are borrowed from thorny plants, which symbolise men formidable to their enemies; cp *'Akanthos*.

It is not certain whether there are any Hebrew names denoting a trade or profession; in Arabic we find only a few such—e.g., *Hārith*, 'ploughman'; *Najjār*, 'carpenter.' *Carmī* (כרמי) probably does not mean 'vine-

dresser,' but is to be taken as an adjective designating race (cp *CARMĪ*). בן-החרקים (AV 'son of [one of] the apothecaries'), Nch. 38, is one names.

whose parents or ancestors were *aromatarii*; accordingly we should read, in the same verse, בן-החרקים, 'son of the goldsmiths.'

Such appellations are not rare in Syriac. The בני הלחש ('sons of the *lōhēsh*'; see HALO-HESH), traced their descent from a magician, the בני הספרת ('sons of the *Sophereth*'), from a female scribe (!), whilst the בני פתח מואב ('sons of *Pahath Moab*'), were proud to call themselves after an ancestor who had been governor of *Moab*. A singular nickname is given to the mother of the family known as בני פברת העזים ('the sons of *Pochereth-hazzebāim*'), 'she who fetters the gazelles,' which seems to mean that she was so swift of foot as to overtake these animals.¹

The above designations are of course not to be regarded as real names. *Arah* (ארה) might be the Aramaic word for 'wanderer' (corresponding to the Hebrew *Orēah*). *Heber* and *Hēber* (הבר) appear to be wrongly vocalised; the form *Hōbēr* might be a real name, meaning 'enchanter,' whereas *Hābēr* would be 'associate.'

In Arabic, very many names are derived from objects of various kinds. Such names are suggested sometimes by a resemblance between the person and the object, sometimes by a purely accidental circumstance attending the birth.

The present writer was once informed by *Wetzstein* that among the *Bedouins* a girl might be named *Thalje*, 'snow-flake,' because it happened to be snowing when she was born. It is, of course, impossible in most cases to guess what gave rise to such names.

Among the Hebrew names hitherto unexplained, there may be some which belong to this class, though it does not seem likely that they are very numerous. We may here mention *Hōthām* (חום), 'seal,' like the Gr. *Σφραγίς*; the same meaning probably belongs to *בני מבועה*, sons of *Tabbāōth*, where the plural form, strange as it appears, is attested also by *Ḳ*. *Pūrah* [RV] (פורה), if correctly vocalised, is 'wine-press.' *Bakbūk* (בקבוק), 'pitcher' (cp the Aram. name *Χουζῆ* [s], *Chuzā*, i.e., 'pitcher,' Lk. 83). *Rebecca*, *Ribhkah*, *'Peβekka*, 'cord,' especially such as was used for tying sheep (that her daughter-in-law is called *Rachel* (רחל), 'ewe,' may be an accidental coincidence). *Rizpah* (רעפה), 'pavement,' *Achsaḥ* (עכסה), 'anklet' (for women). This last belongs to a special category, namely, that of names borrowed from articles of luxury, of which the following also are examples:—*Pēninnāh* (פננה), probably the singular of *פנינים*, 'corals,'² *Shoham* (שחם), some precious stone (perhaps the onyx). *Keziāh* [RV] (קעיעה), 'cassia,' and *Keren-happuch* (קרן הפוך), 'box of face paint.' The last two are ornamental titles bestowed by the poet upon the daughters of *Job*. Perhaps we may include in the same class the somewhat doubtful name *Zēri* (צרי), which may be another form of *šōri* (צרי), 'storax,' and *Zerūiah* (צרייה, fem.), which may mean 'one who is perfumed with storax.' Cp *Mūros*, fem. *Μυρώ*, also *Bāsemāth* [RV] (ביסמת).

The time of birth may have suggested the names *Nogah* (נוגה) and *Moza* (מוצה), 'sunrise'; but it is also possible to explain them as metaphors. An analogous case is *Shahāraim* (שחרים), 'dawn,' if the form be correct. A similar assumption being made, *Hōdesh* (חודש, fem. i Ch. 86) signifies 'born at the feast of the new moon'; cp Phœnician *בחדש* which is rendered by *Νουμήμιος*. *Shabbēthai* (שבת), *Σαββαταίος* in the *Letter of Aristaeus* is clearly 'one born on the Sabbath' like *Βασσαββῆς* in the NT (see above, § 48). *Haggi* (חגי), *Haggai* (חגי), fem. *Haggith* (חגייה),³

¹ In old Arabic poetry a horse used for hunting is styled *Kaid al-'awābid*, 'fetter of the flying animals.'

² See *RUBY*.

³ *Haggiāh* (חגייה), the name of a man, i Ch. 615[30] can hardly be correct; the only possible rendering would be 'my feast is *Yahwē*.'

probably mean 'born on the feast day.' Perhaps Mōadiab (מוֹעֲדִיָּה, see § 32) may have the same sense. Names of this kind, usually compounded with *ben* (בן) or *bar* (בר) as the case may be, are employed by other Semites, in particular by the Syrians.

An idea of direction is expressed in the names Jāmin (יָמִין), Ben-jāmin (בְּנֵי־יָמִין), Mōm-ōmōm (מוֹמ-וּמוֹמ) or Mijāmin (מִיָּמִין), and Zephōn (צֶפּוֹן), and Zephōn (צֶפּוֹן) Ziphion.

73. Direction. Both בני־יָמִין and צֶפּוֹן (a son of Gad) seem to be properly names of districts, 'southern' and 'northern.'

We may here add the strange names Jāḏōbah (עֵקֶבָה), 'towards Jacob,' and Chenaānah (כְּנַעְנָה), 'towards Canaan.' Moreover in 1 Ch. 25:14 Jēsharēlah [so EV] (יֶשְׁרָאֵלָה, for which *z.* has Ašharelāh, אֲשֶׁר־לָהּ) may naturally be taken to mean 'towards Israel.'

The Arabs use also many abstract nouns as proper names. To account for such names is sometimes even

74. Abstract. harder than to account for those which are borrowed from material objects. A few examples of this class have already been mentioned incidentally (cp Gr. *Ἰσότης*, *Ἀβροσύνη*, *Σωφροσύνη*, etc.). We may cite here, מָנוּחַ, Manoah, 'rest,' (unless it comes from the root מָנַח 'to present a gift,' and therefore belongs to the category in § 57); Mērab (מֵרַב) probably 'increase'; Malhōn (מַלְחֹן) and Chlōn (חִלּוֹן), 'sickness' and 'wasting' (two persons who are introduced into the narrative for the purpose of explaining how two young women came to be widows); Nābōth (נָבוֹת, masc.), perhaps 'height'; Tikvah (תִּקְוָה, masc.), 'hope'; Rinnāh (רִנָּה, masc.), 'shouting'; Sācār (שָׂעָר), 'reward' (from God); Tēhinnah (תְּהִינָה, masc.), 'request' or 'favour'; Hezion (חִזְיוֹן, an Aramæan), 'vision'; Michāl (מִיכָל, fem.), perhaps 'power'; Harhūr (חַרְחֹר), 'fever.' That Mirmah [RV] (מִרְמָה), 'deceit,' should be the right form seems very improbable. Τωβ[ε]θ, Τωβ[ε]θ, Tobit (masc.), 'goodness,' appears in post-biblical Jewish writings as טובות, טובות. Māhōl (מַחֹל) might be 'dance,' were it not that Mahlah (מַחֲלָה, masc. and fem.), Mahlāth (מַחֲלָה, fem.) and Mahli (מַחֲלֵי, the name of a family of Levites) point to some other derivation than that from חָלַי; the uncertainty of the vocalisation here renders it impossible to draw any conclusions. Amongst the names ending in *ūth* (אֹת) there may be some abstract nouns which perhaps should be pronounced with *ūth* (אֹת); but nearly all of

75. Final m. these are very doubtful, and in some cases even the form varies. Thus the man who is called Mēshillēmōth (מֵשִׁלְמֹת) in Neh. 11:13 2 Ch. 28:12, is called Mēshillēmīth (מֵשִׁלְמִית) in 1 Ch. 9:12; in this last passage (as in 2 Ch.) מֵ has -ōth [BAL], whereas in Neh. 11:13 one reading [N^c.amg.int.] is -ōth.¹ In like fashion the same man appears as Shēlōmoth (שִׁלְמֹת) and Shēlōmīth (שִׁלְמִית), the former being used as a name elsewhere. To settle the precise meaning is hardly possible. Nor can we explain Mērēmōth (מֵרַמֹּת, masc.); though it is once spelt מֵרַמַּת it may perhaps be compounded with מָת, 'death.' The same word is possibly contained in Jērīmoth (יֵרִימֹת), Jērēmōth (יֵרֵמֹת), and doubtless in Azmaveth (עֲזַמְבֹּת, § 63). Lappidoth [RV] (לִפְדֹת, masc.), 'torches,' is no less suspicious in appearance than Mikloth (מִקְלוֹת, מקלות, Make[λ]ṡṡṡ), 'rods.' On the other hand, Jērīōth (יֵרִיעֹת), 'tents' (1 Ch. 2:18), may be originally the name of a place. Nēbāiōth (נְבִיאֹת), 'heights' (?), the name of a people, seems to be a real plural, like the names of modern Arabian tribes in -āt.

The plural forms Huppim (חֻפִּים, חופים, Gen. 46:21; 1 Ch. 7:15) and Shuppim (שֻׁפִּים, שופים, 1 Ch. 7:12 15 26:16, for which Gen. 46:21 has Muppim, מֻפִּים) are proved incorrect by the adjectives Hūphāmite (חֻפִּיָּתִי) and Shūphānite (שֻׁפִּיָּתִי). The form Shēphūphām [RV] (שִׁפְפֻּחָם, Samaritan) is found in Nu. 26:39, and Shēphūphān (שִׁפְפֻּחָן) in 1 Ch. 8:5. Both form and meaning are here quite uncertain. The same may be said of Shāphām (שָׁפָם,

the name of a man), Shēphām (שִׁפָּם) and Siphmōth [EV] (שִׁפְמוֹת, names of places), and also of the adjective Shiphmite (שִׁפְמִי). Whether the dual Diblaim (דִּבְלַיִם), as the name of a man, be correct, it is impossible to say, since the meaning of the word is unknown.

Adjectives in -ī (*gentilicia*) appear to have been very rarely used as names in the strict sense. Thus we find

76. Final ī. Jehūdi (יְהוּדִי, Jer. 36:14 21 23); thé man in question is thereby designated as a real Judæan, perhaps in consequence of the fact that his great-grandfather, to judge by his name Cushi (כּוּשִׁי), was a native of Æthiopia. Similarly we find a Bœotian named Βιωτός, a Molossian named Μολοσσός, a Thessalian named Περθαλός (*i.e.*, *Περθαλός*); see Fick, 340. A Judith [EV] (יְהוּדִיתָ) appears even in Gen. 26:34, and in the well-known romance the heroine bears the name 'Ιουδεύθ, as being the ideal of religious and political virtue. The Cushi who was a member of the royal family, according to Zeph. 11, very possibly had a mother belonging to some black race. The man called תְּבִישִׁי (the Cushite) in 2 S. 18 and עֶבֶר מֶלֶךְ הַתְּבִישִׁי (Ebed-melech the Cushite; EV Ethiopian), who is mentioned several times by Jeremiah, were no doubt of African extraction; cp תְּבִישִׁי in the Phœnician inscription of Elephantine, which is contemporaneous with Jeremiah. We also find Bēēri (בְּעָרִי, or בְּרִי, Bēri, 1 Ch. 7:36), 'belonging to the well,' or 'belonging to the place called Beer,' and Gēhāzī (גְּהָזִי, גְּהָזִי or גְּהָזִי), which has the appearance of being derived from the name of some place compounded with גִּי or גַּי (Gē, valley); we are reminded of the mysterious phrase גִּי חִזְיוֹן (Ge-hizzāiōn, 'valley of vision') in Is. 22:5. On the many names ending in ī in the genealogies, see above, § 52—these are used simply as adjectives. So far as the form is concerned we must include in the same class names like Omri (עֲמֹרִי), Barzillai (בַּרזִילַי), 'made of iron' (cp the Punic *Birzillis*, genitive case, *Ephem. epigr.* 540) and Shimshai (שִׁמְשַׁי), 'solaris,' the name of a non-Israelite; in later times Shimshai appears among the Syrians as Σαμσαίος, Σαμσός, and the brother of Simeon Stylites was called שִׁמְשַׁי. Though the grammatical form of these three names offers no difficulty, their origin and meaning are quite obscure.¹ שִׁמְשַׁי might also be regarded as an abbreviation of some name like Σαμψιγέραμος, which was not rare among the Aramæans.

A considerable number of names end in -ān (אַן) or -ān (אֵן), for which, in some cases, the archaic termination -ān (אַן) or -ān (אֵן) is substituted.

77. Final ān, ān, ām, ōm. Whether these terminations are really identical is by no means certain. Sometimes ān appears to be a diminutive termination—*e.g.*, in Ephrōn (עֶפְרָיִן), 'hinnulus'; Eglōn (עֵגְלוֹן), 'vitulus,' Arabic *O'ail*; Nahshōn (נַחֲשׁוֹן), 'small serpent'; Samson (שִׁמְשׁוֹן, *Shimshōn*), 'small sun,' like the Arabic *Šumais* (name of a man); Abdon (עֲבְדוֹן), diminutive form of the abbreviated name Ebed (עֶבֶד), like the Arabic *O'baid*. Other examples of these terminations are—Hemdān (חֲמֵדָן), Gen. 36:26 (so also in אֲדָל [ADL] and Samaritan text), but Hanūān (חֲנַנְיָן) in 1 Ch. 14:1 (אֲדָל follows Gen.) probably 'desirable,' like the Arabic *Hamdān*;² Amrām (עֲמֵרָם), probably 'in good condition'; Chimbān (בִּמְחָן), Chimbām (כְּבֵהָם) and Gideōn (גִּדְעוֹן); see above, § 66. Malcham (מַלְכָּם, 1 Ch. 8:9) is open to suspicion. No definite meaning can be extracted from Simeōn (שִׁמְעוֹן), Gērshōm (גֵּרְשׁוֹם), Gērshōn (גֵּרְשׁוֹן), Onām (אֹנָם), Ōnān (אֹנָן), Hēmām (הֵמָם), Hēmān (הֵמָן), Bilhān (בִּלְהָן), Bilhān (בִּלְהָן), Bilem (בִּלְעָם), Bilem (בִּלְעָם), Bilem (בִּלְעָם), Bilem (בִּלְעָם). As for Irām (עֵרָם) and Ērān (עֵרָן), they are no less difficult to explain than Ir (עֵרָר), Ēr (עֵרָר), Irā (עֵרָרָא), Irī (עֵרִי), Ērī (עֵרִי), Iru (עֵרִי),—forms of which some are doubtless incorrect. In Rēbūben (רֵעֻבֵן, as in יֵרֵבֵן, *Yardūn*,

¹ For other possible explanations see OMRI, BARZILLAI, SHIMSHAI.
² See also HEMDAN.

* BA*A omit; L has -ōth.

which is found also in an ancient Aramaic document, *CIS*, 239, and corresponds to the Babylonian *Belshun*), Nēkōda (נְכוּדָא, the Babylonian *Nīkūdu*, a kind of bird), see Friedr. Del. *ProL*. 212, where the name Barkōs (בַּרְכוֹס) is also explained as Babylonian.¹ On Sanballat (סַנְבַּלַּט), see Schrader, *KAT* (2), 382. Mordēcai (מֹרְדֵכַי), *Μαρδοχάϊος* is at least derived from the name of the Babylonian god Marduk.

In Meshēzabēl (מֶשֶׁזַבֵּל, § 29) the first part is doubtless of Babylonian origin; but since the verb שִׁבַּח had already passed into the Aramaic language, the name must be regarded as *Aramaic*. It is certain that at that time Aramaic was largely used in Babylonia. Hence it is that several families of Jewish exiles mentioned in *Ezra* 2 = *Neh.* 7 = *1 Esd.* 5 bear Aramaic names—*e.g.*, b'ne Hātīpha (בְּנֵי חַטִּיפָא), b'ne Hātīta (בְּנֵי חַטִּיטָא) ('pointed'?), b'ne Pērida (בְּנֵי פִרְיָדָא) or b'ne Pērūda (בְּנֵי פִרְיָדָא, 'separated'?), etc. So also we find Aziza (אִיזִיָא) 'strong' (*Palm.* עִיזִי, and, in its Arabic form עִיז), Zēbīna (זִבְיָנָא) 'bought' (used in later times both by Jews and Aramæans), cp *Palm.* אֱלֹהֵינוּ 'God has bought'; the name must therefore be included among those mentioned in § 56. We may observe here how ready the Jews were, even at that period, to conform to foreign custom in the matter of names, as in other *externals*, while rigidly preserving their national character.

No *Persian* names are borne by Jews in the OT; even Esther (אֶסְתֵּר) is scarcely of Persian origin. See ESTHER.

In the time of *Ezra* some ancient names reappear—*e.g.*, Shimeōn (שִׁמְעוֹן), *Ezra* 10:31. The great popularity of this name (in Greek, *Συμμεών*, *Σίμων*, the latter being also a genuine Greek name) is probably due to Simeon the

84. Old names revived. High Priest, of whom Jesus bar Sira speaks with such admiration, and to Simeon the brother of Judas the Maccabee, who was himself a great-grandson of another Simeon. Joseph (יוֹסֵף) is found in *Ezra* 10:42, *Neh.* 12:14, and afterwards appears very frequently, sometimes in its full form, sometimes shortened into Jōsē (יוֹסֵף), in the NT *Josēs*, *Ἰωσήφ*. Joshūa (יְהוֹשֻׁעַ), the name of the successor of Moses, occurs again in *1 S.* 6:14, 18 and *2 K.* 23:8; the same name, mostly written Jēshūa (יֵשׁוּעַ) according to the later pronunciation, was borne by the high priest in the days of Darius I. About 340 B.C. it reappears in the family of the High Priests, and occasionally in the period following. At the time of Christ, and even later, it was extremely common (Greek form, *Ἰησοῦς*, Jesus). The name Jōnāthān (יְהוֹנָתָן) had never dropped out of use. Of repetition of the name Judah (יְהוּדָה) the earliest instances are Judas the Maccabee and one of his contemporaries (*1 Macc.* 11:70); in subsequent ages it was very popular, as is shown by the NT. Jacob (יַעֲקֹב) seems to have come into use very late; the list in the *Letter of Aristeas* contains one *Ἰάκωβος*, and the NT mentions three (EV James). Of ancient names, moreover, the following were particularly common at that period—Hānaniah (חַנְיָנָא), Jōhānān (יְהוֹנָן), *Ἰωάννης* (EV John), and, as a feminine name *Ἰωάννα*, Joanna, (*Lk.* 8:24), Eleāzār (אֱלֵעָזָר), *Ἀλέξαρ* (Lazarus), Azariah (עֲזַרְיָה), Mattithiah (מַתְּתַיָּה), *Ματθίας* (Matthias). We also find in a considerable number of cases Menahēm (מְנַחֵם), Hezekiah (חֲזַקְיָהוּ), Jeremiah (יֵרֵמְיָהוּ). On the other hand, as has long ago been remarked, the Jews continue for many ages after the Christian era to avoid the sacred names Abraham and Moses, likewise Aaron and David. The *Letter of Aristeas*, it is true, mentions an *Ἀβραμ* (Abram), and in *Tobit* *Σάρρα* (Sara) plays an important part. The name of Moses' sister probably owed its popularity to Mariamme, the last of the Hasmonæans; in the NT we meet with several women called *Μαριάμ* or *Μαρία* (Mary).

Since *Ezra*'s time very few Hebrew names have been

¹ See, however, BARKOS.

coined. The following may be mentioned—**יהושע*, known to us only in the shortened forms **85. New names.** *Ἰουίας*, Onias (חֲזַנְיָהוּ). Talmudic חֲזַנְיָהוּ (which latter represents the Babylonian pronunciation); *Ἀβουβος*, Abubus 'beloved' (חֲבוּב), *Ἰλιῶδ*, *1 Macc.* 16:11; *Φασήγλος*, *Phāsēglos*; *Μαργάλαθος* 'pearls' (מַרְגָּלִיתִים), *Jos. Ant.* xvii. 62; *Σωσάννα*, *Σουσάννα*, 'lily' (שׁוֹשַׁן or שׁוֹשַׁנָּה). At the same time some Aramaic names became current—*e.g.*, *Ἀλιῆ*, *Alīa* (see above, § 55), *Νερεῖπας* (נִרְעִיָא) 'preserved (by God),' *Jos. BJ* iii. 721; but such names are fewer than we might have expected.

Soon after Alexander the Jews began to adopt Greek names; this process doubtless originated in the upper classes. A high priest called himself

86. Greek. *Ἰάσων*, Jason, attempting to imitate his real name *Ἰησοῦς*, *Jeshua* (יֵשׁוּעַ), just as a certain *Ἰάκιμος* (יָקִים, *Jākim*) called himself *Ἀλκιμος*, *Alcimus*, and *Σίλας*, *Silas* (אֶשְׁאִילָא) in the NT was transformed into *Σιλουανός*, *Silvanus*. From that time Jason became a common name among the Jews. The brother of the above-mentioned Jason, *Ἰουίας*, Onias (חֲזַנְיָהוּ), bestowed upon himself the name of *Μελέαος*, *Menelaus*. The author of the *Letter of Aristeas* includes several Greek names in his list of those who translated the Pentateuch in the third century B.C., a list which, it is true, he composed from his own imagination. The national reaction of the Maccabæan period did not put a stop to this tendency. A nephew of Judas was named *Ἰουῦν* *Ἰουῦν*, *Johanan Hyrcanus*; his sons were *Ἰουῦν* (shortened into *Ἰούβ*) *Ἀλέξανδρος*, *Jannai Alexander*, *Ἰουῦν* *Ἀριστοβούλος*, *Judah Aristobulus*, and *Ἀντίγονος*, *Antigonus*. The NT also contains double names of this kind—*e.g.*, *Σαῦλος* (אֶשְׁאִיל), *Shaül* *Παῦλος*, *Saul Paul*; *Ἰωάννης* (יְהוֹנָן) *Μάρκος*, *John Mark*; *Συμμεών* (שִׁמְעוֹן) *ὁ καλούμενος Νίγερ*, *Simon called Niger* (*Acts* 13:1).¹ Even in Palestine, however, many Jews of the time of Christ bore only Greek names. Of the apostles, who were Galilæans in an inferior social position, one was called *Φίλιππος*, *Philip*, and another *Ἀνδρέας*, *Andrew*. Among the Jews of the more western regions, Greek names seem at that period to have had a decided preponderance. Nor was any offence caused by names connected with the worship of heathen deities, since no one thought of the meaning. It is true that in the Book of Daniel *Ἀβεδ-νέβ* (*עֲבֵר נְבוּ*), of which the sense was only too obvious, has been changed into *Ἀβεδ-νέβ* (*עֲבֵר נְבוּ*); but just as *Ἀσῆϋρ* (אֶשְׁחַר) and *Mordēcai* (מֹרְדֵכַי) were regarded as unobjectionable, we read of strict Jews calling themselves *Ἀπολλώνιος*, *Apollonius*, and *Διόδωρος*, *Diodorus* (names borne by the envoys of the Maccabæan prince in *Jos. Ant.* xiii. 92), whilst the associate of the apostle Paul was named *Ἀπολλῶς*, *Apollo*. Similarly at a later period, the father of a certain Rabbi Jose bore the distinctively Christian name *Πέτρος*, *Petrus*, *Peter*. Some names which the Jews borrowed from the Greeks are ultimately of Latin origin; a particular favourite was *Ἰούστος*, *Iustus*, *Iustus* or *יוֹסְטִי* (which is the form of the vocative).

In the NT² and elsewhere we find many Greek abbreviations used by Jews—*e.g.*, *Ἀλεξᾶς*, *Alexas* (אֶלְעָאס); *Λουκάς*, *Lucas*; *Ἀρτεμάς*, *Artemas*; *Κλεοπάς*, *Cleopas*; *Κλωπᾶς*, *Clopas*; *Θεοδᾶς*, *Theudas*, which last is a genuine Greek abbreviation of *Θεόδωρος*, *Theodorus*, or *Θεοδόσιος*, *Theodosius*, whereas *Θαδδαῖος*, *Thaddæus*, *Thaddeus*, is formed after the Hebrew fashion. Soon after the apostolic age, if not earlier, some Jews adopted the practice of spelling their Hebrew names according to the Greek pronunciation—*e.g.*, *Σίμων*, *Simon*, *Σίμων*, or *Σιμῆν*, *Simeon*, *Συμμεών*, *for שמעון*, *Shim'ōn*; *Ἰσακ*, *Isak*, *for יצחק*, *Yishāq*; *Ἰούδα*, *Juda* (vocative) or *Ἰουδαν* (accusative), *for יהודה*, *Yehūda*; cp the name *לֵוִי*, *Levites*, *Λεβίτης*, *for לֵוִי*, *Hallēvi*. The fusion of Greek

¹ On double names—the one indigenous, the other Greek—of Jews and other Orientals, cp R. Herzog in *Philologus*, 56:37 ff.

² See Winer, *Gram.* (8), § 16, 9.

NAMES

and Jewish culture, a process of such vast importance in the history of the world, is here, as it were, symbolically represented. The creative power whereby a nation is enabled to coin new names had at that period long been extinct among the Jews, even as it has become extinct among the Christian peoples of the present day.

I. N.

B. PLACE-NAMES

In the following sections dealing with place-names, as in the rest of the article, the aim is (1) to give the right points of view for the study of the names, (2) to show how they may be classified, with examples, (3) to discuss in an introductory way some of the many difficult questions which arise out of the subject, and (4) incidentally to throw some light on certain names and so to supplement the special articles.

The names of places recorded in the OT are, regarded as a whole, different in character from the personal

names. Two differences in particular are worthy of notice. (1) A very much smaller proportion of place-names consists of compounds forming a sentence (sentence-names); for whilst the great majority of compound personal names are sentences (*e.g.*, Elnathan), the great majority of compound geographical names are combinations of two (or more) nouns in a genitival relation (*e.g.*, Bethel). (2) Whilst in the case of personal compounds with a divine name, the number of those containing the *proper* name of the deity is larger than that of those making use of one of the *common* divine terms (such as *el*, *ba'al*); in geographical compounds, on the other hand, the proper name of a deity is very rare, and a common term, such as *el*, *ba'al*, frequent.

Both these differences may be due to the great antiquity of the place-names; for there are indications that sentence-names were not the earliest type even of personal names among the Hebrews (cp *HPN* 246 ff.), and an early preference for the common rather than the proper name of deity is also a probable inference from the history of personal names. It would be hazardous, however, to make the assumption that place-names were generally derived from personal, or the reverse, the basis of an examination of either group. The two groups require in the first instance independent analysis and examination, and only in the light of this can the determination of the relation between them be profitably attempted.

The rarity of sentence-names among the names of places is one cause of the greater obscurity in which

geographical names are involved; for the combination of two terms into a sentence limits the range of ambiguity of either more than their union as construct and genitive. Another cause is the greater antiquity and non-Hebrew origin of at least many of the place-names; we have to interpret them with but little or none of the literature of the people who framed them to help us. Yet another cause is the uncertainty attaching to the period in which they originated; we can seldom fix more than a *terminus ad quem*, the *terminus a quo* being absolutely undefined. The textual tradition of place-names is frequently very dubious.

A very large number of place-names at present defy any reasonable interpretation. In other cases difficulty arises from the ambiguity of the form; and not unfrequently from the uncertainty of the Massoretic reading. As an example of both causes of obscurity we may take Migron. This name may come either (1) from the root *mgr* with the substantival suffix *an*, or (2) from *gry* with substantival prefix *m* and suffix *an*, or (3) from *grn* with prefix *m*. As to No. 1, it is true that the origin from the root *mgr* is the barest possibility. It is unlikely that a root so Aramaic in character should have entered into the name of a Mid-Canaanite town already existing in the time of Isaiah (1028). We may also

NAMES

dismiss No. 2 (root *gry*) on the ground of the lateness of the noun formation (Barth, *NB*, § 204), and, adopting No. 3 (root *grn*), interpret the name as 'threshing-floor' (see We. on Is. 142). Next, as to the reading. This, though retained by critics, cannot be held to be quite certain. In the only two places where this name is found, *ḡ* in Is. and *ḡ^L* in 1 S. reads Megiddo, which has suggested a new emendation of the text in 1 S. 142 (see MIGRON). Here then we have a typical instance of the uncertainty of geographical names. For another such instance take Madon (*ḡ^{BF}* Marron)—of which possible roots are *dun*, *mdw*, *mrw*.

In dealing with the present subject it is most important to bear in mind this great ambiguity or uncertainty of most individual names. It is as a rule only when the instances are many that we can be certain that a particular class of meanings was actually expressed by place-names. There can, for example, be no question that many place-names are identical with animal names. Many of the individual instances even in this case are uncertain; but the coincidences are too many to admit of the reality—and, indeed, of the considerable extent—of the class being doubted.

Still further uncertainty is connected with this and many other classes when we proceed from determining the meaning to inquire into the cause and origin of the name. For instance: are these animal names due to totemistic beliefs, or were they given because the animals referred to abounded in the neighbourhood of the several places, or because in some prominent feature the place resembled the animal in question?

It is impossible within the limits of the present article to discuss the various theories or to examine in any way exhaustively the various possible meanings of the whole of the biblical place-names. All that we can attempt to do is to arrange the names in classes and according to meanings that are tolerably well established. Moreover, we shall, generally speaking, exclude the names of Egyptian, Assyrian, and other towns remote from Palestine, confining ourselves to the names in the land of Israel and the immediately surrounding countries.

Before we proceed to the classification, however, certain points that have already been briefly referred to

call for discussion, and, especially, the history of names of Palestinian places. It is difficult to say how many of these were given by the Israelites. In a considerable number of cases we know definitely that they were not. In other words, many of the names of places in the land of Israel are pre-Israelitish. As to these there are two main sources of information—the Amarna tablets (*circa* 1400 B.C.) and the lists of Thotmes III. (not later than 15th cent.), Seti I. and Rameses II. (predecessors of Mernephtah in whose reign the Exodus is usually placed), Pap. Anastasi I. (*temp.* Rameses II.); for references and details compare Winckler's edition of the Amarna tablets with index (*KB* 5), and for the Egyptian lists W. M. Müller (*As. u. Eur.*, especially 154, 157-164, 181). Cp PALESTINE, § 15.

Among names (of subsequently Israelitish towns) occurring in the list of Thotmes, and therefore at least as ancient as the fifteenth century B.C., are Abel, Accho, Achshaph, Ain, Aphek (?), Asththeroth-karnaim, Edrei, Gath, Gaza, Hadid, Helkath, Ijon (?), Joppa, Kanah, Makkedah, Migdal, Mishal, Rehob, Sharuh, Socoh, Zephath; and among names mentioned in the lists of Seti I. and Rameses II. are Beth-anath, Luz and Secu, and perhaps also Jabneh and Heres. In the Amarna tablets (14th cent. B.C.) we meet with Aijalon, Gath-rimmon (?), Hannathon, Hazor, Jerusalem, Kanah, Lachish, Megiddo, Seir (?), Zorah.

The significance of these sources for our present purpose, however, is not fully represented by the actual identifications. Several of the names are typical instances of considerable classes—Ain (cp also Hi-ni-a-na-bi = אֵין נַי, Amarna 237 26) and Abel of the numerous com-

pounds with these terms; Aijalon and Zorah of animal names; Jabneh of names which consist of a third sing. impf. Further, other names in these sources, though not identical with biblical names, are instances of other large groups of the latter; Bit-ninib (Amarna), Ba-l-t-y-ā (Thotmes list) of compounds with Beth; and Joseph-el (see JOSEPH i., § 1) and Jakob-el (see JACOB, § 1, and cp WMM *As. u. Eur.* 162 ff.) of compounds of an impf. and *el*. In brief, the biblical place-names have so many and such close resemblances to those early names that it is difficult, if not impossible, in the absence of direct information to distinguish names given to places by the Israelites from the names which they took over from the former inhabitants.

With regard to a few names, it is true, the biblical writings contain statements or suggestions that certain names were first given by the Israelites. Thus it has generally been inferred (*e.g.*, by Di.) from Judg. 19:10 = Ch. 11:4 ff. Josh. 15:8 18:16 28 that Jebus was the Canaanite name of the city which was subsequently called by the Hebrews Jerusalem, and this was probably intended by the Hebrew writers; but the occurrence of the name Jerusalem in the Amarna tablets now shows us that this was not the case.

The words 'their names being changed' in Nu. 32:38 may be, as Dillmann suggests, a gloss directing that the two preceding names Nelo and Baal-maon are to be so read as to conceal their heathen origin; in any case the clause can hardly mean that these two names are of Israelitish origin. To the name Baal-perazim an Israelitish origin is attributed in 2 S. 5:20, but perhaps erroneously (see BAAL-PERAZIM, and cp *HPN* 133). See, further, BETHEL, SAMARIA. Joktheel was the name given to Seia by Amaziab (2 K. 14:7); but whether the name itself, which is borne by a Jewish town (Josh. 15:39), be pre-Israelitish or not, we cannot say.

In any case, the number of names directly stated or implied in the OT to have been of Israelitish origin is small. In one or two cases the character of the name itself clearly indicates such an origin; perhaps the clearest instance is Baal Judah (*HPN* 133; see also for a suggestion relative to Laish, *ib.* 102, n. 5).

Most of the pre-Israelitish names cited above are clearly Semitic; but it is not improbable that some of the biblical place-names are not merely pre-Israelitish but non-Semitic. Such a name as Ziklag, for instance, is difficult to explain from the known Semitic vocabulary. Cp ZIKLAG.

Names of Greek or Latin origin (in some cases substitutes for old names, in others names of entirely new towns) are easily distinguishable. The ancient name Bethshean is already displaced by *Σκυθῶν πόλις* in Judith 3:10 (cp Judg. 1:27, G); and the NT refers to several places with such names—*e.g.*, Ptolemais, Caesarea, Antipatris; see further, Schürer *GVV*² 250-131.

Modern Palestinian names are Arabised forms of the ancient names or fresh Arabic formations (cp *Survey of Western Palestine*—Special Papers, 254-258, and the Name Lists).

To sum up, then. Apart from the Greek and Latin names which are confined to the Apocrypha and the NT, and are immediately distinguishable, the great majority of biblical place-names are of Semitic origin; of the Palestinian names many are certainly pre-Israelitish, a few may be non-Semitic, a few are certainly Israelitish; but with regard to the great majority we are left in doubt whether they were given by the Israelites or their Semitic predecessors.

Hence from place-names we can infer Israelitish belief and practice only with great caution and under strict limitation. The precise origin of a name is of course of less interest when it refers to unchanging physical features of a place; but it is of considerable importance when it refers to belief, practice, or social characteristics which are subject to change. In these cases it is seldom safe to infer more than is justified by the consideration that, even when not given by the Israelites, these names were intelligible to them.

91. Conclusion.

The interpretation of the names is to some extent controlled and in some cases facilitated by certain more or less general characteristics. Many names (below, *a, b, c*) are abbreviations of compound names (יבנאל = יבנה = יבנאל) or compound terms (בית עשן = עשן); others (§ 93) are expansions of simpler terms, *e.g.*, בעל מעון = מעון. (For another question relating to the form of certain place-names see § 107).

(a) *Abbreviation by omission of defining member.*¹—One of the commonest forms of abbreviation is the omission of the article, or the genitive, which originally defined an appellative used as a proper name. In some cases we still find both the full and the abbreviated form of the same name in the OT; but it must be remembered that where the definition is by means of the article the EV never retains the distinction. Thus Gibeah (hill) is the name of at least three different places mentioned in the OT; one of these appears under those different forms—גבעת שמואל (the hill), גבעת בנימין (the hill of Benjamin), גבעת (hill); the other two are each mentioned but once; in the one case we find the simple, undefined form גבעת (hill), in the other the compound expression גבעת פינהס (the hill of Phinehas). Compare further, Kirjath and Kirjath-jearim, Bamoth and Bamoth-baal. We have no doubt to explain certain place-names of very general significance as the result of this process of abbreviation—*e.g.*, Adamah (=land [of . . .]), which was perhaps also the original form of the names now appearing as Adam, Admah, and Adami (in Adami-nekeb); Ain=Well (of . . .); Gezer and Helkath=Portion (of . . .).

(b) *By omission of defined members.*—A second type of abbreviation is due to the omission of the substantive in compound terms consisting of a substantive and an adjective; thus 'Ashan (old) in Jos. 15:42 etc. is an abbreviation of the full name Bor-ashan (=old well, unless indeed the name is to be explained with BDB as 'smoking pit'; see COR-ASHAN), which occurs in OT only in 1 S. 30:30. This instance shows how in some cases fuller forms did actually lie behind adjectival names. At the same time it is probably unnecessary to assume that all adjectival names spring from original compound terms.

The way in which tribal names became place-names is illustrated by the abbreviation of Beeroth Bene-jaakan (Dt. 10:6) into Bene-jaakan in a younger source (Nu. 33:31 f., R); perhaps also by Addar as an abbreviation of Hazar-addar (cp § 105).

(c) The parallel forms Jabneh and Jabneel illustrate another important class of abbreviations—cp Barth, NB, § 154.

Other types of abbreviations occur among the class of names which constitute what we have termed expansions (next §).

The existence of the various forms Beth-baal-meon, Beth-meon, Baal-meon, and Meon (so read in Nu. 32:3 for Beon), taken in connection with § 93. **Expansions.** the meaning of the constant element Meon (Dwelling), suggests that the full form is an expansion from the original simple place-name which, like so many others, is an appellative of wide signification and was once no doubt defined by the article or a genitive. Moreover, in other similar compounds the final element is of a similar character; cp Baal-hermon, Baal-hazor.

These expanded compounds, however, as the above parallel forms prove, were in turn subject to more than one form of abbreviation; the middle term Baal or the first term Beth was omitted. The omission of Beth is further illustrated by such alternative forms of the same place-name as Beth-lebaoth and Lebaoth, Beth-azmaveth, and Azmaveth. For further discussion of these points see *HPN* 125-136 324; on the significance of the Baal names see also below, § 96.

¹ Cp. König, *Syntax d. hebr. Sprache*, § 295.

We now come to the classification of place-names according to their meanings; and we may first consider

94. Meanings: I. Names originating in religious ideas or practices.¹
religious.

As we have seen, these names cannot be indiscriminately used to illustrate Israelitish belief or practice; by themselves they merely prove that such and such a belief or practice was at some time connected with such and such a place. In some cases, however, the testimony of the meaning of the name combined with other testimony renders much more definite conclusions possible.

I. A considerable number of names reflects the worship of certain objects or deities. As already remarked,

95. With divine referred to under a general term (*e.g.*,
proper names. *baal*); but in a few a more definite designation occurs.

Sun-worship pretty clearly accounts for several.

(1) Beth-shemesh (House or Temple of the Sun), the name of a city in Judah (also called Ir-shemesh=City of the Sun, and, perhaps, in Judg. 135 Mt. HERES (*q.v.*)), of another in Naphtali and another in Issachar; (2) En-shemesh (Well of the Sun), the name of a well on the borders of Judah and Benjamin; (3) the ascent of HERES (*q.v.*)—on the E. of Jordan; (4) Timnath-heres (Portion of the Sun), in the hill-country of Ephraim.

The distribution of these names is general; their origin, no doubt, pre-Israelitish; for the last name (Timnath-heres) is probably found as Ħi-ra-tà in the list of Rameses II., and Šamšan (in the neighbourhood of the southern territory of Dan) in the same list is obviously of similar significance (WMM *As. u. Eur.* 165, n. 4, 166). Perhaps, in spite of the different sibilant (*w* not *s*), the name of the Moabite city KIR-HERES, or Kir-haraseth, is of similar origin. Cp, further the Šamšimurun of the Assyrian inscriptions, which may lie concealed in the name usually read SHIMRON-MERON in Josh. 1220.

The worship of the moon may perhaps be traced in Jericho, and Lebanon might be similarly explained; but the latter word can be explained quite satisfactorily, and therefore more probably, by the primary meaning of the root, 'to be white'; see below, § 102. The name of the Babylonian moon-goddess, Sin, is generally detected in the names Sinai and Sin.

Other proper names of gods surviving in place-names are:—those of the Babylonian god Nebo in the Moabite town and mountain, and in a town of Judah of that name (but cp NEBO); of Anath in BETH-ANATH, BETH-ANOTH, ANATHOTH (the localities indicate the wide spread of this primitive cultus); of Ashtoreth in ASHTEROH-KARNAIM and BE-ESHTEH; of Dagon in BETH-DAGON (represented both in N. and in S.). Rimmon, which appears in several place-names, is ambiguous: it means a pomegranate; but it is also the name of a god. The use of the article (סלע רימון in Judg. 2045) favours interpreting the Rock of Rimmon as the Rock of the Pomegranate; but in several of the other names (En-rimmon, Rimmon, Rimmon-perez, and Gath-rimmon) it is possible that Rimmon is a divine proper name. It is true, the evidence of ⚡ is rather against this view (*JPTH.* 334, n. 1; but see RIMMON). The name given as HADAD-RIMMON (*q.v.*) is too doubtful to quote, and the same remark applies to the name ETH-KAZIN (*q.v.*), considered as a mark of the cultus of the goddess Athé. The Babylonian Bel (as distinct from Baal) perhaps lies concealed in EBAL (*q.v.*) and the RIBLAH (*q.v.*) of Nu. 3411 (⚡ . . . ἀρ βηλα); and a god Kùsh or Kìsh (=Ar. Kais) in KISH, KISHON, and ELKOSH. Possibly Zur in Beth-zur is the name (or title) of a deity. On the other hand, it is very doubtful whether the 'am which we find at the end of some place-name be the name of a deity; see ANMI [NAMES IN]. The altar-names, Jehovah-shalom and Jehovah-nissi, and the names Jehovah-jireh and Jehovah-shaninnah are hardly of the same kind; cp

¹ Cp Von Gall, *Altisraelitische Kultstätten.*

also Jer. 3316. The only two instances occurring in OT of actual town-names containing Yah, Yahwé, are Jeshua and Ananiah. Both of these are mentioned for the first, and, indeed, in each case, for the only time in Neh. (112632); both are elsewhere personal names. If the text be sound where they occur as town-names, the names of the towns in question were probably derived from persons. Unmistakably geographical is Beth-jah, which, according to W. M. Müller (*As. u. Eur.* 162, 312), occurs in the List of Thotmes, and is consequently a pre-Israelitish name.

2. Of divine general terms *él* and *bá'al* enter into several place-names. In Bamoth-baal (the high places

96. With Baal. Baal) Baal is the second term of the compound and defines the first. In the other compound names it is the term defined; thus Baal-hazor is the Baal or owner of the place Hazor, Baal-tamar the Baal of a particular palm tree, and so forth. For further details as to the significance of the divine term in question see BAAL. What we have to observe here is that such names as those just cited are, properly, names, not of places, but of deities. All names of this type, together with the undefined names Baal, Baalah, and Bealoth, when used as place-names, are abbreviations, having arisen by the omission of Beth (cp § 93). The Beth which still survives in Beth-baal-meon most probably referred in the first instance to the temple or abode of the god (cp Judg. 9446), and the whole compound then became used of the town or village in which the temple of the god stood; cp other names consisting of Beth and a divine name or title—*e.g.*, Beth-anath, Bethel, Beth-shemesh, and perhaps Beth-zur. The omission of Beth, however, was not the only method of abbreviation used; the divine term itself might be the element omitted; Beth-baal-meon is abbreviated not only to Baal-meon but also to Beth-meon. Obviously, in the last instance, it is only the survival of the parallel forms that proves Beth-meon to be a name originating in religious worship. It would, therefore, appear very probable that some of the compounds with Beth which do not at present contain Baal are abbreviations of forms that did; this theory, perhaps, does most justice to compounds with Beth and a term (like Maon) which by itself is a suitable place-name; *e.g.*, Beth-rehob is probably an abbreviation of Beth-baal-rehob, and although it is not easy to select many particular cases and say that they are necessarily or probably abbreviations, it is at least likely that the considerable number of Baal names of places which the OT mentions would be increased if all the alternative forms of the Beth names were preserved. On the other hand, it would be unreasonable to suppose that all or even most of the Beth names have arisen from the omission of Baal; Beth does not necessarily mean temple, nor consequently does it necessarily imply that the name of which it forms a part has a religious significance; Beth-shittah is quite suitably and sufficiently interpreted as meaning 'The place which contains the acacia tree,' Beth-marcaboth as 'the place where the chariots are kept,' Bethlehem as 'the place of food,' though the second element of the last name has been identified by some with the Babylonian god Lahamu (see BETHLEHEM).

Some twenty towns or districts mentioned in the OT

97. With él. bear names containing *él* as one element. These names are of three classes.

(i.) Names in which *él* is a genitive defining the first element of the compound.

These names are Bethel (cp § 96), Nahaliel=the wady of El; Migdal-el=the tower of El; Penuel=the face of El, and two names of obscure meaning, Neiel (the first part of which may be connected with Neah, נחיה) and BETHUEL (*q.v.*).

(ii.) Names in which *él* is part of a (compound) genitive.

Such are the valley of Iphtah-el—where IPHTAH-EL (*q.v.*) seems to be the name either of a town or of a man, which attached itself to the valley (cp Class iii., on the one hand, and

the Sabzean *personal* name **יְהוֹנָתָן** on the other); the Tower of Hananel (Hananel probably being originally a personal name); and perhaps Beth-abel.

(iii.) Names in which *el* is the subject of a sentence.

These are Jezreel (= 'let El sow'), a town in Issachar, and another in Judah (cp also 1 Ch. 43); Jabneel (= 'let El build'), a town in Naphtali and another in Judah; Jakabzeel (= 'let El collect'), of which **כַּבְּזֵל** (*q.v.*) is probably an abbreviated form; ¹ Ipreel (= 'let El heal'), *i.e.*, probably, 'let El rebuild' (cp the use of **רָפַא** in 1 K. 1830); Iptahel (cp § 11) = 'let El open.' Jokheel, the name of a town in Judah, which was also given by Amaziah to the conquered Sela (2 K. 147), is obscure as far as its first element is concerned (see **JOKTHEEL**).

If the first part of Elealeh be the divine term, so that the name belongs to the present class, it would appear to mean 'El doth ascend' or 'hath ascended'; but see below, § 107, end. With the exception of this doubtful instance, however, in all place-names consisting of *el* and a verbal element, the subject stands last, and the verb is imperfect. Consequently, since there appears to have been a strong tendency in earlier times to give the divine subject the first place in a name intended to make a statement, the translation of the verbal elements in these place-names by the voluntative as above is preferable to the commoner method of translating by the imperfect—El soweth, etc. The point is argued more fully in *HP.V* 215-218.

The *el* in all names of classes i. and iii. is probably the *numen* of the place (cp the accounts of the theophanies of Bethel and Beer-lahai-roi).²

An instance of abbreviation of the third type (iii., above) of *el* names is **JABNEH** (*q.v.*), the full form of which (see above, § 92 c) also occurs. Similarly, both Iptah and Iptahel are found, though not as the name of the same place. We should probably also regard as abbreviations Jazer (= 'may [El] help') and possibly **JANOAH** (= 'may [El] make resting-place here'); but scarcely **JABOK** (*q.v.*). The pre-Israelitish names Jakob-el and Joseph-el (see **JACOB**, § 1; **JOSEPH** i., § 1; ii., § 1; and cp § 89) do not occur in the OT, nor are even the corresponding abbreviated forms, Jakob and Joseph, used as strictly geographical terms.

3. Names clearly due to religious considerations, though not containing the name or title of a deity, are

98. Without divine name. derivatives from the roots *Kdš* and *hrm*, which express general Semitic religious ideas. **KADESH** (*q.v.*; pre-Israelitish) and **Kedesh** (the name of at least two places, one of which has a pre-Israelitish record; see **KADESH**) from the one root, **Horem**, **Hormah**, and **Hermon** from the other, must all have been given to the respective places on account of their sacred or inviolable character. Some less certain but possible instances of names having a religious origin may be added: **Gilgal**, the name of five places in different parts of Palestine, and **Geliath** of two, may be derived from sacred circles (of stones); **Mishal** (mentioned by **Thotmes III.**) may denote a place 'where (the advice or judgment of a deity) is sought'; and **Oboth** may be named in reference to spirits (**אב**). It is quite possible that a very much larger number of names ought to be included here (on the animal names, for example, see below, § 104); but we cannot admit as more than a mere possibility what has sometimes been maintained (most recently by **Grunwald** in *Die Eigennamen des AT*, 1895), that names denoting all sorts of objects or qualities are survivals from Fetichism, Demonism, and the like.

II. Passing now from names originating in religious ideas or practices, we note a second considerable class consisting of names derived from the natural or artificial features of the place.

1. Height. (a) Loftiness of situation is clearly indicated by **Ramah** (from **רָם** = to be lofty)

99. Non-religious height. —generally with the article (**הַרְמָה**), or defined by a genitive (*e.g.*, **הַרְמָה לְחֵי**), but also (according to **MT** in **Jer.** 31 15) undefined—the name of several places in different parts of Pale-

stine; **Ramoth** and **Rumah** from the same root, and, perhaps, **Arumah** from a cognate root; **Geba**, **Gibeah**, and **Gibeon** (several places, see the articles), all signifying hill. **Naphath**-(or **Naphoth**)-**Dor** (**Jos.** 112 etc. **AV**, **RV**mg.) would, if it were the proper name of a town, be a further instance; but **Naphath** is rightly translated in **RV**'s text ('the heights' [of **Dor**]). Terms picturesquely indicating the lofty situation of the town itself, or a lofty natural feature in the neighbourhood, are **Jogbehah** (from **גבה**, to be high), **Sela** (two places) = The Cliff, and perhaps **Hadid** (*ἄρις ἐπ' ὄρους κεκλιμένη* —**Jos. Ant.** xiii. 65) = the sharpened or pointed cliff with which we might perhaps further compare **En-haddah** (yet see **PEF.** 112297). Some would include **SHAHAZUMAH** (*q.v.*) in this list. Some metaphorical terms for natural configuration became names of places and are to be noticed here:—**Shechem** = 'Shoulder' and, metaphorically, 'a ridge' (cp **Gen.** 4822, but see **SHECHEM**; the use of the synonymous **נָתַח** in **Nu.** 3411 etc.; and **Ges. Thes.** 1407 b); **Dabbésheth** = 'a camel's hump' (**Is.** 306), which is also according to some (see **BDB**) the meaning of **Gilead**; **Chisloth-tabor** (**כִּסְלוֹת תְּבוֹר**), or abbreviated **Chesulloth** (**כִּסְלוֹת**)—the different punctuation adopted by **MT** in the case of the full and abbreviated form is not supported by **Ⓢ** = the flanks of **Tabor**; **Aznoth-tabor** perhaps = the ears (and hence metaphorically the peaks) of **Tabor**. If the last interpretation be correct, we may probably (though against **Ⓢ**) add **UZZEN-SHEERAH** (*q.v.*). Compare also **Bohan** (shape of a thumb).

(b) The indication of lowness of situation, or the neighbourhood of some notable depression, is obvious in all compounds with **Gē** (**גַּי** = valley, and so translated always in **RV** except **Neh.** 1135 mg. and 1 Ch. 414), which are, however, always names of valleys, not of towns; in **Beth-emek** = House of the valley; and probably in **Horonaim** and **Beten** (literally = belly). **Jahaz**, if we may follow a cognate Arabic term (*wahṣa*), means *terra rotunda et depressa* (**BDB**). The names **SHARON** (*q.v.*) and **BASHAN** (*q.v.*) seem to have arisen from the absence of conspicuous irregularities of height over the districts which they designate. **Bithron** (a district) probably means cleft or ravine [but cp **MAHANAIM**]; and **Shepham** possibly a bare height (**ZATW** 3275 [1883]).

2. The character or condition of the soil, the fruitfulness of the place, or the reverse, account for several names. **Horeb** (a mountain) and **Jabesh** in **Jabesh-gilead** (a city) are both [but cp

100. Nature of soil. **SINAI**] most naturally interpreted of the dryness of the ground; **Argob** perhaps indicates a rich and earthy soil (cp **Driver, Deut.** 48), **EKRON** (*q.v.*, § 3) barren or unfruitful; the **Arabah** (the name of the valley of the Jordan and its prolongation) means the desert or waste country; hence the town-name **Betharabah** abbreviated in **Josh.** 1818 into 'the Arabah.' On the other hand **CARMEL** (*q.v.*, §§ 1, 9), the name of the well-known, now thickly-wooded mountain range, and of a place in Judah capable of supporting large numbers of sheep, expresses the fertile character of the places in question, and **Ephraim** and **Ephrathah** (if correctly derived from **פָּרָה** and so **Ges.-Buhl**, but not **BDB**; see **EPHRAIM** i., § 1 f.) have a similar meaning. The following interpretations (some of which are discussed in the several articles) may be mentioned here: **Bozkath** = an elevated region covered with volcanic stones (**BDB**), **Zion** = waterless (**Lagarde, BN** 84), **Abel** (= meadow) by itself and in several compounds (*e.g.*, **Abel-Shittim**).

3. The presence of water accounts for many names,¹ —most clearly for those which are compounded with **Beer** (= well) or **En** (= a spring).

a. **En.**—In some cases such as **En-hakkore** = the partridge's (?) well (**Judg.** 15 19), **En-togel** (**Josh.** 15 7), **En-harod** (**RV**, the spring of **Harod**), as well as in a very large

101. Water. number of modern Palestinian names in 'Ain, the name appears to be that of a spring only.

¹ 'The etymology of Arabian place-names refers mostly to water, pasturage, plants, and trees,' **Jacob, Das Leben d. vorislämischen Beduinen.** 41.

¹ Cp **Barth, NB** 227, n. 3.

² Cp **Stade, GVI** 1428, n.

NAMES

In most cases, however, the name serves also for the name of the place containing the well or spring, or possibly in some cases for a new township that sprang up nearer to the well than the place from which the name was derived (? Hazor and En-hazor, Josh. 19 30 f.). En-mishpat (the well or spring of judgement) was no doubt originally the name of the spring at Kadesh; but in Gen. 14 7 it is used of the place itself. Town-names of this type are many, distributed over all parts of the country, and were already in use before the Israelitish conquest of Canaan. In OT we have mention of the following:—En-dor, En-gannim, En-gedi (2), En-haddah, En-eglaim, En-hazor, En-rimmon, En-shemesh, En-tappuah. Ain is an abbreviated name (perhaps from En-rimmon, *q.v.*). Enaim (=Enam) perhaps means 'Two springs' (cp § 107) and in any case owes its origin to the presence of a spring, as also does Hazar-enon (Hazar-enan) and *perhaps* Anim.

b. Beer, which in Hebrew generally (though not exclusively: see, *e.g.*, Nu. 21 17) denotes a well rather than a spring, is less frequent in names; OT mentions Beer (two places—in both cases without the article) Beeroth (pl.=wells), Beer-lahai-roi, Beer-sheba, Beer-elim, Beeroth-bene-jaakan. Berothah (=Berothai) is *perhaps* to be similarly explained.

c. Me (=water) is found in Me-jarkon, Me-zahab (if we may regard this name as only apparently personal, and really geographical; Gen. 36 39, cp Dt. 1 i Dizahab) and *perhaps* in Medeba. Giah (to judge from the root-meaning) very probably means a spring; so also Gihon. The presence of hot springs gave rise to the names Hammath, Hammoth-dor and Hammon (perhaps only two different places in all), and of a bitter spring, if we may for once trust the biblical etymology, to Marah. Nahalol means the 'watering-place.'

4. *Beauty* of situation and appearance, for which some of the Hebrew writers certainly had an eye (Ps. 48 :

102. **Other features.** Cant. 6 4), or general attractiveness may account for some names—*e.g.*, Shaphir, Shepher (a mountain)=beautiful, beauty; Tirzah=she is pleasing; Jotbah and Jotbathah=pleasantness; and, more metaphorically, Ziz *perhaps* = the flower. Most of the names, however, that have been or might be cited in this connection are really very ambiguous or indecisive.

5. *Colour* appears to account for a few names. Lebanon is most probably named from the whiteness of its cliffs (or its snows?); and the root meaning 'to be white' seems at least as probable an explanation as any of other proper names from the same root, viz., Laban, Libnah (2), Lebonah. Kidron, the name of a torrent-bed, may mean black or dull-, dirty-, coloured (cp Job 6 16); Hachilah (a hill), dark; Zalmon (two hills according to MT; but see ZALMON), dusky; Adummim, red; Jarkon in Me-jarkon, yellow; Hauran, black. None of the foregoing instances, however, are really free from ambiguity; though in some at least the colour-meaning seems the most probable.

III. Having dealt with religious place-names and names indicating natural or artificial features, we must consider next place-names derived from names of trees, plants, etc., and of animals.

1. *Trees, plants, etc.*—Some instances are unmistakable: (Abel) Shittim=(the meadow of) the acacias, Beth-shittah=the house of the acacia; the

103. **Plant names.** *apple tree* (tappūāh) gives its name to three places—Beth-tappuah, En-tappuah and Tappuah; the *palm tree* (tāmār) to Tamar, Baal-tamar, Hazazon-tamar, the city of palm trees (Judg. 1 16, 3 13=Jericho, Dt. 34 3), and probably also Tadmor (cp Lagarde, *Übers.* 125); the *terebinth* (or whatever large tree may be implied by the Heb. אֵילָן, אֵילָן to El-paran (=Elah, Elath, Eloth), Elim, Elon and *perhaps* Allammelech. All of these are names of towns. On the other hand Allon-bacuth appears to be simply the name of a particular tree (cp in the Hebrew Gen. 126 13 18 Dt. 11 30 Jos. 19 33 Judg. 9 37 1 S. 10 3, where similar designations have been translated). The *pomegranate* appears at least in the Rock of Rimmon (Judg. 20 45 etc.) and probably in other compounds with Rimmon; but for another possible interpretation of these, see above (§ 95). *Olive trees* give their name to the Ascent (2 S. 15 30) or Mount (Zech. 14 4 etc.) of Olives; *vineyards* to Abel-cheramim (the meadow of vineyards) in Ammon and Beth-hachcherem in Judah; the *grape cluster* to the valley of Eshcol; and probably, the 'choice vine' (שֵׁקֶר) mentioned in Is. 5 2 (cp Gen. 49 11) to the fertile

NAMES

valley of Sorek and the Edomite town Masrekah. Anab-too, probably means grapes in spite of the differing punctuation of the proper name (אָנָב) and the common noun (אָנָב). TAANATH-SHILOH (*q.v.*) is the *fig tree* of Shiloh, if we may follow the Greek rather than the Hebrew vocalisation. RITHMAH, a station in the wilderness, is the *juniper tree*, and AROER (*q.v.*) has been interpreted bushes of dwarf juniper. EZION-GEBER (*q.v.*), another station, derives its name from the tree called in Arabic *gadā*. *Thorn bushes* of different kinds are denoted by the names Atad, Shamir (2), and *perhaps* also Seneh (see BUSH); and the *almond tree* by Luz (which, however, is otherwise explained by Lagarde, *Übers.* 158). The *balsam tree* accounts for the name of the valley of BACA (*q.v.*), and *perhaps* also for Bochim (cp Moore, *Judges*, 59 f.). Libnah may be named from a tree (cp אֲנָבָה=? the white poplar—Gen. 30 37, Hos. 4 13) or be more closely connected with the root-meaning 'to be white.' (For another view see LIBNAH.) In the light of Aramaic we can without much difficulty interpret Gimzo the *Sycamore tree*, and Dilan the cucumber; cp Löw, *Pflanzenamen*, 387, 334, 351. Betonim, especially in the Greek (βῶτανειμ) closely resembles the Hebrew word (Gen. 43 11) for pistachio nuts (NUTS, 2). A water-plant (קָנִי), as most scholars suppose, gave rise to the Hebrew name Yam Süph; see RED SEA; but cp MOSES, § 10.

2. *Animals.*—The following animals have given names to places.

(a) Wild quadrupeds: the stag (Aijalon), the lion (Lebaoth, Laish and ? Shahazumah), the leopard (Beth-nimrah), the Gazelle (Ophrah [2], Ephron

104. **Animal names.** [1 or 2]), the wild ass (Arad), the fox (Hazar-shual, the land of Shual, Shaal-bim), the hyena (Zeboim).

(b) Domestic quadrupeds: Lambs (Telaim, Beth-ear), the cow (Parah), or calf (En-eglaim, Eglon), the horse (Hazar-susah [or Susim]), the goat (? Seirah) or kid (En-gedi).

(c) Birds: the partridge (Beth-hoglah, ? En-hakkore), birds of prey (Etam [1-3]).

(d) Reptiles and insects: the serpent (Ir-nahash), the lizard (Humtah), the hornet (Zorah), scorpions (Akrabbim), the cricket (Gudgodah).

Names of animals applied to towns are much more frequent in the southern territory of the Israelites than in the northern: cp *HPN* 105 f. Names of this class are also frequent as clan names (on the other hand they are comparatively rare as personal names). This is one of the reasons which favour tracing at least many of them back to a totem stage of society.

IV. A considerable number of places derive their names from what may be termed the social, political,

105. **Compounds and industrial characteristics of the with Hazor, etc.** place. Here we may notice first the names consisting wholly or in part of the terms Hazor or Hazar, Ir, and Kiriath. Hāšēr or Hāšōr¹ denotes the fixed settlement as contrasted on the one hand with the movable encampments of nomads, and on the other with walled towns; cp in the one case the contrast between the *hadariyy* or *ahlu l-hadar* (with which *perhaps* cp the יִשְׁבֵי הָרָר of Jer. 49 30 33) and the *badawiyy* or *ahlu l-bādiyah* (*i.e.*, the Bedouin) and in the other, *e.g.*, Lev. 25 31. Clearly the proper names can only be taken to designate the character of the place at the time of the origin of the name; in the case of the Hazor of Judg. 4 2 17 etc., at least, the name must have continued in use long after the place had ceased to be an actual hāšōr and had become a fortified city; for it is mentioned by Thotmes III. among his conquered towns, in the Amarna Tablets as the seat of a prince (šar Ḥazu-ra—154 41) and in the OT, more than once, in

¹ הָשֵׁר (constr. הָשֵׁר) or הָשֹׁר, the latter only in proper names but cp Lag. *Übers.* 47.

NAMES

connections which indicate that it was a place of strategic importance (e.g., 1 K. 9.15 2 K. 15.29). With the exception of the place just mentioned, Hazar-eman (or -enon) on the N. boundary of Palestine, and (Baal-) Hazor in Benjamin, all names of this type are of places in the S. of Palestine (being assigned to the territories of Judah or Simeon) or in the wilderness; many of them, therefore, no doubt retained the character whence they originally derived their name. The places are HAZOR (two places, one of which is also called Kerioth-hezron), Hazor-hadattah (?=New Hazor—if the text be right), Hazar-addar (=Hezron), Hazar-gaddah, Hazar-susah (or susim), Hazar-shual, Hazeroth. Hazarnaveth (q.v.) is the name of a district in S. Arabia, and is perhaps only apparently connected with the type of name under discussion.

There are some indications that the second element in the compounds is, as we might independently expect, a clan or tribal name. Thus we note (1) the alternative forms (Susah and Susim), (2) the two animal names (Susah [horse] and Shual [fox], if the most obvious meaning is correct; but cp HAZAR-SUSAH, HAZAR-SHUAL)—cp the many elan names of this type (HP.V 97 ff.). (3) Addar actually occurs as a clan name, if the text of 1 Ch. 8.3 be sound. (4) Gaddah resembles the tribal name Gad. Similarly Jair in Havvoth-jair (the tent villages of Jair) is no doubt a clan name (see JAIR). Other names originating in and reflecting much the same stage in social development as Havvoth-jair and the compounds with hazar are Mahaneh Dan (Camp of Dan) and Mahanaim (two camps), Sueoath (booths, though the originality of this form of the name is contested, see SUCCOTH).

Ir (עיר), which forms the first element in the compound names Ir-shemesh, Ir-nahash, the City of Salt (עיר המלח, Josh. 15.62), and the City of Palm trees (עיר התמרים, Judg. 1.16), is a wider term, applicable to a camp or a watch-tower (Nu. 13.19 2 K. 17.9) as well as to fortified towns, in which latter case, however, the term may be more exactly defined (Lev. 25.29). As to the second element: in the first of the foregoing names (Ir-shemesh) it is an object of worship, in the second (Ir-nahash) probably tribal rather than personal, and in the last two (City of Salt and of Palm trees) presumably derived from natural characteristics of the place. The *Ar* (ער) in the Moabite name Ar Moab (or, abbreviated, Ar) is a parallel form of the same term.

The *kiryah* (קריה), again, which constitutes, or forms part of, several names, cannot be very closely defined; etymologically, it appears to mean simply 'meeting-place.' The plural form KERIOTH (q.v.) is the name of a Moabite city, and, compounded with Hezron, of a city in Judah; the dual form Kiriathaim is the name of a city in Reuben and another in Naphtali; three of the compound names—Kiriath-arba (Four cities—cp § 107), Kiriath-yearim (City of Forests), also called Kiriath-baal, and Kiriath-sepher (City of Books)—are found in Judah, and another Kiriath-huzoth (City of streets?) in Moab. Kir, the Moabite word for city (MI 11 f. 24.29) probably as a walled place (cp the Hebrew usage), forms, by itself as an abbreviation, or in one of the compound forms Kir-Moab, Kir-heres or Kir-hareseth, the name of an important Moabite town. With Kartah compare the word for city (קרת) used in Job 29.7. On these names, as indeed throughout these introductory discussions, compare the special articles.

The defensive character or feature of the town is more or less clearly indicated by the names Bezer (2) and Bozrah, which mean a fortified place (cp *ir mibšar*=fortified city, 1 S. 6.18 and often); Geder, Gederah, Gederoth, Gederothaim, Gedor—all

of which are from *gd*=to wall up, but some of them perhaps with the specific sense of sheepcotes (so often Heb. *gd'arah*); Hosah (place of refuge); the compounds with Migdal (=tower), viz., Migdal-el, Migdal-

NAMES

gad, Migdol (cp also Magdali, AB v. 237.26); Mizpeh or Mizpah (5), which signifies the watch-tower (cp 'the field of Zophim,' Nu. 23.14 and Di. ad loc.; possibly also Zephath). Azem and Azmon, if, as is likely, they are to be derived from *ʿāsm*=to be strong, are probably to be explained in the same way; of the meanings 'enclosure' or 'fortress' suggested in BDB for Aphek and Aphekah the latter may perhaps be justified by the Assyr. *epoku*=to be strong (Del. Ass. HVB 115a), but scarcely (with Ges. in Thes.) by known usages of the root in Hebrew and Arabic.

The size of the town appears to have been the origin of the names Zoar and Zior (small), Rabbah (large) in Judah (רבה) and in Ammon (fully בני עטון רבה). Rabbith is perhaps also to be connected with the root of Rabbah.

En-mishpat, Madon, and probably Meribah, owed their names to being places where disputes were settled.

The presence of one or more wine presses gave their names to the cities of Gath, Gath-hepher, Gath-rimmon (2), Gittaim (in addition to the place so named in Neh. 11.33, cp Gen. 36.35 Γίθηται=Heb. עייה; see AVITH, GITTAIM); cp further Judg. 7.25 קיביות. Similarly the town of Migron is probably derived from a threshing-floor (see § 88); but it is not clear whether 'the threshing-floor of Atad' (Gen. 50.10 f.) and the 'threshing-floor of Nacon' (2 S. 66=Chidon 1 Ch. 13.9) are names of towns or not (see ATAD, NACON). Madmen in Moab, Madmenah in Benjamin, and Madmannah in Judah, mean the dung-place or dung-pit,¹ and KIRIATH-SEPHER (q.v.) should apparently be translated Book-city.

Whether the stench which appear to have given their names to Zanoah (2), Ziphron, and Ophni¹ were natural, proceeding from some well or cave or the like, or artificial—i.e., due to the life of the town—is uncertain. In the latter case, the names may have originated with the Bedouins, who are sensitive to the smells of towns (Doughty, Ar. Des. 1.210.438).

Many place-names are plural in form—e.g., Gederoth, Akrabim. In some cases the exact number of objects

whence the name was derived is perhaps definitely indicated. Thus Kiriath-arba may mean four-cities; Beer-sheba, seven wells. Migdal Hammeah (EV the tower of Meah) should mean the tower of the hundred; but on the reading of MT see HAMMEAH. In the case of Sheba (seven) and Eleph (a thousand) we have names consisting of a term of number only; unless, indeed, as is quite possible, the names are to be otherwise interpreted. The question whether this class of names is at all large depends on the actual character of certain names apparently dual in form.

Such names are—

Adithaim	Enaim	Kiriathaim
Adoraim	En-eglam	Mahanaim
Almon-diblathaim	Ephraim	Mizraim
Beth-diblathaim	Gederothaim	Ramathaim
Diblaim	Gittaim	Shaaraim
Diblathaim	Hapharaim	Zemaraim. Cp also
Dothaim (DOTHAN)	Horonaim	SANARIA, JERU-
Eglaim	Kibzaim	SALEM, § 1

Does Kiriathaim mean two cities, Enaim, two wells, as Kiriath-arba means four cities and Beer-sheba, seven wells? The dual significance of this ending in many or all of these proper names has been called in question by Wellhausen (JDTh. 1876, p. 433), Philippi (ZDMG, 1878, pp. 63-67), Barth (NB 319, n. 5).

¹ The occurrence of such names as Madmen, and perhaps we may add Kibshan, 'furnace' (see NIBSHAN), makes it plausible (but cp the special articles) to hold that ZANOAH (2), ZIPHON, and OPHNI are so called from natural or artificial stench. *ḥn* is a well-known Heb. root. For Ziphron cp *ḥafra*=to smell (especially, though not exclusively, of bad smells); cp also Syr. *zaphar*=foetuit, a sense of which some trace is found in certain derivations of Ar. *zafra*. With Ophni cp Ar. *ʿafna*=to be putrid. We might add Hannathon if this name be from the root *hanan* (but see below, § 107); cp Ar. *hanna*=foetorem emitit; Syr. *hanninā*=rancid; also in Heb. Job 19.17 (וַחַן) from *ḥn*=to be loathsome).

NAMES

Kautzsch (*Heb. Gram.*⁽²⁰⁾ 88c), Strack (*Genesis, Excursus*, 139f.). Cp also WMM, *As. u. Eur.* 251f. [Winckler, *KAT*⁽²¹⁾, 28f.] The dual interpretation is retained, sometimes with a λ , in certain cases by BDB (see, e.g., under חרונים, חרונים), and defended by König (*Lehrgeb. d. Heb. Sprache*, 2436f.).

The main reasons urged against the dual character of the ending are these: (1) The dual in Hebrew, as also, it is urged, in original Semitic, is confined to things found in pairs; in many cases the proper names cannot be naturally explained of a pair of objects. (2) Such a form occurs in some cases side by side with a singular—e.g., Mahaneh and Mahanaim, Ramah and Ramathaim. (3) The forms also occur side by side with forms in -\u02e2n (יָנִי) and -\u02e2m (עָמִי).

This last parallelism has been explained indeed by the supposition that -\u02e2n and -\u02e2m are alternative dual endings; but on the other hand it is argued with force that the endings -\u02e2n and -\u02e2m are unquestionably frequent in names in which there is no reason to assume a dual meaning; and that in some names the ending -aim is certainly secondary, as may be seen most clearly in the case of Jerusalem (cp Amarna *Urusalim* and MT Kt. form ירושלים), which was later pronounced Jerusalem (ירושלים MT קר.), and Samaria (שַׁמְרֹן, but in Aram. שַׁמְרִין). Barth's explanation is somewhat different; he regards -aim (-ain) as an old locative ending which was subsequently displaced by the more familiar -\u02e2n , -\u02e2m .

The first of the foregoing objections (limitation of Hebrew dual) cannot be pressed; the names in question may be pre-Israelitish (cp § 89) and sprung from a dialect which, like Arabic, used the dual more freely than Hebrew; nor can a stricter dual-meaning be considered in all cases inappropriate—e.g., Kiryathaim may mean 'The twin cities' (cp use of the Heb. dual in ריבנים—Ges.-Kautzsch, *Gram.*⁽²⁰⁾ ET, § 88c).

The second objection (parallel singular forms) is far from conclusive.

As to the third (parallel forms in -\u02e2m , etc.)—in view of the history of the name Jerusalem, a certain tendency to change -\u02e2 name so that it should resemble a dual form cannot be denied. On the other hand, this very tendency renders the prior existence of actual dual names probable. Further, in many cases the endings -aim , -\u02e2m , -\u02e2n are attached to the feminine inflection; if these endings be duals, the forms of the names are in accordance with the known laws of inflection; but if they are substantival affirmatives the proper names in question are exceptional formations; Barth, at least, in his section (*AB*, 316-416) on nouns with suffixes, cites no instance of nouns formed by the addition of endings (such as -\u02e2m , -\u02e2n , -\u02e2) to the feminine inflection. Among proper names might be cited some few ambiguous forms, such as תַּחְתָּן תַּחְתָּן.

The present writer therefore concludes that those names in which the endings -aim , -\u02e2m , or -\u02e2n are attached to the feminine termination are dual forms; that several other names also may be duals, but that the ending in their case is ambiguous. Though not unaware of the divergence of some scholars, he would interpret Kiriathaim, 'the two cities'; Gittaim, 'the two winepresses'; Diblathaim (in Beth-diblathaim = \u0219mon Diblathaim), 'the two assemblies' (cp BDB s.v.); RAMATHAIM¹ (q.v.), 'the two hills.' Gederothaim is a name of doubtful genuineness, but, if genuine, would mean the two walls or sheepcotes. In the following (among other) names the ending is ambiguous; but the dual is in some cases appropriate and probable—Dothan (דוּתָנָה רָתָן), Enaim or Enam (the two wells), Horonaim (the two hollows), Shaaraim (two gates, or double gates; cp *St. Heb. Gr.* 340b).

¹ Probably a later name of Ramah.

NAMES

The significance of place-names turns not only on their meanings but also in some cases on their forms. This is too complicated a question to discuss here. As is remarked elsewhere, the names of two towns in Judah (ESHTEMOA [q.v.] and Eshtaol) present the same modification of the root as is found in the Arabic verb (conj. viii.) (and also in Meshah's *Inscr.* l. 11); and in three names of towns belonging to the southern tribes (Eltekon, Eltekeh, and Eltolad), possibly also in the Reubenite Elealeh, the first element may be the Arabic article.¹

G. B. G.

C. DIVINE NAMES²

The special importance attaching to the names of God in the OT and the emphasis often laid on their

signification (cp Ex. 313ff. 153 Is. 428 108. Significance of names. 5115 Jer. 332) finds a partial explanation in the peculiar emphasis with which the word *name* itself is there employed. The name of a person or thing was for the Hebrew not simply distinctive; it was a revelation of the nature of the person or thing named, nay, often almost an equivalent for the thing itself. This is specially true of names of God. A new special revelation of God leads to the formation of a new name (Gen. 1613). Only so can we explain many Hebrew forms of expression that either seem to us pleonastic or peculiar, or else easily become associated with a false meaning. [For other applications of the term, some of them compelling attention by their boldness, see NAME, § 9.]

I. What is called the Tetragrammaton, יהוה,³ appears in the OT 6823 times as the proper name of God as the God of Israel. As such it serves to

109. Yahwe, the sacred name. distinguish him from the gods of other nations. It is 'the [sacred] name' par excellence (Lev. 2411 Dt. 2858). In the

MT יהוה (YHWH) is almost always written with the vowels of Adonai, אֲדֹנָי, 'lord' (YēHōWāH, יהוה), the vowels of Elohim, אֱלֹהִים, 'God' (YēHōWiH, יהוה) being used when Adonai itself precedes.⁴ This was a direction

¹ [It will not be surprising that the special articles, having been prepared independently, do not always agree in their explanations of these names with the present critical discussion. The reader will rightly infer that the question at issue is difficult.]

² For other titles applied to God, see the several articles:—ABI, ADONI, AHI, AMMI, DODI, HAMU, SHEMA, ZUR, names in; also BAAL, MOLECH, etc.

For epithets applied to God, see above §§ 26 ff. For designations of other supernatural beings, heavenly or earthly, see ANGELS, AZAZEL, DEMONS, LILITH, SATYRS.

For names of deities other than Yahwe, see ANATH, ASHERAH, ASH-HUR, ASHTORETH, BELIAL, CHEMOSH, CHIUN, DAGON, QUEEN OF HEAVEN, SICCHU, TAMMUZ, FORTUNE, ABRAHAM, ISAAC, SARAH, MILCAH, LABAN, SAMSON, also above, § 40 ff.

³ So also *MI* l. 18. In the second half of compound Hebrew proper names the name has the form יהו; contracted into יה (only, in the case of some of the names compounded with יה,

'the final element יה or יהו represents merely an emphatic affirmative and not the divine name'; so Jastrow, *JSL* 13 101 ff. [cp the view often maintained in this volume that the final יה or יהו is due to post-exilic manipulation of early names, such as נתני, תַּרְבִּי, צַפְתִּי, of ethnic origin]. The contraction יה occurs not only in the liturgical formula יהוה יהוה (written יהוה only in Ps. 10435), praise ye Yah, but also twenty-four times otherwise, though only in poetical (and probably all late) passages. It is most probably to be regarded with Jastrow (*ZAW*, 1896, p. 1 ff.) as an artificial post-exilic formation. It is very doubtful whether יה (e.g., in שַׁמְרִין, etc.) occurs as a contraction for יהו. Cp on this point Olsh. *Lehrb.* 612 ff., and Grimme, *Grundsätze der Heb. Akzent- und Vokallehre* (Freiburg, 1896, p. 146).

In the first half of compound proper names, on the other hand, we find the form יהו (from יהו, the equivalent of יהו) contracted into יה (e.g., in יְהוֹנָתָן, etc.).

⁴ In 320 places (143 of them in Ezek.) יהוה (originally probably without vowels) is retained in the text after the קר. אֲדֹנָי, which has come to be regarded as a Kēthih. The resulting combination 'Adonai [substituted for] YHWH', Kr. 'Adonai YēHōWiH—i.e., Adonai Elohim—appears in EV as 'the Lord God.'

NAMES

to the reader always to substitute for the unpronounceable¹ actual name either *ādōnāi*, אֲדֹנָי (hence in ᄆ ὁ κύριος for יהוה) or *ēlōhīm*, אֱלֹהִים. On this *Krē per-petuum* cp Gesen. *Gram.* § 17.3.

The controversy as to the correct pronunciation of the tetragrammaton, whether as Yahwē, יהוה, Yahwā, יהוה, or Yahwāwā, יהוהוה,² a con-

110. Its pronunciation. troversy in which, as in Ex. 3:14, the derivation of יהוה from an imperfect form of יהָ was always assumed,³ has been gradually brought to an end by the general adoption of the view, first propounded by Ewald, that the true form is Yahwē, יהוה. The abbreviated form, Yāhu, יהו, can be explained only by the form, Yahw, יהו (with closed syllable; cp יהו from יהוה), and the *śéghōl(ē)* of the second syllable is attested, to mention nothing else, by the fact that, in Samaritan poetry, יהוה rhymes with words ending in that way.⁴

A much more difficult point to decide is the original

¹ As early as the beginning of the third century B.C. יהוה seems to have been regarded as *áppotot*, at least beyond the sacred precincts. Thus it is to be explained to a considerable extent the avoidance of the Tetragrammaton in the latest books of the OT, as e.g., in Daniel (except chap. 9), to some extent in Chronicles, and, in consequence of editorial revision, in Ps. 42-84, as well as in the Apocrypha generally. The NT follows LXX in invariably substituting 'the Lord' (ὁ κύριος) for YHWH, יהוה. At the same time, however, the gradual change that came over the idea of God as it became more and more universal, had also a great deal to do with the suppression of the personal name in favour of 'God,' אֱלֹהִים (so everywhere in Koheleth) and other appellatives. What led more than anything else, however, to men's avoiding the utterance of the sacred name, was probably the dread of breaking the injunction Ex. 20:7. It would appear, indeed, from ᄆ of Lev. 24:16 that the very mention of the sacred name was threatened with death. Probably, however, as in the original, all that is meant is the employment of it in abusive language or in witchcraft.

² According to the Babylonian Talmud (*Yōmā* 39b) the name יהוה had ceased to be pronounced even by the priests in the hessing as early as the time of Simon the Just (about 270 B.C.); cp, however, on this date, ECCLESIASTICUS, § 7 [d]. Philo, on the other hand, declares simply that the sacred name was pronounced only in the sacred precincts, and according to the Jerusalem Talmud (*Yōmā* 37) it was lawful down to the very end for the high priest to pronounce it—though finally only below his breath—in the ceremonial of the day of Atonement. Moreover, Josephus (*Ant.* ii. 124) seems to have known the true pronunciation, though he excuses himself from giving it as being unlawful. As late as 130 A.D. Abhā Šahūl denied eternal bliss to any one who should pronounce the sacred name with its actual consonants. See on this especially Dalman, *Der Gottesname Adonaj und seine Gesch.* (Berlin, 1889), and cp Che. *OPs.* 299-303.

³ Cp Franz Del. 'On the pronunciation of the Tetragrammaton,' *ZATW* 3 f. (1883-84). Brinton reads Jahva, 'The origin of the sacred name Jahva,' *Archiv für Rel.-Wiss.*, 1899, 322 ff.

⁴ Grimme alone (*op. cit.* 143 ff.), on quite insufficient grounds, explains יהוה as a lengthened form of יהו, Yāhu, regarding it as a sort of plural or collective form from the root יהו or יהוה.

⁵ On this cp Kau. *TLZ*, 1886, no. 10, col. 223. Moreover, Theodoret (*quest. 15 in Exodum*) states that the Samaritans pronounced the sacred name *Iabā*, and the same pronunciation is ascribed by Epiphanius (*Adv. her.* i. 320) to a Christian sect, and is to be found in Egyptian magic papyri (on this, as also on the whole question, see the thorough investigation of A. Deissmann, 'Griechische Transskriptionen des Tetragrammaton' in his *Bibelstudien*, Marburg, 1895, p. 3 ff.; Author. Transl. by A. Grieve, 1901, p. 321 ff.). Clement of Alexandria (*Strom.* v. 634, according to the better reading) attests the still more exactly corresponding form *Iaouē* or 'Iaouai'; Origen, the form 'Iaō'. Burkitt's edition of fragments of Aquila shows that Aquila wrote the sacred name in archaic Hebrew characters. Finally, on 'Jahwē' is based also the form *Iaouone* in the Jewish-Egyptian Magic-papyri; cp L. Blau, *das altjüdische Zauberwesen* (1898), 128. According to Blau, ω appears in the third place in order that the first three vowels may be sounded *Iau* (=יהו). The form *Ieue* occurring in Latin MSS (cp *ZATW* 1346 [1881], 2173 [1882]) at least testifies to an *e* in the second syllable. On the other hand, the form *Iao*, handed down by the Gnostics, may be left out of account. Like all similar forms (e.g., *Ieou*, in Philo Byblius), it is simply the product of erroneous or misunderstood Jewish statements. On this cp Bau-dissin, 'Der Ursprung des Gottesnamens Iao,' in his *Studien zur semit. Rel.* 2 181 ff. (1896).

NAMES

meaning of the word Yahwē. In E of the Pentateuch

111. Supposed meaning. יהוה, transposed from the third person into the first, is explained by God himself first by 'I am that I am' (אֲנִי אֲנִי אֲנִי), and then by the simple 'I am' (אֲנִי אֲנִי). YHWH (יהוה) is here obviously regarded as the third person imperfect of the archaic stem HWH (הוה = הוה), 'to be,' in the sense of 'he is (and manifests himself) continually,'¹ with the additional connotation of remaining the same, so that the name would express both the attribute of permanence and that of unchangeability, and especially unchangeability in keeping promises—i.e., faithfulness.

This explanation offered in the OT itself has been felt by many modern scholars (beginning with Ewald) to be only an attempt to explain a primitive name that had long since become unintelligible, and, further, to be simply the product of a religious-philosophical speculation and far too abstract to be by any possibility correct. Increased importance is given to these considerations by the observation that the name is in no sense peculiar to the Hebrews, and on other soil it must originally have had a much simpler and in particular a much more concrete signification.

Of the various hypotheses that maintain an adoption of the name from some foreign nation, that which

112. Supposed foreign origin. derives it from the cultus of the Kenites has still the greatest claim to mention (so Tiele, years ago; most recently in his *Gesch. der Rel. im Altertum*, 1299; St. *GVV*, 1887, 130 ff.; cp Che. *EB*¹⁰ 5 [1876] 790). At Sinai Yahwē revealed himself to Moses and then to the whole people; whence Sinai was—what it long continued to be; cp, e.g., 1 K. 198 ff.—the proper seat of Yahwē. According to the oldest tradition the Sinai district was inhabited by the Kenites (cp KENITES, MOSES, § 14). That indeed the name Yahwē was then revealed to Moses and through him to the people is expressly asserted only by the youngest Pentateuch source (P).² E does not say this expressly, and according to J Yahwē was in use from the beginning as the name of the god of the patriarchs; even the interpolated Gen. 4:26 carries it back as far as Enoch. It is, in fact, hardly conceivable that Moses should have been able to proclaim a god that was simply unknown, a new god, as 'god of the fathers.' Great uncertainty, however, attaches on the other hand to the hypotheses of the occurrence of the related forms *Yahu* (*Yau*) and *Ya* in Assyrio-Babylonian or Canaanitish proper names.³

¹ The MS known as the *Græcus Venetus* finely renders יהוה by inventing the substantive ὁ δὲ ὄντων—i.e., 'probably 'the really existing one'; hardly, as Lag. (*Übers.* 138), comparing δουλῶω, supposes, with a causative signification, to indicate יהוה as a Hiph'il.

² When P nevertheless gives Jochebed (יֹכֶבֶד, Ex. 6:20) as the name of Moses' mother, we must suppose this to be a name substituted by a later editor for what P originally wrote. Others take the name Jšched as an indication that Yahwē was originally the God of Moses' family or his tribe. But cp JACOB, § 1; JOCHEBED.

³ In support of a Canaanitish *Jahu* the following cases have been cited:—the place-names mentioned by W. M. Müller (*As. u. Eur.* 162 312 f.)—viz., from the list of Thotmes III., *Ba-ti-y'-ā* (בְּתִיַּיָּא), and from that of Šošenq, *Ba-bi-y'-ā*, *Sa-na-y'-ā*, and *Ha-ni-ni'-ā*—all equally doubtful; *Yaub'di*, the name of a king of Hamath, also written *Iub'di*; so Schr. *KAT*², 23 ff., and Wi. *GI* 36 ff., who has also proved *Ariyau* of *Yaudi* (according to Schrader, Azariah of Judah) to be the name of a N. Syrian king (*AOFL* 13); but cp also Jastrow, 'Iub'di and the supposed *Jaub'di*,' *ZA*, 1895, p. 222 ff. The names adduced by Pinches, 'Ya and Jawa in Assyrio-Babylonian inscriptions,' *PSBA* 151 pp. 1-13 (cp also Jäger, *Beitr. zur Assyr.* 1452 ff.; Grimme, *Grundzüge*, etc., 145; Hommel, *AHT* 115, and *Exp. T* 10 42 48 144; Sayce, *ib.* 9 522; [against Hommel] König, 'the origin of the name יהוה, *ib.* 10 189 ff.), must for the present, on account of the uncertainty attending the explanation, and often the reading as well, be left out of account. Against the proposal of Frd. Del. (*Par.* 158 ff.) to derive a form *Jahu*, common to all Canaanites, from an Accadian *Ja-u*, transformed by the Hebrew priests into יהוה, so as to render possible its derivation from יהוה, 'to be,' cp Philippi, *Z. f. Völkerpsych.* u.

Ex. 314 being left out of account, 'Yahwè' has been explained variously.¹

(a) As *nomen imperfecti* *ḥal* of הָרַח, 'to fall,' either in the sense of 'rushing, crashing down' (Klo. *Gl* 79),

or in that of 'falling (from heaven),' as being originally the name of one of the objects (see MASSEBAH, § 1 d) called

113. Modern etymological explanations. *Baityl* (so, along with other possible explanations, Lag. *Orientalia*, 227 ff.).

(b) As a *nomen imperfecti* *ḥal* of הָרַח, 'to blow' (cp Arabic *hawā(y)*, 'to blow,' *hawā'iy*, 'air, breeze'), 'the Blower,'² as a name for the storm-god, analogous to the Assyrian Ramman.

(c) As a *nomen imperfecti* *Hiph'il* of הָרַח, either as 'he who makes to be, calls into existence,' the Creator,³ or, following (7), as 'he who makes to fall, who smites with lightning,'⁴ and so, as before, the storm-god.

A *Hiph'il* (or a causative form analogous to the Hebrew *Hiph'il*), however, from הָרַח (or הָרַח) cannot be produced, apart from late Syriac formations, in any Semitic dialect, and the signification 'fall' occurs in Hebrew only in the imperative הָרַח, Job 376 (where Siegfried, *SBOT*, reads הָרַח); and for the meaning 'blow' recourse must be had to Arabic; whilst the interpretation of Yahwè as creator would ill agree with Hebrew usage, which employs the name Yahwè chiefly with reference to revelations of God to his people, or the conduct of the people towards their national god, whereas the cosmic working of God is connected with other divine names.

It is not to be denied that הָרַח may have had originally another much more concrete signification than that given in Ex. 314. Nevertheless it seems precarious to suppose that while Hebrew was still a living language, the people should have been so completely deluded as to the meaning of the most important and sacred name. The objection that Ex. 314 rests on a piece of too subtle metaphysical speculation, falls so soon as we cease to force into it the abstract conception of 'self-existence,'⁵ and content ourselves with the great religious idea of the living God who does not change in his actions.

Of originally appellative names by far the commonest (2570 times) is *ēlōhīm* (אֱלֹהִים), the regular plural of

114. Elōhīm: *ēlōh* (אֱלֹהִים). God, which (if we allow for the modification of *ā* to *ō*) corresponds to the more original Arabic *ilāh* (Aramaic אֱלָהָא). Of the fifty-seven

Sprachwiss., 1882, pp. 175 ff.; Tiele, *Th.T.*, 1882, pp. 262 ff.; Kue. *Hibbert Lectures*, 308 ff. Moreover, according to Winckler (*Gl* 136 ff.), הָרַח, with the meaning of 'Lord of eternal being,' is to be regarded as a spiritualising of the quite independent and distinct popular form *Jahu*.

¹ Cp especially Driver, 'Recent theories on the origin and nature of the Tetragrammaton,' *Stud. Bibl.* 1; T. P. Valetan, 'De Israelitische Godsnaam,' *Theol. Stud.*, May 1889.

² So Wellh. *IJG*(2), 25, n. 1, (4) 26 n. 1: 'The etymology is quite obvious; he rides through the air, he blows.'

³ So already Jn. Clericus (1696) on Ex. 6:3; Schr., since 1862, and in Schenkel's *Bib.-lex.* 3:167 ff. (cp, however, also *KAT*(2) 25); Lag. *ZDMG* 22:331, and most recently in *Übers.* 137 ff. (= 'he who calls into being what he has promised'). The equating of הָרַח and הָרַח, so as to obtain the meaning, 'the Vivifier, distributor of life,' must be rejected, for the interchange of ה and ח at the beginning of a Semitic word is unheard of.

⁴ So Lag. *Orientalia*, 229 (alongside of the explanation as imperf. *ḥal*), and, doubtfully, Stade, *GP* 1429. According to G. Margoliouth (*PSBA*, 1895, p. 57 ff.), הָרַח is 'one who sends down things from heaven.'

⁵ So, e.g., Di. (*Gen.*, 1887, p. 74): 'he who exists absolutely and lives in himself'; Schultz, *Attest. Theol.*(6), 387, 'the immutable, self-centred existence; the absolute personality.' Deserving of mention, also, is the hypothesis of G. H. Skipwith ('The Tetragrammaton,' *JQR* 10:662 ff.), according to which הָרַח, 'he will be,' is the elliptic form of the invocation of the ancient Israelite warrior-god, to be completed by אֱלֹהִים and אֱלֹהִים —i.e., 'God will be with us.' The *Untersuchungen über den Namen Jehova* of B. Steinführer (1898), and W. Spiegelberg's *eine Vermutung über den Ursprung des Namens יהוה* (from an Egyptian word for 'cattle', *ZDMG*, 1899, p. 633 ff., are quite valueless.

places where the singular (אֱלֹהִים) occurs, forty-one belong to the Book of Job, and the rest (apart from the Kt. of 2 K. 17:31) either to poetic passages or to late prose. It can hardly be doubted, accordingly, that the singular (אֱלֹהִים) is only an artificial restoration based on the plural (אֱלֹהִים).¹

The plural serves sometimes to denote the heathen gods (Ex. 9:12, 20:3 etc.) or images of gods (Ex. 20:23 etc.), but mostly to denote a single god (or image of a god—e.g., Ex. 32:1, most probably also Gen. 31:30, 32), whether a heathen deity (e.g., 1 S. 5:7, of Dagon; 1 K. 11:5, even of a female deity—for Hebrew never had a word for goddess) or the God of Israel.² In numberless places—especially with the addition of the article—אֱלֹהִים (i.e., like *ō theós* in the NT, the well-known, true God) is a sort of proper name and equivalent for Yahwè. The usage of the language gives no support to the supposition that we have in the plural form *ēlōhīm*, as applied to the god of Israel, the remains of an early polytheism,³ or at least a combination with the higher spiritual beings (the 'son of God' or 'sons of the gods'—i.e., according to Heb. usage, simply beings belonging to the class of Elohīm, Gen. 6:24, Job 16:21, 38:7, cp Ps. 29:1, 89:7 [6]). Rather must we hold to the explanation of the plural as one of majesty and rank (a variety of abstract plural expressing a combination of the several characteristics inherent in the conception).⁴

There is much difference of opinion as to the etymology, and therefore the proper signification, of the word *Elohīm*. A verbal stem, אֱלָהָא,

115. Etymology. of which one would naturally think first of all, is not known in Hebrew; and the Arabic 'alaha, 'to worship God,' is obviously a denominative from the substantive 'ilāh, 'God.' On the other hand, the derivation from the Arabic 'alīha, with medial *i* (according to Arabic scholars an old Bedouin word meaning 'to be filled with dread, be perplexed,' and so 'anxiously to seek refuge'), seemed enticing. 'ilāh (אֱלֹהִים) would thus mean in the first place 'dread,' then the object of the dread with whom one nevertheless seeks refuge.⁵

Support for this view has been found in particular in several allusions in the OT itself to the supposed proper meaning of the word, since in Gen. 31:42, 53 God is called 'the fear' (פַּחַד) of Isaac, and in Is. 8:13, Ps. 70:12 [11], 'the object of fear' (פַּחַד). The state of the problem is this. If 'alīha, along with the cognate *walīha*, 'to fear,' is really an independent verbal stem, the above explanation has a greater claim to consideration than any other. Possibly, however, 'alīha itself, along with *walīha*, is only a denominative from 'ilāh, and signifies originally 'possessed of God' (cp *ἐνδοθεῖς*, *δαμονῶν*), as the Arabic *ba'ila* means 'to be possessed of Ba'.'⁶ In this case, naturally, Fleischer's explanation would be futile.

¹ According to Baethg. (*Beitr.* 297) the poetic author of Dt. 32 is to be regarded as the inventor of the sing. אֱלֹהִים.

² The use of אֱלֹהִים (1 S. 28:13) in the sense of supernatural being, ghost, is quite exceptional, and it is certainly an error to assert that אֱלֹהִים sometimes indicates judges or magistrates in general. In Ex. 21:6, 22:7 ff. [8, 7] 1 S. 2:25 אֱלֹהִים invariably means God, as witness of a lawsuit or dispenser of oracles. (We have clearly a relic of the last-mentioned usage in Ex. 4:16 [J?] and even in 7:1 [P?]). In Ex. 22:7, too, the parallelism shows that what is meant is the reviling of God as the giver of decisions on points of law. In Ps. 82:16, 97:7, 138:1, on the other hand, the אֱלֹהִים are, like the 'holy ones' of Ps. 89:6 [5, 7], the gods of the heathen, which, in later post-exilic times, fell to a lower rank (see ANGELS).

³ According to WRS (*AS*(2), 445), 'the Elohīm of a place originally meant all its sacred denizens, viewed collectively as an indeterminate sum of indistinguishable beings.'

⁴ On this point cp Ges. *Gram.*(2), §§ 124 g and 132 h. In the Phœnician inscriptions, too (cp G. Hoffmann, *Ueber einige phœn. Inschr.*, 1889, p. 17 ff.), אֱלִים (*ēlim*) indicates most probably the universal conception of divinity, אֱלֹהִים, on the contrary, the individual deity in the idol.

⁵ So especially the illustrious Arabist Fleischer (most lately in *Kleine Schriften*, 1:154 ff.) and after him Franz Del. (most recently in his *Genesis*, 1887, p. 48, where he explains אֱלֹהִים as 'awe or respect,' and then 'object of awe').

⁶ So Nöld. *ZDMG* 40:174, after We. *H'ikidi*, 356, n. 3 (*alīha* 'an-irragūli, 'the fear of God has made the man harmless').

There is just as little proof, however, for the view of Ewald, and after him Dillmann (on Gen. 1:1; also in *Handb. d. Altlichen Theol.*), that אֱלֹהִים means 'to be mighty,' and is to be regarded as a by-form of the stem אָלַה (אָלַ), from which אָל comes.

Nestle follows another course (*Theol. St. aus Würt.*, 1882, p. 243 ff.), explaining *ēlōhīm* as the plural, not of the late artificially revived form *ēlōh*, but of the sing. *ēl* (see next §).¹

Nestle supposes the plural to have arisen from *ēl* by the artificial insertion of a ה (*h*), like Heb. אֲחָהָי, maidens, from אָחָה, Arab. *‘abāhūt*, fathers, Syr. *‘smāhān*, names, etc. Nestle is thus able easily to explain how the older language had no singular for *ēlōhīm* but *ēl*, and no other plural for *ēl* but *ēlōhīm*. The explanation of this plural form would thus be dependent on that of the sing. *ēl* (see below). To Nestle's hypothesis, however, there is the objection² that at least the Arabic formations of this kind have a short *a* before the termination, whilst the long *ō* of *ēlōhīm* would represent a long *ā*; and above all, that all examples with inserted ה (if we ignore some secondary formations in Syriac) have the fem. ending. Moreover, were this hypothesis accepted, the Ar. *‘ilāh* and the Arab. *‘ilāh* would have, with Nestle, to be regarded as words borrowed directly or indirectly from the Hebrew.³

There is no less difference of opinion as to the explanation of *ēl*, 'God,' a word which appears as a divine name 217 times (73 in Ps., 55 in Job, and generally almost only in poetical passages, or at least in elevated prose), and just like *ēlōhīm* (see preceding col., n. 2) may denote either deities (אֱלֹהִים), e.g., in Ex. 15:11, etc., Ps. 58:1 [2] corrected text) which have come to be viewed as subordinate divinities, or the god of Israel. Sometimes it occurs with the article (yet also without it; so especially in Deutero-Isaiah, 40:18, etc.), like 'the *ēlōhīm*' (הָאֱלֹהִים) in the sense of the true God (e.g., Gen. 46:3), but specially often with some attribute or other, whether a noun (e.g., אֱלֹהֵי צְבָאוֹת, 'hero-god,' Is. 9:6) or an adjective as in אֱלֹהֵי חַיִּים, 'the living God,'⁴ אֱלֹהֵי עֵינָיִךְ (see below, § 118), 'God most high,' אֱלֹהֵי שָׁמַיִם (see below, § 117), 'God almighty (?),' or with a genitive, as אֱלֹהֵי בֵּתֶלְהַם, 'the God of Bethel'⁵ (Gen. 35:7), אֱלֹהֵי עֵדֵיכֶם, 'the god of antiquity' (Gen. 21:33), or finally with a noun in apposition—e.g., Gen. 46:3; cp also 33:20 where Jacob calls the *massēbāh* (for in view of which we must read thus, not מִזְבֵּחַךְ, 'altar') that he erected 'ēl, god of Israel.' Very frequent is the occurrence of *ēl* (never אֱלֹהִים or אֱלֹהִים) as first or second member in proper names—e.g., אֱלֹהֵי יִשְׂרָאֵל, אֱלֹהֵי יִשְׂרָאֵל, אֱלֹהֵי יִשְׂרָאֵל, etc. (see above, § 25).

Against the derivation of the substantive *ēl* (אֱל) from אָל 'to be strong,' with the meaning 'the strong one,' a derivation at one time common and in itself satisfactory,⁶ objections have been raised. The most that

The other example from *Lieder der Hudhail* (ed. We. 123), no. 278, l. 3, is less certain.

¹ Conversely, Ewald had already explained אֱל as abbreviated from אֱלֹהִים (אֱלֹהִים); *Lehre der Bibel von Gott*, 2 382 ff.

² Cp Nöld. *SBAW*, 1882, p. 1180.

³ Cp the detailed refutation of this theory by Nöld. (*SBAW*, 1882, pp. 1183 ff.), according to whom both *ēl* and *ilāh* were already in existence side by side before the parting of the Semitic nations. Cp also Ed. Meyer, 'El' in Roscher's *Lex. d. griech. u. röm. Mythol.* 1223 ff.; Baethgen, too, shows (*Beitr.* 271, and in the excursus, 297 ff.) that it is at best but traces of the form *il* (*ēl*) that are to be found in the various Semitic tribes and peoples, whilst *ilāh* is quite wanting in some languages. On the other hand, *il* has in some cases become quite unfamiliar in the living language; in others it is passing out of use, its place being taken by *ilāh*. It is only in personal names that *il* has established itself in all Semitic languages, either alone as in some of them, or alongside of *ilāh* as in others.

⁴ Cp *El roi*, Gen. 16:13 RVmg. (אֱלֹהֵי רֹאִי); see ISAAC, § 2.

⁵ On this usage of *ēl*, perhaps the oldest, where it originally denoted the local divinity (afterwards identified with Yahwē) of the several places of worship, cp Stade, *GVV* 1 428.

⁶ Wellhausen says (*Skizzen*, 3 169): 'the true content of the conception "God" amongst the Semites generally is that of lord-

can be cited in the way of evidence for such a use of the substantive *ēl* is the expression אֱלֹהֵי יָדִי, 'it is in the power of my hand' (Gen. 31:29 and elsewhere). It has been urged too, especially by Lagarde (*Mitteilungen*, 1884, pp. 96 ff.), that the derivation of this particular name from a neuter verbal stem is unthinkable (cp, however, also יָצַן, 'scoffer'; שָׂדֵי, 'Demon'). Above all it is objected that a participle or verbal noun from אָל (or אָלַ) would of necessity have an unchangeable *ē*,¹ whereas forms like *Elhānān* (אֱלְחָנָן), *Elimēlek* (אֱלִמְלֵךְ) and many others would argue for the *ē* being simply a prolongation of an original *i*. The last objection would apply also to Nöldke's² derivation from אָל, 'to be in front.' Dillmann (on Gen. 1:1) and Lagarde³ derive אָל from אָלַה (or אָלַ); but for the meaning, assumed by Dillmann, 'to be mighty,' no authority can be found, and Lagarde's connection of *ēl* with the preposition (אֶל) 'to,' is open to serious question. (See NATURE-WORSHIP, § 2.)

Lagarde maintains that *ēl* denotes: him 'after whom one strives,' 'who is the goal of all human aspiration and endeavour' (according to *Deutsche Schriften*, 222, the 'aim' or 'goal'), or (1888) 'to whom one has recourse in distress or when one is in need of guidance' (*Übers.* 170: 'to whom one attaches oneself closely'). Such an origin for the name would be no doubt conceivable on the basis of pure and strict monotheism; it is, however, inconceivable if *ilāh*, originally served to denote any god whatever,⁴ and even a demon or local divinity.

We are no nearer a solution in the case of the divine name *šaddai*, אֱלֹהֵי שָׁדַי. Whilst it occurs six times⁵ as an

attribute of אָל, it occurs as an independent divine name 39 times, of which 31 belong to the poetical parts of Job (since here, as is well known, Yahwē is avoided and its place taken by other names). According to Ex. 6:3 (P) it was by the name *ēl šaddai* (not Yahwē) that God revealed himself to the patriarchs. It is in agreement with this that four of the six Genesis passages belong certainly to P (along with the three personal names compounded with אֱלֹהֵי), whilst, as Ⓞ shows, *šaddai* in Gen. 43:14 is a Redactor's interpolation into the text of E. The only pre-exilic testimony for *šaddai* is therefore Gen. 49:25 Nu. 24:16.

It is incorrect to appeal in support of the common explanation 'Almighty' to the Arabic root *šadda*, 'to be firm, strong,' for the Hebrew equivalent for this would be not שָׁדַד (šdd) but שָׁדַד (šdd). Nor is much weight to be laid on Ⓞ's rendering *šaddai* by 'Almighty' (παντοκράτωρ). This occurs only in the book of Job, and there only in 15 out of 31 places, whilst in the Pentateuch *šaddai* is simply rendered by a pronoun (μου, σου, ὁ ἐμός) or passed over altogether.⁶ Judged by its form, *šaddai* could only be a derivative

ship. With this it agrees that Yahwē is also called in Is. 6:5 and elsewhere 'the king,' and that in Ethiopic the *pluralis majestatis amīlāk* has become a sort of proper name for God.

¹ Yet Nöldke still in 1882 decided (*SBAW*, 1882, p. 1188) that אָל has probably an originally long vowel. As a matter of fact the punctuation of the Massora (in אֱלֹהֵי, etc., alongside of אֱלֹהֵי) may be founded on an error. Whether the Babylonian *ilu*, 'God' (but never as the name of a defined god; cp on this point Jensen, *Kosmog. der Bab.* 116), can be cited in support of the original shortness of the vowel in אָל, must be left an open question. Lagarde (*Übers.* 131 f.) regards the Assyrian form *Šir-la-īl*—'Israelite' as sufficient proof.

² *SBAW*, 1880, p. 760 ff., less definitely 1882, p. 1175 ff.

³ *Symnica*, 2 (300), 101 ff.; *Orientalia*, 2 (1880), 10 ff.; *Mitteilungen*, 1 94 ff.; *ibid.* 2 231 f. 2 27 f. 183 (1881-86); at length (most recently) in *Übers.* 159 ff. According to p. 167 the derivation of אָל from the preposition אֶל was proposed as long ago as by Josue de la Place (11655).

⁴ According to Lagarde, it is true, אָל was not a native word amongst the Arabs, Idumæans, etc., but only a loan-word from the Jews (cp, however, above n. 3).

⁵ Five times in Gen. (for we must certainly read אֱלֹהֵי שָׁדַי for שָׁדַי אֱלֹהֵי in Gen. 49:25) and in Ex. 6:3.

⁶ In Ezek. 10:5, probably an interpolated verse, Ⓞ retains the form *šaddai*. This, however, by no means furnishes any real evidence for the originality of the pronunciation שָׁדַי.

NAMES

of the form שרר with the suffix *ay*.¹ But this root means only 'lay waste, destroy,' and it is surely inconceivable that, for example, in the oldest passage (Gen. 49²⁵), *el šaddai* designates God as the devastator or destroyer. Moreover, the pronunciation *šaddai* is perhaps purely artificial, intended to embody the explanation שְׂרָר (ש-י) = 'what (or who) is sufficient.' It is only thus we can explain the remarkable rendering (*ὁ ἰκανός*; cp *ἰκανωθήναι* [=רר] in Mal. 3¹⁰) of ש in Job 21¹⁵ 31² 40² Ruth 1²⁰ f. of ש in Ezek. 1²⁴ and of Aquila, Symmachus and Theodotion (also R. Ishaki on Ex. 6³). To derive the name from a root שרר would require the pronunciation *šaddāi* (שְׂרָי), the so-called *nomen officis*. But there is no such root in Hebrew, though according to Frd. Delitzsch (*Prolog.* 1896) there is a root *šadū* 'to be high' in Assyrian.² See SHADDAI.

Like *šaddai*, the title 'Elyōn (עֲלִיּוֹן), 'the Almighty,' appears sometimes in connection with *Ēl* (Gen. 14¹⁸⁻²⁰ and in apposition with Yahwè in v. 22 ;

118. Elyōn. Ps. 78³⁵) or Yahwè (Ps. 7¹⁸ [17]; in 57³ [2] 78⁵⁶, too, Elōhim has been substituted by a Redactor, as elsewhere in Ps. 42-84 for Yahwè: see PSALMS, § 7), sometimes standing alone (Nu. 24¹⁶ Dt. 32⁸ Ps. 21⁸ [7] 46⁵ [4] 77¹¹ [10], etc.; as a vocative 93 [2]). That when it stands alone 'elyōn was felt to be a proper noun is clear from its never having the article even after prepositions; cp, e.g., Ps. 73¹¹ Is. 14¹⁴ Ps. 50¹⁴. With this agrees the testimony of Philo Byblius (Eus. *Præp. evang.* 1¹⁰) that among the Phoenicians 'Ελυόν was in use as a name for God. This is the simplest explanation of the fact that in the single early passage where 'Elyōn occurs (Nu. 24¹⁶) it is put in the mouth of a foreigner, whilst the employment of the word as an Israelite name for God belongs almost exclusively to post-exilic usage.

Another word, occurring as a sort of proper noun 130 (or according to the Massora 134) times, not as Kr. for Yahwè (see above note 1) but as Ktb., is (ארני, i.e.) according to MT *Ādonāi* (אֲדֹנָי) but probably originally *Ādōni* (אֲדֹנִי) 'my lord.'³ *Ādōn* (אֲדֹן) without suffix is used only in Ps. 114⁷, of God; and 'the *Ādōn* (אֲדֹנִי) in Mal. 3¹, and, in connection with other divine names, in Ex. 23¹⁷ 34²³ and five times in Is. (1²⁴ 3¹, etc.).

Of other terms indicative of lordship Baal (בעל) 'priest, lord' (with the article הבעל) was also in ancient

120. Baal. times used without hesitation as a designation for the god of Israel. This is proved by a series of proper names compounded with 'Baal,' in the bestowal of which not the heathen Baal

¹ So Baethgen (*Beitr.*, etc., 294) who appeals to Palmyrene and other parallels. He maintains that ש can be explained only as an Aramaism, an Aramaism that the Hebrews brought with them from their Aramaean home.

² Nöldeke (*SBAW*, 1880, p. 773; *ZDMG* 42 480) conjectured that ש or (on the analogy of אֲדֹנִי) שְׂרָי, 'my lord' was the original pronunciation. Cp G. Hoffmann, *Phön. Inschr.* 53-55. But what explanation could then be given of ש לא in the mouth of God (Gen. 49²⁵ Ex. 6³)? Cp SHADDAI.

³ As Dalman has shown (*Der Gottesname Adonai u. seine Gesch.*), it is simply by Rabbinic arbitrariness, not yet known to the Talmud, that we have the form (אֲדֹנָי) with long *ā* (commonly supposed to be a means of distinction from the ordinary profane form [אֲדֹנִי] 'my lords'; but supposed by Nestle *ZATW*, 1896, p. 325, to be a reaction of the *ā* of הֲדֹנִי, such a form as יהוה being impossible; and by Lagarde, *Übers.* 188, to be an Aramaism, related to the Old Palestinian אֲדֹנִי like Syriac *malikāy*, 'kingly' to *melek*) or even a plural suffix at all (in connection with the plural of majesty אֲדֹנָיִם). For with the suffix of the first person sing. elsewhere only the sing. אֲדֹנִי is found, and from this form the divine name had to be distinguished. The common assertion that the suffix in אֲדֹנִי is often, as in *monsieur, madame*, etc., quite meaningless, is corrected by Dalman by the observation that outside of the Book of Daniel and eight critically doubtful passages, the suffix is never quite meaningless. (Cp excursus on Adonai, *Che. O.Ps.* 299-303.)

NAMES

but Yahwè was certainly thought of.¹ See JERUBBAAL, ISHBAAL, MERIBAAL, BEELIADA (forms retained in Ch.), but in the earlier books deliberately corrupted by the substitution of El or Bōsheth.² See, however, MEPHIBOSHETH.

The title 'Ābir of Jacob' (אָבִיר יַעֲקֹב) 'the Strong One of Jacob (i.e., he whom Jacob must acknowledge and honour as the Strong One; cp קָדוֹשׁ יִשְׂרָאֵל

121. Abir. in all parts of the Book of Isaiah—i.e., he whom Israel ought to treat as the Holy One), Gen. 49²⁴ and four other times (cp Is. 1²⁴ יִשְׂרָאֵל אָבִיר), occurs only in poetical writing. Since no adjective *ābir* (אָבִיר) is known, it is probable that we should read *abbir* (אָבִיר), but with the same meaning, 'the Strong One of Jacob,' not 'the Bull of Jacob' as by itself it might mean. Isaiah would certainly not have employed the expression had it contained for him any reminiscence of steer-worship. On the other hand it is very probable that *ābir* (אָבִיר) is so written in order to avoid the likeness to *abbir* (אָבִיר) 'bull.'

Another term used only in poetry as a kind of divine name is *šar* (שָׂר), 'Rock.'³ It occurs attached to a genitive (צוּר יִשְׂרָאֵל, 2 S. 23³ Is. 30²⁹) or with

122. Rock. a suffix (e.g., Dt. 32³⁰; in v. 31 also of a heathen deity), and also alone—e.g., in Dt. 32⁴¹—even as a vocative, parallel with Yahwè, Hab. 1¹² (if the text is sound). On the other hand it is very questionable whether in the plainly very corrupt text of Gen. 49²⁴ אָבִיר יִשְׂרָאֵל, 'the stone of Israel' is to be taken (like צוּר) as a name for God.

Special fulness is required in discussing, finally, the combination of Yahwè or Elōhim with the genitive *šēbāōth* (שְׁבָאוֹת) 'hosts,' from which

123. Šēbāōth. sprang a much used name for God.⁴

The original appellative signification of *šēbāōth* appears still quite plainly in the full formula 'Yahwè the god of the hosts' (יהוה אֱלֹהֵי הַשְּׁבָאוֹת, with the article), Hos. 12⁶ [5] Am. 3¹³ 6¹⁴; according to ש originally also 9⁵. Much more common is the form ('אֱלֹהֵי שְׁבָאוֹת) without article, and commonest of all 'Yahwè of hosts' ('אֱלֹהֵי שְׁבָאוֹת).⁵ Frequently, too, *šēbāōth* is prefixed to this (probably in most cases an interpolation to supply the place of the original Yahwè, on which cp above § 109, note 4), sometimes also יהוה אֱלֹהֵי הַשְּׁבָאוֹת, 'the lord' (Is. 1²⁴ 19⁴, to which, according to ש, 10¹⁶ is to be added).

Of the 282 places where the genitive *šēbāōth* occurs, no less than 246 are in the prophets (55 in 1 S., 81 in Jer.), and even the five that occur in Kings are in speeches of prophets. It nowhere appears in the Pentateuch.⁶ Josh., Judg., Ezek., Joel, Obad., or (apart from Ps. 24¹⁰ and 15 places in the 2nd and 3rd Books of Psalms and 3 in Ch. taken from 1 S.) the whole Hagiographa.

¹ In 2 S. 5²⁰ we have a place-name (BAAL-PERAZIM) containing Baal governing a genitive (cp below, § 123), although it is Yahwè that is meant.

² In 2 S. 11²¹ we find the form Jerubhesheth = Jerubhaal.

³ Cp especially A. Wiegand, *ZATW* 10 85 f. The employment of שָׂר in the proper name Pedazur (פִּדְדָזוּר): Nu. 2²⁰ and elsewhere) specially favours its being a genuine divine name. (On the difficult problems involved see ZUR, NAMES IN.)
⁴ Cp Kautzsch, 'Zebaoth' in *PRE* 17 423 ff. and *ZATW* 6 17 ff.; Löhr, 'Jahve Zebaoth' in *Untersuchungen zum B. Amos* (1901), 37 ff. (with a thorough statement of the usage of שָׂר).

⁵ Cp on this abbreviation Gesen. *Gram.* 26, § 125 h. For the grammatically impossible combination '(Yahwè) god, hosts' (אֱלֹהֵי יְהוָה or אֱלֹהֵי יְהוָה) in Ps. 59⁶ [5] and elsewhere (for the last time 84⁹ [8]) we must everywhere read 'Yahwè of hosts.' Elōhim ('god') was substituted for Yahwè throughout the 2nd and 3rd Books of Psalms by some redactor without regard to Syntax; but then the original Yahwè was in some cases also retained in the text. Cp PSALMS, § 7.

⁶ The theory of Klostermann (*Gesch. Isr.* 76) is worthy of notice. He thinks that the name was really removed from the Pentateuch by a redactor just as in Josh. 3¹¹ 13⁴ 7, instead of 'the ark of the lord of all the earth,' there must clearly originally have stood 'the ark of Yahwè of hosts.'

The old dispute whether the title Yahwē Šēbāōth designates Yahwē as God of the earthly (Israelite) or of the heavenly hosts (angels or stars or both) may be decided in this way—viz., that šēbāōth denotes in the first place the earthly hosts, the hosts of Israel fighting under the leadership of Yahwē. Apart from this divine name, šēbāōth in the plural never means anything but armies of men,¹ and indeed almost always Israelite armies, whether at the Exodus (Ex. 6:26, etc., cp especially 7:4 and 12:41) or later (Dt. 20:9, etc.), and so also Ps. 44:10 [9] 108:12 [11]), only in Jer. 3:19 Ps. 68:13 [12] heathen armies. The heavenly host on the other hand is without exception² designated by the singular (שָׁבָא).

The above interpretation of Yahwē Šēbāōth is favoured moreover by 1 S. 17:45 where 'the God of the ranks of Israel' is plainly intended as an interpretation of Yahwē Šēbāōth—an interpretation not superfluous for a Philistine—and above all by the fact that of the 11 occurrences of Yahwē Šēbāōth in the book of Samuel, 5 (1 S. 13:11 4:4 2 S. 6:218) are directly or indirectly connected with the ark, and 3 others (1 S. 15:2 17:45 2 S. 5:10) with military transactions. The sacred ark is, according to the earliest references (cp especially Nu. 10:35f. 14:41f. Josh. 6:4f. 1 S. 4:3ff. and 4:21f. 2 S. 11:11), the symbol, nay the pledge, of the presence of Yahwē as the god of war, the proper leader of Israel; and in 1 S. 3:4 and especially 2 S. 6:2 the name Yahwē Šēbāōth is expressly connected with the sacred ark. The idea that the appositional phrase 'who is enthroned above the cherubim' here designates Yahwē as leader of the heavenly hosts, appears to us to be quite excluded by 1 S. 17:45 (see above). On the other hand it cannot be denied that even in the earliest prophetic passages there is hardly a trace to be seen of this original meaning. Nay, we may assume that Isaiah, e.g., would not have used the name so often, had its connection with the former markedly naturalistic representation of the sacred ark been expressly before his mind. On the contrary, the admission of the word into the prophetic vocabulary must have been preceded by its transference from the earthly to the heavenly hosts. At the same time it can never be determined with certainty whether šēbāōth denotes the angels³ or the stars or both.⁴ What is clear with regard to prophetic usage is that with Yahwē Šēbāōth is associated the thought of supermundane power and majesty. It is very significant in this connection that Yahwē Šēbāōth is parallel with 'the holy (one)' (הַקְדוֹשׁ) in Is. 5:16, and with 'the holy (one) of Israel' (קְדוֹשׁ יִשְׂרָאֵל) in v. 24, whilst in Is. 6:3 it has 'holy' (קְדוֹשׁ) for its predicate. 'The Holy' (הַקְדוֹשׁ), however, in Is. likewise means exalted above everything earthly. The most probable conclusion is that in prophetic usage Yahwē Šēbāōth—agreeably to its original meaning—suggested in the first place the angelic hosts of war, but that finally the thought of the starry host, as the grandest proof of divine omnipotence and infinity, prevailed. ☉ appears to attach a still more general meaning to Yahwē Šēbāōth, when it renders it, as it often does,⁵ by 'Lord of the powers

¹ Against this view Borchert plausibly objects (*St. Kr.*, 1896, p. 619ff.), that all the places where šēbāōth is used of hosts of men belong to the later or even the very latest literature, and that, besides, šēbāōth in P means not fighting hosts but the masses of the Israelitish people, whilst for the former the sing. šābā is used. But we really know no other usage, apart from the divine title, and the angelic host is called in Josh. 5:14f. 1 K. 22:19 Is. 24:21 šābā in the sing. Certainly P regards the masses of the people as fighting hosts (see Nu. 2).

² In Ps. 103:21 148:2 for 'his hosts' (שָׁבָאֵי) which the Massora thought necessary on account of the preceding imperative plural, read 'his host' (שָׁבָא): the language knows no plural שָׁבָאֵי.

³ So most recently Borchert explicitly (*op. cit.* 633ff.).

⁴ According to Smend (*Alltest. Rel.-gesch.* [2], 200), indeed, the meaning 'lord of all the forces of the world' is to be regarded as the original. [Wellhausen thinks of the *δαίμονες* (דַּיְמוֹנִים) who were attached to different localities, but were all subject to Yahwē.]

⁵ In 1 S. and almost invariably in Is. (hence it appears also

or forces' (κύριος τῶν δυνάμεων),¹ or even by 'the Almighty God' (ὁ θεὸς ὁ παντοκράτωρ), or 'Lord Almighty' (κύριος παντοκράτωρ). That Yahwē Šēbāōth early came to be felt to be a single proper name, is shown by the invariable dropping of the article (except in Hos. 12:6 [5] Am. 8:13 6:14 9:5) and the almost equally invariable dropping of the governing noun (יהוה).

The transition to the divine names of the NT is effected by the title *ab.* 'Father.' This name cannot, however, claim in the OT anything

124. Father. like the wealth of meaning that belongs to it in the invocation of the 'Lord's prayer,' and in countless other passages in the NT. Just as in the OT (apart from the theocratic king, Ps. 27; cp 2 S. 7:14) it is not the individual Israelite but the whole people that is called 'son (or sons)' of God (Ex. 4:22f. Is. 1:2 Hos. 11:1, etc.), so also God is called 'father' not of the individual Israelites but of the whole people. Moreover, the context of such passages as Dt. 32:6 Is. 64:7 [8] Jer. 31:9 Mal. 1:6 2:10 shows that in the name 'father' what is chiefly thought of is the formation of the nation—i.e., its elevation to its historical position. Only in Is. 63:16 is there at the same time an allusion to the redemptive acts of Yahwē, to his fatherly care for his people, whilst in Jer. 3:4 19 'father' is used as a sort of name of endearment. The only reference to an individual relation is to be found in 2 S. 7:14 (see above; and cp Ps. 89:27 [26], likewise with reference to the theocratic king). The thought of the inexhaustible fatherly compassion which is the significant idea in the name father in the NT appears in the OT only in Ps. 68:6 [5] and 103:13, and in both places merely by way of simile.

ii. *Text.*—This important part of the subject has never been systematically treated, and as a rule is neglected or indifferently handled in commentaries; it receives much attention in many of the individual articles in this work: see also Lists and Notes in *HPN*, pp. 277-313, and Gray's article in *JQR*, 1901, pp. 375-391; Smend, *Die Listen d. BB. Esra u. Neh.* (1881); Marquart, *Fund.* (1896), pp. 10-26. On the prefixes יהי and יי see Bonk, *ZATW* 11 125-156.

iii. *Interpretation and usage.*—Lagarde, *OS* (including Jerome's *Liber interpretationis hebr. nominum*); M. Hiller, *Onomasticum Sacrum* (c. 1000 pp.; Tübingen 1706); Nestle, *Eig.* (1876); Gray, *Studies in Hebr. Proper Names* (1896); Kerber, *Die religionsgeschichtliche Bedeutung der heb. Eigennamen* (1897). For later Jewish names, see *Zur. Namen der Juden* (1837) reprinted in *Gesammelte Schriften*, 2:1-82 and H. P. Chajes, *Beiträge zur Nordseu. Onomatologie* (1900). For discussions of details, the reader may consult the separate special articles in the present work, not neglecting the references;² and the works of Nestle and Gray. Here it may suffice to mention one or two of the more important discussions in periodicals (chiefly *JQR*, *JR-AS*, *JBLit.* and especially *ZDMG*, *ZATW*) prior to the latest of these publications and to some subsequent contributions

in Rom. 9:29 Jas. 5:4 ☉ retains κύριος Σαβαώθ. It occurs for the first time absolutely as a proper name (i.e., ignoring its dependence as properly a genitive) in the Sibyl (1:304). In the so-called Ophite Gnosis, Sabaoth is one of the emanations from the world fashioner, Jaldabaoth.

¹ In the other Greek versions it is κύριος τῶν στρατιῶν—in what sense is doubtful, but perhaps looking back to the στρατιὰ τοῦ οὐρανοῦ of ☉.

² [It is hoped that when the present work is finished, the reader will have before him a more complete and up-to-date survey both of the material at our disposal for solving the problems of names and of the possible solutions of those problems than can be found elsewhere, mainly through the co-operation of scholars of different sections of the critical school. The greatest difficulty has been the backwardness of textual criticism (see TEXT AND VERSIONS), which has inevitably affected all the current treatises hearing on names. The thorough criticism to which in this work the text has been subjected has often led to the adoption of new views of some importance, which, with all deductions for possible errors, justify the editors in claiming that here, as elsewhere, they have been able to carry the subject at any rate 'a little beyond the point hitherto reached in print' (Preface to vol. i., p. 11).—E.D.]

NANEA

on the subjects:—W. R. Smith in *JPhil.* 975-100 and Jacobs, *Studies in Bibl. Arch.* (1894) chaps. 4-5 (Animal and Plant Names): Nuldeke in *ZDMG* 836, pp. 148-157; 1888, pp. 470-487; Renan, 'Des Noms theophores apocryphes, in *REJ* 5101 ff.; M. Jastrow in *JLil.* 1894, pp. 19 ff., 101-127; 1900, pp. 82-105 (on compounds with *bosheth*, *-yah*, and the name Samuel); Hommel *AHT*, and *Die Sud-arabischen Alterthümer* (1899) 21-27 (on Ammi); Gray's Criticism of Hommel's *AHT* in *Lxp.* 1892, 173-190. Specially important for the subject of place-names are Stade's article in *ZATW* 1885, pp. 175-185, and von Gall, *altisraelitische Kultstätten* (1898). Further, for the comparison of Hebrew with other Semitic names the following will be found specially valuable: Lidzbarski, *Handbuch d. Nordsem. Epigraphik*; the notes in *CIS*; *Del.*, *Prob.*; Hammer-Purgstall, *Ueber d. Namen d. Araber*, We. *Ar. Heid.* G. B. G.

iv. The literature on the names of God is embarrassingly large. On the name Yahweh may be mentioned *WRS Proph.* (1882), pp. 385 ff.; Wellh. *JG* 25; Dr. 'Recent Theories on the Origin and Nature of the Tetragrammaton, *Stud. Bib.* 1, pp. 1 ff.; Dalman, *Der Gottesname Adonai und seine Gesch.*, 1889; König, 'Die formell genet. Wechselbeziehung der beiden Wörter Jahve und Jahu, *ZATW* 177 ff.; Lag. *Psalterium juxta Hebraeos Hieronymi*, 1874; Or., 1879; *Übers.*, 1889; Baudissin, *Stud. zur sem. Rel.-gesch.* 1 (1876), pp. 181-254; Kuenen, *Godsd.* (1869), 1 398 (E.T. same reference); Lohr, *Untersuch. zum B. Amos*, 2nd app., 'Jahve Zebaoth (tables showing where this name, in different forms, occurs in OT, how *Q* translates, and on what occasions it is used); Giesebrecht, *Die Altliche Schätzung des Gottesnamens u. ihre religionsgesch. Grundl.*, 1901. Illustrative; *Del.*, *Par.* (1881); Pinches, *PSBA* 15 (1892), 13 ff.; Wl., *GT* 30 ff.; Hommel, *AHT* 102; and *Exp. Israel, *Abh.*, 97 ff.—On the other divine names El, Elohah, and Elohim, Elyon Shaddai, etc., see the references in §§ 108-124.

T. N. (§§ 1-86); G. B. G. (§§ 87-106, 125, i.-iii.); E. K. (§§ 107-124); T. K. C. (§ 125, iv.).

NANEA, RV *Nanæa* (ΝΑΝΑΙΑ [AV]; Syr. ܢܢܐܐ), the Græcised form of Nanâ or Nanai, a goddess worshipped in Elymais or Elam, in whose temple, according to 2 Macc. 13, Antiochus Epiphanes was 'by the deceit of Nanea's priests' (see MACCABEES, slain SECOND, § 7, col. 2876). In 1 Macc. 6:1-4, indeed, a different story is told, and the name of the deity whose temple Antiochus sought to plunder is not given. Polybius (311) and, following him, Josephus (*Ant.* xii. 91) give it as Artemis; Appian (*Syr.* 66) as Aphrodite. Nanâ, however, was a primeval Babylonian goddess—the only one of the great Sumerian (non-Semitic) goddesses who still retained her rank as 'lady of the temple Ê-anna' in her city of Uruk (Erech). Kudur-nanhundi, king of Elam, robbed Ê-anna of its lady's image (about 2280 B.C.), and it remained at Susa till AŠUR-BANI-PAL (*q.v.*) recovered it. This accounts for the permanence of the cultus of Nanâ in Elam. The Assyrians and Babylonians, however, did not forget the goddess. Tiglath-pileser III. sacrificed to her under the title of 'lady of Babylon,' after a victorious campaign against Babylonia (*KB* ii. 67). Originally distinct from Ištar (*Del. Par.* 222), she came to be regarded as a form of Ištar (cp ERECH), so that an identification with Artemis and Aphrodite lay close at hand. See ELYMAIS, PERSEPOLIS.

Two more references to Nanâ have been supposed in the OT. Lagarde introduced her name by a very arbitrary emendation into Is. 65:11 (see FORTUNE AND DESTINY), and many have regarded the obscure title ܢܢܐܐ ܢܢܐܐ, 'the delight of women,' as belonging to Nanâ (against which see Hevan, *Daniel*, 106).

For literature, cp *COT* 2 150 f., and add Maspero, *Dawn of Civ.* 665-674; Jastrow, *Rel. Lib. Ass.* 81, 85, 206. T. K. C.

NAOMI, better *Noōmi* (נְאוֹמִי, 'my sweetness,' § 79, iii. c; ΝΩΕΜΕΙΝ [B], ΝΩΕΜΜ, and A in 2 43 17 ΝΩΕΜΜΕΙ, ΝΟΟΜΜΕΙ[Ν] [A], ΝΟΟΜΙ [L]), wife of Elimelech of Bethlehem, and mother-in-law of Ruth (*Ruth* 1 2 ff.). See RUTH.

NAPHATH-DOR (נָפֶת דּוֹר), 1 K. 4 11 RVmg, RV 'heights of DOR' (*q.v.*).

NAPHISH, in 1 Ch. 5 19, AV NEPHISH (נֶפֶשׁ), a son of ISHMAEL (*q.v.*), Gen 25 15 1 Ch. 1 31 5 19 (ΝΑΦΕC [BAE], -εθ [D], -φειC [L]; in 5 19 ΝΑΦΕΙCΑΔΔΙΩΝ [B], ΝΑΦΙCΑΙΩΝ [AL]). The name may mean 'wide-spread' (cp Aram. ܢܦܫܐ, Ass. napāšū); it may also be a distortion of נַבְיָה, a collateral form of נַבִּי (= Nebaioth)

NAPHTALI

presupposed by the Assyrian form Napiati (Schr. *KGF* 104). Cp NEPHISIM. T. K. C.

NAPHISI (ΝΑΦΙ[ε]ι[α]c[ε] [BA]), 1 Esd. 5 31 = Ezra 2 50, NEPHISIM.

NAPHOTH DOR (נָפוֹת דּוֹר), Josh. 11 2 RVmg, RV 'heights of DOR' (*q.v.*). Cp § 2 below.

NAPHTALI (נַפְתָּלִי, § 9; νεφθαλ[ε]ι [BNADFQL], -μ [BNADFTL]; in Is. 9 1 (823) Aq. Sm. Th., -εΙΝ

1. **Origin.** [R^a in Ps. 67 (68) 28, -εμ [E, Gen. 308]; in Tob. 1 1 AV, NEPTHALI, and in Mt. 4 13 AV, NEPTHALIM, the tribe settled between Issachar and the northern Dan. Why it was grouped with Dan is not clear (cp BILHAH). If the genealogical scheme that has reached us is on the whole an artificial device of comparatively late times,¹ the fact that Naphtalites and Danites were together in the N. would suffice as a reason for making them brothers. Indeed there need not always have been a positive reason for such combinations. When a company of about a dozen has to be broken up into four groups, even enemies may find themselves side by side; every one has to be put somewhere. No Naphtalite traditions on the subject have been preserved. If, on the other hand, the general genealogical system is in its main points ancient, Naphtali's being a Bilhite clan may be historically significant. Its brother Dan came from the SW. of the Ephraim highlands. Is it possible that Naphtali did so too? The possibility has been suggested (BILHAH). Indeed Steuernagel thinks he can point to data that give it a certain plausibility. The Naphtalite clan-names give no help: only one of them recurs anywhere—viz. Guni, which is also in the list of clans of Gad, and Gad is Zilpite, not Bilhite (see ZILPAH). It is noteworthy, however, that in the fragment treating of Dan in Judg. 1 (v. 34 f.) the towns mentioned are Ajalon and Shaalbim, in the SW. of 'Joseph.' If, then, Naphtali was once settled along with Dan in its southern seat we should expect to be told of Canaanite cities in the same district that Naphtali was not able to occupy. Now the towns mentioned thus in v. 33 are Beth-shemesh and Beth-anath. It has of course been usual to assume that these must be in Galilee; but no Beth-shemesh has been identified there. On the other hand, there is a well-known Beth-shemesh 2 m. from the Danite city Zorah (see BETH-SHEMESH, 1). The case for Beth-anath is not so good; but it is not unpalatable. Beth-anath is mentioned in Josh. 15 59 as a city of Judah (see, however, BETH-ANATH), and there is Anathoth in Benjamin. To point to the fact that Shamgar who 'smote of the Philistines 600 men,' like the great Danite hero, is called ben Anath seems precarious. No doubt the lateness of the insertion of Judg. 3 31, as Steuernagel observes, does not preclude there being an old story behind it; but the matter is probably too obscure to serve as evidence. Further it has to be remembered that Egyptian lists seem to mention not only a southern but also a northern Beth-anath, and that a Beth-shemesh is said to have been a border city of Issachar. If Dan and Naphtali ever were settled together on the SW. of Ephraim, and if they grew out of the partition of a Bilhah tribe, there should be some traces of the presence of a Bilhah tribe. Now as a matter of fact there is a Benjamite clan called Bilhan (cp BENJAMIN, § 3), which might be explained as representing a remnant left behind when the rest of the Bilhah tribe migrated northwards. In the same neighbourhood a certain landmark bore the name of Bohan the son of Reuben, who was said to have usurped Bilhah and would in all likelihood be said to have had a son of her. When we remember the story of David it will seem natural that it should be said that Reuben had to bear a curse (Gen. 49 3 f.), and the son was turned to stone (so Steuernagel). The geography would suit (see EDER [TOWER], REUBEN).

Another support for the theory that Naphtali once

¹ See the instructive discussion of Bernh. Luther in *ZATW* 21 11 [1901]. Cp now also Winckler, *KATW* 213, 217.

lived farther S. is found by Steuernagel, with some diffidence, in Dt. 33:23. On this theory Dārôm (דָּרוֹם) can be taken in its usual Talmudic sense of the Shēphēla (see SOUTH): the words express the hope that Naphtali may yet recover its old seat by the sea and in the Daroma. Outside of Dt. 33, however, Darom occurs only in Ezek., Job, and Eccles. Steuernagel, indeed, argues that it is nevertheless probably an old word, for the Dārômā would not have been called 'south' by Jews; but דָּרוֹם may have been as far from meaning 'south' as Negeb. This argument hardly strengthens the case. On the other hand there is nothing positive against the theory. It is part of a wider question (see TRIBE).

How the name Naphtali was popularly explained is not quite clear. Some one strove; but who? and with

2. Name. whom? and how? Apparently, not Jacob, although the doubtful expression 'god's wrestlings,' if that be the meaning, might very well refer to such a story as that in Gen. 32.¹ In the present text the speaker is Rachel, and it is the rule in the case of Jacob's sons that the name is given by the mother. If 'wrestle' be the meaning of the hapax legomenon נִפְתָּלִי,² Rachel wrestled with her sister (30:8) and came out best. Was Reuben then in E. Leah's only son at this time and so Rachel obtaining a second (Naphtali, Dan being the first) constituted a victory (so Gunkel)? That would explain how it was Reuben that found the *dūdāim*: he was at the time Jacob's only son. If, as elsewhere, the verb means to act in a wily manner, perhaps *Test. xii. Patr.*, Napht., § 1, correctly paraphrases E's meaning 'because Rachel acted with guile and substituted Bilha for herself.' Similar is the explanation of Josephus (*Ant.* i. 197, § 305) 'as if "got by stratagem" (? μαχανητός, var. lect. αμ., εἰμ.), because of the stratagem used against the fruitfulness of the sister' (διὰ τὸ ἀντιτεχνάσασθαι πρὸς τὴν εὐτεκνίαν τῆς ἀδελφῆς).

The meaning of the name Naphtali is not known. If there was really a tribe Bilhah, which broke up into two portions after leaving its southern seat, the part called Dan may have come to bear the name of the deity whose cult was seated where it finally settled.³ The Bilhites who came to be known as Naphtalites⁴ may similarly have taken their name from some later seat. They may, for example, as it has been conjectured that the Asherites did (ASHER, § 3), have halted for a time near the plain of Megiddo. There is in that neighbourhood a place-name Naphath or Naphoth-dor (the vocalisation is uncertain) which is usually supposed to mean 'eminence.' May Naphtali be a derivative of Napht as Karmel seems to be of Karm? Naphtālī would then mean the people of the Naphtal. Land (*De Gids*, Oct. 1871, 'De wording van staat en godsdienst in het oude Israel,' 20, n.) thought so, and (independently?) Wright (*Was Israel in Egypt?* 251). It would be rash to assert that the difficulties⁵ are insuperable. Where to locate the Naphath, Naphoth of Joshua, is uncertain. It is usually supposed to be the hilly country just under Carmel. If, however, the suggestion of Dillmann as to the original construction of Josh. 17:11 be accepted (see ASHER, § 3) we must look in Issachar. May the Dor referred to be

¹ On supposed wrestling in prayer (cp the Syriac text cited by Ball (*ISBOT ad loc.*) see Gunkel, *ad loc.*)

² May it not be, however, that נִפְתָּלִי, to which there is no analogy in any Semitic language, is a corruption of נִפְתָּלִי, Niph. inf. absol.? אִי־הֵם וְאִי might then be variants of a misplaced י (=).

³ Cp. Bernstein, *Sagen von Abraham*, 38, Kuenen, *Th. T.* 5201, Kerber, *Hel. Ezeenamen*, 5968.

⁴ It is noteworthy that Naphtālī is, like Lēvi, adjectival in form. It never occurs, however, in the OT as an adjective, or with the article, or in the plural. Ⓞ⁴, however, usually and Ⓞ⁵ often have νεφθαλ[ε]ιου—i.e., Naphtalites (?) (Ges.). The text of Josephus gives νεφθαλεις (cp λευ[ε]ις, Gen. 35:23 [AE]): var. lect. -λει, -λιμος, -λλειμα.

⁵ The gentilic of כְּרִמֶּל is כְּרִמִּי, נִפְתָּלִי. Moreover, if the word נִפְתָּלִי means 'height,' the final ל is not radical.

not that on the coast but some other—that which gave its name to a well? (see, however, ENDOR¹) or to the hot springs at el-Hammeh? : HAMMATH [g.v., i.] seems to have been called more fully Hammoth-dor (Josh. 21:32). On the other hand there may have been Naphoth in more districts than one, as there are more than one Carmel. The country to the W. and N. of the lake of Galilee might well be called hill country. There is in fact a passage (Josh. 20:7) where the mountain land of W. Palestine is expressly divided into three sections: Mt. Judah in the S., Mt. Ephraim in the centre, and Mt. Naphtali in the N. (cp EPHRAIM, § 3). Mt. Naphtali well deserved the name.

Tradition assigned Naphtali stirring deeds in the early times. In conjunction with Zebulun, Naphtali had

3. History. fought a great fight and come off victorious (Judg. 4). Another story told of a great struggle in which all the tribes settled round the plain of Megiddo had taken part (Judg. 5). Trained to daring in the exhilarating atmosphere of the open heights, Naphtali joined Zebulun in reckless deeds of valour (Judg. 5:18). Indeed Naphtali perhaps claimed to have had the honour of providing the leader who led to victory (4:6). To get beneath these legends, however, down to the rock of actual facts almost seems to become more difficult the more the question is studied. See JABIN, SISERA, MEROM, TABOR, KEDESH, etc.

How Naphtali fared in the age when the Pharaohs were founding their Asiatic 'empire' we can only guess (col. 3546, nos. 16, 32, 34, 111). The Amarna letters may yield us in time a fuller knowledge of the course of events about 1400 B.C. Letter 146 (rev. 12), complaining that 'all the cities of . . . the king' in the land of Kadeš have been made over to the Habiri may refer to Kedesh on the Orontes (so now Wi. *KAT*⁽³⁾, 199); but Abimilki, governor of Tyre, complains of the relations of Hazor or its king with the Habiri (15440-43). See also JANOAH, 2. Later came the conquests of Sety in this district, which led to its subjugation by Rameses II. At that time not Naphtali but Asher was the general name. According to Steuernagel the Bilhah tribe entered Palestine in the van of the Jacob or Joseph tribe, after the Leah-Habiri had settled in Mt. Ephraim and southwards. According to this theory the events in the hill country of Galilee during the Amarna period concerned people who could in no sense be called Israelite: the Habiri there may have been Aramæan.

How far David really succeeded in welding the highlands N. of the great plain into his kingdom is not clear. It is noticeable that there the prefectures in the list in 1 K. 4 coincided with tribal divisions.² How rich a province Naphtali was considered appears in the statement that its prefect was a son-in-law of Solomon (AHIMAAZ, AHILUD, BASEMATH [but see SALMA]). Wherever the cities said to have been ceded to Tyre (CABUL) lay (GALILEE, § 2) Naphtali must in the early monarchy have deeply felt the proximity of Phœnicia (cp Wi. *KAT*⁽³⁾, 129). When the crown passed to ISSACHAR (§ 4), however, Bir'idri (BENHADAD, 1) adopted an aggressive policy (1 K. 15:20: Dan, Ijon, Abel-beth-maacah, all the land of Naphtali), which eventually succeeded. Tibni, if Naphtalite³ (EPHRAIM, § 5, col. 1314, n. 3), may have been an earlier representative of the later pro-Aramæan party, opposed to Omri (see, ever, *KAT*⁽³⁾, 247). In any case, being contiguous with Aramæan territory, Naphtali was already largely Aramæan when Assyria at last formally absorbed Damascus (732). When precisely Naphtali's turn came cannot be made out from the mutilated inscriptions of Tiglath-pileser III. (Ann. 150, 209, 228; 3 R 10, n. 2, 6-8, 15-19).

¹ This might even explain the intrusion of Endor which critics have usually cut out as a gloss.

² Bernh. Luther thinks it was in some such way that the tribal unities came into being (*ZATW* 211 [1901]).

³ Guthe (*GVI* 138) suggests Ephraimite or Manassite; Winckler (*KAT*⁽³⁾, 247, n. 1), of Γυναια [EN-GANNIM].

2 K. 15²⁹ (Ijon, Abel-beth-maacah, Janoah, Kadesh, Hazor, Gilead [?], Galilee [?], all the land of Naphtali) may refer to its definitive annexation.¹ Possibly the mutilated slab 3 R 10, no. 2, once mentioned this: 'the wide-reaching [Naphthali] in its whole extent I made over to the territory of Assyria.'² Josiah may have dreamed of recovering it for a glorified 'Davidic' kingdom (JOSIAH); but that was reserved for more fortunate hands (see MACCABEES, § 4, GALILEE, § 3). Tobit is said to have been of Naphthalite descent (see TOBIT).

In Dt. 34², a (late?)³ writer calls the whole country N. of 'the land of Ephraim and Manasseh' 'all Naph-tali.' If Naphtali is really a geo-graphical term the usage may perhaps not be late. In 1 K. 15²⁰ 'all the land of Naphtali' ('Ben'-hadad) seems to have practically the same meaning; so in 2 K. 15²⁹ (Tiglath-pileser III.), especially if JANOAH is really Yānuh.

The description of the Naphtali territory in Josh. 19^{33 f.} is clearer than usual; but unfortunately the places named can seldom be identified.

The description may begin at the N.W. corner and cross to the Jordan (see HELLEPH, BEZAA'ANNINI, ADAMI-NEKEP, JABNEEL, I, LAKKUM). The eastern border is supposed to be obvious: the Jordan and its lakes. The southern border passes AZNOGH-TABOR, to HUKKOK. The SW. limit was Zebulun. The western border (after Zebulun, of course) is Asher (on the text see JUDAH AT JORDAN).

Naphtali was thus roughly the eastern portion of the mountainous country reaching along the W.⁵ of the lake of Galilee and the Jordan from the Issachar lowlands indefinitely northwards into Aramaic or Phoenician territory. See TAHTIM HODSHI. Naphtali is not said to have marched with Dan, though it extended along the Jordan valley. There can hardly have been a tribe Dan of any consequence in the N. (it is ignored by P). Note the discrepancy as to the mother of Hiram-abi. 1 K. 7¹⁴ makes her a Naphtalite (see DAN, § 8, n. 3; HIRAM, 2, n. 1) like AHIRA (*q.v.*) of Nu. 11⁵, etc.

Divided into upper (northern) and lower (southern) halves by the remarkable mountain wall that overhangs the plain of er-Rāmeḥ, Naphtali contains some of the finest country in Palestine, well watered, fertile, salubrious, well peopled (see GALILEE, § 4). The fruitfulness of this land was proverbial: it supplies the matter for the sayings about Naphtali in the 'Blessings' of Jacob and Moses—whatever be the true text.⁶ On the intimate connection with the outer world is secured for it by its roads, see GASmith (*HG* 425 ff.) and cp TRADE.

Of the nineteen 'fenced cities' promised in Josh. 19³⁸ the most liberal reckoning finds only sixteen.

5. **Cities.** Very roughly, the enumeration seems to proceed northwards.

HAMMATH (prob. = Hammoth-dor [Josh. 21³²] = HAMMON 1 Ch. 6⁷⁶ [61]) and KEDESH have been identified with some assurance in the S. and the N. HAZOR may be Tell Khureibah; and IRON, *Yāruḥ* near Hazor. For other less confident identifications see EDOREI, EN-HAZOR, MIGDAL-EL. CHINNERETH is an interesting name applied also to a district of Naphtali. ZIDDIM and ZER (perhaps also HOREM) are probably corrupt. For the other towns see the special articles (RAKKOTH, ADAMAH, RAMAH, BETH-ANATH, BETH-SHEMESH).

¹ A post-exilic writer has inserted an explanatory verse Is. 9¹ [8²³] (cp Mt. 4¹⁵) founded on this passage as an introduction to the prophecy Is. 9²⁻⁷ [1-6].

² So first Hommel, *GBA* 685, n. 1.
³ The preceding line, according to Rost's collated text (Plate XXX.), is: [n]-te (city) Ga-al-za] . . . [city] A-bi-il-ak-k[a] in the territory (*ša pat*) of Israel (*Bit Ḥunriā*).

⁴ See MANASSEH (§ 2, n. 2).
⁵ Josephus, however, says that it reached E. as far as Damascus (*Ant.* v. 122, § 86). Was he misled by 2 K. 15²⁹?

⁶ In Gen. 49²¹, Ball (*SBOT*, 17 172 f. [1865]) reads נפתלי פתח שילה הנותן פרי שפר. "Naphtali is a spreading vine that yields beautiful fruit." Cheyne (*PSBA*, June 1899, p. 242 f.) reads תפארת פתח שילה הנותן פרי שפר belonging to next line, "Naphtali—luxurious is his possession; He produces heaps of fruit." The geographical appendix to the saying in Dt. 33²³ is obscure. What is the דרום of Naphtali? (cp above, § 1, end). Some think it means the Jordan depression. Bertholet suggests that we should read דרך ים, 'the way of the sea' (cp Is. 9¹ [8²³]).

There was a famous sanctuary at Kadesh and, to judge from the names, Beth-anath and Beth-shemesh must have been sacred sites.

The Naphtali genealogy (Gen. 46²⁴ = Nu. 26^{48 f.} = 1 Ch. 7¹³) is very simple, containing only four names

6. **Genealogies.** JAHZEEL (in Ch. Jahziel), Guni, Jezer, and Shillem.¹ The names, except Guni (see above, § 1) do not recur in the OT. H. W. H.

NAPHTHA, the name given by the Greeks to a highly inflammable oil (cp Pliny, *HN* 2109), which cannot have differed much from the modern article of commerce (see *EB*⁹, *s.v.*). It is mentioned only in Apoc. Dan. 3²³ (C v. 46, *ναφθα*; נפתח Syr.; ROSIN, AV).² With it we may most probably identify the name NEPHTHAI (RV; *νεφθαι* [V], *νεφθαρ* [A], נפתר [Syr.]; NEPHI, AV with Vg.), which, according to 2 Macc. 13⁶, was commonly given to the liquid which, legend states, Nehemiah found in the pit where the sacred fire had previously been concealed. Nehemiah himself, on the other hand, is said to have called it Naphthar (AV NEPHTHAR, *νεφθαρ* [AV], *nephtar*, נפתר [Syr.]), a name which admits of no satisfactory explanation. According to the writer (v. 36) it means 'cleansing' (*καθαρισμός*),³ but is more probably a corruption of the form Nephthai (similarly Eusebius writes *nabor*—with an *r*—for Nebo; cp also Acre, from Acco?).

The legend above referred to (2 Macc. 118-36) narrates how the godly priests before the captivity took of the sacred altar-fire and concealed it,⁴ which is quite in accordance with the ancient belief that the nation's life and existence is coincident with the preservation of the holy flame.⁵ After the return, search was made, and instead of the fire 'thick water' (*ὑδωρ παχύ*, v. 21) was found. At the offering up of the first sacrifice the liquid was spread upon the wood and the 'other things' on the altar; prayer was made, and when the sun shone the liquid ignited and the sacrifice was consumed.⁶ The consumption of the offerings by fire was a sign that the sacrifice was acceptable, and that the close relations between the Deity and his worshippers, which had been in abeyance during their captivity in a foreign land, were re-established. (CP SACRIFICE.) In accordance with a custom which finds analogies elsewhere, the Persian king ordered the place where this marvel had appeared to be enclosed and made 'holy' (*ἅγρος*); cp *Dict. Class. Ant.*, *s.v.* 'Bidental.'

NAPHTUHIM (נפתחים), Gen. 10¹³ 1 Ch. 11^{11 f.} In the original text (transformed by the redactor) the name may have been Tappuhim; see MIZRAIM (col. 3164, n. 1), NEBO II, § 2.

NAPKIN (ΝΑΠΚΙΝ; Vg. *sudarium*) occurs in Lk. 19²⁰ Jn. 11⁴⁴ 20⁷ Acts 19¹² (EV 'handkerchief' in last passage). The Greek word is adopted from the Latin (cp *κήρυκος*, *μεμβράνα*, etc.), and probably, at first, had the same meaning with it, being derived from *sudo*, to perspire, and thus corresponding to our word (pocket) *handkerchief*.

The Greek rhetorician Pollux (180 A.D.) remarks that *συνδάριον* had supplanted not only the ancient Greek word for handkerchief, *ἡμιτέλιον* or *ἡμιτέλιον*, which he considers an Egyptian word, but even the more recent term *καψιδώριον* (*Onom.* 7 16). The Roman influence caused the introduction of this word even among the Orientals; the rabbins have סודרה; in Pesh. סדרה

¹ Is the Ša-ra-ma (WMM, *As. u. Eur.* 220) of the expedition of Rameses II. in his eighth year to be compared?

² The name in older times was taken to be of Persian origin, cp *OS* 196, 93; 203 21.

³ Possibly based on a supposed connection with נפתר, נפתיר, although the representation of *ν* by *θ* is against this. See Lag. *Ges. Abh.* 177, *ZDMG* 26, 212.

⁴ Cp the similar tradition of the hiding of tabernacle, ark, and altar of incense in 2 Macc. 24-8, and see Charles, *Apoc. of Baruch*, 168.

⁵ On the sacredness of fire see Frazer, *Paus.* 2.392 ff., also *GB*². The altar-fire was one of the five things which, according to the early Rabbins, were possessed by the first temple hut lacking in the second. Another legend in the Eth. Book of Adam relates that Ezra on his return found the holy fire concealed underneath the temple; and a late tradition has identified the site of the discovery of the 'Naphthar' with Job's Well (*Bar Egypt.*), which from the sixteenth century has been called by the Frank Christians 'the Well of Nehemiah.' See further FIRE in *EB*⁹.

⁶ In the sanctuaries of Hierocæsarea and Hypæpa, according to Pausanias (v. 27 3), the sacred fires were kindled by the aid of a magical invocation. One is reminded of the Inca's custom of focussing the sun's rays by means of concave pieces of polished metal to obtain fire (Prescott, *Peru*, i., chap. 3; cp Plut. *Numa*, chap. 9, and Ew. *Alterth.* 38 f.).

NARCISSUS

answers to the Hebrew *מטפחה*, a veil (cp MANTLE), and in Chaldee *מטרר* or *מטררר* is used for a veil or any linen cloth (Buxtorf, *Lex. Chal.* 1442).

It is indeed but natural to expect that a foreign word introduced into any language should be applied by those who borrow it in a looser sense than that which it bore originally. Hence, although the Latin word *sudarium* is generally restricted to the forementioned meaning, in Greek and Syriac it signified, chiefly, napkin, wrapper, etc. These observations prepare us for the different uses of the word in the NT.

(a) In Lk. 19²⁰ it means a wrapper, in which the 'wicked servant' had laid up the pound entrusted to him by his master. For references to the custom of laying up money, etc., in *σοῦδάρια*, both in classical and rabbinical writers, see Wetstein's *NT*, on Lk. 19²⁰.

(b) In Jn. 11⁴⁴ it appears as a kerchief, or cloth attached to the head of a corpse. It was perhaps brought round the forehead and under the chin. In many Egyptian mummies it does not cover the face. In ancient times among the Greeks it did (Nicolaus, *De Graecor. Luctu*, ch. 3, § 6, 1697). Maimonides, in his comparatively recent times, describes the whole face as being covered, and gives a reason for the custom.

(c) In Jn. 20⁷ it is said that the *σοῦδάριον* which had been 'about the head' of Jesus was found in the empty grave, rolled up, as if deliberately, and laid apart from the linen clothes (*χωρὶς ἐντεταλιγμένον εἰς ἓνα τόπον*).

(d) In Acts 19¹¹ we read that *σοῦδάρια* (handkerchiefs, napkins, wrappers, shawls, etc.) were brought from the body of Paul to the sick; and the 'diseases departed from them, and the evil spirits went out of them.' Many illustrations of the widely prevalent belief in the possibility of such magical transmission will be found in Frazer, *Golden Bough*⁽²⁾.

NARCISSUS (ΝΑΡΚΙΣΣΟΣ; as a Syr. name cp Cureton's *Anc. Syr. Documents*, 110, § 5; and possibly the Palm. name נַרְקִיָּס, Vogüé, *Syr. Centr.* no. 75). 'Those of the household of Narcissus who are in the Lord' are saluted in Rom. 16¹¹. It is not said that Narcissus himself was a Christian. If the greetings in Rom. 16 were really intended for the Roman community (see ROMANS), it is not unnatural to think here of the Narcissus who had been a favourite of the Emperor Claudius and put to death in 54 A.D. (Sueton. *Claud.* 28; Tac. *Ann.* 12.57 13¹).

The name, however, is not uncommon; it was borne by a favourite of Nero (Cass. Dio, 64.3), and appears frequently among slaves and freedmen; see Sanday and Headlam, *Romans*, 426. In the lists of the seventy disciples of the Lord by Pseudo-Dorotheus and Pseudo-Hippolytus, Narcissus figures as bishop of Athens. The fragments of the Gnostic *Περὶ ὁδοῦ Φιλίππου*, preserved in the Greek *Acta*, represent him as having been so consecrated by the apostle Philip (Lipsius, *Apokryph. Gesch.* 337). In the *Περὶ ὁδοῦ Πέτρον καὶ Παύλον* he is a presbyter of Rome and entertainer there of the apostle Peter. In the *Actus Vercellenses* he is the disciple of Paul. (Cp Lipsius, *op. cit.* 2.175, etc.)

NARD (ΝΑΡΔΟΣ), Mk. 14.3 Jn. 12.3 RV, AV SPIKE-NARD.

NASBAS (ΝΑΣΒΑΣ [BA]), Tob. 11.18.† See AMAN, I.

NASI (ΝΑΣΕΙ [B]), 1 Esd. 5.32 RV, AV Nasith = Ezra 2.54, NEZIAH.

NASOR (ΝΑΣΩΡ [AV]), 1 Macc. 11.67 AV, RV HAZOR (g.v., I).

NATHAN (נָתָן, § 50; 'He [Yahwè] gives,' cp Ar. *nahh*, etc., but cp NETHANEEL, NETHANIAH; ΝΑΘΑΝ [BNA'R'TL]; ΔΑΘΑΝ [N*, 1 Ch. 17.1], ΝΑΘΑΜ [R* Ps. 51.2]).

1. A contemporary of David and Solomon, nearly always distinguished as 'the prophet' (cp 2 S. 12.1, *ἰσβαλ*, and see SBOT); cp PROPHEET, §§ 4, 6. There is some reason to think that he was of Jerahmeelite origin (cp no. 4 below, see JERAHMEEL, § 3), and the name has even been regarded as a modification of the Jerahmeelite name Ethan (so Cheyne)—see NETHANIAH, PROPHEET, § 6 and n. According to the Chronicler (1 Ch. 29.29 2 Ch. 9.29) Nathan wrote a

NATHANAEL

history of the times of David and Solomon; but it is in connection with the latter king that he stands out most clearly (sec 1 K. 1). Nathan was opposed to Joab and Abiathar, who were favouring Adonijah's intrigues, and by supporting Bathsheba's claims before David was ultimately able, in conjunction with Zadok, to anoint her son at Gihon. It is interesting to find a trace of Solomon's practical gratitude in the fact that two of his prefects seem to have been sons of Nathan (AZARIAH (6), ZABUD).

The position Nathan occupied with David seems to have been by no means unimportant. In 2 S. 7 he is represented in consultation with David about the building of the temple, and in 2 S. 12 he visits the king to reprove him for the sin with BATHSHEBA [g.v.]. Chapter 7 is admittedly of later date (see SAMUEL [BOOKS], § 5), and the narrative in chap. 12 is not beyond suspicion.¹ In fact, the occurrence of Nathan as a prophet in David's history seems to rest on as obscure a basis as does the occurrence of the only other prophet with whom the king was intimately acquainted—viz., GAD [g.v.]. On נָתָן הַנָּבִיא, see PROPHEET, § 6.

2. b. DAVID [g.v., § 11 n.] (2 S. 5.14 1 Ch. 3.5 14.4, cp Lk. 3.31); he is perhaps to be identified with the one whose 'house' (i.e., family) is mentioned in Zech. 12.12.

3. Father of Igal (גִּיגַי), 2 S. 23.36, but according to 1 Ch. 11.38 the brother of Joel (יֹאֵל). Which of the two is correct, is doubtful; see JOEL [3].

4. b. Attai, a Jerahmeelite, 1 Ch. 2.36. His son was named ZABAD, which, on the view that he is to be identified with ZABUD [g.v.], has led some to connect him with the prophet (1 above); cp JERAHMEEL, § 3.

5. Head of family, temp. Ezra (see EZRA I., § 2, ii., § 15 [1d]), Ezra 8.16 (on. L.)=1 Esd. 8.44.

6. One of the bn'e BANI in list of those with foreign wives (see EZRA I., § 5 end), Ezra 10.39=1 Esd. 9.34, NATHANIAS (vabarias [BA]). S. A. C.

NATHANAEL (ΝΑΘΑΝΑΗΛ [Ti. WH]; cp NETHANEEL), according to Jn. 1.45-51 21.2, one of the first disciples of Jesus. In Jn. 21.2 he is called 'Nathanael of Cana in Galilee.' The supposition, however, that he was a Galilean is not favoured by the question attributed to him in Jn. 1; a similar speech is reputed to have been uttered at Jerusalem (Jn. 7.41), and the evangelist evidently means that it was uttered by Judæans. Certainly, a Galilean Jew would have remembered Is. 9.1 [8.23], and have admitted that 'some good thing' might 'come out of Nazareth' (or, perhaps, rather that 'the Holy One of God' might 'come out of Galilee'; cp Jn. 6.69 and see NAZARETH). Jn. 21 is admittedly an appendix to the Fourth Gospel, and the description of Nathanael as 'of Cana in Galilee' may be based on a conjectural inference from Jn. 22. All that we are told in Jn. 1.45-51 is that Nathanael was 'an Israelite indeed, in whom is no guile.' Nathanael, conscious of his own sincerity, asks how Jesus has gained this knowledge of him. The answer of Jesus is, 'Before Philip saw thee, when thou wast under the fig-tree, I saw thee.' The usual explanation of this saying (see FIG-TREE, § 5) is perhaps hardly adequate. If it simply means, 'when thou hadst retired under the shade of the fig-tree for meditation or prayer,' we ask why the evangelist did not express the Master's meaning more distinctly (contrast Jn. 4.18), for this Gospel, more even than the others, is written with an eye to edification. We may venture therefore to conjecture that there is a mistake in the Greek text. The Fourth Gospel is a composite work, and the narrative in 1.45-51 may have been partly based on a translation from the Hebrew in which *wè attā mithannēn* (וְעַתָּה מִתְחַנֵּן), 'when thou wast making supplication' (expanded perhaps by the ac-

¹ In chap. 12 vv. 10-12 are a gloss resting upon 16.20-22 (so We., Kue., Bu.), and according to Budde vv. 7-9 ('Thus saith . . . in his eyes') are equally intrusive. But the latter passage constitutes the point to the apologue and can hardly be severed from it. The language of v. 7 ('I have anointed thee, etc.') points to 1 S. 16.13 (a late passage), and it is probable that Schwally is right in rejecting vv. 1-15a as interpolated (see SAMUEL [BOOKS], § 6). Verse 25, which is a doublet to v. 24b, will stand upon the same footing. See, further, *AJSL* 16.156f. (1900).

cidental repetition of תה) was mistaken for *w'attū* *tahath hatt'ēnū* (תחת האנה) 'when thou wast under the fig-tree.' No critical scholar who has reflected on the state of the text of the NT will any longer resist the force of the argument for emendations as methodical and circumspect, though not as numerous, as those which have constantly to be made in the text of the OT.

On Nathanael's confession—'Thou art the Son of God, thou art the king of Israel' (which reminds us of Mt. 16 16, the confession of Peter) see a paper by Rhees, *JBL* 17 (1898), 21-30, with regard to which it may be remarked that to speculate, however intelligently, on the ideas of the 'confession' is hardly safe, considering the unhistorical atmosphere which pervades the narratives in connection with which the Nathanael episode is introduced.

We have now to notice attempts to identify Nathanael with known historical persons. It is quite possible that the evangelist imagined the typical character of a guileless seeker after truth, who comes at once to Jesus to see whether he is really the Messiah. If so, we may take the name Nathanael as an anticipative reference to the success of his quest, and explain 'God has given [the Messiah].' The traditional view that Nathanael is the same as the apostle BARTHOLOMEW (whose ordinary name seems to be only a patronymic) is adopted by Zahn (*Eintl.* 1 23), but chiefly rests on the consideration that Nathanael is said (Jn. 1 45) to have been found by Philip, next to whom, in the list of apostles, Bartholomew is placed by the Synoptists. It is more probable, however, that this otherwise unknown name of a disciple is due to the narrator, who cares far more for ideas than for literal facts. So far we may agree with Spaeth (*ZWT*, 1868, 168 ff., 309 ff.); but we cannot admit that Nathanael is synonymous with Johanan, and that the person intended is the apostle John. Certainly, whoever wrote Jn. 21 27 20 did not hold this view, nor could a son of Zebedee have asked the question in Jn. 1 46. Yet Spaeth may be right in one-half of his theory—viz., that Nathanael is that exquisite creation of a devout imagination—the disciple whom Jesus loved' (Jn. 13 23 19 26 20 21 7 20). The difficulty in admitting that John the son of Zebedee can have been represented even imaginatively by the author of the 'spiritual Gospel' as having been on the closest imaginable terms of intimacy with his Master (cp Jn. 13 23 with 1 18, *εἰς τὸν κόλπον τοῦ Πατρὸς*) is not appreciably diminished by referring to the achievements of literary idealisation elsewhere. That Jesus, however, should have loved one who leaped at once to such a height of insight as the imaginary Nathanael has a fair degree of psychological verisimilitude. Why did not the evangelist state this? Possibly some narrative relative to Nathanael was omitted by the redactor (if we may assume such a person) of our present Fourth Gospel, the restoration of which would at once have made things clear. Problems should always be stated, though they cannot always be solved.

To follow Hilgenfeld (*ZWT*, 1873, pp. 96-102) and Holtzmann (in Schenkel's *Bib. Lex.* 4 297) who identify Nathanael with Paul, the 'apostle of visions' (cp Acts 26 12), who sought peace in vain under the barren fig-tree (Mt. 21 19), but found it by personal contact with Christ, is much more difficult.

At an earlier period Hilgenfeld (*Lehrbegriff des Evang. Joh.* 271 ff.; *Die Evangelien*, 242 ff.) identified Nathanael with Matthew, or (*Nov. Test. extra canonem*, 4 1 93-106) with Matthias. Strauss (*Das Leben Jesu f. das deutsche Volk* 2, 417) and Volkmar (*Die Evangelien*, 176) go further, and identify Nathanael, Matthew, and Zacchæus. Resch (*Texte und Unters.* 10 3 829-832) adopts Hilgenfeld's former view. Rovers (*Th. T.* 2 [1866], 653-661) is favourable to Spaeth's hypothesis.

2. 1 Esd. 1 9 = 2 Ch. 85 9, NETHANEEL, 7.
3. 1 Esd. 9 22 = Ezra 10 22, NETHANEEL, 8.
4. A name in the genealogy of Judith (Judith 8 1).

NATHANIAS (ΝΑΘΑΝΙΑΣ [BA]), 1 Esd. 9 34 = Ezra 10 39, NATHAN, 6.

NATHAN-MELECH (נְתַן־מֶלֶךְ), as if 'the king has given,' § 41; but see below), a high officer (see EUNUCH) under Josiah, near whose 'chamber' were the horses and chariots dedicated to the sun (2 K. 23 11: ΝΑΘΑΝ

ΒΑΣΙΛΕΩΣ ΤΟΥ ΕΥΝΟΥΧΟΥ [BA], Ν. ΕΥΝΟΥΧΟΥ ΤΟΥ ΒΑΣΙΛΕΩΣ [L, cp Pesh., reading נְתַן־מֶלֶךְ], *Nathanmelech* [Vg.]. On his functions see PARVAR.

The name has been much discussed, but too much on the assumption that the Hebrew names have escaped being worn down by use or transformed. Who is the 'king' intended? Is it Yahwè (cp Malchiah)? Or are the names Ebed-melech and Nathan-melech (cp Nethan-iah) survivals from the time when the Hebrews worshipped a god called Melech distinct from Yahwè? Gray (*HPV* 148) suggests that 'Nathan-melech was a foreigner who had been engaged in the establishment of the foreign god Melech.' But experience in studying the proper names from a fresh point of view suggests that Malchiah, Hammelech, and Melech must be all popular corruptions of Jerahmeel, and hence indicate the increasing prominence of the Jerahmeelite element in the later period of Jewish history. Ebed-melech is probably miswritten for Arab-melech (עֲבֵד־אַרָב — i.e. 'Arab-jerahmeel (cp OBEED-EDOM for 'Arab-edom); and Nathan-melech is a corruption of Ethan-melech—i.e., Ethän-jerahmeel. Ebed-melech is in fact called a Cushite—i.e., a N. Arabian—and we can well believe that his fellow-chamberlain also was of N. Arabian origin. 'Ethan' seems to have been a Jerahmeelite gentile name; cp 1 K. 4 39 f. [5 10 f.], where in a list of the legendary wise men of Kedem (a corruption of Jerahmeel) and Misrim (in N. Arabia) we find the name of Ethan. Cp NETHANEEL, NETHANIAH.

The teaching and passion of Jesus had long been subjects of written tradition before any attempt was made to round off the picture of his life by describing its beginnings. Not only in Mk. but even in Jn., the latest of the gospels, the narrative begins with the public appearance of the Baptist. Only Mt. and Lk. deal with the birth and childhood of Jesus, and the two accounts are irreconcilably at variance.

Mt. describes (1 18-25) in a summary way how Mary, espoused (*μνηστευθείσης*) to Joseph, was (before they came together) found to be with child of the

1. **In Mt.** Holy Ghost; her husband, being a follower of the law (*δικαίος ὢν*) and still unwilling to see her subjected to the law's penalty, resolved to put her away secretly. At this juncture an angel of the Lord appeared to him with these words: 'Joseph, thou son of David, fear not to take unto thee (*παράλαβεῖν*) Mary thy wife, for that which is begotten in her is of the Holy Ghost. And she shall bring forth a son, and thou shalt call his name Jesus, for he shall save his people from their sins.' In all this the evangelist finds the fulfilment of the prophecy contained in Is. 7 14, which could be adduced in this connection only in the interpretation of the LXX ('virgin for 'young woman'). He then proceeds to tell how Joseph, awaking from sleep, did as the angel had commanded, and took his wife to himself, but did not enter into marital relations till she had brought forth a son (DL: 'her firstborn son' according to Lk.), whom he called Jesus. At this stage we become informed of the time and place of these events; it was at Bethlehem of Judæa that Jesus was born and in the days of Herod the king (21). The divinity of the child is forthwith confirmed by a sign. Magi came from the East to Jerusalem—their number is not stated—and asked: 'Where is he that is [even now] born King of the Jews? We have seen his star in the east and are come to worship him.' Troubled at the tidings, Herod calls together all the chief priests and scribes, who, appealing to Mic. 5 1 [2], declare Bethlehem of Judæa to be the place where the Messiah promised to the Jews should appear. After learning carefully from the magi the time of the star's appearing, Herod sends them away with the injunction to make diligent search concerning the child, and to bring him word again. Following the leading of the star till it stood still, the magi come to Joseph's house (211, *εἰς τὴν οἰκίαν*),

find the child and Mary its mother, fall down and worship him, and, opening their treasures, present him gifts of gold and frankincense and myrrh. Warned by a dream not to return to Herod, they depart into their country another way.

To Joseph also (again) an angel appears in a dream bidding him take the child and its mother and flee into Egypt to escape the wicked devices of Herod. This Joseph did, remaining in Egypt till the death of Herod; and thus was fulfilled the word of prophecy (Hos. 11 1), 'Out of Egypt did I call my son.' Then Herod, in his impotent wrath, gave orders to slay all the male children in Bethlehem and its borders, from two years old and under, in accordance with the date which he had learned from the magi. The sign for return from Egypt was again received by Joseph through an angel in a dream. Hearing, however, that Archelaus the son of Herod was now reigning over Judæa, Joseph is afraid to return thither (that is, to Bethlehem), and in accordance with a fresh admonition received in a dream withdraws to the land of Galilee, where he settles at Nazareth.

If we leave out of account the elements in the preceding narrative that have been derived by research from the OT, there is nothing left which could not have been drawn from living tradition, or, in other words, from popular story. In fact, its vague and unclear statements which perplex the interpreter and have been brought into prominence by Conrady (see below, §§ 6, 21) seem even to preclude the possibility of any written source having lain before the author, and are most naturally explained as arising from careless repetition of oral tradition.

The impression produced by the narrative of Lk. 15-25 is quite different. It is a product of literary art, an art which shows itself in the whole structure

of the story, not merely in the reproduction of the forms of a Hebrew psalm. The author constructs his history upon the basis of the presuppositions supplied in the gospel—that the activity of John the Baptist prefigured, as it preceded, that of Jesus, and that the Messiah expected by the Jews had appeared in the person of Jesus; he accordingly seeks to show the fortunes of the two personalities, the Saviour and his forerunner, as intimately interwoven with each other, not only from birth but even from the womb.

Lk. describes with much detail how the angel Gabriel appeared to the aged priest ZACHARIAS (*q. v.*, 10) as he was ministering in the temple and announced to him that his long-barren wife Elizabeth, now far advanced in years, was to bear him a son who should go before the Lord in the spirit and power of Elijah and prepare his people for his coming. Zacharias' unbelief is punished with dumbness; but his wife becomes pregnant and hides herself for five months. Next, while Elizabeth is in her sixth month, the same angel, Gabriel, appears to Mary, the betrothed but as yet unmarried spouse of Joseph, with the annunciation that she is to conceive and bear a son destined to sit upon the throne of his father David, of whose kingdom there shall be no end. Perplexed, because conscious of her virginity, she hears from the angel that that which is to be born of her will be by the Holy Ghost, and she is pointed to the coming maternity of her kinswoman Elizabeth. To her Mary in her gladness betakes herself in the hill-country of Judæa, and there is prophetically greeted by her kinswoman as the blessed of the Lord; and even the unborn John leaps in his mother's womb for joy. Then follows the *Magnificat* (146-55), a song of praise in the genuine Hebrew manner, modelled upon that of Hannah in 1 S. 21 ff.

Following up the observations of Hillmann (*ZPT* 17 197 ff.), D. Völter (*Pkt* 30 254-256) argued with much cogency that this song belongs, not as the tradition of the MSS and of the church would have it, to Mary, but to Elizabeth, and Harnack has recently brought the question to a conclusion by showing that the 'Mary' of the MSS and the 'Elizabeth' vouched for in its place by ancient authorities are both alike interpolations of the nature of glosses, and proving that the genuine tradition intro-

duces the psalm simply by the words καὶ ἔτε, 'and said'—the subject being given as Elizabeth by the context itself (*SBAW*, 1900, 27 538 ff.).

After three months Mary returns to her home, and the narrative goes on to relate the incidents of the circumcision and naming of John, the unlooked-for restoration of speech to Zacharias and his hymn of praise (167-79), which speaks at once of the coming Messiah and of his own son who is to prepare the way for him. The narrative closes, so far as John is concerned, with a single sentence about his childhood and youth and his life in the wilderness.

The place of Bethlehem in the narrative is accounted for by the census ordered by Augustus for the whole empire, and carried out in Palestine by Quirinius, the governor of Syria; this census rendered it necessary for Joseph to go up along with his wife to Bethlehem the city of David, because he himself was a member of the house of David. There his wife is delivered of her first-born son, whom she lays in the manger. The shepherds in the field, hearing the angel's message and the song of the multitudes of the heavenly host, come and worship the child in the manger, and Mary stores up these words and ponders them in her heart. As prescribed by the law, the child is circumcised on the eighth day, and at the same time receives the name of Jesus which had been given to him by the angel at the annunciation. After the forty days of purification—'their' (*αὐτῶν*), not 'her' (*αὐτῆς*); for the husband also is defiled by contact with the woman in childbed—the child is presented and the appointed offering made in the temple at Jerusalem, on which occasion the aged Symeon, to whom it had been promised that he should not see death before he had seen the Messiah, and Anna the prophetess, bear witness to the fulfilment of their hopes. Now at last, all the precepts of the law having been satisfied, the parents are free to set out with the child on their return journey to Nazareth. There by the grace of God the youth of the coming saviour is passed in uninterrupted growth. Only one occurrence of this period has the evangelist thought fit to record—the scene in which the boy, now twelve years of age, was found by his parents among the doctors of the law in the temple at Jerusalem.

In the whole tone and character of the narrative—its leading conceptions, its repeated employment of the Hebrew psalm-form, its familiarity with Jewish and its defective acquaintance with Roman conditions—the hand of a Jewish Christian is, as is now generally recognised, unmistakable. The matter of it also clearly divides itself into two distinct sections: that relating to the early history of John (ch. 1), and that relating to the birth and childhood of Jesus (ch. 2). Whilst in the first the foreground is occupied by Zacharias and Elizabeth, and Mary's conception is brought in only as an episode, the second makes no mention at all either of John or of his parents. To separate the two sections from each other, however, as has been proposed, is not possible. They are firmly united; Zacharias' song of praise points to the Redeemer, and in the prophetic words of the aged Symeon is repeated the same Hebrew psalm-form as is seen in the hymns of Elizabeth and her husband (see HYMNS). The space assigned to the story of John is, it is true, larger in proportion to the main subject—that of the annunciation to Mary—than we might have expected in a writer who had addressed himself independently to the task of describing the incarnation of the Saviour.

It is very possible that the miraculous narrative of the promise and fulfilment of the birth of John (Lk. 15-25 46-55 57-80) may have already sprung up and gained currency within the circle of John's disciples before it was brought into connection with the story of the conception and nativity of Jesus. Had the composition which was intended to correlate the beginnings of the two lives been a unity from the first, it would certainly have given larger space and greater prominence to the parents of the Saviour, and would not have allowed the principal to be overshadowed by the subordinate figures. The revelation to Zacharias (114-17) proclaims in the returning Elijah the fore-

runner not so much of the saviour as of God himself (Mal. 4.4 [5]) and Elizabeth's song of praise has no recognisable reference to Jesus. The whole character of chap. 1 is best explained on the supposition that the narrative of the birth of John first appeared among the disciples of John; the Jewish-Christian author of the whole will then have taken over the poem by a disciple of John along with a revised version of the psalm attributed to Zacharias, expanded it by addition of the Annunciation and Visitation, and in a certain measure imitated it in the short hymn of Symeon (2.29-32). So much may we safely concede to Völter (*T. u. T.* 80 [1896] 244 f.) though not necessarily adopting all his critical conclusions in detail.

Every unprejudiced eye will perceive that the nativity-narratives of Mt. and Lk. are mutually exclusive and irreconcilable. What they have in common—the figures of Joseph, Mary, and Jesus, the designation of Jesus as Messiah, the date in Herod's reign and the birth in Bethlehem—were given data. Upon the common foundation the two evangelists rear quite different structures.

Joseph's home in Mt. is Bethlehem, in Lk. Nazareth; the divinity of Christ is attested in Lk. by the angel's words to the shepherds and the song of the heavenly host, in Mt. by the appearance of the star in the East; the new-born Messiah receives his first adoration in Lk. from the shepherds, in Mt. from the magi. In Mt. the family of the saviour flees from the wrath of Herod to Egypt and afterwards avoids Archelaus by settling in Nazareth; in Lk., after fulfilment of all the ceremonial duties arising out of the birth, the return is made to Nazareth direct. There, according to Lk., the youth of the saviour is spent quietly and uninterruptedly, whilst in Mt. his earliest years are disturbed by perils and changes of abode. A still deeper contrast emerges as soon as Lk.'s narrative has been freed from a later accretion (see below, § 16).

From the nature of the case both canonical narratives were accepted by faith and incorporated with each other.

We see the process beginning in a writer so early as Justin Martyr. The contradiction between the doctrine of the divine origin of Jesus and the fact that in the gospels not Mary but Joseph is spoken of as of the house of David, he removes by representing that it was Mary who belonged to the house of David (*Dial.* 43, 45, 100), while veiling Joseph's Davidic origin by saying that he belonged to the tribe of Judah (*Dial.* 78). Justin also represents (*ibid.*) Joseph as having 'journeyed from Nazareth where he lived to Bethlehem to which he belonged,' thus seeking to remove the contradiction between the statements regarding his home. It is interesting to observe how the same writer carries on the legend at the same time that he makes these first attempts at reconciliation of contradictions. The birth is in a cave (cp BETHLEHEM, § 4) not in the stable (*Dial.* 78), and the magi are already represented as coming from Arabia (so often, later). The question arises, whether the divergences in Justin's account of the nativity are sufficient to warrant the inference drawn by Credner (*Beitr. z. Einl. i. d. Bibl. Schr.* 1.212 ff.) and others after him that he made use of an extra-canonical source.

Before the end of the second century there had been composed, with the view of removing the glaring contradictions between Mt. and Lk., the so-called *Protevangelium Jacobi*, an apocryphal work by a fanciful fabulist, unhampered by knowledge of Jewish affairs. It obtained great currency and in particular furnished subjects for former Christian art (cp JOSEPH [in NT], § 7). Origen certainly was acquainted with it, and so also possibly was even Clement of Alexandria. Although the author goes much farther back in his narrative than our gospels and seeks to surround the early history with miraculous elements, in other respects he betrays no other intention than that of unifying and rounding out the two canonical accounts, following them so far as possible word for word. The writer's dependence on them becomes most conspicuous precisely in those places where he seems to depart farthest from them. Interested exclusively in the story of Mary, he has attempted to obliterate that of John so intimately bound up with it in Lk.; but he did not wish to pass

over the meeting between Mary and Elizabeth (chap. 12) and he refers to Zacharias' dumbness as something well-known, though he does not say what had been its cause or how it came to be removed. His unskillful introduction of the episode of the Magi also tells a tale. His few divergences from the canonical accounts, on the other hand, do not count for much.

The cave as the scene of the nativity comes, as in Justin, from popular tradition; the suppression of the flight into Egypt—which occurs by interpolation (2.2), only in a few MSS—may arise from deference to the third canonical gospel, which the author seems to have preferred. Harnack (*Gesch. d. altchr. Litt.* 1.19, 2.598) has done substantial justice to this apocryphal work.

Other apocryphal sources of stories of the nativity and childhood of Jesus will be found in Tischendorf's *Evang. Apocr.* (9), 1876; for their contents R. Hofmann, *Das Leben Jesu nach den Apokryphen*, 1851, may be consulted. All further treatments of the story of the nativity rest entirely on the three sources we have named—the two canonical Gospels and the *Protevangelium Jacobi*—as Conrady has shown (*Quelle der Kindheitsgesch.* 172 ff.). Later additions, such as that of the ox and the ass to the manger, are due to popular imagination, partly influenced by the liturgy.

For Christian orthodoxy, the reconcilability of the two canonical accounts was always a necessary dogma.

It explains the divergence of the two More recent attempts by saying that each of the two evangelists selected for narration different sections of the same story. In the age of criticism of sources, this view perforce, in spite of Schleiermacher's warning (*Leben Jesu*, i. 6, 50 ff.), had to give way to the hypothesis that behind Mt. and Lk. there lay a single written source, a 'gospel of the birth and childhood of Jesus.' To A. Resch belongs the doubtful merit of having 'discovered' this 'Gospel of Childhood,' as also of having restored it both in Greek and in Hebrew. Conrady, advancing a step farther on the same path, has sought to show that the *Protevangelium Jacobi* is the single source required by the facts.

The gospels themselves supply ample justification of a criticism of the gospel narratives. In spite of all the revisions which the gospels received before they became canonically fixed, they still not unfrequently preserve references to conditions which are irreconcilable with the later additions and owe their preservation, as a rule, to their being inseparably bound up with weighty utterances of Jesus which the church could not willingly let die. The remark has long ago and often been made that, like Paul, even the Gospels themselves know nothing of the miraculous birth of the Saviour. On the contrary, their knowledge of his natural filial relationship to Joseph the carpenter, and to Mary his wife, is still explicit (see JOSEPH [in NT], §§ 7-9).

Even the episode of the finding in the temple (Lk. 2.41-50) recognises this relationship alone. Cp v. 43, 'and his parents knew not of it' (RV—which in time became changed into 'Joseph and his mother' [so AV]), and Mary says (v. 48) 'thy father and I have sought thee sorrowing.' The episode is introduced, it is true, for the purpose of allowing the consciousness of divine sonship to receive its first manifestation (v. 49); but precisely the fact that his parents do not understand the expression of it (v. 49 *ἐν τοῖς τοῦ πατρὸς μου*, lit. 'in the things of my father') convincingly proves that in the mind of the narrator Joseph and Mary were and knew themselves to be, in the natural sense of the words, the parents of Jesus.

Still clearer to the same effect is another passage. When Jesus after the first acts of his public ministry by the sea of Galilee came on one occasion to his native town of Nazareth and appeared in the synagogue, the people, marveling, asked 'Is not this the carpenter's son? Is not his mother called Mary? (Mk. has: 'Is not this the carpenter, the son of Mary') and his brethren James and Joses and Simon and Judas? and his sisters, are they not all with us?' (Mt. 13.55 f., cp Mk. 6.3). See JOSEPH [in NT], § 9. In the corresponding place in Lk. (4.22 f.) Jesus himself answers the question of the Nazarenes, 'Is not this Joseph's son?' in the affirmative by his silence, merely declining to work miracles with the remark that no prophet is acceptable

(δερτός) in his own country; the passage which he reads from the Book of Isaiah (61:1) speaks of the anointing with the Holy Ghost but says nothing of divine sonship. In the Fourth Gospel, Nathanael of Bethsaida is represented as doubting the Messiahship of Jesus; Philip had told him that the Messiah of whom Moses and the prophets had written had been found—'Jesus of Nazareth, the son of Joseph' (1:45) and Nathanael's answer is 'Can any good thing come out of Nazareth?' (see NATHANAEL).

Most eloquent in the same sense is the synoptic account of the repudiation of his kindred by Jesus (Mt. 12:46-50, Mk. 3:31-35, Lk. 8:19-21), which Mk. alone has preserved in its original connection.

The miracles wrought by Jesus had led the scribes to maintain that Jesus had entered into a compact with the prince of the devils (Mk. 3:22, cp Mt. 12:24 Lk. 11:15, Jn. 10:20); see BEELZEBUL. The report of this accusation had reached his home, and his distressed mother and brothers set out to lay hold of him and to bring him back, in the belief that he was beside himself (Mk. 3:21). They find him in a house surrounded by a multitude of listeners and are unable to get near him. On their sending in a message desiring to speak with him, he makes answer, stretching forth his hand towards his hearers, 'Behold my mother and my brethren; for whosoever shall do the will of my Father, the same is my brother and sister and mother'—a saying the bluntness of which is accounted for by the conviction that he found himself and his work misunderstood by his own immediate kindred; in Jn. 7:5 this is expressly said of his brothers. In Acts also (1:14) mention is made of the brothers as well as of the mother of Jesus.

The conclusions suggested by these observations agree excellently with the genealogies preserved to us in Mt.

11-16 and Lk. 3:23-38 (see GENEALOGIES OF JESUS). They are completely independent attempts; but both are based on the presupposition that Jesus was the true son of Joseph; and it is in this sense alone that they can be held to have any purpose or meaning.

Whilst Mt. carries the list down from Abraham to Joseph and Jesus in three periods of fourteen generations each, Lk. traces it upwards from Jesus 'being, as was supposed, the son of Joseph' to Adam himself 'which was the son of God'; only the first fourteen ancestors in Mt., and two at the beginning of his third period (Salathiel and Zorobabel) are met with also in Lk. The addition in Lk. of the words 'as was supposed,' and the closing words in Mt.'s list 'Joseph the husband of Mary of whom (ἐξ ἧς) was born Jesus, who is called Christ' betray the hand of the harmonising redactor; but such faltering touches have not sufficed to remove the absolute incompatibility between the narratives of the nativity and these genealogies, of which Joseph, not Mary, is the subject.

If we adopt Lk.'s statement (1:36) as historical, Mary had no connection with the house of David: she was a kinswoman (συγγενής) of Elizabeth, and Elizabeth was 'of the daughters of Aaron' (1:5). The present writer, however, is unable to follow Hilgenfeld and Hillmann (ZPT 17, 250 f.) in thinking that Clemens Romanus (1 Cor. 32:1) regarded Jesus as by birth a Levite through Mary, of course). It was not until the belief in the virgin-birth of Christ had attained currency that any necessity could be felt for making Mary a member of the family of David. This was done as early as in Justin Martyr's time (see above, § 5), and next in the *Protevangeliium Jacobi* (chap. 10); and the Syrian Palimpsest of Sinai even contains the interpolation 'because they were both of the house of David' (Lk. 2:5[4]). All this is intelligible easily enough, just as it is easy to understand why Resch's theological interpretation discovers the Davidic descent of Mary in the Gospels themselves (*K'indheitsev.* 191).

The chronological difficulties with which learned subtlety has struggled in vain for centuries, can

only be indicated here (cp CHRONOLOGY, 10. Dates. § 57 f., QUIRINIUS). When Mt. places the nativity within the reign of Herod and the return from Egypt in that of Archelaus his successor, the birth of Christ is thereby determined to have been some years earlier than 4 B.C., Herod's death-year. Lk. on the other hand connects the nativity with the census carried out in Palestine by order of Augustus

¹ On this clause see MARV, § 14.

under P. Sulpicius Quirinius the Governor of Syria. This cannot be conceived as having been carried out before the deposition of Archelaus in 6 A.D., and in point of fact it is attested for this date by Josephus (*Ant.* xvii. 13 5, § 355; xviii.).

Even if it is made out with a high degree of probability that Quirinius had already for a previous term (about 3-2 B.C.) been governor of Syria (Mommsen, *Mon. Ancyr.* 2, 161 ff.; Schürer, *GVV* 1²) 260 ff., ET i. 1 351 ff.), the essential fact for the narrative of Lk.—the census by Quirinius in Palestine—cannot be assigned to a date earlier than 6 A.D. Lk., however, is in contradiction not only with Mt. but also with himself; for at the outset of his narrative (1:5) he places the event 'in the days of Herod the king of the Jews.' The two data are separated by an interval of more than ten years. No trustworthy date at all can be obtained from the accounts of the nativity that have reached us. The year can be approximately determined only by the elements supplied in Lk. 3:1-23—that John began his public ministry in the fifteenth year of Tiberius (28-29 A.D.) and that Jesus when he began his (29 A.D.) was about thirty years of age (see further Clinton, *Fasti Hellenici*, § 260 ff.; A. W. Zumpt, *Das Geburtsjahr Christi*, 1869).

The gospels say nothing as to the day of the nativity. The church fixed it by mythological analogy. Whilst the ancient church (as also the Armenian church still does) commemorated the nativity at the feast of Epiphany (6th January), which derives from the Alexandrian feast of the appearing of Dionysos, the Roman Church from the middle of the fourth century onwards set apart the *natalis solis invicti*—i.e., 25th Dec.—as the anniversary of the Saviour's birth (cp Usener, *Rel.-gesch. Unt.*, 1889).

Before this, however, the most diverse attempts were made to fix a date. A learned Jesuit, Antonmaria Lupi, in the eighteenth century took the trouble to show (*Dissertationi, lettere ed altre opuscole*, Faenza, 1785, 1219 ff.) that there is no month of the year to which the nativity has not been assigned at one time or another.

Another contradiction which must not be overlooked relates to the place of the nativity. The

11. Place of nativity. had become equally firmly established traditions that Jesus was born at Bethlehem and that he belonged to Nazareth. Mt. took Bethlehem simply as the native place of Joseph, whom he then represented as fixing his abode at Nazareth in Galilee from fear of Archelaus after the return from Egypt; he had no right (13:54) to call Nazareth the native place (πατρίδα) of Christ as his predecessor (Mk. 6:1) was able to do. Lk. takes Nazareth as the home of Joseph, and to explain the occurrence of the birth at Bethlehem avails himself of the census of Quirinius.

Just as the teaching activity of Jesus down to the period of his last journey to Jerusalem was certainly for the most part confined to the districts immediately surrounding the lake of Galilee, so also his origin in Nazareth of Galilee was an accepted fact (Mk. 6:1-4 Mt. 13:54 f. Lk. 4:16 ff. Mt. 21:11 26:69 71 Jn. 1:46 7:41); indeed Mt. 2:23 is able to quote in support of it a (no doubt very apocryphal) prophetic utterance: 'that it might be fulfilled which was spoken by the prophets: he shall be called a Nazarene' (Ναζωραῖος). How was it possible for Bethlehem to set up competing claims?

In this connection it has been noticed that there was also a Bethlehem in Galilee, not far from Nazareth, which is mentioned once in the Talmud as Bethlehem Noseriyyah. Our present problem, however, cannot be solved, but rather only further complicated, by this reference.¹ For it is just as certain that the Bethlehem spoken of in the Gospels as the birthplace of Jesus is the Bethlehem in Judæa, south of Jerusalem, as it is that Nazareth was universally accepted as his home.

It is important, however, that, of all the gospel narratives, it is only those of the nativity that refer to the Bethlehem in question. The key is to be sought here.

After the discourse on the living water, as we read in

¹ [On the complication thus introduced cp NAZARETH, § 4, where the bearing of the evidence is considered, and an attempt made to go behind the existing evangelical traditions.]

Jn. 7⁴⁰ *f.*, the audience expressed themselves variously

as follows: 'some said: of a truth this **12. Why Bethlehem?** is the prophet. Others said: this is the Christ. But some said: Shall Christ come out of Galilee? has not the scripture said, that Christ comes of the seed of David, and out of the town of Bethlehem, where David was?' Even as early as the triumphal entry into Jerusalem we find the populace shouting their Hosannas to Jesus as the 'son of David' (Mt. 21⁹, cp 21¹⁵, Mk. 11¹⁰, but cp HOSANNA); and the Pharisees know that the anointed of the Lord can only be a son of David (Mt. 22⁴², Mk. 12³⁵, Lk. 20⁴¹). From the prophecy in Mic. 5:1 [2] was drawn the further inference that the Messiah must come from the city of David, Bethlehem. The scribes whom Herod, according to Mt., calls to his aid, cannot in view of this prophecy (Mt. 26) for a moment be in any doubt as to the place where the newborn King of the Jews is to be sought. The narrative of Jn., where the supernatural birth is still unknown, sets the actual home of Jesus, Galilee, over against the theoretical birthplace demanded by Jewish belief, and reveals the hidden path by which Bethlehem had found its way into the gospel tradition. Even while he was yet alive, Jesus was regarded as the 'anointed of God'; Peter himself had accorded the title (Lk. 9²⁰, cp Mk. 8²⁹; in Mt. 16¹⁶ 'the Christ, the son of the living God'). The whole series of attributes which associated itself with the idea of the Messiah in the Jewish mind had necessarily to be transferred to Jesus as soon as the conception that he was the 'Christ' had come effectively into being; it is a particular case of a general law observable in the growth of legend. Above all it was necessary that Jesus should be a descendant of David, and thus of kingly origin. The genealogical lists which brought Joseph the father of Jesus into connection with David were the first literary consequence. However unobtrusive the prose in which they speak, they are nevertheless the earliest attempts at poetical invention regarding the birth of Christ. The next inevitable step was to transfer his cradle to Bethlehem. When the accounts of Mt. and Lk. were written this had already become a fixed article of faith, which, well or ill, had somehow or other to be fitted in and reconciled with the historical fact as to his actual home.

The contradictions (of the facts as made known to us by the gospel itself) prove that at the time when the

narratives of the nativity and childhood were given their present place the kernel of the gospels of Mt. and Lk. was already fixed. These additions must come from quite other hands—the substance of them that is to say, not necessarily the form. For there remains the possibility—untouched by our criticism—that the present form is due to a reviser before whom the various elements already lay.

This possibility does not seem to have been present to the mind of Harnack when recently (*SBAH* 27 [1900] 547 *ff.*), proceeding upon the similarity of phraseology and vocabulary, he thought it possible to prove that the first two chapters of Lk. are due to the same hand as that which wrote the whole of the rest of that gospel and Acts as well. It is utterly impossible to think even of those chapters as indubitably coming from one and the same hand. The ultimate decision of the question must be left to criticism of the facts and analysis of the composition.

Whilst in Mt. the story of the childhood allows itself to be recognised as an interpolation by the fact of its being in contradiction with the rest of the gospel, in the case of Lk. we are able to confirm the results reached by criticism by referring to the testimony of the author himself. His appeal to those who 'from the beginning were eyewitnesses and ministers of the word' (12; cp 13, ἀνωθεν)—even apart from the express interpretation of what he means by the expressions 'from the beginning' (ἀπ' ἀρχῆς) and 'from the first' (ἀνωθεν) which he gives in Acts 1:22 (ἀρχαίμενος ἀπὸ τοῦ βαπτίσματος, 'beginning from the baptism'; also 10:37, 'beginning from Galilee, after the baptism which John

preached')—would leave no room for doubt that Lk. began his gospel with the baptism and preaching of John. This has in substance been correctly and conclusively shown by P. Corsen (*GGA*, 1899, pp. 315-327).

The oldest written forms of the gospel knew, and knew only, that Jesus was born at Nazareth as the son of Joseph and Mary;¹ but they also taught that he was the Messiah foretold by the prophets and expected by the Jews, and they also were able to tell how it was that Jesus himself came to be possessed with the consciousness that he was the Son of God. In these representations were contained the germs which found a fruitful soil in the receptive minds of the ancient Christian churches and were destined to develop comparatively soon into the dogma of the divinity of Christ and even into that of the pre-existence of the Son of God.

As regards the Messiah, Jewish faith did not look for any supernatural birth; he had only to be a descendant of David and the chosen one of God (cp Hillmann, *JPT* 17 [1891] 233 *ff.*). From this, by and by, followed, as a first and unquestioned consequence, that the father of Jesus had to be a descendant of David, and that Jesus must have been born in Bethlehem. It became further necessary, in the second place, that the chosen one of God should be brought into closer relation with God. He who had been born and brought up as man required a divine consecration to his office. Hence the baptism in Jordan.

The appearance of John the Baptist, his preaching and baptism, occupied the first place in the oldest written gospels (see JOHN THE BAPTIST). The example of the Baptist was the means of awakening Jesus to a perception of his own great task; the depth of the impression made upon him by John is shown by the elevation of the witness which he bears to him (Mt. 11:7 *ff.* Lk. 7:24-35, cp Mt. 21:32). It was not till the coming of the tidings that the activity of John had been brought to an untimely end by his imprisonment at Herod's command that Jesus emerged from the obscurity in which he had hitherto lived (Mt. 4:12 Mk. 1:14). Thus there is nothing to prevent us from supposing that Jesus also was among the multitude of those who thronged to the preaching of John to be baptised, and this fact was stated from the first in the gospels.

This baptism at the same time furnished the occasion on which Jesus the man became also the anointed of the Lord. There are two accounts of the manner in which this came about.

1. According to Mk. 1:10 *f.* Jesus as he comes up from Jordan sees the heaven opened and the Holy Ghost descending upon him, and hears a voice from heaven saying: 'Thou art my beloved son in whom I am well pleased.'

These words, taken from the Hebrew text (not Θ) of Is. 42:1 and repeated also on the mount of transfiguration, are employed to convey the testimony that God himself has chosen Jesus as the Messiah, and the spirit of God enters into him in order to bring to their fulfilment the words of Is. 42:1 12.

2. The procedure of the unknown hand by which the short account of the baptism of Jesus in Jordan was introduced into the Third Gospel (Lk. 3:21 *f.*) was bolder. He was not satisfied with ascribing the divine vocation to the Messiahship; he wished also to give an immediate divine testimony to the divine sonship of Jesus.

For this end he made use of the words of the Psalmist (Ps. 27; cp Acts 13:33), and introduced these words as spoken by God: 'Thou art my son; this day have I begotten thee.' Thus the passage in Lk. was read, in the Greek Church down to about 300 A.D. and in the Latin West down to and beyond 360 A.D.

The picture it conveyed led to the incarnation being connected with the baptism in such manner that the feast of the Epiphany—the manifestation of God upon

¹ [See NAZARETH, § 4, and cp GALILEE, § 5.]

earth—came to be at once the festival of the baptism and of the birth of Christ until the Christmas festival began to come into vogue. At the same time, concurrently with this more highly pitched account, the older version of the miracle at Jordan was amplified in Mt. and in the Gospel of the Hebrews with new wonders; the Fourth Gospel also goes far beyond the original story.

The mythical pictures thus produced could not permanently satisfy believing hearts. The conception of

15. Course of development. ever more and more ground found it increasingly impossible to postpone to

his thirtieth year the consecration of Jesus as the Messiah or his adoption as the son of God. It was felt that he must have been God's chosen instrument from his very birth. Thus arose the story of the nativity. It arose and took shape at a time when the consecration of Jesus to the Messiahship had already become firmly associated with the baptism in Jordan. If the two had arisen at the same time, or if the story of the nativity had been the earlier to come into currency, the miracle at the baptism could not have received the shape which it now has, or could not have arisen at all; the one excludes the other.

Here, also, there was a choice of paths. Just as in the description of the baptism we have the divine attestation on the one hand and the divine generation on the other, so also here alongside of the miraculous conception there was possible a mode of representation more in harmony with Jewish modes of thought in which divine revelations at his conception and birth attested to the human son of Joseph and Mary his election to be the Messiah.

Such a representation in point of fact lies before us in Lk. If we bear in mind what we were able to observe at Bethlehem we can become

16. Lk.: divine attestation. free of the fetters laid upon us by long habituation to a sacred tradition. To

Joh. Hillmann (*ZPT* 17 221 ff.) belongs the merit of having conclusively shown that the two verses in Lk. (134 ff.), the only verses in the Third Gospel in which the supernatural birth of Jesus of the Virgin Mary is stated, are incompatible with the entire representation of the rest of chaps. 1 and 2, and thus must have been interpolated by a redactor. These two verses once removed, what remains is a purely Jewish-Christian account of the birth of the Messiah, still resting upon the foundation of the old and genuine tradition that Jesus was the offspring—the firstborn offspring—of the marriage of Joseph and Mary, and no word is to be found in it which does not admit of full explanation from Jewish ideas concerning the coming Messiah.

The angel Gabriel, sent by God, comes to Nazareth to a virgin named Mary who is betrothed to Joseph, a descendant of David (*ἐξ οίκου Δαυειδ*, 127); after words of salutation he tells her that she is destined to conceive and bear a son who shall be called the son of the Most High and shall sit upon the throne of his (fore-) father David (and so forth, 131-33), and then concludes by telling her of what has happened to Elizabeth her kinswoman (135 ff.). The events in the house of Elizabeth (139-56) and the psalm of Zacharias (168 ff.) only serve to glorify the Messiah even in the womb of his mother, and to prepare the way for his future relations with John. Shortly before Mary's time has come the journey to Bethlehem—explained, not well, as we have seen (§ 10), by the census—is interposed; Joseph must betake himself to the city of David in order to be entered on the register there because he is 'of the house of David' (24), and this, too, along with Mary his wife.

ὁὐν Μαρίας τῆς ἡγιαστῆς αὐτοῦ, 25, is the reading of the Syrian palimpsest of Sinai discovered by Mrs. Agnes Lewis Smith, and *cum Maria uxore sua pregnantē* is also attested by the pre-Hieronymian texts of Verona and Vercelli, as also the Colbertinus—a reading which speaks for itself, even apart from the weight of the testimony by which it is supported. In place of

it was afterwards substituted the reading *ὁὐν Μ. τῆς ἑμνηστευμένης αὐτοῦ* (so NB and the Lat. vers. of Brescia), and, as we so frequently find happening, in due course the two readings came to be combined by contamination so that the *ὁὐν Μ. τῆς ἑμνηστευμένης αὐτοῦ ἡγιαστῆς* of A, the Lat. vers. of Corbei, of Eusebius and Cyril, *Catich.* 12, 31, arose. That we have here a case of real contamination is seen very plainly in the old Freising MS in which the ancient variants *τῆς ἡγιαστῆς αὐτοῦ* and *τῆς ἑμνηστευμένης αὐτοῦ* still stand together in immediate juxtaposition.

Since, then, at the beginning of the story (127) there is twice prominently made, in accordance with unanimous tradition, the statement that Mary at the time of the Annunciation, although betrothed to Joseph, was still a virgin, we are in a position to infer with certainty from 25 that in the original form of the narrative after 138 stood the further statement, hardly to be dispensed with (even though judged inadmissible by the redactor who interpolated 134 ff.), that Mary was then taken to wife by Joseph, and that she conceived by him; with this best agrees the reminiscence in 221 that the name of Jesus had been given by the angel 'before he was conceived in the womb.' That Jesus was the first child of this legitimate marriage is expressly stated (27).—'and she brought forth her firstborn son'; *τὸν πρωτότοκον* is the word, not such an expression as *μονογενῆ*, and tradition took no exception to the phrase, which has even been interpolated in Mt. 125. Jesus is thus recognised to have been the eldest of the sons and daughters of Joseph, who are referred to in this very gospel itself. In accordance with the Jewish ceremonial law the circumcision and naming of the child follows on the eighth day (221), and after forty days comes the dedication of the firstborn and the offering in the temple at Jerusalem (222 ff.); the whole procedure presupposes a normal birth from a legitimate marriage, and in 227 are the express words, 'When the parents brought in the child Jesus.' The salutations of the aged Symeon (229-35) and Anna the prophetess (236-38) are entirely in the spirit of the promise of the Messiah as given in the words of the angel, alike to Mary (131-33) and to the shepherds (211, cp 214). Finally, the incident between the parents and their son, now twelve years of age, in the temple (241 ff.), which has already been spoken of, stands upon the same footing.

We discern accordingly in Lk.'s account a Jewish-Christian endeavour to invest the birth and childhood of Jesus with the miraculous halo that seemed to be demanded by his call to Messiahship. The miracles, however, are limited to miracles of divine revelation brought by angels or inspired by the Holy Ghost. The historical tradition which lay at the heart of the gospel—that Jesus was born as the eldest child of Joseph and Mary of Nazareth—is still faithfully preserved. Only, the demand that Jesus should through his father belong to the house of David and be born in David's city of Bethlehem had already become the indispensable presupposition for the whole narrative, completely dominated as it was by Messianic ideas. The redactor, while effecting a compromise with the legend as set forth in Mt. by his interpolation of 134 ff., at the same time introduced an alien and irreconcilable trait into Lk.'s work if it is to be regarded as an artistic unity.

The narrative of Mt., on the other hand, is entirely dominated by the presupposition that Jesus was conceived by the power of the Holy Ghost

17. Mt.: in the womb of the Virgin Mary. Joseph

virgin birth. receives the revelation, 'that which is begotten in her is of the Holy Ghost,' and following the divine direction, 'knew her not till she had brought forth a son.' It is possible to regard the divine begetting as a carrying back, in point of time, of the view of the baptism-miracle which we find in Lk. There is something entirely new, however, in addition—that he was conceived and born of a virgin. Here we unquestionably enter the circle of pagan ideas. Even the Church fathers were unable to shut their eyes to this. The idea is quite foreign to Judaism, whilst for Græco-Roman antiquity it continued in full activity till

after the Augustan age. The present writer has already (see below, § 21) given the evidence for this, and he could make it still stronger now. The expression in Is. 7¹⁴ could not possibly have given occasion for the shaping of this birth-story. The context of the passage says nothing about an expected Messiah, and speaks merely of a young woman, not of a 'virgin' as the word is in 6 (see IMMANUEL). The efforts which have been made to disprove the unwelcome intrusion of heathen mythology into the substance of the gospels have been ineffectual. It is dangerous to cite evidence that proves the opposite of what it is asked to establish.

In a remarkable passage (*De cherub.* 13; 1180 f.) Philo, while pressing the actual language of the OT, seeks to show that it was God who had made Sarah, Leah, Rebekah, and Zipporah to be fruitful. Though this does not teach virgin birth it certainly teaches divine generation. It ought not, however, to be overlooked that Philo designates this doctrine a mystery, a sacred revelation, in other words something quite new; the new knowledge first dawned upon him in the Hellenistic atmosphere of Alexandria, at the fountainhead of all those ideas with which he was able to give a new depth to the traditions of his people.

The embroidery comes from the same source as the warp and the woof. The appearance of a new star in the sky heralding the birth had been prepared for by the popular faith of antiquity.

18. The star, etc.

By astrologers it was even taught that a new star rises at the birth of every man (see Julianus Halic. in *Rhein. Mus.* 55 328, l. 11; cp Frazer, *GB*⁽²⁾, 222 ff.). With an event so late even as the birth of Alexander Severus was associated the legend that the future world-empire of the child was foretold by the sudden appearance of a star of the first magnitude (Lampridius, ch. 13); the story may be of Semitic origin. Also the recognition and proclamation of the birth of a new king of the Jews by the magi learned in star-lore finds its parallel in a legend concerning Alexander recorded in Cicero (*de Divin.* i. 23 47; cp 41 90). That the magi should have come in person to do homage to the new-born lord may perhaps, as has been pointed out to the present writer by A. Dieterich, have originated in the journey of homage made by the Parthian king Tiridates to Nero in Rome, an expedition which attracted very great attention (see Cassius Dio, 63 2 f.), especially in the provinces, such as Asia, which actually witnessed the progress of the king with his royal train, and had to entertain him in a manner suitable to his rank. Pliny, who alludes to this event (*NH* 30 16), actually calls Tiridates *magus*, and mentions that he had magi in his suite (*magos secum adduxerat*), from whom the emperor hoped to learn the secrets of magic. The reign of Nero may have been exactly the period at which the legends of the divine birth of Jesus began to take shape in the Christian world, and it is very possible that tidings of the Neronian persecutions spread from Rome may have had their share in bringing about the introduction of the picture of a bloodthirsty tyrant into the story of the childhood. A massacre of innocents and, as the motive for it, fear of the threatened advent of a new ruler, were already current material for legend, as is shown by the romantic story of Marathus concerning the birth of Augustus (Suet. *Aug.* 94).

The flight into Egypt, or, to speak more accurately, the return from Egypt, is ill-explained.

An angel of the Lord admonishes Joseph to return—as formerly he had warned him to flee—'for they are dead which sought the young child's life' (Mt. 2 20);

19. The Egypt incident.

but 'when he heard that Archelaus was reigning in Judea . . . he was afraid to go there,' and 'being warned of God in a dream, he turned aside into the parts of Galilee' (Mt. 2 22). It is not easy to understand why the command to return should not in the story have been postponed till after the deposition of Archelaus (6 A.D.) if it were not for the reason that, in that case, there would be no motive left for the selection of Nazareth as a home. Yet to explain the selection, there is introduced, awkwardly enough, a double revelation to Joseph.

Why is it Egypt that is selected as the place of refuge? We may reply that in the first century, when Jews had long been gathered together in great numbers

in Alexandria, it was natural to think of this neighbouring land. Mythological ideas also, however, may have had their unconscious influence; it is to Egypt that, when attacked by the giant Typhon, the Olympian gods take their flight.

Thus for the whole birth- and childhood-story of Mt. in its every detail it is possible to trace a pagan substratum. It must have arisen in

20. The result. Gentile-Christian circles, probably in those of the province of Asia, and then was to some extent legitimated by its narrator, in accordance with the tendency manifested throughout the whole of the First Gospel (see Resch, *Kindheitsvang.* 19 ff.), by citation of prophetic 'words' in its support.

Thus did the divine birth and nature of Christ receive the stamp of authority for all time, and the Jewish-Christian representation of Lk., which knew the Messiah only as a son of man, had to be heightened by the introduction of the angelic messages and so brought into conformity with the demands of faith.

The divine birth and nature of Christ thus became gospel. To theosophic speculation the task which now presented itself was that of bringing this dogma into reconcilability with the fact of the humanity of Jesus. It was only after a struggle lasting for centuries that the church succeeded in setting up a unanimous doctrine upon the subject. The struggle indeed would still have arisen even if the gospel of the virgin-birth had not lain before it in writing. Even before the gospel had been written and attained currency the docetic doctrine that the son of God had been sent down from heaven and had lived only seemingly the life of a man in the world, as also the Johannine conception of the pre-existence of the divine logos, had already been formulated.

NATURE-WORSHIP. In the article IDOLATRY (§ 2 f.) the development of the ideas about nature

1. Nature-worship in the progress of religion. which become a factor in religion has been outlined, from the earliest stage, in which man conceives natural objects as animated by a demonic life, through one in which these objects and localities are permanently inhabited by a numen or frequented by it,

to that in which they are the visible symbols wherein the presence of a god is graciously manifested, and, finally, to the rejection of the symbol as incompatible with the conception of a god whose invisible presence fills earth and heaven. The first of these stages had been left behind by the religion of Israel long before our knowledge of it begins; but innumerable customs of social life and ritual observance that had their root and reason in animistic beliefs survived even to the latest times, and doubtless the beliefs themselves lingered as more or less obscure superstitions among certain classes of the people, as they do to the present day among the peasantry in Christian Europe.

It is obvious that the nature of the object itself determined how far it could be carried along by the advancing religious conceptions. A holy mountain, for example, most easily became the abode of a god, whose power was manifested in storm and lightning, or in the beneficent rain-clouds which gathered around its top; a cave near the summit might be in a special sense his dwelling-place.¹ A natural rock which had

¹ So perhaps at Horeb, 1 K. 19.

been revered as the seat of a numen might become a rock-altar or a *maššēbāh*, in which a deity no longer bound to the spot received the sacrifices of his worshippers and answered their requests;¹ and might even finally be understood by higher spirits as only the symbol of the divine presence. On the other hand, the sacred tree was not so easily dissociated from its own life; its spirit might be very potent in its sphere, but it was to the end a tree-spirit, even if some greater name was given it. Consequently, the beliefs and customs connected with trees and with vegetation generally have been left behind in the progress of religion and often put under its ban, though nowhere extirpated by it.

We find this true in the OT. The mountains and the sacred wells and springs which once had, as in 2. In Israel: some instances we can still perceive, their own numina, have been taken possession of by Yahwē, and become his holy places, seats of his worship; no traces of a distinctive cultus have been preserved;² the rocks, so far as they have a religious association at all, are his altars or memorial stones.³

Sacred trees, too, are found at the sanctuaries of Yahwē;⁴ at Beersheba, by the holy wells, was a tamarisk which Abraham planted with religious rites (Gen. 2133);⁵ at Hebron Abraham built an altar at the 'ēlōn *Maavrē* (1318),⁶ where he dwelt (1413); beneath the tree Yahwē appeared to him in theophany (181 ff.). At the 'ēlōn *mōrē* at Shechem Yahwē appeared to Abraham (Gen. 126 f.); under the 'ēlāh at the same place Jacob buried the idols and amulets of his Aramæan household (Gen. 354); there Joshua erected a *maššēbāh* beneath the 'ēlāh which is in the sanctuary of Yahwē (Josh. 2426); by the same tree Abimelech was made king (Judg. 96); near Shechem stood also an 'ēlōn *m'ōnēnim* (Judg. 937); the tomb of Deborah was under a tree near Bethel named 'allōn *bakkūth* (Gen. 358); beneath the 'ēlāh at Ophrah the angel of Yahwē appeared to Gideon, who built an altar on the spot (Judg. 6111924). Compare also the place-names, Elim (Ex. 161), Elath (2 K. 1422), Elon (Judg. 1211); see also Judg. 45 1 S. 142 226 3113 (1 Ch. 1012). The words אֱלֹהִים, אֱלֹהִים, 'ēlāh, 'allāh, אֱלֹנִים, 'ēlōn, 'allōn,⁷ ordinarily mean 'holy tree' (cp Is. 129); the substitutions made in the Targums and by Jerome (*i.e.*, Jerome's Jewish teachers) show how keenly this was felt at a late time. The etymological connection of the word with אֱלֹהִים ('ēl), 'numen, god,' is very probable.⁸

The names 'ēlōn *mōrē*, 'ēlōn *m'ōnēnim*, point to tree oracles; and though these names, like many of the others, are probably of Canaanite origin, we may observe that David takes an omen from the sound of a marching in the tops of the *bākā* trees (2 S. 524).

Of an actual tree cult we have no evidence in the OT, the prophetic irony directed against the veneration of stocks (פִּזְוִי) and stones more probably referring to 'āšērāhs or wooden idols. But the places of worship 'under every luxuriant tree'⁹ had at least originally a deeper reason than that 'the shade was good' (Hos. 413); and we shall probably not err if we see in beliefs

1 See IDOLATRY, § 4; MASSEBAH, § 6.
2 This is far from saying that no such rites were practised.
3 See MASSEBAH, §§ 5, 7.
4 For references to the literature see col. 2153, n. o.
5 Stade and v. Gall (*Kultstätten*, 47) would read, instead of 'ēlāh 'tamarisk, 'āšērāh, connecting the verse with 2625 (Isaac).
6 עֵלֹן, *ēlōn*; the plur. in MT is an alteration with a purpose like that of Tg. Vg. 'plain.' The holy tree sounded heathenish. Abraham's oak (or terebinth) was an object of veneration in the time of Constantine, who had the altars beneath it destroyed (see *Rel. Pal.*, p. 711 ff.). An Abraham's oak is still shown (see *Jewish Encyclopaedia*, 193).
7 The diversity of pronunciation in MT is not a consistent discrimination of 'oak' and 'terebinth.' See Moore, *Judges* (*Int. Comm.*), 121 f., and v. Gall, *Kultstätten*, 24 ff.
8 Levy, *Phön. Stud.* 119 f. (1856); and many.
9 See Jer. 220 3613 172 Ezek. 613 2028, etc.

which in many other parts of the world have been associated with the powers of tree-spirits and the life of vegetation at least one root of the sexual licence which at these sanctuaries was indulged in in the name of religion.¹ Doubtless the custom existed, which still prevails in Syria as in many other countries, of hanging upon the trees bits of clothing, ornaments, and other things which keep up the connection between the man to whom they belonged and the spirit of the tree.² At least one law—the three years 'orlāh of fruit-trees when they begin to bear (Lev. 1923-25)—perpetuates a parallel between the life of tree and man which was once more than an analogy.³ The prohibition of mixed plantations (*kil'ayim*, Dt. 229) is probably another instance of the same kind. The prohibition of reaping the corner of a field (Lev. 1923-22),⁴ though now a charitable motive is attached to it, had primitively a very different reason: the corner was left to the grain-spirit.⁵ That the first sheaf of the harvest, the first cakes made of the new grain, were originally not an offering to the God of the land, but a sacrament of the corn-spirit, is shown by similar evidence.⁶

If all this belongs to an age which to the Israelites was prehistoric, the gardens of Adonis (Is. 1710, see ADONIS) and the women's mourning for Tammuz (Ezek. 814, see TAMMUZ)⁷ show that in mythologised, and doubtless foreign, forms, the great drama of plant life—the blooming spring, the untimely death under the fierce midsummer sun, and the resurrection of the new year, maintained its power over the Israelites as well as their neighbours.

The holy wells and springs in Palestine,⁸ like the mountains, were taken possession of by Yahwē when he supplanted the baals in their old haunts.

4. Water libation. No trace remains in the OT of distinctive rites or restrictions connected with sacred waters such as we know in abundance among the neighbours of the Israelites. But one ceremony was observed annually in the temple, at the Feast of Tabernacles, which must be briefly mentioned here.⁹ At this season water was drawn from Siloam, carried, amid the blare of trumpets, into the temple precincts through a gate called for this reason the water-gate, and poured upon the altar,¹⁰ running down through a drain into the subterranean receptacle. The reason for the rite is given in another place: 'The Holy One, Blessed is he! said, Pour out water before me at the Feast, in order that the rains of the year may be blessed to you.'¹¹ The libation was thus an old rain charm, a piece of mimetic magic.¹² A very similar ceremony at Hierapolis is described by Lucian.¹³

On sacred animals and supposed survivals of totem cults and superstitions see CLEAN AND UNCLEAN.

The heavenly bodies, especially the sun, moon, and (five) planets, appeared to the ancients to be living beings and since their influence on human welfare

5. The heavenly bodies.¹⁴ was manifest and great they were adored as deities (see *Wisd.* 132 ff.). The relative prominence of these gods in religion and mythology differs widely among peoples upon the same

resembled an army in the field.¹ In at least one old passage, the phrase 'the host of heaven' designates the beings (cp 'a certain spirit,' *v. 21*) who form Yahwé's court and execute his will (1 K. 22:19 *ff.*, Micah's vision; ep also Josh. 5:13 *f.*)² It is unnecessary to suppose that the author's conception here is essentially different from that implied in the more common use of the phrase, as though in the latter the stars were meant as merely astronomical bodies and in the former 'angels'; unnecessary, therefore, to seek a remote connection between senses which only our modern ideas have separated.³ The 'host of heaven' are the ministers of Yahwé.⁴

The other word, *mazzālōth*, occurs only in 2 K. 23:5 (מַצְלוֹת, מַצְלוֹת, Vg. *duodecim signa*, Pesh. *mazzālōth*, Tg. מַצְלוֹת), and—if the words are rightly identified—in Job 38:32 (מַצְלוֹת), and is variously understood of the signs of the zodiac (so Jerome above), or the planets. It appears to be a loan-word from Assyr. *mazzallu*, 'station, abode,' and points to the origin of the religion.⁵ For another cult of this class see QUEEN OF HEAVEN.

We have seen that the worship of the 'sun and moon and the whole host of heaven' came in under

Assyrian influence in the seventh century; it flourished under Manasseh; was temporarily suppressed, with other foreign religions, by Josiah in 621; but sprang up again after his death, and continued in full vigour down to the fall of the kingdom of Judah in 586; nor did that catastrophe extinguish it (see QUEEN OF HEAVEN, § 1). We cannot doubt that astrological divination, if not the worship of the heavenly bodies, was one of the strongest temptations of heathenism to the Jews in Babylonia (see Is. 47:13, cp Dan. 2:2 etc.).

The development of theological monotheism involved the assertion of Yahwé's supremacy over the heavenly bodies: he created them, he leads out their host in its full number, calls them all by name, so great is his power not one of them dares be missing (Is. 40:26, ep 45:12 Gen. 1:14 *ff.* Neh. 9:6). They are not mere luminaries set in the sky, but superhuman beings; it is by Yahwé's ordinance that the nations worship them (Dt. 4:19 *f.*, ep 32:8, Jubilees, 15:31 *f.*); the final judgment falls no less upon the high host on high, who guide and govern the nations in history, than on the kings of the earth on earth; they shall together be shut up in prison (Is. 24:21-23, Enoch 18:13-16 21:1-6, Rev. 9:1 *f.* 11; cp Dan. 8:13 *f.*)⁶

Philo is therefore in accord not only with Greek thinkers but with the OT in representing the stars as intelligent living beings; they are of a 'divine and happy and blessed nature,' nay, 'manifest and perceptible gods'—expressions which, as he means them, are not incompatible with his monotheism.⁷ The Essenes are said to have observed certain religious customs which imply peculiar veneration for the sun;⁸ but whatever may have been the origin of the practices, it may be assumed that they had found in them some symbolical meaning in harmony with the fundamental dogma of their Judaism.

NAZARENES (ΝΑΖΩΡΑΙΟΙ [Ti. WH]), the 'sect' (*αἵρεσις*) whose 'ringleader' (*πρωτοστάτης*), according to the orator TERTULLUS (*q.v.*), was Paul (Acts 24:5). 'Nazarenes' at once suggests 'Nazareth'; Blass thinks that there is an implication of contempt. But was 'Jesus of Nazareth' a contemptuous title? All that we can say is that 'Nazarenes' is specifically Jewish, as 'Christians' or 'Chrestians' (see CHRISTIAN, NAME OF, § 1) is specifically Gentile. It seems originally to have meant 'Galilaeans,' and to have expressed the same historical fact as the accusation formulated in Lk. 23:5 (cp Acts 10:37), 'He stirs up the people, teaching throughout all Judaea, and beginning from Galilee unto this place.' A Jewish-Christian sect afterwards appropriated the term.

At the time of Epiphanius the sect was to be found in Coele-Syria, Decapolis (Pella), and Bisanitis (Cocabe). According to that authority (*Pan.* 20:7) they were Jews pure and simple, but recognised the new covenant as well as the old, and believed in the resurrection, and in the one God and his Son Jesus Christ. Tertullus, however, is made to use the term Nazarenes in the broad sense of 'followers of Jesus'; it is associated no doubt with disparaging terms, but is not in itself disparaging.

NAZARETH (ΝΑΖΑΡΕΘ and ΝΑΖΑΡΕΤ are best attested; *Ναζαρά* [Ti. WH] is found in Mt. 4:13 [N¹B¹* 33], -αθ [Δ], -ετ [B²], -εθ [N²*D] and in Lk. 4:16-a [NB* 33], -αθ [Δ], -ατ [A], -εθ [D]; Keim, *Jesu von Nazara*, 1:319 2:421 3:670 argues strongly for *Ναζαρά*), whence **Nazarene** (*Ναζαρηνός* [Ti. WH], Mk. 1:24 10:47 [BLΔ], -ορηνος [D], -ωραιος [BAC]; 14:67 -αρηνος [BCL], -ορηνος [D], -ωραιος [Δ]; 16:6 -αρηνος [R, etc.], -ωραιος [LΔ]; Lk. 4:34 -ορηνος [D*] 24:19 [NBL], -ωραιος [AD]. *Ναζωραίος* [Ti. WH], Mt. 2:23 26:71 Lk. 18:37, -αρηνος [D, etc.]; Jn. 18:5, -αρηνος [D, etc.]; 7:19 19:1; also seven or, including Acts 9:5, eight times in Acts)

A 'city of Galilee,' the residence of Joseph and Mary; known as Jesus' 'own country' (*πατρίς*), because till

his baptism he resided there with his family (Mt. 4:13 21:11 Mk. 19 Lk. 1:26 2:43 39 5:4 16 Jn. 1:46 *f.* [45 *f.*] Acts 10:38).

From Nazareth Jesus derived his Talmudic name of 'Jesus the Nazarene' (יֵשׁוּעַ הַנְּזָרֵתִי *Sanh.* 43a 107b, *Sōf.*

47a), and his disciples the name 'Nazarenes' (נְזָרִיִּים *Ta'ān.* 27b). In the Gospels, too, and in Acts Jesus is constantly called 'Jesus of Nazareth,' and in Acts 24:5 Tertullus calls the Christians 'Nazarenes' (cp Mt. 2:23, on which see below).¹ Nazareth being thus closely identified with Jesus, it is strange to find that until the reign of Constantine (Epiph. *adv. Hær.* 1:136) it had none but Jewish inhabitants—a fact which is obviously fatal to the so-called traditional sites in the present town. In the time of Epiphanius there were certainly Christians at Nazareth; but it was not yet much visited by pilgrims,² for Jerome in the same century speaks of Paula as passing with all speed through Nazareth 'the Lord's nursing-mother' (*Ep.* 86).

In the sixth century, however, a large basilica stood there (Antoninus), and in the fifth a church over the house of Mary (Arculf). The place suffered severely from the Moslem conquest; but the Crusaders honoured it, not only by erecting churches there, but by transferring thither the see of Scythopolis. The expulsion of the Franks again reduced Nazareth to insignificance; but since the eighteenth century it has gradually grown in importance, and now numbers about 10,000 souls. Its secluded position, however, and the want of springs (there is only one), render this prosperity, which seems to have temporary causes, rather precarious.

The modern *en-Nāzāra* (as it is called by the natives)

is situated in Lower Galilee, N. of the great plain of Esdraelon, and nearly midway between the Lake of Gennesaret and the Mediterranean. It runs up the sides of a hill

¹ The Oriental Christians, however, call themselves *nažāra* (sing. *nažāri*).

² Was this due to indignation at the obstinate unbelief of the people of Nazareth, and their reported attempt on the life of their Prophet (Lk. 4:28-30)?

facing the E. and SE., in a basin entirely shut in by hills, except on the S., where a narrow rocky gorge leads to the great plain. Whether the earlier city occupied the same site, is doubtful; there are said to be traces of buildings just above. The monks of Nazareth assert that in Christ's time the city extended as far as the foot of the Jebel Kafsy (or if not, that it was entirely situated there), a mountain with a precipice overhanging the plain of Esdraelon, nearly 2 m. S. by E. of the present Nazareth. This is connected with the latest and clumsiest of all the Christian legends of Nazareth, and such a devout Roman Catholic as Guérin, though he treats the legend of the 'Mount of Precipitation' with respect, rejects without hesitation the theory on which it has come to be based.¹

As Guérin and Robinson agree, there is no reason whatever why some precipice of the north-western hill (the *Jebel es-Sih*) should not have been the scene of the 'precipitation' (*κατακρημνισαί* 'to hurl headlong down') intended by the writer of Lk. 4:29. There is a place by the Maronite church where the hill 'breaks off in a perpendicular wall 40 or 50 ft. in height'; this, Robinson thinks, may well have been the spot whither the Jews led Jesus. The difficulty is that in Mt. 13:54-58 and Mk. 6:1-6 we have a form of the tradition which is strictly inconsistent with that in Lk. 4:16-31. There are indeed some features in Lk.'s version which have illustrative value for the ministry of Jesus (viz. *a*, his choice of Is. 61:1-2 as a lesson in the synagogue; *b*, the use which he makes of the proverb, 'Physician, heal thyself,'² and *c*, his striking applications of details in the lives of Elijah and Elisha); but two even of these appear to be inconsistent with the version in Mt. and Mk., and to have been misplaced; and most certainly the story of the frenzied Nazarenes dragging their victim to a precipice cannot be reconciled with the natural and probable tradition in the two other Gospels. It is best not to foster historical illusions; a true life of Jesus can well afford to spare the improbable story of the dishonour put upon him by his own townsmen.

If sites consecrated by the presence of Jesus *must* be had, the two spots which have most claim to be so regarded are: (1) the spring known variously as 'Mary's Spring,' 'Jesus' Spring,' and 'Gabriel's Spring,' and (2) the summit of the mountain above Nazareth. (1) Of the spring, Socin remarks that 'as this is the only spring which the town possesses, it is all but certain that the child Jesus and his mother were once among its regular frequenters.'³ (2) Anyone oppressed by the limited life of a village would naturally climb the *Jebel es-Sih* (1602 ft. above the sea), and he would be amply rewarded for his pains. Far and near, spots famous in Israelitic history, as well as fair to look upon, are spread out before the eye. Mt. Tabor, much of the Great Plain, Mt. Carmel and the Bay of Acre, the fine plain of el-Battôf with Şefürîyeh (Sepphoris) at its S. end, Şafed on its hill, and the distant snows of Hermon—such is the noble panorama of the Nazareth mountain. Most important is it, however, to remember that in the time of Jesus, there were places not far off, throbbing with the tumultuous industrial life of the present. If

¹ Guérin (*Galilée*, 197) suggests that 'the mountain' (*τοῦ ὄρους*) in Lk. 4:29 may mean all the heights around Nazareth collectively! The truth is, however, that the precipice was selected solely on the ground of its prominence, when seen from Esdraelon. The legend is of very late origin.

² The natural interpretation of 'Ye will surely say to me,' etc. (Lk. 4:23), is that, according to the Nazarenes, their gifted townsman ought to have proved his supernatural capacities by doing something to raise himself in the social scale. Poverty was no better than a disease. 'Thou clever physician, who canst cast out demons from others, produce gold and silver and fine clothes for thyself, and we will believe thee. Make thyself fit for the highest society, and cease to consort with the meanest and vilest. Then we will give up calling thee "the carpenter," and if thou shouldst aim even at the Messianic crown, the Galileans shall be at thy side.' The evangelist himself seems to have misunderstood this traditional saying of Christ.

³ Baed. *Pal.* (3), 282.

the Nazareth which we know to-day is on the site of the Nazareth of Jesus, we can understand, as we gaze from that lofty observatory, the combination of sympathy with reserve or detachment which characterised Jesus. Retired, but not shut off from the world—haunted, but not disturbed, by a sense of adjacent populousness—Jesus would have found leisure in such a nook as this to brood over spiritual problems and the true wants of his people. Dean Farrar has given eloquent expression to the longing of the Christian heart to feel that here at least are 'holy fields' which the feet of Jesus have trodden.¹

At this point, however, the warning of Dean Stanley not to build our faith on symbols and sacred sites may well be referred to. It is very doubtful whether the beautiful mountain village of Nazareth was really the dwelling-place of Jesus. No such town as Nazareth is mentioned in the OT, in Josephus, or in the Talmud.

3. The name doubtful. It has been suggested indeed that Nazareth may be a corruption of En Sarid—*i.e.*, 'the fountain of Sarid'; Sarid is the name of a place on the S. border of Zebulun in the MT of Josh. 19:10-12.² Unfortunately, the name is most probably incorrectly read (see SARID), and the supposed corruption is difficult to comprehend. As to the Talmud; it is supposed by some that Nazareth is the 'white house on the mountain' (*בית לבן בהר*), which was one of the places that supplied wine for the drink-offerings; and this has been illustrated by the statement of Quaresmius that Nazareth was formerly called *Medina abiat*—*i.e.*, 'civitas alba' (?). Quaresmius, however, is no older than the sixteenth century, and the 'white house' of the Mishna is probably to be identified with LEBONAH (*g.v.*). The earliest mention of the name Nazareth (*נצרת*) is thought to be in an elegy of Kalir for the ninth day of Ab, where נצרת is the designation of a 'course' of priests settled at Nazareth. Kalir's date is perhaps 900 A.D., but the elegy is based on an ancient Midrash now lost.⁴ This, however, is rather vague; and the question would still remain, What is meant by Nazareth?

Was Nazareth originally the name of a town (or village) at all? There are two NT passages which may well suggest a doubt. One is Mt. 2:23, 'And he came and dwelt in a city called Nazareth, that it might be fulfilled which was spoken by the prophets, He shall be called a Nazarene.' The passage has been much discussed, but without sure result. Most commentators have seen in it an allusion to the prophecy of the 'shoot' נצר, *nēṣar* in Is. 11:1b; so already *eruditi Hebraei* in Jerome's time. It is hardly conceivable, however, that the synonymous word *šemah* (*שמע*), which had long been in possession of the field as a Messianic title, should have been displaced among the Christians by *nēṣer* (*נצר*). It is rather an allusion to Is. 9:1f., 'the land of Zebulun and the land of Naphtali, Galilee of the Gentiles,' which is quoted in Mt. 4:13-16 with reference to Jesus' dwelling in Capernaum, but which was surely applied by the first Christians to his early ministry by the Sea of Galilee—not to his residence at Capernaum, nor to his earlier dwelling at Nazareth, but to his Galilæan ministry as a whole. In a word, Nazareth ought to mean 'Galilee,' and Nazarene ought to mean 'Galilæan.'

The other passage is Jn. 1:45f., where Philip tells Nathanael that he and others have found the Great One spoken of in the scriptures, and Nathanael returns answer, 'Can there any good thing come out of Nazareth?' In passing, we cannot avoid correcting the text of v. 46. It is plain, both from the context and from the parallel passage Jn. 7:41, that Nathanael means, not to put a slight on the moral character of the Nazarenes, but to affirm as the result of his study of the scriptures, that the Messiah cannot proceed from Galilee. Therefore, *τι ἀγαθόν* must have taken the place of some title of the Messiah. The right reading must be *ὁ ἅγιος*, 'the Holy One,' which is a title of the Messiah in Acts 3:14 Rev. 3:7 (cp John 6:69, reading *ὁ ἅγιος τοῦ θεοῦ*, with WH and RV, Mk. 1:24 Lk. 4:34).

The other passage is Jn. 1:45f., where Philip tells Nathanael that he and others have found the Great One spoken of in the scriptures, and Nathanael returns answer, 'Can there any good thing come out of Nazareth?' In passing, we cannot avoid correcting the text of v. 46. It is plain, both from the context and from the parallel passage Jn. 7:41, that Nathanael means, not to put a slight on the moral character of the Nazarenes, but to affirm as the result of his study of the scriptures, that the Messiah cannot proceed from Galilee. Therefore, *τι ἀγαθόν* must have taken the place of some title of the Messiah. The right reading must be *ὁ ἅγιος*, 'the Holy One,' which is a title of the Messiah in Acts 3:14 Rev. 3:7 (cp John 6:69, reading *ὁ ἅγιος τοῦ θεοῦ*, with WH and RV, Mk. 1:24 Lk. 4:34).

¹ *Life of Christ*, 78.
² Edersheim, *Life and Times of Jesus the Messiah*, 1:146.
³ Mishna, *Menahoth*, 97.
⁴ Neubauer, *Géogr. du Talmud*, 82, 85, 190; cp 117.

τα in τὸ ἀγαθόν was originally ται (a dittogram); ἀγαθ is a corruption of ἀγιος (θ and σ were confounded in pronunciation); σ may perhaps come from ο, i.e., δ, transposed).

Thus the passage becomes, 'Can the Holy One proceed from Nazareth,' and 'Nazareth' (cp Jn. 7 41, and also Mt. 26 69 with ν. γα) means 'Galilee.' We cannot, indeed, prove this beyond dispute; but we can perhaps make it as good as certain from a critical point of view. The form Nazareth is probably less correct than Nazara, and Nazara implies a Hebrew form נצר, which is also required to account for נוצרי, the Talmudic word for Nazarene (see above, § 1). It is probably the same name which enters into the name Gennesar—a more correct form than GENNESARET (γ. ν.), found in 1 Mac. 11 67 [AN^c. 4. c. 13], in Mt. 14 34 (D*), and Mk 6 53 (D), in Josephus, and in all the Jewish and Christian Aramaic versions.¹

We can now understand an enigmatical phrase in the Talmud. According to Neubauer,² בית לחם צרייה (Bethlehem, 700) is equivalent to ל' נוצרייה—i.e., 'Bethlehem near Nazareth,' or, 'in the district of Nazareth'; it is to the Bethlehem in Zebulun that reference is made. Grätz differs slightly from this; he thinks that the northern Bethlehem was, in the post-exilic period, called Nazareth, so that צרייה, נוצרייה, somehow means Nazareth. The truth surely is that *Bethlehem nāṣārīyah* means 'the Galilaean Bethlehem.' Just as the southern Bethlehem, however, was sometimes called 'Bethlehem (of) Judah' (so five times in OT, cp also Mic. 5 2), so, we need not doubt, the northern Bethlehem was called נצר בית לחם. 'Bethlehem (of) Nazar (or Nešar)'—i.e., Bethlehem of Galilee.

This furnishes a key to the famous problem as to the birthplace of Jesus. Why was Nazareth called the

4. The birth-place of Jesus. πατρίς or 'fatherland' of Jesus if he was really born, not at Nazareth, but at Bethlehem? And how came Joseph and Mary, who apparently felt a strong attraction to Nazareth, to go to Bethlehem-Judah at all? Note, by the way, that Mt. 11 25 does not name the birthplace of Jesus, and that Mk. and Jn. pass over the birth of Jesus altogether, allowing us to suppose that his childhood and youth were altogether passed at Nazareth. To the question why Nazareth was called the fatherland of Jesus, no direct answer is furnished. All that Mt. can tell us is that Joseph was afraid to go into Judæa because of Archelaus, and therefore 'turned aside into the parts of Galilee, and came and dwelt in a city called Nazareth.' To the question why Joseph and Mary went to Bethlehem-judah, Mt. virtually replies that the Christ had to be born there because of the prophecy in Mic. 5 2 [1], whilst Lk.'s answer is that Joseph, who had previously dwelt at Nazareth, was obliged to go up (with his wife) to Bethlehem in Judæa, because of the census of Cyrenius. The statement of Lk. is accepted by conservative scholars on the ground that recent researches (see QUIRINIUS) have made it probable that one of several periodical censuses took place in Palestine as elsewhere in 8 B.C. or in 6 A.D. But obviously the reasoning is imperfect. If the Gospels agreed as to the main circumstances of the birth of Jesus, so that we could assume a popular tradition, then the historical plausibility of Lk.'s setting would be an argument in favour of the tradition. Such, however, is not the case. The discrepancies of the evangelists compel us to make some hypothesis, and the hypothesis which best accounts for the phenomena is, not that which is generally current among NT critics, and is vigorously maintained by Keim (*Jesus of Nazara*, 2 108)

¹ Cp Wellh. *IJG* (2), 255, who thinks that the form 'Gennesaret' arose by contamination with Kinnereth or with Nazareth. He refers to Halévy as the author of the explanation of *nesār* in Gennesar as = Galilee, and of Nazarene as = Galilaean. According to Buhl, however (*Pal.* 113, n. 229), Halévy does not explain *Nesār* as 'Galilee,' but as a city called, from its inhabitants, 'city of carpenters' נְסָרֵי נְסָר.

² *Géogr. du Talm.* 189.

—viz. that the birth of Jesus in Bethlehem was regarded as an indispensable sign of the Messiahship, but that, in the earliest form of the evangelical tradition, Jesus was said to have been born in Bethlehem-Nazareth (= Bethlehem of Galilee). The Bethlehem of Zebulun (Josh. 19 15), about 7 m. WNW. of Nazareth and a somewhat less distance from Sefuriyeh, is the city meant (see BETHLEHEM ii.). The title Bethlehem-Nazareth was misunderstood by some of the transmitters of the tradition, so that while some said, 'Jesus was born at Bethlehem,' others said, 'Jesus was born at Nazareth.' 'Bethlehem' without any explanatory addition was naturally supposed to be the southern Bethlehem, and the well-known narratives so poetic, so full of spiritual suggestion, in Mt. 2 and Lk. 21-20 (which are unsupported by the other Gospels) have arisen in consequence. To this theory it is no valid objection that it involves going behind the present evangelical narratives; that is in fact indispensable to historical criticism,—we have to do so continually in OT criticism, and no good reason has been offered for invariably acquiescing in the oldest extant forms of the evangeic traditions. We must also avoid exaggerating the influence (real as it doubtless was) of OT prophecy on the traditional narratives of the life of Jesus. It is all the more necessary to confront the complex critical problem bravely, because, in spite of the existence of rock-cut tombs up the hill, towards the W., we cannot perhaps venture to assert positively that there was a 'city called Nazareth' in Jesus' time.

What the meaning of Nazareth (i.e., Galilee) is, can hardly be made out. The current explanations, 'guard,' 'branch,' 'flower' (Jerome, *Ep. xlvii. ad Marcellianum*, 'flore[m] Galilææ'), have a very insecure basis.

The historical result relative to Jesus' birthplace here arrived at agrees with that of Grätz (*MGWJ*, 29 [1880], 481-484); it had already been hinted by Neubauer, *Géogr. du Talm.*, 1868, p. 197.

T. K. C.

NAZIRITE, AV Nazarite (נָזִיר or נְזִירִים) or נְזִירֵי אֱלֹהִים, i.e., 'consecrated to God'; ΕΥΖΑΜΕΝΟΣ, ΗΥΓΜΕΝΟΣ [in Nu.], ΑΓΙΑΣΜΟΣ, ΗΓΙΑΣΜΕΝΟΣ [in Am. and in Judg. [A]], ΝΑΖΑΙΡ, ΝΑΖ[Ε]ΙΡ, also ΑΓΙΟΣ [ΑΓΙΟΣ] ΘΕΟΣ [in Judg.]] was the name among the Hebrews for one who had in a peculiar sense separated or devoted himself to Yahwè² (in Nu. 6 2 f., 5 f., 12 וְנָזִיר 'to take the Nazirite vow of separation or consecration'; cp the noun *nāzîr* [נָזִיר], applied in the same chapter to the consecration of the Nazirite; and cp CONSECRATE). The same word (*nāzîr*) occurs in Syriac—not as a mere loan-word;—it is applied, e.g., to maidens consecrated to the service of Belthis;³ in Hebrew the best rendering is 'devotee.' Our first question, in considering the *nāzîr* or 'devotee,' was regard to the essential conditions of his state. The special characteristics of a Nazirite devotee were unshorn locks and abstinence from wine (Judg. 13 5, cp Moore, *ad loc.*; 1 S. 1 11 Am. 2 11 12); full regulations for the legal observance of the Nazirite vow are given in Nu. 6, where every product of the grape vine is forbidden, and the Nazirite is further enjoined to abstain from approaching a dead body, even if it be that of his nearest relative. The law in question is not pre-exilic, and is plainly directed to the regulation of a known usage. It contemplates the assumption of the vow for a limited period, and gives particular details as to the atoning ceremonies at the sanctuary by which the vow must be recommenced if broken by accidental defilement, and

¹ So Judg. 13 7 16 17 [B] (ναζ[ε]ιραῖος, AL). Nestle thinks that this use of ἀγιος (ἀγιον) may illustrate τὸ γεννώμενον ἀγιον in Lk. 1 35.

² On the relation of נָזִיר, 'to consecrate,' and נָזַר, 'to vow,' see We. *Heid.* (2), 143; and especially *RS* (2), 482 f.

³ S. Isaac. *Ant.* (Bickell), 1 212; *RS* (2), 483.

the closing sacrifice, at which the Nazirite, on the expiry of his vow, cuts off his hair and burns it on the altar, thus returning to ordinary life. Among the later Jews the Nazirite vow of course corresponded with the legal ordinance, which was further developed by the scribes in their usual manner (Mishna, *Nazir*; cp 1 Macc. 3.49 Acts 21.23 ff., Jos. *Ant.* xix. 61, *Bt* ii. 151).

How far, we must now ask, does this ordinance agree with pre-exilic (*i.e.*, post-Solomonic¹) usage? The two passages generally appealed to are Judg. 13 and 1 S. 1. An objection, however,

2. Pre-exilic usages.

will presently be raised to the acceptance of the second as an authority for the early Nazirite usage, and even as regards the first it is not impossible that in its present form it may have received modification. This remark applies to Judg. 13.47-14, where the details imposing an elaborately strict regimen may perhaps be due to an interpolator (Böhme). This at least is certain, that the only detail of the later Nazirite vow which is authenticated by references in the Samson-legends is the wearing long hair. That the hero was regarded originally as an abstainer from wine is by no means probable, and it is evident that he did not avoid impurity, for he is said to have touched the carcass of a lion, and to have been often in contact with the slain. Of Samuel too (if 1 S. 1 may here be quoted) we are only told that his mother vowed to give him to Yahwé all his days, and that no razor should come upon his head (1 S. 11; note the addition of ס , 'wine and strong liquor he shall not drink'). It is not strictly critical, however, to refer to Samuel, for he is nowhere called a Nazirite (Sirach's description [Ecclus. 46.13c] 'a *nazir* of Yahwé in prophecy,' נזיר, נזירא, does not count), and from Ezek. 44.20 we may probably infer that letting the hair grow was an ancient priestly custom.² Rightly does Wellhausen assert that according to the true text of 1 S. 11 Samuel was neither a *nāthin* (ס *δῶσω δορόν*, cp Nu. 36.186) nor a *nazir*.

It is plain therefore that the conditions of Naziritship in ancient times were much less strict than afterwards; plain, too, that the framers of the legal ordinance had no comprehension of the original Nazirite vow. In the case of Samson, who is the only known example of a Nazirite in early times, the long hair is a mark of consecration to God (נזיר אלהים, Judg. 13.5) for a special service to his people. The hair being a symbol and centre of vitality (see CUTTINGS OF THE FLESH, § 2; HAIR, § 2), to leave it uncut during an arduous undertaking in which the divine aid had been specially implored,³ and to sacrifice it when success had been obtained, were equally natural. Examples of this primitive custom are given by Spencer, *De Legibus Heb.* 31, cap 6; but the most important parallels come from Arabia.

There the vow was generally one of war or revenge (*Hamāsa*, 167; *Antara*, *Mō'al* 174; *Moh. in Medina*, 201), and till it was accomplished the man who vowed left his hair unshorn and unkempt, and abstained from wine, women, ointment, and perfume. Such is the figure of Shanfara as described in his *Lāmīya*. The observances of the *ihram* belong to the same usage (see *Ency. Brit.* 15.674; WRS, *Rel. Sem.*(2), 333), and we find that at Tūif it was customary to shear the hair at the sanctuary after a journey (*Moh. in Medina*, ed. Wellh. 381). Cp also Schwally, *Kriegsalterthümer*, 1. (1901).

The difference which may be noticed between the Arabic usage and the easy Naziritship of Samson, need not surprise us. After all, SAMSON [*q.v.*] is not a historical character, but a product of the popular wit, which vivified dim historical traditions of a long contest with the Philistines, and refused no detail suggested by mythic or other stories of heroic men. That Nazirites in pre-exilic times abstained from wine, need not be doubted. Whether the enjoyment of every 'product of

¹ Post-Solomonic, because the date of the documents is much later than that of the events professedly described in them.

² *RS*(2), 483; Smend, *AT Rel. Gesch.*(2), 95, n. 2; cp HAIR, § 3.

³ See Judg. 5.2, according to WRS's interpretation. Cp, however, HAIR, § 3.

the vine' was forbidden by usage, seems more uncertain; and the account of the Rechabites in Jer. hardly justifies us in asserting this.¹

The spirit of warlike patriotism that characterised the old religion of Israel naturally produced Nazirites, and

3. Later developments.

we may assume that the vow of such persons resembled Shanfara's more closely than Samson's. There is an unmistakable trace of this asceticism in parts of the life of David (see 2 S. 11.11 and perhaps 1 S. 21.4 ff.). We need not suppose, however, that the ancient Nazirites were exclusively warriors. They were also speaking examples of the old Israelitish ideal of life, and may therefore have been drawn from different classes. From the allusions in Am. 2.11 ff.² we are led to suppose that at one time they had an importance—perhaps even an organisation—parallel to that of the prophets, which the true servants of Yahwé recognised as divinely sanctioned, while, on the other hand, the Canaanised popular religion of the eighth century B.C. made light of an institution that belonged to a very different religious type from Canaanite nature-worship. The Nazirites described by Amos have also a parallel (so far as not drinking wine is concerned) in the RECHABITES [*q.v.*].

By the sixth century B.C. the Nazirite vow has lost its old simplicity and much of its old importance. The Priestly Code knows only of a temporary Naziritship, and presupposes that the vow may be taken by women; the directions are given in full in Nu. 6 (see above, § 1).

It may be noted here that in Lam. 4.7 the rendering 'her Nazirites' (AV) is altogether opposed to the context; RV gives 'her nobles.' Whether, however, נזיר ought to be interpreted thus widely, may be doubted. It is possible to read רזיקה, 'her magnates'; the transposition of letters is very easy, and we are spared the necessity of supposing a rare meaning, 'noble,' for נזיר. In Lev. 25.11 it is doubtful whether נזיר ought to be rendered 'an unpruned vine.' Gray, indeed, would use this as a proof that the secondary sense of the word 'Nazirite' (a person with unshorn hair) had overpowered the primary sense of 'devotee.' But surely it is more natural (with Grätz) to emend נזיר into נציר (vintage), corresponding in *v.* 5 to קציר (harvest).

On this we shall not dwell (see Dillmann's commentary); we pass on at once to the NT, and notice

4. NT references.

that some commentators find the Nazirite vow referred to in Acts 21.23 ff. No less a person than the apostle Paul is supposed by them to have taken such a vow, but without waiting till he had fulfilled the minimum period of thirty days' residence in Palestine required by the school of Shammai³ (cp ACTS OF THE APOSTLES, § 7). This, however, is by no means certain. Cp also Lk. 1.15 (John the Baptist), and the traditional account of James the Just (see JAMES, 3).

NEAH (נְהָא; $\alpha\omicron\zeta\alpha$ [B], $\nu\omicron\gamma\alpha$ [L], $\alpha\eta\eta$ [A]),

in Zebulun (Josh. 19.13f), possibly a corruption of NEIEL [*q.v.*], which appears in *v.* 27, very near the valley of Iphtah-el (also mentioned in *v.* 14), in the delimitation of Asher.

¹ It may be questioned whether the Kenite kinsmen and allies of the primitive bené Israel can have been really opposed to the cultivation of the vine. The Negeb was, in parts, a vine-producing country (see NEGED).

² The slight doubt expressed by G. B. Gray whether the Nazirites in the time of Amos were compelled to abstain from wine, seems hardly necessary.

³ The school of Hillel, however, declared that the residence must be for the whole time to which the original vow referred.

NEAPOLIS

NEAPOLIS (ΝΕΑ ΠΟΛΙΣ, Acts 16:11; WH, ΝΕΑ-ΠΟΛΙΣ), the port at which Paul landed on the second day from Troas, when he sailed thence in response to the vision calling him to Macedonia. Originally belonging, like all this coast, as far as the Strymon, to Thrace,¹ Neapolis was at this time (about 50 A. D.) in the province of Macedonia. Its name ('New Town') would indicate that it was either a recent foundation or an older and unimportant place awakened to new life by the accession of fresh colonists—perhaps from Daton, which was in the neighbourhood (Strabo, 330, frag. 36, *Δατηνῶν πόλις Νεάπολις καὶ αὐτὸ τὸ Δάτον*), if, indeed, Daton was not the original name of Neapolis. Doubtless the growth of Neapolis was closely associated with the rise of Philippi, the centre of the mining district on the farther side of Mt. Symbolum. Neapolis was the port of Philippi, about 10 m. inland (9 R. m., Appian, *BC* 4:106; cp *Itineraries*). It lay opposite the island of Thasos (Dio Cass. 47:35, *κατ' ἀντιπέρας Θάσου*). These indications point to the site of the modern *Kavalla*, which is situated on the bay of the same name, on a promontory with a harbour on either side. The triremes of Brutus and Cassius lay here at the time of the battle of Philippi (44 B. C.; Appian, *Lc.*). Remains of a Roman aqueduct, etc., and many inscriptions, are found at Kavalla; but these facts do not prevent Cousinery from placing Neapolis at *Eske-Kavalla* (Old Kavalla), a deserted harbour about 10 m. to the W. (*Voyage dans la Macédoine*, 2:119 f.).

Ramsay points out that the writer of the narrative in Acts (in his view, Luke) 'hardly ever omits to name the harbours which Paul sailed from or arrived at, even though little or nothing in the way of incident occurred in them' (*St. Paul the Traveller*, 21). Having once mentioned Neapolis, he omits its name on the subsequent journeys (Acts 20:6). Here, as in other sea-ports, Paul apparently found no opening (cp the case of Seleucia, Acts 13:4; of Attalia, Act 14:25; of Cenchrea, Acts 18:18).

W. J. W.

NEARIAH (נִיָּרְיָהּ), § 37; but is it not like PELATIAH and SHEPHATIAH a distorted form of a gentile? Cp also NOADIAH [Che.]—ΝΩΔΙΑ[ε]ΙΑ [BA], ΝΕΑΡΙΟΥ, ΝΑΔΡΙΑC [L].

1. A descendant of Zerubbabel, 1 Ch. 3:22 f.

2. A Simeonite captain, temp. Hezekiah, 1 Ch. 4:42.

NEBAI RV NOBAI (מְטַבַּי נְבוֹי), Neh. 10:19 [20], called in Ezra 10:43 NEBO (*q. v.*, iii. 2, end).

NEBAIOTH or **NEBAJOTH** (AV in Gen.; נְבוֹיֹת, נְבוֹיָהּ; נְבַאִיֹּת, נְבַאִיֹּת, *NEBAIOTH*), b. Ishmael, Gen. 25:13 (נְבַאִיֹּת [E]) 36:3 (נְבַאִיֹּת [D]), 1 Ch. 1:29 Is. 60:7. A North Arabian nomad people, mentioned with KEDAR (*q. v.*), just as the Nabaiti are mentioned in Assyrian inscriptions with the Kidrai and the Aribi. See NABATEANS, and cp ISHMAEL, § 4 (1), also Glaser, *Skizze*, 2:266 f., Hommel, *AHT* 275 (who connects the name with Nebo, on the analogy of Ashtaroth, Anathoth).

NEBALLAT (נְבַלָּת; נְבַלָּאֵת [N^{ca} mg. inf.], נְבַלָּאֵת [L], BN^a A om.), a Benjamite town, named with HADID and LOD, Neh. 11:34. Now *Beit Nebālā*, situated on a low hill, 3½ m. NE. of Lydda, and nearly 2 m. N. of Hadid. See Rob. *BR* 330; Guérin, *Sam.* 2:67 f.; *PEFM* 2:296.

NEBAT (נְבַת), cp Sab. אֱלִימִנְבַת נְבַתֵּל; נְבַבַּת, נְבַבַּת [BAL]), the 'father' of JEROBOAM I. [*q. v.*] (1 K. 11:26 12:15 etc.), but properly a clan name of the type of 'Ishmael,' 'Jezeel' (see below).

Neubauer (*Stud. Bib.* 1:221) connects it with NABOTH (*q. v.*), the confusion of ב and נ being not impossible, and suggests that Nebat and Naboth may both be connected with NEBAIOTH (*q. v.*), the N. Arabian Nabaiti (= נְבַאִיֹּת) of Ašūr-bani-pal, and the נְבַבַּת of the Nabatean inscriptions (see NABATEANS). We might almost as well compare the Babylonian Nabutu of the inscriptions of Tiglath-pileser III., Sargon, and Sennacherib.²

¹ Pliny (*HN* 4:18) reckons it Thracian; but Strabo (330) and Ptol. (3:13) connect it with Macedonia.

² See Schr. *KAT* (2), 147; *KGF* 99 ff.

NEBO

who are Aramæans. True, the above Sabæan parallels suggest a different explanation: '[God is] splendour'; cp Ass. *nabātu*, 'to shine' (Dul. *Prolog.* 98). But we must perhaps not be too confident of the originality of the formation with *el*, 'God.'

T. K. C.

NEBO (נְבוֹ), a Babylonian deity (Is. 46:1, נְבַבֹּ [B Theod. Aq.], נְבַבֹּ [Symm.], ΔΔΓΩΝ [NAQ]); *Nabū*, the patron of Borsippa, is meant. The proximity of Borsippa to Babylon naturally led to the association of Nabū with the still more popular Marduk (MERO-DACH). In the later theological system Nabū became Marduk's son. 'Every New Year's day the son paid a visit to his father, on which occasion the statue of Nabū was carried in solemn procession from Borsippa across the river, and along the main street of Babylon leading to the temple of Marduk; and in return the father deity accompanied his son part way on the trip back to E-Zida [the name of Nabū's temple at Borsippa].'¹ With the Mandæans and Harranians Nabū was the deity corresponding to Hermes or Mercury; with the Babylonians, too, he was closely connected with the planet Mercury. One of the ideograms connects his name with *nabū*, 'to call, name, proclaim.' He was reckoned the originator of the art of writing on tablets. According to Gunkel² the mention in Ezek. 9:2 of a supernatural being (one of six) in human form, 'with a writer's inkhorn at his side,' is suggested by the descriptions of Nabū, who is not only the god of wisdom, but the herald of the gods (hence his name Papsukal, supreme, or sacred, messenger). His consort was named Tašmitum, with whom ASHIMA [*q. v.*] is by some identified. Whether we may venture to assume that the name of this Babylonian god attached itself to the Moabite and Judahite towns called Nebo, and to the mountain known as Nebo, and also entered into some personal names such as BARNABAS (for Barnebūs?) and MACHNADEBAI, seems to the present writer doubtful. It seems more probable that mutilation has taken place in some or all of these cases, and that Nebo comes in the case of Mt. Nebo from Negbu (see NEBO ii., § 2), and in the case of the other names from Nadabu (an old ethnic name; see NADAB). Cp the identification of the Moabite Nebo with NADABATH. See BABYLONIA, § 26.

T. K. C.

NEBO (נְבוֹ), נְבַבַּי [BAFL]). Nebo in P is the name of the mountain from which Moses surveyed the promised land, and where he died (Dt.

1. **The old theory.** 32:49 f. 34:1). It is also mentioned in the itinerary (Nu. 33:47) as a place before which the Israelites encamped, in the mountains of 'the ABARIM' (*q. v.*)—a plural noun which is commonly taken to mean the NW. part of the Moabite plateau with Mt. Nebo. Among the ridges by which this great plateau descends to the Jordan valley there is one which specially draws attention by a headland, 5 m. SW. of Heshbon, and 9½ m. due E. of the NE. end of the Dead Sea, to the flat top of which, crowned by a ruined cairn, the name Nebā is attached.³ By R (Dt. 34:1) Mt. Nebo is identified with the 'top (or, as some think, headland) of the Pisgah,' which D₂, and probably also J, regarded as the mountain of Moses' death. About a mile from Nebā are the ruins (Byzantine) of Šiāghah, and half a mile to the SW. the ridge ends in a projecting spur called Rās Šiāghah, the slopes of which fall steeply on all sides to the Jordan valley and the Dead Sea (Conder, *Heth and Moab*, 132 f.); it is usual to identify this headland with 'the Pisgah' (see PISGAH). The view from both points is nearly the same; but the Rās Šiāghah commands a fuller view of the Jordan valley beneath. It is admitted, however, by all that the

¹ Jastrow, *Rel. of Bab. and Ass.* 127.
² Der Schreiberengel Nabū im AT u. im Judentum, *Archiv f. Religionswiss.* 1(3):294-300.

³ This identification accords with the statement of Eus. (*OS* 282:93) that Mt. Nebo (*ναβου*) was 6 R. m. W. of Heshbon. Yet, until quite recent times, it has been usual, following Seetzen, to identify Nebo with the Jebel Attārūs, about 10 m. to the S. Against this see Tristram, *Land of Israel* (1866), p. 240.

description of Moses' survey in Dt. 34:1-3 does not entirely fit the prospect from any of the Moabite mountains. Conder says—

If we make the simple change of reading 'towards' instead of 'unto' in the cases of Dan and the 'western sea' . . . the whole account reads as correctly as that of an eye-witness; but it is certain that Dan (if the site near Baniās be intended), and the utmost, or 'hinder,' or most western sea, cannot be visible from Nebo to any mortal eye (*Heth and Moab*, 135).

Driver naturally enough passes over this improbable suggestion, but thinks (*Deut.* 420) that 'the terms of Dt. are hyperbolic, and must be taken as including points filled in by the imagination, as well as those actually visible to the eye,' whilst Dillmann, Wellhausen, and others regard the whole description as a later insertion which spoils the simplicity and naturalness of the original narrative. Lastly, W. F. Birch, being dissatisfied with the views of English scholars known to him, surmounts the difficulties by proposing new sites for Dan, the 'hinder sea,' and Zoar, assuring us that if we will only identify Pisgah with Tal'at el-Benāt, the biblical description will be found to be literally true (*PEFQ*, 1898, pp. 110 f.).

Certainly the last-named writer seems to be correct in requiring the description to be taken literally.¹ It is

2. A new theory.

essential that Moses should be compensated for his exclusion from the Promised Land by at least a sight of it in its full extent (cp Dt. 3:27), and we are expressly told that Yahwè showed it to him, and (Dt. 34:7) that his eye had not grown dim from age. Dillmann's suggestion may be plausible; the text, as it stands, has peculiarities, and these, to critics of the text as it stands, may seem to point to a later editor. If, however, there are traces in Ex. and Nu. of an underlying story of the Israelites' pre-Canaanitish period which differs in important respects from that which lies before us on the surface (see MOSES, § 16), we are justified in examining the text of Dt. 34:1-3 rather more closely. The result of such a searching criticism is that Moses, according to the primitive story, no more drew his last breath on the traditional Mt. Nebo than his brother Aaron did on the traditional Mt. Hor. The corruptions of the text presupposed in the following attempt to restore the original (see *Crit. Bib.*), which the late narrators transformed, may all, it is believed, be justified by parallel cases of the same kind elsewhere.

And Moses went up from Arabia of Musri to the top of the mountain of the Negeb of Jerahmeel [fronting Jerahmeel].² And Yahwè showed him Jerahmeel as far as Dan, and all Tapūhīm [the land of Jerahmeel and Musri], all the land of Judah as far as the Jerahmeelite sea,³ and the Negeb of Jerahmeel [the land of Jerahmeel, the land of Musri].

This was, in fact, the land, the fairest part of which the spies of the Israelites (surely two, as in Josh. 2:1) had, according to primitive tradition, explored, and which Moses, according to the same tradition, surveyed before his death from a prominent mountain on the border of the Jerahmeelite Negeb. The mountain may, for shortness, have been sometimes called יהרִיבִינְבוּ, Mt. Negbu; its full name was the Mountain of the Negeb of Jerahmeel.

There are three other passages which, when critically emended, confirm the view which is here taken. These are Nu. 21:20 23:14 28 and Dt. 32:49.

(a) Nu. 21:20. We can now supplement the articles BEER and NAHALTEL. The stations mentioned are, most probably, Beer-Jerahmeel, Bamoth, the top of the Pisgah.⁴ The third of these, however, has really a fuller title. As Grätz has seen, הַיַּמָּה ('the

¹ He is also partly right, as will be seen, in supposing the sea to be the Dead Sea—i.e., the original story meant this, though not the story as transformed in the traditional text.

² The words in square brackets are to be regarded as glosses. For the reading יִרְחַמְאֵל instead of יִרְחַמְאֵל cp ΜΕΡΗΘΙΟΣΗΤΗ, PASEAH; for תְּפֻחִים instead of תְּפֻחִים cp ΝΑΡΤΟΥΜΗ; and for יִרְחַמְאֵל instead of יִרְחַמְאֵל see JERICHO, § 2.

³ The true original name of the Dead Sea; see SALT SEA. For the reading יִרְחַמְאֵל הַיַּמָּה for הַיַּמָּה הַיִּבְרִיתִי in Ezra 2:31.

valley') is probably miswritten for יהרִיבִינְבוּ. Following the parallel passage, when corrected as above, we should read—'and from Bamoth to the slopes of the mountain of the Negeb of Jerahmeel, which looks forth towards the highlands of Edom.' יהרִיבִינְבוּ, like יִרְחַמְאֵל in Ps. 68:7 [8], is probably a corruption of יִרְחַמְאֵל.

(b) Nu. 23:14. 'And he took him to the highlands (יִרְחַמְאֵל) of Zophim, to the top of the Pisgah.' So the text stands. 'Zophim,' however (צוֹפִים), should probably be 'Misṣur' (מִצְרַיִם), and 'the Pisgah' should be 'Jerahmeel.'

(c) Nu. 23:28. 'And Balak took Balaam to the top of the PEOR, that looks forth upon the desert.' So according to MT. But 'the Peor' (הַרְפְּעוֹר) has, most probably, been corrupted out of 'the mountain of Misṣur' (מִצְרַיִם), and 'the desert' (הַיַּשְׁבֵּן) should be 'the highlands of Edom' (יִרְחַמְאֵל). Conder's account of the view from his 'cliff of Peor' (*Heth and Moab*, 142) must not tempt us to follow him. Balak was probably not a Moabite, but a Misrite (see ZIPPOR).

(d) Dt. 32:49. 'Go up to this mountain of the Abarim, to Mt. Nebo, which is in the land of Moab, which fronts Jericho.' So MT. But 'the Abarim' should probably be 'the Arabians' (עֲרָבִים); 'Moab' should be 'Misṣur'; 'Jericho' should be 'Jerahmeel.'

We have now to ask how the geographical requirements of all the passages referred to can be most satisfactorily met. The mountain, it appears, was in the Negeb; it was N.E. of Kadesh-Jerahmeel (Kadesh-barnea); it 'looked forth' towards Edom (cp Nu. 20:16); it commanded a view of the Negeb of Jerahmeel as far as the southern Dan (i.e., probably Halūshā; see SHECHEM, ZIKLAG), and of Judah (the early, diminutive land of Judah) as far east as the Jerahmeelite Sea (i.e., the Dead Sea). Even if it be true that the Moses clan itself did not take Zarephath (*Sebeita?*), but left this to a kindred clan, we may still venture to place the mountain not far from Zarephath. Very possibly it is some part of the 'extensive mountain plateau called Magrāh, which, though intersected by several broad wadies, runs northward, without any break, to a point within a few miles of Wady es-Seba', where it is divided by Wady er-Raḥamā (cp Jerahme'el) from the mountains of that name' (E. H. Palmer; cp NEGEB). There are certainly different points in this great plateau from which impressive views might be obtained both towards Edom and towards the Negeb of Jerahmeel and Judah. Thus the interest of the Negeb is considerably heightened by the results of a not merely negative, but reconstructive, criticism. See PISGAH. T. K. C.

NEBO (נְבוֹ, ΝΑΒΑΥ), a hill town taken by the Reubenites with Heshbon, Elealeh, etc. (Nu. 32:3 [v. 38 A βαμω, F ναβω; BL om.], 33:47 1 Ch. 5:8. Omitted in the Reuben list, Josh. 13:15). Mesha (inscr. l. 14) boasts of having taken it from Israel and exterminated its people (for Mesha's spelling of the name [נְבוֹ], see text of inscr. [MESHHA]). It remained Moabite, and is mentioned with the above places in the lament over Moab (Is. 15:2 Jer. 48:1 22). Nebo was a hill town (Is. l.c.), and situated, perhaps, near the mountain of the same name (but see NEBO, MOUNT), although Eus. (*OS* [2], 283:93) speaks of a ruined Nabau, 8 R. m. S. of Heshbon, 6 R. m. to the W. of which he locates the mount.¹

2. A city of Judah, the 'sons' (citizens) of which are mentioned after the 'men' of Bethel and Ai, Ezra 2:29 (ναβου [B], -βω [A], -βου [L]; in 1 Esd. 5:21 [5] om.). In the || passage, Neh. 7:33, they are called 'the men of the other Nebo' (נְבוֹ אֲחֵר, ναβια ααρ [B, cp Sw.], ναβ[ε]α εκασον [NA], ναβου [L]). Very possibly נְבוֹ is a corruption of נְבֻדוֹ, 'Nadabu' (cp NEBO, i.); 'the other,' in Neh. 7:33, is, according to *Crit. Bib.*, a misunderstood fragment of יִרְחַמְאֵל 'Jerahmeel'; if so, it need not have been accidentally introduced from v. 34, as Meyer (*Entst.* 149) suggests; but cp L. The commune of 'Nebo' (Nadabu?) is represented in the list of

¹ The notice in *OS* [2] 283:96 rests upon a confusion of Nebo with Nobah (Nu. 32:42), which goes back to 5

NEBUCHADREZZAR

those with foreign wives (see EZRA i., § 5 end; cp ii., § 17 [δ]), Ezra 10₄₃ (ναβου [BNA]. -βου [L]), and appears by error in Neh. 10₁₉ [20] as NEBAI, RV NOBAI (כַּת. נֹבַי; כְּר. נֹבַי). T. K. C.

NEBUCHADREZZAR (נְבוּכַדְרֶצְצַר), Jer. 21₂ etc., and so Jos. and Strabo ΝΑΒΟΚΑΔΡΟCΟΡΟC, Abydenus ΝΑΒΟΥΚΑΔΡΟCΟΡΟC, corresponding with Bab. form [below]; incorrectly נְבוּכַדְרֶצְצַר—Dan. 1₁ etc. [see BDB], and so Θ ΝΑΒΟΥΧΟΔΟΝΟCΟΡ [with various scribal corruptions], -ΝΟCΟΡΟC Jos. [see Niese, *Index*], the Babylonian monarch Nabū-kudur-ušur, son and successor of Nabopolassar on the throne of Babylon. He was second of the name, Nabū-kudur-ušur I. being of the Paše dynasty (about 1139-1123 B.C.). Nabopolassar had secured the throne of Babylon, during the years of weakness and dissension in Assyria which followed the death of Ašur-bāni-pal, apparently by aid of the Chaldean party in Babylon. While the power of Media was rising to the N. of Assyria, the astute founder of the neo-Babylonian Empire married his son Nebuchadrezzar to Amuhia, daughter of Cyaxares, king of Media.¹ Hence, when the crisis came and the enemy closed in upon Nineveh, Babylon was able to elaim alliance with Media and at least lent a moral support to the overthrow of Assyria. After that event had destroyed the balance of power in Mesopotamia, the Medes or Manda nominally held the northern kingdom, while Babylonia retained independence. The decline of Assyrian power was always Egypt's opportunity in Syria. Necho II., perhaps as early as 608 B.C., had begun to advance along the coast; he was vainly opposed by JOSIAH [*q.v.*], and by the time that Assyrian resistance (606 B.C.?) collapsed he was probably master of all Syria. The power of Media may have been exhausted by the struggle to capture Nineveh; at any rate it was Nebuchadrezzar (Berossus-Josephus, *c. 17*. 119) who successfully opposed the Egyptian king at Carchemish, 605 B.C.² How far Median troops assisted we do not know; but either the alliance of Babylonia with the detested Manda had become very strong or the Manda were otherwise engrossed by the rising Persian power. The powers in Assyria must have been either actively allied or singularly helpless for Babylonian troops to operate successfully in Syria and beyond. In all probability the remnant of the Assyrian troops took service under Nebuchadrezzar rather than with the Medes.

It was on this expedition that Nebuchadrezzar was brought into contact with the kingdom of Judah. On the difficulties in 2 K. 24: 1 ff. (cp 2 Ch. 36: 16) see JEHOIAKIM. The inscriptions are unfortunately silent.

Nebuchadrezzar's succession to the throne of Babylon seems to have been accomplished without difficulty, and he entered on his long reign of forty-three years, 604 B.C. to 561 B.C. He had probably recalled the greater part of his troops from the W., leaving only garrisons and governors in the more important cities, after the Assyrian model. His absence in Babylon and the necessity of watching events in Media and Elam, where Teispis the Persian made himself independent as king of Anšan, 600 B.C., obliged Nebuchadrezzar to leave the W. alone. Relieved of the pressure, Egypt recovered, and under its new king Apries-Hophra began to adopt the usual policy of inciting the West to rebellion. How far Nebuchadrezzar had his hands tied by the troubles in Media is not clear; but, either by active assistance to Persia or by maintaining a powerful frontier guard, he was able to preserve peace in Babylonia; and when his warlike neighbours had once more quieted down he was able to reach Palestine without danger to his line of communications. A hostile power in Assyria, or a too active ruler in Elam, must have paralysed an advance to Syria.

¹ Abydenus in Eusebius, *Chron.* 19.

² Jer. 46: 2 2 K. 23: 29. See EGYPT, § 68. [Some doubt, however, rests upon the battle of Carchemish. See JEREMIAH (BOOK), § 14, PROPHECY, § 45.]

NEBUCHADREZZAR

Affairs in Judæa had been in a very unsettled state for some time. How JEHOIAKIM [*q.v.*] rebelled, and left a heritage of woe to his son and successor JEHOIACHIN [*q.v.*], who after a three months' reign surrendered to the Babylonians, is told elsewhere (cp ISRAEL, § 41). Nebuchadrezzar had then arrived in person (2 K. 24: 11) to direct the siege of Jerusalem. He captured the city in 597 B.C. This was only an event in the general plan of reducing the W. to order; Tyre and Sidon remained. Egyptian influence was always strong there, and the traders must constantly have carried sedition into the E. unless Tyre was friendly. The traders could not be interfered with; they were too valuable. But Tyre would be a rich prize, and once in Babylonian hands the source of much mischief would be suppressed. Sidon was soon dealt with: the Assyrian kings had made that easy; but though Nebuchadrezzar prosecuted the siege of Tyre for thirteen years (under Ithobaal II., see TYRE), 585-572 B.C., he could not take it (see BABYLONIA, § 66; PHENICIA, § 20). This siege was the outcome of a fresh outburst of activity on the part of Egypt. Nebuchadrezzar having settled affairs in Judæa had returned to Babylon with his captives and spoil. What kept him there so long, eight or nine years, we do not fully know. Troubles in Elam, the death of the king of Anšan and the division of Media between the first Cyrus, his elder son, and Ariamna the younger son, probably needed careful watching, if not diplomatic interference.¹ But when Nebuchadrezzar was again free, he seems, according to the views of some, to have met and defeated the army of Apries, 587 B.C., and proceeded to a further invasion of Egypt (see EGYPT, § 69; BABYLONIA, § 66). Like the Assyrian invasions of Egypt, this was a punitive expedition; and though fairly claiming to be a conqueror of Egypt, Nebuchadrezzar could not govern it. Zedekiah had relied on Egypt (Ezek. 17: 15) and rebelled, only to bring on his land an invasion that culminated in a second siege and capture of Jerusalem in 587 B.C. Zedekiah fled, but was captured (Jer. 39: 5), and, having witnessed the death of his children, was blinded and carried to Babylon. The city of Jerusalem was sacked, the temple and palaces destroyed by fire, and the walls made a heap of ruins. The country was placed under the Babylonian governor Nabū-zēr-iddin.

That Egypt was not long under Nebuchadrezzar is clear from the fact that five years later the Babylonian governor on his way to Egypt (Jos. *Ant.* x. 97) carried off more captives from Jerusalem, Jer. 52: 30. This was in the twenty-third year of Nebuchadrezzar's reign. Almost the only historical inscription of this king² speaks of a further expedition to Egypt in the thirty-seventh year of his reign. Amasis seems to have been able to hold the country outside the Delta. Lydia was growing in power, and Nebuchadrezzar may have influenced Media to attack Lydia; at any rate he (Labynetus? Herod. 174), with the king of Cilicia, mediated between them in 585 B.C., after the battle of the Halys (see BABYLONIA, § 66). On the theory that he may have at one time conducted operations against Kedar, to account for Jer. 49: 28 33, see JEREMIAH (BOOK), § 20, vii.

Unfortunately, in the fragments above noted, we possess no proper history of Nebuchadrezzar. The task of reconstruction is laborious, and must remain unsatisfactory until further discovery. That his annals found a native historian is almost certain. The inscriptions which have been preserved chiefly commemorate his pious restoration of the temples and ruined cities of his land. Temple restorations in Sippar, Kutha, Erech, Larsa, Ur, and many other minor cities are recounted at a length which bears eloquent witness to

¹ Perhaps at this time Nebuchadrezzar made himself master of Susa, and restored its Istar image carried away to Erech by Ašur-bāni-pal (?), when Susa was under Elamite supremacy.

² Published by Strassmaier, *Nbkd.* 194.

his power and the vitality of the religious feelings of his people. Babylon itself benefited above all. It became almost a new city. New streets were laid out, the Euphrates banked, new walls and an outer line of defence erected, which rendered the place impregnable. The new palace, the famous hanging gardens (if Nebuchadrezzar's work), and above all the restored temple of Bēl (see BABYLON, § 5), were his pride and his great claim to remembrance. Sir H. Rawlinson stated that he had examined the bricks of the ruins of not less than a hundred cities or temples near Bagdad, and scarcely found any that did not bear the stamp of Nebuchadrezzar son of Nabopolassar.

The references to Nebuchadrezzar in DANIEL [7.2.] and the later classical stories are not necessarily without foundation; but his name became the centre of much that is probably pure romance. For example, the story of his madness receives no support from the fact that lycanthropia has been attested elsewhere.¹ His own inscriptions speak only of a four-year-long suspension of interest in public affairs, which may not be a reference to his malady, though tradition of something of the kind may have lent verisimilitude to the account of it in Daniel.

The text of his inscriptions will be found in *KB* 32, pp. 10-70, and C. J. Ball, *PSBA* 11 124 ff.

C. H. W. J.

NEBUSHASBAN RV *Nebushazban* (נְבוּשַׁזְבַּן), one of the officers of the king of Babylon (Jer. 39 13; om. BNAQ, ΝΑΒΟΥΣΑΖΑΒΑΝ [Theod. in Q^{ms}]). It appears to be the Ass. *nabū-šazib-anni*, i.e., 'Nebo delivers me,' a name actually borne by the son of Necho I., king of Egypt, in token of his vassalage to the king of Assyria.

NEBUZARADAN (נְבוּזַרְאֲדָן), Bab. *Nabū-zār-iddin*; ΝΑΒΟΥΖΑΡΔΑΝ; but ΔΑΡ in 2 K. 25 8 [A]; *Nabuzardan*, 'chief of the body-guard' to Nebuchadrezzar; see 2 K. 25 8 11 20 Jer. 52 30, and, on his special relations to Jeremiah, Jer. 39 11 40 2 5. The name is good Babylonian, Nabū-zār-iddin, 'Nabū has given a seed,' and occurs often. Cp ISRAEL, § 42; JEREMIAH, § 2.

C. H. W. J.

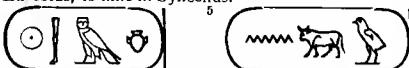

NECHO (so AV in 2 Ch. 35 20 22, **Neco** RV; elsewhere PHARAOH-NECHOH, RV PHARAOH-NECOH, but PHARAOH-NECHO, RV PHARAOH-NECO in Jer. 46 2; נְכֹ; and [in 2 K. 23 29 33-35.] נְכֹ, [and Manetho] Νεχώς, Vg. *Nechao* [Herod. Diodor. Νεχώς, Jos. Νεχως, other MSS Νεχως; on the Egyptian form and the Assyrian *Nikū*, see below]).

Son of Psametik I., second king of the 26th or Saitic dynasty (610-594).³ His royal names are, *Nem-eb-rē*,⁴ 'renewing the heart of the sun-god,' *Nk'w*⁵ (phonetically something like *Nc-ko-u*, read *Nekōu*). The second or personal name was taken from his grandfather Necho (I.), known in the Assyrian inscriptions as Ni-ku-u, Nikū, of Sai and Mempi, the most powerful of the Egyptian nomarchs at the time of the Assyrian conquest (Nechao in Manetho; cp Herod. 2 152). Like Psam(m)etik, it seems to be of Libyan etymology;⁶ almost all Egyptian monarchs of that period descended from officers of Libyan mercenaries.⁷

Necho II. was, evidently, one of the most active and enterprising Pharaohs; but he had too short a reign and lived under too unfavourable political constellations to accomplish much. His attempt at conquering Syria from the crumbling Assyrian empire during its last struggles is referred to in 2 K. 23 29-24 7 = 2 Ch. 35 20-36 4 (with free additions). This expedition 'against the

¹ See MADNESS, and cp Wi. *AOF* 2 214.
² Wiedemann, *Gesch. Egypt.* 628, quotes the mutilation *Nebad*; Cramer, *Anecd. Par.* ii. 264 23, *Nechaob*; Cedren. i. 197 12, Bekk., *Nechuo* 1 1 193 9.

³ The statement of Herodotus is confirmed by Apis-stelae. The number of years is corrupted from sixteen to six in Africanus and Eusebius, to nine in Syncellus.

⁴ It is hardly identical with a name of the earliest period *Nc-ku*, as Griffith has suggested (*AZ*, 34, 1896, 50).

⁵ Schäfer, *AZ*, 33 [1895], 116, on very inadequate grounds, assumed Ethiopian descent for that Saitic family.

king of Assyria to the river Euphrates' (2 K. 23 29) was undertaken early in Necho's reign (609-608); as is well known, King Josiah of Judah opposed his march; he did this, not from pious rashness, but as a vassal of Assyria. On the question of the locality where he fell, see EGYPT, § 68, and JOSIAH, § 2, and cp *MVAG* 3 54. Three months after the battle of Megiddo (the name is correct) Necho performed divers authoritative acts as suzerain of Judah. Jehoahaz was carried in chains from RIBLAH,¹ and Jehoiakim had to pay a heavy fine. See JEHOAHAZ, JEHOIAKIM. The allusion in Jer. 47 1 to the time when 'Pharaoh smote Gaza' is to be referred to Necho's expedition.² Necho's Syrian domination (of which a stone found in Sidon or Byblus³ is the only monument) came to an end, three or four years later (about 605), when the king of Babylonia, as successor to Assyria, reclaimed the Syrian provinces. The army of Necho suffered a complete defeat by NEBUCHADREZZAR, at that time the Babylonian crown-prince. The Jews, probably, still continued to cherish hopes of Egyptian opposition to the Babylonians, but in vain (2 K. 24 7).

On Necho's most important public work—the digging of the canal through Goshen to the Red Sea—see EGYPT, § 68. The work certainly was not abandoned,⁴ otherwise Necho could not have kept a strong fleet on the Red Sea (Herod. 1 1). The inscriptions of Darius show too that the 'Suez-canal' of this king (Herod. 4 39, Strabo, 804) was only a restoration of Necho's work which the sand of the desert had filled in, as happened with various later attempts at connecting the Nile and the Red Sea.⁵ The sending of an Expedition under Phœnician leaders around Africa (Herod. 4 42) confirms the fact that Necho had great plans in Africa, of which we know little.⁶

The great canal seems to have left the king little time for other constructions. Some traces of building in Memphis (where also during his lifetime an Apis-bull was buried) have been found. Necho's tomb in Sais seems to have been destroyed together with his mummy last century.⁷

W. M. M.

NECKLACE. A compound term like 'necklace' is not to be expected in a version of the Bible which retains the Hebrew colouring. Still it will be convenient to bring together under this heading the different Hebrew words which are used for *ornamental* chains (see CHAINS) such as we commonly call necklaces, or for neck-ornaments in general.

1. Strings of cylinders (see RING, § 1) are represented on Assyrian sculptures.⁸ Similar strings of precious stones, pearls, or beads are described in Cant. 1 10 as חַרְזִים *hārūzīm* (AV 'chains of gold'; RV 'strings of pearls,' ὄψαλακαί, and חָרִים (AV 'rows,' RV 'plaits,' ὄψαλακαί), Cant. 1 10. Probably⁹ the 'apples of gold' (Τοῦ, 'golden fruits') in Prov. 25 11 (a corrupt passage) should give place to 'a string of pearls, or beads,' חַרְזִים חַרְזִים means properly not 'strings,' but 'beads (or the like) strung together' (cp Kōn., ii. 1 136). For 'beads,' however, we may, especially in Cant. 1 10,

¹ Cp Winckler, *AOF* 1 504.
² See GAZA. On the statement of Herodotus (2 159), see Wiedemann, *Clio*, 566 f.

³ Published by Griffith, *PSBA* 16 91. On the vague possibility of finding the Egyptian name of a king of Byblus in it, see W. M. Müller in *MVAG* 1 190.

⁴ On the improbability of an oracle as the reason, cp Wiedemann (*Gesch. Äg.*, 627), who, however, believed in the abandonment and ascribed it to political difficulties.

⁵ See W. M. Müller, *MVAG* 3 152.
⁶ Herodotus places the digging of the canal before the Syrian expedition. The opposite is more probable.

⁷ Wiedemann, 1 1.
⁸ As an instance of the sacredness of such ornament may be cited the verse in the Babylonian Deluge-story where the goddess Ištar swears by the necklace (lit. 'jewel of my neck') which her father had given her (Jastrow, *Rel. of Bab. and Ass.* 503, cp Jensen in *KB* 1, 241 ff. 164 f.).

⁹ For a discussion, see BASKETS, n. 1; Che. *JBL* 18 208 f. [1899].

Carmel (for this name too is perhaps a corruption of Jerahmeel). The Jerahmeelites of Kadesh, however, appear to have been dispossessed at an early date by the men of Judah, on whom, as Judg. 3:13 tells us, they subsequently took their revenge (cp JERICHO, § 2). Revenge indeed was a fundamental element of primitive life in these regions. Like David himself (who possibly came from 'Debir' on the border of the Negeb¹) we find the 'Amalekites' making raids upon the neighbouring country. The narrative in 1 S. 30:14 (MT) mentions as suffering from such a raid the 'Negeb of the Cherethite' and the 'Negeb of Caleb' (otherwise called, in v. 16, 'the land of the Pelishtim' [?]) and the 'land of Judah' respectively). Thus we have five different Negeb, or districts of the Negeb, mentioned. It is our next duty to define, so far as the historical notices permit, the geographical content of these several phrases. The kinship between the populations no doubt places some difficulty in our way.

(a) The country of the Amalekites (Jerahmeelites) whom Saul is said to have overcome was between the Wady of Beersheba and the Wady of Mišrīm—i.e., the Wady el-'Ariš (see EGYPT, RIVER OF)—not including, however, the Negeb of the 'Cherethite'.² It is consistent with this that in 1 Ch. 4:39 f. (see JERAHMEEL, § 4) the Jerahmeelites are said to have dwelt in Gerar (the Wady Jerūr). Their centre may be presumed to have been the sacred well commonly but incorrectly called BEER-LAHAI-ROI³ (q.v., and cp ISAAC, JEHOVAH-JIREH), which may have been 'Ain Muweilah'.⁴ At one time, however, they must have spread farther N. (see above), and in the time of David we find 'cities of the Jerahmeelite' in the occupation of Judahites (1 S. 30:29). Doubtless they had various sacred meeting-places, such as the 'Ain Raḥameh and especially the 'Ain Kaḏis (both visited by Rowlands). 'Ain Kaḏis is the En-mishpat (Gen. 14:7) at KADESH-BARNEA (Jerahmeel), unless indeed En-mishpat is an early corruption of En Šarephath; at any rate Kaḏis is the famous Kadesh.

(b) The Kenites, whose Negeb is spoken of, came originally from Midian (Ex. 2:15 f. MT), or rather perhaps Musri (see KENITES); they were allied to the Edomite tribe of the Kenizzites. Indeed, in 1 S. 27:10 30:29 ^{GBL} actually reads 'Kenizzite' where MT and ^{GA} have 'Kenite'. We may assume the 'Negeb of the Kenite (or Kenizzite)' to have lain to the S. of the Negeb of Caleb (see d). This view accords with the statement in Judg. 1:16 that the Kenites joined the Judahites in a migration to 'the wilderness of Arad in the Negeb of Jerahmeel' (critically emended text; see *Crit. Bib.*, and cp KENITES). As the result we learn that the cities of the Jerahmeelite Negeb fell into the hands of the Israelites (Nu. 21:32), more especially HORMAH (q.v.), or rather Raḥamah, a name which seems to have suggested the thought of the mercifulness (רחם) of Yahwè to Israel. Here, therefore, the Kenites, or Kenizzites, being friendly to Israel, could safely dwell, and hence in 1 S. 30:29 the 'cities of the Kenites' are mentioned between the 'cities of the Jerahmeelites and the city miscalled in MT Hormah, but marked out by its true name as of Jerahmeelite origin.

¹ See § 3.

² This appears from the emended text of 1 S. 15:7 (see TELEM).

³ The geographical definitions in Gen. 16:7 14 point away from the En-mishpat-sephāthim? at Kadesh-barnea. 'Beer-lahai-roi' has to be 'between Kadesh and Bered'; Bered probably comes from 'Midbar Shur'—i.e., the desert of Shur (but cp Niebuhr, *Gesch.* 1:259). The site there is plainly marked.

⁴ 'About 10 hrs.' beyond Rohēbeh (Rubaibeh), on our road (i.e., 10 hrs. camel's pace), is a place called Moilahi (or Moilāhhi), a grand resting-place of the caravans, there being water here, as the name implies (?). . . . Shall I not please you when I tell you that we found here Bir Lahai-roi?'. Rowlands, in Williams, *Holy City*, 1:465. A writer in *PEFQu.*, 1884, p. 177 offers an impossible etymological theory for this Moilāhhi. Rowlands further states that the Arabs from near Gaza called the well Moilāhhi Kadēsh, but that those of the country called it Moilāhhi Hadjar (Hagar). It is not often that local traditions are so well founded! Here, too, is the 'site of a large and populous city' (Palmer, 356).

One of the 'cities' referred to—it is only a short distance on the way from Tell 'Arād to the Wady Raḥameh—has still a record of its existence in the suggestive name Tell Miḥ (I and Ḥ interchange), with which it is fair to identify the 'Ir ham-melah' ('Ir Jerahmeel) mentioned in Josh. 15:62 (see SALT, CITY OF). Strictly, indeed, the Negeb of the Kenites was also the Negeb of the Jerahmeelites; see again Judg. 1:16 (where קַע, 'people', should be קַעֲמֵל, 'Amalek' = 'Jerahmeel'). The Kenites appear also to have occupied Beersheba.¹

(c) The 'Negeb of the Cherethite' is usually explained as = 'Negeb of the Philistine,' and this is plausibly supported by the apparent equivalence of 'Cherethites' and 'Philistines' in 1 S. 30:14 16. It is no doubt hard to understand how the Philistines came to be found in the Negeb; but Matthew Poole's *Synopsis* has an answer ready—'the place pertained to the satrapy of Gaza (!)'. The truth is, however, that just as כְּרִית (Cherith) has been regarded (see CHERITH) as a corruption of רְהַב (REHOBOTH), so כְּרִיתִי (Cherethite) may be a corruption of רְהַבִּיתִי (Rehobothite). The centre of the Negeb of the Rehobothites was no doubt the Wady er-Ruḥaibeh² (see REHOBOTH). But this section of the Negeb also included ZIKLAG (1 S. 30:14) or rather Ḥalūšah³ on the site still known as el-Ḥalāsa, west of the Wady er-Ruḥaibeh, in a wady the upper part of which is called 'Aslūj⁴ and the lower Ḥalāsa, and the not less historic Zephath or ZAREPHATH [q.v.]—i.e., Šebaita or Ešbaita, S. of el-Ḥalāsa, in the Wady el-Abyad. From Zephath it received the second title אֶרֶץ צַרְפַּתִּים, 'land of the Zarephathites,' though in the text of 1 S. 30:16, by transposition and corruption of letters, אֶרֶץ צַרְפַּתִּים has become פְּלִשְׁתִּים, Pelishtim—i.e., 'Philistines.'

(d) The 'Negeb of Caleb' was of course S. of Hebron, and included the sites of Tell Zif, Ma'in, and Kurmul; Nabal, who is connected with Maon and Carmel, was a Calebite (1 S. 25:3), and the name el-Kulāb is still attached to a wady 10 m. SW. of Hebron. Other names may be added to the list from 1 S. 30:27-31, for David's 'friends,' the 'elders of Judah,' were of course his tribal kinsmen; David's connection with the Calebites is so close that, in spite of tradition, we cannot help regarding him as a Calebite (see DAVID, § 1, n. 2).

(e) The Negeb of Judah was probably identical with that of Caleb; the hills around Zif, Ma'in, and Kurmul are in fact the outposts of the hills of Judah. In 1 S. 30:16 the phrase 'the land of Judah' is an alternative for 'the Negeb of Caleb' in v. 14, 'just as 'the land of the Zarephathite' [see c] in the same clause is equivalent to 'the Negeb of the Rehobothite' in v. 14. In 2 S. 24:7, however, the 'Negeb of Judah' must be understood in a large sense for the Negeb belonging politically to Judah, which, for the writer, extends to Beersheba. It should be remembered that David's bodyguard was (in our view) composed of Rehobothites and Zarephathites (in MT 'Cherethites and Pelethites'). See REHOBOTH, PELETHITES. This implies that the Negeb from which David's warriors came was thoroughly absorbed into Judah. The list of places in the Negeb of Judah in Josh. 15:21-32 (P) may require a similar explanation. This need not prevent us from admitting that a larger section of the Negeb belonged, in post-Solomonic times, not to Judah but to Israel (see PROPHET, § 6). The sanctuaries of the Negeb were largely resorted to by the N. Israelites, and Jeroboam II. seems to have recovered

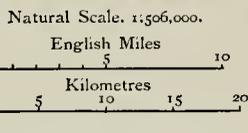

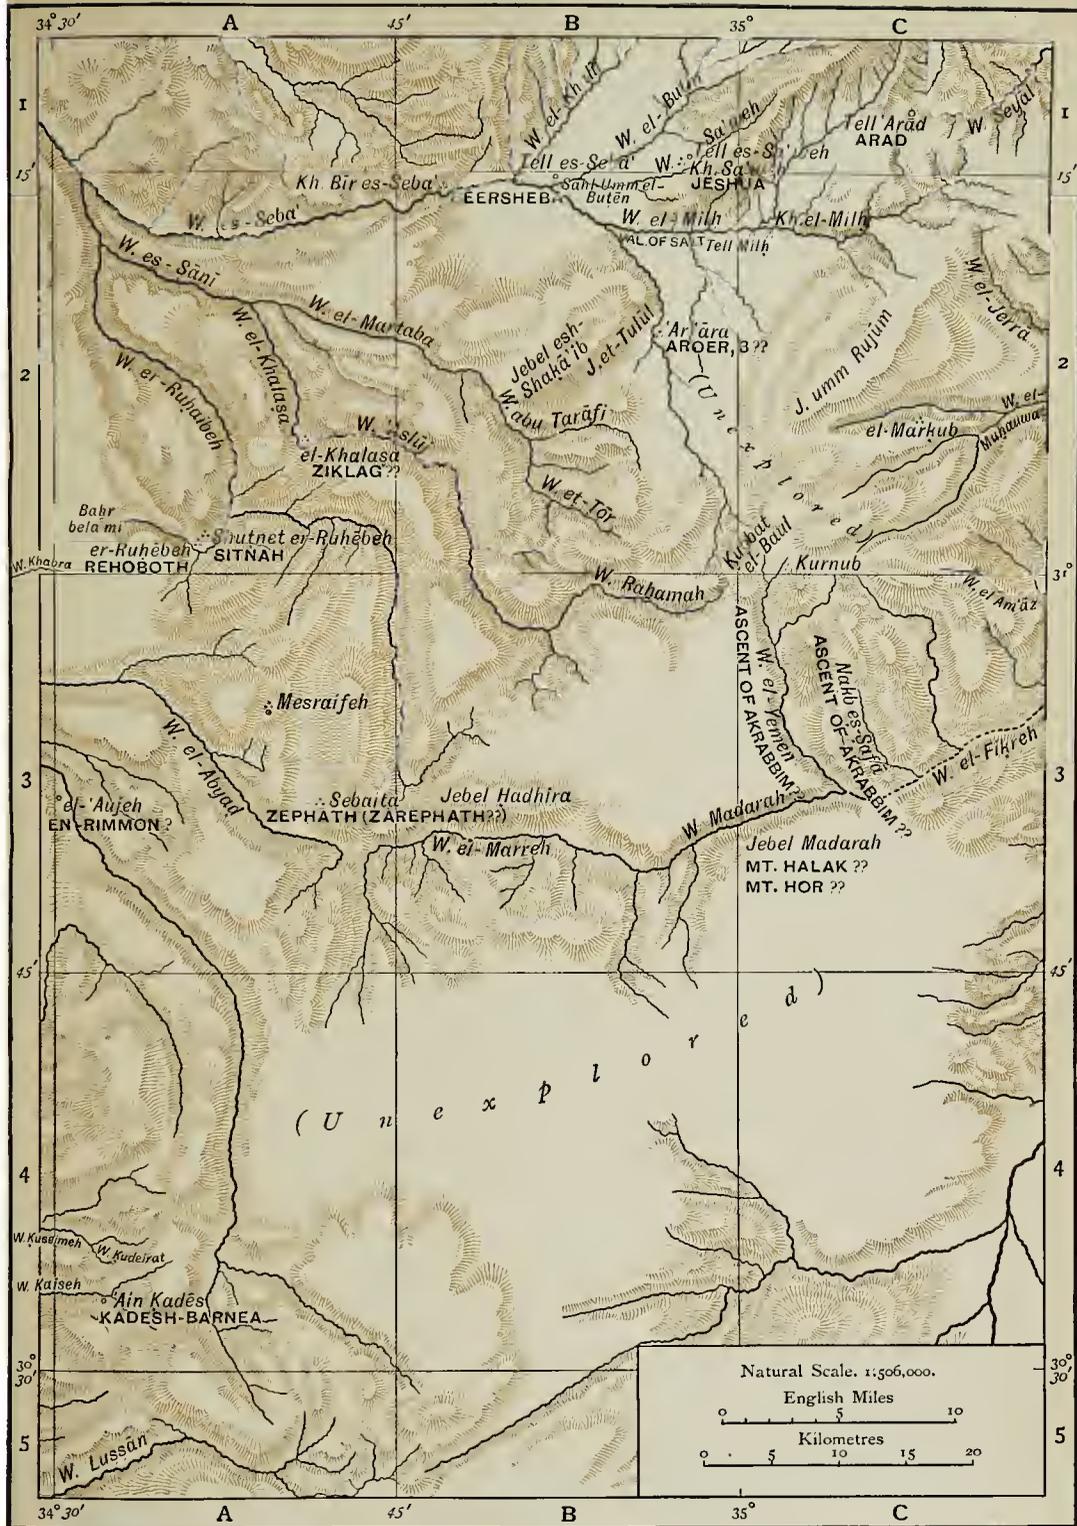

¹ See 1 Ch. 4:11 f., where TEHINNAH (q.v.) is probably a corruption of Kinah (Kenite?) and IR-NAHASH (q.v.) of 'Beer-sheba.' The alliance of the Kenites with Caleb (Chelub) is also attested. ESHTON (q.v.) comes probably from 'Eshemoh.'

² Wilton (*The Negeb*, 21) deserves credit for connecting the Cherethite Negeb with the Wady er-Ruḥaibeh, though he had nothing but geographical probability to guide him.

³ Targ. Jer.'s equivalent for Bered, but rather the true form for 'Ziklag,' the current identification of which (see ZIKLAG) shows anew how greatly geography has suffered from an uncritical view of the Hebrew text. Rowlands writes thus, 'Khalasa (ancient Chesil I think) must have been a large city—the remains are very extensive—heaps of stones and portions of houses, etc.' (Williams, 464).

⁴ 'Aslūj is connected by Rowlands (Williams, 465) with the name Ziklag.

NEGEB.

the Negeb for Israel (2 K. 1428; for an emended text, see PROPHEC, § 7).

It is generally held that the NW. limit of the Negeb was .. point S. of the present eḏ-Ḍāhariyeh, a large village between es-Semū on the E. and

3. Boundaries of the Negeb. Anāb on the W., which is probably to be identified with Debir, or rather (in our view) Beth-zur (one of several places bearing the name; see KIRJATH-SEPHER). This is a reasonable view, but must not be either supported or illustrated by the passage (Judg. 115) rendered in RV 'for that thou hast set me in the land of the south, give me also springs of water,' because this passage is corrupt. The Debir or perhaps Beth-zur there referred to is not the 'Kirjath-sannah, that is, Debir' mentioned in Josh. 15.40, but the well-known BETH-ZUR (*q.v.*) near Ḥālḥūl, N. of Hebron, and the 'springs of water' which have played such a large part in the question as to the identification of the Debir of Josh. 15.49 are non-existent in a sound text. The only right basis of the perfectly legitimate assertion that eḏ-Ḍāhariyeh is 'the frontier town between the hill-country and the Negeb,'¹ is the observation of a physical fact. It is characteristic of the Negeb that the vegetation, meagre at the best, becomes almost completely dried up in the heats of summer, and that the deterioration of verdure begins to be visible S. of eḏ-Ḍāhariyeh. As Conder says, 'the district of Debir is [at the present day] just the limit of the settled population and of cultivation.'² It was probably either here or at Carmel that Jesse lived and David passed his early youth;³ here, too, that Saul mustered his forces to go to war with 'Amalek' (1 S. 15.4; see KIRJATH-SEPPER, TELAIM).

The Israelites themselves, however, did not place the N. boundary at eḏ-Ḍāhariyeh (=MT's Debir) but at En-rimmon, otherwise designated Rimmon ('from Geba to Rimmon, Zech. 14.10) and probably called also Baalath-beer-rimmon, which is to be identified with *Umm er-Rammāmim*, about 9 m. N. of Beersheba, on a geographically important site (as Solomon, who appears to have fortified it, recognised) near the boundary line which separates the Terabin and Tiyāhah territories on the S. from the Henādy Arabs and the hill-country on the N.⁴

On the reading BAALATH-BEER-RIMMON, probably to be restored in Josh. 19.8 and in 1 K. 9.18, see RAMATH OF THE SOUTH. This is, we think, the full name of the place otherwise called EN-RIMMON and (perhaps) AZMON.⁵ 'Rimmon' may be a popular corruption of 'Jerahmeel.'

On the S. and SW. the boundary line of the Negeb went by 'Kadesh-barnea' (Kadesh-Jerahmeel) and 'Hazar-addar' (Hazar-Jerahmeel)—*i.e.*, 'Ain Qadis and (probably) 'Ain Muweileh respectively. The authority⁶ from which we obtain this information adds that the southern boundary line of the land of Israel passed on to 'Azmon—*i.e.* (as we have just seen), Hazar-rimmon, which is *Umm er-Rammāmim*—and went round to the torrent course of Miṣrim, which is the well-known Wādy el-'Ariṣ. There is also a passage—of very late date, it is true, and often greatly misunderstood—in which the southern limit of the Negeb is fixed at a more northerly point than Kadesh—*viz.*, at Zarephath or *Ṣebaita* (Ob. 20, critically emended text), which appears to have been regarded sometimes as the most northerly city of Muṣri⁷

¹ So GAS HG 279.

² PEFQ, 1875, p. 51.

³ Beth-zur, in our view, the true name of 'Debir,' was perhaps also called Beth-el (בֵּית־אֵל, *el*, being synonyms for 'God'), and 'Beth-el' mistaken for 'Beth-lehem.' It is, however, simpler to suppose that 'Bethlehem' in 1 S. 17.12.15 as well as in Mic. 5.2 [1] (see MICAH [BOOK], § 4 [E]) is a corruption of 'Beth-Jerahmeel.' Some place in the Negeb, perhaps Carmel (=Jerahmeel), may be meant.

⁴ Wilton, 20.

⁵ Apparently had ασελμωνα, (so FL in Nu. 34.4 f.) where the final α may be disregarded. λ represents γ; the second γ dropped out.

⁶ Nu. 34.4 f.; cp Josh. 15.3 f. In spite of Wetzstein's geographical learning, his explanation of the southern boundary-line of Judah (Del. Gen. (4), 586 f.) is very improbable. Without textual criticism no progress could be made. Cp KARNA.

⁷ On the traditional error respecting this place-name see OBADIAH, ZAREPHATH. Note, too, in this connection that זִידון, 'Zidon,' in 1 K. 17.9 should probably rather be מִשְׁשֻׁר, Miṣṣur—*i.e.*, Muṣri in N. Arabia (see MIZRAIM). Zarephath was

(in N. Arabia; see MIZRAIM), sometimes as the most southerly city of the Negeb of Palestine.

This way of regarding Zarephath agrees with the specification in Josh. 11.17 of the southern boundary of the land conquered by Joshua as 'the bare mountain (EV, the Mt. Haliak) that goes up to Seir,' which Trumbull identifies with the 'bare and bald rampart of rock' which forms the northern wall of the Wādy el-Fikreh (*Kadesh-barnea*, 1895).

Summing up, we may say that the Negeb is an irregularly shaped tract extending from the hill-country of Judah on the N. to the wilderness of Zin¹ (*i.e.*, the 'Azāziueli mountains) on the S., and from near the Dead Sea and the southern Ghōr on the E. to the Mediterranean on the W., and that in the character of its soil it forms a transition from the rich fertility of Canaan to the wasteness of the desert.

We must, however, bear in mind the limitations stated in Nu. 34.4 f. (see § 3), and we must allow room

4. Goshen or Geshur? (a) for the tract of land in SW. Palestine, between the Negeb and the Shēphēlah, called 'the land of Goshen' (Josh. 10.41.11.16), and (b) for a district between the Negeb proper and the edge of the Tih plateau which was less favoured by nature than the Negeb. As to (a), to supplement what is said elsewhere (see GOSHEN, 2), it may be suggested here, not as an assured result, but as a probability, that גושן (Goshen) is miswritten for גשור (Geshur?).

In 1 S. 27.8 we find 'the Geshurites and the Girzites' (where one of the two names is obviously a doublet) mentioned beside the Amalekites—*i.e.*, the Jerahmeelites—and in Josh. 13.2 the Geshurites beside the Philistines. It is difficult to find room both for Goshen and for the Geshurites or Girzites (Girshites?), and it is a simple expedient to identify them. The name 'Girshites' is probably a better form than either 'Geshurites' or 'Goshen.'

As to (b), we may safely assume that this district belonged, as Kadesh and Zarephath may once have belonged, to the kingdom of Muṣri in N. Arabia, and the still existing traces of the careful agriculture of its ancient inhabitants seem to show that it was not an unvalued possession. The Wādy Mayin and the Wādy Luṣṣān (cp the name of the Roman station of Lysa in the Peutinger Table) were apparently the most thriving parts of this district, owing to the excellent wells in the former Wādy and the admirably constructed dams in the latter. The Wādy Luṣṣān, it should be noted, is a little to the S. of the Wādy Jerūr, the Gerar of Gen. 20.1.26.1, where Isaac had such large flocks and herds. We must not speak too positively, however, of the times of the Israelites; but it is at least reasonable to suppose that this district was not worse off for vegetation than than the Negeb is at the present day.²

It is at any rate plain that in David's time the Negeb was in its way a comparatively rich country (see the notices in 1 S. 15.9.27.9.30.16), and for the Greek period we may perhaps claim the witness of the Chronicler (2 Ch. 14.14 f.). These passages agree in speaking of the abundance of sheep, oxen, asses, and camels—the wealth of a pastoral people. No doubt the palmiest days of the Negeb were in the Byzantine period. We have not the means of contrasting the Byzantine cities with those of the pre-Roman age, though where the dwellings consist of rock-hewn caves, these are doubtless older than the masonry of the buildings. The *nawāmīs*, or beehive huts of stone, with which every hill-side is covered (cp KIBROTH-HATTA'AVAH, TENT) are assigned by Palmer to pre-historic peoples; ³ the *durwārs* or stone-enclosures he compares with the חָרְמוֹת or 'nomad villages' of early Israelite times, which are distinguished in Josh. 19.8 from עָרִים or 'cities.'⁴

As to (b), we may safely assume that this district belonged, as Kadesh and Zarephath may once have belonged, to the kingdom of Muṣri in N. Arabia, and the still existing traces of the careful agriculture of its ancient inhabitants seem to show that it was not an unvalued possession. The Wādy Mayin and the Wādy Luṣṣān (cp the name of the Roman station of Lysa in the Peutinger Table) were apparently the most thriving parts of this district, owing to the excellent wells in the former Wādy and the admirably constructed dams in the latter. The Wādy Luṣṣān, it should be noted, is a little to the S. of the Wādy Jerūr, the Gerar of Gen. 20.1.26.1, where Isaac had such large flocks and herds. We must not speak too positively, however, of the times of the Israelites; but it is at least reasonable to suppose that this district was not worse off for vegetation than than the Negeb is at the present day.²

5. The Negeb of Muṣri. The careful agriculture of its ancient inhabitants seem to show that it was not an unvalued possession. The Wādy Mayin and the Wādy Luṣṣān (cp the name of the Roman station of Lysa in the Peutinger Table) were apparently the most thriving parts of this district, owing to the excellent wells in the former Wādy and the admirably constructed dams in the latter. The Wādy Luṣṣān, it should be noted, is a little to the S. of the Wādy Jerūr, the Gerar of Gen. 20.1.26.1, where Isaac had such large flocks and herds. We must not speak too positively, however, of the times of the Israelites; but it is at least reasonable to suppose that this district was not worse off for vegetation than than the Negeb is at the present day.²

It is at any rate plain that in David's time the Negeb was in its way a comparatively rich country (see the notices in 1 S. 15.9.27.9.30.16), and for the Greek period we may perhaps claim the witness of the Chronicler (2 Ch. 14.14 f.). These passages agree in speaking of the abundance of sheep, oxen, asses, and camels—the wealth of a pastoral people. No doubt the palmiest days of the Negeb were in the Byzantine period. We have not the means of contrasting the Byzantine cities with those of the pre-Roman age, though where the dwellings consist of rock-hewn caves, these are doubtless older than the masonry of the buildings. The *nawāmīs*, or beehive huts of stone, with which every hill-side is covered (cp KIBROTH-HATTA'AVAH, TENT) are assigned by Palmer to pre-historic peoples; ³ the *durwārs* or stone-enclosures he compares with the חָרְמוֹת or 'nomad villages' of early Israelite times, which are distinguished in Josh. 19.8 from עָרִים or 'cities.'⁴

6. Wealth of the Negeb. The careful agriculture of its ancient inhabitants seem to show that it was not an unvalued possession. The Wādy Mayin and the Wādy Luṣṣān (cp the name of the Roman station of Lysa in the Peutinger Table) were apparently the most thriving parts of this district, owing to the excellent wells in the former Wādy and the admirably constructed dams in the latter. The Wādy Luṣṣān, it should be noted, is a little to the S. of the Wādy Jerūr, the Gerar of Gen. 20.1.26.1, where Isaac had such large flocks and herds. We must not speak too positively, however, of the times of the Israelites; but it is at least reasonable to suppose that this district was not worse off for vegetation than than the Negeb is at the present day.²

It is at any rate plain that in David's time the Negeb was in its way a comparatively rich country (see the notices in 1 S. 15.9.27.9.30.16), and for the Greek period we may perhaps claim the witness of the Chronicler (2 Ch. 14.14 f.). These passages agree in speaking of the abundance of sheep, oxen, asses, and camels—the wealth of a pastoral people. No doubt the palmiest days of the Negeb were in the Byzantine period. We have not the means of contrasting the Byzantine cities with those of the pre-Roman age, though where the dwellings consist of rock-hewn caves, these are doubtless older than the masonry of the buildings. The *nawāmīs*, or beehive huts of stone, with which every hill-side is covered (cp KIBROTH-HATTA'AVAH, TENT) are assigned by Palmer to pre-historic peoples; ³ the *durwārs* or stone-enclosures he compares with the חָרְמוֹת or 'nomad villages' of early Israelite times, which are distinguished in Josh. 19.8 from עָרִים or 'cities.'⁴

probably the first town in the Negeb entered by a traveller from Beersheba which belongs to Judah' (1 K. 19.3), which was reckoned to the land of Muṣri.

¹ On the use of the terms 'wilderness of Zin,' 'wilderness of Paran,' see ZIN, PARAN.

² Palmer, *ibid.* 345.347.

³ *Ibid.* 392.

⁴ *Ibid.* 316 ff. 321; cp Trumbull, *Kadesh-barnea*, 280 ff.

The same explorer gives us a vivid picture of the vanished prosperity of the Negeb (see *Desert of the Exodus*, pt. ii., chap. 5). His descriptions of the ruins of cities and of the remains of terraces, etc., justify us in inferring that the later condition of this region was far from contemptible. There are, indeed, no grand remains at Kadesh ('*Ain Kadis*), and Beer-sheba is absolutely destitute of ruins; but Rehoboth (*Ruhaibeh*), Zarephath or Zephath (*Sebaita*), and Ziklag (*Halaza*) are still represented by the remains of fine cities of a post-biblical age. Of Solomon's 'Tamar,' or perhaps (see § 3) Baalath-beer-Rimmon we have nothing but the probable site to point to; the latter name may suggest that even in the relatively unfertile Negeb pomegranates (*rimmon*), may have flourished, unless indeed Rimmon is a popular corruption of Jerahmeel. That many of the strongly-embanked terraces at el-'Aujeh and elsewhere were once planted with fruit-trees, there can be no doubt.

Such a name as 'Anab—i.e., 'grape-cluster'—is also thoroughly justified. The towers so frequent in the Negeb are evidently vineyard-towers (Is. 52), and Arabic phraseology still gives the name Tuleilat el-'anab, 'grape-mounds,' to the small stone-heaps covering the hill-sides and valleys for miles, along which, anciently, vines were trained.

The fact just mentioned throws considerable doubt on the common theory (see ESHCOL) that the Eshcol of 7. Eshcol. Nu. 13^{23 f.} was at Hebron. The Original tradition surely did not mean that Caleb brought the huge cluster of grapes, the pomegranates, and the figs all the way from Hebron. It was, probably, a journey of exploration in the Negeb that was originally meant, and the spies brought the fruit from the orchards and vineyards nearest to the camp.

If Eshcol be at Hebron, we must either suppose that they brought the grapes through a grape-bearing country, or that they brought them to a Kadesh N. of Ain Gadis ['Ain Kadis] and situate at the present border of Palestine' (Palmer, *op. cit.* 353). The latter hypothesis is clearly unsuitable, as Palmer well points out. It is also not improbable that 'Nahum the Elkoshite' was really 'Nahum the Eshcolite,' the Negeb being a veritable nursery of prophets (see ΠΡΟΦΗΤ, § 6*f.*).

Fully to understand the tradition of the 'spies' we must distinguish between its present and its original form. As it now stands, it seems to represent Eshcol as near Hebron. It is shown elsewhere (MAMRE, REHOBOTH), however, that 'Eshcol' may be a distortion of 'Halasah,' and 'Hebron' in the original story relative to 'Eshcol' and the spies a corruption of 'Rehoboth.

The narrative in Nu. 13²¹⁻²⁶ is composite, and vv. 21-25 ^{26a} are assigned to P, who apparently found 'Rehob,' not 'Hebron,' in his authority, and misunderstood it as meaning a northern Rehob (see REHOB), so that he had to allow 'forty days' (= a long but indeterminate period) for the search of the spies. Rehoboth and Halasah naturally go together, and coming from the desert the spies might quite naturally be supposed to have called this region 'a land flowing with milk and honey.' (Wi. (*Gesch.* 240*f.*), however, maintains that the primitive tradition mentioned not Hebron but Kirjath-arba, which (cp MAMRE), like Rehob in v. 21, he places in the N., at or near Dan.)

We have done our best to explain the geography of the Negeb, mainly from a historical point of view. The task has been very difficult owing to the corruption from which (we believe) the place-names have so frequently suffered. The reader will bear in mind that one object of the present work is to contribute in some degree to the rectification of the details of biblical geography. Nowhere perhaps is so much rectification needed as in the case of the geography of the Negeb. The current identifications (e.g., those of Ziklag, Brook Besor, Telaim, Bealoth, Hazazon-Tamar, Tamar, Ramath of the South, Hornah, Azmon, Karkaa, Madmannah, En-gedi [in Samuel], Ir-ham-melah) cannot be accepted. They are based on what we believe to be textual errors. Not only the geography but also the historical notices themselves relative to the Negeb need to be brought nearer to their original form. Some of these have already been considered here; two more may be mentioned in conclusion. (a) 2 Ch. 20, the account of the victory of Jehoshaphat over the Moabites,

the Ammonites, and the Meunim. A plausible view of the main geographical points has been given by Conder (*PEFO*, 1875, p. 70*f.*) and Buhl (*Pal.* 97); it may be added here that in v. 16 the Chronicler perhaps wrote, 'the wilderness of Jezreel'; if we should not rather emend 'Jeruel' into 'Jerahmeel,' and suppose the recasting of an older narrative in which various place-names were different—e.g., 'Jerahmeel' for 'Jeruel,' 'Kadesh' for 'Hazziz,' and 'Kadesh-jerahmeel' for 'Hazezon-tamar' (see TAMAR). It should be noticed that in v. 2 En-kadesh is misread by the Chronicler as En-gedi.¹ See ZIZ, and cp *Crit. Bib.*

(b) 2 K. 147, Amaziah's victory over the Edomites. Here JOKTHEEL [*g. v.*] should be read 'Jerahmeel.' It seems that in spite of the favourite legend connecting the name 'Jerahmeel' with the story of Hagar (see ISAAC), narrators went on devising fresh explanations of the name. One such is found in Nu. 21 3; another in 2 K. 147. So inextricably are legendary narrative and geographical fact interwoven; so impossible is it to study geography without a critical view of the Hebrew documents and their contents!

See especially Wilton, *The Negeb or 'South Country' of Scripture* (1863); E. H. Palmer, *The Desert of the Exodus*, Pt. II. (1871); Trumbull, *Kadesh-barnea*

8. Literature. (1884); G. Williams, *The Holy City* (1849), 463-468 (Note on Southern Border of Palestine, with letter from J. Rowlands on his exploration of Kadesh and the surrounding country). T. K. C.

NEGINAH, UPON (עַל נְגִינָה), Ps. 61, tit. AV, but RV 'on a stringed instrument.' The Massorettes, however, took נְגִינָה (*neghinath*) to be in *stat. constr.*; they connected it by the accents with נְגִינָה, as if the phrase meant 'accompanied with David's playing on stringed instruments.' Ⓢ, Sym., Jer., Tg., render as if they read נְגִינָה. These views are all impossible; the text needs careful emendation; see NEGINOTH. T. K. C.

NEGINOTH, ON (בְּנְגִינֹת); EN ΓΥΜΝΟΙΣ (Ⓢ, Theod.); EN ΨΑΛΛΟΙΣ [Aq.]; ΔΙΑ ΨΑΛΤΗΡΙΩΝ [Sym.]; *in psalmis*, Pss. 4 (EN ΨΑΛΛΟΙΣ) 6 (om. A) 54 55 61 (?) 67 76; (titles), AV; but RV 'on stringed instruments.' But נְגִינָה does not mean 'a stringed instrument,' nor is it used in the plural (in Ps. 69 13 [12] וַגִּיטֹת should be נְגִינֹת).² נְגִינָה (Neginoth) is corrupted from שְׁמִינִית (Sheminith; see PSALMS, § 26, 26), and this from אֶתְנִים (Ethanites). Thus in Ps. 61 (tit.) there is ditography. The prefixed preposition was evidently altered as a consequence of the faulty reading נְגִינָה. Observe that the psalm in Hab. 3 is inconsistent. It gives נְגִינָה in v. 1, but ['] בְּנְגִינֹת in v. 19 (the title has by accident been divided); see HABAKKUK [BOOK], § 8. עַל-יְהִי שַׁבָּת (or rather, עַל-יְהִי שַׁבָּת 'for the Sabbath-day') should be substituted. Ⓢ in Hab. has *ἐν τῇ ᾠδῇ αὐτοῦ*. See SHEMINITH, UPON; and cp MUSIC, § 6. T. K. C.

NEHELAMITE (Jer. 29²⁴ etc.). See SHEMAIAH (2).

NEHEMIAH (נְחֵמְיָהּ), §§ 30, 62, 'Yahwè is consolation [or, a consoler],' but originally no doubt an ethnic name, cp NAHAM, NAHAMANI, and see note 3. Cl.-Ganneau reports a late Jewish name נְחֵמְיָהּ [*Sceaux et cachets israelites*, 1883]; ΒΝΑΛ ΝΕΕΜΙΑΔ [genit. ΝΕΕΜΙΑΔ; but in Neh. 11, ΒC. MS. SUP. L, and in Neh. 1247 N^{c-a} L, ΝΕΕΜΙΟΥ]; ΝΕΕΜΙΟC [B in Ezra 22], ΝΑΙΜΙΑC [1 Esd. 540 B], ΝΕΜΙΑC [2 Macc. 136 V*].

1. B. Hachaliah,³ a leader in the reorganisation of the land of Judah. We are in a favourable position for studying his career, his enterprise. because a large portion of the book which bears his name (Neh. 11-75 11 1227-1331) comes

¹ 'En-kadesh' is misread in the same way in 1 S. 28 29 24 1.
² fell out owing to נְגִינָה (corrupted from נְגִינָה) which follows.

³ [The form is doubtful. See HACHALIAH. At any rate it springs from an ethnic name, and, if identical with Hilkiah, from one of the ethnics connected with the Negeb. Nehemiah, if= Naham, has a similar origin.]

from a work of his own composition [which, however, we must not read with a blind belief in Nehemiah's infallibility]. He was one of the cupbearers of King Artaxerxes, *i. e.*, of the first king of that name¹ (465-425 B.C.)—[an important office—see CUPBEARER—which gave him great influence with the king]. It so fell out that while attending to his duties at the royal winter palace at Shushan or Susa, in the month of Kislev or December, 445 B.C., he received a visit from a party of Jews from Judæa, led by a kinsman of his own named Hanani, who told him of the sad condition of the Jews in 'the province' (Judah or Judæa), and of the defenceless state of Jerusalem. Greatly troubled by this news, he betook himself to prayer and fasting [and from the words of his prayer it appears, according to Kusters, that it was not any recent calamity that Hanani referred, but to the old devastation by Nebuchadrezzar].

[This view of Kusters is rejected by We. (*GGN*, 1895, p. 170) and by Meyer (*Entst.* 56). With most recent critics they are of opinion that the wall and gates of Jerusalem were rebuilt by Ezra, and that their destruction (Neh. 13) was the work of the Samaritans (cp Ezra 4, Neh. 47) acting with the sanction of Artaxerxes I. It has also been held (Nöld. *Aufsätze zur pers. Gesch.* 56; Che. *OPs.* 71), that it stood in some connection with the revolt of the satrap Megabyzos (448 B.C.), with which the Jews may, rightly or wrongly, have been suspected of complicity.

The latter theory, however, is too hazardous. If the Jews of Judæa had been regarded as mixed up with this revolt, Artaxerxes would not have been so ready to accede to the wishes of Nehemiah; indeed, Neh. 2:19 implies that up to Nehemiah's time the Jews had not committed any overt act of rebellion,² and we may venture to suppose that the great king wished, through his Jewish courtier Nehemiah, to reward the Jews of Judæa for not having been drawn away from their allegiance by Megabyzos. As for the former theory, we cannot safely base anything on the narrative and official documents in Ezra 4, both of which are most probably fictitious (see EZRA-NEH.), though Meyer and Sellin have vigorously defended their genuineness; see also Winckler, *AOF* 2:210 ff.

The prevalent opinion, which assumes that Ezra came to Jerusalem before Nehemiah, rests on an imperfect criticism of the compilation of the Chronicler, and has been rightly rejected by Marquart (*Fund.* 58) and Winckler (*AOF* 2:216 f.). To this it must be added (1) that after Ezra's failure in respect of the mixed marriages we cannot understand how he should have succeeded in stirring up the people to restore the wall, and put an impediment in the way of fraternising with the Samaritans, and how, when Nehemiah takes up and not without difficulty, carries through the work of restoration, no mention should be made of Ezra (Neh. 12:36 has been tampered with, see § 5); and (2) that the conversation between Nehemiah and the king in Neh. 2 makes no reference to a removal of a royal prohibition to restore the walls. It is no answer to this that Artaxerxes was good-natured but weak. There is no evidence for this; the manner in which he

¹ [The king under whom Nehemiah and Ezra lived must have been the first Artaxerxes; otherwise the growth of the Pentateuch and of the Psalter is scarcely explicable. It is true, Marquart (*Fund.* 37) objects that if a son of Joiada was already married in 433 (Neh. 13:28), Joiada's grandson Jaddua could not possibly have been high priest a century later under Darius III. But why need we take 'Darius the Persian' (Neh. 12:22) to be Darius III.? It is not to the Chronicler that Neh. 12:1-26 is to be assigned, but to an earlier writer. 'Jaddua' may be an error for 'Joiada' (emend *v.* 11 f. accordingly). Joiada, son of Eliashib, was apparently high priest in 433 (Neh. 13:28, where 'high priest' refers to 'Joiada'); his son 'Johanán' may well have been high priest in 424. Thus 'the reign of Darius the Persian' (12:22), corresponds to 'the days of Johanán b. Eliashib' (*v.* 23). In Neh. 12:11 'Jonathan' should of course be 'Johanán' ('Jaddua' goes out). 'Johanán' in Ezra 10:6, if correct, must be a brother of Joiada; but the name may be a mistake (due to the redactor of Ezra's memoir) for 'Joiada'.]

² [The expression is designed. Tattenai may have given reason for suspecting the Jews of a disloyal temper, which may, indeed, account for the sudden disappearance of ZERUBABEL (*q. v.*). More than this we cannot suppose, and persistent loyalty during the revolt of Megabyzos would wipe out previous suspicions.]

reached the throne certainly does not favour this view; but cp ARTAXERXES, *ad fin.* (3) The language of the Samaritans in Neh. 2:19 f. 3:33 [4:1] seems to imply that no previous attempt like that of Nehemiah had been made.

Not less untenable is the theory which has lately been revived by Sellin (*Serubbabel*, 51 f.; cp 197), viz., that the wall and gates had been restored by Zerubbabel under Darius I., but had shortly afterwards been destroyed, when the royalistic movement centering in this prince collapsed (to this he finds an allusion in Ps. 89:40). Long ago (1854) Ewald (*GVV* (3) 4:156) proposed the same view, which he supported by the very same psalms as are appealed to by Sellin, viz., 44:60 74:79 80:89 (Ewald adds 85, Sellin 83:102)—psalms which he had previously (with more plausibility) referred to 'the destruction under Bagöses related in Jos. *Ant.* xi. 7:1'. This, however, is connected with a historical theory respecting the career of ZERUBABEL (*q. v.*), which has no evidence in its favour, and the view about the destruction of the walls is inconsistent with Zech. 2:4 f. Cp PSALMS (BOOK), §§ 28, 32. We are now (1901) able to add that the author himself has withdrawn this theory (*Studien zur Entstehungsgesch.* etc., 2:181 *100*). His present view is that the walls were being rebuilt under Cambyses (or Cyrus) when they were destroyed by the Samaritans (p. 182). Against this see (3) in the preceding paragraph.

Nothing therefore remains but to consider the claims of the theory of Kusters.

(1) That no recent destruction is referred to is plain from the prayer of Nehemiah. The great object before the mind of the suppliant is the return of the exiles to Jerusalem. Until the wall had been restored, and the community had adopted the same view of religious purity as was current among the Jews of the Dispersion, such a return was impossible. The first thing, therefore, was to get the wall restored. Had this been done earlier, a large body of exiles would have migrated before the time of Ezra. They did not so migrate, for Nehemiah evidently found no considerable Babylonian element at Jerusalem; therefore the wall cannot have been rebuilt before the time of Nehemiah.

(2) The same result follows from the language of Hanani in Neh. 1:2 f. He does not indeed underrate the miserable condition of Jerusalem; but the main point with him is the affliction and the insults suffered by its inhabitants. That is the novel element in the tidings which he brings. Shortly before Nehemiah's governorship the relations between the Jews and the Samaritans were becoming more and more strained. There was as yet no regular feud; but the tendency to a feud was not wanting. There was an active, though not as yet a predominant, orthodox party at Jerusalem, and Sanballat and Tobiah 'had come to feel that the differences which parted them were greater than the resemblances which united them.'¹ They did not withhold taunts and insults, which were returned in good measure to them and to their Jewish sympathisers by Jewish prophetic writers (Is. 57:3 65:1-5 66:3). Hanani, doubtless, feared that worse things would follow, and attributed this to the want of a material barrier to intercourse between the unorthodox party in Jerusalem and the Samaritans outside. Hence, probably, the stress which he laid, when visiting Nehemiah, on the destruction of the wall (Neh. 1:3).

Both in *Serubbabel* and recently in *Studien* ii. Sellin controverts Kusters' interpretation of Neh. 1:3, where the Jews of Judæa are called 'the remnant that are left of the captivity' (הַנִּשְׁאֵרִים אֲשֶׁר מִן הַשְּׁבִי). 'Sebi' (שְׁבִי), according to Sellin, means the same as *göläh* (גּוֹלָה), 'those who had been carried away.' Kusters, however (and so Marq. *Fund.* 35), takes the phrase to mean 'those who have escaped the deportation in the time of Nebuchadrezzar.' According to Sellin, Hanani implies that a considerable number of Babylonian Jews—Jewish captives (שְׁבִי)—had returned to Palestine, but (so at least in *Serubbabel*) that many of these had lost their lives in the troublous times of Zerubbabel—a very forced explanation. The true sense is shown by Ezra 9:7, 'we have been given up . . . to the sword, to captivity, and to spoiling' (RV), where 'to captivity' clearly means 'to be carried captive.' Kusters' view is perfectly correct, and indeed is required by the preceding word *peletäh* (פֶּלֶטָה), 'those who have escaped.'

¹ *Jew. Rel. Life*, 45.

For three months Nehemiah remained a prey to his own sad thoughts, and then his opportunity came. Artaxerxes one day questioned him about his depression, and Nehemiah, after secret prayer to God for help, laid his case before the king. Artaxerxes and his consort (who also was present) were favourable to the request, but desired that Nehemiah's leave of absence should be as brief as possible. It would seem, however, that he left Susa invested with the governorship of Judah for an indefinite period; [though the text of 5:14 may perhaps require a closer inspection; see § 5]. Provided with letters to the governors of the region to be traversed, and with a military escort, Nehemiah in due course reached Jerusalem.

Within three days from his arrival he addressed himself to his work. After making a nocturnal survey

2. Restoring walls. of the walls, secretly and almost unaccompanied, he began to stir up both rulers and people to take in hand the work of restoration.⁴ This they declared themselves ready to do (2:11-18). Prompt action was taken, and not only Jerusalem, but also other places, such as Jericho, Tekoa, Gibeon, Mizpah, joined in the work; high priest, priests and Levites, civil administrators, and heads of guilds, and even women, became each responsible for some part of the building (3:1-32).

[This passage, as well as the brief account of Nehemiah's secret visit of inspection, deserves careful study from a topographical point of view. Some of the proper names, too, are most interesting; e.g., BEN-ODEIAH, COL-HOZEH, HALLOHESH, HARHAIAH, HASSENAAB.]

The difficulties, however, with which the governor had to contend were still great. Influential persons of non-

3. Opposition from without. Israelite descent—'Sanballat the Horonitic, Tobiah the Ammonite servant [EV 'the servant, the Ammonite'], Geshem, or Gashmu, the Arabian,' of whom at least the first two had intermarried with leading Israelite families—had regarded the coming of Nehemiah to seek the welfare of the Israelites' (2:10) with no favour. They vied with one another in ridiculing Nehemiah's undertaking (2:19 f. 3:33-35 [4:1-3]). Then, waxing bolder, they planned a sudden attack on the builders of the wall (4:7 f. 11 [1 f. 5]). Nehemiah, however, was warned in time by Jewish friends on the frontier. At once he suspended building operations, and posted his people behind the walls with arms, so that the enemy was overawed and had to abandon his plan. Henceforward Nehemiah was continually on his guard. Of his people one-half were in constant readiness to repel any onslaught. The builders themselves had their weapons by their side, and all the workers passed the night within the walls, a precaution that had not previously been thought necessary (4:15-23 [9-17]). The enemy's next resort [as Nehemiah represents] was to cunning (6:1-14). Over and over again they invited the governor to conference. On one occasion they pretend that their object was to counteract certain evil rumours which had been circulated against him; on another they feed a Jewish prophet to induce Nehemiah to seek refuge in a part of the temple that was forbidden to the laity, so that he might lose influence with the people. Nehemiah saw through them, however, and did not fall into their traps.

[The section of Nehemiah's memoir on which the above sketch is based needs a very thorough criticism. It is no doubt plausible to assume that Sanballat and

¹ [According to Wl. (*AOF* 2:234 ff.), the object of Nehemiah's mission was to introduce an important modification into the purely hierarchical system of government lately introduced by Ezra in the priestly code, the high priest Eliashib having shown himself untrustworthy. Once more the land was placed under a secular official—a *pehiah* (פיה), or 'governor,' appointed by the court. When Nehemiah returned to Susa, Eliashib, who coveted the support of other noble but non-Israelitish families, renewed his intercourse with Tobiah the Ammonite; and Nehemiah, on his second arrival at Jerusalem, punished this by banishing certain members of the high-priestly family on a legal pretext. But Nehemiah's mission can be accounted for without this hypothesis.]

Tobiah were a Moabite and an Ammonite respectively, and to illustrate the intermarriage of Jewish families with them by Neh. 13:1. It would seem, however, that Sanballat and Tobiah were worshippers of Yahweh, and from Nch. 4:2 [3:34] that Sanballat was a kinsman of the Samaritans. These considerations throw some doubt on Koster's view.

The most critical course is to emend the text of the passage referred to (3:34 [4:2]), which is admittedly in some disorder, and to read, 'And he said before the Jerahmeelites and Misrites, What are the Jews doing?' See *Crit. Bib.*; the proof of this emendation lies in the interpolated מללית explained as corrupted ירהמליית (ditographed). Sanballat (if the name may pass) was a Misrite of N. Arabia; Tobiah (or rather Rehoboth?) was probably called a Jerahmeelite, not an Ammonite. 'The servant' (cp RV) is a corruption of 'the Arabian,' which is itself a misreading. See SANBALLAT, TOBIAH.

Whether Sanballat really believed that Nehemiah was about to rebel against Persia (2:19 6:6) is uncertain; but it was, at any rate, a colourable pretext for his opposition. The sudden disappearance of ZERUBBABEL [7. v.] seems to have been caused by just suspicions of his untrustworthiness, and some Jewish prophets may possibly have represented Nehemiah as the destined Messiah.¹ That Sanballat was unconciliatory cannot fairly be said. Undeterred by a first rebuff, he made four more attempts to bring about a conference with the governor (6:2-5). Nehemiah's cause was better than that of Sanballat; but Nehemiah carried his suspiciousness to an extreme. He was the man for the time; but historical students will seek to do justice not only to him but also to his opponents.]

Nehemiah had to contend with pusillanimity within, as well as with hostility without. He had to listen to

4. Difficulties within. complaints of the difficulty of the work (4:10 [4]) and to grievances of the poor against the rich (5:1 ff.); nor could he by any means certainly reckon on the fidelity of the Jewish relatives of his enemies (6:17-19). But these obstacles also he was able to overcome. By his vigorous measures of defence, by the firmness of his faith in his own vocation and in the help of God, he inspired the timid with courage, and all with a spirit of respect and reverence. Above all was he strong by his generous disinterestedness; thus, himself renouncing all claim upon his debtors, he induced the rich Jews to engage themselves to restore the possessions of their poorer compatriots which they had received in pawn, and not to exact payment of their debts; the dues which as governor he was legally entitled to exact for his own use, he refrained from collecting; he gave up his personal servants that they might labour at the building of the wall; daily he received at his table Jews from outside the city who came to Jerusalem partly to hold council with him, and partly for the purpose of sacrificing (chap. 5). In this way he was able to make head against all difficulties and at last bring his great work to a conclusion. On the 25th of Elul, after fifty-two days' labour, the restoration of the wall was completed (6:15).

A solemn dedication ceremony ensued. Two choirs of priests and singers, followed by the rulers and the

5. Dedication. people, and headed, the one by Hoshaiah and the other by Nehemiah, marched from one fixed point in opposite directions, with music and song, along the walls, and rejoined one another for the solemn festival in the temple (12:27-43).

[It is stated in Neh. 5:14 that Nehemiah acted as governor of Judah 'from the 20th to the 32nd year of Artaxerxes the king, that is, 12 years.' This must surely be due to a later hand. Nehemiah's leave was only for a set time, and the king evidently expected him to return soon. The restoration of the wall was taken in hand promptly, and was effected in fifty-two days (Neh. 6:15). It is true Nehemiah had ulterior objects. But apparently he had not communicated these to

¹ *Jew. Rel. Life*, 46 f.

Artaxerxes. If Josephus's date (see *n. 1*) be correct, Nehemiah's governorship lasted only seven years. The context of Neh. 5¹⁴, however, suggests that the memoir was written soon after the completion of the wall (see *v. 16*). Not improbably we should read in *v. 14*, for 'thirty-second,' 'twenty-second,' thus allowing *two years* for the governorship. This amply suffices for the works ascribed to Nehemiah. The mistake 'thirty-second' would be caused by the fact that Nehemiah's second brief governorship is placed in the 32nd year of Artaxerxes (Neh. 13⁶.)

The walls and gates once set in order, Nehemiah's next care was for their being properly guarded, and for the due opening and closing of the gates; he also saw to the government of the city, devised means for augmenting its population by immigration (7¹⁻⁵ 11¹ *f.*), and successfully induced many Levites, who still remained in other cities and villages, to transfer their residence to Jerusalem (cp 13¹⁰ *f.*).

[Between Nehemiah's first and second visits Marq. and Che. place Ezra's attempt at reorganisation. Nehemiah is nowhere mentioned as present in Jerusalem in the records of Ezra; Ezra nowhere in those of Nehemiah. The reference to Ezra in Neh. 12³⁶ is an interpolation of the redactor; in Neh. 12³³, Ezra (= Azariah, 10²) is a gentile name. On the supposed references to Nehemiah in the memoirs of Ezra, see TIRSHATHA. That Nehemiah found no Babylonian element in the population of Judah worth reckoning with, appears from his own record. The only difficulty is in the date in Ezra 7⁷ (cp Neh. 1¹). Perhaps we should read, for 'in the seventh year,' 'in the twenty-seventh year' (בשנת עשרים ושבוע); similarly in *v. 8*. It is true that Ezra 7¹⁻¹⁰ comes to us in a revised form; but we need not assume that the date is the insertion of the reviser. Cp CHRONOLOGY, § 14.]

After a visit to Artaxerxes (Neh. 13⁶) in the 32nd [or possibly 22nd] year of his reign, 433 B.C. [or 443?], Nehemiah returned to Jerusalem.

6. Second visit: He now appeared more than formerly as a religious reformer. The holders of the higher offices of the priesthood learned what stuff he was made of. 'The priest Eliashib' had given the use of one of the chambers belonging to the temple to Tobiah. Nehemiah indignantly cast out Tobiah's household utensils (13⁴⁻⁹). Worse still, a grandson of Eliashib¹ the high priest had married a daughter of Sanballat. Him Nehemiah expelled from the sacred city (13²⁸). In the same section (*v. 29*) the governor makes reference to a number of priests who had desecrated their office; we may assume therefore that this was not the only drastic measure carried out by Nehemiah in the temple. Certainly it is presupposed in Ezra 9 *f.* Neh. 9 *f.* that shortly afterwards the priesthood which served in the temple was of the right sort. It is not impossible that Nehemiah even deposed the high priest in favour of his son Jehohanan, the ally of Ezra (Ezra 10⁶). His next measures of reform were directed against those who had married foreign wives; he made them swear that they would not suffer their children to intermarry with foreigners, and did not hesitate physically to assault the recalcitrant (13²³⁻²⁷). He took measures to prevent traders with their wares from entering the city on the sabbath day (13¹⁹⁻²²); secured that the Levites, who during his absence had again left the city, should thenceforward no longer be kept out of their dues (13¹⁰⁻¹⁴); and made certain regulations with reference to the temple service, the wood-offering, and the first-fruits (13³⁰ *f.*).

Nehemiah's activity in Jerusalem after his return having thus been so different from that of his earlier period,

7. Office. and so much more decidedly ecclesiastical, it becomes a question whether during his second period he still continued to hold the dignity of governor. There is some reason for doubting whether he did. He himself expressly says [in the difficult passage, 5¹⁴, on which see above, § 5] that he was 'governor in the land of Judah' for only twelve years, down to the 32nd year of Artaxerxes; and in the parts

¹ [No doubt the Manasseh, of whom Jos. *Ant.* xi. 8 2-4 tells us.

of the Book of Ezra-Nehemiah which relate to the time of his second visit, he is called [if we may trust the text] the Tirshatha and no longer *pehā* or governor. See TIRSHATHA.

It seems probable, therefore, that on the occasion of his journey to court, Nehemiah had asked and obtained a change of position. Why he desired this we are not told; but we are able to guess. From the outset Nehemiah's programme had been the restoration of Israel, to which the restoration of the walls was only subsidiary. To this restoration the most serious obstacle was the conduct of Nehemiah's non-Jewish adversaries. Their efforts to frustrate the restoration were indeed in vain; still, their influence at Jerusalem continued to be very great, because of their alliance with the ruling families among the Jews, and even with that of the high priest. Their Jewish relatives who had supported Nehemiah in his rebuilding of the wall seemed disinclined to assist him in counteracting the foreign influences, on behalf of which indeed they openly took sides against him¹ (6¹⁷⁻¹⁹). Nehemiah saw clearly, however, that, if Israel was to be restored, the high-priesthood must not be allowed to remain in the hands of Sanballat's and Tobiah's relations, and that a religious reformation had to be brought about. This he desired to accomplish; but for the purpose he needed to have a position that would enable him to come forward in another capacity than that of governor of Judæa. It was with reference to this that he made his journey up to court, and we find him returning apparently with permission to come forward as a reformer of the religious condition of Judæa, not as *pehā*, but as Tirshatha. It is not inconceivable that, in connection with his plans for reformation of the priesthood, Nehemiah had asked the king to hand over to the high priest some of those functions of governor which, in point of fact, we find him exercising at a later period.

[This hypothesis depends to some extent on the correctness of a very strange-looking word (*hat-tirshathā*), which in every passage where it occurs may be corrupt, and in some of the passages may have been inserted by a glossator. This at least, however, it is safe to assume, when drawn a second time by patriotic anxiety from Susa, Nehemiah came rather as special high commissioner than as governor. See *Jew. Rel. Life*, 64.]

The conjecture that Nehemiah's journey to court was the occasion of the return of Ezra and his band of exiles to Jerusalem is natural. By what means could Nehemiah better bring about the accomplishment of his aims than by such a strengthening of the Jewish element in Judæa? That at all events he gave his powerful aid to Ezra, co-operated with him in the formation of the congregation, and also took part with him in introducing the new law, we have endeavoured to show elsewhere (EZRA, §§ 6-8).

Nehemiah was a strong man; he achieved great things, and conquered difficulties that were well-nigh insuperable. It was faith that made him strong; though he is himself the chronicler of his own good deeds (5¹⁹ 13¹⁴ 22³¹), we cannot doubt either the genuineness of his piety or the purity of his patriotism; he sacrificed much for the restoration of Israel, the object of his faith and prayers. No wonder that this man was affectionately remembered by posterity. Ecclus. extols him (49¹³; see, however, Swete's text) as the restorer of the city walls; and in one of the two letters with which 2 Macc. opens (1¹⁻² 18) he is even celebrated as the man that rebuilt the temple and discovered the altar-fire which, at the destruction of the temple, had, at God's command, been hidden by the priests. Moreover, in 2 Macc. 2¹³, where it is said that he commenced a library of accounts of the kings and the prophets, and

¹ [All that Nehemiah says, however, is that the nobles of Judah kept up a correspondence with Tobiah (Neh. 6¹⁷). What follows in *v. 19* is incorrectly read. סתורין can hardly mean 'his good deeds.' Read 'Moreover Rehobothites (רְהוּבֹתִים) were (continually) speaking before me, and reporting my words to him.' In justification of this, see TOWIAH.]

writings of David, and letters of kings concerning temple-offerings, he is honoured as collector of part of Israel's sacred literature. Thus he was regarded in later times as the restorer, not only of Jerusalem and its walls, but also of the temple and its services; and also as the man who rendered important service towards the formation of the sacred canon of Israel.

2. B. Azbuk, chief of half the district of Beth-zur, mentioned in list of wall-builders (Neh. 3.16). See above, § 1*f*.; also EZRA II., §§ 16 [i.], 15 *d*.

3. One of the leaders (see EZRA II., § 8*e*) of the Jews in the great post-exilic list (EZRA 2 = Neh. 7.7 = 1 Esd. 5 = Nehemias). See EZRA II., § 9, and GOVERNMENT. W. H. K. — T. K. C.

NEHEMIAH (BOOK). See EZRA AND NEHEMIAH.

NEHILOTH, 'with the [RV], or, 'upon [AV], (נְהִילוֹת) עַל-הַנְּחִילוֹת; γῆπερ τῆς κληρονομουόχης; ἀπο κληροδοσιῶν [Aq.], γῆπερ κληρογχιῶν [Syn.], *pro hereditatibus* [Jer.]), Ps. 5 (title). Interpreters differ precisely as in the case of MAHALATH [*q.v.*]. But we may be sure that '(the) Nehiloth' is not the first word ('heritages'?) of a well-known song, nor a synonym for *hālilim*, 'flutes' (see, however, RV^{mg}), nor miswritten for *mehōlōth*, 'dances' (so apparently Tg. reads). As Grätz has pointed out, it is simply a corruption of נְהִילָה. The versions all agree in disallowing the *v* in נְהִילוֹת; it is true, they also disallow the *h*, which, however, is of no significance. Tg.'s reading suggests that between נְהִילָה and נְהִילוֹת there was a transitional reading נְהִילָה; *i.e.*, Alamoth first became M-h-l-th and then N-h-l-th. See further PSALMS (BOOK), § 26 [1]. T. K. C.

NEHUM (נְהוּם), Neh. 7.7 = Ezra 2.2, REHUM.

NEHUSHTA (נְהוּשְׁתָּא, § 68), the mother of king JEHOIACHIN (2 K. 24.8, ΝΕΘΑ [B], ΝΑΙΘΑ [A], ΝΕΘΘΑ [L]). The readings quoted approximate curiously to the name NEHUSHTAN [*q.v.*], and are on this account strongly suggestive of corruption. Comparing נְהוּשְׁתָּא (which we take to be from נְהוּשָׁ and נְהוּשָׁן (from נְהוּשָׁ), we may suppose נְהוּשְׁתָּא to be a corruption of נְהוּשָׁ. The queen-mother then was Cushith—*i.e.*, a N. Arabian. Her father was 'Elnathan of Jerusalem.' Elnathan, however, is probably an expansion of Ethan (cp NETHANIAH), and the very unlikely 'Jerusalem' (like 'Abishalom' in 1 K. 15.2.10) is a corruption of Jerahmeel. Cp MAACHAH. T. K. C.

NEHUSHTAN (נְהוּשְׁתָּן; ΝΕΘΑΛΕΙ [B], ΝΕΘΘΑ [A], ΝΕΘΘΑ [L]; *Nehistan, Naasthan*).

2 K. 18.4*b* is rendered thus in EV, 'and he brake in pieces Nehushtan' (with two marg. rends., 'Or, it was called,' and 'That is, a piece of brass').

The implication is that when HEZEKIAH [*q.v.*] destroyed this idolatrous object, he called it 'a mere piece of brass (bronze).' It cannot be denied that this view of יְהוּשָׁתָן is plausible; it is also favoured by Ἐβραῖα (καὶ ἐκάλεισεν). To suppose that those who offered sacrifices (קָטַר; see INCENSE, § 1) to the brazen serpent called it 'Piece of Brass,' is surely absurd. Still, the grammatical structure of the sentence favours the view that a statement respecting the name given by the worshippers is intended (Klost. reads יְהוּשָׁתָן or יְהוּשָׁתָן; cp L καὶ ἐκάλεισεν), and the question arises whether נְהוּשְׁתָּן represents correctly the name given by the worshippers to this sacred object. The theory which is archaeologically the most defensible as to the religious significance of the brazen serpent has suggested to the present writer that the original word may have been לֵיָתָן, Leviathan, and that the deuteronomist, who (probably) adopted 2 K. 18.4-5*a* from the royal annals, out of a religious scruple changed לֵיָתָן into נְהוּשָׁתָן, which of course involved interpreting יְהוּשָׁתָן 'and he (Hezekiah) called it.'¹

¹ Or else יָתָן in לֵיָתָן fell out owing to the preceding יָתָן, and נְהוּשָׁתָן was inserted by conjecture for the missing letters. This

The early writer from whom the deuteronomist draws in 2 K. 18.4 brings Nehushtan (?) into connection with the brazen serpent (נְהוּשָׁתָן שֵׁרֶפֶת, θφν

2. Origin and meaning. χαλκοῦν [BAFL]) mentioned in Nu. 21.9. Combining these two passages we

are justified in supposing that in the regal period the superstitious Israelites sacrificed to the idol to obtain the recovery of their sick (cp SERPENT). It would not, however, follow that a healing virtue had always been supposed to be inherent in this sacred object. The fact (as we may venture to regard it) that the brazen oxen in 1 K. 7.25 were really copies of the oxen which symbolised Marduk in Babylonian temples (from which the brazen 'sea,' also symbolic, was probably derived) suggests that for an explanation of Nehushtan we should look to Babylonia (see CREATION, §§ 13, 19, 22). Now, it is certain from very early inscriptions (K^B 31, p. 143; 32, pp. 21, 35, 73) that Babylonian temples contained, not only brazen oxen, but also brazen serpents. Some of these (see *e.g.*, K^B 22, p. 35) may have been protective serpents, such as were worshipped in the larger Egyptian temples; but when, as in Solomon's temple, only a single one is mentioned, it is reasonable to suppose that it is the 'raging serpent' (*i.e.*, Tiamat) that is meant, as in the inscription of king Agum-kakrīmī (K^B 31, p. 143). If so, the brazen serpent (more properly called LEVIATHAN, see above, § 1), which Solomon adopted with the brazen 'sea,' and the brazen oxen from Babylonia, was originally a trophy of the Creator's victory over the serpent of chaos.

In later times it is very probable that the true meaning was forgotten; it appears from Am. 9.3 (see SERPENT, § 3*f*.) that the prophet Amos had heard only an echo of the old dragon-myth. A new meaning would therefore naturally become attached to the venerated symbol—the meaning suggested above, which is supported by the etiological story¹ in Nu. 21 (cp Baudissin, *Stud. Sem. Rel.* 1.288).

A less probable theory of the brazen serpent must not be unrecorded. W. R. Smith thought (*J. of Phil.* 9.99) that 'Nehushtan' represented the totem of the family of David, and was worshipped by members of that stock in the manner described in Ezek. 8.8. This theory, however, is based on the traditional text of 2 S. 17.25 (see NAHASH), so that the totem-theory needs some modification in order to become plausible. Hence Benzinger has suggested that there may have been a serpent-clan among the tribes which united to form the Israelitish people, cp Gen. 49.17, of which Nehushtan may have been the sacred symbol just as the ARK [*q.v.*] may have been that of the tribe of Joseph. It is very doubtful, however, whether the so-called 'serpent-names,' NAHASH, NAASHON, NUN, and NEHUSHTA are textually sound; all are in various degrees suspicious.

Was the brazen serpent in the temple really of primitive origin? We may well doubt it. The presumption is that it was neither more nor less ancient than the other sacred objects of Babylonian affinities in the temple of Solomon (cp CREATION, § 19).² T. K. C.

NEIEL (נְעִיֵל) on the first part of the name see ZALMUNNA; יְנֵיֵל [B], אֲנִיֵּל [A], נְעִיֵּל [L]), mentioned with Beth-emek in the delimitation of Asher; Josh. 19.27. See BETH-EMEK and cp NEAH. Conder finds Neiel at K/h. Ya'nin, 9 m. E. of 'Akka, and Robinson at the village M'ar 2 m. E. of Ya'nin. Both are no doubt ancient sites (see Guérin, *Gal.* 1.434-436).

NEIGHBOUR (ὁ ΠΛΗΧΙΟΝ) answers in the LXX to אֶת 'āh, עֲמִית 'āmīth, רֵעַ rēū', אֶת בֵּית קָרוֹב אֵל kārōbh 'ēl bāyith.

approaches Nöldeke's suggestion, נְהוּשְׁתָּן (ZDMG, 1888, p. 482, n. 1). But the combination of these two terms for 'serpent' could not have been original. Klost. is also at any rate on the right track; he explains (נְהוּשָׁתָן), 'ancient serpent.' See SERPENT.

¹ The view here taken of Nu. 21.5-9 is not disproved by W. H. Ward's discovery of a 'Hittite' cylinder on which worship is apparently represented as offered to a serpent on a pole. Indeed, such a representation helps us to understand how the story came to arise (cp SERPENT).

² The writer has maintained these theories for several years, nor is he under obligations to other critics. Only after writing the above did he observe Stade's combination of suggestions in *CVI* 1.467, one of which is that the idol Nehushtan might be connected with the cultus of the sky-serpent.

NEKEB

Three points in the teaching of Jesus connected with this word deserve special attention.

1. In Mt. 543f. Jesus contrasts the precept given to the ancients, 'Thou shalt love thy neighbour and hate thine enemy,' with his own rule, 'Love your enemies.' The former part of the old principle is a verbal quotation from Lev. 1918 G, and, as the parallelism clearly proves, 'neighbour' was there synonymous with compatriot. The Jew was not at liberty to hate his personal enemies (see, on the contrary, Ex. 234f.; Lev. 1913; Prov. 2022 2417 29 2521f.; Job 3129; Ps. 74 [5]), nor is he anywhere required in express terms to hate the heathen. The scribes, however, may very well have thought such feelings justified from the ban under which Canaanite cities were to be put (Dt. 72), and from the language used in Dt. 152f. 2013-18 2517-19 Mal. 12f., and especially Ps. 13921f. All the more natural and indeed inevitable was such an inference in the strong reaction against the heathen power which held the chosen people in its grip. Jesus, then, taking 'neighbour' in its accepted sense, pronounces the former half of the Jewish maxim insufficient and sweeps the latter half of it away. His disciples are to love not only their countrymen, not only even their private foes; their love is to reach even those who hate them as members of the Kingdom of God. Christianity is to overcome the very opposition which it creates. The author of Lk. 627, as is his wont, omits the reference to the Jewish law and sets the maxim at the head of the discourse immediately after the introductory beatitudes and woes.

The words 'Thou shalt love thy neighbour as thyself' occur in the summary of the law which Jesus gave the rich young man, as reported in Mt. 1916-30. They are absent, however, in the parallel account in Mk. 1017-31 (cp Lk. 1818-30) and the fact that this is just the point in which the young man fails when Jesus puts him to the proof, shows that the words in question do not belong to the original tradition but have been added from 2239. In any case they throw no light on the term 'neighbour,' as Jesus understood it.

2. In Mt. 2234-40 (= Mk. 1228-34) Jesus, when questioned as to the kind of commandment which is greatest, quotes as the great commandment Dt. 64 'Hear O Israel, the Lord our God is one Lord and thou shalt love the Lord thy God,' etc., connects with it another commandment from another book, 'Thou shalt love thy neighbour as thyself' (Lev. 1918), and declares that the second is 'like'—i.e., in importance—to the first. All the law and the prophets, he says, hang on those two commandments,—i.e., proceed from them—so that multiplicity of enactment disappears in unity of spirit. Here Jesus accepts the love of our neighbour as sufficient, though to him, no doubt, the word had a wider sense than it bore in the Hebrew Code.

3. Once, however, Jesus took occasion to develop this wider meaning. Asked 'Who is my neighbour?' he replied by the parable of the Good Samaritan (Lk. 1029-37) and then himself asked the questioner, 'Which of these three thinkest thou proved neighbour to him that fell among the robbers?' The object of Jesus was apparently to show that one of the heretic and hated Samaritans could prove himself a better neighbour to a Jew than a priest or a Levite, and that it is therefore wrong to refuse them the title of neighbour. If this interpretation be correct,¹ Jesus extends the term 'neighbour' in the command 'Thou shalt love thy neighbour as thyself,' till it is co-extensive with mankind.

This wider sense belongs to ὁ πλησίον in the rest of the NT. According to Paul (Rom. 139) all the law is summed up in the command, 'Thou shalt love thy neighbour as thyself,' and this, according to James (28), is the royal or principal law. W. E. A.

NEKEB (נֶכֶב), Josh. 1933 AV†, RV ADAMI-NEKEB.

NEKODA (נֶקוֹדָא), a kind of bird? § 83; ΝΕΚΩΔΑ [BNAL].

¹ It is the simplest, though not the commonest interpretation of the passage. See B. Weiss, *ad loc.*

NEPHI

1. The family name of a company of post-exilic Nethinim; Ezra 248 (vey. [B], νεκωδαν [A])=Neh. 750 (νεκωδαμ [R])=1 Esd. 531 (νοεβα [BA], EV NOEBA).

2. One of the three families from Tel-melah, Tel-harsha, Cherub, Addon and Immer, that were unable to produce written evidence of their Israelite descent: Ezra 260=Neh. 762=1 Esd. 537 AV NECODAN, RV Nekodan (νεκωδαν [BA]).

NEMUEL (נֶמוּאֵל), § 4; ΝΑΜΟΥΗΛ). 1. One of the sons of Simeon; Nu. 2612 1 Ch. 424. If these clan-names are traditional records of ethnic affinities, a better reading would be JEMUEL (יֶמוּאֵל; יֶמוּוּהַל; יֶמוּוּהַל [B], in Ex.) as in Gen. 46 to Ex. 615—i.e., Jerahmeel. This is confirmed by the circumstance that a Reubenite bears the same name ('Reuben' probably is a Jerahmeelite name; Reuben seems to have been originally a southern tribe). Further evidence might be produced. The patronymic Nemuelite (ναμουηλ[ε]ι) occurs in Nu. 2612.

2. A Reubenite, brother of Dathan and Abiram (Nu. 269).

T. K. C.

NEOCOROS (ΝΕΩΚΟΡΟΣ, Acts 1935, 'a worshipper,' AVmg. 'the temple keeper,' RV 'temple-keeper'). The word Neocoros is an old religious term in Asia Minor, adopted and developed in the imperial cultus which was so important in the organisation of the empire. Originally expressing the devotion of the city to the particular deity whose worship was most zealously cultivated, the term 'Neocoros,' or 'Neocoros of the Emperors,' came to be connected with the politico-religious imperial cultus almost entirely, and when the title appears on coins and inscriptions under the empire it signifies 'Warden of a temple dedicated to the imperial worship.' The temple had to be dedicated by the Provincial Synod, whose president was (in Asia) the Asiarch. It had also to be dedicated to the emperor alone; it was not sufficient if a particular city dedicated a temple, apart from the Provincial Synod, nor if the emperor was merely received as partner into the temple of an older deity. Coincident with the dedication of the temple and the appointment of the necessary priests and other officials, was the establishment of games in honour of the emperor. The title and permission to erect the temple was granted by decree of the senate in Rome. When by similar decree permission was granted for the erection of a temple and the establishment of games in honour of a later emperor, the city received the title δὲς Νεωκόρος; and τριῖς Νεωκόρος when a third foundation was made. Apparently no city received more than the triple Neocorate, which was granted first to Pergamos (according to the boast on its coins, which may not be true). Ephesus alone boasts a fourth Neocorate; but the fourth refers to the worship of Artemis, which was officially recognised by Hadrian.¹ It is with reference to this worship that the title is used of Ephesus in the 'town clerk's' speech—for, of course, the old signification of the word, in which sense it could be used by any city that wished to express its devotion to a particular deity, still continued even after it gained the special meaning above explained (cp Wood, *App. Inscr.* vi. 6, p. 50). It is, in fact, doubtful whether so early as about 56 A.D. Ephesus could claim the title in its imperial sense.

Of the Asiatic cities mentioned in the NT, the title was possessed by Pergamus, Ephesus, Laodiceia, Hierapolis, Philadelphia, Smyrna.

See Büchner, *De Neocoria*; Monceaux, *De communi Asia Provincia*, 1886; Ramsay, *Cities and Bish. of Phrygia*, 158.

W. J. W.

NEPHEG (נֶפֶג). 1. A Kohathite Levite, Ex. 621 (ναφεκ [BAL], ναφεγ [F]).

2. A son of David, 2 S. 5 15 1 Ch. 37 146 (ναφεκ, ναφαθ [bis] [B]; ναφεκ, ναφεγ, ναφαγ [A]; ναφατ [R, 1 Ch. 146]; ναφεθ, νεγ, ναφεκ [L]). See DAVID, § 11 n., NOGAH.

NEPHILIM (נפיליִים), Γίγαντες [BADEFL]; cp נפילִים = KESIL or ORION [g.v.] in Tg.).

(a) Gen. 6.4: 'The Nephilim arose in the land (or, on the earth) in those days (namely) when the

1. **Biblical references.** divine ones had intercourse with human maidens; those are the heroes, the famous ones.' (The words אַחֲרֵיכֶן and אֲשֶׁר כְּעוֹלָם are here untranslated; see c and § 3.) The passage to which Gen. 6.4 belongs, comes in its present form from J₁,¹ whose account of the early men apparently did not refer to a deluge (see DELUGE, § 14). J availed himself of an old mythological story, which, however, did not in all respects please him, and from which he therefore only took very small portions, such as were in themselves unobjectionable and appeared consistent with the other stories which he had to weave together into a history of the early men.

The text must first of all be critically emended: even KOSTERS (*Th. T* 10.42) infers from בְּשֵׁנָם, 'for their sin' (?), an early tradition of the *sin* of the b'ne Elohim (on בְּשֵׁנָם, see n. 2). Knowing what we do of the early Hebrew and (still more) of the Babylonian myths, we can attempt to reproduce the outlines of the old story, assuming the most reasonable corrections of an imperfect text.

'And so it fell out, that when men began to multiply on the earth, and daughters were born to them, the divine ones (*b'ne hu'-elohim*) saw that the human maidens were fair, and took as wives any that they preferred. [And they taught mankind how to clothe themselves and how to forge brass and iron. And their sons in after-time became heroes, and men prospered under their rule. Now the cause wherefore the divine ones had come down to earth was this. There had been dissension among the divine ones, some being friendly to men, some unfriendly. And those that were friendly came down to visit men upon earth. But the lord of the divine ones doubted in his heart whereunto the prosperity of men would grow.] And Yahwe said, The spirit of the glorious gods shall not tarry longer in habitations of flesh.² [I will sweep them from the earth, lest they become too strong. But the divine ones spoke soft words and counselled their lord to wait.]

According to this view of the story, the parents of those primeval heroes, including 'Nimrod,' whom J₁ identifies with the 'Nephilim,' are the founders of civilisation (see CAINITES), and their sons carry on the arduous work. The supposed dissension among the divine ones is in accordance with the Deluge story and other Babylonian myths. The hesitation of the supreme God Yahwè (who was portrayed as no better than Bel) is in harmony with the survivals of primitive theology in Gen. 3.22 11.6 (also J₁). A later editor is the author of 6.3b, where 'his days' presupposes that אָדָם, 'man,' precedes—i. e., that v. 3a has already become corrupted. Verse 4 belongs to J₁, except the words 'and after that,' to which we shall return (§ 3, ii.).

Then, most probably, in this writer's narrative followed the story in Gen. 11.1 ff. which originally began thus, 'And the whole earth was a single family in the wilderness of Jerahmeel,' and ends with 'and they left off building the city' (see PARADISE, § 7), after which may have come the account of the true Noah (Gen. 9.20-27), and of Cush and (especially) Nimrod (Gen. 10.8-12) who was regarded as one of the 'famous men,' the heroes of Jerahmeel. See NIMROD, NOAH.

(b) Nu. 13.33 (E). The account of the episode of the Spies also mentions the 'Nephilim.' 'And there we

¹ According to Olshausen the whole of v. 4 consists of glosses (*Monatssber. der Berl. Akad.*, June 1878). Budde, Wellhausen, Kautzsch-Socin, Holzinger, Ball are content with assuming that וְנִם אַחֲרָי is a gloss. This is only a step in the right direction (see § 3), nor may we follow Budde (*Bibl. Urgesch.* 30 ff.) in reconstructing the old tradition so as to include a part of v. 4. The early pre-Yahwistic tradition may be gathered from *sv.* 1-3a. J₁ adopted the tradition, and connected with it the origin of the heroes called Nephilim (?).

² The present text contains two untranslatable words (ירון and בשנם). There has been some disarrangement, and, consequently, some confusion of letters. Read יִרְאוּ רַחַם אֱלֹהִים and לֹא יִתְיַדוּ אֶרֶץ אֲחֵרָה. For יִרְאוּ, cp Nu. 9.19.22; for אֲחֵרָה, 1 S. 4.8; for יִתְיַדוּ, Job 4.18.10.4. For other emendations of ירון and בשנם see Di.'s notes. None of them are satisfactory; the corruption is more extensive than has been suspected. Yet the *material* handed down is not irremediably corrupt. The student should notice that בְּשֵׁנָם, not בְּשֵׁנָם, is the best Massoretic reading (Geiger, *Jüd. Zt.* 3.155; Ginsburg). Even that, however, will not produce a good sense.

saw the Nephilim, the sons of Anak, who come of the Nephilim.' Here 'the Nephilim' is original; 'the sons of Anak,' etc., is a (correct) gloss. According to this passage the 'Nephilim' were still to be found when the Israelites entered Canaan (or the Negeb).

(c) Ezek. 32.27: 'And they lie not with the heroes that are fallen of the uncircumcised, who went down to Shēōl with their warlike equipment.' Cornill plausibly reads מְעוֹלִים מְעוֹלִים (with Ⓢ), and also נְפִלִים וְנְפִלִים at once reminds one of Gen. 6.4, where the same word occurs; but it is nevertheless wrong in both passages: something much more definite is required (see § 3). נְפִלִים (נְפִלִים?) must be right. Ezekiel, if this view be accepted, does not regard the Nephilim as lying under the curse of God. He also tells us who they were (see § 3, end).

(d) Later writers, however, thought very differently. In Ecclus. 16.7, Wisd. 14.6, Judith 16.7, Bar. 3.26 ff., 3 Macc. 2.4, we find allusions to the 'giants' and their fate. The author of Enoch 9 f. has much more to say. He supplements Gen. 6.1-4 by the statement that the giants at length turned against mankind to devour them. Upon this the Lord himself interposed. The chief fallen angel and his companions he punished in the way described elsewhere (see AZAZEL); their sons, the giants, he caused to perish in interminable warfare.

This account is closely followed in the Book of Jubilees (chap. 5). Both Jubilees, however, and the fragments of the Greek Enoch differ from the Ethiopic Enoch in one respect—they mention three classes of giants—viz., the Great Giants, the Nephilim, and the Eliud (or, in *Jub.* 7, Giants, Naphil, and Eljō).¹

We must at once dismiss all theories of the existence of an early myth of a 'sin' of the b'ne Elohim. Neither of those supernatural beings nor their offspring were originally regarded as having

2. **Origin of myth.** 'sinned.' There is not even any trace in Gen. 6.1 f. of 'war in heaven'; any such myth which there may once have been has perished. We cannot, therefore, follow either Lenormant,² who compares the Greek myths of the Gigantomachia and the Titanomachia, or Sayce,³ who suspects a connection between the 'Nephilim' and the terrible beings described in the so-called 'Cuthæan' creation-story,⁴ which, however, is no creation-story at all. These terrible beings are the brood of Tiamat the chaos-monster, and are represented (the narrator has lost hold on the early myth, in which the bird-like, raven-faced beings are, no doubt, storm demons)⁵ as oppressing a certain (Babylonian?) king till they are cursed and destroyed. They are, in short, the destroyers, not (like the heroes of the Hebrew legend) the founders, of civilisation. The true parallels to Gen. 6.1 f. lie close at hand; the sexual intercourse of gods and men is a constant feature of ancient mythologies (cp Plat. *Cratylus*, 33), including the Babylonian (see CAINITES, § 5 f.). The later Jews (as the NT shows us) naturally took offence⁶ at Gen. 6.2. The first Yahwist (J₁), however, hands on this part of the old tradition in perfect simplicity.

It still remains (i.) to explain the name 'Nēphīlīm,' and (ii.) to account for the troublesome phrases אֲשֶׁר כְּעוֹלָם and וְנִם אַחֲרֵיכֶן in Gen. 6.4; cp also Ezek. 32.27.

i. It is not a matter of merely linguistic interest to explain נפילִים; the race so designated, though mentioned

3. **Origin of 'Nephilim.'** under this name only twice or thrice in the OT, evidently filled a large place in Israelitish tradition. It is a mistake to regard the name as a mere appellative; from Nu.

¹ See Charles, *Book of Enoch*, 62 ff.; *JQR* 6 (1894) 195 f. 202 (Jubilees), also *Jubilees* (about to appear).

³ *Crit. and Mon.* 91.

⁴ See CREATION, § 16; Zimmern, *ZA* 12.317 ff.

⁵ Cp R. Brown, *Primitive Constellations*, 1.108.

⁶ [See *Jude* 6 f., 2 Pet. 2.4, and especially Enoch 15.4, 'Whilst you were still spiritual, holy, in the enjoyment of eternal life, you have defiled yourselves with women . . . and produced flesh and blood.']

princess Domitilla. A Nereus occurs in the *Acta Philippi* of which the scene is laid in Asia Minor. His ashes were believed to have been deposited in the Church of SS. Nereus and Achillas at Rome. For other legends cp the Bollandist, *Acta Sanctorum*, May 12.

NERGAL (נרגל); **ΤΗΝΕΡΓΕΛ** [B], Swete, **ΤΗΝ ΕΡΓΕΛ**, A om., **ΤΟΝ ΝΗΡΙΓΕΛ** [L]), the patron deity of CUTHA (*q.v.*), still worshipped by the Cuthæans whom 'the King of Assyria' transplanted to the cities of Samaria (2 K. 1730†). Cp NERGAL-SHAREZER. The planet sacred to Nergal was Mars, which, like its god, was called *Karradu*, 'warrior.' He was the god of war; but earlier he was the god of the heat of summer or midday. Fundamentally he was identical with Gibil the fire-god, and a title by which (apparently) he was known in Palestine was Sarrapu 'burner' (perhaps connected with שרפים; see SERAPHIM). He was also the god of pestilence, and as such, otherwise called Dibbarra (cp דברר), the god of Deathland. Jensen (*Kosmol.* 476) thinks that Ner-unu-gal (of which נרגל is a shortened form) was interpreted by the Babylonians 'the mighty one of the great dwelling [of the dead]'. His symbol, like that of Dibbarra,¹ was the lion. The month sacred to him was Kisilimu (Kislev)—*i.e.*, the middle of November to the middle of December—possibly as containing the days when the sun appears to die (*Kosmol.* 486). G. Hoffmann ingeniously traces the divine name Nergal in the corrupt personal ABED-NEGO, which should, according to him, be read Abed-nergo (=nergal). Cp Uzza, rather Ezra (*ZA* 11237 *f.*).

NERGAL-SHAREZER, or, rather, Nergal-šarezer

(נרגל שרצער). So Bā., Ginsb.; **ΝΗΡΓΕΛ ΣΑΡΣΑΡ** 1. Hommel's [NAQ]; Jer. 3934, **ΜΑΡΓΑΝΑΣΑΡ** [B], theory. **ΜΑΡΓΑΝΝΑΣΑΡ** [N*], **ΝΗΡΓΕΣ ΣΑΡ-ΜΑΡ** [Q]; Jer. 3936, **ΝΑΓΑΡΓΑΝΑΣΑΡ** [B], **ΝΑΣΑΡ** [NAQ], **ΝΗΡΕΑ ΣΑΡΣΑΡ** [Qmg.]; *Neregel, Serezer*. The name looks like a Hebraised form of Nergal-šar-ušur ('Nergal, protect the king'), which is the name of Evil-merodach's successor, better known as Neriglissar.² According to Hommel (in Hastings' *DB* 1229a) and Kent (*Hist. of the Jewish People*, 367), this prince may be identified with the officer mentioned in Jer. 39313. The theory is tempting, because it vivifies the somewhat dry account of the captains of the king of Babylon in the Hebrew narrative (but see § 3).

He was raised, to the throne by the priestly party, and Nabu-na'id³ (Stele, col. v.) recognised him as a true

2. Neriglissar. Neriglissar (559-555) reigned four years all but four months. He was, like Nebuchadrezzar and Nabu-na'id, a great builder of temples, and evidently bent on consolidating his kingdom rather than on foreign conquests or alliances. See his cylinder, *KB* iii. 271 *f.* But there was also a Nergal-šar-ušur, son of Bel-šum-iškin, who plays an important part in the private contracts of Amēl-Marduk's reign. Cp also SHAREZER.

The objection to the ordinary theory is, not that in *v.* 13 Nergal-šarezer is called RAB-MAG (*q.v.*), a title of obscure signification which is unlikely

3. Underlying narrative. to have been assigned by a Hebrew writer to so important a person, but that the text of *vv.* 13-15 has almost certainly undergone both corruption and editorial manipulation. That some of the names in *vv.* 3-13 are corrupt, is indeed generally admitted; but it is almost certain that a bolder theory is necessary. It has been maintained elsewhere (*e.g.*, **OBADIAH** [BOOK], § 7) that the Edomites and Arabians took part in the capture of Jerusalem and the carrying away of a part of its inhabitants as captives.

¹ Jastrow, *Rel. of Bab. and Ass.* 529.
² See Herodotus, *Jos. & Ap.* 120; *Eus. Chron.* 40 22 *ff.* 50 22 *ff.*; and Abydenus, *Eus. Chron.* 41 28-32 42 28-30.
³ See Messerschmidt, *Die Inschr. der Stele Nabunaid's*, p. 21.

This gives us the key to the problems of several sections of Jeremiah (cp PROPHET), and in particular to 39:35-13. The results of our criticism of these passages can now lay claim to a high degree of solidity. We should probably read nearly as follows:—

'Nebuchadrezzar king of Babylon and the king of Jerahmeel came to Jerusalem and besieged it' (*v.* 16). '(It came to pass that) all the princes of the king of Babylon and all the princes of the king of Jerahmeel came in, and sat in the middle gate,—the prince of Jerahmeel, the prince of Mišsur, the prince of Nodab, the prince of Cushim, and the prince of the Arabians' (*v.* 3). 'And the Jerahmeelites and the Chaldeans (Cushites?) pursued them' (*v.* 54). 'Then sent Nebuzardan, captain of the guard, and the prince of Nodab, and the prince of Cushan, and the prince of the Arabians, and the prince of Jerahmeel, and the prince of Mišsur' (*v.* 13).

With this we may compare the equally necessary reconstruction of 34:1.

The word which came to Jeremiah from Yahwè, when Nebuchadrezzar, king of Babylon, and the king of Jerahmeel, and Mišsur, and the Ishmaelites, and the Edomites fought against Jerusalem.

For parallels to some of these corruptions, see JERAHMEEL, MIZRAIM. Nergal-šarezer appears to be a very early emendation of a corrupt reading כרנל שרצער (*cp BN**), which proceeded from כרנל שר צער [שר]. The editor, in fact, did his best to give a Babylonian colouring to the passages, but had imperfect success.

T. K. C., §§ 1, 3; C. H. W. J., § 2.

NERI (νηρει [Ti. WH]), a name in the genealogy of Jesus (Lk. 327). See GENEALOGIES ii., § 3.

NERIAH (נריה), as if 'Yahwè is light,' §§ 35, 44; cp Abner; but both names may be altered from the ethnic Nadab, Nédābi, 'Baruch' too being a Jerahmeelite name; **ΝΗΡ[Ε]ΙΟΥ**, [BNAQ], the father of Baruch (Jer. 3212, etc.). In Bar. 1:1 Nerias (Νηριου [BAQ]).

NET. Nets of various kinds were used in ancient Palestine in fishing, fowling, and hunting.

1. נש, *néš*, any kind of net (LXX gen. δίκτυον); also used of the brazen network in the altar (Ex. 274 *f.* 384; *ἄργον δίκτυωτόν*; EV 'net-work').

2. חרם, *hērem* (something perforated), according to some scholars a hand-net, but note *ἄ*'s renderings (Ezek. 265 14 Eccl. 726, *σαγήνη*; Hab. 115, *ἀμφίβληστρον*); see FISH, § 3.

3. מִכְנֵיט, *mikenāy*, Is. 5120 (*ἀμφ.* [Symm. in Qmg.]) and מִכְנֵיט, *makhnōr* (something twisted?) Ps. 14110 (*ἀμφ.*), as well as the feminine forms מִכְנֵיטָה, Hab. 115 *f.* (EV 'drag'; AV *mg.* 'flue-net'; *σαγ.*) and מִכְנֵיטָה, Is. 198 (*σαγ.* and *אַמֶּפ. ἀγκιστρον*; see Swete *ad loc.*) perhaps a drag-net; in Is. 5120, where apparently it means a net large enough to catch an antelope; but מִכְנֵיטָה כִּבְרִי is impossible (see 'Isaiah', Heb. *SBOT* 148, 201).

4. מַסֹּד, *māsōd* (from צוד, 'to hunt') is rendered 'net' by EV in Job 196 (*ὄχυρωμα*) and Prov. 1212 (AV *mg.* 'fortress'; RV *mg.* 'prey'; the text is unsatisfactory; see Toy). The pl. קְצוּרִים (*θηρεύματα*) is rendered SNARES (*q.v.*) in Eccl. 726 (EV). From the same root are derived: מַצְרֵדָה, specially used of fish in Eccl. 912 (*ἀμφ.*), and מַצְרֵדָה, rendered 'net' in Ps. 6611 (*παγίς*); but the text of the whole verse is unsatisfactory,² and in Ezek. 1213 1720 'snare' (*περιοχτή*).

5. סִבְכִים, *sēbākīm*, is applied in an architectural sense to the ornamentation about the top of a pillar, 1 K. 717† (כִּיעֵתָה 'ש' שִׁבְכָה, 'nets of checker work', cp *Jos. Ant.* viii. 34, *δίκτυον ἐλάτρη χαλκῆν περιπελεγμένον*). The text here has to be corrected; see Klo. *ad loc.* 'ש' is properly some kind of lattice-work; cp שִׁבְכָה, 'net-work' (1 K. 71820 41) and 'lattice' (2 K. 12); used also of the meshes of a net, in Job 188 (AV 'snare', RV 'toils').³

In the NT fishing-nets are denoted by the following:—(1) *δίκτυον*, Mt. 420 Lk. 55 Jn. 216; (2) *ἀμφίβληστρον*, Mt. 418 Mk. 116 (not Ti. WH); and (3) *σαγήνη*, Mt. 1347, for all of which see FISH, § 3. See also FOWLING, § 8.

NETAIM (נְטָאִים), 1 Ch. 423 RV. See GEDERAH, 2.

¹ כִּבְרִי כִּבְרִי, 'to twist.' Del., however (and so Ges.-Bu.), compares *Ass. kamāru*, 'to overpower' (*Heb. Lang.* 40 *ff.*).

² מַצְרֵדָה should certainly be מַצְרֵדָה ('abyss'); *v.* 10 can then be quite regularly emended (Ch.).

³ Cp Ar. *šabakātūn*, 'net,' and MH סִבְכָה, 'hair-net.'

NETHANEEL

NETHANEEL. RV Nathanel (נְתַנְיֵאל; cp נְתַנְיֵאל, and see NAMES, § 27; ΝΑΘΑΝΑΗΛ [BNAL]; only in P and in post-exilic literature, possibly, like Ammiel, etc., based on an early tribal name; cp נְתַנְיֵאל, Ethan, יֶאֱתַן, Jathniel, and יֶתַן, Jithnan; י may be an affirmative; so, too, NETHANIAH [*q.v.*] may = Ethāni, as Pelatiah = Pelēthi or Pelāthi [Che.]).

1. b. Zuar, a prince of Issachar (Nu. 18 25 7 18 10 15 [P]).
2. Brother of David and fourth son of Jesse (1 Ch. 2 14). See DAVID, § 1, col. 1020, n. 3.
3. A priest of the time of David (1 Ch. 15 24).
4. Father of Shemaiah, a Levite scribe (1 Ch. 24 6).
5. b. Obed-edom (1 Ch. 26 4, *ναος ιερα* [B]).
6. One of Jehoshaphat's commissioners for teaching the Law (2 Ch. 17 7). He is mentioned with BEN-HAIL and MICAH, both names indicative of Jerahmeelite affinities (Che.).
7. A 'chief of the Levites', temp. Josiah (2 Ch. 35 9); in 1 Esd. 19, a 'captain over thousands', NATHANAEEL.
8. A priest of the b'ne Pashhur in list of those with foreign wives (see EZRA I, § 5 end), Ezra 10 22 = 1 Esd. 9 22, NATHANAEEL (*ναθανηολος* [B]).
9. Priest temp. Joiakim (see EZRA II, § 6 δ, § 11), Neh. 12 21 (McA mg. inf.; om. BN^aA).
10. A Levite musician in procession at dedication of wall [see EZRA II, § 13 ε] Neh. 12 36 (om. BN^aA, *μαθανηολ* [McA mg. inf.]).

NETHANIAH (נְתַנְיָהוּ) and נְתַנְיָהוּ, ΝΑΘΑΝΙΑΣ [BAL], see NETHANEEL.

1. The father of ISHMAEL (2), 2 K. 25 23 (*μαθανιας* [A]) 25; Jer. 40 8-11 18).
2. An Asaphite musician, 1 Ch. 25 2 (*ναθανιας* [B]; *ο. 12 ναθαν* [B]).
3. A Levite priest sent by Jehoshaphat to teach in the cities of Judah (cp NETHANEEL, 7), 2 Ch. 17 8 (*μαθανιας* [B]).
4. The father of JEHUDI (*q.v.*), Jer. 36 14.

NETHINIM (נְתִינִים); ΟΙ ΝΑΘΙΝΑΙΟΙ [AN^cL], in 1 Esd. 01 ιεροδουλοιοι [BAL]; cp נְתִינִים, Nu. 8 19 RVmg. **Nethunim**. The members of the clerical order who returned from the exile, according to the lists in Ezra-Nehemiah, belonged to five categories—priests, Levites, singers, porters, and Nethinim (temple-servants). In one respect the *usus loquendi* varies somewhat: in Ezra 2 55 = Neh. 7 57 the 'children of Solomon's servants' are distinguished from the Nethinim and are separately enumerated according to their 'families'; but elsewhere they are included under the designation Nethinim (*e.g.*, in the subscription [Ezra 2 70, *θανειμ* (B), *ναθινειμ* (A)] to the list already cited). A similar variation is seen between Neh. 11 3 (⊗^{BN} om.) and 11 21 (⊗^{BN} om.), the fact being that the 'children of Solomon's servants' belong to the class of inferior temple-servants called Nethinim in any case, but are only sometimes singled out as a separate group within it.

These Nethinim constituted a regularly organised class of temple-servants—organised, that is to say, in the manner in which all such classes

1. Organisation. were organised in those days, in the form of 'families' under family 'heads.' Their family registers are kept with the same care as those of the other servants of the temple (Ezra 8 20, *ναθ[ε]νιμ* [B.A.; *ναθευ* B^b vid. once]). The list given in Ezra 2 43 ff. (*v. 43 ναθειμ* [B]; *v. 58 ναθειν* [B], *ναθινειμ* [A]; *v. 70 θανειμ* [B], *ναθινειμ* [A]) enumerates 35 such families, or subdivisions, of the Nethinim and 10 families of the 'servants of Solomon.' The second recension of this list in Neh. 7 46 ff. (*ναθ[ε]νιμ* [B.A.]; *v. 60 ναθεινειμ* [B*], *ναθει* (vel potius *ναθεινειμ* [B^b], *ναθινειμ* [N], *ναθανειμ* [A]) makes out only 32 families. Unfortunately we are not informed whether the 220 Nethinim who returned with Ezra are included in these figures or whether there were other subdivisions besides those named in the list. In Neh. 11 21 it is stated that the entire body was under two chiefs named Ziha and Gishpa. The first of these two names is given in the Ezra list (2 43) as that of the head of the first of the subdivisions enumerated; whether GISHPA (*q.v.*) is to be identified with Hasupha the head of the second subdivision is very doubtful.

That the Nethinim were really regarded as forming part of the privileged *personnel* attached to the temple-

NETHINIM

worship is shown not only by the manner in which they are constantly named in conjunction with the other classes, but also by the fact that they shared with the priests and Levites immunity from taxation (Ezra 7 24). On the other hand, neither the heads of the Nethinim nor those of the singers and doorkeepers figure as signatories to the covenant, though they joined in the oath that was taken (Neh. 10 30).

In Jerusalem, Ophel—*i.e.*, the southern and eastern slope of the temple hill—is assigned to the Nethinim as their habitation (Neh. 3 26, *καθεινιμ* [B], *ναθ[ε]νιμ* [N.A.]; 11 21). More precisely, they inhabit that part of Ophel which extends to the Watergate in the E. and to the tower projecting from the royal palace (Neh. 3 26; see JERUSALEM, § 24). A 'house of the Nethinim' is mentioned in Neh. 3 31 (*βηθαναθινιμ* [B], *βηθαναθω* [N^a vid.], *του βηθαναθι* [N^ca], *βηθαναθινιμ* [A]), farther to the N., near the city wall to the E. of the temple (a little to the S. of the Sheep Gate); by this only some sort of official or service house can be meant. A different representation is made in Ezra 2 70 (= Neh. 7 73 = 1 Esd. 5; cp 1 Ch. 9 2, *οι δεδομενοι* [BA]) where only a portion of the Nethinim, as also of the priests and Levites, dwells in Jerusalem, the others being distributed throughout the 'cities'—doubtless the Levitical cities—in the country. This would assume that, like the priests and Levites, they were not on duty all the year round, but rendered their services at the temple in regular rotation. As to that, however, we have no further details.

The Nethinim who returned from the Exile regarded themselves (and were generally regarded) as descendants

2. Origin. of the temple slaves who had in ancient times been given 'by David and his princes' for the service of the Levites (Ezra 8 20); a small proportion of them, as already indicated, were thought to be descended from slaves given by Solomon (Ezra 2 55). [For an attempt to solve the problem of the origin of the Nethinim and the 'children of Solomon's servants,' from a new point of view, see SOLOMON'S SERVANTS, CHILDREN OF, and cp *Amer. J. of Theol.*, July 1901.] As to this, nothing is reported in the historical books; but it is to be taken for granted that from very early times there must have been an inferior grade of servants at all the greater sanctuaries, and above all at the temple in Jerusalem. These were, of course, not free labourers working for hire—a class of person unknown to Hebrew antiquity—but slaves in the strict sense of the word, the property of the sanctuary. Even the child Samuel was given to the sanctuary by his mother (1 S. 1 28 ff.). It is manifest, however, that this form of *hierodulia* was not common among the Hebrews. The O.T. offers us no other concrete example of it, and the later accounts make even Samuel to be something quite different,—a Nazirite, to wit. On the other hand, another form of *hierodulia* was common enough: foreign captives taken in war were given to the temple as slaves—as was customary also with other nations. In JE (Josh. 9 23) we are told even of Joshua that he handed over the Gibeonites to the sanctuary as hewers of wood and drawers of water. Whatever the actual facts may have been in this particular instance, we may be sure that incidents of the kind were frequent, not merely under David and Solomon, from the moment that there was a great royal sanctuary in Jerusalem. In all such instances these temple-slaves were invariably of heathen nationality, not Israelites. The older age found nothing to object to in this; and, later, such a writer as Ezekiel, by his rebuke of the practice, bears witness to the fact that even in his day foreigners rendered service of this kind at the sanctuary without challenge. He brings it against the Israelites as a particularly shocking charge that they did not themselves take in hand the care of the sanctuary but delegated the duty to others, 'foreigners uncircumcised in heart and uncircumcised in body,' whereby Yahwe's sanctuary

was profaned (147 [cp Che.'s reconsideration of the passage in *Amer. J. of Theol.*, July 1901]). The precept of the law (Nu. 31:28-30) according to which a definite proportion of the captives taken in war is to be given to the priest as Yahwé's heave-offering is perhaps also to be connected with this ancient usage, although it is equally possible that the law may have had reference only to the priests' and Levites' private property in slaves.

In post-exilic times the practice which had given offence to Ezekiel was, as was to be expected, abolished; plainly, however, not in such a sense as to banish those foreigners altogether from the temple, but only in the sense that they were admitted into the fellowship of Judaism by receiving the rite of circumcision. At all events, the names of the subdivisions preserved to us in the lists in many cases betray quite unmistakably their non-Israelite origin—such, for example, as the MEUNIM and NEPHISIM (qq. v.; Ezra 2:50). That the Nethinim enumerated in Ezra and Nehemiah were reckoned as members of the community is a necessary inference from the fact that they came up with the others to Jerusalem at all. Perhaps it comes to this, that reception into the community, which also carried with it promotion to the position of free temple-servants (see below, § 3), was the reward for the return. In Neh. 10:29 (*ναθινειμ* [BA], *ναθινειμ* [N]) the Nethinim are expressly reckoned as belonging to the community and held bound to observance of the precepts of Yahwé. Indeed, at a period when circumcision was required by the law even in the case of private slaves (see SLAVERY) such a demand in the case of temple-slaves became a matter of course.

Their social position was, as already indicated, at the same time necessarily raised. They no longer appear

as slaves in the strict meaning of that word, but as free men of the common-wealth of Israel. It is of their own free choice that they accompany the others to Palestine (Ezra 8:17 ff., v. 17 τῶν ἀθανειμ [BA], v. 20 ναθεινειμ [BA]). As free men they pledge themselves to keep the precepts of Yahwé (Neh. 10:29). Such accession on their part to the community was not, indeed, in every case wholly spontaneous. In many instances special persuasion was required to induce them to accompany Ezra (Ezra 8:17 ff.). Nevertheless, their number is very considerable; in the first list, in addition to 74 Levites, 128 singers, and 139 doorkeepers, we have 392 Nethinim and 'servants of Solomon,' and with Ezra there came only 38 Levites but 220 temple servants (Ezra 8:18 ff.).

The distinction of rank between the Levites and the inferior grades of temple servants diminished more and more as time went on. On the one hand, even in P, the Levites figure merely as a special kind of Nethinim, a gift made by the people to God and by God in turn handed on to the priests for their service; and their actual position is not in fact different from that of temple servants (cp 1 Ch. 23:28); all the characteristic functions of worship are assigned to the priesthood (see LEVITES). On the other hand, we find singers and doorkeepers, who in the times of Ezra and Nehemiah were still sharply distinguished from the Levites (cp Ezra 2:40 ff., 74, and often), soon gaining admission to the ranks of the Levites (1 Ch. 15:16 26:1 ff., and elsewhere). It is, therefore, not impossible that in the end the Nethinim too became Levites. It is at least very noticeable that the Chronicler (who also edited Ezra and Nehemiah), in those parts of his work where he is narrating in his own person and not simply reproducing his sources, mentions the Nethinim only once (1 Ch. 9:2)—not even when relating the assignment of the Levites, singers, and porters to their several duties in the sanctuary by David, although this is precisely the place at which some allusion to their having been given by David to the temple might have been expected. In the Greek Ezra, finally, even the Levites are spoken of

as *ιερόδουλοι* (1 Esd. 1:2 f.) as well as the Nethinim (8:22 48); this last word, moreover, is also rendered *Ναθωαίοι* (Σ^L in 5:29 8:5 49). It would seem as if the author made no longer any such sharp distinctions as had formerly been drawn between the two, but regarded the Nethinim as a mere family (subdivision) of the temple-servants as a whole, that is to say, of the Levites (cp Wellh. *Prol.* 145).

The Mishna (*Yibhânôth*, 24; *Kidd.* 41) oddly enough still regards the Nethinim as pure heathen and prohibits intermarriage between them and Israelites. This wholly unhistorical theory rests probably on the view that the Nethinim were of Gibeonite origin (see above, § 2). How different was the view of the post-exilic age is proved by Neh. 10:29 ff., where the Nethinim are represented as uniting with the rest of the Jews on this very point, recording their solemn vow never in time to come to allow their sons and daughters to marry any but Israelites.

I. B.

NETOPHAIH (נְתוֹפַיִם); ΝΕΤΩΦΑ [BN], ΝΕΦΩΤΑ [A] in Ezra 2:22, *aver.* (A in Neh. 7:26; om. B), *νετοφαρι* [L], whence **Netophathite** (נְתוֹפָתִי); usually *νετοφαθ(ε)ι* or *νετοφαρ(ε)ι*, but in 2 S. 23:28 *εντοφατειης* [B], *νεποφατειης* [A], ο τοῦ φελτια [L], in 2 S. 23:29 *νετοφαθε* [BA om.], in 2 K. 25:23 *νεφθαβειτης* [B], *νεθοφαβειτης* [A], *νετοφαθτεις* [L], in 1 Ch. 2:54 *μετοφαθει* [B], 1 Ch. 9:16 *νοτεφατει* [B], *νετοφαρι* [L], in 1 Ch. 11:30 *νεθοφατει* [B once], *νοτοφαθει* [N once], in 1 Ch. 27:13 *νετοφαρ* [BA], in Jer. 40:8 *νεοφαρι* [M], in Neh. 12:28 BN*A om.). In 1 Esd. 5:18 *νετεβας* [B], *νετοφαει* [A].

A place or district mentioned with Bethlehem, Anathoth, Beth-gilgal, and Gibeah (combining 2 S. 23:29 Ezra 2:22 Neh. 7:26 1 Esd. 5:18 [RV **Netophas**], Neh. 12:28), the 'villages' of which were inhabited by Levites after the Exile (1 Ch. 9:16 Neh. 12:28). Men of Netophah rallied round Gedaliah (Jer. 40:8 2 K. 25:23). Netophah was also the birthplace of David's warriors MAHARAI and HELEB (2 S. 23:28 f. 1 Ch. 11:30 27:13 15). The site is uncertain. It is plausible to identify Netophah with Nephtoah, which was a place on the border of Judah and Benjamin (perhaps Tappuah; see NEPH-TOAH). This appears to suit the mention of Anathoth and Gibeah as if not very far from Netophah, but would require us to take Bethlehem in Ezra 2:21, etc., as a Benjamite town of that name, which is otherwise unknown, unless, perhaps, it represents the Beth-jerahmeel which may have been the name of the centre of the clan to which king Saul belonged (see SAUL, § 1); indeed, the 'Beth-gilgal' of Neh. 12:29 (mentioned there after 'the Netophathite') may also have come out of 'Beth-jerahmeel.'¹ Conder, however, identifies Netophah with Umm Toba, NE. of Bethlehem (*PEFMem.* 352). Bêt Nettif, a village in the Wady es-Sant, nearly opposite esh-Shuweikah (see SOCOH), has also been thought to preserve the name Netophah. This may very possibly be the Beth Netophah of the Mishna (*Sheb.* 95; cp Neub. *Geogr.* 128), but is surely too far to the W. to be the Netophah of the OT.

Schürer (*GVIII*) 2184 reminds us of the toparchy of Bethleptenpha (τὴν Βεθλεπτηνφῶν τοπαρχίαν, Niese: *Jos. BJ* iv. 81, § 445) or Betolethephenen or Betolethepenen (Plin. v. 1470), a name which (with Schlatter, *Zur Topogr. u. Gesch. Pal.* 1893, p. 354; and Furrer) he identifies with the Netophah or Beth-netophah of the Mishna. He also identifies both with Bêt Nettif, but does not meet the objection just now mentioned. A confusion between Netophah and Nephtoah was natural.

T. K. C.

NETTLES, in EV the rendering of two different words.

ז. חריל, *hārūl* (Job 30:7 Prov. 24:31 Zeph. 2:9⁺ 2) is rendered in RV^{ms.} 'wild vetches.' Σ has *σπύγγα ἄγρια*, 'wild brushwood,' in Job; but in Prov. and Zeph. they seem to have misread it as connected with חרל. Vg. has 'thorns' (*spina* and *sentes*), as also Pesh. in Job. *Hārūl* would appear to be the same as Aram. *ܚܪܘܠ*, and Ar. *hullar* is probably akin. As *spina* is used to render *λάβυρος* in *Geop.* 186, and the Arab. word denotes a vetch, it is now generally held

¹ Both 'Lebem' and 'Gilgal' are possible distortions of 'Jerahmeel.'

² [Græ., Du. read חריל for חרין in Ps. 58:9 (10).]

that *hārūl* means some luxuriantly growing plant of the vetch kind. For a list of the Palestinian species see *FFP* 290 f.; see also Nöldeke, *Mand. Gram.* 55, and Schwally in *ZATW* 10 189.

To the view that *hārūl* is a vetch it is objected that (1) in Job 30 7 a shrub or small tree must be meant, and (2) in Zeph. 2 9 the plant is associated with 'salt-pits,' which would imply some sal-salaceous shrub—such as *Anaësis articulata*, Forsk.—whereas vetches like a good soil to grow on. Possibly, therefore, the Heb. word was applied somewhat differently from its Aramaic equivalent.

2. קִמְמוֹס, **ḳimmōs* (Is. 34 13 Hos. 96), and pl. קִמְמוֹת (Prov. 24 31, where EV has 'thorns'), may be a general word for weeds of the thistle or nettle kind. Barth (*Nominalb.*, § 45) compares Arab. *ḳumīs*, which denotes useless material or rubbish. If, however, the meaning is to be specialised, the most probable view is that of Tristram (*NHB* 474) that *ḳimmōs* is a species of *Urtica*, the most common in Palestine being *U. pilulifera*, which is peculiarly addicted to deserted and ruinous buildings. It appears from Is. 34 13 that the plant meant by *ḳimmōs* is at least distinct from thorns.

NETWORKS.

1. סְבִיטִים, *Sēbītim*, Is. 3 18 EVmg.; see CAUL.
2. כְּבִיר, *kebir*, 1 S. 19 13 16, RVmg.; see BED, § 3 f.
3. חֹרַי, *hōray*, Is. 19 9. AV; see LINEN, 8.
4. סְבָכָה, *śebākāh*, in 1 K. 7 18 Jer. 52 22 f. EV, and 2 Ch. 4 12 RV (AV 'wreaths'), used of the ornamentation on the capitals of the pillars JACHIN AND BOAZ [q.v.]. On 1 K. 7 17, and the further usages of this word see NET (5). The particular kind of decoration intended is quite obscure; for a purely conjectural restoration see de Vogüé's, reproduced by Perrot and Chipiez, *Art in Judæa*, 1251 f. (fig. 164).
5. סִבְבָּר קַעֲיָה רִשָּׁה, *mikkbār ma'āseh rēšeth*, 'a grate (RV grating) of network,' Ex. 27 4 38 4; *mikkbār* alone Ex. 35 16 35 30 39 39 (Θ *ερχάρα*, but *μαπάρεμα* 38 4 f., and om. in 35 16 35 30 39 39). What is meant by this appendage to the altar is uncertain; see DI., *ad loc.*, and cp ALTAR, § 9. *Mikkbār* may be connected with *makbār* 2 K. 8 15 (cp BED, § 3), or, more probably, with *mikmār* (מִכְמָר), for which see NET (3). The incense-altar (see ALTAR, § 11), also, according to Jos. (*Ant.* iii. 68), had a 'brazen grating' (ἄρχαία χρυσεία)—a detail unmentioned in Ex. 30 1.

NEW MOON (חֹדֶשׁ; see below, § 1, small type).

The appearance of the new moon signified (see MONTH)

1. **Lunar feasts.** for the Hebrews from a very early period the beginning of a new division of time—a new month. The festal observance of the day on which this happened is also a very ancient custom, certainly going back to a date earlier than the settlement in Canaan, this festival along with the pass-over being indeed the only one which in its origin and meaning has absolutely nothing to do with agriculture (see FEASTS, § 2). Lunar feasts, it would seem, are common to the whole of antiquity, and among them that of the new moon is the most frequently attested (cp the evidence in Dillmann, *Ex.-Lev.* (3) 633). The high antiquity of the new-moon festival in particular is shown by its diffusion throughout the Semitic peoples.

Lagarde (*Oriental.* 213 f.) connected the Heb. חֹדֶשׁ 'to begin the festal-celebration' with the Ar. *hīlāl* 'new moon,' a derivation which would certainly require us to assume the new moon to have been the festival *par excellence* (cp on the other side, Wellh. *Skizzen*, 8 107 ff.). Heb. does not now designate the new moon by a name cognate with *hīlāl*; it calls it חֹדֶשׁ *hōdēš*, the 'New' [Moon], twice (in the plural) *rāšē hōdōšēm*, 'your month-heads' (Nu. 10 10 28 11; *νομήνια*, *veon.*; *calende*, Vg. sometimes *neomenia*).

Still another circumstance speaks for the high antiquity of the feast: its connection with the clan-sacrifices (1 S. 20 6; see below).

At all events, the New Moon, according to all our sources, figures also in the historical period as a very important festival, still ranking above the Sabbath. At new moon Saul was wont to gather round him his whole court for a common sacrificial meal (1 S. 20 4 f.). At a

1 This—not קִמְמוֹס or קִמְמוֹת—appears to be the proper spelling (Ba., Gi.). On the form of noun see Lag. *Uebers.* 117 f., 121 f.

new moon the clans also were accustomed to hold their yearly family sacrifices; so, for example, the Bethlehemitic clan to which David belonged (1 S. 20 6). The second day of the new moon seems also to have been solemnly observed (1 S. 20 27 34). The story related in 1 S. 20 shows us clearly what importance was attached to the feast; it was permissible to no one to absent himself from court on this occasion without adequate reason. Further, we see that in the life of the people the new moon in one respect stood on the same plane with the Sabbath; on both days it was the practice to suspend work-day labour, and thus time was made available for other things, such as a visit to a prophet, for which servants were not available on other days (cp 2 K. 4 23). In the earlier of the literary prophets we still find the new moon not only placed on a level with the Sabbath as regards rest from labour and business, but also ranked with the three pilgrimage feasts in general as a religious festival; as part of the heavy punishment of Israel it is said that in exile the new-moon celebration also will come to an end along with the other feasts (Hos. 2 13 Is. 1 13).

The great actual importance of the new-moon festival for the religious and secular life of the ancient Israelites being thus so abundantly evident, it

2. **Ignored in earlier laws.** becomes all the more surprising that the new moon is nowhere mentioned either in the Book of the Covenant or in the Deuteronomic law. Dillmann's explanation (*Ex.-Lev.* (3) 635) is that both those bodies of laws are incomplete, and above all that 'in the new-moon festival a widespread pre-Mosaic custom persisted with great tenacity, the regulation of which by positive law was not held to be necessary.' This cannot, however, be regarded as a satisfactory solution of the difficulty, for similar ancient customs, deeply rooted in popular usage, are frequently enough dealt with in the law. In fact, the Book of the Covenant is nothing else than a codification of customs established in actual practice and of prevailing usages, religious, legal, and other. We shall be nearer the truth if we regard as applicable also to the earlier codes what Dillmann says (*loc. cit.*) with reference to the depreciation of the new-moon festival in P—namely, that the increasing importance of the Sabbath and the preponderance it ultimately obtained, forced the new-moon festival into the background. As soon as the Sabbath came to be observed as an independent festival every seventh day without reference to the new moon, its celebration collided with that of the new moon, which fell to be held every 29th or 30th day (see MONTH). Yet even this reason is not quite sufficient by itself, and we are compelled to fall in with the conjecture of Wellhausen (*Prol.* (2) 118) that the ignoring of the new moon in the law is deliberate and intentional, being too conspicuous to be due merely to chance. To understand the motive of this silence it has only to be remembered that it was precisely with the lunar festivals—and more particularly with that of the new moon, which dated from the very remotest antiquity—that, among the Israelites as among the Canaanites and kindred peoples, all sorts of superstitions could most readily be connected. Reference has already been made to the connection between this festival and the clan-worships, which in fact strictly speaking were in competition with Yahwē-worship.

If in this ignoring of the new moon and its celebration the intention of the legislation actually was to depreciate it, or perhaps even to abolish it, the

3. **Importance maintained.** plan did not succeed. The new moon continued to maintain its old importance in the religious and secular life of the Israelites until long after the exile. If we find the later prophets so often dating their utterances precisely by reference to the new moon (Ezek. 26 1 29 17 31 1 32 1 Hag. 1 1), the fact is indirect but conclusive evidence of the popular observance of the day. The prophets assume the continuance of new-moon observance even in the Messianic

time (Ezek. 46 1 ff., Is. 66 23). For how long a time importance continued to be attached to it is shown by such passages as Judith 86 Col. 2 16.

The legislation (1) of Ezekiel and (2) of P at last takes up this festival. (1) According to the sacrificial ritual of the day in Ezekiel (46 1 ff.), it would even seem as if the prophet ranked the new moon above the Sabbath. The offering he enjoins consists of a young bullock, six lambs, and a ram; the accompanying meal-offering is one ephah for the bullock, an ephah for the ram, and for the lambs 'according to his ability,' and moreover a hin of oil for every ephah. This is more than the Sabbath offering by one bullock and the corresponding meal-offering. (2) In like manner P (Nu. 28 11-15) enjoins for the new moon a larger offering than for the Sabbath; namely, two young bullocks, a ram, seven yearling lambs with corresponding meal- and drink-offerings, besides a he-goat for a sin-offering, and of course the regular daily burnt-offering besides. These offerings are the same as those prescribed for the seven days of the Passover feast and of the feast of weeks. When the offering is made the silver trumpets (TRUMPET-BLOWING) are to be blown on new moon as on the other high feast-days (Nu. 10 10).

With this we must compare the notices of the same offering to be found in the Chronicler (1 Ch. 23 31 2 Ch. 23 8 13 31 3; Ezra 3 5 Neh. 10 34). On the other side, it has to be conceded that in one point the new moon comes short of the Sabbath and the great feasts: it is not marked by a great festal gathering (סעודת קדש) and abstinence from labour. But ought we not to regard this as indicating an essential lowering of the new-moon festival? A festival of this kind is differentiated by purely practical considerations. By the method of determining the time of new moon (see below, § 4) it is often impossible to tell at the beginning of the very day whether it is the festival day or not, and so to sanctify it wholly by rest from labour. The appropriate offering, on the other hand, could at all times be held in readiness for the declaration of new moon. By thus taking up the new-moon festival and giving it a place among the other feasts the law may here, as in so many other points, have been accommodating itself to an already established custom that refused to be repressed. We shall probably, however, find a better conjectural explanation of the difference between the attitude of the old law and that of the new to this feast in the consideration that the new moon now possessed for the regulation of the worship a greater importance than formerly: when all the other festivals had come to be definitely attached to fixed days of the month and so to be regulated by new moons, the observance of this becomes of fundamental importance for all the rest of the cultus.

We do not know how the day of new moon was determined in primitive times. As the length of the

lunar month varies from twenty-nine to thirty days (see MONTH), we must suppose that, in the earliest days as well as in those of later Judaism, the punctual celebration of the day depended on direct observation of the moon itself. In later Judaism great care was expended in ascertaining with precision the first visibility of the new moon (cp. *M. Rōsh ha-Shānā*, 1 5 ff. 2). The synedrium assembled in the early morning of the thirtieth day of each month and continued sitting, if necessary, till the time of evening sacrifice. Whoever first saw the crescent moon was bound to let the synedrium know of it at once. As soon as the fact was established by witnesses, the word 'let it be sanctified' was pronounced, and the day was forthwith observed as new-moon day. By fire-signals from the Mount of Olives, and afterwards by couriers, the tidings were sent all over the country. If, however, direct observation of the moon was rendered impossible by cloudy weather, this thirtieth day was forthwith reckoned as the last of the old month, and the new-moon observances were held on the following day.

It was not till some two centuries after the destruction of the temple that the Jews began to reckon the new moon by astronomy. The Karaites, however, continued to follow the old method.

For the literature of the subject see FEASTS, § 15.

I. B.

NEW YEAR (חג השנה)

On the civil and ecclesiastical year and the dates on

which they were held to begin at various periods in the history of Israel, see YEAR, §§ 6 ff. The present article will deal with the New Year only as an ecclesiastical festival. As is shown elsewhere (YEAR, § 6), the year of the ancient Israelites began in autumn; it was not until the exile that there came in the custom of placing its commencement in spring. The ecclesiastical festival is even after that still held in the autumn. The practice of celebrating the beginning of the year with special offerings and the like may have been ancient; it is, however, a striking fact that no mention of any such celebration is found (in the writings that have come down to us) till Ezekiel and Leviticus (25 9).¹ The passage from Leviticus shows that once, at some time or other, probably during the exile, the beginning of the year was ecclesiastically observed on the tenth day of the seventh month, for the tenth is, according to the law just cited, the first day of the year of Jubilee. The blowing of trumpets which is enjoined is characteristic also of the later festival of the New Year (see below, § 2).

The same day, the tenth of the seventh month, is also to be understood in Ezek. 40 1, although there the month is not specified.² The day is designated as ראש השנה, which cannot mean anything but 'New Year's day.' It is certainly also not accidental that Ezekiel has his vision of the new Jerusalem and the new temple on a New Year's day. This New Year's day in Ezekiel is preceded by an atonement solemnity and expiatory offerings on the first day of the seventh month (in other words, at the seventh New Moon), exactly as on the first day of the first month (Ezek. 45 20; ³ cp ATONEMENT, DAY OF).

In the further development of the post-exilic worship, the two seventh-month festivals of Ezekiel by and by simply exchanged places. The tenth day became the great day of Atonement, the first day the festival of the New Year. How it was that this so fell out we do not precisely know. Perhaps the change is connected with the fact that it was on the first of the seventh month that the returned exiles for the first time resumed the regular religious services which had been so long suspended. It is natural to assume that a day of such momentous importance was commemorated yearly. A day of penitence had little appropriateness to so joyful an anniversary, and doubtless, on the other hand, a

¹ Verse 9^b is, according to Wellh. (*Jahrb. f. d. Theol.* 21 437), a later interpolation, because the blowing of trumpets seemed incompatible with the character of a day of atonement. The addition comes from the time when the great festival of the atonement was held on the tenth day of the seventh month.

² A different view is taken by, e.g., Siegfried in Kautzsch's translation, which here understands the tenth of the first month. On this view, however, it is not easy to see how this day could be designated as New Year's day. If the year began with the first day of the first month, the tenth day of the same month could not very well be observed as the ecclesiastical New Year. If New Year was actually observed on the tenth day of a month, this will betoken that the civil and ecclesiastical New Year fell quite apart, and in that case all that we know compels us to find here the ecclesiastical New Year in the seventh month, in harvest. The civil New Year began on the first day of the first month. The translation of חג השנה by 'in the beginning of the year,' as in Kautzsch, is hardly possible. What is of importance in this passage of the prophet is precise dating; this being so, the phrase 'In the twenty-fifth year, in the beginning of the year, namely on the tenth day of the month,' instead of the simple 'In the twenty-fifth year on the tenth day of the month,' sounds strangely. Cp Smend and Bertholet, *ad loc.*

³ The MT is here corrupt; read with חג השנה בראש השנה; cp Smend, Cornill, Bertholet, *ad loc.*

day of such associations as these was marked out, as no other could be, as an appropriate beginning for the ecclesiastical year. That somehow or other it came at a comparatively early date to be thus observed may be inferred also from Neh. 8: 17; that it was exactly on this day that in 444 A.D. the first solemn reading of the new law took place, hardly seems to be a mere coincidence.

However that may be, at any rate the law of P sets apart the day in question—the first of the seventh month—as a joyful festival. It prescribes, in the 2. In P. first place, that in addition to the ordinary new moon offerings and the daily burnt offering there be presented, a young bullock, a ram, and seven yearling lambs without blemish, along with the appropriate meal offering; also a he-goat as sin offering. Further, the day is to be sanctified by Sabbath rest and by a great festal assembly at the sanctuary (Nu. 29: 1-6 Lev. 26: 23-25). The day receives a quite peculiar distinction from the fact that on it the trumpets are to be blown (Lev. 23: 24). From this it derives its special designation as *yôm t'ru'ah* (Nu. 29: 1; cp TRUMPET-BLOWING). By this, therefore, must be meant something different from the blowing of the silver trumpets that marked every new moon (see NEW MOON, § 3) and all the great feasts (Nu. 10: 10); doubtless, to judge by the analogy of the trumpet-blowing at the beginning of the year of jubilee, mentioned above (§ 1), what is meant is a blowing on the *šōphār* (שֹׁפָר) as distinguished from blowing on the *hāšōšērāh* (חֲצֹצֶרֶת). Cp MUSIC, § 5.

In the law the first day is never designated 'New Year.' We know, however, that it was observed as such amongst the Jews, at any rate from the Seleucidan era, and Jewish tradition has always regarded it in this light. Dillmann (*SBAW*, 1881, p. 919) has disputed this interpretation of it, pointing out that the economical year began later, and that the calendar year could have begun regularly with the seventh new moon only if the year were lunar, an assumption which cannot be made. The seventh new moon, he argues, comes into account in the law only because the autumn New Year did not begin with the new moon. If, however, as has been indicated above, the civil and the ecclesiastical New Year were at that time separate, it was quite possible that even in a solar year the beginning of the ecclesiastical year should be fixed for the seventh new moon. I. B.

NEZIAH (נִזְיָה), 'excellent,' § 67), a family of Nehthim in the great post-exilic list (see EZRA II., § 9), Ezra 2: 54 (νασσαυ [B], νεθια [A], μεστια [L]) = Neh. 7: 56 (ασαυ [B], νεσασα [A], νεσια [L]); 1 Esd. 5: 32 (νασαι [B], νασιθ [A], νεσια [L]; AV NASITH, RV NASI).

NEZIB (נִזְיָה), probably 'sacred pillar' or 'prefect,' see SAUL, § 2, on 1 S. 10: 5), situated, according to Josh. 15: 43, in the lowland of Judah (NEC[ε]IB [AL], NACEIB [B]). The Onomastica mention a place Nesib, Nasib, 7 m. from Eleutheropolis, on the way to Hebron (*OS*⁴, 142: 8; 283: 8), and the ruins of *Bêt Nasib* have been found on the E. of *Bêt Jibrin* (cp Guér. *Jud.* 111: 343 f.; Buhl, *Pal.* 193), near Kh. Kilâ (see KEILAH). In the list of Thotmes III. we find a place Kerti-nasena, and in one of the Amarna tablets (Wi. 263) Na-si-ma, probably meaning the same place, but hardly a town so far S. as the Nezip of Joshua. In the Egyptian list the name has a determinative, showing that the word means 'stake.' נַזִּיב, then, was at one time a synonym for אֲשֶׁרֶח Asherah.¹

NIBHAZ (נִבְחָז) with large ḥ in MT; ΤΗΝ ΕΒΛΑΖΕΡ [B], ΤΗΝ ΑΒΑΔΖΕΡ και ΤΗΝ ΝΑΙΒΑC [A], ΤΗΝ ΕΒΛΑΙΕΖΕΡ [L]), or **Nibhan** (נִבְחָן), *Sanhedrin*, 63b; MSS, according to D. Kimḥi), apparently an Avvite deity (see AVVA), 2 K. 17: 31. The Greek forms are

¹ WMM, *OLZ*, May 1899, p. 137 f. Robertson Smith takes the same view of נַזִּיב as a place-name; cp Nisibis, 'the pillars' (*RS*², 204, n. 1).

hardly more original than the Hebrew. Ḥ's form seems remodelled after the type of Eliezer. The opening letter N (in all but Ḥ's second form) fell out through the preceding *v*. The second *a* in Ḥ^A represents *n*. The Talmud (*Sanh. l.c.*) connects Nibhan (final *n*) with נִבַּח, 'to bark,' the idol being supposed to have had the form of a dog! Norberg (*Onom.* 99) has referred to the obscure Mandæan Nebaz, an evil demon. But of course it is only Assyriology that can help us, and there being no Assyrian or Babylonian divine name which approaches Nibhan or Nibhan (perhaps the better form), we must make a closer study of the phenomena of the text. Probably Nibhaz is a corrupt reading for TARTAK (*q.v.*). T. K. C.

NIBSHAN (נִבְשָׁן; ΝΑΦΛΑΖΩΝ [B], ΝΕΒCΑ [A], ΝΕΒCΑΝ [L]), the fourth in order of the six cities 'in the wilderness' of Judah (Josh. 15: 62). For the ordinary view of the site, see BETH-ARABAH; but note the caution given below.

The name does not look right. Hitzig (*Ps.* 2: 65) and Wellhausen (*ProL*³, 344) read נִבְשָׁן—*i.e.*, strictly, the 'furnace' (see Gen. 19: 24 28 Wisd. 10: 7; and cp DEAD SEA, § 4, end). In this case, the sites occupied by *es-Zuweiret el-Fikā* and *es-Zuweiret el-tahtā* would be not unsuitable (see Baed. *Pal.* 144). The ordinary view of the site, however, can hardly perhaps be maintained (cp MIDDIN, end). It is probable that P has led subsequent ages into a great misunderstanding by putting 'Engedi' for 'En-kadesh.' 'Nibshan' (Kibshan) and 'Secacah' (the preceding name) may possibly be corruptions, the one of KABZEEL, the other of Halusah (see ZIKLAG). In reality, the same place may be intended—*viz.*, Halusah. P, as elsewhere, treats variants as names of distinct places. T. K. C.

NICANOR (ΝΙΚΑΝΩΡ). I. Son of Patroclus, a Syrian general, who was sent by LYSIAS, together with Ptolemy and Gorgias, against Judas the Maccabee, B.C. 166 (1 Macc. 3: 38, cp 2 Macc. 8: 8). He was again sent in the reign of Demetrius (B.C. 161), and under the pretence of friendship endeavoured to bring about the fall of Judas. In this he was discovered and defeated at CAPHARSALAMA (1 Macc. 7: 26-32). He met with his death at the battle of Adasa, on the 13th of Adar (March, 161 B.C.), a day which was afterwards kept as 'Nicanor's day' (1 Macc. 7: 49 2 Macc. 15: 36, and cp Mēg. Ta'ānith, § 30; Jos. *Ant.* xvii. 105). The account in 2 Macc. differs from the above in several essential particulars. In his first commission, Nicanor—not Gorgias—is the chief general; and in the second, no mention is made of the battle at Capharsalama. Nicanor's friendship with Judas was free from deceit, and it was against his will that he was obliged to resume hostilities with him.

2. One of the seven deacons (Acts 6: 5). His name is mentioned in the lists of the 'seventy' given by Pseudo-Dorotheus and Pseudo-Hippolytus; according to the former he was martyred at the same time as Stephen.

NICODEMUS (ΝΙΚΟΔΗΜΟC [Ti. WH]) occurs in the NT only in Jn. 3: 1 ff. 7: 50 19: 39. The name is sometimes said to have been 'not uncommon among the Jews'; but the only evidence alleged is Josephus, *Ant.* xiv. 32—the only instance recognised in Niese's Index to Josephus. *Ta'ānith* (*Hor. Hebr. ad loc.*) derives the name of Nicodemon b. Gorion from a story of divine answer to his prayer, interpreting the name as a contraction of 'because there shone out for him the sun (שֶׁנִּקְרָא לִי נִקְרִימוֹן)'. Would such a legend have arisen if the name had been 'not uncommon'?

Wetstein, who mentions several Greek instances of the use of the name, gives none from Jewish history

1. **Who is except Nicodemon b. Gorion. These facts indicate that the name was uncommon among the Jews, but that it belonged, a little before the siege of Jerusalem, to a 'son of Gorion,' a man of extraordinary wealth and high position, frequently mentioned by the Talmudists.¹**

¹ Smith's *DB* (1863) says 'Some would derive it from נִקְי, innocent, נִקְ, blood (*i.e.* "sceleris purus"); Wetstein, *NT* 1: 150; but there is no mention of Nicodemus in Wetst. 1: 150, and no mention of this derivation in Wetst. 1: 850.

Nicodemus the son of Gorion (*Hor. Hebr.* and *Wetst. ad loc.*) was one of three (or four)¹ sometimes called 'Boulcutai'—*i.e.*, counsellors—

2. Nicodemus b. Gorion in Jewish tradition.

His special duty was to provide water for the pilgrims that came up for the feasts. Besides the legend above quoted concerning the origin of his name, another was that 'As the sun stood still for Joshua, so did it for Moses and Nicodemus b. Gorion.' On the other hand, his daughter, at whose marriage vast sums were spent, became so impoverished, she and her whole family, that she was seen gathering barleycorns out of the dung of the Arabs' cattle. The preservation of this story would harmonise with a Jewish belief that some sin of Nicodemus (who would seem to have been dead at the time) was visited on his children. *Ta'ānith*, after explaining, as above, the origin of 'Nicodemus,' says that his real name was Buni (בּוּנִי). Now, according to *Sanhedrim* (Schöttg. 2703), a Buni was one of five disciples of Jesus,² put to death by the Jews. These statements, and the story about the daughter, favour the belief that the Talmudic Nicodemus was regarded by the Jews as a disciple of Jesus. It is, at all events, probable that Jn. identified him with the man whom he calls (8:1) 'a ruler of the Jews,' and describes as present at a council of the (7:45) 'chief priests and Pharisees' (*i.e.*, the Sanhedrin) under the name of 'Nicodemus.'

With the aid of Josephus and the LXX it is possible to indicate the way in which Nicodemus b. Gorion might pass into the Fourth Gospel as Nicodemus,

3. Origin of Johannine tradition: Arimathæa.

under the shadow, as it were, of Joseph of Arimathæa, with whom, in Jn. alone, he shares the honour of burying Jesus (see JOSEPH [in NT], §4). Joseph is called by Mk.-Lk. (Mk. 15:43) 'an honourable councillor,' (Lk. 23:50) 'councillor,' (Mk. 15:43 Lk. 23:51) 'waiting for the kingdom of God,' (Mt. 27:57) 'rich' and 'made a disciple of Jesus.' 'Arimathæa,' in 1 S. 17, represents a Hebrew (Ha)ramathaim-zophim, 'supposed to be 4 m. NW. of Jerusalem. The Targum of Jonathan renders this 'Ramatha of the scholars of the prophets,'³ taking 'Zophim' as 'place of watching,' and apparently identifying it with 'Mizpeh,' from the root *zph* (צָפָה) which means 'watch,' 'wait,' 'hope for.' So here, Mk.-Lk. appear to have taken צָפוּתִים, 'm-zophim' as 'waiting for (the kingdom of God),' while Mt. paraphrased it as implying discipleship to Jesus.

As regards the statement made by Mk.-Lk. (but not by Mt. Jn.) that Joseph was a 'councillor,' if it is not historical, it may have arisen from a metaphorical explanation of Zophim as 'watchers,' 'rulers,' 'counsellors.' Cp the explanation of 1 S. 17 (Levy 4:210a) 'one of two hundred *seers* (Zophim) who arose for Israel' (and Heb. 13:17). Or it may have sprung from a gloss on 'Haramah,' *i.e.*, 'the Ramah,' or 'the eminence.' The root of Ramah, in New Hebrew, is sometimes applied to 'eminent' *people* (cp 'your Eminence') and once, at least, with a special reference to taking counsel.⁴

¹ The 'four,' mentioned in only one of several traditions, were made up by reading 'Ben Gorion and Ben Nicodemus.'

² Another of the five was named (Schöttg. 2703) Nakai (נָקַי)—*i.e.*, 'innocent'—which (see note above) has been suggested by some as an explanation of the first two syllables of 'Nicodemus.' The name Buni (בּוּנִי) and בני (בּוּנִי) is given to Levites in Neh. and Ezra and is sometimes translated *sons*, being naturally confused with *Ben*, 'son of.' See also BANI and BINNUI, with which it is often confused. It betokens post-exilic and Levitical connection.

³ [אֲרִימָתָא כְּתוּבָא בְּנֵי־אִימָי] Note, too, that Kimhi interprets אֲרִימָתָא כְּתוּבָא בְּנֵי־אִימָי as צָפוּתִים, comparing Ezek. 3:17 etc.]

⁴ See Levy, 4:453a where צָפוּתִים frequently = 'eminent,' and especially 'fibre dein Nasiat unter den Grossen (in ברקית) um dich mit ihnen zu berathen.' For LXX corruptions in connection with 'councillor,' cp 2 S. 8:18 'Benaiah the son of Jehoiada (יהוידן),'⁵ Banai son of Janak (א. Joda, L. Joad) counsellor (συμβουλος),⁶ apparently conflating. On the other hand, 1 Ch. 26:14 'a counsellor (יועץ) in wisdom (בְּחָכְמָה)' is in 2 Ch. changed into a name, 'Soaz (Α. Soias) to Melchias,' where L. conflates, 'Joad a counsellor in wisdom.' (If 'counsellor' was part of the original, it may have referred to the local council of Arimathæa; but it

Finding one, Joseph, described as an 'honourable councillor,' and 'rich,' evangelists familiar with Josephus' history might naturally identify the man

4. Jn.'s inferences.

with the famous Joseph, son of Gorion, mentioned by that historian as one of two appointed to rule and repair the city just before the siege.¹ Thus 'son of Gorion' might be inserted in the margin. But Josephus himself is supposed to confuse Joseph son of Gorion with Gorion son of Joseph.² We have also seen that one of the Jewish traditions about the 'counsellors' converted the son of Gorion into two persons, calling one the son of Gorion and the other the son of Nicodemus. Much more easily may we suppose that Christian evangelists, finding 'Joseph' in the text and 'son of Gorion' in the margin, might explain the words as 'Joseph and the son of Gorion.' Then they might take this son of Gorion to be the *wealthy* son of Gorion, the celebrated Nicodemus (or, as they began to call him, Nicodemus).

There appears no authority for the derivation, given above, 'innocent from blood,' for the name of Nicodemus; but it is not at all unlikely that, during the plastic period of interpolation, Lk. confused the name with 'Nakemidam,' 'innocent from blood' (נָקִי מִדָּמָה)—the words used by Deltzsch to translate Pilate's protest, Mt. 27:24 (*innocent from the blood of this just man*)—and paraphrased it accordingly (Lk. 23:51, 'this man had not consented, etc.').

Jn.'s statement that Joseph was a 'concealed' disciple of Jesus can be explained as one of the many conflationations of the above-mentioned *Zophim*, the root of which (צָפִי) closely resembles, and is actually confused with (Levy, 4:211) 'conceal' (צָפַן). Moreover, when Jn. developed Joseph into two persons, Joseph and Nicodemus, he may have conflated two statements, (1) that Joseph, a *concealed* disciple, came to seek the body of Jesus, (2) that Nicodemus came to Jesus *under the concealment of night*. The latter he may have supposed to refer to a previous occasion.

i. Nicodemus, being the official provider of water for the purposes of purification in Jerusalem, was a very appropriate character in a dialogue

5. Nicodemus in Jn.

setting forth the doctrine of regeneration through something more than water. He is introduced as 'a man of the Pharisees, named Nicodemus, a ruler of the Jews,' who 'came to Jesus by night,' and showed such incapacity to understand the doctrine of regeneration from above that he was rebuked by Jesus in the phrase usually addressed by the common people to incompetent teachers. In view of the fact that the doctrine of a 'new birth' was familiar to the Jews, Nicodemus's apparent want of intelligence has caused difficulty to commentators, who have explained it (*Hor. Hebr.*) on the ground that the Rabbis applied the doctrine only to proselytes, or (Schöttg.) on the ground of 'troubled times' resulting in ignorance of tradition. The former view is the more probable. But Jn. may also be using hyperbole in order to bring home to readers the perverse and wilful stupidity (as he conceives it) of the Pharisees, by representing the best among them, a man half convinced of the justice of Christ's claims, as ignoring everything that is 'from

probably sprang from a gloss.) 'Ram(ah),' being conflated as 'eminent,' might give rise to Hebrew glosses which would explain Mt.'s 'rich' (see the present writer's *Diatess.* 518-19).

¹ *BJ* ii. 203. If this son of Gorion was called 'Buni,' as a nickname, it is worth noting that the word may mean 'builder.' It is applied to the Sanhedrin (Levy, 1:241b) as 'Builders (spiritually) of Jerusalem.'

² Schür. i. 2228. 'Gorion the son of Joseph,' mentioned in *Jos. BJ* iv. 39 'is probably identical with Joseph son of Gorion mentioned above'—*i.e.*, *BJ* ii. 203. 'Gorion' was killed by the zealots (*BJ* iv. 61); at least if Schürer (i. 2230) is right—as he probably is—in tacitly assuming that the Gorion (Niese, Γοριων, Huds. Γορσιων) mentioned in *BJ* iv. 61 is the same as that (Niese and Huds. Γορσιων, Big. Γορσιων) mentioned in *BJ* iv. 89. Concerning the murdered man it is said that he was 'eminent in birth and reputation, but democratic,' and that 'his freedom of speech' (cp *Jn.* 7:50) 'was his ruin.' Of course, all these traditions could only be applied to the Johannine Nicodemus by anachronism; but in a gospel of spiritual types and tendencies, anachronisms are to be expected.

above¹ and bound up in the grossest materialism. See (ii.) below.

ii. Nothing comes of the Pharisee's interview, in which he declared—apparently describing the secret conviction of the ruling class to which he belonged—'We know that thou art a teacher sent from God.' On the next appearance of Nicodemus, he is sitting in council when his fellow-councillors thus address the officers who have failed to bring Jesus (Jn. 7.48), 'Have any of the rulers or the Pharisees believed on him?' Nicodemus, a 'ruler' and a 'Pharisee,' if he 'believed,' did not at least respond to this indirect appeal. The Laodicean state of his mind is perhaps hinted at by the words 'he came to Jesus' (but he was) 'one of them,' that is, still a Pharisee. But he pleads—though not for one whom they 'knew to be a teacher sent from God'—at all events for justice. The reply is that, since he will not side with his party, right or wrong, he must be 'on the side of Galilee.' Then comes the astonishing saying, 'out of Galilee ariseth no prophet.' If the text is correct, the whole narrative is stamped as unhistorical; for it is impossible that the Sanhedrin could use such language in the face of the Galilean origin of Jonah and Hosea, and possibly also Elijah, Elisha, Amos, and Nahum.²

iii. No mention is made of Nicodemus as protesting against the resolution of the council (Jn. 11.47-53) to put Jesus to death. He is perhaps alluded to in the words (12.42), 'Even of the rulers many believed on him; but because of the Pharisees they did not confess [it], lest they should be put out of the synagogue: for they loved the glory of men more than the glory of God;' but his name is not mentioned till the burial of Jesus. Here he is subordinate to Joseph (see JOSEPH [IN NT] i.), who alone 'took away his body'; Nicodemus does not come till afterwards. Apparently he is represented as afraid to go to Pilate with Joseph.³ Characteristically Jn. repeats here the words expressive of the Pharisee's timidity—which he dropped when he described the protest of Nicodemus (7.50 'he that came to him before') in behalf of justice—'he who at the first came to Jesus by night.' Nicodemus, however, tries to compensate for want of courage by the excessive costliness of his offering to the dead body of Jesus, 'one hundred pounds weight of myrrh and aloes'—a hundred times as much (measured by mere weight) as the single 'pound' (Jn. 12.3) of Mary, and yet the latter was valued at 'three hundred denarii'! Probably the ointment was more expensive than the same weight of 'myrrh and aloes'; but still the suggestion is unquestionably that Nicodemus the son of Gorion, who spent 'twelve thousand denarii' on his daughter's

¹ 'From above.' ἄνωθεν may in certain contexts, mean 'over again'; but (Field's *Otium Novum*, ad loc.) 'St. John's writings furnish no example of this use of the word, and . . . the Heb. *למעלה* is always local.' Cp Jn. 3.31 19 11 and 23, and NT *passim*; also Philo 1.482, ὁ κατασκευασθεὶς ἄνωθεν (and Phil. 1.263 and 498 2.442). Menander (Eus. HE 3.26) connects baptism with his own mission ἄνωθεν, and see Hippol. 6.18 quoting Simon Magus. Schöttg. 2632 quotes Zohar commenting on 'the new spirit,' and on purification 'aquis mundis supernis.' Against such evidence, Artemid. *Oneirocr.* 1.13 (where the context demands the sense 'from the beginning') is futile. As to the argument from Justin, see GOSPELS, § 101 (2). As regards the rebuke, see the boy's answer to R. Jeshua, *Hor. Hebr.* (on Jn. 3.10) אַתָּה הוּא חָכָם שֶׁל יִשְׂרָאֵל (אֵלֶיךָ), translated by Lightfoot, 'Art thou a wise man in Israel?' (not, as Jn., 'the teacher').

² If we were to suppose an *o* dropped after the final *ς* in Γαλιλαίας, the meaning would be 'the prophet is not to arise out of Galilee.' The omission of *o* after *ς* (written *Ϸ* in uncial MSS) is frequent in codex B, but not in Jn. In view of the hyperdramatic hyperbole sometimes found in Jn. it is impossible to deny that the text may be genuine. The actual order of the words is uncertain, many MSS, e.g. MD, putting *προφ.* before *ἐκ*. According to Tisch. the Sahidic version read ὁ *προφήτης*.

³ Cp *Acta Pil.* (B), § 11. 'I am afraid,' said Nicodemus [to Joseph], 'lest Pilate should be enraged. . . . But if thou wilt go alone . . . then will I also go with thee and help thee to do everything necessary for the burial.' It is only a conjecture, but a reasonable one, that, if Nicodemus was the employer of the water-carriers in Jerusalem during the Passover, the 'man bearing a pitcher of water' (Mk. 14.13 Lk. 22.10) was regarded as his emissary.

wedding,¹ spent a great deal more on the dead body of 'the teacher sent from God.' Only it was 'by night.' It is implied that Mary's affectionate gift of a single 'pound' of ointment, given to Jesus openly while he lived, outweighed the 'hundred pounds of spices' offered by the millionaire who gave him scarcely anything in the way of support, and nothing in the way of public confession, while he lived, but (Jn. 12.7) kept his gift 'against the day of his burial,' ending, as he began, a Laodicean.² He is a Johannine conception, representing the liberal, moderate, and well-meaning Pharisee, whose fate it was to be crushed out of existence in the conflict between Judaism and its Roman and Christian adversaries.

NICODEMUS, THE GOSPEL OF, printed in Greek and Latin from various MSS by Tischendorf (*Evang. Apoc.* 1853, 1876⁽²⁾) is a true apocryphon, in the sense that it does not come within the category of Old-Christian Literature in the stricter meaning of that expression (see OLD-CHRISTIAN LITERATURE). The book professes to have been originally written by Nicodemus, in Hebrew, from which language it was translated by a certain Ananias about 425 A.D. It consists of three parts, the first and second of which are entitled ὑπομνήματα τοῦ κυρίου ἡμῶν Ἰησοῦ Χριστοῦ πραχθέντα ἐπὶ Πιοντίου Πιλάτου; the third relates to Christ's *Descensus ad inferos*. Chaps. 1-13 describe the trial of Jesus before Pilate, his condemnation, crucifixion, and resurrection, substantially in agreement with the canonical gospels. Chaps. 14-16, originally by another hand, give a copious report of the debate held by the Jewish authorities upon the resurrection of Jesus and the liberation of Joseph of Arimathea from prison. Chaps. 17-27, by yet another hand, is a lively description of the brief stay of Jesus in Hades (cp 1 Pet. 3.18-20). All three pieces, originally written in Greek, are generally held to be not earlier than the fourth century, and when they were brought together to have been placed under the name of Nicodemus which occurred frequently in them and sounded well. Cp, however, ΑΠΟΚΡΥΦΑ, § 27 (1).

In the Middle Ages this Gospel was widely read, as is shown by the many still extant MSS both of the original text and of translations, by the traces found in literature of acquaintance with the work, and by widely diffused poetical adaptations. Cp Tischendorf, *Ev. Apoc.* Prolegomena; Wülcker, *Das Ev. Nicodemi in der abendländischen Literatur*, 1872; Gaston Paris and Alphonse Bros, *Trois versions rimées de l'Évangile de Nicodème*, 1885.

The value of this writing for our knowledge of Old-Christian literature lies in the fact of its containing some traits relating to the gospel history of which we learn nothing, or very little, from the NT. W. C. V. M.

NICOLAITANS, AV NICOLAITANES (ΝΙΚΟΛΑΪΤΑΙ [Ti. WH]), are mentioned in NT only in Rev. 2.6 15, and in other old Christian writers—

1. Character. Irenæus, Tertullian, and others—only in connection with these two passages. We may safely identify them with the followers of Balaam and Jezebel referred to in 2.14 20 (cp BALAAM, col. 464; JEZEBEL, col. 2457). The persons aimed at are apostates who, according to the author of the Apocalypse, had been troubling and leading astray the churches of Asia Minor and especially the seven addressed in chaps. 2f. It has been commonly, but erroneously, thought that such a description must be intended for persons who were in principle more pagan than Christian, and might therefore be regarded as mere libertines in the

¹ Wetst., ad loc., 'lectus erat stratus XII. M. denariis'; *Hor. Hebr.* 'the furniture of whose bed was twelve thousand denars.' Another tradition mentions (*Hor. Hebr.* 2.449) 'a daughter of Nicodemus b. Gorion to whom the wise men appointed four hundred crowns of gold for a chest of spices for one day.'

² If the obscure and probably corrupt Jn. 12.7 could be interpreted 'Let her alone. Ought she to keep it (or, would you keep it) till the day of my burial?'—this would bring out the contrast between the gift of Mary and the gift of Nicodemus.

ordinary sense of that word. What the writer actually says of them—and there is no other authority to whom we can turn—shows them to be Pauline Christians, in other words, believers after the type with which we become best acquainted through the Epistles that bear the name of Paul. Like these, they too had arisen after the churches had already subsisted for some considerable time, a time long enough to make it possible to point with thankful recognition to the good work the churches had done in the past, their patience and fidelity under poverty, oppression, and persecution—in a word, to their 'first works,' to their love and faith which, alas, are now threatened with extinction (2^d f. 5 9 10 13 19 33 f. 8 10 32; ep PAUL, §§ 35, 40). Their leaders called 'themselves apostles,' but in the estimation of those who opposed them were not such, but were liars (22). This same consideration it was that led 'Paul' to lay such emphasis upon his own apostleship and that of those who wrought with him, and to defend it so persistently (Rom. 11 5 11 13 1 Cor. 11 9 1-18 2 Cor. 11 11 5 f. 12 11-12 Gal. 1 1 28 Eph. 1 1 Col. 1 1 1 Tim. 1 1 2 7 2 Tim. 1 1 11 Tit. 1 1). In Rev. 220 it is brought as a charge against Jezebel that she calls 'herself a prophetess'; with no less distinctness does 'Paul' claim for himself and his followers the gift of prophecy (Rom. 126 1 Cor. 11 4 f. 12 10 28 f. 13 2 9 14 1-6 14 24 31 39). The Smyrnaeans and Philadelphians are warned in Rev. 29 39 against those who say that they are Jews although they are not, but lie and are a synagogue of Satan; precisely so does 'Paul' designate his spiritual allies irrespective of descent or birth as the true Jews, the seed of Abraham, and the rightful Israel (Rom. 228 f. 4 96 f. 11 17 1 Cor. 10 18 Gal. 3 7-9 3 29 4 22 28 31 6 16 Eph. 2 12), though very far from wishing to have it forgotten that he himself is an Israelite according to the flesh and full of tenderness for his people (Rom. 9 1-5 10 11 2 Cor. 11 22 Gal. 2 15 Phil. 3 4 f.).

The Nicolaitans had their own particular doctrine (*διδασχά*; Rev. 2 15 24), just as 'Paul' had his (Rom. 6 17

2. Doctrine. 16 17 1 Cor. 4 17 7 17). Their gnosis, their sounding of the deep things of God (Rom. 10 33 1 Cor. 2 10), could easily lead to the designation of those who were opposed to it and to the new revelation altogether as being those 'who know not the deep things of Satan' (*οἵτινες οὐκ ἐγνωσαν τὰ βαθέα τοῦ σατανᾶ*; Rev. 2 24). The stumbling-block which the apostates cast before the Israelites is stated to be 'eating things sacrificed to idols and committing fornication' (*φαγεῖν εἰδωλόθυσια καὶ πορνεύσαι*; 2 14 20), not because they made a mock of all that is holy and trampled honour underfoot, but because they, like 'Paul,' had set aside the Jewish laws regarding foods and marriage, freely using food that had been set before heathen deities (Rom. 14 2 6 14 20 1 Cor. 8 1 4 10 19 25-27), and contracting marriages within the prohibited degrees which in the eyes of the author of the Apocalypse were unchaste unions, just as in the eyes of the writer of 1 Cor 5 1 the marriage of the Christian who had freed himself from scruples with his deceased father's wife (not his own mother) was so, or as in the eyes of so many Englishmen the marriage with a deceased wife's sister is at the present day. For the expressions, see Acts 15 20 29 21 25 (cp also COUNCIL, § 11).

The reason why the identity of the Nicolaitans and their allies in Rev. 2 f., with the followers of Paul has not sooner found general recognition, although many scholars since Baur have considered that Paul himself was aimed at in the passage, is not far to seek. Paul's name is not mentioned, and his personality not brought before the reader's attention, so that it was natural to see in the allusions a reference to later developments. No one thought of suggesting Paulinism such as is seen in the Epistles and must be dissociated from the person and period of the historical Paul.

Why the Nicolaitans were called so is unknown. Probably the name was given by opponents, and, like 'Balaam' and 'Jezebel,' was intended to express censure and reproach. Perhaps it was originally bestowed by some one before the time of the writer of the Apocalypse who had in view some well-known though now forgotten personality of evil repute. We may be sure that it does not come, as Irenæus and Tertullian will have it, from the deacon Nicolas of Acts 6 5, nor yet, as many moderns have conjectured, from Νικόλαος (*μικάν* and *λάος*) as a rendering of Balaam=βαλαάμ=עַל עֲלִי or עַל עֲלִי. This, however ingenious, is a mere guess.

In the middle ages we meet with 'Nicolaitans' who seek to release the clergy from enforced celibacy; in the fifteenth century, in Bohemia, 'Nicolaitans' anticipated the Quakers in their repudiation of outward ordinances and in finding a place for special revelations by the side of the written word. They do not stand, however, in any real connection with the Nicolaitans of the Apocalypse.

See for these *PREL.*, s.v. 'Nikolaiten'; for the first, W. C. van Manen, *Paulus*, ii., 1891, pp. 244-251; for another view, W. Bousset, *Offenbarung Johannis*, 1896, 238-241, 278 f.

W. C. v. M.

NICOLAS (ΝΙΚΟΛΑΟΣ), a proselyte, of Antioch, one of the 'seven' named in Acts 6 5 (see DEACONS, § 5). His name—but only the name—occurs also in more than one of the lists of the 'seventy' (see Lipsius, *Apocr. Ap.-gesch.* 1205; *Erganzungsheft*, 2), and a large body of tradition has been connected with it under the supposition that he was the founder of the heresy of the NICOLAITANS [q. v.].

NICOPOLIS (ΝΙΚΟΠΟΛΙΣ [Ti. WH]). Paul, according to the traditional view,¹ writing to Titus expresses his intention of spending the approaching winter at Nicopolis (Tit. 3 12), and desires Titus to 'be diligent' to come to him thither. There were many towns called Nicopolis.

(1) One founded in Armenia by Pompeius on the field of his victory over Mithridates (65 B.C.), a great military and civil post and centre of the road system under the Empire (mod. *Parkh.* Strabo, 555; Ptol. viii. 17 40. Cp Murray *Handbook to AM* 48). (2) In Egypt, near Alexandria (Strabo, 795 800, Jos. *BJ* iv. 11 5). (3) On Mt. Amanus, in Cilicia (Strabo, 676, Ptol. v. 8 7). (4) In Bithynia, on the Bosphorus (Plin. *HN* 5 32). (5) On the upper Nestus, in Thrace (Ptol. iii. 11 13). (6) The town still called Nicopolis (*Νίκυζ*) near the Danube; (7) Nicopolis in Epirus. This enumeration is necessary, as there is no direct evidence as to the identity of the town mentioned in Titus. The subscription to the Epistle to Titus, according to which the letter was written 'from Nicopolis of Macedonia,' is of no authority.

Considerations as to the date of foundation or name, or as to the situation, of most of the towns above enumerated, are fatal to their claims; and there is a general agreement that the place meant was Nicopolis in Epirus, for this agrees best with the meagre data as to Paul's last years derivable from the Pastoral Epistles on the assumption of their genuineness.

Nicopolis (the 'city of victory') in Epirus was founded by Augustus in commemoration of his victory over

2. Environ- Antonius and Cleopatra (Sept. 31 B.C., *Suet. Aug.* 18; Strabo, 325). The site chosen was that on which his land forces had their camp before the battle, on the northern promontory at the mouth of the Ambracian gulf (mod. Gulf of Atba). The whole surrounding territory—southern Epirus, the opposite region of Acarnania with Leucas, and even part of Ætolia—was united in a single urban domain, and the inhabitants of the dwindling townships were transferred to the new city (Strabo, *l.c.*, Dio Cass. 51 1, Paus. v. 23 3 vii. 18 8 x. 38 4, *Anthol. Gr.* 9 553). Nicopolis was made a 'free city' (like Athens and Sparta),² and it possessed six out of the thirty votes

¹ [However impossible, on critical grounds, the Pauline authorship of the Epistle to Titus may be, many critics now hold that Tit. 3 12 f. is a genuine fragment of the work of Paul, written shortly before 2 Cor., when Paul (in Ephesus?), unable to count on the loyalty of Corinth, was planning to await the outcome in Macedonia and Epirus (Bacon, *Intr. to the NT* 136; cp v. Soden, *HC* iii. 181 221 c). Cp Rom. 15 19.—ED.]

² Other places called Nicopolis will be found mentioned by Ramsay, *Hist. Geogr. of AM*—Palæopolis in the valley of the Cayster (105); in Pisidia (=Metropolis, 403); Emmaus [mod. 'Amwās] in Palestine was known as Nicopolis in the third century. Naturally these do not enter into the question.

³ Tac. *Ann.* 5 10, Arrian, *Expict. Diss.* iv. 1 14 *ἡ πῆν Καίσαρος πόλιν, ἐλευθεροῖ ἐσμέν.*

in the Amphictyonic Council representing all Greece (Paus. x. § 2 f.). Furthermore, the old festival to the Actian Apollo on the opposite promontory was magnificently renewed and enlarged, a quinquennial festival (τὰ Ἀκτῖα), with musical and athletic competitions, and chariot races and other contests, being instituted and placed on the same level as the four great Games of Greece (Strabo, l.c.). Herod the Great contributed to the adornment of the city (Jos. Ant. xvi. 53). The result of this imperial and other patronage was that Nicopolis became the greatest city on the W. coast of Greece, far exceeding in importance all other cities of the same name (cp Strabo, 325).

Nicopolis was therefore admirably adapted to be a centre of missionary work in western Greece—a region as yet untouched. An additional reason

3. Paul's visit. for the decision attributed to Paul would be found if it were certain that Epirus and Acarnania had at this date been severed from Achaia and constituted as a separate province.¹ The despatch of Titus northwards into Illyricum² (cp 2 Tim. 4:10, and see DALMATIA) seems to indicate a reasoned plan of far-reaching operations in this quarter. The above remark assumes both that Paul himself reached Nicopolis, and that Titus was able to go to him before the expiration of the winter (probably that of 65-6 A.D., or perhaps a year later); but of this there is no proof. Paul was certainly not at Nicopolis at the time of writing Tit. 3:12³ (see § 1, n. 1 above); probably Miletus and Corinth (2 Tim. 4:20) were stages on the journey thither. It would seem most probable that Nicopolis was the scene of his arrest, in the course of the winter.

Nicopolis fell into decay, and, having been destroyed by the Goths, was restored by Justinian (Procop. de Ed. 42). During the Middle Ages the site was deserted for one about 5 m. farther S. on the end of the promontory, and thus the modern town of Prevesa (πρεβέζα) originated. There are many remains of the ancient city.

See Journ. Roy. Geogr. Soc. 3:99, Leake, Travels in N. Gr. 1:178 3491, Murray's Handbook to Greece. For the foundation of Nicopolis, consult Kuhn, Entstehung der Städte der Alten W. J. W.

NIGER. See SIMEON NIGER.

NIGHT (לַיְלָה), Gen. 1:5 etc. See DAY.

NIGHT-HAWK (לַיְלָהּ, *tahmās*; ΓΛΑΥΞ; *noctua*), one of the unclean birds (Lev. 11:16 Dt. 14:15†). The true meaning of the Hebrew word is unknown. Tristram thinks that AV meant by 'night-hawk' the night-jar⁴ (*Caprimulgus*), a bird of nocturnal habits, of which three species are recorded from Palestine; but G and Vg. suggest a reference to some species of OWL (*g.v.*). Among the moderns, Bochart and Gesenius favour the male ostrich (root-meaning, 'to treat violently'), whilst others, led by the same root-meaning, prefer the cuckoo. Finally, others have thought of the swallow (so possibly Targ. Jon. חַמְצָה and Saad.); Niebuhr the traveller states that the Jews in Mōsul still call the swallow *tahmās*.

A. E. S.

NIGHT-MONSTER (לַיְלִית), Is. 34:14 RV, RV^{mg}. LILITH.

NIGHT-WATCHES (לַיְלִיּוֹת), Ps. 63:6 [7] 119:148. See DAY.

¹ See Marq.-Momms., *Staatsverw.* (2), 131. Tac. *Ann.* 2:53 (= 17 A.D.) calls Nicopolis an *urbis Achaiae*, but *Epict. Diss.* iii. 4:1, speaks of it as the headquarters of an ἐπίτροπος Ἡπειρου: cp Zahn, *Einh.* 1:435.

² [2 Tim. 4:6 (9):22 may plausibly be regarded as a Pauline fragment, though 1 and 2 Tim., as wholes, cannot be the work of Paul. See Bacon, *Introd. to the NT*, 135; v. Soden, *HC*, 3:181. ED.]

³ Note the use of ἐκεῖ, 'there,' and the tense κέκρικα, 'I have determined'—not the epistolary past, but expressing the mental state at the moment of writing.

⁴ From the time of Aristotle, peculiar attributes have been ascribed to the night-hawk or goat-sucker, and it was supposed to come at night-time and tear and eat the flesh off young children's faces.

NILE. The present name of the great river of Egypt comes from the Greek (ὁ Νεῖλος). This is found as early as Hesiod; Homer, however, *Od.*

1. Names 4:477, calls it Ἄγυπτος (ὁ Ἀγυπτος in distinction from ἡ Ἀγυπτος, the country), indicating, correctly, by this name that Egypt is only the Nile valley. No derivation from the Egyptian is possible for the name Nile.¹ Whether, according to a hypothesis of Movers, Νεῖλος comes from a supposed Phoenician **nehel*=Hebrew *nāhāl* ('brook, stream') must remain doubtful; neither does a hypothetical Egyptian mutilation of *nāhār* 'river' (Lepsius, *Chronologie*, 275) present more probability. If the Arabic name of the canal Shatt-en-Nil in Central Babylonia has any connection with the Egyptian river, it would be due to a comparison by the Arabs. The Egyptians call their river *l'p* (something like **l'p*) or *H'p'i* (earliest orthography in the pyramid-texts *H'p*), which, if we may judge from Herodotus' *Κρωφι* and *Μωφι*, was probably vocalised *l'p(i)*.² Although the latest theology tried to explain the Apis-bull (Eg. *H'p*) as a personification of the Nile, the two names are totally different (cp ΝΟΡΗ).³ The river's sacred name *l'p* began at an early period to be used less than the simple designation 'river' *yetor*, later pronounced *ye'or*, *yo'or* (earliest orthography *ytrw*, the addition of *w* being meant to express the fact that *w* had taken the place of the lost *l*; later spelling *ywr*), whence Coptic εἰσορ 'branch of the river,' distinguished from ἰσορ, S. Egyptian εἰσορ 'the Nile'; originally *y(e)tar-ol'* 'the great river.' This last expression is rendered by the Assyrians *iaru'ā* (Ašur-bani-pal, 41:32; cp Delitzsch, *Paradies*, 312)⁴—i.e., N. Egyptian ἰσορ or ἰσορω—whilst the other expression has become very familiar through the Hebrews as יַרְדֵּן יַרְדֵּן (in Am. 8:8 mutilated into יַרְדֵּן).⁵

יַרְדֵּן is used exclusively of the Nile (Gen. 41:1 Ex. 1:22 2:3 etc., Ezek. 29:39 Am. 8:8 9:5; in the last two passages with the addition 'of Egypt,' which is frequent with the plural), in the plural of the Nile branches in the Delta (Ezek. 29:3, 30:12 Ps. 78:44 Is. 7:18 19:6 87:25), only in Is. 88:27 of ideal rivers (וְיַרְדֵּן), and in as late passages as Dan. 12:5 6:7 of the Tigris (in Job 28:10, where the sense 'shafts of mines' is forced on it by the commentaries, the text is hardly correct). That G mostly renders *ποταμός* may be noted. On the name ΣΗΩΡ, see the article on that word.

Naturally, the name Gihon of Gen. 2:13 does not refer to the Nile, although already Ecclus. 24:27 and Josephus know that application. Christian writers, of course, called the Nile *Geon* after the LXX, in order to show their knowledge of the Bible; but this is not to be considered as a tradition of any weight. The question where that second river of Paradise is really to be sought for, does not belong here. See GIHON, and PARADISE, § 5.

Personified, the Nile is frequently figured as a fat, androgynous deity,⁶ with skin painted blue (like water; sometimes green), wearing a bunch of

2. Beliefs and ceremonies. aquatic plants on his head and the girdle of a fisherman around his loins, and presenting fresh water (in vases), lotus flowers, fish, and fowl. Such representations are found as early as on statues of dyn. 12. One of the classic school-books, dating from the middle empire, contains a hymn to the good god Nile,⁶ 'the creator of all good things'; but he received less regular worship than the local gods presiding over the watercourse of some districts (*Saïet* near

¹ W. Groff's *ne-il-u* 'the rivers' (*Bull. Inst. Eg.* 1892, p.165) would, in correct pronunciation, be *n-terou*, which has no resemblance to Nile.

² No etymology is possible. Paronomasia with the root *l'p*. (something like **l'p*) 'to hide,' are, of course, not to be taken seriously.

³ Wiedemann, *Herodotus' zweites Buch*, 93, enumerates various rare Greek designations for the river (Okeanos, Aetos, Neileus, Triton), and some ridiculous etymologies from the Greek for the usual name Nilos.

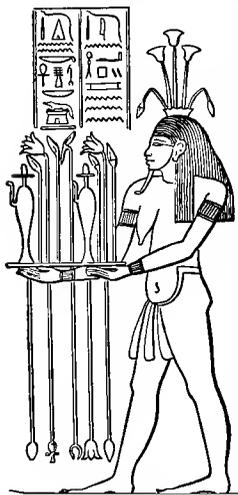

⁴ Delitzsch's statement that a word *ia-u-ri* 'rivers' (?) occurs already in an inscription of Adad-nirari I. (about 1325 B.C.) is retracted in *Assyr. Handwörterb.* 203 303.

⁵ Mostly differentiated into the two Nile gods of Upper and Lower Egypt.

⁶ Papyrus Sallier II, and Anastasi VII.; cp Maspero, *Hymne au Nil*, 1868 (see also *Records of the Past* (1), 4:105).

the first cataract, for example). Temples are mentioned at Memphis, Heliopolis, and Nilopolis.

At Silseleh (between Aṣuān and Edfu), where the sandstone range, in pre-historic times, had separated Egypt and Nubia, certain ceremonies and sacrifices from time immemorial welcomed the Nile at the yearly commencement of his rise—*i.e.*, at the entering of the inundation into Egypt proper. The 'Nile-festivals' (Νεῖλωα)¹ were celebrated through the whole country at that time.

Nile Deity.

Some of the religious rites have survived to the present day in Christian or Muhammedan disguise, such as the celebration of the 'night of the drop' (falling now on the 17th of June), originally the night in which tears of Isis weeping over Osiris cause the Nile to rise.²

Also the 'feast of cutting the dam' in August must date from pagan times.³

The true causes of the yearly rise of the Nile were, of course, not known to the ancient Egyptians; for this their geographical horizon was too narrow.

3. Sources and yearly rise. (In dynasties eighteen to twenty-one, the pharaohs had a certain rule over the valley as far S. as the sixth cataract, and even before that time [EGYPT, § 47] commercial expeditions may have penetrated farther S., but neither into the highlands of Abyssinia nor to the equatorial lake-regions.) The ancient Greeks discussed the mystery with special interest (Strabo, 136; Herod. 2 19 ff., etc.); the correct explanation (the tropical winter-rains)⁴ is found first in Aristotle (*Meteor.* i. 12 19). Herodotus (2 19) wonders at the lack of interest in the problem which he found among the Egyptian priests; they were, indeed, perfectly satisfied with the old mythological explanations, exactly as they taught to the last days of paganism the childish geography inherited from the most primitive period: the Nile has his source or sources at the seat of Osiris, in the realm of the dead, which is both in the Lower World and in heaven;⁵ it comes to light at the first cataract, flowing in two whirlpools from two 'fountain-holes' (*Kerti*); one river runs N., the other S.; as the northern branch empties into the Mediterranean, so the southern river ends in the Indian ocean.⁶ We see here the tendency to confine the name Nile to the part flowing through Egypt N. and S. of Elephantine and Philæ. The endless course of the river is alluded

¹ Described by Heliodorus, 99. Cp Wiedemann, *Herodotus zweites Buch*, 365.

² Isis' tears drop, according to this myth, from heaven, in the 'night of weeping.' According to another version, she mourns in the lower world where her dead husband lies. A variant makes the river come out of Osiris' body itself. Thus the statement of Greek times, identifying Osiris and the Nile, is intelligible, as well as the importance of Isis in the preservation of all organic life, due, in Egypt, entirely to the irrigation. See below on the earliest form of these myths combining Osiris and the invisible source. [Cp G. Margoliouth, *Liturgy of the Nile*.]

³ A strange tale of the Talmud to the effect that Joseph's coffin rested in the depths of the Nile, has no parallel in Egyptian customs. The sacred river seems to have been kept from defilement by corpses, in great contrast to the negligence of the modern Egyptians.

⁴ Half correctly Anaxagoras: the melting of snow in the Ethiopian mountains.

⁵ Cp *Odyss.* 4 477 *δυσπρεπὴς ποταμός*?

⁶ This view is found in Greek writers, and already in the Petersburg tale, written about 1900 B.C.

to frequently,¹ so that the proverbial idea about its real source² may be older than Greek times.

The true beginning of the White Nile (ep EGYPT, § 6) is now sought in the Kagera river, 3° S. of the equator, so that the total length of the Nile is about 4000 miles. Its six cataracts are all situated N. of Khartūm. Whilst it has many affluents S. of the 10th degree, N. of this it receives only the 'Aṭbara and the Blue (better Black—*i.e.*, turbid) Nile, the rivers Astaboras and Astapus of the Ancients. The yearly inundation is chiefly due to the Blue Nile, which brings the water of the Abyssinian winter-rains. The swelling of the river is noticed in Khartūm in the first days of May, near the first cataract about June 1st, at Cairo at the end of that month. The maximum is there reached in October (EGYPT, § 7). The classical writers are approximately correct in speaking of 100 days of swelling. The water becomes turbid and red (for some days it is coloured green by parts of rotten water-plants); it turns clear again when the river begins to sink. With the exception of the time of the 'green Nile,' the water is pleasant and wholesome.

The great importance of the yearly inundation, which alone makes agriculture possible in Egypt, was well known to the Greeks; less generally known was the necessity of artificial assistance by dykes, canals, and machines for lifting the water, which makes the life of the Egyptian peasant so hard. In antiquity, the inundation seems to have been somewhat more abundant, as old water-marks show,³ but hardly more regular. Too high inundation causes great ravages, especially in the lowlands of the Delta; an insufficient rise, on the other hand, brings a failure of the crops and famine. The most desirable rise was considered to be 16 Egyptian cubits.⁴ Bad years in consequence of a 'small Nile'⁵ are mentioned frequently from the time of the middle empire (see EGYPT, § 7, n. 2, on a legend of seven years of famine). The rising of the floods was accordingly observed with great anxiety by means of official Nilometers—*i.e.*, graduated wells (most famous are the ancient one of Elephantine and that from Arabian times on the island of Rōda at Cairo). Religious services for the purpose of imploring the granting of 'a great Nile' are known from all ages, from pagan down to Muhammedan times. Whether the annual sacrifice (to the Nile) of a virgin at Memphis is historical may be doubted—at least for the Christian age of Egypt, to which Arab writers wish to attribute it. Cp for all the preceding remarks, EGYPT, § 6 f.

W. M. M.

NIMRAH (נִמְרָה), Nu. 323. See BETH-NIMRAH.

NIMRIM, WATERS OF (נִמְרִים), 'leopard waters'; ep BETH-NIMRAH; much less probably 'limpid waters'), a stream in the land of Moab [Is. 156, ΝΕΜΡΕΙΜ [BQME]. ΝΕΒΡΙΜ [N], ΝΕΜΡΕΙΜ [AQ*], ΝΕΒΗΡΕΙΜ [I]; Jer. 48 34, ΝΕΒΡΕΙΜ [B], -M [N], ΝΕΜΡΕΙΜ [Q], ΕΒΡΙΜ [A]]. The elegy on Moab (see ISAIAH ii., § 9) complains that 'the waters of Nimrim are becoming a desolation; withered is the grass, gone is the herbage,

¹ 'The circle of gods does not know whence thou art,' *AZ.* 1873, p. 129; only the souls of the dead will see Isis 'revealing the Nile in his secrecy,' *Book of the Dead*, 146.

² Knütgen, *Die Ansichten der Alten über die Nilquellen*, 1876 (Wiedemann, *l.c.* 113).

³ Cp especially those at Thebes, *AZ* 34, 1896, 111 and 95. The strange water-marks at Semeh in Nubia (*LD* ii. 139), which would show that, in dynasty 12, the Nile rose there (above the second cataract, where the river may not yet have broken through) 25 ft. higher than nowadays, are best left aside (cp col. 1208, n. 2, end). In Egypt proper the (very slow) raising of the ground by the alluvium which the fields are raised faster than the bed of the river is, however, disputed.

⁴ Cp the sixteen children playing round the famous statue of the Nile in the Vatican. The height varies, however, considerably according to the locality. Does sixteen apply to Memphis? (Plut. *Is.* 43, Arist. 2 361, give fourteen cubits for M.)

⁵ Decree of Canopus, *L* 7, Greek text, *L* 16. The Greek text translates by ἀβροχία.

verdure there is none.' It is not a prophecy of what God will bring about; the picture is not merely anticipative; the barbarity of foemen is to blame (2 K. 3:19-25). The picture is completed in Is. 15:9 (emended text), which states that 'the waters of Nimrim (see DIMON) are full of blood'; the warriors of Moab have been cut down on its banks, and the stream is reddened with gore (cp Jer. 48:2, where MADMEN [q.v.] should be Nimrim). This apparently explains the cry of woe (v. 8) which echoes from the S. to the N. of the land (see EGLAIM). Presumably Nimrim itself is in the S. of Moab. It is therefore not the same as BETH-NIMRAH (q.v.) or Nimrah—i.e., Tell Nimrin—at the foot of the mountains opposite Jericho, though apart from its situation the Wādy Nimrin, as the lower part of the W. Šo'ab (cp HOBAB) is called, answers to the description of the former state of Nimrim.¹ We must look for a trace of a Nimrim farther S.; in fact, it seems doubtful whether Beth-Nimrah is not too far N. to have been reckoned as Moabitish.

According to Eusebius and Jerome (OS², 284:32; 143:11) the place intended is one which was known in their day as βενναμαρεμ, *bennamerium*, and lay to the N. of Zoar (at the extreme S. end of the Dead Sea; see ZOAR). Either the reference is to the Wādy en-Numera, which traverses a region now waste and stony, but perhaps not so in early times, or, if not, the name which was once applied more widely has lingered here by the caprice of fortune.²

Tristram speaks of the 'plenteous brooks gushing from the lofty hills into the Ghōr en-Numeira' (*Land of Moab*, 46 f.). The name, which may possibly contain a relic of totemism (cp LEOPARD), was apparently not very uncommon. See OS², 284:22, 142:32, for another evidence of this (it is the great Wādy Nimreh in Haurān, E. of Shubha, that is meant). T. K. C.

NIMROD (נִמְרוֹד, נִמְרוֹד [1 Ch. 1:10 Mic. 5:5]; ΝΕΒΡΩΔΑ, ΝΕΒΡΩΝ [E and D in Gen. 10:9]; ΝΑΒΡΩΔΑΗC

1. **Biblical references.** [v. l. ΝΕΒΡ.], Jos.). A son of Cush, and one of the primitive heroes (Gen. 10:8 ff. [J₂], 1 Ch. 1:10 ff.). There is much that is singular and exciting to the curiosity in the account of Nimrod. The sons of Cush in Gen. 10:7 (P) are the representatives of peoples; but here is a son of Cush who, however legendary, is no mere genealogical fiction, but apparently the first of the imperial despots known to the Israelites. His name was evidently as familiar to those from whom the tradition in Gen. 10:8 ff. is derived as it was to the people of his own country; and if we could only understand what is said about him, we ought to be able to restore the name which underlies the form Nimrod. It is stated in the tradition (vv. 10-12) that his rule began in Babylon, and then extended to Erech, Accad, and Calneh in the land of Shinar, from which country he went to Assyria, and founded Nineveh, Rehoboth-Ir, Calah, and Resen. Several of these names, however, are obscure. Even SHINAR and ACCAD have not been explained beyond question, whilst CALNEH, REHOBOTH-IR, and especially RESEN still remain in a high degree doubtful. The description of Nimrod in v. 8 ff. is also somewhat puzzling. 'He began to be a mighty one (נִבְרָא, *gbyas*, see GIANTS) in the earth. He was a mighty one in hunting (נִבְרָא צַיִד) before Yahwē; therefore, it is said, like Nimrod a mighty one in hunting before Yahwē.' We also meet with the phrase 'the land of Nimrod,' parallel to Assyria, in Mic. 5:6 [S]. This too has not been adequately explained (see § 2, end).

Bruston's supposition that Nimrod ben Cush is the name symbolised by the mystic number in Rev. 13:18 is, we may fear, only a curiosity.

That the name 'Nimrod' must have suggested to the

¹ This is the view of Ges., Hi., Del., Che. [formerly], Bād.-Socin ('probably'), and especially Wetzstein (see Del. *Gen.* (4), 572).

² Buhl (*Pal.* 272), Di. This view suits the identification of Horonaim with the ruins near the Wādy ed-Dera'a (Buhl, 272). Horonaim is mentioned in the elegy just before Nimrim.

Hebrews the idea of 'rebellion' (מַרְדָּב) is obvious. The connection of the hero who bore it with foreign cities, however, shows that it is merely a Hebraised form of a foreign name.

2. **Earlier theories of name.** Sayce formerly (*TSBA* 2:243 ff.), Grivel (*ib.* 3:136 ff.), and Wellhausen (*CH* 309 f.) have combined Nimrod with Merodach (Marduk), who was originally the local god of Babylon, and is said to have had four dogs (Jensen, *Kosmol.* 131). Apart, however, from the reference to Nimrod's hunting (if צַיִד is correct), there is no parallelism between the two, and it was therefore a more plausible idea of G. Smith the Assyriologist (*TSBA* 1:205 and elsewhere), Maspero (*Dawn of Civ.*, 1899, p. 573), P. Haupt (*Nimrod-epos*), and A. Jeremias (*Isdubar-Nimrod*) to identify Nimrod with the legendary hunter king of Erech, whose name is now read as Gilgameš (see CAINITES, ENOCH), and with whom one of the cities (Erech) mentioned in the traditional text of Gen. 10:10 is closely connected. Even this parallelism, however, is incomplete, and the name remains unexplained.¹ Haupt and Hilprecht have, therefore, looked out for a historical personage whose name might conceivably be worn down into Nimrod. The hero selected is Nazimarattaš² (14th cent. B.C.), one of those warlike Kaššite kings of Babylonia (see CUSH, 2) who were constantly invading Palestine, and continued their intrigues in that country to the very end of the Egyptian rule.

The contract tablets of the Kaššite period are said to abound in such abbreviations as that of נִמְרוֹד for Nazimarattaš. The theory is well thought out. This Kaššite king might conceivably have been remembered as a representative of the Kaššite kings, and have been credited with the conquests of other Kaššites. It should be noticed, however, that the synchronous history of Assyria and Babylonia states that Nazimarattaš was defeated at Kar-Īstar-akarsal by Adad-nirāri I, king of Assyria, which was followed by an extension of the Assyrian frontier (*KB* 1:197; *RP* (1), 3:30; cp BABYLONIA, § 47).

This identification of Nimrod, however, is not free from objection. If Nimrod had been represented solely as a conqueror, it would be adequate on the grounds mentioned above. He is more especially represented, however, as a great founder or fortifier of cities, and Haupt's theory does not throw any light on this representation. Moreover, the difficulties connected with the names of the cities and with the phrase *gībōor sāyid*, נִבְרָא צַיִד, remain, and as a point of method we ought first of all to seek to clear up these names in the light of probable conclusions attained elsewhere in the criticism of traditional names (see, e.g., SODOM).

The least serious difficulty is that connected with נִבְרָא צַיִד (EV a mighty hunter) in Gen. 10:9a. This phrase can hardly be right. Esau was surely the great mythical hunter of the Israelites. If Gilgameš, the hunting king of Erech, is to be identified with Enoch (see CAINITES, § 6, ENOCH), we must suppose that he was despoiled of his reputation as a hunter to please Israelitish taste. For נִבְרָא צַיִד there are plausible alternatives—to read נִבְרָא נֶאֱמָר, as in v. 8d, or to regard נֶאֱמָר as a corrupt fragment of some word meaning 'ruler' or 'leader' (most probably נֶאֱמָר, 'judge, general, prince'). The second alternative is preferable: it was as an able ruler and general, not as a hunter, that 'Nimrod' made his reputation, and was remembered in a popular song.

3. **Probable key to legend.** The key to the names will be found by recognising the Arabian Cush not only in Gen. 10:6 f., but also in v. 8. It follows from this that, as in Gen. 14 and elsewhere, the editors of the traditional text have made a huge mistake, through starting with a wrong theory. The following restoration may not be in all points correct; but it probably approaches the truth. For נִבְרָא we should almost certainly read נֶאֱמָר, 'and he smote' (to suit נֶאֱמָר).

The suggested restoration of the text makes the passage read as follows:—'And the beginning of his kingdom was Jerahmeel in the land of Seir. From that land he went forth into Geshur,

1 No one would now explain 'Nimrod' as Namra-uddu, 'the brightly shining,' or Namra-zit, 'the brightly rising.'

² See Haupt, *Andover Review*, July 1884 ('The Language of Nimrod the Cushite'), and cp *University Circulars* (Baltimore), vol. xi. no. 98 (May 1892), and Hilprecht, *Assyriaca*. This view was accepted as probable by Sayce (*Acad.* March 2, 1895; cp *Pal. Pal.* 269; *Exp. T* 8:180) and Cheyne (*Acad.* March 9 and May 11, 1895). Marattaš is stated to be the Kaššite god of hunting.

and smote Hebron, Rehoboth, Jerahmeel, and Beersheba, which is between Hebron and Jerahmeel.¹

On the possible or probable connection of the Nimrod passage with Gen. 6:1-4 and 11:1-8 see NIMRILIM, and on the Jerahmeelite origin of early Hebrew stories see PARADISE.

Now as to the name of the conqueror. **𐤍𐤁𐤃** gives it as Nebrod, which is almost certainly right. It is probably a condensed form of Bir-dadda, which is given elsewhere (see BEDAD) as the probable original of Bedad. Considering that the conqueror spoken of must have been prominent in Hebrew tradition, we may without undue boldness assume that the Husham ben Zerah and the Hadad ben Bedad in the list of Edomite kings (Gen. 36:34 f.) have been rolled into one by Hebrew legend. Husham is probably the original of the CUSHAN-RISHATHAIM [q.v.] of Judg. 3:7-11, whose name should be read 'Cushan from the land of the Temanites.' That this oppressor was traditionally king of Edom, not Mesopotamia, is probable from the Kenizzite origin of Othniel. His real name may have been Bir-dadda; 'Cushan' is a term descriptive of his origin, not his name. So Hadad b. Bedad would be really the son of the so-called Cushan-rishathaim, and his conquests² may have been added to those of his father to complete the legendary picture. The main point, however, is that 'Nimrod' led the Jerahmeelite migration from Edom into S. Canaan; this may well be a historical fact. We now understand the parallelism of 'land of Nimrod' and 'Assyria' in Mic. 5:6 [5]. אַשּׁוּר (Asshur) is constantly used in lieu of גֶּשׁוּר (Geshur), and refers to a district on the border of S. Canaan. Cp MICAĤ [BOOK], § 4. MIZRAIM, § 2 b.

The theories considered above differ radically from one which had considerable vogue formerly, and was

4. Nimrod not a myth. —viz., that Nimrod was originally, not the legendary first king of Babylon (?), but the constellation of Orion. The *Chronicon Paschale* (ed. Dindorf, 64) says that the Persians assert of Nimrod that he became a god, and was identical with the constellation of Orion; cp the Arabic name of Orion *jabbār* = Heb. *gibbōr*, גִּבּוֹר, the title given to 'Nimrod' in Gen. 10:8 f. (see ORION). It is just as plausible, however, to make 'Nimrod' into a solar hero (so Goldziher in 1876) on the deceptive ground that it is said in a Midrash that 365 kings (equal to the days of the solar year) ministered to him. Cp ENOCH, § 2.

Jewish Aggada made Nimrod the founder of the Tower of Babel (Jos. *Ant.* 1:42 f.), and, by a still further licence, imagined him to have persecuted Abraham, because the patriarch

5. Jewish Aggada. The latter legend migrated to the Arabs (cp *Koran*, Sur. 21:52-69), and several mounds of ruins even now bear Nimrod's name, especially the well-known Birs Nimrūd (see BABEL, TOWER OF).

On the name and application of 'Nimrod' cp also Lagarde, 'Armensche Studien' in *Abh. Ges. Gött.* 22:77 and Nögd. *ZDMG* 28:279 (Persia called 'house of Nimrod' in an old Syrian book); and on earlier explanations of the name, cp Dr. in *Guardian*, May 20, 1896. T. K. C.

NIMSHI (נִמְשִׁי), נַמְשִׁי [BAL], ancestor of JEHU (q.v.); cp ISSACHAR, § 4; 1 K. 19:16 (ΝΑΜΕΘΕΙ [B, om. A]) 2 K. 9:2 (ΔΜΕΘΕΙ [A]) 14 (ΝΑΜΕΘΑ [A²]) 20 (ΝΑΜΕ[Σ]Ε[Ι]ΟΥ [B²A]) 2 Ch. 22:7. The name should probably be Amashai (a more plausible form than Amasai).³ Jehu was ben Jehoshaphat = ben Šepathi, 'son of a Zephathite'; also ben Amashai = ben Yishmaeli, 'son of an Ishmaelite.' Elijah and Elisha, who, according to different versions of the tradition, promoted Jehu's accession, were both, it has been suggested elsewhere (PROPHET, § 7), Zarephathites. Now Zephath and Zarephath are designations of the same famous place on the border of N. Arabia. See ŠHAPHATH,

¹ There is much dittography, as often (e.g., 1 S. 11) where the name of Jerahmeel' is concerned. See *Crit. Bib.*

² On these see Winckler, *GI* 1:102.

³ The initial *n* comes from dittography (accidental repetition of a letter).

TISHBITE, ZAREPHATH. Jehu (whose name perhaps = Jehoel = Elijah = Jerahmeel) may therefore have been an adventurer from the far south. T. K. C.

NINEVEH (נִינְוֵי), NINEYH [NHNEYH, NHNEYI], *Nineve*; classical H NINOC, Ass. Nīna, Nīnu; Lk.

11:32, 'men of Nineve,' ἈΝΔΡΕΣ ΝΙΝΕΥΕΙΤΑΙ 1. The [Ti.WH], Lk. 11:30 *Ninevites*; and so NINEY-ITHC [A Tob. 1:12], ΝΙΝΕΥΗΤΗC [N Tob. 2:2].

No satisfactory derivation of the name has been given; nor can be till the question has been settled whether the city was originally peopled by a non-Semitic race. The ideogram seems composed of those for 'house' and 'fish' (cp JONAH [BOOK], § 4). This has suggested to some (Tiele, *BAG* 84, 90) the connection of Istar, the city goddess, with a fish-goddess, daughter of the god Ea. A non-Semitic derivation of Ni-na-a has been attempted. So far as -na is concerned, Delitzsch was of opinion that it means 'resting-place' (*Par.* 260). We might also explain Nin-ia, 'my lady,' comparing the many by-names of Istar as 'the lady'; if it could be shown that Nin, 'lady,' had ever passed into Semitic.

Nineveh is said (Gen. 10:11) to have been founded by Nimrod in Assyria. This may be taken to assume the previous existence of the old capital Ašur. The mention with it and Calah of Rehoboth-ir and Resen as forming the Assyrian 'Tetrapolis,' may be due to a desire to balance the Babylonian Tetrapolis (in Gen. 10:10). At any rate, there is no reason to suppose that in early times these four formed a continuous city. [For the bearing of this remark and for criticism of the traditional text of Gen. 10:10-12, see NIMROD.] In later times with such historians as Ctesias and Diodorus the name Nineveh may simply have denoted a province, the Assyria proper between the four rivers. There is, however, no proof that, in the Sargonide period up to the fall of Nineveh, Calah was subordinate. Each city retained its separate *kabnu* or prefect, and in the official lists Nineveh stands below Calah. Great emphasis has been laid on the approximate correspondence of a tetrapolis formed by Nineveh, Calah, Khorsabad, and Keramlis with the dimensions of Nineveh given by Diodorus, and with a forced interpretation of the vague phrase in Jonah (3:3), 'an exceeding great city, of three days' journey.'¹ Against this must be set the results of Jones' survey of the ruins and district (*JRAS* 15:297 ff.). There is no trace of a common wall. Moreover, the separate cities of Nineveh, Calah, and Khorsabad are fortified as strongly towards the interior of the assumed city as on the exterior. In sales of land in Nineveh itself, the road to Calah is as frequently named as the 'king's highway' to Arbela.

Nineveh was situated at the NW. angle of an irregular trapezium of land which lay between the rivers Ḥusur

2. Situation. NE. and E., Upper Zāb on the SE. and S., and Tigris on the S. and W. In extent this plain is 25 m. by 15 m., and contains the ruins of Nineveh at Kuyunjik and Nebi Yūnus, of Dūr-Sargon at Khorsabad to the NE., and of Calah to the S. of Nimrūd. The whole plain has a gradual slope from the low range of Jebel Maklūb and the hill of 'Ain-eš-šafra to the Tigris on the W. This plain was for those days amply protected on three sides by the two rapid broad currents of the Tigris and the Zāb, the hills on the NE. and the river Gomel at their base. The weak NW. side was partly protected by the Ḥusur, in winter impassable but in summer easily fordable. The floods caused by the Ḥusur were frequent and destructive; on one occasion sweeping away part of the palace and exposing the coffins of the kings. A series of dams was therefore constructed (mapped and described in 'Topography of Nineveh,' *JRAS* 31:8 ff.) which controlled the floods and filled the ditches and moats of

¹ [For the probable origin of the very strange topographical note in Jon. 3:3b, see PROPHET.]

Nineveh. One of these ditches runs over 2 m. with a breadth of 200 ft. and was lined with a rampart on the city-side. To these dams there may be a reference in Nah. 26[7]. The gates of the rivers are opened.'

The city on the river-side of the Tigris extended about 2½ m., its N. wall measured 7000 ft., the eastern wall was nearly 3 m. long, and the southern about 1000 ft. The city thus formed a narrow long strip against the Tigris, pierced at right angles by the Husur, the waters of which could, by closing the great dam, be sent round the moats instead. The actual extent of Nineveh proper is about 1800 acres or about two-thirds the size of Rome within Aurelian's Wall. It would contain a population of 175,000 on the allowance of 50 sq. yds. to a person. Outside this citadel city lay the 'outskirts' (*kablu*), which seem to have had an independent municipal existence under their own *saknu* (or *sakintu* = lady-governor). Farther afield and apparently close to Khorsabad lay Rēbit Ninūa, or the piazza (see REHOBOTH-IR). In the case of a siege, doubtless the whole population of this outlying neighbourhood would take refuge within the city moats and walls.

Nineveh was first localised in modern times by Rich, Resident at Bagdād for the East India Company about 1820. Sir H. Layard by his explorations definitely fixed it at *Kuyunjik* (1845-47 and 1849-51).

The excavations were continued by H. Rassam (1854), G. Smith (1873-76), and again Rassam up to 1882. The enormous mound of Kuyunjik, separated from that of Nebi Yūnis by the Khauser, marks the site of Sennacherib's palace, covering quite 100 acres. It has been explored to the extent of about 60 rooms (5 are 150 ft. square), all panelled with sculptured slabs of alabaster. The entrances to the palace and to the principal halls were flanked with colossal winged bulls and human-headed lions some 20 ft. high. Close beside this palace was one built by Esarhaddon where the sculpture was of the finest character; but the entire building has not been explored. The mound of Nebi Yūnis, surmounted by the 'tomb of Jonah,' is a sacred spot to the Mohammedans and could not be explored properly. By sinking a shaft within the walls of a private house, however, some sculptured slabs were recovered and the Turkish government opened out, later, part of a palace of Esarhaddon. Outside these mounds excavations were made at two of the great city-gates and showed them to have been built by Sennacherib.

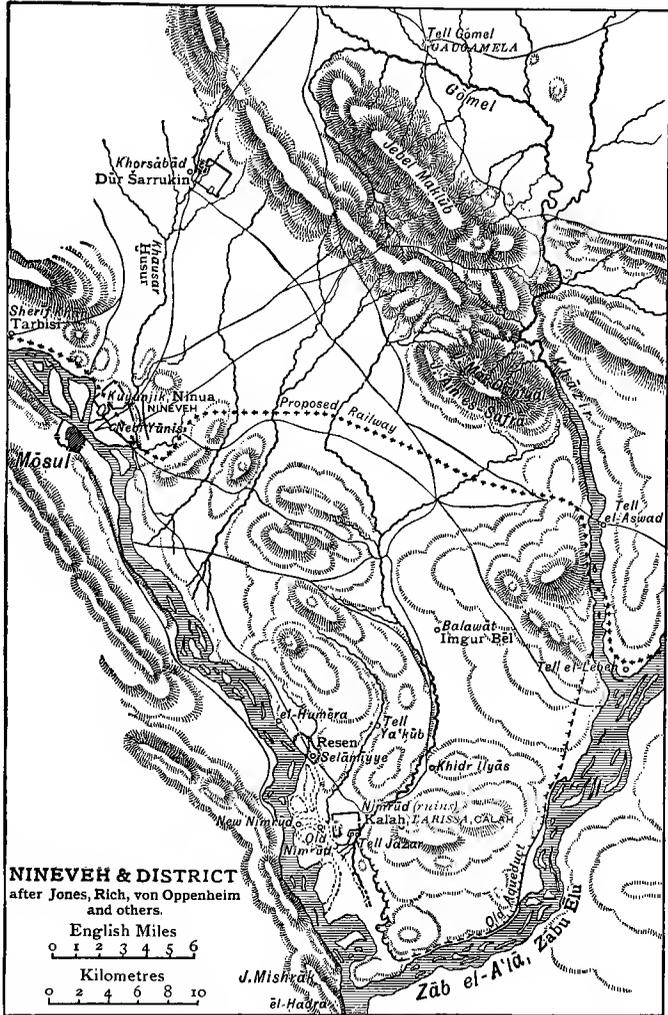

The architecture of these palaces is exhaustively dealt with in Fergusson's *Palaces of Nineveh and Persepolis Restored* (see also Perrot and Chipiez, *Art in Chaldea and Assyria*). It should be noted that each palace was in itself a fort, and would require a separate attack. The mounds formed a sort of Acropolis to the town which was walled, moated, and protected by outlying forts.

Within this enclosure and surrounding the palaces were extensive orchards and gardens. It is not possible to decide from the superficial appearance of the ruins whether any part was densely populated by dwellers in streets of houses. The houses unless all built of sun-dried brick without stone must have left more evident remains. The inscriptions, however, imply streets, as well as orchards in Nineveh, so that a house abutted on three sides against other houses.

The history of Nineveh is of course that of Assyria; but as most of the Assyrian documents known to us come from Ašur-bāni-pal's palace in Nineveh (cp

AŠUR-BANI-PAL, § II), and the Kuyunjik collections of tablets in the British Museum, include many commercial documents, there are materials from native sources for its municipal history and topography. Till these are published and understood it would be rash to dogmatise on conjectural grounds. Gudea, king of Lagaš (about 2800 B.C.), records having built (or rebuilt) a temple of Ištar at Nineveh (*KB* 35). Dungi, king of Ur (about 2700

4. History.

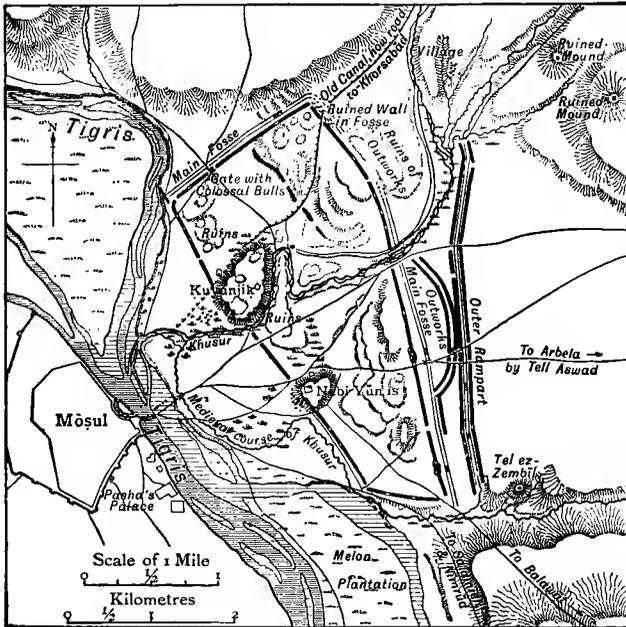

Map of Nineveh.

B.C.), left an inscription in Nineveh, unless indeed this was carried there by some Assyrian royal antiquary. The Amarna tablets (1500 B.C.) name Nineveh twice (*KB* 5; see under 'Nina'), each time in connection with Ištar. The earliest native notices are on the votive bowls of Shalmaneser I. (about 1300 B.C.). These short notices (*KB* 19; *3 R*, pl. 5, no. 3-5) are to be read in the light of Tiglath-pileser's reminiscences of Shalmaneser (G. Smith, *Ass. Disc.* 248). Shalmaneser claims to have renewed the temple of Ištar (*3 R* 5, no. 4).

From later notices we gather that Samsi-Adad (about 1821 B.C.) built a temple of Ištar, E-Maš-maš and may have renewed Gudea's. Shalmaneser I. (*3 R* 3, no. 12) relates that his father Adad-nirari (about 1845 B.C.), after an expedition into Babylon, brought back

NINEVEH

the gods of Babylon, Merodach and Nebo, and built them temples. He also built a palace in Nineveh as well as at Ašur and Calah. Mutakkil-Nusku and Ašur-reš-iši (1150 B.C.) continued to build at Nineveh. Sennacherib, however, found Nineveh still a 'wretched poor place' and to him its chief development is due. There were already a factory, an arsenal, a temple, and some fortifications. The place was short of water in summer and flooded in winter. The waters of the Tigris and the Ḥusur (*Khaur*) were unpalatable, being full of salts, and the inhabitants depended on 'the rains of heaven for drink'; Sennacherib, therefore, brought an aqueduct from the hills (*KB 2117*) right into the city. He raised both the wall and the rampart 'mountain high.' He erected there an 'unrivalled' palace (Meissner-Rost, *Bau-inschr. Sanh.*), built in two portions, one in the Hittite style, the other in the native Assyrian. This is now buried beneath the Nebi Yūnis mound. He laid out a paradise with all sorts of exotic plants, and

Plan of Nineveh.

established a kind of zoological garden. Stables for the royal stud, magazines for war-material, extensive offices for all departments of state were closely attached to the palace. At the same time he repaired the king's highway and made a new channel for the Ḥusur. As a consequence Nineveh became and remained the capital and centre of Assyrian empire and culture, soon rivalling in wealth and importance Babylon itself. Here this same king, Sennacherib, brought the chief spoils of his capture and ruthless spoliation of Babylon and other Babylonian cities. Here also he was murdered (681 B.C.). In what sense the word 'capital' could be applied to Nineveh before Sennacherib's time, it is hard to see. It was 'the court-residence' under Ašur-bēl-kala (about 1050 B.C.), who has left an inscription upon a statue found at Kuyunjik, probably that of a captured goddess. Ašur-našir-pal (about 880 B.C.) also made it his chief seat during the completion of his great works at Calah. To Sennacherib is due its position as capital without rival till its fall. Esarhaddon and Ašur-bāni-pal maintained this position. Under the last kings Ašur-edil-ilāni and Sin-šar-iškun, sons of Ašur-bāni-pal, the history of Nineveh becomes very obscure. The relations of classical authors are to be

NISROCH

received with great caution till the data of the inscriptions have been worked out.

The date of the fall of Nineveh has been placed in 608-7 B.C. It was due to the overwhelming onslaught of the Manda hordes. Whether the Baby-

5. Its fall. Ionians took any active part in its capture awaits decision. Nabonidus in his recently discovered stele (Scheil, *Recueil de Travaux*, 1815 ff., and Messerschmidt, *Mitt. der Vorderas. Ges.*, no. 1) gives us the first published inscriptional reference to the fall of Nineveh. The pious king regards it as a retribution from the gods for the desecration and spoliation of their temples by Sennacherib. He does not attribute any share in its destruction to the Babylonians, but claims the invader as an ally of Babylon, and emissary of Marduk.

Actual details as to the fall of Nineveh are scarcely to be expected from its own inscriptions. The contribution made to the question by the state of the ruins is small, but definite as far as it goes. Most of the buildings laid bare in Kuyunjik had suffered from fire; but no portion of the walls seems to have been washed away by water. The dykes and dams on the Ḥusur seem to have been the vulnerable part, and once these were broken by an unusual flood or the hostile efforts of the invader the city must have lain open to assault. A full discussion of the fall of Nineveh cannot be given here. For this and for other important archaeological and historical details the reader should consult Billerbeck and Jeremias in the work referred to below, on which, in its relation to the prophecy of Nahum, see NAHUM.

For maps and illustrations (profuse), see Billerbeck and Jeremias's 'Der Untergang Ninives' in vol. 3 of Haupt's *Beitr. z. Ass.*

See now T. Friedrich's exhaustive art. 'Nineveh's Ende' in *Festgaben* for Budinger. H. C. W. J.

NIPHS (ΝΕΙΦΕΙC [B]), 1 Esd. 5:21 RV = Ezra 2:30, MAGBISH (*q.v.*), or possibly Nebo.

NISAN (נִסָּן), Neh. 2:1. See MONTH.

NISROCH (נִסְרֹךְ; in 2 K., εδραγ [B]; εσθρ. [A]; αερ. [L]; in Is. NACAPAX [B], ACAP. [AOQ], ACAPAK [N]; Jos. APACKH [*Ant.* x.15]). An Assyrian god, in whose temple SENNACHERIB (*q.v.*) was worshipping when he was slain (2 K. 19:37 Is. 37:38). The two

most prominent explanations are: (1) to omit *n* and *ch* as, possibly, accretions, and restore אַשּׁוּר—*i.e.*, Ašur, to whom Sennacherib in his inscriptions repeatedly refers as 'my lord' (so Schr. *KAT*², 329); or (2) to read נִסְרֹךְ, the 'constr. state' of Nusku, a god connected with Nabū, and also identified with Gibil, the fire-god (so in the main Sayce, *Theol. Rev.* 1873, p. 27; Hal. *REJ.* Oct.-Dec., 1881, p. 183; Del. *Calver Bib.-Lex.*, 1893, p. 630). On Nusku, see Jastrow, *Rel. of Bab. and Ass.*; G. Hoffm. *Z.1* 11:260 ff. But to ignore *n* and *ch* altogether is hazardous. On the other hand, it is not likely that one of the less-known deities should be specified as Sennacherib's god. 'We must wait for further light,' remarks Kittel (*Dillm. Jes.* 329). Light on the name Nisroch, however, can hardly be expected, the presumption being that, like other names of Assyrian and Babylonian deities in the later narratives, it is corrupt. We may suppose it to be miswritten either (1) for אַנְמֵלֶךְ, 'Anumlech' (the 'Anammelech' of MT, 2 K. 17:31; see SHAREZER), or (2), more probably, for מַרְדּוּךְ, Marduk (the 'Merodach' of MT). The pointing reminds us of נִסְרֹךְ, which has also been lately identified with מַרְדּוּךְ.

It may be pointed out here that the name 'Adrammelech,' given to one of Sennacherib's murderers, is almost certainly, like 'Nisroch,' a corruption of נִרְכָּךְ Marduk. Probably it stood originally in the margin as a variant to נִרְכָּךְ, and made its way into the text at the wrong point. Cp Che. *Exp.* T 9 429 (1898).

Meinhold (*Jesajaerzählungen*, 1898, p. 72 f.) thinks *ach* in ❸'s form of Nisroch may represent *aku*, the Sumerian name of the moon-god. The view is as improbable as a similar explanation of MESHACH and SHADRACH (*q.v.*). T. K. C.

NITRE (נִתְרָה), *nether*: Prov. 25²⁰ [RV^{mg.} SODA]; Jer. 22[†] [RV LYE]], as now used, denotes potassium nitrate, which is often found as an efflorescence on the soil in dry hot districts. The ancients, however, certainly meant by *νίτρον* or *nitrum* a carbonate of soda (*natron*). This salt occurs native in W. Europe, Egypt, India, etc.; the natron lakes in Egypt, dreary as the country is, are visited for the sake of the famous Christian monasteries. The best natron is that taken from the low ground surrounding the lakes, which is not covered by water. נִתְרָה, *nether*, as representing a mineral alkali, is opposed to בִּרְיָה, *berith*, which represents a vegetable alkali (see LYE and SOAP). Mixed with oil, it was apparently used for washing clothes (see Jer. 22²).

What 'vinegar on nitre' (or 'soda') in the received text of Prov. 25²⁰ can mean, is not obvious. The effect of the acid vinegar on the alkali natron would be to destroy the efficiency of the latter, an idea quite unsuitable to the context. ❸ has 'as vinegar for a wound.' See Toy, *ad loc.*

NO. See NO-AMON.

NOADIAH (נֹאדִיָּה), as if 'Yahwè promises,' § 33; probably an ethnic, cp Moadiah, Maadiah, Neariah.

1. b Binnui, a Levite, temp. Ezra, Ezra 8³³ (נֹאדִיָּה [BAL], נֹאדָה [A*], נֹאדְדֵיָה [L])=MOETH son of Sabban (RV SABANNUS) 1 Esd. 8²³ (μωεθ σαβαννου [BA], νωαδῆα [L]).

2. A prophetic or (❸) prophet, an opponent of Nehemiah, Neh. 6¹⁴ (נֹאדִיָּה τῷ προφήτῃ [BN], τῷ νω. τῷ πρ. [A], τῷ ᾧ τῷ προφήτῃ [L]).

NOAH (נֹחַ); נֹוַע [BAL, occasionally נֹוַע], son of Lamech in the Sethite genealogy, chief survivor from the Deluge, and second father of mankind.

1. Name. Gen. 5²⁸⁻³² (P, but in *v.* 29 J₁), 6 8-9 17 28 (P, J, R), 1 Ch. 1 4; also the first husbandman to plant vines, Gen. 9 20-27 (J₁). Hommel has lately derived 'Noah' from *Nuh-napišti*, which he prefers to *Sit-napišti*¹ as the name of the hero of the Babylonian Deluge-story.

The ideogram (UD) before *napišti* may in fact mean 'to pacify, or quiet,' *pušūku*; and *nūhu* is a synonym for *pušūku*. In usage, however, *nūhu* is found only with *libbi* (heart) and *habitti* (liver), not with *napišti* (which, moreover, generally means 'life,' not 'mind').

It is a more important objection that the hero of the Deluge-story cannot have been the Noah of Gen. 9 20-27. Either there were two Noahs—a most improbable view—or Noah in the Deluge-story is incorrect (see below). Ball's ingenious argument in favour of Nuh-napišti (*Teacher's Bible*, 1898) is therefore unavailing. This scholar (in *SBOT, Gen.*) would correct נֹחַ into נֹחַוַע, whilst Wellhausen retaining the text imagines a second form of the name, Noham 'comforter.'² Wellhausen's view is the more plausible. It is, however, not impossible to suppose that Lamech merely plays on the name Noah (cp Gen. 17 5). He may be pointing prophetically to some refreshment which man, wearied by his labour on the ungrateful soil, will receive through Noah. Almost certainly his speech alludes to the discovery of the properties of the vine (cp the use of 'comfort' in Jer. 16 7). It is true, such a reference does not at all suit the rôle played by Noah

¹ Sit-napišti should mean 'rescue of life'; the phrases *ušt napišti* and *ana napišti usu* occur. But if Scheil's reading of a fragment of a new Deluge-story is correct the name is Pir-napišti. See DELUGE, § 2, n. 2, and § 22.

² We. *De gentibus*, 38, n. 3; cp *Ber. rabba*, § 25 (on Gen. 5 29) 'According to R. Johanan, name and explanation do not tally. Either he named him Noah, or he named him Nahman.' See further, § 3.

in the Deluge-story of J₂. However, most probably the original name of the hero of this narrative was not Noah, but Enoch; the final ך in נֹחַ became effaced, ך and ן were transposed, and, other editorial reasons probably facilitating this, the hero of the Deluge and the inventor of wine (who belongs to a narrative of human *origines* which had no Deluge) were, infelicitously enough, combined (see DELUGE). It is worth noticing that according to P the Deluge lasted 365 days—*i.e.*, a solar year—whilst 365 years are stated in Gen. 5 23 to have been the duration of Enoch's life. The coincidence is hardly accidental (cp also DELUGE, § 16, n.).

Noah, however (*i.e.*, the true Noah mentioned by J₁), was more than the inventor of wine; he represents

2. Place in legends.

the first halt, or rather the starting-point, in the migration of the group of peoples, with which J₁ connects the Israelites, from their earlier home in Babylonia, or rather (see PARADISE) in N. Arabia. He was, therefore, not a divine hero (like other mythical inventors of wine) but personifies the starting-point of the migrating Hebrews¹ which may in the original story have been placed in the Jerahmeelite Rehoboth, so that Noah would correspond to TERAH in the document on which J₂ appears to be based, just as SHEM (*q.v.*) corresponds to Abraham. There—in a soil suitable for the culture of the vine (cp NEGEB, § 7), Noah 'began to till' the ground' (Gen. 9 20)—*i.e.*, according to this early fragment he was the first nomad who became a systematic agriculturist (a duplicate therefore of Jabal). His name agrees with this. It describes him as no longer a wanderer (נָדַד; cp Gen. 4 12), but 'settled' (נָח); נָח 'rest' (= נוּחַ; cp Driver, *Sam.* xxxii.) might refer to the dispersion referred to in 11 9. His special service to civilisation was that he 'planted a vineyard.' The consequences are described in Gen. 9 21-23, and, naturally enough, are not referred to by later writers. It was enough for them that Noah was 'a righteous and a blameless man,' and, like Enoch, 'walked with God' (Gen. 6 9 P). As such he is well-known to Ezekiel (who doubtless had a fuller J_E than we have); see Ezek. 14 14 20, and cp ENOCH. He is also one of the heroes praised by Sirach (Eccles. 44 17 f.), who says that, 'in a time of extermination he became a representative' or 'successor' (הִלְחַת, *ἀντάλλαγμα*), and that 'for his sake there was a remnant.' The second Isaiah, or his continuator, mentions him as the hero of the Deluge (Is. 54 9), and several didactic references are made to Noah in the New Testament.

We can now arrive at a more definite conclusion as to the name of this personage which was originally, not

3. As eponym.

NOAHAM and NAHAMANI probably revered this hero of legend as specially their *heros eponymos*, and it may perhaps be more than a mere chance that the prophet Nahum (whose name probably sprang out of a clan-name) is called נְחֻמְכַלְכַל, which (see ELKOSHITE) admits of no certain explanation, and may plausibly be corrected into הַשְׂכֵּלִי *hā-eskōli*—*i.e.*, the Eshcolite. Cp PROPHET, § 39.

Fragments of a lost Apocalypse of Noah (mentioned in Jubilees 10 21) are to be found in the Book of Enoch; cp ΑΠΟΚΡΥΦΑ, § 17; ΑΠΟΚΑΛΥΠΤΙΚΑ, § 24, 57. In one of these (ch. 106) the birth of Noah is described, and the description suggests that in the Aggada of the time Noah had become assimilated to some extent to Enoch. He appears, in fact, just like a solar hero or even like the 'Ancient of days' himself (see Dan. 7 9; cp 10 6). See DELUGE; ENOCH; SHEM; HAM; JAPHETH. T. K. C.

¹ The suggestion of this theory is due to Budde, *Urgesch.* 446 ff. The whole chapter deserves a careful perusal; cp Kue. *Th. T.* 1884, pp. 126 ff. But the hypothesis that the earlier tradition connected the ancestor of the Israelites, not with SHINAR, UR OF THE CHALDEES, and HARAN, but with Geshur, 'Ir Kadesh, and Rehoboth (also with Hauran) necessitates a change in the geographical setting of Budde's theory.

² For שָׂרָא which cannot follow הִלְחַת, read שָׂרָא to render this, not 'to plough,' but 'to cultivate.' The same meaning is required in Job 4 8, Hos. 10 13. Cp ASS. *erešū*, 'to plant, sow, cultivate'; *ereši* (*irishi*) 'tillage' (*Am. Tab.* 55 1).

NOAH (נח); ΝΟΥΑ [so too in L for Neah Josh. 19 13], a daughter of Zelophehad (Nu. 26 33 [37], ΝΟΥΑ [F]; 27 1 36 11 Josh. 17 3). Probably the name of a town or district; cp NEAH, which, however, was in Zebulun. See HOGLAH, MENUHAH.

NO or NO-AMON ([𐤎𐤏𐤍] 𐤎) is the name of a large Egyptian town. 𐤎 in Nah. has 'part of Ammon'

1. Name. [μεισις Ἀμμων]; elsewhere Διὸς πόλις, Vg. Alexandria (rendering Amon by 'populorum'; so also AV with 'populous No').

The passages are: Nah. 38, where the past power and the recent downfall of No-Ammon are held up as parallel to the future destruction of Nineveh. Jer. 46 25 threatens with future punishment 'Amon from No (𐤎𐤏, 𐤎 erroneously, τὸν Ἀμμων (ῥῶν) νῖὸν ἀντήσ=712, Vg. *tumultum Alexandriae*), and Pharaoh and Egypt.' Ezek. 30 14-16 mentions No (No, *Hex.* in various forms) three times, once parallel with Zoan-Tanis,² twice with Sin [7 v.]. [On the possibility of going behind the present text, and recovering an older form of these prophecies, see PATHROS, § 2, PROPHEC, § 39, etc., and *Crit. Bib.*—T. K. C.]

The tradition given by 𐤎—Diospolis (*i.e.*, Thebæ, Thebes in Upper Egypt)—is doubtless correct, as the combination of No with Am(m)on the local god of Thebes sufficiently shows. Nahum, too, distinctly indicates that the great capital city of Upper Egypt is meant ('Ethiopia was her strength and Egyptians innumerable'). Less favourable to the identification is the description (*v.* 8) 'situated among the rivers (or Nile-branches?), that had the waters round about her, whose rampart was the sea, (and) her wall was of the sea' (better read: whose strength was the sea—or waters?³—and [𐤎] water her walls). Here the prophet seems to represent Thebes after the model of most Delta-cities—*i.e.*, situated on the plain on an artificial mound, surrounded by canals.

It would be difficult to use the term 𐤎 strictly in connection with Thebes, which had the Nile only on one (the W.) side. Thebes may indeed have had moats with water on two other sides, but scarcely to the E. Evidently the prophet was not acquainted with the locality of the remote city. (Brugsch, *Diet. Geogr.* 291, insisting on the encircling waters, identified No with a city in the NE. of the Delta in which he tried to find Rameses; but his only reason was that Amon once had a temple there.)

The Hebrew name No (cp the Hexaplaric form Nois) is best elucidated by the Assyrian form Ni- (+ vowel?) in Ašur-bani-pal's reports (see *Del. Par.* 318, etc.).

The Assyrian Ni is clearly identical with the Egyptian expression Nt⁴ 'the city,'—*i.e.*, 'the metropolis'—which is actually found on the monuments.⁵ Probably we should vocalise Nt'e(t).⁶

¹ Transposing and taking 𐤎𐤏 as=712. The Hexaplaric versions have 𐤎𐤏𐤍 (= 𐤎𐤏) Ἀμμων.

² Cornill reads with 𐤎 Noph = Memphis in *v.* 15 instead of No. Certainly the threefold repetition of the name without apparent reason is strange and unpoetical.

³ This connection with the 'sea' led to an absurd identification with Alexandria—'per anticipationem' Jerome said. 𐤎, 'sea,' however, can be used of large rivers such as the Nile (Is. 19 5); or we may emend into 𐤎𐤏, 'water.'

⁴ The earliest passage seems to be in the Golenischeff papyrus of the twenty-first dynasty (*Rec. Trav.* 21, 99); Spiegelberg (*op. cit.* 53) has furnished an example from about the same time. As for the pronunciation, the sign 'city' stood for *mut, mwt*; the word itself is written *ny, n*, etc. In the royal name *ψουσίνης* it appears as *ne*, in a Protocoptic text (*JZ*, 1883, p. 103) as *NE*. On the demotic form which is traceable to Roman times, cp Griffith, *Stories of the High Priests*, 97. Evidently the Assyrian and Hebrew orthography represents an earlier form. Cp Brugsch, *Diet. Geogr.* 316.

⁵ Brugsch (*G. Z.* 373, etc.) supposed as the Egyptian proto-

type 𐤎𐤏𐤍 (i.e., the consonants *nt'('t)*; vocalise approximately *nt'e(t)* (in later pronunciation), 'the great city, the capital.' The Assyrian transcription would permit also the reading 'n for 'u, necessary for this etymology. The Egyptian group of signs, however, is not found for Thebes in the inscriptions, and the Hebrew orthography, by its close identity with the Assyrian form, makes it clear that we have no 'Ain at the end.

As capital of the fourth nome of Upper Egypt, we may assign to Thebes a very high antiquity, though before the eleventh dynasty, which was of

2. History. Theban origin and resided there, it was nothing more than a mediocre country town. Its greatness begins with the rise of the New Empire. After the expulsion of the Hyksos the eighteenth dynasty adorned it with temples and palaces which found no equal in antiquity and, even in ruins, claim our highest admiration. The nineteenth and twentieth dynasties added to its splendour, though some kings now began to reside in the N. of Egypt. The succeeding dynasties neglected Thebes; but it was still the largest city of Upper Egypt, and the high priests of Amon, residing there, were unrivalled in wealth, even after the failure of their attempt (in 21st dyn.) to rule the whole country as Pharaohs. Homer's glowing description of 'hundred-gated Thebes' (*Il.* 9 382) may date from a much later time. The repeated sieges in the wars between the Ethiopians and the Assyrians seem to have largely diminished its population. It is not certain to which of these conquests by the Assyrians Nahum's oracle refers. The first—by Esarhaddon in 670—seems to have been rather a peaceful occupation; the second by Ašur-bani-pal (667) and the third (663?)¹ were accompanied by a plundering of the city, and might have impressed themselves more deeply on the prophet's mind, cp *v.* 10. Cp NAHUM, § 2; PROPHEC, § 39.

There is no evidence or probability that Cambyses exhibited himself at Thebes in that character of senseless destroyer in which he was represented to the Greeks. The Ptolemies still did some building and repairing at Thebes; but their foundation, Ptolemais (or Psois, el-Menshiyeh), which became the most populous city of Upper Egypt, seems to have contributed much to the decay of the old metropolis. The various great revolts against the Ptolemies, especially those under Ptolemy V. Epiphanes and under Ptolemy X. Soter II. (who is reported to have besieged Thebes for 3 [?] years), finally, a siege and storming by Cornelius Gallus (29 B. C.), also an earthquake in 27 B. C., did much to bring ruin to the great temples; the immense population of former times seems to have dwindled down to some scattered villages from 200 B. C. onwards. To Strabo (24 B. C.) Thebes was only a city of ruins, exactly as now. The modern ruins of Luxor, Karnak, and Medamut mark the extension of the city proper from S. to N. The suburbs on the western bank of the river may, at certain times, have been considerable; Rameses III. even seems to have built his residence at the S. end of this part (at Medinet Habu); but, in general, the W. side of Thebes (called the Memmonia by classical writers) belonged only to the dead and their worship. The long row of temples, skirting the edge of the arable land like a selvedge, from Medinet Habu to Kurnah, served only for the worship and memory of defunct kings. Behind them, thousands of tombs were hewn in the rocks of Draḥ abu-l-Negga, Shēkh 'abd-el-Kurnah, Kurnet-Murrai, etc. The kings had their tombs in more remote valleys (at Bibān el-Mulūk) which could easily be shut off by walls. The frequent attempt to explain Nahum's description of No (as surrounded by the Nile), by the situation of Thebes on both sides, is, consequently, very weak. The ancient name² is of uncertain pronunciation, probably to be read *Hēse(t)*. Why the Greeks called the city Thebes is uncertain; Lepsius's explanation by the name of the quarter of Karnak, Ōpe(t), with the article t-ōpe, is highly improbable.

The local divinities of Thebes were the triad Amon (Ammon of the Greeks, ἈΜΟΥΝ in later pronunciation),³ Mnt (or Maut), and Khonsu. Many other divinities also had temples there. In earlier times the divinity of

¹ See Winckler, *AOF* 1 480.

the neighbouring Hermonthis, Montu, held the first place also in Thebes; later, Amon¹ obtained pre-eminence and, with the rise of Thebes, became the official chief god of Egypt, a function which he kept till after the time of Alexander.

Thus he was adopted as chief deity even by the Libyan neighbours of Egypt, and the Ethiopians paid him a fanatical worship as their national god. The Greeks accordingly identified him with their supreme god Zeus, and called his city Diospolis magna (in distinction from Diospolis parva in Middle Egypt; mod. Hū). Amon has, when represented in human form, a blue skin, and bears two immense feathers on his head, evidently in imitation of the earlier god Minu of Koptos. In animal form he is represented as a ram, mostly distinguished by the sun-disk on his head, thus indicating his solar nature (which, of course, is secondary). On the vehement persecution of Amon by Amenhotep IV., who even tried to erase the name Amon on all earlier monuments, see EGYPT, § 56.

A description of the remarkable ruins of Thebes, among which the great temple of Karnak (chiefly the work of Thotmes III.), that of Luxor (built by Rameses II.), and that of Medinet-Habu (Rameses III.) are the most remarkable, cannot be given here.

W. M. M.

NOB (נֹב): **NOMBA** [BL], **NOBA** [A]; but in 1 S. 22:11 **NOMMA** [B], **NOBAΘ** [A]. The name occurs in the story of David's wanderings (1 S. 21:1 [2], 22:9 [19]), also in a vivid prophecy commonly assigned to Isaiah (Is. 10:32), and in a list of Benjamite cities (Neh. 11:32). There is also probable evidence of the existence of such a name elsewhere than in Benjamin (cp Guérin, *Judée*, 3:349).

We find a *Nūba*, NE of Fik in Jaulān, on the road to Damascus, and a *Bēt Nūba*, a little to the right of *Yalū* (Aijalon), which Robinson identifies with the *Beroannaβ* or Bethannaba of Eusebius and Jerome (OS¹², 218, 46; 90, 27), four (or, as most said eight) R. m. E. of Lydda (*BR* 364); Eusebius and Jerome themselves, indeed, connect this name with the Anab of Josh. 11:21 15:50, but are in error (see ANAB). Jerome elsewhere mentions a place called Nobe (cp MT in 1 S. 21:1 [2], near Lydda, which he identifies with Nob the city of the priests (see *BR*, *loc.*; Buhl, 198, and cp ISHBI-BENOB, NENO).

If the name Nob (hitherto unexplained) is really a mutilation of 'Anab, 'grape-town,' as suggested elsewhere (see ATHACH), we cannot be surprised at finding the name in different parts of the country. The rather difficult task remains, however, of identifying the Nob mentioned in 1 S., Is., and Neh. It may be plausibly inferred from Is. 10:32 (עִיר נֹב) and Neh. 11:32 (נוֹב [N^{c.a} mg. inf. L] BN^a A om.) that Nob must have lain a little to the N. of Jerusalem, between *Anāthā* (Anathoth) on the E. and *Bēt Haninā* (Hananiah) on the W. We require some high point from which Jerusalem shall be visible; *el-Isāwīyeh*, which has been proposed by Kiepert and others (cp Baed. (2) 117 f.), will therefore not do—indeed, this place corresponds rather to LAISHAH (*q. v.*).

The favourite sites are (1) on the ridge on the N. side of the upper Kidron valley (SW of *el-Isāwīyeh*), called by the Arabs *sadr*, 'breast' (see Valentiner, *ZDMG* 12:169 ff.; Mühlau in Riehm, *HWB*): (2) the hill of Scopus (or *σαφευ*=*ΕΨ*) from which Titus and his legions looked down on the Holy City (Wilson, *PEFQ*, 1875, p. 95; Buhl); and (3) the village of *Sha'fat*, on the hill to the left of Scopus, where Guérin placed the ancient Mizpah (Grove in Smith, *DB*; Conder, *PEFQ*, 1875, p. 183).

There has, however, perhaps been a fault of method in the investigation as hitherto pursued, and the fact that there is no trace of the name Nob either in the lists of priestly cities, or (except in a passage which must refer to the NE. of Palestine) in the Talmud,² or in the modern Palestinian topography, ought to have

¹ The etymology of the name ('the hidden one') which the priests of the latest time assumed, certainly does not give the original meaning. Perhaps, like the representation (see above, § 3), the name has some connection with the god Minu of Coptos. Unaccented, it becomes Amēn. The Amarna tablets write *Amanu*.

² See Neub. *Geogr.* 23; Buhl, 96.

awakened the suspicions of critics. In the present state of criticism we cannot make any use of Neh. 11:32, for the list in which Nob occurs is too probably the composition of the Chronicler, and in *v.* 32 the mention of Nob (omitted in BN^a A of 6) is evidently suggested by Is. 10:32.

We have to ask, therefore, Does the name Nob really occur in Is. 10:32? The answer must be in the negative. In both parts of *v.* 32 there are clear indications of corruption.

3. Criticism of Is. 10:32. The text should run *בְּנִבְתָּ אֱלֹהִים יַעֲקֹב*

'on the hill of God he takes his stand,' and at the end of the verse the inappropriate and superfluous phrase *בְּנִבְתָּ אֱלֹהִים* is a corruption of *בְּנִבְתָּ אֱלֹהִים* 'hill of God,' which was originally a marginal correction of the faulty reading which opens *v.* 32. Was there any specially sacred hill in the line of march between Geba (now *Jeba'*) and Jerusalem? Of course, it has to be very near the city. There is one—the northern summit of the Mt. of Olives, identified elsewhere (see DESTRUCTION, MOUNT OF) as 'the summit where one worships God' (2 S. 15:32) and 'the mountain of those who worship' (2 K. 23:13 emended text). It is noteworthy that Dean Stanley (*Sin. and Pal.* 187) had already proposed this summit as the site of the city of Nob. Probably there were houses near the sanctuary; but there is no evidence of the existence of a town there.

Nob is also said to be referred to in 1 S. 21:22 22:9. In the first two passages, however, the Hebrew text has *נוֹבָה*, which it is arbitrary to explain as

4. Nob in 1 S. meaning 'to Nob' (with the locative ending), because not only here, but also in 22:11 19:6 recognises a dissyllabic name. One is at first inclined to read the name Nubbah and to identify the place with *Bēt Nūba* (see above); but the situation of *Bēt Nūba* is unsuitable; the 'priests' city' (1 S. 22:19) cannot have been very far from Gibeah of Saul (1 S. 22:9). Poels (see reference below) thinks that Nob was the name of the summit, on which the sanctuary of Yahwē stood, and that towns (*viz.*, Gibeon and Kirjath-yearim) stood on either side of this hill. This is too bold, but points in the right direction. Plainly Gibeon is meant.

נוֹבָה is a corruption of *בְּנִבְתָּ* or *בְּנִבְתָּן*; from 2 S. 21:6 (We., Dr., Bu., Löhr, also H. P. Sm., read *בְּנִבְתָּן בְּרִדְתָּ יְהוָה*) we learn that Gibeon stood on or near 'a mountain of Yahwē.' Poels acutely points out that the dread act of vengeance in 2 S. 21, which was too important an event to have escaped record in the life of Saul, must have been the massacre related in 1 S. 22. 'In Gibeon, on the mountain of Yahwē,' the offence of Saul was expiated by his children.

Nob, therefore, the 'city of the priests,' where Ahimelech of the house of Eli ministered (1 S. 21:1 cp 14:3), and where David deposited the sword of Goliath (in 1 S. 17:54¹ 'in his tent' should be 'in the tent of Yahwē' בְּתֵּהוּ יְהוָה), was Gibeon, where, according to tradition, was 'the greatest high place' (1 K. 3:4). No inferior sanctuary can be intended; no other name than Gibeon (or Gibeah) can be the original of the mutilated and corrupted form Nob. This view will be confirmed if the view presented elsewhere respecting the Shiloh where Eli ministered be accepted. See GOB, SHILOH.

Besides the usual helps, cp H. A. Poels, *Le sanctuaire de Kirjath-yearim: étude sur le lieu de culte*, etc. (Louvain, 1894).

NOBAH (נֹבָח); Judg., **NOBA** [B], -**ETH** [A], -**BE** [L]; Nu., -**BAY**, -**BOETH** [BAL], **NOB** [Vg.].

1. A (Manassite?) clan which conquered KENATH, and gave it the name of Nobah (Nu. 32:42). Cp MANASSEH, § 9.

2. A place on Gideon's route in his pursuit of the Manassite kings (Judg. 8:11). Though it is mentioned together with Jogbehah, this does not prove that the two places were near each other. See GIDEON, § 2, where reason is given for accepting the view that Nobah is the mod. *Ḥunawit*, in Ḥaurān, NW. of Ṣālbāh (see KENATH); old names have a tendency to reappear.

T. K. C.

¹ 'To Jerusalem' should be 'to Saul' (לְשֹׁאֵל).

NOBAI (נֹבַי, Kt., or **Nebai**, נֹבַי, Kt.; ΒΩΝΑΙ [BN], νοβαί [AL], one of the signatories of the covenant (Neh. 10.19). He corresponds to the fifty-two 'men of the other Nebai' (Neh. 7.33), or 'of the other Nob' (Meyer). 'Nobai' should either be 'Gibeon' (גִּבְעוֹן), or better—see NEBO—'Nedabi' (נִדְבִי). T. K. C.

NOBELS. The rendering of:—
 1. הֲזֵרִים, *hōrim* (lit. 'free', an Aramaism). The 'elders and nobles' of Jezreel are twice referred to in the story of Naboth's judicial murder (1 K. 21.11, where Ki. regards הֲזֵרִים as a late post-exilic gloss, but cp *D. Intr.* 188); and the 'nobles and rulers' of Jerusalem are frequently conjoined in the narrative of Nehemiah (Neh. 2.16 48.13 [14.19] 5.7.7.5). As Wellhausen (*JG* 190) and Meyer (*Ent.* 132) have pointed out, *hōrim* and *sgānīm* (סְגָנִים) seem to be used as convertible terms (Neh. 6.17 compared with 12.40, 13.11 with 13.17). In Is. 34.12 (400 B.C. or later) reference is made to the *hōrim* of Edom, and in Eccles. 10.17 the land is said to be happy whose king is 'the son of nobles', RVmg. 'a free man'. (⊕ renders ἄνθρωποι, except in 1 K. 21.8.11 [A; om. B], Neh. 13.17 Eccles. 10.17 ελευθεροί, and Is. 34.12.) See further, GOVERNMENT, § 26.

2. אֲדִירִים, *addirim* (אֲדִיר, 'to be wide, great'), are referred to in Nah. 2.6 (EV 'worthies', AVmg. 'gallants') 3.18 (RV 'worthies', AVmg. 'gallant ones') Jer. 14.3 (Judah and Jerusalem) Jer. 25.34.36 (figurative) 30.21 (RV 'prince') Zech. 11.2 Neh. 3.5 (of Tekoa) 10.30. The nobles of Judah took part with the 'captains of hundreds' and the 'governors' at the coronation of Joash (2 Ch. 23.20). ⊕ has μεγιστάνες thrice, ἰσχυρότεροι once, δυνάσται (2 Ch.), δυνάσται (Nah. 3.18), and ἀδωρημέ [BN], -ρημ [A] (Neh. 3.5).

3. פַּרְתִּיָּים, *partenim* (cp Pers. *fratama*, 'first'; but Sym. and Pesh. translate 'Parthians,' and the originality of the reading פ is strongly questioned in *Crit. Bib.*), Dan. 1.3 (AV 'princes') Esth. 1.3 6.9. (⊕ has ἐνδοξοί in Esth.; in Dan. ἐπιλέκται [cod. 87], φορητομμε[ε]λυ, πορ. [BQ], A Theod.)

4. 5. נָגִיד, *nāgid* (Job 29.10), נָגִיד, *nāgid* (Nu. 21.18, etc.). See PRINCE.

6, 7, 8. אֲצִילִים, *āšilim* (Ex. 24.11, 'the chosen ones'? but see BDB, *s.v.*), גָּדוֹל, *gādōl*, lit. 'great one' (Jon. 3.7), נִקְבָּד, *nikkād*, lit. 'honoured one' (Ps. 149.8, cp Is. 23.8.7).

9. שָׂבֹת, *šābōt*, Is. 43.14. See *S.BOT*, 'Is.', Heb. ed., *ad loc.*

10. נִזְרִי, *nizri*, Lam. 4.7, RV; see NAZIRITE, § 3. The NT terms are:

11. βασιλικός, Jn. 4.46, lit. 'king's officer,' so RVmg., and
 12. εὐγενής, Lk. 19.12, EV **nobleman** (in Job 1.3, ⊕ for no. 7).

NOD (נֹד), Gen. 4.16. See CAIN.

NODAB (נֹדָב); ΝΑΔΑΒΑΙΩΝ [BA], ΝΗΔΑΒ. ΚΑΙ ΝΑΔΑΙΩΝ [L], the name of a tribe which adjoined the trans-Jordanic Israelites, 1 Ch. 5.19 (see HAGRITES). It is mentioned together with Jetur and Naphish, who in Gen. 25.15 [P] and 1 Ch. 1.31, are two of the last three sons of Ishmael, the last-named son being Kedemah (*q.v.*). Very possibly נודב, Nodab, is equivalent to נַדַב, Nadab, a Jerahmeelite name. Kedemah, being doubtless a corruption of Jerahmeel (see KADMONITES, REKEM), is a fitting alternative for Nodab.¹ Blau ventures to find an echo of Nodab in the village *Nudēbe*, SE. of the Bošra in Haurān. T. K. C.

NOE (ΝΩΕ [Ti. WH]), Lk. 3.36, etc., RV NOAH (*q.v.*).

NOEBA (ΝΟΕΒΑ [BA]), 1 Esd. 5.31 = Ezra 2.48, NEKODA, 1.

NOGAH (נֹגַה), as if 'sunrise,' § 72, a son of David, 1 Ch. 3.7 14.6 (נַגַּא, -גַּה [B], נַגַּע, -ה [A], -ר [14.6 (N)]); נַגַּה, נַגַּה [L]. In the parallel list 2 S. 5 the name is omitted in MT (similarly Ⓞ), it is supplied in L (נַגַּה) and in B's second list (נַגַּה); cp ELIPHELET, 1, and see DAVID, § 11 n.

NOHAH (נֹחָה), 'rest'; 1 ΩΔ [B], ΝΩΔ [A], ΝΟΥΔΔ [L], a name in a genealogy of BENJAMIN (*q.v.*, § 9, ii. β), 1 Ch. 8.2; perhaps corrupted from Naaman (cp JQR 11.109). Cp MENEHAH.

NON (נֹן), 1 Ch. 7.27. See NUN.

NOOMA (ΝΟΟΜΑ [A]), 1 Esd. 9.35 RV = Ezra 10.43, NEBO, iv.

NOPH (נֹפִי) occurs frequently in the prophets as one

¹ Precisely so the improbable נונת in Ps. 22.25 [24] may be an error for נַגַּה.

of the principal cities of Egypt. Thus in Is. 19.13 it is parallel with Zoan-Tanis, in Jer. 2.16 with

1. Name. Tahpanhes, which proves that it must have belonged to northern Egypt. Jer. 44.1, enumerating the places where colonies of fugitive Jews had been formed in Egypt, proceeds from N. to S. (Migdol, Tahpanhes, Noph, Pathros); Ezek. 30.16 (Sin [read Syene?], No, Noph) seems to arrange from S. to N.

Hitzig, Smend, and Cornill try, however, to correct the name here. ⊕ reads its consonants but does not recognise the name; Memphis, however, in Qmg. (see Swete) Sym. Vg. Syr. On the other hand, Cornill wishes with ⊕ to read Nophi, z. 15, instead of No, so that Noph would stand parallel with Sin.

Jer. 46.14 (Migdol, Noph, Tahpanhes) does not seem to be arranged in strict geographical order; but the repetition of the statement that Noph belonged to those cities in which the exiled Jews settled is important, confirming the position near the Eastern frontier of Egypt. Ezek. 30.13 mentions it, evidently, as the most important city where 'the princes of Egypt' reside. All this points to Memphis, which the versions read for Noph throughout. Strangely, the correct orthography is found in MT only in one passage, Hos. 9.6, where Moph (מֹף)—only here—AV MEMPHIS, following the versions) is the principal city or, perhaps, the political capital of Egypt to which the Jews shall be led back. [On the (possible) underlying text see PATHROS, § 2, PROPHET, and *Crit. Bib.*—T. K. C.]

The consonants Noph of MT were defended by de Rougé (*Rev. Archéol.* New Ser. viii. 127; Lepointant, 1.1 22.15; E. Meyer, *GA*, § 350), who tried to explain Noph as Napata. This ought, however, to have the ending -i, -ti; moreover, Noph is a city of Egypt, not of Ethiopia; no Jews would flee to Napata, etc.

The name of the city¹ is written in Egyptian *Mn-nfr*,² vocalise *Men-nöfer*, later *Men-nufe* or shortened *Men-nefe*, *Menfe*. This abbreviation was borrowed by other nations as *Méμφis* (in *Memphis* on coins; cp Targumic *Mēphis*), Assyrian *Mempi*, *Mimpi*. The Copts wrote *Menbe*, *Membe*, *Mem*, *Mefe*, whence Arabic *Manf* (sometimes *Munf*?) and later *Māp̄he*.³ Thus we should expect the pronunciation *Mēph* in Hebrew; the present punctuation Mōph, Nōph needs explanation.⁴ On the etymology in Egyptian, see below (§ 2).

Memphis is one of the most ancient cities of Egypt—that is to say, a small city, called 'the White Wall'

2. Origin. In the earliest times as the capital of the first nomos of Lower Egypt. In it stood the temple of Ptah which gave the city (and later Memphis) the sacred name *Ha(t)-ka-ptah*, 'temple of Ptah's likeness,' whence the name 'Egypt' seems to be derived (cp EGYPT, § 1). The antiquity of the temple and of the quarter of Memphis in which it stood was proverbial.⁵ The later Egyptians used to call king Menes the founder (Herod. 2.99), and that claim is observable already on inscriptions of the nineteenth dynasty.⁶ Whether it is historical truth may remain an open question; Herodotus' report of Menes' making a large dyke, 100 stadia S. of Memphis, is certainly erroneous. It is questionable whether any kings resided in the vicinity before the third dynasty. Manētho calls the third dynasty Memphitic, and, to judge from the pyramid of king Zoser at Sakḳārah, its kings built very near Memphis. We can then, with the following 'Memphitic' dynasties of Manētho, notice a continual shifting of the royal palaces and court-cities (traceable now only by the pyramids which were built W. of those residences) in that region

¹ Brugsch, *Dict. Géogr.* 259.
² 
³ See L. Stern, *Z.A.*, 1885, p. 148.
⁴ After the analogy of No? מֹף may also have become *מֹף and then *מֹף, whence מֹף.
⁵ Cp Pap. Anastasi, iv. 6.3.
⁶ *Z.A.* 30, 1892, p. 44, calling the god 'the Ptah of Men-na.' What name is intended by the Uchoreus whom Diodorus calls the founder of Memphis is uncertain.

from Mēdūm in the S. to Abu-Roāsh in the N. Finally, the great king Pepy (Apopy?) I. of the sixth dynasty built his tomb and city directly W. of the 'White Wall'; and this city lasted and imparted its name to the resulting complex of earlier and later settlements. From that time dates the history of Memphis, under the classical name—*i.e.*, from the time when the pyramid *Men-nefer*, 'good-resting',¹ was erected. Although the old temple of Ptaḥ-Hephaestus and the surrounding quarter, forming a kind of citadel by its separate wall, was always recognised as the city proper and furnished the religious name (see above), the new name *Men-nefer* (ⲙⲛⲏⲉⲩ), even in the latest time, always written with the sign of the pyramid, prevailed.

Memphis was situated some 10 m. S. of modern Cairo, W. of the Nile. By position, between northern and southern Egypt, near the S. end of the Delta, it was well suited for being the capital. The mounds at the modern villages of Mit-Rahineh² and el-Bedrashēn mark the principal part of Memphis; that it really ran 150 stadia from N. to S. (Diodorus) is doubtful. The mounds of Abadiyeh and En-Nagidiyeh seem to mark the N. end of the city proper. Besides the quarter mentioned above, we read of those of 'the Southern wall,' of 'the balance of both countries,' of 'the life of both countries.' 'The life of both countries,' situated on the bank of the river, contained, around the temple of Ptaḥ Nefer-ḥo (*i.e.*, 'fair of face'), a Phœnician settlement, with a temple of the 'foreign Aphrodite' (=Astarte?). The description in Herod. 2.112 does not enable us to determine whether this 'camp of the Tyrians' was a bazaar of the foreign traders or a colony of deported captives given to the temple as serfs. The many divinities and sanctuaries to which the inscriptions and the classical writers refer cannot be enumerated completely here. They include the local divinity Ptaḥ (figured in human form, usually standing, and explained as the 'divine workmaster,' and creator of the world as demiurgos), who had three different forms and three large temples here. Sokaris was the local god of the western part, therefore of the necropolis (near the modern Saqqārah, which name is, possibly, the same as Sokaris; cp ISSACHAR, § 6). The latest theology tried to find the emanation of the combined Ptaḥ-Sokaris-Osiris in the famous Apis (*ḥap*) bull. Originally, this black bull with various mysterious marks, after whose death a search for a successor was held throughout all Egypt, sometimes for a long time, must have been a separate local divinity.³

Memphis was the most important city of Egypt and the principal royal residence until the rise of the eighteenth (Theban) dynasty. The kings of

3. History. the eighteenth dynasty began to neglect Memphis; but they still resided there occasionally, and the second place among all Egyptian cities remained undisputed to it. It does not seem that the storming by the Ethiopian P[i]ankhy, by the Assyrians, by Cambyses, etc., depopulated it very much. It outlived Thebes and Sais, and continued to be populous among the Ptolemies, who treated it as a kind of second capital, although Alexandria drew off all wealth from it. They even were crowned there (cp Rosetta Inscription, l. 7, etc.) as pharaohs. Sinking very slowly in population, Memphis survived as a city until the Arab conquerors built a new capital very near it, on the opposite bank of the Nile, as Fostāt or Old Cairo.

This completed the depopulation of Memphis. The stones of its old palaces and temples were conveyed to the new capital; modern Cairo, too, has been very largely built with such

¹ Also the etymology *mnw-nfr*, 'good monument,' occurs (Petrie, *Denderah*, vii. 13 r). Later etymologies like *ōpmos* (= *mn*, Coptic *monē* ἀγαθὸν (nfrw) or *rāphos* Ὀσίριδος (as 'the good god'), given by Plutarch (*de Iside*, 20), are worthless.

² From an Egyptian name meaning 'alley of sphinxes' (after W. Spiegelberg). One of the mounds is said still to have the name Tel(l)Munf.

³ The Apis-tombs near Saqqārah were discovered by Mariette in 1851.

material. Thus the ruins of Memphis, still described by 'Abd el-latif (about 1200 A.D.) and Abulfeda as very remarkable, have disappeared almost entirely. Of the city itself nothing of general interest remains but two large fallen monolithic statues of Rameses II., probably identical with the statues described by Herodotus and Strabo as flanking the entrance to the great temple of Ptaḥ. The immense necropolis, on the border of the desert, has been better preserved, containing the three great pyramids and smaller remnants of some forty others, the mysterious, gigantic sphinx of Gizeh, and thousands of tombs (although the earliest and most remarkable of these monuments did not belong to Memphis proper; see above).

W. M. M.

NOPHAH (נֹפַח), a place in Moab, mentioned with Medeba in Nu. 21.30.†

The text, however, is very uncertain. Ⓞ has *καὶ αἱ γυναικες* (ἀνδρῶν) ἐπὶ προσεξέσκαυσαν πῦρ ἐπὶ Μοαβ; *i.e.*, נֹפַח becomes נֹפְחֵי Delitzsch, Dillmann, and Strack prefer שׁוֹן נֹפַח עַר 'so that fire was kindled as far as Medeba,' whilst G. A. Smith (*HG*, 560), suggests עַר-נֹפַח, and changes עַר מִדְבָּרָא עַר מִדְבָּרָא 'on the desert' (cp Pesh.).

NORTH, NORTH QUARTER, NORTH [UTTER-MOST PARTS OF THE], NORTH WIND. See EARTH [FOUR QUARTERS OF], and WINDS; also CONGREGATION [MOUNT OF], and cp BAAL-ZEPHON, 1.

NOSE JEWEL (נֶזֶן), Is. 3.21, and **Nose-ring** (נֶזֶן), Judg. 8.24 RVmg, EV 'earring,' Exod. 35.22 RVmg, EV 'earring.' See RING.

NOVICE (ΝΕΟΦΥΤΟΣ; *neophytus*; 1 Tim. 3.6†). A better rendering would be 'neophyte,' literally 'newly planted,' 'newly put forth,' 'a fresh sprout.' The meaning is, as AVmg. has it, 'one newly come to the faith.' The metaphor is sufficiently explained by the use of νεόφυτον to render נֶזֶן, נֶזֶן, נֶזֶן, n'ṭi'im, in Job 14.9 Ps. 144.12 Is. 5.7, and נֶזֶן, sāthil, in Ps. 128.3. νεόφ. is used by Aristophanes (Pollux); also in Egyptian papyri of second century A.D. (Deissmann, *Neue Bibelstudien*, 48).

The classical adjective *novicius*, almost equivalent to *novus*, and applied to new wine, to a slave who has recently lost his freedom, and the like, became, in ecclesiastical language, the technical term for a candidate for admission to a coenobium, whilst *neophyte* was applied to all the newly baptised (νεοφύτοι).

NUMBER. The Hebrews, like the other Semites, expressed numbers by the decimal system. That system was devised before the separation of the Semites from the Hamites, since it is common to all the Semitic peoples and to the hieroglyphic Egyptian. The names even of some of the numerals are the same in the two families of languages.

Thus in Semitic 'two' is expressed by the root *šn, tn, ṭn*, in Old Egyptian, Coptic, and Tamašeq by *sn*; 'six' in Semitic by the root *šš* (contracted [except in Ethiopic]—*e.g.*, Heb. *šš*), in Hamitic by *sds* (which appears in Tamašeq, though contracted in Egyptian to *ss*): 'seven' in N. Semitic by *šb*, S. Semitic *sb*, Egyptian *sf*; 'eight,' Semitic *šm, smn, tmm, ṭmm*, Coptic, *smn*; 'nine,' N. Semitic *ts*, S. Semitic *ts*, Tamašeq *tw*.

The method of treatment also is the same; in both the tens are formed from the units by using the plural of the former.¹

The native Hamitic system is, therefore, the decimal. Behind this there lay a quintal system based on the fingers of one hand. This is still found in some of the languages of the more backward of the Hamitic races, as the Bedja, Bilin, and Chamir (cp Müller, *op. cit.*, 306). In the Semito-Egyptian group the decimal system had developed before their separation.

The Sumerian system of numbers was sexagesimal. The measurements of time in Babylonia, where day and night were divided into six equal parts, cannot, as Ihering has pointed out, have arisen among a people who used the decimal system, not, therefore, among Semites. His theory that these divisions of time arose in keeping the time of labourers² is, however, superficial. There are sexagesimal systems in many parts of the

¹ Cp Erman, in *ZDMG* 46.93-129, and his *Ägyptische Grammatik*, 150-147; Steindorff, *Ägyptische Grammatik*, 157 ff.; Brugsch, *Grammaire Hiéroglyphique*, 32-35; Zimmern, *Vergleichende Grammatik der semitischen Sprachen*, 179-182; and Friedr. Müller, *Grundriss der Sprachwissenschaft*, Bd. III., Abt. II., 305.

² Cp Ihering, *Evolution of Aryan*, 121 ff.

world. They originate in a mystical addition of zenith and nadir to the four points of the compass.¹

As the early Semitic Babylonians borrowed their system of writing from the Sumerians, they also to some extent borrowed this system of numbers. From the period of the oldest known writing, the Semites, who appear to have been in Babylonia in prehistoric times, mingled elements from their decimal system with the sexagesimal. This is shown by the presence of a special sign for ten.² In later inscriptions the decimal system gradually supplants the other. Thus in the Mesopotamian valley the native Semitic system reasserted itself.

Among the Hebrews, so far as we know, it was the system always in use; but before the time of the Macca-

2. The Hebrew system. Hebrews expressed numbers by figures. Numbers were, during these centuries, written in words. This is the case on the Moabite Stone, in the Siloam Inscription, and throughout the OT, including the Book of Daniel. In later Hebrew numbers were expressed by letters of the alphabet; but no such notation for numerals as that used by the Phœnicians appears among the Hebrews.³

At an early time in the history of man certain numbers were regarded as having a sacred significance. In this respect the Hebrews were no exception. Three, four, seven, ten, twelve, forty, and seventy were either sacred or had a symbolical force.

Three (שָׁלוֹשׁ, *šālōš*; Syr. *šālth, ṣpēš*) is the simplest of these numbers, and was widely considered sacred. It was

3. Three. so regarded by the Babylonians before the birth of the Hebrew people, and its sacred character in Israel may be due to Babylonian influence, unless—as is probably the case—it goes much farther back to primitive Semitic society. One of the earliest indications of it in Babylonia is the great triad of gods, Anu, Bel, and Ea, which appears in the inscriptions of Gudea, about 3000 B. C. They represent respectively heaven, earth, and water.⁴

Probably the origin of the sacredness of the number three is to be found in the fact that to primitive man the universe appeared to be divided into the three regions represented by these gods. This cause rendered the number sacred among the Vedic peoples of India.⁵

Its sacred or symbolical use among the Hebrews the following instances will illustrate:—David is given the choice of three plagues into each of which the number three enters (2 S. 24:13 1 Ch. 21:12);⁶ Elijah stretches himself on the dead child three times (1 K. 17:21); Daniel prays three times a day (Dan. 6:10); Tartarus is divided into three parts (*Eth. En.* 22:9); there are three princes of Persia (1 Esd. 3:9); Ezra waits three days for a vision (2 [4] Esd. 13:58 14:1); the plagues of the Apocalypse destroy a third of all that they attack (Rev. 8:9 and 12); the twelve gates of the heavenly city face three towards each of the points of the compass (*Eth. En.* 34:2 35:1 and 36:1-2, also Rev. 21:13); and at last the divine nature is under the same influence conceived by the early Christians as a trinity (Mt. 28:19).

Multiples of sacred numbers came in time to have a sacred or symbolical character, as twenty-one (*Eth. En.* 69:2), thirty (*Slav. En.* 36:1 f.), thirty-six (*Eth. En.* 90:1), and many others. Connected with the symbolical character of three is its use to indicate that a course of action or a series of events has passed a normal point (Am. 1 and 2 Prov. 30:15-31 and 2 Esd. 16:29-31).

³ See Lidzbarski, *Nordsem. Epigr.* 1:198 ff.

⁴ Cp. Jastrow's *Religion of Babylonia and Assyria*, 107 ff.; and King's *Babylonian Religion*, 14.

⁵ Cp. Hopkins, 'The Holy Numbers of the Rig Veda,' in *Oriental Studies of the Oriental Club of Philadelphia*, 141 ff.

⁶ MT in 2 S. 24:13 reads 'seven years'; but this, as Houghigant saw long ago (1777), and all recent critics agree, is a mistake for 'three,' which 3 and Ch. have preserved.

The sacredness of four (אַרְבָּע, *arbā'*; Syr. *arba'*; *τέσσαρες*) was probably derived from the fact that the compass has four cardinal points. It is re-

4. Four. garded as sacred in widely different parts of the world more often than any other number (cp *Amer. Anthropol.* 1:155). Cp the Bab. phrase 'the four quarters of the world' (*kibrat irbitta*, see EARTH, § 1); and in connection with this note the Hebrew ideas about the four winds (see WINDS) and the singular theory of the origin of the name Adam in *Or. Sib.* 324-26, *Slav. En.* 30:13 f. (ed. Charles, 41). The number came to denote completeness or sufficiency, which accounts for many biblical details. Thus there are four rivers of paradise (Gen. 2:10); Jephthah's daughter is bewailed four days (Judg. 11:40); Nehemiah's enemies sent to him four times (Neh. 6:4); God sends four kinds of pestilence (Jer. 15:3) or four sore judgments (Ezek. 14:21); four horns scatter Judah (Zech. 1:18 f.); four angels of destruction are sent from heaven (Rev. 9:1, 15).

The number four is used similarly (though by no means exclusively) in the measurements of sacred furniture—e.g., in Solomon's temple (1 K. 7), in Ezekiel's temple (Ezek. 41:43), in the tabernacle of the P document (Ex. 25 ff. and 36 ff.).

In like manner the guardians or bearers of the throne of God appeared in fours to different seers (Ezek. 1 and 10 *Eth. En.* 40:28 Rev. 4:68 5:68 14:6 15:7 19:4).

Multiples of four were also used. Thus we have twenty-eight in the measurement of the curtains of the tabernacle, forty as indicated below (§ 8), four hundred used to express the idea of a large number (Gen. 15:13 Judg. 21:12 and often), and 400,000 in great exaggerations (Judg. 20:2 17 2 Ch. 13:3).

Seven (שֶׁבַע, *šebā'*; Syr. *šbā', šprrā*), the most sacred number of the Hebrews, was also sacred among the

5. Seven. Babylonians, where seven planets were known and each represented a god,¹ where there were seven evil spirits,² and the underworld was surrounded by seven walls.³

The greetings in the Amarna tablets show that seven had a sacred significance in Palestine at an early date, and indicate that it was also sacred in Egypt. We know that it was held sacred in India by the Vedic people (Hopkins, *op. cit.*). The sacredness of seven probably originated in the fact that it is the sum of three and four, but among the Babylonians a great impetus must have been given to its use by the fact that there were seven sacred planets; by the influence of Babylon it became very popular with other Semites.

Ihering (*Evolution of the Aryan*, 113) holds that the Sabbath was of Babylonian origin and arose from the sexagesimal system, which we have seen was native with the Sumerians. They worked six days and rested the seventh. If this be true, possibly we should see in it the primary cause of the sacredness of seven. Cp SABBATH. Some anthropologists hold that seven arose from a sacred six by the addition of unity (cp M'Gee, *op. cit.* 663 f.).

The most liberal application of the number seven among the Hebrews is found in comparatively late Apocalypses, where direct Babylonian influence is probable—e.g., the seven planets appear (*Slav. En.* 27:3); seven planetary deities (*Eth. En.* 21:3-6); there are seven heavens, one for each planet (*Slav. En.* 3 to 20); seven circles of heaven (*Slav. En.* 48:1); then the earth and moon are divided into seven corresponding parts (*Eth. En.* 73:5-8; 2 [4] Esd. 6:50 52). The week of seven days, early associated with the seven planets,⁴ gave to P the idea of the creative week (Gen. 1:1-2:3). From these came the notion that seven enters into the constitution of man—he is made of seven substances and has seven natures (*Slav. En.* 308 f.). Corresponding to this is the conception that there are seven rivers in the world and seven islands, and that frosts come from seven mountains (*Eth. En.* 77:4-8).

¹ Jensen's *Kosmologie*, 101 ff.

² Jastrow, *op. cit.*, 264.

³ Jeremias, *Bab.-Ass. Vorstellungen vom Leben nach dem Tode*, 15.

⁴ Jensen, *loc. cit.*; Gunkel, *Schöpfung und Chaos*, 301.

The sacred character of seven shows itself in every period of the Hebrew ritual; we hear of seven altars built, seven sacred wells, seven lamps, blood is sprinkled seven times, etc. (Gen. 7 2 f. 21 28-30 1 K. 18 43 Dt. 16 9 Ezek. 40 22 41 3 Lev. 14 Nu. 23 and 29 *passim*, and elsewhere). Cp BEER-SHEBA, § 3; WRS *Rel. Sem.* (2), 181 f.

Closely connected with this is the thought that seven days is a sacred or fitting period of time (cp Gen. 8 10 12 50 to Exod. 7 25 Lev. 8 33 Dt. 16 4 Josh. 6 *passim*, Ps. 126 [7] Apoc. Bar. 20 5 2 [4] Esd. 7 30 f. Acts 21 4 27 Heb. 11 30, etc.).

From this usage seven came to express a complete or round number (Job 1 2 Mic. 5 5 Esth. 1 20 29 1 Esd. 8 6 Tob. 3 8 2 Macc. 7 1 Mt. 22 25-28 Mk. 12 20-23 Acts 6 3 19 14 etc.). Once (Dt. 7 1) seven is equated with 'many.'

Ten (עשר, 'éser; Syr. 'ésar, δέκα) had a certain symbolic character, in part because it was the basis of the decimal system, and in part because it is the sum of three and seven.¹ Its simplest use is to denote a round or complete number, as ten lambs, ten shekels, ten men, ten virgins, ten talents, etc. This usage runs through both OT and NT (cp, e.g., Gen. 21 10 22 Josh. 22 14 Judg. 17 10 2 K. 20 9-11 Job 19 3 Jer. 41 2 2 [4] Esd. 5 46 Mt. 25 1 28 Lk. 19 *passim*, Rev. 2 10 etc.).

A more sacred use of ten is found in the ritual. Not only were there tithes, but also sacrifices and many implements of the sanctuary were arranged in tens (Exod. 26 16 Nu. 7 28 and 29 *passim*, 1 K. 6 and 7 *passim*, 2 Ch. 4 *passim*, and Ezek. 45 *passim*).

Because of this sacred character ten is used in apocalyptic symbolism (Dan. 7 20 24 Rev. 12 3 13 1 17 3 12 16). Twelve (יָסֵד עֶשְׂרִים, 'šēnūm 'āsār; Syr. 'krē'sar, δώδεκα) derived its sacred character from the fact that it is the product of three and four, helped no doubt by the fact that the Sumerian sexagesimal system had made the number of months twelve. The most obvious application of its originating principle is found in the fact that the gates of heaven (cp Gen. 28 17) were conceived as twelve—three facing each of the four points of the compass (*Eth. En. 34 2 35 1 36 1 f.* and Rev. 21 12-14). From each of these in turn the sun goes forth (*Eth. En. 7 2 3 Slav. En. 14 and 15 passim*). Of kindred nature is the idea that the tree of life bears a fruit for each of the twelve months (Rev. 22 2).

Because the number was sacred the tribes of Israel were made up to twelve (Gen. 35 22 42 13 32 49 28 Nu. 1 44). That this was in part an artificial reckoning, the shadowy existence of some of the tribes, as Simeon, shows. Similarly the tribes of Ishmael were made twelve (Gen. 17 20 25 16). See GENEALOGIES I., § 5; TRIBES.

Many representative men and things were made to accord with the number of the tribes (Ex. 24 4 Nu. 17 2 6 Josh. 4 *passim*, etc.). For this reason the 'disciples' were twelve (Mt. 19 28).

The number twelve for all the reasons given entered into Hebrew ritual (Ex. 15 27 Nu. 33 9 Lev. 24 5 Nu. 7 *passim*, Jer. 52 20 f. Ezek. 43 16 etc.).

As a symbolic number twelve was chosen to express completeness (2 S. 2 15 1 K. 10 20 Rev. 12 1).

The OT tribal usage and the NT apostolic are combined in the Apocalypse and produce twenty-four (Rev. 4 4 10 5 8 11 16 19 4).

Forty (אַרְבָּעִים, *arbā'im*; Syr. *arb'īn*, τεσσαράκοντα) was a symbolic, if not a sacred number. Its simplest use is to denote a somewhat indefinite period of time the exact length of which was not known. Thus the wilderness wandering was forty years (Ex. 16 35 Am. 2 10 5 25 Ps. 95 10 etc.); but cp Moses, § 11, e. Probably this and several similar periods (e.g., Judg. 3 11 5 31 8 28 13 1 and 1 S. 4 18) are intended to represent a generation, since the period from the Exodus to the building of the temple is counted (1 K. 6 1) as 480 years or twelve generations.² In some instances a semi-sacred character attaches to forty; thus Moses was

¹ M'Gee would seem to account for it as nine plus unity (i.e., 6+3+1). Cp *op. cit.* 664 672.

² Cp Moore, *Judges*, xxxviii.

in the mount forty days (Ex. 24 18 34 28); Elijah fasted forty days (1 K. 19 8); Christ did the same (Mt. 4 2 Mk. 1 13 Lk. 4 1 f.); and the ascension occurred after forty days (Acts 1 3).

Seventy (εβδομήκοντα, *šib'im*; Syr. *šab'in*, ἐβδομήκοντα) has a sacred or symbolical meaning in five cases. Seventy palm trees grow in an old sacred spot

9. Seventy. (Ex. 15 27); here 7 x 10 seems to be the origin of the number; seventy elders of Israel go up into the mount (Ex. 24 9, J), and out to the tent (Nu. 11 24 f., E); in the latter passage Eldad and Medad (27. 26 f.) make up the number to seventy-two; 6 x 12 or six for each tribe is, therefore, probably its origin here, though the former explanation is also possible if Eldad and Medad are not included; seventy 'souls' go down to Egypt (Gen. 46 27 Ex. 1 5 (P) and Dt. 10 22: in these passages the number is made up artificially to the ideal 7 x 10);¹ seventy years (Jer. 25 11 f.), or weeks of years (Dan. 9 24 f.), must elapse before the restoration of the kingdom (i.e., 7 x 10 years); and seventy disciples are sent forth (Lk. 10 1 17). On the seventy, or seventy-one, or seventy-two peoples of the Table of Nations (Gen. 10), and on subsequent Jewish and Christian beliefs, S. Krauss has written with great fulness of learning (*ZATW* 19 1-14 20 38-43 [1899, 1900]; cp Driver, *Deut.* 355 f.).

In Lk. 10 1 the reading is uncertain and the explanation difficult.

Many MSS, including NAEL and other authorities read *ἐβδομήκοντα* (so Treg., Tisch., Weiss), whilst BDMR and many other authorities read *ἐβδομήκοντα δύο* (so WH). The number may perhaps be chosen to represent the peoples of the earth, each of which should have a Christian messenger; cp Dt. 32 8, where 6 makes the number of peoples equal that of the angels² (בְּנֵי יִשְׂרָאֵל instead of בְּנֵי יִשְׂרָאֵל). Cp, however, Zahn, *Einl.* 2 392.

Two other numbers fall to be considered here on account of the use made of them in the Apocalypses.

(a) The first of these is three and a half, with its derivatives. Scholars agree that the 'times, time, and half' is a time (עֶרְבַּן וּפְלִי עֵין), Dan. 7 25;

10. Three and a half. כְּשֶׁרֶשֶׁת יָמִים, Dan. 12 7; καιρὸν καὶ ἡμισυ καιροῦ, Rev. 12 14), also the half week of Daniel 9 27, stand for three years and a half. Meinhold (*Dan.* 304) holds, on the basis of Dan. 9 27, that the three and a half is a broken seven.³ Cornill holds that its origin is to be found in the three and a half years of the persecution of Antiochus.⁴ If we could be sure of a Hebrew origin, one of these explanations might be accepted. Gunkel has, however, with great probability traced the origin of this number with other apocalyptic imagery to Babylon, and holds that the three and a half represented the half of Kislev, and the three months, Tēbēt, Shēbāt, Ādār, the time from the winter solstice to the festival of Marduk—the time covered by the period of winter—i.e., the period of the supremacy of Tiamat.⁵ If this be its origin, the application to the years of oppression, on which all scholars are agreed, would be most natural, as would also its explanation as a broken seven (Dan. 9 27). There have been various attempts to define more precisely the three and a half: the 2300 evenings and mornings (= 1150 days: Dan. 8 14); 1290 days (Dan. 12 11); 1335 days (Dan. 12 12); with these we should put the 1260 days of Rev. 11 3 12 6 and the 42 months of Rev. 11 2 13 5. Scholars who insist on the unity of Daniel explain these differences of statement in that book by supposing that the author conceived the coming of the kingdom as a progressive event, the different stages of which are

¹ Cp Dillmann, on Gen. 46 27.
² According to Stade (*ZATW* 5 300 [1885]) and Bertholet (*ad loc.*), who prefer 6's reading, Dt. 32 8 is perhaps an interpolation, as reflecting a late belief.
³ So also Behrmann, *Dan.* 50, and von Gall, *Einheit d. Dan.* 92.
⁴ *Sieb. Jahrwochen Dan.* 22 f.
⁵ *Schöpfung und Chaos*, 309 f.; cp CREATION, § 16 (b).

NUMBERS (BOOK)

indicated in these numbers.¹ The theory of composite authorship affords a more satisfactory explanation.

On the most probable view of the composition of Daniel (cp *JBL* 17:62-72), the original use of three and a half is in 7:25, where פֶּלֶא means 'part,' not necessarily 'half.' This writer, imbued with Babylonian learning, drew from Babylonian material. His own explanation—1150 days—is given in 8:14. A less well-informed writer, imbued only with Hebrew lore, related it to Heb. imagery in ch. 9, making it a broken seven (v. 27). The final editor and two later glossators are responsible for its introduction into ch. 12, and its varying explanations in vv. 11-12.²

The numbers mentioned in Revelation are clearly interpretations by the NT writer of the three and a half of Daniel.

(b) The second number referred to above (§ 10) is 666 (χξς', ἑξακόσια [-ιοι -ια] ἑξήκοντα ἕξ, Rev. 13:18), variant, 616 (Iren. v. 30:1). Not to mention un-

11. Six hundred and sixty-six.

critical interpretations of this number which find in it references to the Pope, to Napoleon, etc., the following explanations may be noted:—(1) Briggs' explanation: a 'straining after the holy number seven and falling short of it in every particular, marking the beast, therefore, and his subjects as deceivers.'³ (2) Λάτρεως = 666 (Iren. v. 30:3), which makes the Beast the Roman empire. Cp Clemens' similar theory and van Manen *Th. T.* 35:477. (3) Nero Cæsar (נְרוֹן קְסָר = 666) has been widely accepted since the omission of the final ך of Nero would give the variant 616.⁴ (4) Völter thinks Trajan Hadrianus or Hadrian the meaning (מַדְרִיָּאן = 666, another spelling being מַדְרִיָּאן = 616).⁵ (5) Zahn⁶ and Spitta⁷ hold 616 to be the original and Caligula to be the beast (Καλιουλα = 616). (6) Gunkel holds that the number originated, like other apocalyptic material, in Babylon, and originally referred to Tiamat or Primeval Chaos (תְּהוֹם קְרִמְוִיָּה = 666).⁸ Other modern explanations which need not be enumerated here may be found in Zahn, *Einl.* 2:622-626.

Of these solutions (2) and (5) hold that this part of Revelation was written in Greek. If, as many recent interpreters hold, and rightly, it was written in Hebrew, these explanations would not be adequate (cp APOCALYPSE, § 13). Of the others, that of Gunkel (6), in view of the Babylonian origin of apocalyptic material which he has proven, gives the best explanation. The number would be likely to be perpetuated because it fell just short of the sacred number seven at all points, and would naturally be applied by apocalypticists to persecutors like Nero (3) and Hadrian (4). When translated into Greek the explanation of Irenæus (2) would be very natural. The application to Caligula (5) may have been made in some form in ancient times, but could only have been made through the Greek.⁹

¹⁰ In certain ancient lists of the OT books Numbers stands third, changing places with Leviticus; see Sanday in *Stud. Bib.* 3:241.

NUMBERS (BOOK)

The corresponding Hebrew name is הַקִּישׁ הַמְּקוּרִים.¹ Book of Musters, Numbers (lit. 'the mustered men,' 1:23 etc., cp 14:29); the book is more commonly cited by a catchword from the first sentence, מְקוּרֵי אוֹרֶבֶר.²

The Book of Numbers covers, in the chronology of the Pentateuch, a period of more than thirty-eight years; viz., from the first of the second month in the second year of the Exodus (1:1) to the latter part of the fortieth year (33:38, cp 20:23-29).

Chaps. 1-10 record things that were done and laws that were given in the wilderness of Sinai; 10:11-20:13, the departure from Sinai and what happened in the way and at Kadesh, the sending out of the spies and the unsuccessful attempt to invade Canaan from the south; 20:14-27, the departure from Kadesh, the circuit around Edom, the conquest of the Amorite kingdoms E. of the Jordan, and the hostility of Moab, down to the appointment of Joshua as the successor of Moses shortly before the death of the latter; 28-36 contain additional laws and ordinances given in the plains of Moab.

In contrast to Leviticus, which is entirely legislative, and in its present form belongs as a whole to the priestly stratum of the Hexateuch, Numbers, like Exodus, combines history and law; JE and P are both represented; the method of composition and the character of the redaction, also, are similar to those in Exodus. Chaps. 1-10:28 and 25:6-36 (with the exception of a few verses in 32) belong wholly to P; in 10:29-25:5 P and JE are united. It will be most convenient to begin our investigation with the latter chapters.

The thread of JE's history of the Exodus, which was dropped in Ex. 34, is here resumed. Nu. 10:29-32 is

from J; the sequel, Hobab's consent (cp Judg. 1:16 4:11), has been omitted.

2. JE: Chaps. 10:29-12. The following verses 33* 35 f. are probably from E; 34 is a late gloss dependent on 9:15 ff.* In J Nu. 10:29-32 probably followed closely upon the command to set out from Sinai for Canaan, Ex. 33:1a; the Yahwistic legislation, which a redactor has incorporated in Ex. 34, originally stood at an earlier point in the narrative. Nu. 10:33 ff. may come, in like manner, from E's account of the departure from Horeb which is ordered in Ex. 32:34a; but the original sequence of E has been too much disturbed by additions as well as by redaction to admit of a confident rearticulation. In the following chapter the clamour of the multitude for flesh and the sending of the quails (11:4-13 15 18-24a 31-34) is from J; but there are indications that the original narrative has been expanded by different hands; 7-9 are not improbably an archæological gloss; amplification is suspected in both 18 ff. and 31 ff.; it has been conjectured that 10:6-12 15 originally stood in connection with Ex. 33:1.⁴ The inspiration of seventy elders, who share with Moses the gift of prophecy that they may assist him thus in bearing the burden of the people (16 f. 24b-30) has nothing to do with the miracle of the quails; it follows the representation of E in Ex. 33:7-11 (the tent without the camp), and is perhaps a younger counterpart (E₂) to the appointment of judges in Ex. 18:13-26.⁵ The destruction of the murmurers at Taberah (1-3) is also probably from E; 35 is a fragment of the itinerary, cp 12:16. Chap. 12 is related to 11:16 f. 24b-30, and may perhaps be regarded as a caution against erroneous inferences: no matter how many inspired prophets there may be, Moses is the organ of revelation in a unique sense (cp Ex. 33:11 [E] Dt. 34:10 [R_D]). What the Cushite woman in 12:1 has to do with it is not clear.⁶

¹ Origen in Eus. *HE* 6:25 Ἀμμοσφρακιδεῦ; *M. Yōmā* 7:1, *M. Mēnāchōth* 4:3, *Sōtā* 36b etc.

² Jerome, *Pröl. Gal. Vespertaber*: Massora.

³ Verses 35 f. are included in modern editions between inverted *nūns*, which serve the purpose of brackets. As early as the second century the verses were marked off in some way to show that they are misplaced; see R. Simeon b. Gamaliel in *Siphra*, Nu. § 84. In Ⓞ they stand before v. 34. See Harris, *JQR* 1:136 f.; Blau, *Masoret. Untersuch.* 40 ff.; Ginsburg, *Introd.* 342 f.

⁴ Bacon, *Exodus*, 141 ff.

⁵ The rare word מְשָׁרֵם (v. 25) seems to connect these elders with the מְשָׁרֵם of Ex. 24:11; Wellh. *CHD*, 102 n.

⁶ The Cushite wife plays a considerable part in Hellenistic midrash. See also MOSES, § 4, ned.

NUMBERS (BOOK)

In the account of the spies the narratives of P and JE are combined; to the former belong 13^{1-17a} 21^b 25
3. Chaps. 13 f.: 26a (to Paran) 32 14¹ f. (in part) 5-7 (9a) the spies.¹ 10 26-38 (with additions by R_P). The threats of Yahwè and the intercession of Moses, 14¹¹⁻²⁴, are a secondary element in JE, probably R_{JE}; note the resemblance to Ex. 32:7-14 and the quotation of Ex. 34:6 f. in 17 f. In the remainder of the chapters (JE) two strands appear² (most clearly in 13^{17b} f.), but even with the aid of Dt. 1:29-45³ a clean analysis is scarcely possible. In one account (E) twelve men are sent up into the hill-country of the Amorites (cp Dt. 1:20); they go as far as the Valley of Eshcol and bring back specimens of the fruit of the land, and report on the population of the different regions of Palestine (13^{17c}: 18 in part, 20 23 f. 26b* 29 33*); in the other (J) men are sent up into the Negeb, penetrate to Hebron, and bring back word that the land is flowing with milk and honey, but the people are strong and dwell in fortified cities (17^b, 18 in part 19 22* 27* 28). Caleb gives his vote for an immediate invasion; but his companions declare the undertaking impossible (30 f. J). The people are dismayed and propose to return to Egypt (14^{1*} 3 J 4 E); 14⁸ f., commonly attributed to J and regarded as part of Caleb's speech (18:30), are perhaps originally a remonstrance of Moses (cp Dt. 1:29-31) in E (8^b R_{JE}). The transpositions which have been proposed are then unnecessary. The secondary passage 14¹¹⁻²⁴ (cp Dt. 1:34-40 and P in Nu. 14:26 f.) seems to have supplanted—perhaps in part incorporating—the sentence of Yahwè, only 25^b (E, cp Dt. 1:40) remaining. The sequel, 39^b-45, seems to be from E, with some editorial amplification and change; cp J in 21:1-3. [Cp MOSES, NEGEB, § 7.]

The destruction of Korah and his supporters by fire from heaven (16^{1a} b* 2 3-11 16-24 26a 27a* 35) is from P.

4. Chap. 16: though not all of the same age (see below, § 11); the usurping of the Reubenites Dathan and Abiram against Moses, and their fate—the earth opening and swallowing them up with all that belonged to them—from JE (cp Dt. 11:6). Doublets in the narrative (see especially 32 f.) suggest that both J and E have been drawn upon, and many attempts have been made to separate the two strands.⁶ Others recognise but one source, more or less amplified by later hands in 13 f. and 28 f.; the indicia point on the whole to E (Schrader, Kuenen, etc.). The beginning of the story is not intact; we do not learn what these men had said or done before Moses summoned them, nor are the antecedents of 15 clear.

With P's account of the drawing of water from the rock in 20:1-13, which is dependent on JE in Ex. 17:1-7,

5. Chaps. 20 f.: are combined fragments cognate to one of the sources of the narrative in Ex.; these (1^b* 3a 5 26^b) are generally attributed to J. The name (Waters of) Meribah attaches to Kadesh (Ezek. 47:19 48:28 Dt. 32:51);⁸ the narrative is, therefore, in

¹ See Kusters, *Historie-beschouwing*, 37 ff.; Oort, *Th. T.* 3:251 ff. (1869); Kayser, *Vorexilisches Buch*, 81 ff. (1874); E. Meyer, *ZATW* 1:139 (1881); Kue. *Th. T.* 11:545 ff. ⁸ So Dt. 33:2 also is rightly emended; cp 6.

NUMBERS (BOOK)

place here rather than before the advent at Sinai.¹ The other name, Massah, associated with Meribah (Ex. 17:7 Dt. 33:8), gives rise to difficult questions (see MASSAH AND MERIBAH). From Dt. 9:22 it may be inferred that in JE the provocation at Massah also followed the departure from Horeb.² P must once have contained a clearer account of the fault of Moses and Aaron than we now find; see v. 24 27:13 f. Dt. 32:51. The negotiations with Edom, 20:14-21, are in the main from E (cp 21:21-23); 19 f., which sets in afresh, is probably an expansion, rather than a fragment of J as has been surmised. The conflict with the Canaanites, 21:1-3 (cp Judg. 1:16 f.), is from J, a counterpart of 14:41-45; the fiery serpents, 4^b-9, from E, connecting with 20:22a. The following itinerary is derived from JE (cp P in 33); it is not complete—a fragment which probably preceded 12 is recognised in Dt. 10:6 f.—nor unitary; the phenomena are attributed to composition (18^b-20,³ or the whole of 16-20⁴ being ascribed to J) or to extensive interpolation; 18^b-20 anticipate, and bring us to the same point we reach in 22 f. The poetical *pièces justificatives* in 14 f. 17 f. 27 f. are noteworthy. The war with Sihon, 21:31, is generally assigned to E; 24^b 25 seem to be foreign to the source, perhaps containing a fragment of J, 26 a later editorial note; 32 is connected with 24^b (6, Jazer), and in diction shows affinity to Judg. 1 (J); 33-35 are an addition derived from Dt. 31-3.

Chaps. 22-24 are wholly from JE; only 22:1 is from P, and the reference to the sheikhs of Midian in 22:4 7.

6. Chaps. 22-24: perhaps R_P—others suppose that they were named in J. The story of Balaam⁵ was contained in both J and E; 22-25 (the speaking ass) is from J, and the antecedents of this version appear in 2-21 where many doublets give evidence of the union of two sources (cp 3a 3b, 2a 4b, etc.),⁶ in one of which (E) Balaam is summoned from Pethor in Syria (5^b, cp 23:7 Dt. 23:4 [5]), in the other (J) from among the neighbouring Ammonites (5c, Sam. Pesh. Vg.). God's revelation in the night (8 ff. 19 f.) has characteristic marks of E; 17 f. (cp 24:11-13) is from J, to which source 7 also, with a more or less considerable part of the preceding verses, and probably 11, is to be ascribed. The four oracles in the following chapters fall into two groups, distinct in the form of introduction and somewhat different in character, especially when manifest instances of contamination and redactional adjustment are set aside.⁷ Those in 24, as is now generally recognised, are from J, the two in 23 from E;⁸ a harmonistic connection imitated from 23:11-14 is made by R_{JE} in 23:27-30; in 22:35 also the same hand is seen. Additions have been made to the last oracle, probably in two stages, 24:20-22 and 23 f.;⁹ on the age of these verses see BALAAM, § 6.

Chap. 25:1-5, describing the seduction of the people by the Moabite women, is from JE (cp Hos. 9:10);

7. Chap. 25:1-5: doublets indicate the presence of more than one source, 3a 5 may be ascribed to E. The conclusion, the nature of which may be inferred from 4 5 (cp also Dt. 4:3 f.), was omitted by R_P, who put in its place—as an instance of the execution of 5—the story of the sin of an Israelite prince with a Midianite woman and its consequences

¹ In Ex. 17:6 'Horeb' is premature; cp 19:1 f.

¹⁰ Kue. *Th. T.* 18:527 f.

(6-15), sacrificing at the same time the introduction of the latter; 1-5 itself is perhaps not unmutilated.

We know from Dt. 3:12 ff. (see especially 18-20)¹ that JE contained the allotment by Moses to Gad and Reuben

8. Chap. 32: of the conquered territories E. of the territories of Jordan, on condition that their armed contingent should co-operate with the other tribes in the subjugation of western Palestine.²

Such an account is found in Nu. 32, but it is not easy to say how much of the deuteronomist's source—presumably E—has been preserved in it; 20-27, which in substance corresponds most nearly to Dt. 3:18-20, can hardly in its present form be ascribed to either E or J. The phenomena seem to indicate that a late author has rewritten the account, following in the main the representation of his source and to some extent employing its phraseology; 28-32 is from P. Verses 6-15 belong to an advanced stage in the history of the redaction.³ In 39:41 ff. we have fragments of J, of the same kind as several disconnected notices in Josh. and Judg. 1; Budde puts them with Josh. 17:14-18; whether other parts of 1-5 or 34-38 are taken from the older narratives is questionable.

The sources from which J and E drew their materials are of various kinds and values.⁴ The invitation to

9. Ultimate sources of J and E. Hobab (10:29 ff.) preserves the memory of the historical relation of Israelites and Kenites; the story of the spies (13 ff.) indistinctly reflects the fact that Caleb alone reached its seats about Hebron from the S.; the settlements of Machir and Jair (32:39-42) and probably also the cities of Gad and Reuben (34-38) represent tribal movements or territories at a later time. The poems in 21 are ancient; whether they are rightly interpreted is another question. The traditions of the sanctuary at Kadesh do not yield as much as might be expected—little more indeed than the fact that it was long the religious centre of the tribes, some memories of conflicts with the population of the Negeb, and the legend of the origin of the copious fountains, the Waters of Meribah, which Moses by miracle caused to spring from the rock; the name ('controversy'), originally perhaps equivalent to the later 'Ēn mishpāt (Gen. 14:7), suggested the 'controversy' of the people with Moses.⁵ Other stories are explanations of names; so TABERAH ('burning') and KIBROTĥ-HATAVAĥ ('graves of desire,' 11); the origin of the bronze serpent (21:4 ff.) is an etiological legend of a different kind.⁶ Stories with a distinct purpose are the prophesying elders (11), Miriam's leprosy (12), the fate of Dathan and Abiram, and of Korah (16). A theory of the relations of Israel to the neighbouring peoples finds expression in the embassies to Edom (20:14 ff.) and to Sihon (21:21 ff.); cp also the story and prophecies of Balaam (22-24).

In Nu., as in Ex. and Lev., it is plain that P is not the work of one author nor of one age.⁷ In Nu. 27:12-14 we come to the end of Moses' career; we are, in fact, at the same point which is reached in Dt. 32:48-52 (P). In the redaction of the Pentateuch these verses could stand only after the promulgation of the law beyond Jordan and the last admonitions of Moses (Dt.), and they were accordingly transposed to that place, where comparison shows that they are preserved in their primitive form; their original position in

⁷ See *EXODUS* (BOOK), § 5, LEVITICUS, §§ 2, 32.

P, however, was in Nu., immediately preceding the installation of Joshua (27:15-23); after this nothing is in order but the ascent of Abarim and the death of Moses, P's account of which is preserved in Dt. 34.¹ On the other side, the position of the second census, with its close—the generation of the exodus had now all passed away—indicates that the late author (P₂) found the command to Moses (27:12 ff.) in this place. It follows that Nu. 28-36 are out of place, and there is a strong presumption that they contain supplementary matter appended by later hands at the end of the book.

An examination of the chapters in detail confirms this presumption. Nu. 28-29:40 (30:1) is a highly elaborated novel to P's calendar of feasts in Lev. 23 (28:3-8=Ex. 29:38-42). Chap. 30, on vows by persons who are not *sui juris*, embodies a restriction the necessity for which can only have grown out of the increasing religious independence of women; formulation and diction are late. Chap. 31, the vengeance taken on the Midianites (cp 25:16-18), with precedents for the purification of warriors and the division of the spoil, has all the characteristics of historical midrash, resembling parts of Judg. 20 and numerous chapters in Ch. The author of v. 26 felt the inappropriateness of the introduction of this story after 27:12 ff. Chap. 32, the assignment of territories E. of the Jordan to Gad and Reuben, has been touched upon above (§ 8). It there seemed probable that the chapter is based upon an older source (E?), but it is in the main the work of a writer of the priestly school not far removed in age from the author of the preceding chapter; 6-15 are not improbably still more recent; they presuppose 13 ff. substantially in their present composite form.² Chap. 33:1-49, a list of the marches and encampments of Israel from Rameses to the Plains of Moab, professedly written by Moses (?), is in fact a compilation by a late author not from P alone but from other sources in the Hexateuch (especially Ex. 15:22 ff., 27 Nu. 11:34 ff., 21:10 ff., Dt. 10:6 ff.).³ Others suppose that a list originally found in P₂ has been extensively worked over and interpolated by later editors.⁴ In this difference of opinion the position of the list in this appendix is not without weight. Several of the names do not elsewhere occur in the Hexateuch.⁵ The compiler has been singularly unfortunate in the place he has given to 36-40. Chap. 35:50-56; extermination of the Canaanites.⁶ The hortatory character of the verses is foreign to P; 50-53 shows both in the introductory formula and in contents affinity to H (cp Lev. 26:1—*maskith* only in these two passages—30:19:4); 54 has been brought over from 26:53 ff.; 55 is to be compared with Josh. 23:13 Judg. 2:3 (for the figure cp also Ezek. 28:24). The verses, with their composite reminiscences, were prefixed by a late redactor to 34. Chap. 34: boundaries of Palestine, designation of a commission to divide the land among the tribes. The chapter seems to be supplemental to 26:52-56, itself secondary. In what remains of P's account of the division of the land in Josh. there is no allusion to such a commission (cp Josh. 18:2 ff. JE, and 14:1 ff. P), nor are the actual N. and S. boundaries the same; cp also Ezek. 47:13-17 48:1. Chap. 35:1-8, forty-eight cities assigned to the Levites—including the six cities of refuge first mentioned in 2:11; the execution of these directions is found in Josh. 21. The provision conflicts with 18:21-24 26:62, according to which the Levites were to have no landed inheritance. Chap. 35:9-34; cities of asylum and law of homicide (see Josh. 20). The law corresponds in substance and intent to Dt. 19:1-13, cp also Ex. 21:12-14. The casuistic formulation is foreign to P, and resembles Ex. 21 or Lev. 25; nor is the phraseology consistently that of the priestly legislation. The phenomena suggest that the present law is founded upon a law of homicide and asylum derived from H, or one of the collections which served as the sources of H. The older *torah* are in part preserved with little change (see, e.g., 16 ff.); two strata of editorial additions may be recognised, one akin to R_H (see especially 33 ff., and observe the introductory formula, 9 ff.), the other a late representative of P's school, to whom is to be ascribed the making of the 'congregation' judges (cp Dt. 19:12) and perhaps the substitution of the amnesty at the death of the 'high priest' for an older general pardon by a new king. Chap. 36; heiresses must not marry out of their own tribe, is a novel to 27:1-11 (see also Josh. 17:3 ff.); like the latter, in the form of a case decided by Moses. It is dependent also on Lev. 25:10 ff. (reversion in the Jubilee year), though the bearing of this provision is not altogether clear.

Thus Nu. 28-36 appears to belong entirely to the younger strata of the priestly law and history.

By no means all of P in Nu. 1-27 was contained in the History of the Sacred Institutions, or belongs to the oldest stratum of priestly legislation. The lack of unity is conspicuous in the several passages which have for their subject the setting apart of the Levites for the

service of the tabernacle; viz., 147-53 (cp 233) 35 ff. 4 85-26 17 [17 16 ff.] 181-7. The three passages in 1 3 and 4 have to do with the numbering of the Levites, their substitution for the firstborn of Israel, and the assignment of specific duties in the removal of the tabernacle to the three Levite clans, Gershon, Kohath, and Merari. At least three strata can be distinguished; 2 the oldest is 35-70 11-13, later than this is 14-39 40-44, youngest of all 4; the simple and general commandment of the first is successively amplified and heightened; 416-20 seems to be later than 1-15 21-49. Chap. 85-26 is younger than 4; note the lower age of entering the service (824, cp 4 1; see also I Ch. 23-24 26), the extravagant purifications (86, cp Lev. 148 ff.; 17, cp 19), and the symbolical 'waving' (11 13); 156-22 23-26 are probably a supplement to 5-154. In Nu. 181-7 there is no allusion to a previous choice and consecration of the Levites; the definition of their duties and careful discrimination of their office from the priesthood are superfluous after 314 ff. 4 85-26 and even after 35-13; 181-7 must therefore be ascribed to a different source. The relation of 181 ff. to 16 f. (contention about the priestly prerogative) seems to indicate that it was at this point that P_G (see col. 2081, n. 3) introduced the assignment of the Levites to the service of the sanctuary. The older representation of P in 16 is that Korah (a Judean) at the head of two hundred and fifty princes of the congregation opposes the exclusive claims of Moses and Aaron to the priesthood; all the congregation is holy. In the attempt to vindicate their claims they perish (1612 2 [except the first words] 3-7a 19-24 [except the words 'of Korah, etc.] 27a 35). A later redactor transformed Korah and his companions into Levites who aspired to specifically priestly functions, and otherwise worked over the story (especially in 8-11 16-18), adding 36-40 [17 1-5].

The story of the plague (1641-50 [176-15]) and the miracle of the rod that budded (171-11 [16-26]) have the same purpose; they prove that Yahwè has chosen the family of Moses and Aaron to minister to him. The latter is perhaps a later addition; 1712 f. [27 f.] connect better with 1641-50 [176-15], and on the other side contain the premises of 181-7. Chap. 181-7 exhibits some duplication—in part contamination from 3, 4 f.—and other evidence of retouching by late hands.³

The rest of 18 deals with the support of the clergy; the dues of the priests (8-20), the people's tithes to the Levites (21-24), and the tithe of the Levites to the priests (25-32). The long catalogue of priestly perquisites (cp Lev. 1012-15) presents extreme claims;⁴ it is natural to suspect that an older and more modest tariff has been enlarged, but in its present form the passage appears to be homogeneous, unless we might regard 19 f. as the original nucleus.⁵ The tithe to the Levites (21-24) is connected by 22 with 1-7 1712 f. [27 f.] and the older form of P in 16 (Korah and his companions not Levites); the verses show dependence on Ezek. 4410 13. The tithe of the Levites to the priests (25-32) exhibits some features which suggest that an older *tôrâh* underlies 25-28 at least.

The gifts of the princes (ch. 7) were made 'on the day that Moses made an end of setting up the tabernacle' (110 84 88); the place for the chapter, therefore, is immediately after Ex. 40. On the other hand, the reference to the census (2), the names of the princes (12 18 24 etc.), the wagons for the transport of the tabernacle given to the Gershonites and Merarites but not to the Kohathites (3-9),⁶ presuppose Nu. 14.

¹ See We. CH⁽²⁾ 178 ff.; Kue. Hex. § 6, n. 35. For the general literature see LEVITES.

² See We. CH⁽²⁾ 179 ff.

³ Dependence on Ezek. 44 is also apparent.

⁴ See Wellh. Prol.⁽⁴⁾ 150 ff.

⁵ Cp 59 f.

⁶ The use of wagons is not contemplated even in the late chap. 4, nor in 1017.

The whole character of the chapter stamps it as one of the latest products of the school to which the amplification of Ex. 35-40 is due; six whole verses are repeated verbatim twelve times with only the change of the donors' names.

Chap. 1 f. are in great part a mechanical enlargement of an older and much briefer text, reminding us in this respect of Ex. 35-40 Lev. 8; more than 13. Chap. 1 f.; one stage in the expansion may be observed. The order of the tribes in 1 and 2 presents curious variations;¹ 2, which brings Judah to the head of the list, is the younger; the parenthetical introduction of the results of the census in the general orders of Yahwè to Moses concerning the encampment is singularly inept; the circumstantiality of the whole is characteristic of the epigoni of the priestly school (cp, esp., 4 7). The order of march is given also in 1013-28, at the moment of departure from Sinai (1011 f.),² and that is the place at which, according to the usual method of P_G, we should expect to find it; but 1013-28 exhibit syntactical peculiarities which indicate a very late date; it has been surmised (by Dillmann) that these verses have supplanted an older text. The details of the census in 1 also appear to be elaborated by later hands; the order of the tribes in 17-47 differs from that in 5-15, and agrees with 2 in the peculiar position of Gad (but cp 6); observe also the relation of 144-47 to 23 f. The oldest stratum of P in these chapters may have contained no more than the command to number Israel, and brief statistics of the several tribes with their totals.³ The relation of this to the census of 26 will be considered below (§ 15).

The rule regarding the passover is given in the form of a precedent, the decision by Moses of a case brought before him at the passover of the second

14. Chap. 9 f.: the postponed passover, etc. year. The date in 91 conflicts with 11, where we are already two weeks beyond the Paschal season. An old *tôrâh*, in a formulation akin to H, is incorporated—with much expansion—in 106-14, and traces of phraseology kindred to H rather than to P are easily discerned in 2 ff. under that of P_S. Verses 15-23; the cloud over the tabernacle gave the signal to march or to encamp. The passage has no connection with the preceding; 15a sets in at precisely the point we have reached in Ex. 4034 f., and the following verses are parallel to Ex. 4036-38. It is not unsuitably placed before the breaking-up of the encampment at Sinai (1011 f.),⁴ but in its present form it can hardly be assigned to the oldest stratum of P. Chap. 101-10: the silver trumpets. The making of the signal trumpets seems to be part of the preparations for the departure 1011 f., but precisely the verses which establish this connection (5-7) are proved by the abrupt change of person and the incompleteness of the enumeration to be an interpolation in dependence upon 2; 2bβ is harmonistic. There remains a law for the convocation of the congregation and of the princes respectively (12a 3 f. 8), the age and original position of which are uncertain; it may perhaps be put in the same class with 81-4. Verses 9 f. use of trumpets in war and at festivals, are plainly older than 1-8, and apparently kindred to H (so Horst and others) or its sources; cp Lev. 2324 (H under P₅7).

P's account of the departure from Sinai is found in 11 f. (13-28 are secondary—or tertiary; see above, § 13); this was followed by P's version of the story of the spies and the sentence upon the generation of the wilderness (see above, § 3, begin.); the narrative was continued by the story of Korah and his abettors (in its older form) in 1612 2* 3-7a 19-24 27a 35 (see above, § 11); the plague (1641-50 [176-15]); the miracle of the rod that budded (171-11 [16-26])—perhaps secondary; the

¹ Cp also 710 13-28 (both agreeing with 2), Ex. 12-4 Gen. 468 ff.
² Chap. 105 f. is a gloss; see below, § 14.
³ The two references to the census in Ex. 30 11-16 and 38 24-26 are both in late contexts.
⁴ Compare the position of 1035 ff. in E.

designation of the Levites, 18:1-7 (see above, § 11); P's part of the story of the water from the rock (20:1* 2 30 68a* 10 12—altered by R_p to obliterate the sin of Moses and Aaron); the death of Aaron (20:22b-29 21:10 11a 22:1 25:6-8 [9] 14 f. [10-13 16-18 later expansion]). Of the narrative little more than this can be vindicated to P_C.

The census in Moab (ch. 26) is not expressly said to be the second, though this is implied in v. 64 (R).¹ The chapter is formally connected by v. 1 with 16. Chap. 26: the census in Moab. 25:8 f. (the plague). The numbering of the tribes is the basis of the division of the land (52-56), and is therefore in place here, while the census in 1 has no manifest end. In contrast to 1 the clans of the several tribes are named; cp Gen. 46 (P_s). A striking discrepancy is noted between Nu. 26:58 and Ex. 5:16 ff. Nu. 3:17-20 (cp also 16:1a); the priority seems to be on the side of 26 (Wellh. CH⁽²⁾ 184 f. j.). There is some plausibility in the hypothesis that 26 is the oldest of the census lists. Verses 9-11, based on Nu. 16 in its composite form, are a late interpolation; 59 is probably glossed from Ex. 2:1 and otherwise; 64 f. is redactional, cp 14:29 34.

As in several other instances in P_s, the law regarding the inheritance of women is given in the form of a decision by Moses establishing a precedent and rule. It is not unnaturally placed after the census in 26; cp, especially, 26:33; 27:3 refers to the story of Korah, apparently in the older form of 16:2-7, in which his supporters were members of the secular tribes.² An old law in formulation resembling the *tôrâh* in H is incorporated in 8b-11; the case is similar to the deferred passover in 9 and the story of the blasphemer in Lev. 24:10 ff.

Many of the laws and institutions in chaps. 1-27 have already been discussed.³ Of the rest it is doubtful whether any were contained in the original History of the Sacred Institutions.

17. Laws and institutions in Chaps. 1-27. It is doubtful whether any were contained in the original History of the Sacred Institutions.

Chap. 5:1-4: lepers and all other persons suffering from uncleanness excluded from the camp. The latter prescription goes beyond anything elsewhere in the legislation in the stringency with which it draws the consequence of the theory of the holiness of the camp in the midst of which Yahwê dwells; the law for the purity of warriors, Dt. 23:9-14, is quite a different thing. *Vv.* 5-8 are a novel to Lev. 6:1-7 [5:20-26], to which a general rule about the priest's dues (9 f.) is annexed from an older source (cp 18:19 f.). *Vv.* 11-31: the ordeal of jealousy. The formulation of the *tôrâh* corresponds to that of laws in Leviticus which we have found to be comparatively old; the beginning (11 12a) and close (29) suggest that it was taken from the same old collection which was the principal source of H; it has been expanded and glossed by later hands in a way similar to Lev. 17 or 23:9 ff., and it is difficult to separate the old law from the later accretions. In the ceremony of the bitter water itself it may be suspected that two forms of the ordeal have been combined.⁴

Chap. 6:1-8 contain a *tôrâh* kindred to Lev. 13 f., and not improbably, like the law of the leper, derived from the chief source of H; in 7 contamination from Lev. 21:11 f. may be suspected; 9-12 are a novel to 1-8. Verses 13-21 prescribe a ritual similar to those in Lev. 6 f.; cp Lev. 2; 19 f. resembles 5:25 f. Old customs in part underlie the law (the shaving of the head, 18, the boiled shoulder, 19), but in general the more elaborated rite has superseded the older rule.

Vv. 22-27: the priest's benediction; misplaced here—its natural position (in P_C) would be in proximity to

1 The allusion in v. 4 is a gloss.
2 Possibly, however, to the present composite text of P.
3 For those in 1 f. see § 13; 3 f. § 11; 8:5-26 § 11; 9 f. § 14; 18 § 11.
4 See Stade, ZATW 15:166-178 (1895); Carpenter and Harford-Battersby, Hcz. 1:191 ff. See JEA LOUSY, ORDEAL OF

Lev. 9:22 f. Chap. 8:1-4: the candelabrum and care of the lamps; cp Ex. 27:20 f. Lev. 24:1-4.¹ All three of these passages are astray; only Ex. 25:31-40 stands in its proper place. The natural connection for the directions in Nu. 8:1-3 is in the immediate sequel of Lev. 9, but there is nothing to show that they ever stood there; probably the verses are secondary; v. 4 is a gloss from Ex. 25:31 ff.

Chap. 15:1-16: the prescribed quantities of flour, oil, and wine (*minhâh*) to accompany various sacrifices. Noteworthy agreement in formulation and

19. Chap. 15. diction connects the law with H; compare the introduction with Lev. 23:9 f. (cp Lev. 19:23 25:2); 13-16 with Lev. 17:10 13 15. The phenomena seem to indicate that an old *tôrâh* touching voluntary offerings, which perhaps once stood in proximity to Lev. 23 (H's feasts), has been used as the basis for a paragraph regulating the *minhâh*; the expansion seems to have been made by a writer of the same school as the priestly reviser of Lev. 23:9 ff.; the awkward form of 14-16 suggests the hand of a late editor or scribe. The *tôrâh* 17-21, introduced as in 1 f. (see above), is assumed in Ezek. 44:30 to be familiar; cp also Neh. 10:37. An old law requiring first-fruits of barley grits has here been modified; the word *hallâh* in 20 is a gloss, as appears from its syntactical isolation and its absence from 21 as well as from Ezek. *Vv.* 22-31 are attached to the preceding without introduction, though upon an entirely unrelated subject—the sin-offerings of the congregation (22-26) and of the individual (27-31) respectively. The law is a partial parallel to Lev. 4 (cp 5:1-13), but both the formulation and the prescribed sacrifices are different; cp Lev. 4:14 with Nu. 15:24, Lev. 4:28 with Nu. 15:27.² The two belong to different strata of the priestly legislation or the practice of different times. Lev. 4 is undoubtedly late;³ Kuenen regards Nu. 15:22-31 as later still. There are, at least in 22-26, traces of an older *tôrâh* having some resemblance to those in H, but the evidence is not so clear as in the previous cases. In its actual form the law seems to be younger than Lev. 5:1-13, but probably older than Lev. 4. Verses 32-36: the fate of the man who picked up sticks on the Sabbath, inserted here probably as an instance of sin 'with a high hand'; character and language show that the story is a bit of late mishra, similar to Lev. 24:10 ff. (the blasphemer). *Vv.* 37-41, the tassels (*šišith*): an old *tôrâh* set in the distinctive motives and phrases of H (see LEVITICUS, § 24); 40 is perhaps an addition, and in 38 the persons of the verbs have been changed.

Chap. 19 deals with the red heifer—a means of purification for those who have contracted defilement from contact with a dead body (see

20. Chap. 19: CLEAN, § 17). The old law-book from which Lev. 12 15 are taken must have contained provisions for purification in such cases; but the missing *tôrâh* can hardly be discovered in Nu. 19. The chapter consists of two parts, 1-13, 14-22. In the former we miss explicit directions for either the making or the application of the purifying mixture; in the latter we find both (17 18 ff.), but without any allusion to the 'red heifer.' Verses 14-22 are not the sequel of 1-13, but seem rather to be a parallel to it; note the new beginning (14), the more particular definition of the causes of uncleanness (14-16), the preparation of the water—apparently from the ashes of an ordinary sin-offering (17),⁴ and the method of application (18 ff.). Though the rite is crude, the law in both its parts seems to belong to a very late stratum of P; the only reference to it is Nu. 31:23, cp 19.

Our examination of the Book of Numbers shows

1 See Exodus [BOOK], § 5; LEVITICUS, § 14.
2 The harmonistic explanation that Lev. applies to sins of commission, Nu. to sins of omission, is not warranted by the text.
3 LEVITICUS, § 5.
4 The last words of 9 are perhaps a harmonistic gloss.

Chap. 15:1-16: the prescribed quantities of flour, oil, and wine (*minhâh*) to accompany various sacrifices. Noteworthy agreement in formulation and

19. Chap. 15. diction connects the law with H; compare the introduction with Lev. 23:9 f. (cp Lev. 19:23 25:2); 13-16 with Lev. 17:10 13 15. The phenomena seem to indicate that an old *tôrâh* touching voluntary offerings, which perhaps once stood in proximity to Lev. 23 (H's feasts), has been used as the basis for a paragraph regulating the *minhâh*; the expansion seems to have been made by a writer of the same school as the priestly reviser of Lev. 23:9 ff.; the awkward form of 14-16 suggests the hand of a late editor or scribe. The *tôrâh* 17-21, introduced as in 1 f. (see above), is assumed in Ezek. 44:30 to be familiar; cp also Neh. 10:37. An old law requiring first-fruits of barley grits has here been modified; the word *hallâh* in 20 is a gloss, as appears from its syntactical isolation and its absence from 21 as well as from Ezek. *Vv.* 22-31 are attached to the preceding without introduction, though upon an entirely unrelated subject—the sin-offerings of the congregation (22-26) and of the individual (27-31) respectively. The law is a partial parallel to Lev. 4 (cp 5:1-13), but both the formulation and the prescribed sacrifices are different; cp Lev. 4:14 with Nu. 15:24, Lev. 4:28 with Nu. 15:27.² The two belong to different strata of the priestly legislation or the practice of different times. Lev. 4 is undoubtedly late;³ Kuenen regards Nu. 15:22-31 as later still. There are, at least in 22-26, traces of an older *tôrâh* having some resemblance to those in H, but the evidence is not so clear as in the previous cases. In its actual form the law seems to be younger than Lev. 5:1-13, but probably older than Lev. 4. Verses 32-36: the fate of the man who picked up sticks on the Sabbath, inserted here probably as an instance of sin 'with a high hand'; character and language show that the story is a bit of late mishra, similar to Lev. 24:10 ff. (the blasphemer). *Vv.* 37-41, the tassels (*šišith*): an old *tôrâh* set in the distinctive motives and phrases of H (see LEVITICUS, § 24); 40 is perhaps an addition, and in 38 the persons of the verbs have been changed.

Chap. 19 deals with the red heifer—a means of purification for those who have contracted defilement from contact with a dead body (see

20. Chap. 19: CLEAN, § 17). The old law-book from which Lev. 12 15 are taken must have contained provisions for purification in such cases; but the missing *tôrâh* can hardly be discovered in Nu. 19. The chapter consists of two parts, 1-13, 14-22. In the former we miss explicit directions for either the making or the application of the purifying mixture; in the latter we find both (17 18 ff.), but without any allusion to the 'red heifer.' Verses 14-22 are not the sequel of 1-13, but seem rather to be a parallel to it; note the new beginning (14), the more particular definition of the causes of uncleanness (14-16), the preparation of the water—apparently from the ashes of an ordinary sin-offering (17),⁴ and the method of application (18 ff.). Though the rite is crude, the law in both its parts seems to belong to a very late stratum of P; the only reference to it is Nu. 31:23, cp 19.

Our examination of the Book of Numbers shows

1 See Exodus [BOOK], § 5; LEVITICUS, § 14.
2 The harmonistic explanation that Lev. applies to sins of commission, Nu. to sins of omission, is not warranted by the text.
3 LEVITICUS, § 5.
4 The last words of 9 are perhaps a harmonistic gloss.

(= 2 Ch. 22 11) and Ex. 27 (τροφείουσα). The pl. נִרְקָיִם occurs Is. 49 23 ('nursing mothers' EV), together with נִרְקָיִם ('nursing fathers,' or foster-fathers, τιθηνοί), which in the sing. is found only in Nu. 11 12 (τιθηνός). Cp FAMILY, § 10.

NUTS. 1. נִרְקָיִם, ἔγυα (καργα Ct. 6 11†),¹ denotes, according to the ancient versions and almost unanimous tradition, the walnut-tree, *Juglans regia*, L. This is the proper meaning not only of καρύα by which G renders ἔγυα, but also of the words akin to the latter in Aram. and Arab. (*gauzā* and *gauz*); these Semitic forms have their origin in Persian. The walnut is native in all the regions from E. temperate Europe to Japan, its S. limit coinciding roughly with that of the vine. Though found in the mountains of Greece, the walnut was not much regarded by the Greeks until they obtained a superior sort (named by them κάρυον βασιλικόν or περσικόν) from Persia; the Romans also regarded it as of Persian origin (de C. Orig. 342 f.).

2. נִרְקָיִם, δολιμί (τερέμυθος or τερέβυθος; Gen. 43 11†), are almost certainly 'pistachio nuts' as in RV^{mg}. The word is akin to Syr. *bēlmethā* 'terebinth'; cp Ar. *butm* (cp Ass. *butnu*), said to be borrowed from the Syr. word (Fränkel, 139). The nuts are the fruit of *Pistacia vera*, L., a shrub whose native country is Palestine, extending into Mesopotamia; elsewhere it is an importation.

These nuts would form a natural component in a present carried from Palestine to Egypt; in the latter country they are 'still often placed along with sweetmeats and the like in presents of courtesy.' See FRUIT, § 13. N. M.—W. T. I. -D.

NYMPHAS (EV, with Tisch., Treg., Lightf., Zahn), or (RV^{mg} with Lachm., WH) **Nympha** (ΝΥΜΦΑΝ, may be either ΝΥΜΦΑΝ, *i.e.*, the masc., or ΝΥΜΦΑΝ, *i.e.*, the fem.; see below), with 'the church that is in his house' (so AV; but RV 'their house'), is saluted in Col. 4 15. It is not quite clear whether the 'house' referred to was in Laodicea or in Hierapolis—most probably in the latter (cp Col. 4 13), as the 'brethren' in Laodicea are mentioned separately. Nymphas (masc.) is enumerated in the *Chronicon Paschale* among the seventy disciples of the Lord; cp Bolland, *Acta Sanctorum*, Feb. 28. The name would be a contraction from Nymphodorus or Nymphodotus.

The rare occurrence of the name (Ct. 3 1105 *νυμφας*; cp CIG 1299; CIL 2 57, Nymphas?) might lead to the alteration of *αὐτοῦ* (DEFGKL, etc.), in *τὴν κατ' οἶκον αὐτ. ἐκκλησίαν*, into *αὐτῆς* (B 67¹), whilst *αὐτῶν* (MACP), though adopted by RV, Tisch., and Treg., is surely a mere reminiscence of 1 Cor. 16 19 Rom. 16 5, for 'the brethren' must have had more than one house. The objection to *νυμφαν* is that the form is Doric (Lightf., Abbott, Zahn); this is overruled by Hort (*App.* 163 a), but surely 'Martha' and 'Lydda,' being Semitic names, are not quite parallel to 'Nympha' (for Nymphe).

OABDIUS (ωαβαδ[ε]ιου [BA]), 1 Esd. 9 27 RV [AV om.] = Ezra 10 26 ABDI (*q.v.*, 2).

OAK (אֵילָן etc.), Gen. 35 etc. See TEREBINTH.

OAR. 1. אֵילָן, *miššōf*, κωπη. Ezek. 27 6; and oarsman, אֵילָן, *miššōf*, κωπηλάτης, Ezek. 27 29†.

2. אֵילָן, *oni šayit*, 'fleet with oars,' Is. 33 21. See SHIP.

OATH (Anglo-Saxon *ādth*; Goth. *aiths*; etymology uncertain). 'An oath may be defined as an asseveration or promise made under non-human penalty or sanction' (*E.B.*⁹) *s.v.*; cp Heb. 6 16). The use of the oath, mention of which is made throughout the OT, presupposes a legal system in some stage of development. At what precise date the oath came into vogue among the Hebrews cannot be determined (cp Lev. 5 1 [P]); but the need of it must have been felt as soon as a case arose in which no witnesses could be found with whom to confront and confound the accused (Ex. 22 6-11).

See LAW AND JUSTICE, § 10. The common Hebrew equivalent *šbhū'āh* (שְׁבִיעָה) is derived from the same root (שָׁבַע); in Niphal 'to swear') that supplied the word for 'seven' (שֶׁבַע, *šebha'*).

'Seven is a sacred number among the Semites, particularly affected in matters of ritual, and the Hebrew verb "to swear" means literally "to come under the influence of seven things." Thus seven ewe lambs figure in the oath between Abraham and Abimelech at Beersheba, and in the Arabian oath of covenant described by Herodotus (38) seven stones are smeared with blood' (WRS, *Rel. Sem.*); cp BEER-SHEBA, and for the number *seven*, Gen. 33 3 Lev. 46 Nu. 23 1 29 Josh. 6 4 8 13 Zech. 3 9 Rev. 12 3 15 7 Mt. 12 45, etc.). Cp NUMBER, § 5.

Another word, *ālāh* (אָלָה), which is often translated 'oath,' means literally 'curse,' and, therefore, when it is used something more awful than the ordinary oath is intended.

Solemn as was the oath alone, its awfulness was greatly increased when a curse was added. To express this twofold idea Hebrew sometimes combines the two words (Nu. 5 21; cp 1 K. 8 31 2 Ch. 6 22 Neh. 10 29 Dan.

¹ In Cant. 6 11 'garden of nuts' is exactly parallel to 'garden of pistacio-nuts' (Est. 7 7, גַּן הַבָּשִׁימִים; MT has the improbable גַּן הַבָּשִׁימִים, cp 15 הַבָּשִׁימִים, cp 15 הַבָּשִׁימִים).

9 11). In the case of *ālāh* an imprecation was always added; in the case of *šbhū'āh* there need be none.

The oath, as Benzinger says (art. 'Eid' in *PRE9*), 'played a great part among the Israelites in ordinary life'; but on common occasions the less severe form of oath was deemed sufficient.

So, when a promise was made by one person to another (Gen. 24 8 Josh. 2 17 20 2 S. 21 7 1 K. 2 43 Tob. 8 20), by one tribe to another (Josh. 22 20), by a people to its god, king, or priest (Judg. 21 5 1 S. 14 26 2 Ch. 15 15 1 Esd. 8 93 96 Judith 8 11 30 Jos. Ant. xii. 1 xv. 10 4), or by Yahwē to Israel's ideal ancestor (Gen. 28 3 Dt. 7 8 1 Ch. 16 16 Ps. 105 9 Jer. 11 5 Ecclus. 44 21 Bar. 2 34).

The meaning of the terms may be illustrated by Mt.'s version of Peter's denial of Jesus. Peter in the first instance denied simply; in the second he denied with an oath (Mt. 26 72 *ἠρνήσατο μετὰ ὄρκου—i.e.*, he made use of the *šbhū'āh*); in the third he began to utter an imprecatory oath (*ἤρξατο καταθεματίζεω καὶ ὀμνέω—i.e.*, he employed the *ālāh* in addition to the *šbhū'āh*). Peter did not, as might be inferred from EV, use blasphemous language; what he did was to employ the most solemn form of oath. The three denials, indeed, represent the three Jewish methods of making an asseveration. The first method was that used by Jesus himself (Mt. 26 63 f.).

Of the forms which the oath took when expressed in words several are mentioned in the OT. These are:

- 1. **Forms.** 'God do so to me and more also' (בְּיָמֵינוּ יִשְׁתַּחֲוֶה אֱלֹהִים וְיִשְׁתַּחֲוֶה אֵלֶיךָ); variations of this are: 'God do so to thee, etc.' 1 S. 3 17, 'God do so to the enemies of David, etc.' 1 S. 25 22, 'God do so to Abner, etc.' 2 S. 3 9, 'and the Gods do so [to me], etc.' 1 K. 19 2). 'As Yahwē liveth' (כִּי יִחְיֶה יְהוָה); variations of this are, *יְהוָה חַי*, 'as Yahwē liveth and as thou thyself livest' 1 S. 20 3, *יְהוָה חַי וְיִחְיֶה*, 'as Yahwē liveth and as my lord the king liveth' 2 S. 15 21). 'Yahwē is a witness between me and between thee for ever' (יְהוָה עֵד עֵינָי וְיְהוָה עֵד עֵינֶיךָ); or, reading *עֵד עֵינָי* instead of inserting *עַד* after *יְהוָה*, 'Yahwē is an everlasting witness.'

¹ In 1 S. 14 44 לֵי is to be added after שְׁ, or to be understood. See the remarks of Driver, and H. P. Smith.

² On the different punctuation of חַי in these passages see H. P. Smith on 1 S. 14 39.

etc.). 'The God of Abraham . . . judge between us' (שפטו בינינו יי' אלהי אברהם). 'By myself have I sworn, etc.' (כי נשבעתי). Gen. 22:16, Yahwè being the speaker). That Paul used some kind of imprecation is implied in 2 Cor. 1:23 Phil. 1:8 Gal. 1:20.

For these passages Taylor compares the words of Athanasius 'I stretch out my hand, and as I have learned of the apostle, I call God to witness on my soul' (*J. Pol. ad Imp. Const.*; see Augustine, *De Mend.* 28; *Epist.*, cl. 39; cl. 4250; *Enarr. in Psalm.* 88 (4); *Serm.* 307 319).

The Jews are said, moreover, to have sworn by heaven (cp Dalman, *Worte Jesu*, 128 f.), by the earth, by the sun, by Jerusalem, by the temple (see Mishna, *Shebu'oth* 4 2; Mt. 5:34 23 16; *Birakhoth* 55; *Kiddushin* 71 a; Maimonides, *Yad Ha-Hasaka*, *Hilkoth Shebu'oth* 12), by the angels (Jos. *B/ii.* 16.4) and by the lives of distinguished persons (Gen. 42:15 1 S. 1:26 17 55 2 S. 11:11 14 19).

In taking an oath it was usual, in order to add solemnity to the occasion, to lift up the right hand towards heaven (Gen. 14:22 Dt. 32:40 Dan. 12:7 Rev. 10:5; cp Homer, *Il.* 19 254, Pindar, *Olymp.* 7 120). Hence 'to lift up the hand' is used as an equivalent of 'to swear' (Ex. 6:8 Ps. 106:26 Ezek. 20:5; cp Ps. 144:8, 'Their right hand is a right hand of falsehood,' and Ar. *yamin* 'an oath,' lit. 'right hand'). Sacrifice often formed part of the ceremony of the oath (see SACRIFICE and cp *Il.* 3:276). Sometimes it was the practice to divide a victim and to pass between the pieces (Gen. 15:10 17 Jer. 34:18; cp the Ar. *kasama*, 'an oath' from *kasama*, 'to divide into parts,' *aksama*, 'to swear'). Cp COVENANT, § 5. With regard to the practice of putting the hand under another's thigh, referred to in Gen. 24:2 47 29 (cp Jos. *Ant.* i. 161), it seems plain that it grew out of the special sacredness attaching to the generative organ; fruitfulness being of specially divine origin, the organ of it in man could by the primitive Semites be taken as symbolising the Deity.

Parallels are quoted by Ew. *Alterthümer* (3), 26, and Knob-Dilim, *ad loc.*: Taylor also gives a particularly interesting parallel from Australia (see note in Spurrell's *Genesis* (2), 217 f.).

According to Taylor, the practice is better described as a covenant ceremony than as an oath-rite. But can we, among the Hebrews, dissociate covenants or compacts from swearing?

The prophets did not conceive the possibility of doing without oaths; indeed to proclaim the *šebū'ah* of Yahwè was part of the prophet's work.

3. Teaching of the prophets and of Jesus. [ET]. Perjury is denounced by them as putting a man outside of Yahwè's religion (Ezek. 16:59 17 13 16 18 19; cp Ps. 154, 'that swears to another [reading לַרְעוּתִי, Pesh., RV^{mg}, Welh.], and changes not'; 244, 'and who swears not deceitfully'). In post-exilic times there were not wanting men who scrupled to take any oath in daily intercourse.

See Eccles. 9:2, which would perhaps be interpreted in the light of the principles of the later Essenes, who are said (Jos. *B/ii.* 86) to have esteemed swearing on ordinary occasions as worse than perjury; and cp Eccles. 29:9-11.

This brings us to speak of Mt. 5:34 Jas. 5:12 (this passage is important because it very possibly contains the true form of a part of the saying in Jesus' sermon). The great teacher takes up a definite attitude of opposition to the prevailing theories respecting oaths. As F. C. Burkitt (*Two Lectures on the Gospels*, 1900), following Dalman (*Worte Jesu*, 1187), has well pointed out, Jesus' peculiar use of 'Amen' must have arisen out of this repugnance to oaths. 'Amen' is no oath, but involves a not less solemn asseveration of the truth of a statement. Lk. sometimes uses ἀληθῶς or ἐπ' ἀληθείας where Mt. and Mk. have ἀμην (Dalman, 186; cp AMEN, § 2). Jesus, however, is also reported to have said that 'whatsoever is more than yea or nay is of the evil one' (v. 37, τὸ δὲ περισσὸν τούτων ἐκ τοῦ πονηροῦ ἐστίν), which could not possibly be said of a serious and reverent oath by the living God. This most solemn oath indeed, Jesus himself, according to Mt., recognised in his trial (Mt. 26:63 f.; but cp Mk. 14:61 f. = Lk. 22:70). Perhaps a passage in the Mishna, *Sheb.* 4:13, may illustrate its meaning. It is there laid down that if one man adjures

another with the words, 'By heaven and earth!' the adjuration is not binding; if, however, he adjures by one of the divine names, it is binding. The first part of this saying Jesus would certainly not have sanctioned; the second, he certainly would. To support this statement it is enough to refer to Mt. 23:16 ff., where, after denouncing the casuistry of the 'blind guides' of Jewish laymen he says, 'And he that swears by heaven, swears by the throne of God, and by him that is seated thereon.' To say that Jesus meant that an oath by the God of heaven and earth 'comes of the evil one,' would be beyond the power of any Christian theologian. This binds our interpretation of Jas. 5:12 (on which see above, and cp Mayor's commentary). Keim (*Jesu von Nazara*, 2256) appears to give a sounder view of the meaning of Jesus than B. Weiss (*Matthäusevangel.* 166). The protest of Jesus is directed, as Holtzmann points out, rather against the lower, casuistical Pharisaism than against the Pharisaism of a nobler type which we know. See also VOWS, and cp Nowack, *H. I.*, s.v. 'Eid'; and for NT the article MINISTRY and Holtzmann, *NT Theol.* 1 102 105 139 f.

M. A. C., § 1 f.; T. K. C., § 3.

OBADIAH (עֲבַדְיָהוּ and עֲבַדְיָהוּ [nos. 2, 6, 8], 'servant or worshipper of Yahwè,' § 37; cp ABDEEL, and Ar. 'Abdallah, *Taimallat*; but this may be a later view, and originally the men afterwards known as Obadiah may have borne a clan-name, perhaps 'Arābi'; see OBED, and especially PROPHECY, § 7; אַבְדַּא [BAL] generally).

1. The prophet (in title *αβδείου* [B*], -*δίου* [Bc] *αβδίου* [AQ], -*δείου* [A]; v. 1 *αβδείου* [B], -*δίου* [B^b], *αβδίου* [NAQ]; subscription *αβδείου* [B*], -*δίου* [B^bc], *αβδείου* [N], -*δίου* [A], -*δαιου* [Q]; ABDIAS, 2 Esd. 1:39 EV). See below, OBADIAH (BOOK).

2. The controller of Ahab's palace, a devoted adherent of the old Israelitish religion, in the days when, prophetic legend said, that religion was proscribed by Ahab (1 K. 18:3-16, עֲבַדְיָהוּ, *αβδείου* [B], -*δίου* [AL]). Violent as the persecution was, Obadiah ventured to hide a hundred prophets of Yahwè 'by fifty in a cave.' Many readers have been surprised by Obadiah's (or 'Arabi's?') pusillanimous speech in 1 K. 18:9-14. But may it not be the narrator's object to bring out the fierceness of Ahab and the superhuman courage of Elijah? Later tradition has more to say about him, identifying him with the prophet (see Jer. *Comm. in Ob.*, the third captain of fifty, who came to Elijah (2 K. 1:13); and the prophet's widow, for whom Elisha wrought a miracle (2 K. 4:1), was his widow. His tomb was shown in Samaria with those of Elisha and John the Baptist, and the *Epitaphium Paula* describes the wild performances, analogous to those of modern dervishes, enacted before these shrines. The true story, however, may have been much misunderstood; Ⓢ makes a brave attempt to make 184 more intelligible, but criticism has recovered the original story of Obadiah, which later copyists distorted (see PROPHECY, § 7).

3. b. Azel, a descendant of Saul (1 Ch. 8:33 9:44).

4. b. IZRAHIAH (*q.v.*) of ISSACHAR (1 Ch. 7:3 *μεμβετια* [B], *οβδία* [A]).

5. A Gadite who came to David at Ziklag (1 Ch. 12:9).

6. Father of Ishmaiah (*q.v.*) (1 Ch. 27:19, עֲבַדְיָהוּ, *αβδείου* [B], -*δίου* [AL]).

7. One of the sons of Hananiah b. Zerubbabel (1 Ch. 3:21, *οβδίας* [L]), but according to Ⓢ, Vg., and Pesh., he belongs to the sixth generation from Zerubbabel.

8. A Merarite Levite (2 Ch. 34:12 עֲבַדְיָהוּ, *αβδίας* [AL]); cp below (9).

9. b. Shemaiah of Jeduthun—also Merarite (1 Ch. 9:16, *οβδία* [A], *αβία* [L]), see ABDA (2). On the occurrence of the name in Merarite lists see IBRI.

10. One of Jehoshaphat's commissioners for teaching the Law (2 Ch. 17:7, *αβιαν* [B]), mentioned after BEN-HAIL (*q.v.*), *i.e.*, Ben-jerahmeel. Was his true name 'Arābi (see above)?

11. b. Jehiel, of the b'ne Joah, a family in Ezra's caravan (see EZRA i., § 2, ii., § 15 [1 d]); EZRA 8:9 (*αβεία* [B], *αβαδία* [A], *αβδίου* [L]) = 1 Esd. 8:35 ABADIAS (*αβαδίας* [BA], *αβδίου* [L]).

OBADIAH (BOOK)

Perhaps the priestly signatory to the covenant (see EZRA I., § 7), Neh. 10 5 (6) (αβδ(ε)ια [BNA] αβδ(ε)ια [L]); cp 12 25 (om. BNA), οβδ(ε)ια [NC^a mg.], αβδ(ε)ια [L], if not, however, to be connected with (8) above.

OBADIAH (BOOK)

Place in Canon (§ 1). New text-critical basis (§ 5).
 Author and headings (§ 2). Analysis (§ 6).
 Earlier criticism (§ 3). Origin of parts 1 and 2 (§ 7 f.).
 Earlier views of date (§ 4). Literature (§ 9).

In the Hebrew OT the Book of Obadiah stands fourth among the twelve 'minor prophets, between Amos and Jonah. The primary reason for this seems to be, not so much chronological theory, as the reference at the close of Amos (9 12) to the future occupation of the Idumæan territory by Judah, an event which is the climax of the so-called 'vision of Obadiah' (Obad. 18 f. 21). In \mathfrak{G} , however, Obadiah comes between Joel and Jonah, and certainly the parallelisms between Joel and Obadiah fully justify this arrangement.

Jerome (on Obad. 1, cp Talm. *Sanh.* 39), mentions a current Jewish identification of Obadiah with the steward of Ahab's house (OBADIAH, 2). The sehohian at the head of Ephrem's commentary, however, states that Obadiah was of the land of Shechem, of the district of Beth-Ephraim. The *Vita Prophetarum* (for the two forms of which see Nestle, *Marg.* 24 f.) instead of 'Beth-Ephraim' gives βηθαχαράμ and βεθαχαμαρ respectively, and further states that Obadiah was the third 'captain of fifty,' whom the prophet Elijah spared (2 K. 1 13 f.); and in the longer form of the *Vita* it is added that he became Elijah's disciple, and went through much on his account. This, of course, has no historical authority; but it seems possible that the original tradition knew of a southern Shechem (see SHECHEM). Βηθαχαράμ represents Beth-haccerem, which is probably a popular modification of Beth-jerahmeel. The writer of the original prophecy may, in fact, like some others of the literary prophets (to judge from their names), have been of Jerahmeelite extraction. The Jerahmeelite element in Judah increased after the Exile. The Talmud (*Sanh.* 39) mentions a view that Obadiah was an Edomite proselyte. Of the headings, which are three, the last ('Thus has the Lord Yahwè said concerning Edom') is not quite accurate, Yahwè not being the speaker, according to MT, except in *vv.* 2 4 8 13 16. The two others, 'Vision (=prophecy) of Obadiah' and 'Obadiah' scarcely represent the original form of the heading; 'Obadiah,' being so vague in its meaning, would have been followed by 'son of.' Probably we should read עֲרָבִי, 'Arabi' (cp OBED), and find a trace of the view (see above) that the prophet was an Edomite proselyte. T. K. C.

[The difficulty of this small book is out of all proportion to its length, and it will be well to glance at an earlier solution of the complex problem before attempting a more complete explanation. We will therefore throw ourselves back into the point of view which was natural in 1884, and see to what extent this enigmatical book had yielded up its secret. That it should be left for other critics to widen the earlier solution rather than for the eminent scholar whose work we use as a starting-point, is a matter of profound regret. Criticism, however, 'like Dante among the shades, proves its life by moving what it touches' (*OTJC*^(b), preface, ix).]

We begin with a sketch of the contents. Yahwè has sent forth a messenger among the nations to stir them up to battle against the proud inhabitants of Mt. Seir, to bring them down from the rocky fastnesses which they deem impregnable. Edom shall be not only plundered, but utterly undone and expelled from his borders, and this he shall suffer (through his own folly) at the hands of trusted allies (*vv.* 1-19). The cause of this judgment is his cruelty to his brother Jacob. In

the day of Jerusalem's overthrow the Edomites rejoiced over the calamity, grasped at a share of the spoil, lay in wait to cut off the fugitives (*vv.* 10-14). But now the day of Yahwè is near upon all nations, Esau and all the heathen shall drink full retribution for their banquet of carnage and plunder on Yahwè's holy mountain. A rescued Israel shall dwell in Mt. Zion in restored holiness; the house of Jacob shall regain their old possessions; Edom shall be burned up before them as chaff before the flame; they shall spread over all Canaan, over the mountain of Esau and the S. of Judah, as well as over Gilead and the Philistine and Phœnician coast. The victorious Israelites shall come up on Mt. Zion to rule the mountain of Esau, and the kingdom shall be Yahwè's (*vv.* 15-21).

Sure criteria for determining the date appear to be furnished by *vv.* 10-14. The calamity of Jerusalem can only be the sack of the city by Nebuchadrezzar; the malevolence and cruelty of Edom on that occasion are characterised in similar terms by several exilic and post-exilic writers (*Ezek.* 25 8 12 f. 35 *Lam.* 4 21 *Ps.* 137). It is impossible to doubt that these verses were written under the impression of the events to which they refer. To regard the language as predictive (Caspari, Pusey, etc.) is to misunderstand the whole character of prophetic foresight. The opening verses, on the other hand, present a real difficulty. Obad. 1-6 8 agree so closely, and in part verbally, with Jer. 49 14-16 9 f. 7, that the two passages cannot be independent; nor does it seem possible that Obadiah quotes from Jeremiah, for Obad. 1-8 is a well-connected whole, while the parallel verses in Jeremiah appear in different order interspersed with other matter, and in a much less lucid connection. In Jeremiah the picture is vague and Edom's unwisdom (*v.* 7) stands without proof. In Obadiah the conception is quite definite. Edom is attacked by his own allies, and his folly appears in that he exposes himself to such treachery. Again, the probability that the passage in Jeremiah incorporates disjointed fragments of an older oracle is greatly increased by the fact that the prophecy against Moab in the preceding chapter uses, in the same way, Is. 15 f. and the prophecy of Balaam. But according to the traditional view, the prophecy against Edom in Jer. 49 dates from the fourth year of Jehoiakim, so that, if Obadiah and Jer. 49 contain common matter, it seems necessary to conclude with Ewald, Graf, and many others, that Jeremiah and our Book of Obadiah alike quote from an older oracle (see, however, § 7). Ewald supposes that the treacherous allies of Edom are the Aramæans, and the time that of Ahaz (2 K. 166); but, if his general theory be accepted, it would be more just to the tone of the prophecy to refer it to a later date, when Edom had been for some time independent and powerful, and it is not improbable that in Obad. 1-8 we have the first mention of that advance of the Arabs upon the land E. of Palestine which is referred to also in *Ezek.* 25. The prominence given to Edom, and the fact that Chaldaea is not mentioned at all, make it probable that the book was not written in Babylonia. The same verse speaks of exiles in SEPHARAD (*q. v.*). Sefarad is probably Sardis, the Çparda of Darius in the Behistun inscription. The language is quite consistent with a date in the Persian period.

The eschatological picture in the closing verses equally favours a late date. The conceptions of the 'rescued ones' (פְּלִיטָה, פְּלִיטָה), of the sanctity of Zion, of the kingship of Yahwè, are the common property of the later prophets. Like most of them, too, the writer gives expression to the intensified antithesis between Judah and the surrounding heathen in the prediction of a consuming judgment on the latter—the great 'day of Yahwè.' With Joel, in particular, he agrees in some striking points, both material and verbal, so closely that one of the two must be dependent on the other

OBADIAH (BOOK)

the day of Jerusalem's overthrow the Edomites rejoiced over the calamity, grasped at a share of the spoil, lay in wait to cut off the fugitives (*vv.* 10-14). But now the day of Yahwè is near upon all nations, Esau and all the heathen shall drink full retribution for their banquet of carnage and plunder on Yahwè's holy mountain. A rescued Israel shall dwell in Mt. Zion in restored holiness; the house of Jacob shall regain their old possessions; Edom shall be burned up before them as chaff before the flame; they shall spread over all Canaan, over the mountain of Esau and the S. of Judah, as well as over Gilead and the Philistine and Phœnician coast. The victorious Israelites shall come up on Mt. Zion to rule the mountain of Esau, and the kingdom shall be Yahwè's (*vv.* 15-21).

Sure criteria for determining the date appear to be furnished by *vv.* 10-14. The calamity of Jerusalem can only be the sack of the city by Nebuchadrezzar; the malevolence and cruelty of Edom on that occasion are characterised in similar terms by several exilic and post-exilic writers (*Ezek.* 25 8 12 f. 35 *Lam.* 4 21 *Ps.* 137). It is impossible to doubt that these verses were written under the impression of the events to which they refer. To regard the language as predictive (Caspari, Pusey, etc.) is to misunderstand the whole character of prophetic foresight. The opening verses, on the other hand, present a real difficulty. Obad. 1-6 8 agree so closely, and in part verbally, with Jer. 49 14-16 9 f. 7, that the two passages cannot be independent; nor does it seem possible that Obadiah quotes from Jeremiah, for Obad. 1-8 is a well-connected whole, while the parallel verses in Jeremiah appear in different order interspersed with other matter, and in a much less lucid connection. In Jeremiah the picture is vague and Edom's unwisdom (*v.* 7) stands without proof. In Obadiah the conception is quite definite. Edom is attacked by his own allies, and his folly appears in that he exposes himself to such treachery. Again, the probability that the passage in Jeremiah incorporates disjointed fragments of an older oracle is greatly increased by the fact that the prophecy against Moab in the preceding chapter uses, in the same way, Is. 15 f. and the prophecy of Balaam. But according to the traditional view, the prophecy against Edom in Jer. 49 dates from the fourth year of Jehoiakim, so that, if Obadiah and Jer. 49 contain common matter, it seems necessary to conclude with Ewald, Graf, and many others, that Jeremiah and our Book of Obadiah alike quote from an older oracle (see, however, § 7). Ewald supposes that the treacherous allies of Edom are the Aramæans, and the time that of Ahaz (2 K. 166); but, if his general theory be accepted, it would be more just to the tone of the prophecy to refer it to a later date, when Edom had been for some time independent and powerful, and it is not improbable that in Obad. 1-8 we have the first mention of that advance of the Arabs upon the land E. of Palestine which is referred to also in *Ezek.* 25. The prominence given to Edom, and the fact that Chaldaea is not mentioned at all, make it probable that the book was not written in Babylonia. The same verse speaks of exiles in SEPHARAD (*q. v.*). Sefarad is probably Sardis, the Çparda of Darius in the Behistun inscription. The language is quite consistent with a date in the Persian period.

4. Earlier views of date. Edom on that occasion are characterised in similar terms by several exilic and post-exilic writers (*Ezek.* 25 8 12 f. 35 *Lam.* 4 21 *Ps.* 137). It is impossible to doubt that these verses were written under the impression of the events to which they refer. To regard the language as predictive (Caspari, Pusey, etc.) is to misunderstand the whole character of prophetic foresight. The opening verses, on the other hand, present a real difficulty. Obad. 1-6 8 agree so closely, and in part verbally, with Jer. 49 14-16 9 f. 7, that the two passages cannot be independent; nor does it seem possible that Obadiah quotes from Jeremiah, for Obad. 1-8 is a well-connected whole, while the parallel verses in Jeremiah appear in different order interspersed with other matter, and in a much less lucid connection. In Jeremiah the picture is vague and Edom's unwisdom (*v.* 7) stands without proof. In Obadiah the conception is quite definite. Edom is attacked by his own allies, and his folly appears in that he exposes himself to such treachery. Again, the probability that the passage in Jeremiah incorporates disjointed fragments of an older oracle is greatly increased by the fact that the prophecy against Moab in the preceding chapter uses, in the same way, Is. 15 f. and the prophecy of Balaam. But according to the traditional view, the prophecy against Edom in Jer. 49 dates from the fourth year of Jehoiakim, so that, if Obadiah and Jer. 49 contain common matter, it seems necessary to conclude with Ewald, Graf, and many others, that Jeremiah and our Book of Obadiah alike quote from an older oracle (see, however, § 7). Ewald supposes that the treacherous allies of Edom are the Aramæans, and the time that of Ahaz (2 K. 166); but, if his general theory be accepted, it would be more just to the tone of the prophecy to refer it to a later date, when Edom had been for some time independent and powerful, and it is not improbable that in Obad. 1-8 we have the first mention of that advance of the Arabs upon the land E. of Palestine which is referred to also in *Ezek.* 25. The prominence given to Edom, and the fact that Chaldaea is not mentioned at all, make it probable that the book was not written in Babylonia. The same verse speaks of exiles in SEPHARAD (*q. v.*). Sefarad is probably Sardis, the Çparda of Darius in the Behistun inscription. The language is quite consistent with a date in the Persian period.

The eschatological picture in the closing verses equally favours a late date. The conceptions of the 'rescued ones' (פְּלִיטָה, פְּלִיטָה), of the sanctity of Zion, of the kingship of Yahwè, are the common property of the later prophets. Like most of them, too, the writer gives expression to the intensified antithesis between Judah and the surrounding heathen in the prediction of a consuming judgment on the latter—the great 'day of Yahwè.' With Joel, in particular, he agrees in some striking points, both material and verbal, so closely that one of the two must be dependent on the other

The eschatological picture in the closing verses equally favours a late date. The conceptions of the 'rescued ones' (פְּלִיטָה, פְּלִיטָה), of the sanctity of Zion, of the kingship of Yahwè, are the common property of the later prophets. Like most of them, too, the writer gives expression to the intensified antithesis between Judah and the surrounding heathen in the prediction of a consuming judgment on the latter—the great 'day of Yahwè.' With Joel, in particular, he agrees in some striking points, both material and verbal, so closely that one of the two must be dependent on the other

of Jer 49:7-22 proves beyond dispute that the author of the latter work borrowed from 'Obadiah,' or rather from the original 'Obadiah,' which was without *vv.* 15a 16-21. If, therefore, Jer. 49:7-22 is by Jeremiah, who wrote it, as is supposed (see Jer. 46:2), in the fourth year of the reign of Jehoiakim (*circa* 606 B.C.), the capture of Jerusalem (when the Edomites behaved so unmercifully), and the danger to which (according to the prophetic poet) Edom is now exposed, must both be prior to the Babylonian invasion of Judah. In this case it will be natural to explain *vv.* 10-14 of the same event that is referred to in Am. 1:9-11, where Mušur and Edom are accused of cruelty to the kindred people of Israel in its time of sore distress, and, if we could trust the narrative in 2 Ch. 21:16 *f.*, we might suppose the capture of Jerusalem by Philistines and Arabians in the reign of Jehoram mentioned by the Chronicler to be the event intended. Unfortunately, the pre-exilic date of Am. 1:9-12 and Jer. 49:7-22 is by no means secure (see AMOS, § 9; JEREMIAH, BOOK OF, §§ 12-14), and the historicity of the Chronicler's statement is not less questionable (see JEHORAM, § 5). From the fact that the first part of Obadiah is used in Jer. 49:7-22 we may justly infer that, like Jer. *l.c.*, it is post-exilic; only we shall do well to assume a considerable interval between Obad. 1-14 15*b* and the appendix (which was unknown to the Jeremianic writer). The view that Obad. and Jer. 49:7-22 derive the elements common to both from a prophecy older than either, which has been incorporated with least alteration by Obad., though still held by Driver (*Introd.*⁽⁶⁾, 319), Wildeboer (*Letterkunde*⁽⁷⁾, 351), and G. A. Smith (*Twelve Prophets*, 2171) is, from our point of view, unnecessary.

Our next step is to compare Obad. 1-14 15*b* with certain other parallel passages,¹ viz. (a) Mal. 1:2-5, (b) Mic. 4:8 *f.*, (c) Lamentations, (d) Is. 63:18 64:10 11 [9 *f.*], (e) certain psalms, (f) Is. 21:1-10, (g) a story in Jeremiah, (h) Esther, (i) Judith. We adhere to the point of view which has already led us to satisfactory results, starting from a carefully emended critical text, not from the often corrupt Massoretic text. A previous perusal of parts of the articles LAMENTATIONS and MICAH will probably assist the reader to realise the exegetical importance of attention to the text-critical problems.

(a) From Mal. 1:2-5 we learn that shortly before the date of Malachi's prophecy the mountains of Edom had been laid waste, and it is reasonable to see in this an allusion to an important stage in the displacement of the Edonites by the NABATÆANS (*q.v.*) some time before 312 B.C. It is natural (as Wellhausen first pointed out) to illustrate Obadiah by Malachi, and consequently by Diodorus (see EDM, § 9).

(b) One of the later appendices to the prophecies of Micah (Mic. 4:8-56 [5]) contains a definite announcement of a siege of Jerusalem in which Zarephathites and other hostile nations are concerned, and of a captivity of Jerusalemites in Jerahmeel (Mic. 4:10). See MICAH, BOOK OF, § 4.

(c) and (d) supplement each other, and fully agree with the situation described in Obad. 11-14, and if we further take (e) into account—*i.e.*, the psalms which (as a searching criticism shows) relate to the oppression of the Jews and the destruction of the temple by Arabians, and which further speak of Jewish captives, or at least enforced residents, among the Jerahmeelites or Edonites—it will be difficult to retain much doubt as to the particular events referred to in this portion of Obadiah. These events were the capture of Jerusalem by the Babylonians aided and abetted by the Cushites, Jerahmeelites, and Mišrites. The participation of these N. Arabians in the destruction of the Jewish state is not indeed mentioned in 2 K. 25:1 *f.*; but it may be referred

¹ Joel 3[4] 19, where 'Mišraim' (Egypt) should be 'Mišrim' (Mišri); Am. 9:12, and Is. 34 (all post-exilic) might be added to the list, also the prophecies on Mišrim (Mišri) and Jerahmeel which appear to underlie those on Egypt, Elam, and Babylon in Jer. 46:49 50 *f.* The investigation of these hidden prophecies would involve too great a digression.

to in 2 K. 24:2¹ (*vv.* 2-4 are not improbably misplaced), and we seem to have an indirect confirmation of the fact in the asserted invasion of Judah in Asa's reign by 'ZERAH (*q.v.*) the Cushite' (*i.e.*, the N. Arabian Zarithes), and in the asserted capture of Jerusalem by the 'Philistines' (Zarephathites) and the 'Arabians that were near the Cushites' (2 Ch. 14:9 21:16 *f.*). Of the psalms which refer to this and the following period it is enough to refer to Pss. 42-43 74 79 120 137 140. A passage from 42-43 (emended text) is quoted elsewhere (see MIZAR). The speaker is a company of Jews dwelling among Jerahmeelite oppressors, and the value of this and the parallel psalms (excluding Pss. 74 79) is that they show the long continuance of Jerahmeelite—*i.e.*, N. Arabian—oppression (cp also Is. 62:8 *f.*, and the references to the hostility of neighbours in Nehemiah). Winckler (*AOF* 2455) even thinks that the Moabites, Ammonites, and Arabians [rather the Mišrites, Jerahmeelites, and Arabians] were the agents in the destruction of the wall referred to in Neh. 13; but see NEHEMIAH, § 1. At any rate, a series of Jerahmeelite captivities may pretty safely be assumed; it is to these that reference is made, not only in Am. 1:9 and Mic. 4:10 (emended text), but also in Ps. 42 *f.*, as appears from the direct reference to a hoped-for return to Jerusalem, and in Ps. 137 (emended text). The improbability of the ordinary view of Ps. 137 has been well shown by W. E. Barnes.

The attempt of Barnes, however, to make Ps. 137 refer entirely to Edom without touching the MT is unsuccessful.² Here, as in some other passages, בָּנֵי (as if בְּנֵי) is miswritten for אֲרָמִים which should be restored both in *v.* 1 and in *v.* 8. The passages which best illustrate our present subject are *vv.* 1 2 7 8—

1. On the heritage of Jerahmeel we wept, | remembering Zion;
2. The Arabs in the midst thereof had beaten | our harps to pieces.
7. Remember, O Yahwè! against Edom's sons | the wickedness of the plunderers,
Who said, Break down, break down | her sanctuaries.
11. To thee also, O house of Jerahmeel! | plunderers shall come;
Jacob shall uproot thee, and shall overthrow | all thy palaces.

Ps. 137 has a twofold reference; it commemorates alike the past and the present. Edomite oppression still continues (as Ps. 120 140, critically emended and explained, amply prove); but the tradition of still greater calamities, of which Jerahmeel and Edom are guilty, is still handed on. The temple itself fell a prey to the plunderers in that fatal day when the Arabian Cushites and Mišrites profaned its holy precincts (Ps. 74, cp Is. 63:18), and the blood of faithful Jews flowed like water (Ps. 79:3, cp Joel 3[4] 19 Am. 1:11). One would gladly avoid touching the traditional text of so well-known a psalm; but a strict exegesis of that text is impossible.

The Lamentations, too, and the not less affecting than dramatic outburst in Is. 63:7-64 are also commemorative; but Is. 63:1-6 and Obad. 1-14 15a are prospective.

A connection of 'Obadiah' with Pss. 74 42-43 79 44 60 61 84 63 80 was maintained by Vaihinger in 1869.

(f) Is. 21:1-10 has been as much misunderstood as Ps. 137. It is 'a poetic prophecy on the fall of Edom' (*Crit. Rev.* 11 [1901] 18). The plunderers seen in prophetic vision, whose progress at first produces deep alarm in the prophet (*v.* 3 *f.*), are not Elamites and Medes, but presumably Nabatæans. Verse 2*b* appears to be a gloss, 'concerning Jerahmeel' and Mišsur (Mišri); all its palaces he destroys.' Then the prophet

¹ 'Yahwè sent against him bands of the Cushim, and bands of the Aramaeans [Jerahmeelites], and bands of the Mišrites, and sent them against Judah to destroy it, according to the word of Yahwè which he spoke by means of his servants the prophets.' The emendations have been pointed out already elsewhere; 'Ammonites' is not infrequently miswritten for 'Amalekites,' which comes from 'Jerahmeelites,' and is here a gloss on Aramaeans. The reference to the prophets must be very late; it includes especially Micah.

² Winckler's study of Ps. 137, entitled 'Die golah in Daphne' (*AOF* 2408 *ff.*), dated Nov. 1899, is subsequent in origin to the restoration given here. Winckler has perhaps attempted too much; his textual criticism is not as impressive as his very able historical criticism. The Jewish captives by the myrtles (עֲרֵב) of Daphne near Antioch (168 B.C.) have left us no record of their religious and patriotic melancholy. See MYRTLE.

³ 'Elam' and 'Madai' both came from fragments of 'Jerahmeel'; cp the 'Elam' in Jer. 49:34 *f.*, which should be, or at least originally was, 'Jerahmeel.' See PROPHET, § 45.

explains how Yahwè directed a seer to be set on the look-out, and how at first he saw something which apparently boded no good, but how, when he saw more clearly, he exclaimed, 'Fallen, fallen is Jerahmeel; its palaces he has broken, has levelled to the ground.' Here, again, a strict exegesis of MT is impossible, and only after much practice elsewhere should the corrector try his fortune. See *Crit. Bib.*

(g) The story in Jeremiah is the awful one of which the hero is Ishmael b. Nathaniah (Jer. 40:7-41:18). Elsewhere (JEREMIAH [BOOK], § 6, col. 2378) the narrative is viewed as a Midrash. It may be so indeed; but Jer. 41:10 seems to be based on fact. Ishmael, according to the common view, was a member of the royal house of Judah (cp ISHMAEL, 2). Really, however, he was a Jerahmeelite,¹ and although temporarily employed as a Jewish captain, his sympathies were with the Jerahmeelites. The statement that he 'carried captive all the rest of the people that were in Mizpah, . . . and departed to go over to the Ammonites² [Jerahmeelites?]', may be a reminiscence of the fact which another writer, in Obad. 14, describes as 'cutting off his [Judah's] escaped ones.'

(h) There is no doubt great attractiveness in the mythological explanation of the Book of Esther (see ESTHER, PURIM). It is possible, however, that underlying the present story there may be an older one which related to a massacre of Jewish captives in the land of Jerahmeel. Haman (Heman?) the Agagite is certainly more at home in Cushan-rehoboth than in 'Shushan the palace.' 'Mordecai,' too, must originally have been a corruption of 'Carmeli' or of some other modification of 'Jerahmeeli,'³ and 'Esther' may come from 'Israëliith.' This is not the place to examine fully into the basis of the existing narrative; we simply adopt a theory, for which there are many parallels in other parts of the OT, and notably in the apocryphal Book of Judith. In neither of its forms can the story of Esther have been historical; but still it may have a historical kernel in the tradition of barbarous cruelty shown by the N. Arabians to Jewish captives. See PURIM, § 7.

(i) The Book of Judith, too, in its present form may, as Winckler thinks (*AOF* 2274 ff.), contain mythological elements. But the story of the siege of Bethulia (Beth-el = Jerusalem?) by Moabites, Edomites, and Ammonites (Misrites, Edonites, and Jerahmeelites?) may have been told long before it was committed to writing, and so became the warp on which a great romancer wove his richly embroidered tale. 'Miššur' (the N. Arabian Mušri) became 'Asshur,' and so a place was ready for the occupation of the famed Nebuchadrezzar (see *Crit. Bib.*).

The origin of the first part of Obadiah has now been shown. It is primarily a prophetic announcement of 'tidings' (שְׂמוּעָה) which 'we have heard

8. Origin of Part II. [or, as Jer., 'I have heard'] from Yahwè, relative to a judgment upon Edom. In setting forth the causes of this act of strict retributive justice, however, the writer gives us a commemorative summary of the facts of the great long-past catastrophe, when Edom and its neighbours assisted the ruthless Babylonians. As to the date, we can only say that it must have been later than 588, but not so late as 312. Cp LAMENTATIONS.

The second part, as we have seen, must belong to a later period. Its literary weakness and the strong interest which it reveals in eschatology, together with its implied assumption that the Negeb is in the hands of the Edomites (who have been gradually driven from their ancient seats by the Nabataeans), and the absence

¹ 'Jerahmeel' comes from יְרַחְמֵאל, 'of the race of Jerahmeel.' Nathaniah, too, is probably a distortion of the ethnic Ethani, 'Ethanite.'

² The confusion between 'Ammonites' and 'Amalekites' (Jerahmeelites) already referred to.

³ See MORDECAI. By near or distant origin, though not in sentiment, the personage spoken of was a Jerahmeelite.

of any trace of an acquaintance with it in Jer. 49:7-22, combine to prove this. The expressions in MT (*e.g.*, נָלִיתָ הָרֵל הַזֶּה, and סָפַרְךָ, v. 20) which have often been used as indications of date are valueless for us, because solely due to corruption of the text. Several of the passages, however, referred to for Pt. I. are almost, or quite, equally illustrative for Pt. II.; in particular perhaps Joel 3 [4] 19, because Joel, or the writer who takes this name, has apparently been influenced by both parts of our Obadiah (see references in § 4).

In taking leave of our book it may be remarked that the fulness with which it has been treated has been partly dictated by regard for the Book of Psalms. The background of many psalms being similar to that of Obadiah, we may venture to hope that we have in some measure prepared the way for a more effective treatment of these difficult but fascinating compositions. Perhaps we may indicate Ps. 22 as a portion which will gain much from a clearer view of the picture in Obad. 11-14.

OBAL (עֹבָלָה), Gen. 10:28† = I Ch. 1:22, EBAL, 2.

OBDIA (ὀβδία [A]), I Esd. 5:38 = Ezra 2:61, HABAIAH.

OBED (עֹבֵד, 'servant,' might be a shortened theophorous name; cp Ar. 'abd, etc., ωβηδ [BAL], 1ωβηδ [A in 1-4]; but it more probably comes from a clan-name. Has it not been altered from 'Arābī, 'an Arabian'? Cp OBADIAH, OBED-EDOM, and note that 6 is called b. Gaal—*i.e.*, probably b. Jerahmeel; cp GILGAL, GILEAD, both of which names may be similarly explained). See, however, GAAL, § 1.

1. B. Ephlath, a descendant of Sheshan (I Ch. 2:37 f.).
2. One of David's heroes (I Ch. 11:47, ωβηθ [BN]). See DAVID, § 11, n. 3.
3. B. Shemaiah b. Obed-edom (I Ch. 26:7).
4. Father of Azariah [15] (2 Ch. 28:1).
5. Father of Jesse (Ruth 4:17:21 f. [P], I Ch. 2:12, ωβηθ [A]).
6. Father of GAAL (*q.v.*); MT, less correctly, EBED.

OBED-EDOM (עֹבֵד אֵדֹם, 'servant of Adōm';¹ cp Ph. עֲבֵד אֵדֹם, *CIS* 1, no. 295, עֲבֵד אֵדֹם, *ib.* 365, and possibly Punic and MH אֲדֹמָן; ἀδελδαρα, ἀδελδομο, etc., see below; ωβελδαρας [Jos. *Ant.* vii. 4:2]), as the text stands, a Philistine of Gath, but according to an emendation of MT,² a Rehobothite, mentioned in the

¹ Is אֵדֹם the name of a deity? As in the case of אֲדֹם, the name of the ancestor of the Edomites (see EDOM), opinions are divided. It has even been doubted whether the two 'Edoms' are to be connected (Nöld., *Duhl*). אֲדֹם may conceivably be a god, but אֲדֹם (or אֲדֹם), but not אֵדֹם. The present writer (following We., *HC* (3), 47, n. 2; St. *GLI* 1:121; WRS, *Rel. Sem.* (2), 42, n. 4, and others) considers אֲדֹם to be at any rate a divine name. It is true that not all compounds of עֹבֵד are theophorous (Baeth. *Beitr.* 10, n.); but Baethgen's rendering 'servant of men' has nothing to recommend it. Egyptian inscriptions referred to by W. M. Müller (*As. u. Eur.* 315 f.) seem to favour this view; we find a divine name A-tu-mā, which reappears in a (N. Pal.) city compounded with Šamaš (the sun-god). A-tu-mā appears to correspond to a Hebrew divine name אֲדֹם. According to WMM, the older form of Edom was אֲדֹם, but Thotmes III. and Amenhotep II. heard it pronounced with an *a* (for *o*); the *a* in some of אֲדֹם's forms will be noticed. Possibly, Abdādum is as near the true pronunciation as we can get. Following Š's readings, Klo. takes the name to be a corruption of עֲבֵד הָרֵד עֲבֵד אֲדֹם. On the whole subject, cp Nöld. *ZDMG* 40:166-42:470 and Baeth. *Beitr.* 10, n. 3, who are on the side opposed to WRS. Reference may be made also to Röscher, *ZDMG* 38:646 (1884) who treats Edom as a divine name and identifies with *Kozah* (see EDOM, § 12). See also JEROSHAPHAT, col. 2352, n. 1.

² [See *Crit. Bib.*, and cp REHOBOTH. According to this theory, עֲבֵד אֵדֹם ('Obed-edom the Gittite') has been corrupted out of עֲבֵד אֵדֹם הַרְחֵבִית ('Arab-edom—*i.e.*, Arabia of Edom—the Rehobothite'). For a parallel to 'Arab-edom' see SOLOMON'S SERVANTS [CHILDREN OF]. Here, however, the

history of the ark in David's time; for three months he is said to have sheltered the ark of Yahwè in his house (2 S. 6:10; *αβεδαδομ* [A], v. 11, -*δαν* [L]). Difficult as is the story to which this passage belongs (see ARK, § 5, PEREZ-UZZAH, REHOBOTH), there is almost greater need for historical criticism in the narrative into which it has been introduced (with little variation) by the Chronicler (1 Ch. 13:13 f.; *αβεδαδομ* [B], v. 14; Ⓞ¹ substantially as above). That 'all Israel' joined David in bringing up the ark to Jerusalem, we know from 2 S. 6:15. The older narrative in its present form does not state how 'all Israel' came to be with David, and the Chronicler cannot be blamed for supposing that they had been summoned to escort the ark. Then follows, according to the Chronicler, the institution by David of a sort of musical service. Priests, Levites, and singers in great numbers are present, and among them we meet with Obed-edom,¹ a singer and a doorkeeper (1 Ch. 15:18; *αβεδομ* [B], *αβεδομ* [N], *αβεδομ* [L], v. 21 and v. 24, *αβδοδομ* [N in v. 24], *αβδεδομ*, -*ωμ* [L], v. 25 *αβδοδομ* [BN], *αβεδαδαν* [L]; 1 Ch. 16:5, *αβδοδομ* [BN], *αβδεδομ* [L]). See PORTER.

Obed-edom appears in Ch. as the 'son of Jeduthun' (1 Ch. 16:38, *αβδοδομ* [BWA], *αβδεδομ* [L], a Merarite Levite), and the head of a house belonging to the Korahites (1 Ch. 26:4 ff. [*αβδοδομ* (BA throughout, except *αβδεδομ*, A once in v. 8), *αβδεδομ* (L)]; contrast the number here with 16:38); and it is especially stated, 1 Ch. 26:5, that 'God blessed him,' a statement obviously based on 13:14. Obed-edom is again referred to in 2 Ch. 23:24 (written *πλεμ* *ομο* 'y; *αβδεδομ* [H], -*δοδομ* [B]), *αβδεδομ* [A], -*εδομ* [L], where, however, the text of the original document (= 2 K. 14:14) has been modified by the Chronicler or the author of the Midrash, from which he may have drawn (see Kittel in *SBOT*). Cp GENEALOGIES I., § 7 (ii.); also PSALMS, § 26 (10), where Cheyne discusses the obscure name Jeduthun.

S. A. C.

OBEISANCE, to make, or do (וְיִשְׁתַּחֲוֶה), Gen. 37:43 28 Ex. 18:7 etc., AV; also in RV in several places where AV has 'bowed himself,' 'did reverence,' or (2 S. 16:4, of Ziba) 'humbly beseech.' 'I humbly thank thee' expresses Ziba's meaning better. Prostration might, it appears, be performed not merely on entering the presence of a superior, but also on receiving a favour from him. See SALUTATIONS.

OBELISKS (מצבות), Jer. 43:13 RV^{mg}. See MASEBAH.

OBEETH (ωβηθ [A]), 1 Esd. 8:32 = Ezra 8:6, EBED, 2.

OBIŁ (with long ī; אוביל, 'camel-driver,' cp ABEL, and Dozy, *Israel. zu Mekka*, 194, or possibly one of the distortions of 'Jerahmeel'; cp SHAPHAT (v. 29) = Zephathi, the name of David's keeper of the camels [Che.], 1 Ch. 27:30 (*αβιας* [B], *οββ*. [A], *ωβιλ* [L]). See ISHMAEL, § 2.

OBLATION. For מִנְחָה, *minhāh*, מִנְחָה, *korbān*, תְּרוּמָה, *tērūmah*, תְּרוּמַת, *tērūmityāh*, see SACRIFICE. For חַטָּאת, *maš'eth*, see TAXATION AND TRIBUTE.

OBOTH (אבות), a stage in the wandering in the wilderness, Nu. 33:43 f. (*σωβωθ* [B, but *ωβ*. Ba in Nu. 21:10 f.], *ωβ*. [AFL]). Probably a corruption of עֲבֹתָה (or עֲבָתָה). See WANDERINGS.

OCHIEL (οχιηλος [BA]), RV *Ochielus*, 1 Esd. 19, = 2 Ch. 35:9, JEIEL, 8.

OCHIM (אחים), Is. 13:21, AV^{mg}. See JACKAL, 3.

OCHRE, RED (אדום), Is. 44:13, RV^{mg}, RV PENCIL.

OCIDELUS (ωκειδηλος [A]), 1 Esd. 9:22 = Ezra 10:22, JOZABAD, 7.

OCINA (οκεινα [BA], ΤΟΥΣ ΚΙΝΔΙΟΥΣ [N^{c-a}; N^b has a shortened text]), mentioned in Judith 2:28 along with Tyre, Sidon, and Sur (see SUR), may represent עֲבָתָה, or perhaps יִנְיָ (see PROLEMAIS). So, already, Grotius.

most important point is the assumption that 'Obed-edom' was a native not of the Philistine city of Gath, but of a place in the Negeb where Yahwè was known and worshipped (Che.).

¹ The reason for the transformation of Obed-edom, the Gittite or Rehobothite, into a Levite may be gathered from 1 Ch. 15:2 (cp PEREZ-UZZAH). It may be compared with the transformation of ZADOK (2:2): cp GENEALOGIES I., § 7 [v.]. See also We. *Prol.* 174 f.; Kue. *Eint.* i. 2:150 f.

OCRAN, RV Ochran (אֲכָרָן; εχραν [BAL]; cp ACHAR [ACHAN], an Asherite, father of Pagiel (Nu. 1:13, etc. [P]).

ODED (אֲדָד, cp אֲדָד, Iddo; ωδιδ [BAL]).

1. Father of Azariah, a prophet in the time of Asa (2 Ch. 15:1). In v. 8 he himself appears as a prophet. Probably the words '(of) Oded the prophet' or '(of) Azariah, son of Oded the prophet,' should be placed in the margin as a gloss; cp Kittel in *SBOT* (v. 1, *αδδ* [A], v. 8, *αζαριου* [A], *αδδ* [B]).

2. A prophet of Samaria at the time of Pekah's invasion of Judah (2 Ch. 28:9).

ODOLLAM (οδολλαμ [AV]), 2 Macc. 12:38 AV, RV ADULLAM.

ODOMERA, AV Odonarkes, with mg. *Odomarra* (οδομηρα [ANV], οιδομηρα [N*]; *Odaren*), a chief slain by Jonathan the Maccabee in one of his raids from BETH-BASI (156 B.C.); 1 Macc. 9:66. Cp PHASIRON.

ODOURS (θυμιαμα), Rev. 5:8 etc. See INCENSE.

ODOURS, SWEET. 1. אֲדָמִים, *bēšāmim*, 2 Ch. 16:14 etc. See SPICE, BALSAM.

2. רִיחַ, *nīhōth*, Lev. 26:31 Dan. 2:46, but more commonly 'sweet savour.' See SACRIFICE.

OFFERING. See SACRIFICE.

OFFICER, OFFICERS. The word is used in the EV to render eight distinct Hebrew and Greek terms most of which are elsewhere rendered otherwise; indeed, the OT terms which are used to represent official positions are frequently so ambiguous or of so extended a meaning, that a consistent translation would have been almost hopeless.

The words in question are —

1. סָרִיס, *sāris*. See EUNUCH.
2. שֹׁטֵר, *šōṭēr*. See SCRIBE.
3. נֹצֵב, נָצִיב, *nīṣāb*, *nāṣīb*. See DEPUTY; SAUL, § 2, ii. 1.
4. רַב, *rab*. See RAB, RABBI.
5. פֶּקִיד, *pāqid*. See OVERSEER.
6. Quite generally, מְבַרְכֵי הַמֶּלֶךְ, *mevārḵē ha-mēlek*, Esth. 9:3, RV 'they that did [the king's] business.'
7. *πράκτωρ*, Lk. 12:58, RV^{mg}. 'exactor'—*i.e.*, strictly, exactor of the fine assigned by the judge; Symm. gives *πρ.* for *πρῶν*, 'creditor,' Ps. 108 [109] 11. The word also occurs in Ⓞ of Is. 3:12, and Aq. Theod. Is. 60:17. In the Egyptian papyri *πράκτωρ* may mean 'the public accountant.'¹ Altogether the word is too vague, and Mt.'s *ὑπηρέτης* to be preferred. Cp Jülicher, *Gleichnisse*, 2:242.
8. *ὑπηρέτης*, lit. 'servant'—*i.e.*, beadle or bailiff, Mt. 5:25; Lk.'s word *πράκτωρ* is misleading as suggesting a reference to a fine. Cp Jn. 7:32 46 18:3 12 Acts 5:22.
9. In Jn. 4:46, RV^{mg}. has 'king's officer' for βασιλικός. See NOBLES, 11.

On royal officers, officers of state, see COUNSELLOR, DAVID, § 11, GOVERNMENT, ISRAEL, §§ 21, 64, also ASIARCH, DUKE, 2 (דוכ), GOVERNOR, NOBLES, PRINCE, SHEBNA, TIRSHATHA, TREASURER, 2 (רצ); cp (for *ἐθνάρχης*), DAMASCUS, § 13, ETHNARCH; (for *ἐπαρχος*) SOSTRATUS; (for *ἡγεμών*) ISRAEL, § 90; and (for *שֹׁטֵר*, *שֹׁטֵר*) SCRIBE.

Several general terms are used in referring to ecclesiastical officers² (שֹׁטֵר see OVERSEER; נָשִׂי, *šōṭēr* see PRINCE, 2 f.); see further GOVERNMENT, §§ 27, 31, ISRAEL, §§ 81, 111, LAW AND JUSTICE, § 9 (7), PRIEST.

On the officers of the judiciary and parochial systems see GOVERNMENT, §§ 16, 19, 21, LAW AND JUSTICE, § 8 f., PROCURATOR.

On the various military terms see ARMY and cp CAPTAIN, CHARIOT, § 10; (for שֹׁטֵר) OVERSEER; (for רַב) PRINCE, GOVERNOR.

OG (אֲוֹג, and [1 K. 4:19], אֲוֹג; ωγ [BNAFRTL], see below), 'king of Bashan, who was of the remnant of the Rephaim, who dwelt at Ashtaroth and at Edrei,' etc. (Josh. 12:4), also referred to, with SIHON (q.v.), as 'a king of the Amorites beyond Jordan' (Dt. 3:8 4:47).

¹ Mahaffy, cited by Deïssm. *Bibelstudien*, 152.

² On the separation of church from state see EZEKIEL II., § 24; the story of the revolt of KORAH (2:7., § 1, col. 2687) shows the repugnance felt towards the exercise of civil authority by the priestly party.

OHAD

For the history of Og ('Og) see BASHAN, REPHAIM ; on the geography of his kingdom, see again BASHAN ; and on his 'bedstead (?) of iron,' see BED, § 3. The question whether the story of Og is not really due to an early error in the text, and whether the original story of Sihon-Og did not refer to the wars of Israelite tribes in the far S., will be briefly treated at the close of the article.

It may be noticed here that though the tradition of the defeat of Og at Edrei is probably pre-deuteronomic, it is only (as the text now stands) by writers of the deuteronomic school, and those influenced by them, that the tradition is referred to. For the references, see BASHAN, § 4, and observe that Nu. 21 33-35 is no exception (cp Dt. 19. 47 ; Bacon, *Triph. Trav.* 211 ; Di. Nu.-Dt.-Josh. 133). It is possible, however, that in Nu. 247, 'his king shall be higher than Agag,' it is Og king of Bashan who is meant, אגג (Agag) and עוג (Og) being very easily confounded (cp עב* Dt. 31 13 447 ; פגג).¹ It is also noteworthy that the kingdom of Og is specially said to have included Salech or Salhad, which, it is maintained elsewhere (see GILEAD, RAMOTH-GILEAD), probably filled a prominent place in the earliest Hebrew traditions. Gen. 31 46 ff. seems to point to a peaceable occupation of Salech by the Jacob-tribe (see GILEAD) ; but the subsequent struggles for its possession between Israel and the Aramæans quite account for the rise of a different tradition—that preserved in Dt. 31-3 (Nu. 21 33-35).

As to the name 'Og,' it seems possible that the interchange of 'Agag' (פגג) ; see Nu. 247) and 'Og' in עב* Dt. 31 13 427 was really justifiable. We cannot absolutely prove it ; but it is very probable that the REPHAIM (רפאים), to the 'remnant' of whom Og belonged, were identical with, or closely allied to, the Jerahmeelites (the Habiri of the Amarna tablets?), who seem, if our textual criticism elsewhere is sound, to have spread much more widely in Palestine than has been generally supposed. Now the identification of the Amalekites with a section of the later Jerahmeelites is almost beyond doubt. If the Rephaim may be identified with a section of the older Jerahmeelites, we can well understand that in the far south land and in the fruitful Bashan there lived chieftains who bore virtually the same name—Agag or Og. We can also now account for the description of Og as a king of the Amorites. Waiving the abstruse question whether the Amorites and the Jerahmeelites were not originally one and the same people, and assuming that they were at any rate regarded in OT times as distinct, it is worth while to point out that 'Mamre (?) the Amorite' was confederate with Abram (Gen. 14 13), and Abram originally the hero of the Jerahmeelites, one branch of whom were the Zarephathites or Rephathites. The civic community of Jerusalem, too, was probably partly Amorite, partly Jerahmeelite, or, as Ezekiel puts it (16 3 45) '[its] father was an Amorite, and its mother a Rehobothite' (so we should read, for 'Hittite' see REHOBOTH), for the arguments in favour of which, derived from 2 S. 56 8, see *Crit. Bib.* and cp ΜΕΡΗΒΟΣΗΘΗ, ZION.

As stated elsewhere (MOSES, § 18), it is probable that the primitive tradition spoke of the conquest of the Jerahmeelite or Arabian land of Cush (we simply state the tradition, without criticising the facts). Sihon (g.v.) is very possibly a corruption of Cushan ; the early tradition spoke of Og or Agag, king of Cushan, who reigned at Heshmon (cp Josh. 15 27). The text of the written tradition came down to a deuteronomic, or probably pre-deuteronomic, writer in a partly corrupt form, and he, under the influence of a definite historical theory, recast the imperfectly read tradition, and made it refer to the E. of Jordan. This is only a hypothesis ; but the phenomena which suggest it are parallel to the phenomena which in other cases have enforced the production of similar hypotheses. T. K. C.

OHAD (אָהַד), a son of Simeon ; Gen. 46 10 (אָדָד [AD]). אָנַעֲוֹת [L] ; Ex. 6 15 (אָדָד [B], אָדָדָא [A], אָדָד [FL]). The name probably comes from a ditto-graphed אָהַד (ZOHAR) ; hence it does not occur in ll lists, Nu. 26 12 I Ch. 4 24. T. K. C.

OHEL (אֹהֶל) is represented as one of the sons of Zerubbabel in I Ch. 3 20 (אָהַל [B], אָהַל [A], אָהַל [L]) ; but really, as so often, אֹהֶל is a fragment of אֹהֶל. So also is the next name בְּרַחֵל (cp ברַחֵל, Barachel, JOB, BOOK OF, § 9), and the question arises whether the editor of I Ch. 3 20 did not misread his text, and split אֹהֶל into supposed names of two sons, Ohel and Berechiah. Cp ZERUBBABEL. T. K. C.

¹ Nu. 24 23 ע also reads και ἰδὼν τὸν Οὔγ [BA ; Γωγ, L] και ἀναλαβὼν τὴν παραβολὴν κ. τ. λ.

² צ and נ confounded, as when צוץ (ψηστειάν, ע) becomes נצץ in MT of Is. 1 13 ; also n and h.

OIL

OHOLAH (אֹהֶלָה), Ezek. 23 4 f. 11 22 36 44†, where AV AHOLAH (g.v.).

The usual explanations, 'she who has her own tent' (sanctuary), and 'she who has tents' (sanctuaries), are against analogy. The former requires אֹהֶלָה, 'tent (or, dwelling) of Yahwé,' and observe that in compounds of אֹהֶל in Sab. (אֹהֶל־בַּעַל, אֹהֶל־בַּעַל) and Phœn. (אֹהֶל־בַּעַל, אֹהֶל־בַּעַל) the second member is a divine name. See HIGH PLACE, § 3, col. 2066, n. 1. S. A. C.—T. K. C.

OHOLIAH (אֹהֶלְיָהוּ, § 47), Ex. 31 6 etc. RV, AV AHOLIAH (g.v.). Cp HIRAM, col. 2074.

OHOLIBAH (אֹהֶל־בַּעַל), Ezek. 23 4 11 22 36 44†, where AV AHOLIBAH (g.v.).

'She in whom are tents,' can hardly be the meaning. Read perhaps אֹהֶל־בַּעַל, 'tent (or, dwelling) of Baal.' Cp HEPH-ZIBAH. S. A. C.—T. K. C.

OHOLIBAMAH (אֹהֶל־בַּמַּיִם, § 47), Gen. 36 2 ff. and 36 41 I Ch. 1 52†, RV, AV AHOLIBAMAH (g.v., I and 2).

OIL. In the OT mention is repeatedly made, especially in Dt., of 'corn, wine, and oil' as the three chief products of the land of Canaan. By the last of this triad of God's good gifts is meant exclusively olive oil ; for although, as we shall see, a considerable variety of vegetable oils was known in later times, the oil so frequently mentioned by OT writers, with one late exception (Esth. 2 12, 'oil of myrrh'), is that expressed from the berry or drupe of the olive-tree. For this reason the latter receives the name *zēth zēmen* (זֵיתֹן שֶׁמֶן, Dt. 88) or *zēth yishār* (זֵיתֹן יִשָּׂרָאֵל, 2 K. 18 32 ; see OLIVE). Oil in its manifold applications is denoted by the general term *šemen* (שֶׁמֶן), sometimes by the more descriptive term *šemen zayith*, olive oil (Ex. 27 20 30 24 Lev. 24 2) ; oil fresh from the oil-press received the special designation *yishār*, 'fresh oil,' a term which bears the same relation to *šemen* that *trōfē*, 'must, new wine,' does to *yayin* (see WINE). The place of the olive—which, in the older Hebrew as in English, bore the same name as the tree (*zayith*, Dt. 28 40 Mic. 6 15)—in the dietary of the Hebrews is discussed elsewhere (FRUIT, § 9).

When we consider the very many biblical references to oil, it is certainly remarkable that there should be so few hints as to the mode of its preparation.

2. Preparation. In early times the Hebrews seem to have been content to tread the olives with the feet (Mic. 6 15) as they trod the grapes, in a rock-hewn oil-press (cp בְּסָרְעַל בָּבָא *Bābā Mēšē'ā* 10 4 and the name GETHSEMANE), from which the expressed oil flowed into the adjoining vat (אָבָה Joel 2 24 ; for details see WINE). As the olive harvest was later than the vintage, the same presses and vats were probably used for both wine and oil. In later times—perhaps as early as Job 24 11 (see Budde, *HK, in loc.*)—other and more effective processes were adopted, although it is not till we reach the Mishna that we find references to oil-mills and oil-presses by name. From a comparison of the data in the Mishna with the fuller statements of Roman writers, on the one hand, and of the remains of ancient apparatus with the present-day practice in Syria² on the other, the following details have been gathered. The best oil, then as now, was that yielded by the olives before they were fully ripe. Berries that by the time of gathering were still hard had to be softened by being left for some time in a trough or vat (*ma'āfēn*, מַעְפָּן, *Tohōr*. 9 1 and often ; see Heb. Lexx. for obscure word *āfēn*, עֶפֶן, Job 21 24, which some would connect with the מַעְפָּן of the Mishna). From a passage in *Mēnāhōth* (8 4 f.) we

¹ Aholiab, P's artificer, a Danite like Hiram (g.v., 2), may have borne this name (אֹהֶל־בַּעַל אֹהֶל־בַּעַל, the alteration was no doubt intentional). See, further, HIRAM, 2.

² For the modern processes of oil-making in Syria see the works of such writers as Robinson, Thomson, Van Lennep, and especially the details given by a native in Landberg, *Proverbes et dictons du peuple arabe*, 11 ff.

learn that it was usual to subject the olives to three successive processes for the complete expression of the oil, which of course deteriorated in quality with each process.

i. The first process began by gently pounding (עָרַב) the olives (וְיָחִים וְנִקְחָם, *Tērūm*. 18 f.) in a mortar; the pulp was then poured into a wicker or rush basket (סֵבֶה), which, acting as a strainer, allowed the liquid (שֶׁהָיָה, *Tohr.* 92) to run into a vessel underneath. The oil which would presently float on the top was skimmed off, we must assume, leaving the *amurca* (to use the Latin term) behind. The oil thus produced was of the finest quality—perhaps alluded to in Am. 66—and was, we have little doubt, the שֶׁשֶׁן קָחָה 'the beaten oil' of the OT. Indeed, the Talmud expressly gives the equation שֶׁשֶׁן קָחָה = שֶׁשֶׁן קָחָה (*Mēnāh.* 86 b).

ii. In the second process, the basket with the pulp was conveyed to the oil-press (see below, § 3), where a second quality of oil was expressed by means of the press-beam.

iii. The third process—we still follow the authority above cited—consisted in submitting the remaining pulp to the action of the oil-mill (see below, § 3), after which it was submitted as before to the press-beam. The oil in this case, needless to say, was of inferior quality. No mention is made of the application of heat—either by the addition to the pulp of hot water, or otherwise—which is now universally used to expedite the flow of oil. The processes described were carried through either in the olive-garden itself, as the remains of oil-presses in different parts of Palestine amply attest, or in a special building, the בֵּית הַדֶּבֶר or press-house of the Mishna, attached to the owner's house.

In *Bābā Bathrā* 45 (with which cp *Ma'āšēr.* 17) we have an interesting inventory of the contents of such a

3. Mills and presses. The press-house, which was evidently constructed on the same lines as the Roman *torcularium* (see details of construction with illust. in Blümner's *Technologie* 1328-348 and the articles *torcular*, *torcularium*, *trapetum* in the dictionaries of Rich [6]) and Smith [6]). The essential apparatus of the press-house consisted of the mill and the press. We have seen that the older mortar (see MORTAR) was still used in NT times in the preparation of the finest oil from the choicest berries; but we may safely assume that, in the manufacture on a large scale, the berries were crushed in the oil-mill (*Tohr.* 98, more precisely עֵשֶׂן וְיָחִים זָבִיב. 42). In construction the oil-mill differed little from the primitive mill still used in Syria.

The place of the mortar was taken by a circular stone trough—the סֵבֶה or 'sea' of the Mishna—6 to 8 ft. in diameter, to judge from extant specimens. In this the olives were crushed by means of a stone (סֵבֶה), in shape like a millstone, of varying diameter and thickness. This stone was placed vertically, not horizontally as in the flour-mill, in the hollow understone or trough, and was made to revolve, by means of a pole or beam inserted through its centre, round the inner circumference of the trough. The parts described are still found in all parts of Palestine (see, besides writers already cited, Oliphant's *Haifa*, 95).

The main feature of the oil-press, from which it derived its name, was the press-beam (*kōrāh*, קָרָה, *pretum*), which was simply a lever of the 'second' class. To provide a fulcrum, one end of the beam was inserted at a convenient height into the face of a monolith in the garden, or into a wooden tie kept immovable by two upright beams (*bithulāth*, בֵּתוּלִית, the *arbores* of the Roman *torcular*), fixed into the floor of the press-house (see diagrams of construction in Rich, Smith, etc., cited above). The crushed pulp or paste from the mill was placed in special baskets (סֵבֶה, עֵבֶל, etc.) which were piled one upon another and covered with flat boards (עֵבֶלִים) to distribute the pressure; the press-beam was then lowered and the requisite pressure brought into play by means of a windlass (עֵבֶלִים) operating by ropes

attached to the free end of the beam. In a simpler press of this kind (probably the קָרָה of *Shēb'ith* 86) a less powerful pressure was obtained, as at the present day, by hanging large stones to the end of the beam. The press was worked by press-men (בְּקָרִים, *Tohr.* 98 101). Still another form of press was, and still is, in use in Palestine. Two upright stones were erected a few feet apart and a third, of great weight, laid on the top, the whole having the shape of a Greek Π.¹ Failing the last, a wooden cross-beam was inserted in the opposite faces of the two upright stones. The baskets were placed directly underneath the cross-beam, and the intervening space filled with logs of wood or heavy stones (עֵבֶלִים, עֵבֶלִים, etc.); the pressure was increased by the insertion of wedges between the logs or stones (see Schick's description of the actual remains of both kinds of presses in *ZDPV* 10148 ff. with plans). Every press-house contained, further, the necessary gutters or conduits (עֵבֶלִים *Ma'āšēr.* 17) for conducting the expressed liquid to the vats (see Schick's diagrams, *l.c.*), in which it was allowed to settle and the oil gradually separated from the *amurca* and other impurities. When duly purified the oil was stored in jars (see CRUSE) and skins (נְבוֹת *Shabb.* 152). The refuse (שֶׁשֶׁן) of the oil-press was used as fuel (*Shabb.* 31 41); perhaps, also, as in modern times, in soap-making (cp the 'washing-balls' of Sus. 17). The oil produced at Tekoa and at Ragab in Peræa was reputed the best in Palestine (*Ma'āšēr.* 83).

In warm climates nature has taught even the savage to ward off the injurious effects of the sun's heat upon the skin by the application of animal fat, in

4. Uses. OT once at least also denoted by the word *šemen* (Ps. 10924). In oil-producing countries, such as Canaan, the more pleasant-smelling oil of the olive took its place. In Egypt, also, oil was regarded as a necessary of life, scarcely less important than bread itself. The Egyptian workman, according to Erman (*Egypt*, 231), 'had probably to be contented with native fat'; but by all but the very poor oil was extensively used, its importation being one of the most important branches of commerce. Among the Jews at the time of the olive harvest it was not unusual for the olive gatherers to squeeze the oil into one hand and so anoint themselves, or even to squeeze it directly upon the body (*Ma'āšēr.* 41). From Mt. 617 anointing the head (cp Ps. 1415 Eccl. 98 Judith168) appears to have been as much a part of the daily toilet as washing the face. To pour oil upon the head (Ps. 235² 1415 Lk. 746) was a mark of respect for an honoured guest.

In Egypt prevailed a curious practice which is thus described by Erman: 'The oil was not used as we should imagine. A ball about the size of a fist was placed in the bowl of oil; the consistency of the ball is unknown, but at any rate it absorbed the oil. The chief anointer, who was always to be found in a rich household, then placed the ball on the head of his master, where it remained during the whole time of the feast, so that the oil trickled down gradually into the hair. . . . On festival days, all the people poured "sweet oil" on their heads, on their new coiffures. At all the feasts cakes of ointment were quite as necessary as wreaths' (*Egypt*, 231, with illustr.).

In the OT, however, the allusions are more frequent to the use of oil in connection with the bath; thus washing and anointing are named together in Ruth33 2 S. 1220 Ezek. 169 Judith103 Sus. 17, and the same conjunction is probably implied in the more general references, Dt. 2840 Mic. 615. In all these the word for anointing is שָׁחַ, ἀλείψω or χρίω. For the omission of this use of oil in time of mourning, and for other details, see ANOINT, 1. In the same article will be found a full discussion of the important place occupied by oil as the medium of consecration of kings and priests—only once of a prophet י K. 1916—of sacred objects

¹ Remains of dolmens were often used for this purpose.

² Here the verb is שָׁחַ, lit. 'to make fat'; cp יָשָׁח, Judg. 99, of the 'fatness' of the olive-tree.

³ Cp the Hebrew phrase יָשָׁח וְשָׁחַ, 'fresh, sweet, oil' Ps. 9210 [11].

and utensils. To anoint, in this sense, is *נָשָׁךְ*, *χρίω* (hence in Aramaic oil = *ܢܫܝܚܐ*, Ezra 6:9 7:22), and the sacred oil *שֶׁן הַיִּשְׁהָרָה*, 'oil of anointing,' or more fully *שֶׁן הַיִּשְׁהָרָה שֶׁן*, only in P. For its composition (Ex. 30:23-25) see OINTMENT (1).

The practice of anointing was, however, not confined to the living body; the lifeless corpse also, as among Greeks and Romans, was anointed with oil, although in this case oil was usually only the basis of a more costly unguent (Mt. 26:12 Lk. 23:56; cp Mk. 14:3 ff. Jn. 19:40). In Egypt, also, it was the invariable practice to pour oil over the dead body when the process of embalming was finished (Wilkinson, *Anc. Eg.* 3:429 f., with illustr.). In 2 S. 12:11 Is. 21:5 the MT¹ refers to the practice of anointing shields with oil.² This was done, according to the usual interpretations, either to keep them in good condition if they were of leather, or to polish them if made of metal. In view of the sacred associations of the verb used (*נָשָׁךְ*) it is probable that we have here an obscure reference to a consecration of the warrior's weapons before setting out to war. The Babylonians, we know, dedicated foundation-stones, thresholds, etc., by libations of wine and oil. Similar libations may have been part of the solemn dedication of houses among the Hebrews (Dt. 20:5).

There are surprisingly few references in OT to the all-important use of oil in the preparation of food. It is in this connection that the widow of Zarephath's remnant of oil is conjoined with the 'handful of meal' (1 K. 17:12). Unfaithful Israel was fed with 'fine flour and honey and oil' (Ezek. 16:13, 19), but gave no thanks to the divine giver. Yet the fact that an early writer seeks to explain the taste of the wilderness manna by comparing it to some well-known delicacy cooked with oil (*שֶׁן*) Nu. 11:8, RV^{mg.} 'cakes baked with oil' shows that this use of oil was familiar to his readers. Oil, as much as wine, formed part of the ordinary provision for a journey (Judith 10:5 Lk. 10:34).

Further light is thrown upon the daily use of oil for culinary purposes by the place it occupies in the later ritual of the Priestly Code. The gifts offered as 'the food of Yahwè' were those most esteemed by his worshippers in their own daily life. Oil accordingly figures prominently among the offerings to the deity not only among the Hebrews but also among Babylonians and Egyptians as well. In the present arrangement of the Priests' Code it is by no means easy, perhaps impossible, owing to the existence side by side of different strata, to reach a consistent presentation of the development of the 'meal-offering' (see attempted scheme in *Oxf. Hex.* 1:236 ff.). It will be sufficient to note here that in a typical offering the fine flour of which it was essentially composed might be presented in no fewer than four different forms, in each of which oil plays a part.

(1) The flour might, in its natural state, be mixed either with oil (Ex. 29:40) or (2) have oil merely poured upon it (Lev. 2:1); (3) the flour might be first mixed with oil as before, and then shaped into cakes (*חֲלִיטִים*) and baked in the oven (Lev. 2:4 etc.), or (4) first baked in the shape of thin flat cakes (*חֲלִיטִים*) which were then anointed with oil (*שֶׁן*) Ex. 29:2 Lev. 2:4 7:12 etc.).

In the special case of the leprosy-offering (Lev. 14:10 ff.), in addition to a meal-offering of flour 'mingled with oil,' there appears an offering of 'a log of oil' (v. 10), which was first to be 'waved' before Yahwè (v. 12) and then used in the symbolical purification of the leper as prescribed in vv. 15 ff. Oil, however, is absent from the ritual of the sin-offering (Lev. 5:1 ff.) and the

¹ [On the text see the commentaries, and further JASHER, § 2, and *Crit. Bib.*]

² Since the above was written, Schwally also has expressed the view that the anointing of the shield was a religious rite (*Semit. Kriegsaltertümer* [1901], 49).

jealousy-offering (Nu. 5:11 ff.). For the oil required for these purposes, provision is made in the scheme of Ezek. 45:14 (*שֶׁן הַיִּשְׁהָרָה*). A grant of 100 baths of oil was made to Ezra from the royal exchequer (Ezra 7:22; cp 1 Esd. 6:30).

Not the least important of the daily uses of oil was to supply the household with light. The wick of

twisted flax (Is. 42:3), protruding from the nozzle, fed itself from the oil in the body of the lamp (see LAMP). The lamp, if required to burn for a lengthened period, had to be frequently refilled (Mt. 25:3 ff.).

From *Shabbāth* 24 we learn that for the sake of economy it was usual to place an egg-shell, or a clay vessel of similar shape, with a minute aperture at the bottom, upon the mouth (*פֶּה*) of the lamp as a receptacle for the oil that it might more sparingly reach the wick. In the same section (22) we have an interesting list of substitutes for olive oil for illuminating purposes, among them oil of sesame, nut oil, fish oil, and even naphtha (*נַפְתָּה*) and castor oil, *קִיק* (*Shabb.* 21). The oil for the lamps of the tabernacle, and therefore of the temple, had to be of 'pure olive oil beaten' for the light' (Ex. 27:20 Lev. 24:2). It was part of 'the charge of Eleazar, the son of Aaron' to attend to this oil and to the oil of anointing (Nu. 4:16). In the time of the Chronicler the charge of the oil fell to the Levites (1 Ch. 9:29), to a particular division of the priests, according to Pseudo-Aristeas (ed. Wendland, 92).

Oil was used also medicinally by the Hebrews, as by the Egyptians, the Romans (Pliny, etc.), and other ancient peoples. 'Wounds and bruises' were

8. Medicinal use. mollified with oil (Is. 16 RV; 'ointment,' AV).

The Good Samaritan employed a mixture of wine and oil (Lk. 10:34), an antiseptic familiar also to his Jewish contemporaries (Otho, *Lex. Rabbin.* 11). Olive oil is mentioned, along with wine, vinegar, and oil of roses (*רֶחַל שֶׁן*), as an antidote to pains in the loins (*Shabbāth* 14:4). An oil-bath was one of the remedies by which Herod's physicians sought to relieve his excruciating pains (Jos. *Ant.* xvii. 6:5 B/ i. 33:5). The anointing of the leper, above referred to, was not remedial but symbolical. Both ideas are probably to be found in the two remaining NT references to the curative properties of oil (Mk. 6:13 Jas. 5:14).

In order to avoid the risk of ceremonial defilement, the stricter section of the Jews scrupulously avoided using oil that had been prepared by a non-Jew (*Āb. Zārā* 2:5 Jos. *Vita* 13). In the course of the great revolt (66 A.D.) John of Gischala skilfully turned this prejudice to his own advantage by buying oil at a cheap rate in Galilee, where it was abundant, and selling it at Caesarea Philippi and the neighbourhood at eight (Jos. *B/ii.* 21:2, § 591) or ten times (*Vita, l.c.*, § 74 ff.) the purchase price.

Oil, as this incident shows, was at all times an important article of commerce, both in the home trade (2 K. 4:7) and for export. Through

9. In commerce, etc. the markets of Tyre (Ezek. 27:17), the oil of Palestine found its way

to the Mediterranean ports, and was undoubtedly among 'the oil from the harbour' mentioned in Egyptian literature (Erman, *Egypt.* 231; cp Herzfeld, *Handels-geschichte der Juden*, 94 ff.). As a valuable article of necessity and luxury, oil was ever a welcome gift, whether as between individuals (1 K. 5:11, Solomon to Hiram; 1 Ch. 12:40) or nations (Hos. 12:1, Israel to Egypt). For the same reason it figures in the tribute imposed upon a conquered state, as in that of Phoenicia and Coele-Syria to the Persian king (1 Esd. 6:30).

A word may be said in conclusion as to the place of oil in Hebrew metaphors. To the poets the almost proverbial abundance of oil in Canaan suggested the use of oil as a figure of abounding material prosperity, as when it is said that Asher 'shall dip his foot in oil' (Dt. 33:24), or when oil is spoken of as flowing for God's favoured ones from the rock (Dt. 32:13 Job 29:6; cp Joel 2:24).

¹ For this *שֶׁן הַיִּשְׁהָרָה*, see above, § 2, i.

OLD-CHRISTIAN LITERATURE

such title. The justice of the separation may be granted when the question is looked at from the dogmatic point of view; but it is none the less purely dogmatic, and on that very account inadmissible in a scientific research. Moreover, the history of the origin and collection of the books of the NT has long ago enabled us to see that they arose one by one in the ordinary genuinely human manner, and only gradually were gathered together. Not at a single stroke, nor by any special divine or human providence, nor yet in virtue of exceptional talents or, if you will, supernatural gifts denied to other Old-Christian writers or collectors, was this task achieved. It was done by men moved after the same manner as ourselves, men who were the children of their own time and, be it said with all reverence for the priceless work they accomplished, were gifted in very various degrees,—writers, speaking generally, of similar quality and similar endowment with those to whom we are indebted for the other literary productions of ancient Christianity; collectors who, governed by various views regarding the interest of Christian society as they had learned to understand it, brought together a group of gospels, two groups of epistles—the Pauline and the Catholic—neither of which, however, ever had fixed limits. To these were added, though not immediately or even unanimously, Acts of the Apostles and a Revelation of John; also, for a time, in one quarter or another, other writings which in the end failed to gain admission into the Canon. See CANON, §§ 60-76; Zahn, *PRE³*, 9768-796; Van Manen, *Handl. voor de Oudchr. Lett.* 119-123.

The same history enables us to see that the books of the NT were originally coincident with what subsequently came to be described as Old-Christian literature. They form part of it—an essential and highly interesting and important—nay, the most important part. The old distinction between canonical and non-canonical books as regards this literature must be abandoned; NT Introduction and Patristic must no longer be separate studies, they must be amalgamated in that of Old-Christian literature.

In principle this has been recognised at various times during the course of the nineteenth century, and especially

2. Gradual recognition. within the last decades, under the influence of a growing interest in the examples of Old-Christian literature which had not attained canonicity, however little the persons by whom the recognition was made may seem to have been aware of the full significance of their words. Authors of Introductions to the NT were often obliged to discuss more or less fully, besides the books received into the NT, other gospels, Epistles, Acts, Apocalypses, which had arisen in similar circles.

Some of these scholars, such as Eichhorn, actually called their subject a history of Old-Christian literature. Hilgenfeld collected a *Novum Testamentum extra canonem receptum* 1866, 1884⁽²⁾, containing Epistles of Clement, Barnabas, the Shepherd of Hermas, fragments of Gospels and other books.

The philologist Blass in writing his *Grammatik des NTlichen Griechisch* (1896, ET, by Thackeray, 1898) deemed it no longer fitting to confine his attention to the text of the canonical books of the NT, but took account also of the Epistles of Barnabas and Clement, the Homilies of Clement, the Shepherd of Hermas, the fragments of the Gospel and Apocalypse of Peter.

Harnack avowed on the first page of the first volume of his *Gesch. d. altchristlichen Litteratur* (1893)—although for practical reasons he passed over the NT in giving his account of the tradition of that literature, and in his writing on Chronology, (*Chronologie der altchristlichen Litteratur* (1897), dealt with it but in a stepmotherly way—to the primitive literature of Christianity belong above all the twenty-seven writings which constitute the NT.' G. Krüger in his *Gesch. d. altchristl. Litteratur*, 1895, would doubtless have devoted more than a few pages merely to the books of the NT, had not Jülicher been contributing to the same series his *Einleitung in d. NT*.

Holland, meanwhile, had been more thoroughgoing. As early as 1870-1871 an edition of the Apostolic Fathers, translated with introductions and notes had been published by A. C. Duker and W. C. van Manen, under the general title *Oud-Christelijke Letterkunde*. Rauwenhoff in his sketch of a theological encyclopædia (*Th. T.*, 1878, p. 170) had substituted for NT

Introduction and Patristic, 'Original documents relating to the founding of Christianity.' The same two branches of study ceased any longer to be officially recognised when the Bill relating to the Higher Education was passed in 1876. The Act speaks only of Old-Christian literature—an expression including both branches, as was set forth and vindicated by the present writer in his inaugural address (*De Leerstoel der Oud-Christelijke Letterkunde*, 1885). J. M. S. Baljon, ten years later, expressed himself in substantial agreement with this view in his inaugural address at Utrecht (*De Oud-Christelijke Letterkunde*, 1895). The same author in issuing a Dutch edition of Cremer's *Biblisches-theologisches Wörterbuch der NTlichen Gräcität* made so many additions as to make it in reality a first essay towards a Lexicon of Old-Christian Literature (*Woordenboek hoofdzakelyk van de Oud-Christelijke Letterkunde*, 1897-1899). Krüger declared himself convinced by the arguments of Van Manen, and wrote under this influence *Das Dogma vom Neuen Testament*, 1896.

At Leyden, since 1885, Hermeneutics and Textual Criticism have been taught, not as formerly with exclusive reference to the NT, but with reference to the whole body of Old-Christian literature. There also was published the first edition of a manual of Old-Christian literature, by Van Manen (1900), in which the old distinction between canonical and uncanonical writings was disregarded, and the material that had formerly been divided into these two was brought under a single category.

As regards the delimitation of this material no unanimity has as yet been reached. In common parlance the expression 'Old-Christian literature' is used so widely as to be supposed to include all literary remains of Christian antiquity that can be regarded as, say, more than a thousand years old.

Thus, for example, R. A. Lipsius entitled his great work *Die Apokryphen Apostelgeschichten u. Apostelllegenden*, 1883-90, in which texts dating from the second, third, fourth, down to the ninth century, and sometimes even of a yet later date, are dealt with, 'a contribution to the history of Old-Christian literature' ('ein Beitrag zur altchristlichen Literatur-geschichte'). Harnack placed upon the title-page of his largely planned *Geschichte der altchristlichen Litteratur* 'down to Eusebius,' and in his preface (I, 1893, pp. viii, x) explained the words as meaning that he does not desire to include the Council of Nice in the scope of his work although taking account of the writings of Eusebius. Moreover, he leaves out of consideration all that relates to the Manichæans, a portion of the Testimonia of Origen and Eusebius, fragments of Julius Africanus, Origen, Eusebius, some things relating to Clement of Alexandria; Hippolytus, Cyprian. Krüger confined his *History* of Old-Christian Literature, 1895, to 'the first three centuries.'

For the last sixteen years the arbitrary character of any such limitation has been continually protested against in Leyden. It is liable to alteration at any moment and has nothing to justify it. Consistency of language is, moreover, greatly to be desired. If the subject of Old-Christian literature be accepted as equivalent to that of NT Introduction plus Patristic, the expression can no longer suitably be employed to denote what might more properly be described as 'Old-ecclesiastical,' or, in a wider sense, 'later Old-Christian literature'—the latter being divided into 'Old-ecclesiastical' and 'Heretical.' The literary remains of most of the church fathers and their contemporaries—the category of church fathers including, according to Roman Catholic reckoning, writers down to the thirteenth century, while in Protestant circles it is limited to the first six centuries—fall outside the limits of Old-Christian literature. This embraces the NT and all that, speaking generally, pertains to it, as dating from the same or the immediately adjacent period, and breathing on the whole the same spirit—a spirit, that is to say, the same, apart from all difference that arises from mutual divergences in the personality, tendency, aim, environment of the writers. The question to be asked is as to what they have in common with one another as distinguished from those who lived at a later period. What spontaneously and immediately presents itself as thus characteristic and distinctive is their attitude towards the NT canon. Irenæus, Clement of Alexandria, Tertullian, and those who followed them hold towards this literature an attitude quite different from that of the 'Old-Christian' writers who preceded. They not only, like some of the latter, show acquaintance with some, or many, of the 'books' that now

OLD-CHRISTIAN LITERATURE

have a place in the collection called the NT; they also appear to recognise these, all of them or some of them, as authoritative for faith and practice—in a word, as holy writ. Here we have a touchstone for discriminating what is 'Old-Christian' from what is not. In this respect there is, as a rule, a marked difference between the Christian literature of an earlier date and that of the later date just indicated; let us say, before and after the year 180 A.D., the date of the principal work of Irenæus, *Against Heresies* (*Ἐπὶ ἁἰρέσεσιν*; according to iii. 33 written in the time of Eleutherus, 173 or 175-188 or 190 A.D.). Here we find a criterion for 'Old-Christian' which does not lie in the whim or fancy of the historian, but in the nature of the case, being supplied by the material itself with which he has to deal. We shall do well, therefore, to adhere to it even should we occasionally find that it is difficult to draw the line with equal precision at all points because in point of fact, strictly speaking, it does not always exist.

Harnack and Krüger follow a classification of the subject-matter which cannot be adopted here partly because they extend their scheme so as to

4. Sub-divisions. come down to Eusebius or to the end of the third century, partly because in point of fact they take no account, or almost no account, of the twenty-seven books of the NT. Nor is it advisable to follow them in their distinction between 'original' (Urlitteratur), gnostic, and churchly literature, with further subdivisions under each of these classes, in view of the fact that before 180 A.D. it is hardly possible to speak of 'churchly literature' at all, that the line between 'original' and 'gnostic writings is difficult to draw, and that the further subdivisions—not the same in Harnack and Krüger—bear witness more clearly to the embarrassment of their authors than to any real endeavour to subdivide the writings in question as far as possible according to their contents.

Harnack, for example, begins with epistles of Paul that had not been received into the Canon, and with gospels, including apocrypha, certainly dating from the so-called post-apostolic age; the 'Preaching' and other non-canonical works of Peter, the Acts and the Preaching of Paul, the Apocalypse of Peter, further epistles of Paul, epistles of Clement, the Shepherd of Hermas, the epistle of Barnabas . . . Papias, Polycarp . . . Ignatius, the Didaché . . . apologies of Quadratus, Aristides, Justin . . . and apocryphal Acts of Leucius, . . . Thomas, John, etc. This is what Harnack calls the Christian 'original' literature (Urlitteratur), which is followed by the gnostic, whilst in the third division he deals with 'Christian writings from Asia Minor, Gaul, and Greece,' dating from the second half of the second century, including epistles of Theodotus and the churches of Lyons and Vienne, apologies of Melito and Athenagoras.

Krüger divides 'Original Christian' (Urchristliche) literature into Epistles, Apocalypses, Histories (Gospels and Acts), Didactic Writings, but discusses (to mention one or two examples) the Gospels of Valentinus and Marcion under gnostic, the apologies of Quadratus, Aristides, and Justin under churchly literature.

It is better to classify the writings according to their different literary forms, and in doing so to adhere as far as possible to tradition and thus avoid anticipating any estimate we may have to form regarding the Old-Christian writers at a later stage of our investigations.

Guided by these principles, we propose to adopt the following classification of Old-Christian literature:¹

5. Survey. Gospels, Acts, Epistles, Revelations, Apologies, Didactic Writings. In the present article it will not be possible to do more than give a brief survey of the contents of these six classes, further reference being made on many particulars to separate articles in this Encyclopædia (although the present writer must not be held as in every case concurring in the conclusions there formulated).

I. GOSPELS (§§ 6-8).

In Old-Christian literature, the gospels first demand

¹ It is the classification followed in the University instruction at Leyden.

our attention. Besides the usual word gospels (*εὐαγγέλια*), we find such designations as

6. Gospels: the oldest gospel. Gospel-writing (*γραφὴ εὐαγγελίου*), Sayings of the Lord (*λογία κυριακά*), Records (*διηγήσεις*), Memoirs of the Apostles (*ἀπομνημονεύματα τῶν ἀποστόλων*), Traditions (*παραδόσεις*), The Acts of Jesus (*αἱ τοῦ Ἰησοῦ πράξεις*), The Book of Days (*ἡ βιβλος τῶν ἡμερῶν*). These writings all relate to the life and work of Jesus Christ. They have a twofold character—historical and doctrinal-practical. They are not mere memoirs, drawn up by disciples or friends, for the purpose of preserving in the memory of contemporaries and posterity the recollection of what Jesus of Nazareth was, aimed at, did, said, experienced; they are more: they are handbooks in which each writer in his own way sought to make known Jesus Christ, the Lord, the Son of God, in all that he was for the world. 'History' here is employed in the service of religious instruction.

As for their origin, the gospels, on close comparison, point us back to (i.) an 'oldest' written gospel (*τὸ εὐαγγέλιον*) which unfortunately does not exist for us except in so far as we can recover any traces of it preserved in later recensions. Perhaps it began somewhat as follows:—In the fifteenth year of the reign of Tiberias Cæsar, Pontius Pilate being governor of Judæa in the high-priesthood of Annas and Caiaphas, . . . there came down to Capernaum, a city of Galilee (*ἐν ἔτει πεντεκαίδεκάτῳ τῆς ἡγεμονίας Τιβερίου Καίσαρος, ἡγεμονεύοντος Ποντίου Πιλατοῦ τῆς Ἰουδαίας . . . ἐπὶ ἀρχιερέων Ἄννα καὶ Καϊάφα, κατήλθεν εἰς Καφαρναούμ πόλιν τῆς Γαλιλαίας*; cp Lk. 3:12-13), Jesus Christ the Son of God; and then proceeded to sketch, somewhat in the following order, his appearance at Capernaum, his casting out of devils, the proclamation of the kingdom of God, the transfiguration, the final journey to Jerusalem, his passion, death, and resurrection. Nothing was said as yet of his origin, birth, early life, meeting with John, baptism in Jordan, temptation in the wilderness, nor much of consequence regarding his mission as a religious teacher and preacher in Galilee.

This work, presumably written in Greek, may be conjectured to have arisen in the post-apostolic age in circles which sought to combine their more developed Christology (a free speculation of what would then have been called the 'left wing') with (ii.) the still older apostolic tradition—not yet reduced to writing—partly historical, partly not, regarding Jesus of Nazareth as the Messiah who had once appeared and whose return was to be expected. As over against the friends of this older tradition, who were able to point to it, those whom we have described (i.) as belonging to the 'left wing' felt the need of a clear setting-forth of what had been done and suffered by the Son of God in his manifestation in the world.

The 'gospel' thus produced (the first to be written, but, as we have seen, not the oldest form of what had been the oral tradition concerning the

7. Recensions. life, passion, and death of Jesus the Messiah) was soon supplemented and 'improved' in various ways with the help and guidance of this older tradition. The book appeared in new recensions, new forms. Among others there was, probably, an Aramaic recension, which still survives in a whole group of extant (partly fragmentary) gospels: those of the Hebrews (APOCRYPHA, § 26; CANON, § 73; GOSPELS, § 155), of the Twelve Apostles and of the Ebionites (APOCRYPHA, § 26), of Peter (APOCRYPHA, § 26; CANON, § 73; SIMON PETER), of the Egyptians (APOCRYPHA, § 26; GOSPELS, § 156 b), of Matthias (APOCRYPHA, § 26; MATTHIAS), and those of the synoptists, which were received into the Canon (Mt., Mk., Lk.; see GOSPELS).

In any case there lie behind the text of the three synoptists one or more written gospels of which the

OLD-CHRISTIAN LITERATURE

respective authors made use, each in his own way, in the composition of his work.

Among the later recasts of the original written gospel ought also to be classed that used by Marcion. It bore no distinctive name, and was afterwards maintained by Marcion's opponents to be a mutilated form of Lk. (see GOSPELS, § 98), although it would be more correct to say that it took its place alongside of that gospel as an independent redaction of the common source. This common source, along with its two derivatives, Marcion and Lk., may then be regarded as constituting a distinct group, the Pauline, as distinguished from the synoptic in the narrower sense of the word—i.e., the Old- or Jewish-Christian, immediately underlying our canonical Mt. and Mk., which have received 'Pauline' touches (see Van Manen, *Handl.* chap. i., § 31).

A third current in the development of the written gospel along the Old- or Jewish-Christian and the Pauline or Gentile-Christian lines, is the Gnostic, including the Gospels—of which we know practically nothing but the names—of Cerinthus, Carpocrates, Basilides, Apelles, Valentinus (see GOSPELS, § 99), as also the later Gospels of Thomas, Philipp, Eve, Judas Iscariot, the Gospel of Perfection (Consummation?) (*εὐαγγέλιον τελειώσεως*), the 'proper' (*ἴδια*) gospels of the Severians, and others, now lost, which also dated probably from the second century. A main source for our knowledge of the type of writing here referred to is, notwithstanding its catholic colouring, our canonical Fourth Gospel (see GOSPELS, and JOHN, SON OF ZEBEDEE).

As belonging to the same branch of Old-Christian Literature ought also to be enumerated the extracanonical *Words of Jesus*, most recently collected with praiseworthy diligence by A. Resch (*Agrapha*, 1889; *Aussercanonische Paralleltex-te zu den Evangelien*, 5 parts, 1893-97; *Die Logia Jesu*, 1898). Cp J. H. Ropes (*Sprüche Jesu*, 1896), who criticises and classifies them into seventy-three Agrapha without any, eleven of perhaps some, and fourteen of distinct, importance (see GOSPELS, § 156 e).

Also the so-called *Λόγια Ἰησοῦ* found in 1897 on a papyrus leaf among the ruins of Oxyrhynchus (see APOCRYPHA, § 26, 6; GOSPELS, §§ 86, 156 a; PAPER); the Fayūm fragment (see APOCRYPHA, § 26, 5; GOSPELS, § 156); in so far as one can venture to hold its existence (which is not probable, or at least is not certain), the *Words of the Lord*, collected by Matthew and commented on by Papias (see CANON, § 66; GOSPELS, §§ 120, 122, 149, 150); and the *Diatessaron* of Tatian (CANON, § 68; GOSPELS, § 107; Zahn, *PRE*⁽²⁾ 5653-661; van Manen, *Handl.* chap. i. § 44).

Apocryphal gospels, even of a comparatively early date, such as those of James, Thomas, Nicodemus (see APOCRYPHA, § 27; NICODEMUS (GOSPEL OF)), in which narra-

8. Apocryphal gospels. tives are given of the nativity and childhood, passion and death of Jesus; also concerning his father Joseph, his mother Mary, his descent into hell; or about Pilate,—fall beyond the limits of time here assigned, although they occasionally contain noteworthy reminiscences. Strictly speaking, they can at best be regarded only as appendices.

II. ACTS (§§ 9-17)

The next class of writings to be considered is the group of 'Acts' (*πράξεις, Acta*), Circuits (*περίοδοι*,

9. Acts: *Itinera*), Preaching (*κήρυγμα*), Martyrdom (*μαρτύριον*), Passion (*Passio*), Consummation (*τελειώσις, Consummatio*). These writings relate to the life and career of apostles and other prominent persons. They have, as a rule, a twofold character; they are narratives, but also works of edification,—sometimes didactic and apologetic as well. The oldest of them have disappeared, either wholly or in part. The earliest of their kind, chiefly relating to the life of Paul, most probably had, like the oldest written gospel (§ 6, i.), its origin within a circle of Christians of a 'progressive' or (if the epithet is preferred)

'Pauline' type, who did not hold themselves bound exclusively by (apostolic) tradition. This conclusion is suggested by the consideration that the friends of tradition feel no need of 'lives' as long as the opposite party do not feel it; by what is known as to the course of the development of the written gospel; by the conclusions of criticism regarding the canonical book of Acts, and by the circumstance that *Circuits* (*περίοδοι*) of gnostic origin lie at the foundation of Catholic Apocryphal *Acts* (*πράξεις*). The remnants of the work which we may call the Acts of Paul (PAUL, § 37) are to be traced in Acts 14 [D] 436f. 61-15 751-83 91-30 1119-30 13-28; but they have there undergone a change of form. In any case, one or more previous writings now lost underlie the canonical book of Acts (see ACTS, §§ 18-12; PAUL, § 37; also van Manen, *Paulus* I.; *De Hand. der app.*, 1890; *Handl.* chap. ii. §§ 2-7).

Of the following works little more than the title is known. An Acts of Apostles (*πράξεις ἀποστόλων*), according to Epiphanius (30.16), was used by the Ebionites. Probably a counterpart (and therefore not a polemic) to the Acts afterwards received into the canon; a recast of the same material but in another spirit—the anti-Pauline.

An 'Ascents of James' (*Ἀναβαθμοὶ Ἰακώβου*), according to Epiphanius (*loc. cit.*), contained 'blasphemies against Paul' and utterances of James 'against the temple and the sacrifices and the fire upon the altar' (cp APOCRYPHA, § 28).

An 'Ascents of Paul' (*Ἀναβατικὸν Παύλου*), according to Epiphanius (38.2), was in use among the gnostics (cp 2 Cor. 12.2-4).

An 'Acts of Paul' (*Παύλου πράξεις*), mentioned by Origen and others, perhaps closely related to the 'Acts of Paul' mentioned already (§ 9, end) as having been employed in the preparation of canonical Acts, unless we are to regard it as the kernel of the (Apocryphal) Acts of Peter and Paul.

The Preaching of Paul (*Pauli Prædicatio*), mentioned by Cyprian, is perhaps to be identified with the Acts (*πράξεις*) just mentioned.

Clement of Alexandria makes us somewhat better acquainted with a work called The Preaching of Peter

11. Preaching of Peter. (*Πέτρου κήρυγμα*). It represents a liberal view of the preaching of the gospel, as designed for both Jews and Gentiles, in which 'Paul' is presented neither in a favourable nor in an unfavourable light, and no other apostolate than that of the twelve is thought of. It seems to have proceeded from some one who was not a Jew by birth, and who most probably was a Greek, somewhere about 120-125 (see APOCRYPHA, § 31, 2; SIMON PETER; also E. von Dobschütz, *Das Kerygma Petri*, 1893; Loman, *Th. T.*, 1886, pp. 71-78, 333-6; Harnack, *ACL* I, 1893, pp. 25-28; 2, 1897, pp. 472-4).

Apocryphal Acts first appeared separately in considerable numbers, and afterwards came into col-

12. Apocryphal Acts. lections. A group of Gnostic 'Circuits of the Apostles' (*περίοδοι τῶν ἀποστόλων*), embracing Acts of Peter, John, Andrew, Thomas, and Paul, is attributed to Leucius Charinus; in a revised form and expanded into Catholic Acts of the Apostles (*πράξεις τῶν ἀποστόλων*), to Abdias.

The study of this copious literature (Apocryphal Acts) discloses that it arose in Gnostic circles and that much of it was taken over by the Catholics after it had been duly revised (see R. A. Lipsius, *Apokr. Ap.-gesch.* 1883-1890; R. A. Lipsius and M. Bonnet, *Acta apostolorum apocrypha*, 11, 1891, 21, 1898).

The oldest of these Acts, probably old enough to fall within the period covered by the present article, although scholars are not agreed as to this, are now lost unless in so far as they survive in later editions and redactions. Such were, it is conjectured, 'Circuits of Peter' and 'Circuits of Paul' (*Περίοδοι Πέτρου* and *Περίοδοι Παύλου*), absorbed into the extant Catholic 'Acts

of Peter and Paul' (Πράξεις Πέτρου και Παύλου); 'Circuits of John' (Περίοδοι Ἰωάννου), which partially still survive in Catholic and later Gnostic recensions; the Acts of Paul and Thecla, preserved in a later redaction, unless we are to hold—what does not seem very probable—that this work was already used by Tertullian before 190 A.D., or take it, with C. Schmidt (1897), for a section of the 'Acts of Paul' (Πράξεις Παύλου) (see Harnack, *ACL* I 136-8 21 493-505; *Bibl. World*, 1901, pp. 185-190).

Related to the category of Acts and in part belonging to it are the Books of Martyrs (*Martyria*, *Acta*, **13. Martyrdoms**: *Passiones*, *Virtutes*) of which Eusebius made a collection, now lost Paul, Peter, (τῶν ἀρχαίων μαρτυρίων συναγωγῆ, σύγγραμμα, κατάλογος); some of them fall within or just beyond our period. They are:

i. Accounts, known in various recensions, of the Martyrdom of Peter and Paul, which are supposed to have originally stood at the end of the oldest Acts of Paul and Peter (cp Harnack, *ACL* I 130-134).

ii. A 'Martyrdom of the holy Polycarp' (Μαρτύριον τοῦ ἁγίου Πολυκάρπου), in the form of a letter from the church of God at Smyrna, sent at its own request to the church of Philomelium and also, unsolicited, to all other churches belonging to the holy catholic church, within a year of the martyrdom of Bishop Polycarp, circa 155, for the purpose of setting forth the circumstances connected with it.

The Greek text has reached us in five MSS.; in an abridged form in Eusebius (*HE* 415), and in an Old-Latin translation; it appears in various editions of the Apostolic Fathers, the latest and best being those of Zahn, 1896, and Lightfoot, 1889⁽²⁾, cp Funk, 1901. The genuineness and historicity have been rightly questioned, either denied or disputed, by Steitz (*JDT*, 1861), Schürer (*ZHT*, 1870), Duker and van Manen (*Quod-Chr. Lett.* 2 164, 1871), Keim (*Celsus*, 1873, p. 145, and *Urchr.* 1878), Lipsius (*ZWT*, 1874), Gebhardt (*ZHT*, 1875), Holtzmann (*ZWT*, 1877), Jean Réville (*De anno Pol.*, 1881), Rovers (*Th.T.*, 1881, pp. 451-7),—and upon insufficient grounds maintained by Hilgenfeld (*ZHT*, 1861, 1874), Zahn (1876), Renan (*L'Église Chr.* 452), Lightfoot (1889⁽²⁾), Krüger (1895), Harnack (ii. 1, 1897, p. 341).

The work is, whether we regard form or contents, not a letter, nor even an account of Polycarp's death, and certainly not written soon after that event; it is a decorated narrative of the saint's martyrdom framed after the pattern of the story of Jesus' passion as given in the gospels, and expanded into a writing in glorification of the true martyrdom and at the same time in depreciation of the self-sought, superfluous martyrdom commended by the Montanists. The legendary character of the contents, which is not to be set aside by the assumption of interpolations, as also the tendency of the whole, brings it to a date some decades later than that of the death of Polycarp (circa 155 A.D.), yet still within the second century, rather than in the middle of the third century, or even later, as some would have it.

iii. A writing concerning Pionius (Πιώνιος), who, we learn, suffered martyrdom at Smyrna shortly after Polycarp, is mentioned by Eusebius (*HE* 415, 47), and is extant in a transcript at Justin, etc. Venice (Krüger, *ACL*, § 106).

iv. Memoirs of martyrs: Carpus and Pappulus and a woman Agathonice (Ἐπιτομήματα μεμαρτυρηκότων Κάρπου και Παπύλου και γυναίκος Ἀγαθονίκης) mentioned by Eusebius (*HE* 415), edited by Harnack, who holds it to have been written in the reign of Marcus Aurelius (*TU* iii. 3-4 433-466).

v. 'Martyrdom of the holy martyrs Justinus, Chariton who were martyred at Rome' (Μαρτύριον τῶν ἁγίων μαρτύρων Ἰουστίνου Χαρίτωνος Χαριτοῦς Ἐδελπίστου Ἰέρακος Παϊάνου και Λιβεριανοῦ μαρτυρησάντων ἐν Ῥώμῃ), published with a Latin translation by Otto in *Justini Opera* ⁽³⁾, 2, pp. 266-279, 1879. It is thought to have been written shortly after the condemnation of Justin and his converts, which was between the years 163 and 167 A.D.

vi. A particularly noteworthy account of the sufferings

of the Christians during the persecution they were

subjected to about the seventeenth year of the reign of Antoninus Verus—i.e., **16. Vienna and Lyons.** according to the preface of Eusebius (*HE* 5), Marcus Aurelius (177-8 A.D.). This writing, partly preserved in Eusebius (*l.c.* 1-4), has the form of a letter, written by the Christians at Vienne and Lyons to their fellow-believers in Asia and Phrygia (οἱ ἐν Βιέννῃ και Λουγδοῦνῃ τῆς Γαλλίας παροικοῦντες δοῦλοι Χριστοῦ τοῖς κατὰ Ἀσίαν και Φρυγίαν ἀδελφοῖς). It is, however, no letter giving details regarding the persecutions endured, but a 'writing' (γραφή), a 'composition' (σύγγραμμα) written, as Eusebius says, in other than a purely historical interest (οὐκ ἱστορικῶν αὐτὸ μόνον, ἀλλὰ και διδασκαλικὴν περιέχον διήγησιν). The writer's desire is to instruct and to edify; to judge by the portions taken over by Eusebius, he does not seek merely to inform his readers as to what the Christians in Gaul have endured, but also to make them see and feel how these Christians suffered, with wonderful fortitude yet without seeking martyrdom and without any trace of contempt or harshness towards those who had failed to stand the test; notwithstanding their greatness, not wise in their own eyes, but ready to allow themselves to be instructed, models of the true martyrship as also of sober Catholic Christian-mindedness in the whole conduct of life. The purpose is manifest: to promote such a manner of thinking and of living; to warn against the Montanistic views and doctrines prevalent in Asia and Phrygia and tending to spread from these centres to Rome and elsewhere. This is the author's reason for making use of his fresh recollections—historical even if here and there adorned with touches of art—of the sufferings of the Christians of Vienne and Lyons, and especially those of Lyons. He speaks as if in the very person of these two churches, yet frequently betrays that he is really outside them, we are not told where and can only guess Lyons or Rome. It is certain that he was not, as is often conjectured, Irenæus, whose style cannot be discerned here, although he may have lived at the same period; to judge by the relationship between this work, particularly as regards its tendency, and the Martyrdom of Polycarp, it was probably written towards the end of the second century, possibly, however, somewhat later (see P. A. Klap, *Theol. Stud.*, Utrecht, 1900, pp. 423-435).

vii. The sufferings of the martyrs at Scili in Numidia in 180 A.D., written and published in various forms, the latest in a (probably original) Latin text

17. Scili; Apollonius. (*TS* i. 2 105-121 [1891]; Harnack, *ACL* ii. I 316; Krüger, *ACL*, § 105 5).

viii. A martyrdom (μαρτύριον) of Apollonius, who was put to death at Rome about 180-185 A.D. Lately published, so far as extant, by E. T. Klette, *TU* xv. 291-331.

III. EPISTLES (§§ 18-34)

The greater proportion of the literary productions of the period of Christian history with which we are now

dealing consists, in outward appearance, of letters; and many of these, though by no means all of them, are still regarded as having really been such—actual letters sent at first to definite persons and originally written with such persons in view—and as having penetrated to wider circles and become common property only at a later time. Continued examination, however, has led to the conclusion, first with regard to some of these, then with regard to a great number, and finally, in the opinion of the present writer and others (see below, § 19), with regard to the whole of them, that they neither are nor ever were 'letters' in any proper sense. They were, from the first, neither more nor less than treatises for instruction and edification, bearing witness to the character, aims, experiences, adventures, of persons, opinions, tendencies,

in the form of letters written to one or more recipients, usually in a tone of authority, by men of name. These authors are thought of as still alive although they really belong to an earlier generation. Such letters therefore seemed to be, even in the circle of their first recipients, as voices from the past. Yet they bear unmistakable marks of having been written in the later time. They come from the pens of persons who are unknown to us, and were designed like books which are brought into the market, or otherwise circulated, for all who take any interest in their contents; and more particularly and specially designed to be read aloud in religious meetings for the edification of the community or to serve as a standard wherewith to regulate faith and life.

As a literary device the epistolary form is an ancient one. It is met with alike among Jews, Greeks, and Romans, and was adopted also by Christian writers such as the authors of Acts 15:23-29 23:26-30 Rev. 2:3; *Clem. Hom.* 5:9-19 20-26; the epistles of Peter and of Clement to James with which *Clem. Hom.* is prefaced; that of the Church of Smyrna concerning Polycarp's martyrdom; that of the Christians of Vienne and Lyons with reference to the persecution under Marcus Aurelius (see above, §§ 14, 16); and so forth; cp also the epistolary form of the introduction both to the first and to the second work of Lk. (Lk. 1:1-4 Acts 1:1), and also the beginning and the end of the last book in the NT Canon (Rev. 1:4,5 22[18-21]). [CP EPISTOLARY LITERATURE.]

The letter of edification, on the other hand, is a peculiarly Christian product (cp *Tb. T* 1897, pp. 413-5).

To compose 'letters' under another name, especially under the name of persons whose living presentment, or real or supposed spiritual equipment, it was proposed to set before the reader, was then just as usual as was the other practice of introducing the same persons into narratives and reporting their 'words,' in the manner of which we have examples, in the case of Jesus, in the gospels, and, in the case of Peter, Paul, and other apostles, in Acts. No one saw anything improper in this, or thought of any intentional falsification, deception, the playing of a part in which one had to be always on one's guard against self-betrayal. Any one who had anything to say wrote a 'letter' without troubling himself—at any rate not more than other writers—with respect to his work, about a supposed defect in the literary form he had chosen, not even about an address left blank in the epistle when 'despatched,' as for example in the canonical epistle to the Ephesians; or about the absence of a suitable epistolary beginning, as in the canonical Epistle to the Hebrews; or about the want of an appropriate close, as in the Epistle of James; or about the absence of both, as in the first Epistle of John.

At first no one thought about the matter at all—whether to hold or not to hold such epistles as really proceeding from and intended for their ostensible authors and recipients. Sometimes their real origin was known, sometimes it was guessed, sometimes people were content to remain in the dark. They used the epistles or left them unread, just as they were, indifferently, without asking any question as to their origin, knowing this only, that they were intended for all who chose to give heed to them.

Gradually the position changed as a result of a normal change in the readers' mode of thinking, their thirst for knowledge, their reverence for the authoritative word, and their exaltation of it to the dignity of canonical scripture. From the time of Irenæus onwards the old way of looking at things passed away for centuries,—first with regard to thirteen, anon fourteen, 'Pauline,' and certain 'Catholic,' epistles, and others, written by 'apostolic fathers'; next with regard to the whole body of Old-Christian epistles so far as it was taken by the Church under its protection, the most recent not excluded,

such as are now found in Acts, Revelation, *Clem. Hom.*, even apocryphal writings such as the Epistle of Paul to the Laodiceans, 3 Cor., that of Jesus to Abgarus. All these epistles now came to be regarded as proceeding from the writers whose name they bore, and to have been originally intended for those who were named as their first recipients in superscription, subscription, address, or tradition.

Here also the rise of the modern spirit wrought a change, and the human mind had to retrace its steps along the path it had for centuries been following. The 'apocryphal' epistles were all of them rejected soon after the Reformation; the genuineness of those embodied in the Clementine Homilies, Rev., and Acts was modestly questioned; some pieces, such as the larger recension of the Ignatian Epistles, and the second Epistle of Clement, formerly classed among the Apostolic Fathers, were no longer deemed to belong there; other epistles, both Catholic and Pauline, were from the time of Semler removed from the position they had so long occupied as possessed of the highest antiquity and indisputably 'genuine.' The process of disintegration steadily went on. The Tübingen school left unchallenged hardly more than the four 'principal epistles'—Rom., 1 and 2 Cor., Gal. In the end criticism succeeded in removing the veil of error and misunderstanding that concealed the true character of even these (see PAUL, §§ 1 2 f. 33 ff.). The history of this criticism is the justification of those who hold to it and at the same time the condemnation of those who wholly or in part set it aside. The time seems to be approaching when the question as to 'genuineness'—in the sense now usually attached to the word—will no longer be discussed as regards any of the epistles that have come down from the first Christian centuries; it will be enough to be satisfied of their genuine antiquity.

i. The Old-Christian 'epistle' as a literary phenomenon seems, so far as we can discover, to have first made its appearance in progressive

20. Pauline and Catholic epistles.

Pauline circles. The first examples of it have disappeared unless it be that some portions survive in some of our present canonical 'Epistles of Paul' (*Ἐπιστολαὶ Παύλου*), also 'the apostle' (*ὁ Ἀπόστολος*) or 'the apostolic' (*τὸ Ἀποστολικόν*); see ROMANS; CORINTHIANS, etc.; PAUL). Perhaps there was an earlier group, to which reference is made in 2 Cor. 10:9-11 cp 1:13, and the present group had not originally the same extent as now. We know not by whom the collection was made, nor yet what influence his work had upon the traditional text. Perhaps we may suppose that it led to some changes. Probably the collection was not wholly the work of one person, but arose gradually through additions. The oldest account—to judge by what Tertullian says (*adv. Marc.* v.)—tells of a group of ten epistles used by Marcion (about 140 A.D.). It is known that Hebrews was for a long time set aside in many circles.

ii. A second group of Old-Christian Epistles is that known as Catholic (*Ἐπιστολαὶ καθολικαί*). The word must be understood as referring, not to the destination, nor to the ecclesiastical use, but to the contents of these writings. It was not originally intended to convey, as is often incorrectly supposed, the idea of 'general' or 'circulár' letters, nor yet of 'canonical' ones, but only (as a careful examination of the ancient employment of the word shows) 'trustworthy,' 'worthy of acceptance,' when judged by the standard of religion and dogma. The group, after long hesitation, was finally made up of seven: Ja., 1 and 2 Pet., 1, 2, and 3 Jn., and Jude (see JAMES (EPISTLE); PETER (EPISTLES OF); JOHN (SON OF ZEBEDEE), §§ 57-65; JUDE (EPISTLE)).

iii. A third group of Epistles of Barnabas (§ 21 f.), Clement (§§ 23-27), Ignatius (§ 28 f.), Polycarp (see PHILIPPIANS, §§ 10 14, and above, § 14): is usually

included among the writings of the Apostolic Fathers. At a later date was added an Epistle of the Church of Smyrna (see above, § 14); on the same grounds might be added the epistle of the churches of Vienne and Lyons (see § 16).

The epistle of Barnabas (*Βαρναβᾶ ἐπιστολή*) referred to in CANON, §§ 65, 73; GOSPELS, §§ 89, 90, is found in several MSS.

It is met with in *K*, as also in the Jerusalem codex from which the Didaché comes (1); chaps. 5-7 (ἐπιτομὴ τῶν λαῶν κ. τ. λ.) 21 in nine other Greek MSS, the so-called κεφάλαια (of which 5 = 8); chaps. 1-17 in an Old Latin version; some sentences are also found in Clement of Alexandria and Origen.

The work professes to be a letter—now by one who is the spiritual father of the 'sons and daughters' he addresses (11), to whom he feels himself bound by the closest ties, and among whom he has long sojourned (13-4); now by one who belongs to their own number, who earnestly addresses the brethren, but not as if he were the teacher who had been placed over them (18 469). The epistolary form, however well maintained, and on that account usually accepted without question, is, in view of the contents, seen to be fictitious; in reality the writing is a treatise intended for general use.

The writer's purpose is to instruct, to edify, to communicate under the form of a letter that which he has himself received, in order that his assumed readers, rich in faith, may now arrive also at fulness of knowledge (*ἵνα μετὰ τῆς πίστεως ὑμῶν τελείαν ἔχητε τὴν γνώσιν*: 15). This knowledge or gnosis concerns chiefly the right attitude of Christians towards the OT, the religion of Israel, the divine covenant with the fathers. On these things they need to be enlightened, in connection with the putting into practice of the new religious ethical life. This end is sought to be accomplished by means of a peculiar view—partly allegorical, partly typological, but always arbitrary—of 'Scripture' (the OT and some apocrypha).

The epistle admits of being divided into a double introduction (1-2 5 16-8) and two main portions of a doctrinal (2-17) and a hortatory (18-21) character respectively.

The doctrinal part begins by showing that what is of supreme importance is not the offering of sacrifices or the observance of fasts, but a life in conformity with the moral precepts of the Lord (2-3). It is our duty to love righteousness, especially at the present time when the days are evil and the end of the present age is at hand (4 1-6a). We Christians have been ever since the days of Moses the true covenant people (4 6b-14), kept by the Lord, who suffered on our behalf after he had become manifest in the flesh in accordance with what can still be read in 'Scripture' (5). There we can continuously read of his manifestation in the flesh (6). The fasts prescribed in the law, the sacrifice of Isaac, the goat on the great day of atonement, all are types of his passion (7). So also the red heifer that must be slain and burnt, whilst the ministering servants prefigure the twelve as preachers of the gospel (8). The precept of circumcision must be spiritually understood; the 318, circumcised by Abraham, are a type of Jesus (9); the laws concerning foods are to be taken metaphorically (10). At every moment one finds in the OT hints of baptism and of the cross (11-12). In Jacob and Ephraim we come to see that not Israel but the whole body of Christians are the true heirs of the covenant broken in the days of Moses but renewed in Christ (13-14). The true day of rest is not the Jewish Sabbath, but the eighth day, the first of the new week; the true temple of God is not the building at Jerusalem, but the spiritual temple, of which Christians form a part (15-16). After a short retrospect (17), passing on to another knowledge and teaching (*γνώσις καὶ διδασχὴ*), our author depicts the paths of light and of darkness, and stirs up the children of joy and peace to a walk in conformity with the precepts of the Lord (18-21).

As to the (relative) unity of the whole, often denied or disputed since le Moyné (1685) but also frequently defended, no doubt need be entertained; there is no need for supposing chaps. 18-21 to be a later addition or that the original epistle has been largely interpolated or has undergone one or more redactions. It is obvious, however, that in the preparation of 18-21 the writer has made use of an older form of the *Two Paths*, as also, there and elsewhere, of the OT, the book of Enoch, 4 Ezra, and perhaps other works besides.

The author's name has not come down to us.

Tradition, still elung to by many, suggests Barnabas, the companion of Paul, of whom mention is already made in the β text of Acts 12:3 (see BARNABAS and BARSABAS); but it has no claim on our acceptance and has been often controverted. The tradition is admittedly old, however, and perhaps the name of Barnabas has been always associated with this work. The unknown author was probably a gentile Christian, by birth a Greek, belonging to the Alexandrian circle. This conclusion is pointed to at least by his language and his manner of scripture interpretation, his ideas and some of his expressions, such as 'as novices shipwreck ourselves upon their law' (*ἐπήλυτοι τῷ ἐκέλευον νόμῳ*, 36). It is also possible, however, to think of him as living somewhere in Syria or Asia Minor not far from the environment within which the epistles of Paul arose. There is nothing to indicate that he was a Jew by birth, or one of the later inhabitants of Palestine.

Notwithstanding his love for gnosis, the author is a practical man who has at heart before all else the edification and the safety of the church. Neither things imminent nor things that lie in the future (*τὰ ἐνεστώτα ἢ μέλλοντα*) are of the highest importance, but present things (*τὰ παρόντα*) and to know how to comport oneself among them. See e.g., 16-8 21-10 41 17.

The author belongs neither to the right wing nor to that of Paul, nor yet to that of the writer of Hebrews or that of Marcion. Towards Judaism his attitude is one of freedom; in his view Christianity came in its place in principle, as early as in the time of Moses; law and prophets are binding on believers, almost always, however, in the metaphorical interpretation only, not the literal, even where a historical occurrence seems to be described.

The date is earlier than that of Eusebius, Origen, Clement of Alexandria, Celsus, or the present form of the Didaché; but later than the destruction of Jerusalem in 70 A.D. (chaps. 4 16); later than the time of the apostles (59 83); later than 'Paul' (see PAUL, §§ 38-42), including Hebrews; therefore not (as is still often supposed) before the end of the first century (see ACTS, § 16), but rather, let us say, between 130 and 140 A.D. It is not possible to gain a more precise determination from chaps. 4 and 16, unless in so far as the silence regarding the building of the temple of Hadrian at Jerusalem, in honour of Jupiter Capitolinus, may be taken as showing that the temple had not yet been erected.

The value of the work, which, looked at either from the æsthetic or from the edificatory point of view, is not great, lies so far as we are concerned in the historical evidence it affords as to the existence of an interesting tendency—not observable elsewhere—in the direction of free thought among the Christians of the first half of the second century, and of a number of views, in the domain of Christian dogma and history, which differ from the usual opinions as to the contents of the Gospel narratives.

The older literature of the subject will be found referred to in the recent editions of the text by Gebhardt-Harnack (18:8⁽²⁾), Hilgenfeld (*NT extra canonum receptum*, 1877⁽²⁾), Lightfoot (*Clem.* 1890⁽²⁾, 2 503-512). See further Duker and Van Manen, *Oud. Chr. Lett.* 1870, 11-02; Loman, van Manen, Volkmar, in *Th. T.* 1884; Steck, *Galatensbr.*, 1888, pp. 310-314; Volter, *JPT.* 1883, pp. 106-144; Joh. Weiss, *Der Barnabasbrief kritisch untersucht*, 1885; A. Link, *TLZ.* 1880, no. 24; Harnack *PRE³* 2, 1896, pp. 410-413; *ACL* ii. 1 410-428, 430-7. Cp A. van Veldhuizen, *De brief van Barnabas*, 1901.

Two epistles of Clement to the Corinthians (*Κλημεντος πρὸς Κορινθίους* A and B), cited as witnesses in CANON,

23. Clement. §§ 65, 73, and GOSPELS, § 87, are found in Cod. Alexandrinus (A), in the Jerusalem MS (J), and in an old Syriac version; the first also in an Old Latin version. It is claimed for them that they were written by Clement, in name of the Church of Rome, to the Church of Corinth in connection with disputes which had arisen there on questions of govern-

ment. They have in reality the epistolary form, though not written by Clement.

The first, which from the moment of its recovery from the Cod. Alexandrinus by Patrick Junius [= Young]

24. First epistle. (*Epistola ad Corinthios, Graece, cum versione et notis Patr. Junii*, Oxford, 1633) was received with great distinction and accepted, in

accordance with tradition, as the work of the bishop-martyr Clement, a disciple and one of the first successors of the apostles Peter and Paul at Rome, itself claims to have been written by the Church of God at Rome to that at Corinth. The form is not fortuitous; if the contents be considered, it must be regarded as a literary artifice merely. A 'church' cannot write; usually it is held therefore that Clement wrote in name of the church; of this, however, there is no evidence. The writing has the semblance of a letter throughout, and calls itself so (*ἐπιστολή*: 63 2; cp *ἐπιστέλλομεν* and *ἐπεστέλαμεν* 7 1 62 1); yet clearly this is not its real character, and probably it was never sent as such. Rather it is a book, in the form of an epistle; to speak more precisely, in the form of a Pauline epistle, prepared for, and made accessible to, all who cared to read it. It is an 'exhortation concerning a peace and concord' (*ἐντευξις περὶ εἰρήνης καὶ ὁμονοίας*) to use its own words (63 2) about itself; a 'writing' (*γραφὴ*), as Eusebius (*HE* iii. 38 5) designates it; an 'admonition' (*νουθεσία*), as Dionysius has it in *Eus.* ii. 258, designed to be publicly read in the church; cp 2 Clem. 19; 1 Clem. 7 1.

The contents do not relate exclusively to the disputes at Corinth, although these figure as having furnished the occasion for the letter.

The writing begins, after the superscription and benediction, with an apology, by reason of various troubles, for not having attended to the Corinthians sooner (1 1); next follows an ideal picture of what the Corinthian Church had been (1 2-28); its fall is briefly described (3); a series of examples, drawn from the OT and the history of Christianity, is given to show the evils and misery wrought by jealousy and strife (4-6); a declaration that 'we—not the persons addressed merely, but also the church that is writing—are suffering from the same cause is made; wherefore it will be well that we should pay heed to the rule of tradition (*κανὼν τῆς παραδόσεως*), to attend to what God demands of us and to fix our eyes on the precious blood of Christ (7 1-4). This is the beginning of a long sermon in which it is set forth how God has at all times demanded repentance (7 5-8 5); how we must turn ourselves to him, giving heed to what we read of Enoch, Noah, Abraham, Lot, Rahab (9-12); must be humble (13); obedient to God and not to the schismatics (14); must cleave unto those who are godly (15) and think upon Christ—who is described in language taken from the OT (16); copying the examples of the prophets and of Abraham, Job, Moses, David (17-19 a), laying to heart the example of peace and harmony shown in the Divine ordering of the universe (19 b 20); in all things bearing ourselves Christianly (21 22); biding fast our faith in the second coming of Christ and in the resurrection (23-27), fearing God and seeking to draw near to him by faith and good works (28-35), finding Christ by this road (36-39); observing how in Israel all things were orderly done (40-41); the appointment of bishops and deacons among Christians came of the will of God (42); Moses stilled a contention as to the priestly dignity (43); what the apostles have ordained for the regulation of the episcopal office (44 a); let no regularly chosen leaders of the church be dismissed, let contentions be avoided, love be stirred up (44 b-50); where needful make acknowledgment of sin, be willing to yield, admonish one another, submit to the presbyters (51-59 2). The exhortation then passes over into a prayer (59 3-61), followed by a retrospect, renewed exhortation to submission (62-63), a benediction (64), a word about messengers sent; renewed benediction (65).

All that is here said about contentions at Corinth belongs to the literary clothing of the document. Paul's first epistle to the Corinthians may have suggested it (cp chap. 47). Perhaps too, though this is very far from certain, it is connected with disputes that had recently arisen as to the continuance in office, dismissal, and election of persons for the government of the church. It was the author's main purpose to remove difficulties of this kind wherever they might have arisen. He spoke under the mask of the Church at Rome, as a high authority, with growing emphasis, and finally as if he were one with the Holy Spirit himself (63 2; cp *Acts* 15 22-29).

The unity of the work has been disputed and the

existence of large interpolations has been supposed at various times, though without just cause. No doubt the author, besides drawing much from the OT, has borrowed here and there from various works both Jewish and Christian, possibly also Pagan, without careful acknowledgment to his readers, or perhaps even to himself.

The author is certainly not Clement of Rome, whatever may be our judgment as to whether or not Clement

25. Authorship. was a bishop, a martyr, a disciple of the apostles. The church of St. Clement at Rome, where the relics of the saint are reputed to rest, is evidently the third building on the site, and not older than 1059; the underlying second building may possibly be the basilica of which Jerome speaks (*Vir. ill.* 15). The first, which in turn underlies this, certainly exhibits traces of its having at one time been dedicated to the worship of Mithras, but not of any connection with the martyr-bishop Clement. The martyrdom, set forth in untrustworthy Acts, has for its sole foundation the identification of Clement of Rome with Flavius Clement the consul, who was executed by command of Domitian. (See the proofs of this in Lightfoot⁽²⁾.)

Clement, as bishop of Rome, be he the first, second, or third after Peter, can no longer be maintained in view of the discovery that the Church of Rome (see *ROME, CHURCH OF*) had no monarchical government at all before Anicetus (156-166?). The disciple of Peter (and Paul) finds no support either in our present epistle or in *Phil.* 4 3. He disappears in the diverging versions of the tradition.

The possibility, still firmly maintained by such scholars as Harnack and Lightfoot, that the writing may have been the work of a certain Clement concerning whom nothing is known except what can be gathered from 'his' epistle, has no real value; and to connect it with the further supposition that this Clement was an influential member of the governing body of the Roman church—the martyr-bishop of legend—is not to be recommended. The epistle furnishes no ground for it, but rather the reverse. The oldest tradition as to its origin knows nothing of any such view. Irenæus (*iii.* 3 3) had occasion to refer to it, had he known it, and in that context he mentions the name of Clement; yet he speaks, with some emphasis, just as Dionysius of Corinth does in *Eus.* *HE* iv. 23 11, of the epistle as having been sent by the Church of Rome in such a manner as to make it, and it alone, responsible for the contents. The first to express himself distinctly in another sense, and to name Clement of Rome as the writer, is Clement of Alexandria (*Strom.* i. 7 38).

From the work itself, all we can gather is that the author probably belonged to the Church of Rome. He was an educated man, well acquainted with the OT, and the Pauline and other NT epistles; a friend of peace and order; a warm advocate of the occasionally, perhaps often, disputed rights of the presbyters and deacons once chosen, who had adequately discharged the duties of their office.

The date, with regard to which we cannot follow Harnack in deducing anything from the lists of bishops, which have been found untrustworthy,

26. Date. cannot be sought as was done by the older scholars, and more recently by Hefele, Wieseler, and Mallinckrodt, in the time of Nero or immediately thereafter, but considerably later. There is nothing to compel us, with most scholars, amongst whom are Lipsius, Gebhardt-Harnack, Lightfoot, to assign it to the last years of the first century; with Krüger to leave it open till the reign of Trajan; with Volkmar to fix definitely on 125 A.D.; with Loman on the middle of the second century. Rather let us say with Steck, somewhere about 140 A.D.; especially on account of the author's acquaintance with the Pauline epistles (including, of course, Hebrews) and also with 1 Peter.

Whether he also had read the *Shepherd*, or whether, on the other hand, it was Hermas that had read the epistle of Clement, is not quite clear. It is clear, nevertheless, that Polycarp, Hegesippus, Dionysius of Corinth, and Irenæus were acquainted with his work.

The value of the epistle, not insignificant from an æsthetic or religious point of view, lies specially in what it tells us regarding the development of Christianity in the writer's time, and regarding the relation between clergy and laity.

The second epistle was almost immediately on its rediscovery in 1633 received with a certain amount of depreciation; soon it came to be regarded

27. Second Clement. by some as simply a homily which cannot have been written by Clement, and ultimately this view was adopted almost unanimously. The epistle is, nevertheless, equally with the first, so far as form is concerned, a 'letter,' although it be as regards contents an edifying treatise designed to be from time to time read in church (191 cp 151 f. 175).

The writer reminds his readers how they ought to hold high their Christian profession, live in accordance with it, make no compromise with the world, have no fear of death (1-5); not serving two masters—the present world and the world to come (6); struggle, seek repentance, believe in the resurrection of the body, do the will of God, have no fear about the future, but rather live in expectation of the great day at every moment, not put off the duty of repentance, make sure that they belong to the true church (7-14). Looking back upon what he has written, the writer calls it a 'counsel respecting continence' (*συμβουλία περί ἐγκρατείας*). He anew exhorts to fidelity to what has been learned, to diligence in seeking repentance both for oneself and for others, to a joyful confidence in God (15-20).

The unnamed author to whose voice we are listening here is not Clement of Rome, as Bryennius alone among modern scholars would have it, nor yet another Clement to whom Hermas refers in *17i. 24*, as Harnack for some time (from 1875) supposed, nor yet is he to be identified with the author of the first epistle we have just been considering (§ 25). It is probable enough, no doubt, that the writer was acquainted with the last-named writing, and was in harmony with it. This view is confirmed by many obvious points of agreement: its being met with only in conjunction with the first epistle; the later yet still old tradition which unflinchingly assigns both epistles to Clement; and the older tradition in Dionysius (see § 31) where, in his epistle to the Romans, he refers to the present epistle (just as Irenæus did in the case of the first) as proceeding from the Church of Rome, but not, like the first, as written—whatever the words may mean—'through Clement' (*διὰ Κλήμεντος*; Eus. *HE* iv. 2311, cp 9).

However the anonymous writer may seem to change his character—now as adviser (151), now as presbyter (1735), now as reader (191)—it is clear that he is a Christian of gentile origin (16 26), an educated man who interests himself in the growth of the religious life of the community, and who when necessary stands up for the defence of the existing ecclesiastical order.

In date the work belongs to the transition period—approximately, after 140 but before 170 A. D.—towards the middle of the second century. Since we ought, in all probability, to attach no weight to the mention of Soter in Eusebius (*loc. cit.*), we may say, certainly before about 160 A. D.

The importance of this letter, apart from the value which it possesses for those who are in search of earnest exhortation and edification in the Old-Christian literature, lies mainly in the contribution it makes to our knowledge of Christianity as it was about the middle of the second century, the emphasis here again laid upon conduct as compared with doctrine (though neither is this depreciated), and the demand for good literature to be used along with the OT and gospels in the public meetings of the church.

The fullest and best studies of the two epistles are those of Lightfoot (*Ap. Fathers: S. Clement*, 1890²), with which compare Duker and van Manen, *OCL* 193-263; Hilgenfeld, *Cl. Rom.* 1876²; Gebhardt-Harnack-Zahn, *Fat. Ap.* 1876²; Loman, *Th. T.*, 1883, 14-25; Steck, *Cal.-br.* 1888, 294-310; Mal-

linckrodt, *Gel. en Vrijh.* 1890, 85-143; Harnack, *ACL* ii. 1251-255, cp *Th. T.*, 1898, 189-193; K. Knopf, *Der erste Clemensbr.* (*U.*, new series, 51); F. X. Funk, *Die Apost. Väter*, 1901.

A large number of epistles of Ignatius, handed down from antiquity in various forms, attracted much attention in their several groups from 1498 on-

28. Epistles of Ignatius. wards. The protracted controversy, not only as to the genuineness and value of these writings, but also as to the relative antiquity of the groups—the longer, the shorter, and the Syriac recension named after Cureton—has at last resulted in a practically unanimous conclusion that only seven epistles of Ignatius, mentioned by Eusebius (*HE* 336) and preserved in two Greek MSS—or rather, properly speaking, only in one, for the first gives six epistles and the second one more—in an Old Latin version, and partially in Old Syriac, Armenian, and Coptic versions, belong to the category of Old-Christian literature. Towards the end of the fourth century they were worked over and augmented by the addition of five others, to which in turn at a much later date (11th or 12th cent.) three more were added, in Latin. Moreover, they were translated in an abridged form into Syriac. The text of three of these Syriac abridgments—those to the Ephesians, Smyrnæans, and Polycarp—still treated with too great respect in Lightfoot⁽²⁾, was published by Cureton in 1845.

The original group, cited as evidence in CANON, § 65, and GOSPELS, § 92, has the aspect of being a collection of seven epistles written by Ignatius when, after having been thrown into prison for his Christian profession and sentenced, he was on his journey from Antioch to Rome, where he expected to suffer martyrdom. Four of the seven—those to the churches of Ephesus, Magnesia, Tralles, and Rome—appear to have been written at Smyrna; the remaining three—to the Philadelphians, to the Smyrnæans, and to Polycarp—at Rome.

The first three treat the subject of monarchical church government with great earnestness, warn against heresies, and urge to a Christian life. The fourth treats of martyrdom, of which Ignatius must not be deprived. The fifth is chiefly devoted to the subject of church unity, by all the members adhering to the bishop. The sixth deals with docetism, and also with the recognition due to the bishop. The seventh, with the reciprocal duties of the church rulers and people, and of all to one another.

The form of this seeming collection, and of each of the epistles separately, however little prominence be given to the fact even where the genuineness is definitely given up, is artificial. The whole makes up a single complete book, designed for the edification of the readers.

To satisfy oneself of this it is enough to observe the absence of all trace of any such 'collection' having been made of the epistles as has been assumed; their mutual relations as parts of a whole; the reference in the first to the second epistle as a 'second tract' (*δευτερον βιβλιδιον*) intended for the same readers (*Eph. 201*); the peculiar form of the addresses and superscriptions; the meaning of the words there employed: 'who is also Theophorus' (*ὁ καὶ Θεοφόρος* [Philadelphia]), 'of Asia' (*τῆς Ἀσίας*), 'on the Mæander' (*πρὸς Μαίανδρον*); the forced character of the assumed relations between writer and reader; the improbability of the details of the journey of Ignatius; its irreconcilability in various respects with the certainly older tradition—as such brilliantly defended by Völter against Lightfoot in 1892—according to which Ignatius died a martyr, not about 107 or 110 at Rome, but in the winter of 115-116, at Antioch, by command of the Emperor Trajan, who was there at that time; the fact that the writer sometimes distinguishes himself from Ignatius; the testimony of *Ep. Pol.* 9 and 13 regarding Ignatius and his epistles; and the points of agreement and difference between Ignatius and Paul.

After the example of Paul, who writes edifying and doctrinal epistles, and is on his journey towards Rome, where he looks forward to martyrdom as probable, our writer makes Ignatius of Antioch, well known as a Christian martyr, bear witness to what lies in his heart regarding the glory of Christian martyrdom; the need for close adherence on the part of all church members to the bishop and presbyters of the church; the purity of Christian doctrine and the uprightness of a Christian life to be secured in this way. 'Ignatius' is not, however, as many with Baur have held, the mere advocate of the bishop or the mere assailant of docetism.

Who this writer may have been it is impossible to ascertain or even to guess. Certainly not Ignatius.

So much was already recognised—following in the footsteps of Salmasius and Blondel (1645)—by Daillé (1666) in his controversy with Usher and Voss; by Larroque

29. Authorship. (1074) against Pearson; in modern times by Baur, Schwieger, Hilgenfeld, Volkmar, Bunsen, Duker, van Manen, Keim, Killen, van Loon, against Rothe, Uhlhorn, Junius, Zahn, Lightfoot, Völter, Réville, Harnack. Thirty years ago it seemed as if the time had wholly passed by in which 'genuine' epistles of Ignatius would be spoken of at all. That the position has changed in recent years seems to be due, on the one hand, to the advocacy of Zahn (*Ignatius von Antiochien*, 1873; *Pat. A.* 1876) and of Lightfoot (*Ap. Fathers: S. Ignatius*, 1880⁽²⁾), whilst on the other, no account has been taken of anything urged on the other side by Dutch and American scholars; also to the readiness to accept various plausible yet baseless suppositions, as full and adequate answers to objections. It is in reality, however, of no avail, as has been frequently attempted, to separate, in the interests of the supposed 'genuineness,' the Epistle to the Romans from the others, and to attribute either the former only (so Renan), or the others only (so Völter), to the martyr-traveller. It is also useless and contrary to all tradition to regard Ignatius as having been bishop in the late years of Hadrian (Harnack, *Die Zeit des Ignatius von Antioch*, 1878), or to keep his date open to 125 A.D. (Harnack, 1897, *ACL* 11, p. 406, 3); to regard his advocacy of monarchical church government as made on behalf of an ideal only (Jean Réville, *Études sur les origines de l'épiscopat*, 1891; cp van Manen, *Th. T.* 1892, 625-633; van Loon, *ib.* 1893, 278-284); to identify him with a second Ignatius, who lived about the middle of the second century (Völter, *Th. T.* 1886, 114-136), or with Peregrinus Proteus in the days when he was still a Christian (Völter, *Th. T.* 1887, 272-320, also *Die Ignatianischen Briefe*, 1892; cp van Loon, *Th. T.* 1886, 509-581; 1888, 420-445; 1893, 275-316).

The unknown writer was, to judge by his work, an earnest man with much zeal for martyrdom and all that came for what he thought right in doctrine and life. Perhaps he was a layman, and lived in Rome, at some date intermediate between Eusebius, Origen, Clement of Alexandria, Irenæus, and 'Polycarp,' on the one hand, and Peter and Paul, the 'apostles,' Ignatius (†115-116), and a group of Pauline epistles, including Eph. 1 Thess. 1 Tim. Titus, on the other. The importance the writer attaches to acceptance of monarchical church government as a guarantee of purity of doctrine and life, and his animadversions on Marcionite errors, also point to a date near the middle of the second century, though at the same time it does not seem advisable to fix upon *circa* 175 as van Loon does.

The value of the little work lies in the region of history, particularly in that of the external and internal ordering of the life of the church. It speaks to the existence of a strong desire for vigour and unity in the government of the church in the interests of sound doctrine and life.

The copious literature will be found registered for the most part in Lightfoot (*Ap. Fathers; S. Ignatius*, 1880⁽²⁾); cp also Duker and van Manen, *OCCL* 2 5-154; Zahn, *Ign. v. Ant.* 1873 and *PA*, 1876; W. D. Killen, *The Ancient Church*, 1883⁽⁴⁾, and *The Ignatian Epistles entirely Spurious*, 1886; R. E. Jenkins, *Ignatian Difficulties and Historic Doubts*, 1890; Völter, *Ign. Br.* 1892; van Loon, *Th. T.* 1886, 1888, 1893; Harnack, *ACL* ii. 1381-406; Funk, *Ap. Vnt.* 1901.

The epistle to Diognetus, cited in GOSPELS, § 95, belongs to the category of Apologies, on which see below, § 41.

30. Diognetus, Valentinus, Marcion, Themiso. Epistles of Valentinus, an Egyptian gnostic who lived at Rome in the middle of the second century, are mentioned by Clement of Alexandria (*Strom.* ii. 8 36 ii. 20 114 iii. 7 59), and were, it would seem,

of a doctrinal character. So also an *Epistle of Marcion*, dating from his pre-heretical period, to which Tertullian refers (*adv. Marc.* 11 44, *de Carne*, 2). A catholic epistle (*ἐπιστολή καθολική*) by the Montanist Themiso 'in imitation of the apostle' (*μιμούμενος τὸν Ἀπόστολον*), ± 170, written, according to Apollonius (ap. Eus. *HE* v. 185), for the enlightenment of those who were opposed to his views, is known to us only by this reference, and is noteworthy as the latest example of its kind from the time when 'epistles' were still written without hesitation in imitation of the manner of 'the Apostle'—*i. e.*, 'Paul.'

Catholic epistles to the Churches (*καθολικὰ πρὸς τὰς ἐκκλησίας ἐπιστολαὶ*) is the name given by Eusebius (*HE* 4 23) to seven epistles, written by

31. Dionysius of Corinth. Dionysius, bishop of Corinth, about (it is conjectured) ± 170 A. D., by request,

to the Lacedæmonians, Athenians, Nicomedians, the churches of Gortyna and elsewhere in Crete, at Amastris, and elsewhere in Pontus, the Cnossians and the Romans.

The book is currently held to have been a collection of actual letters. To judge, however, by the character of the fragments preserved in Eusebius, we ought rather to regard it as a collection similar in kind to the Ignatian (see § 28), containing a series of precepts, suggestions, instructions regarding the true faith and right manner of life, the constitution and government of the churches. That Dionysius himself, and not that—after the practice of those times—a later author, should have written them and published them collectively under Dionysius's name becomes increasingly improbable as soon as we endeavour to do full justice to the complaint in the mouth of Dionysius about the falsification of his epistles; to the reasons given why he, Dionysius, wrote to one group of readers upon one subject and to another upon another, and so forth. Perhaps substantially the same has to be said of an epistle which Dionysius, according to Eusebius (*L. c.*, § 13), addressed to sister Chrysopora.

i. An *Epistle of Irenæus to Florinus*, presbyter at Rome and a pupil of Valentinus, known from Eusebius

32. Irenæus. (*HE* v. 201) and still regarded as genuine by Harnack (*ACL* 1593-4) and Krüger (*ACL* 93), is a later treatise, in epistolary form, on the unity of God, in connection with the question whether God is the author of evil (*περὶ τῆς μοναρχίας ἢ περὶ τοῦ μὴ εἶναι τὸν θεὸν ποιητὴν κακῶν*). The manifest exaggeration to which Matthes *years* ago called attention (*De oudenrdom van het Joh. Ev.* 1867, 117, 162-3), coupled with the fact that Irenæus, moreover, never shows any signs of acquaintance with Florinus, although he would constantly have had occasion to controvert him in *adv. Hær.* had he known him, and the manner in which the writer poses as Irenæus in defence of orthodox doctrine, all enable us to perceive clearly that a writer otherwise unknown is speaking to us here and why he is doing so.

ii. In like manner the *Epistle to Blastus*, connected with that of Irenæus to Florinus, and named only in Eusebius (*HE* v. 201, cp 5 15), is also, probably, not the work of Irenæus, but a later treatise 'on sehsim' (*περὶ σχίσματος*).

iii. A third epistle, which according to Eusebius (*HE* v. 24 11) was sent by Irenæus in name of the brethren in Gaul to Victor of Rome, and which is partially preserved by Eusebius (*loc. cit.* 12-17), should confidently be regarded as a later treatise about the paschal feast (*λόγος περὶ τοῦ πάσχα*), an earnest attempt at conciliation between contending parties in the paschal controversy, in which in all probability the name of Irenæus at first did not figure at all.

An *Epistle of Ptolemy to Flora*, preserved in Epi-phanianus (*Hær.* 33 3-7), and printed by Stieren (*Iren.* 1922-936), and, in an improved text, by

33. Ptolemy. Hilgenfeld (*ZWT* 24 [1881] 214-230), takes the form of a friendly answer to the question: How ought we to think regarding the Law of Moses? Irenæus, in writing about the gnostic Ptolemy, head of

OLD-CHRISTIAN LITERATURE

the school of Valentinus in Italy, neither uses this epistle nor shows any knowledge of it—a reason for regarding it as probably a treatise belonging to a somewhat later date than that usually assumed (the middle of the 2nd cent.). The same inference is suggested by the peculiar use here made of the gospels of Mt. and Jn., and of the Pauline epistles Rom., 1 Cor., Eph. (Cp A. Stieren, *De Irenæi adv. Hær. operis fontibus*, etc., 1836, pp. 19-21; *De Ptolemæi gnostici ad Floram Epistola*, 1843.)

As Apocryphal epistles the following may here be mentioned by way of Appendix:—An interchange of letters between Abgarus and Jesus (see APOCRYPHA, § 29, and von Dobschütz, *ZWT* 1900, pp. 422-486); between Seneca and Paul; between the Corinthians and Paul (=3 Cor.); from Paul to the Lacedæmonians (see PAUL, § 50).

IV. APOCALYPSES (§ 35)

In Old-Christian literature a fourth class is constituted by the writings usually known as Apocalypses, Ἀποκαλύψεις, or Revelations, most of which are partially or wholly lost. The following are known:—a *Revelation of John* (see APOCALYPSE, and JOHN, SON OF ZEBEDEE, §§ 1-15); part of a *Revelation of Peter* (see APOCRYPHA, § 30; CANON, § 73; SIMON PETER); the *Shepherd of Hermas* (see CANON, §§ 65, 72; SHEPHERD). Of the *Revelation of Paul* (see PAUL, § 50) and of the *Revelation of Abraham*, both mentioned by Epiphanius (*Hær.* 382), and both considered to date from the second century, we know little more than the names. Under this section we may include those fragments of older Christian Revelations which may be held to survive in Mt. 24 Mk. 13 Lk. 21 5-36 2 Thess. 2:1-12 Barnabas 4:1-6, and the Christian portions of certain originally Jewish writings—4 Ezra, the Testaments of the XII. Patriarchs, the Sibylline Oracles, etc., and the later or apocryphal Revelations edited by Tischendorf, 1866, and others.

V. APOLOGIES (§§ 36-44)

The Apologies form a fifth group. One of the oldest, known only in a small fragment
36. Apologies: (Eus. *HE* 4:3), claims to be by Quadratus and addressed to the Emperor Hadrian on his visit to Athens about 125-6 A.D.
Quadratus, Aristides.
So also a writing of Aristides partially (chs. 1, 2) extant in an Armenian version (1878), and wholly in a Syriac version discovered by Rendel Harris in 1889, as also in Greek in the romance *Bartham and Josaphat* discovered by Armitage Robinson in 1890 (*ed. princeps* in *TS* 11, 1891). It has the form of a speech delivered before an unnamed 'king' (Βασιλεὺς) and may be conjectured to have been published under the title, 'Apology of Aristides for the Christians' religion, to Hadrian' (Τοῦ Ἀριστείδου ἀπολογία ὑπὲρ τῆς τῶν Χριστιανῶν θεοσεβείας πρὸς Ἀδριανόν) most likely with the superscription 'To the Emperor Cæsar Hadrian, Aristides the Philosopher, of Athens' (Ἀποκράτορι, Καίσαρι, Ἀδριανῶ Ἀριστείδης Φιλόσοφος Ἀθηναῖος).

The speaker begins with a short profession of his faith in God (ch. 1). He premises that there are worshippers of so-called gods, as well as Jews and Christians; they fall into various classes as Chaldeans, Greeks, and Egyptians; and all are in error (2). Their gods have no title to be acknowledged or worshipped (3-13). They belong to the visible, not to the invisible world, and are creatures of God, perishable *stoicheia* (see ELEMENTS), or images of these (3-7). Amongst the Greeks, they are often represented as human beings displaying all kinds of objectionable attributes, vices and crimes (8-11). Amongst the Egyptians, moreover, as irrational animals, plants, and herbs (12, 13). The Jews know indeed the Almighty, the Invisible who sees all things and has created all things,—but although they are nearer the truth they do not serve him with understanding, as is shown by their denial of Christ the son of God who has come into the world (14). It is otherwise with the Christians. They live in accordance with the commandments of God engraved on their hearts, and are conspicuous in every respect for their praise-

worthy conduct (15). The discourse concludes with two sections that seem to have undergone some alteration in transmission to us (16, 17).

So far as the form is concerned, it may well be doubted whether Aristides ever delivered such a discourse, either at Athens or elsewhere. There is, however, no sufficient reason for doubting also, with Harnack (*TLZ* 1891, nos. 12, 13), the rest of the statement in Eusebius, or for inferring that Aristides delivered his discourse to Antoninus Pius (138-161). We may adhere to the date under Hadrian (117-138), but not earlier than 125-6. With this assumed date agrees what can be inferred from the contents (if the simplicity of the discourse is noted), what the writer adopts from the gospel narratives, and his attitude towards the books he appears to have made use of (see CANON, § 65; van Manen, *Th. T* 1893, 1-56).

A *Dispute of Jason and Papiscus concerning Christ*, attributed to Aristo of Pella, depreciatingly spoken of by Celsus, and defended by Origen, is known to us in a fragmentary way from the writings of Origen and others, and perhaps underlies the *Altercatio Simonis Judæi et Theophili Christiani* which comes to us from the fifth century (Harnack, *ACL* 192-95; *PRF*⁽³⁾ 247-48) and the *Discourse between Athanasius* [bishop of Alexandria] and the Jew *Zaccheus* (Conybeare, *Expos.* 1897, April, 300-323; June, 443-463). It appears to have turned upon the question whether Jesus was the Messiah foretold by the prophets, and to date from 135-170, let us say about 140 A.D.

The Christian philosopher, Justin Martyr, born about 100 A.D., baptized about 133, died about 165 (± 163-7), who is cited as a witness to
37. Aristo of Pella. Justin : the NT in CANON, § 67 and GOSPELS, First Apology. § 75, was the author of two apologies which are imperfectly preserved in a single MS. The first vindicates 'our faith' before Antoninus and the Roman senate, according to Eus. *HE* iv. 8:3 11:3 18:2. It is divisible into three parts: chs. 2-12 13-60 61-67, preceded and followed by an introduction (1) and a conclusion (68:1-2) to which was added at a later date a transcript of Hadrian's letter to Minucius Fundanus (68:3-10) and, later still, letters of Antoninus Pius and Marcus Aurelius.

The orator-author maintains (1) that Christians ought not to be persecuted for the name they bear seeing that they are neither without God (*ἀθεοί*) nor guilty of all sorts of evil deeds. He states what their belief really is, declares that Jesus Christ has foretold all things, and announces his purpose of proving, for the instruction of those who do not know it, the truth of his Christian confession (2-12). (2) He then proceeds in the second place to show that the Christian religion is rational and leads to a life that is lovely as the precepts of Christ are beautiful (13-22). In ch. 23 he lays down three propositions which he goes on to discuss in their order: what he and his brethren have taught concerning Christ and the prophets who went before is true (24-29); all this was taught by Jesus Christ, the Son of God, made man in accordance with the Divine purpose (30-53); before the incarnation men had wandered in error under the influence of evil spirits (54-60). (3) In the third portion he treats of baptism, the eucharist, the observance of Sunday (61-67).

The assumed character of a spoken discourse is merely literary form. The book is intended to advocate the Christian cause with all who cared to listen to it, especially with rulers (*οἱ ἄρχοντες*) all of whom, not merely one or two emperors, are addressed as 'pious and philosophers' (*εὐσεβεῖς καὶ φιλόσοφοι*). Where and when it was written cannot be determined with certainty. Probably it was at Rome about the middle of the second century.

In the second apology the speaker, in consequence of

OLD-CHRISTIAN LITERATURE

a bloody persecution of three Christians under Urbicus, addresses himself to the 'Romans' whose 'governors' (*ἡγούμενοι*) permit or perpetrate such cruelties. He relates what has happened (chs. 1-2), speaks contemptuously of what a certain opponent called Crescens might be able to do (3); disposes of the advice given to Christians to commit suicide (4); explains why it is that in spite of all calamities they maintain their faith in God (5); that God is unnameable; who Jesus Christ is (6); why Christians cannot accept the Stoical doctrine as to the conflagration of the world and as to fate (7-8); why they believe in the penal justice of God (9); that philosophers like Socrates in the olden time were also persecuted (10); how it is possible to learn from Hercules at the crossway (11); of the fearlessness of Christian martyrs (12); and that it must be held a fitting thing that answer should be made to the complaints of the Christians (13-15).

This discourse is no mere postscript of the first, as has often been supposed, nor a preliminary argument. Rather is it an independent sequel, with constant reference to what has been said in the first; perhaps a work that at a later date (yet not much later) was separately published when Urbicus was city prefect—that is to say between 144 and 160 (*circa* 153).

Both discourses, cited as witnesses in CANON, § 67 and GOSPELS, § 75, are of great value for our knowledge of the manner in which in those days Christianity was regarded by mature and thoughtful professors. The first has an additional value on account of what it tells us as to the moral life of the Christians of that period as well as their ecclesiastical customs and practices.

A third apology of Justin, in large measure preserved in the same MS, is known as his *Dialogue with Trypho the Jew*.

40. Dialogue with Trypho. To Trypho he tells the story of his own baptism (2-8), and then he goes on to show, in the first place that the Mosaic law has had its day and must now give place to the new law, the law of Christ (9-48), and in the second place that Christ is rightly worshipped by believers along with God, because the prophets had foretold his coming and he is truly the Son of God as is witnessed by his birth, by his death on the cross, his resurrection, and ascension (49 ff.).

This dialogue, cited in CANON, § 67, was, according to ch. 120, written after Justin's First Apology, probably still within the reign of Antoninus Pius (138-161), approximately about 155-160.

What is known as the *Epistle to Diognetus* reached modern times in a single MS which was burned at

41. Epistle to Diognetus. Strassburg in 1870; it is a particularly fine plea for Christianity (cp § 30) in which an unknown writer, who for a while was wrongly identified with Justin, undertakes to enlighten the equally unknown Diognetus on the religion of Christians, the God in whom they trust, their contempt of the world and of death, their renunciation of the gods of Greece and of the Jewish worship (*δαιδαμονία*), their mutual love, and the reason why this new 'kind or practice' (*γένος ἢ ἐπιτήδευμα*) of piety has only now entered into the world (ch. 1). He insists on the worthlessness of the gods made by human hands of perishable matter (2); maintains that the Jews are in error when they think to serve the Creator as if he had need of offerings and desired the fulfilment of a multiplicity of commands (3-4). He then goes on to sketch the Christian manner of life so as to show the excellence of the Christian profession (5-6). Their knowledge of God is through the manifestation of the Word (7). How greatly superior is the Christian revelation to all that ever philosophers formerly taught (8). Before it must come the fulness of transgression (9). Christian faith brings a rich blessing (10). Finally there follows, from another—somewhat younger—hand, a glorification of the Word and of the preaching of the Word to men (11-12).

The whole was, as plainly appears from the last lines of ch. 1, originally designed, not to be sent as a letter, but to be read and re-read in the religious assemblies of the church. When we compare this anonymous writer with Aristides and perceive how he seems to be acquainted with NT writings without ever quoting them verbatim or as possessing authority, we have reason to assign his date to the second half of the second century.

Tatian, already referred to in § 7, was the author of a still extant *Oration to the Greeks* (critically edited by

42. Tatian. Schwartz in 1888) which may be dated towards the middle of the second century, not later than about 172 A.D. He there expounds what he, the quondam philosopher, deems most proper to be said on behalf of Christianity while criticising and confuting the religion, ethics, philosophy, and art of the Greeks.

An extant *Oration of Athenagoras* (also edited by Schwartz, 1891) is represented as having been held

43. Athenagoras. before the emperors Marcus Aurelius and Lucius Commodus—that is to say, somewhere between the years 176 and 180.

In it the Athenian philosopher (of whom nothing further is known) directs attention to the difference of treatment meted out to Christians and pagans (1-3); he then proceeds to vindicate Christians from the accusation of being atheists (*ἄθεοι*) (4-30) and of being morally inferior to pagans (31-36), and concludes with a fresh appeal to the supreme rulers (37).

44. Miltiades, etc. Apologies by Miltiades and Apollonius are known to us only by name: that of Melito (*circa* 170) from a quotation by Eusebius (*HE* iv. 265-11).

VI. TEXT BOOKS

Such Old-Christian writings as do not come under the categories already dealt with—Gospels, Acts,

45. Text books Epistles, Revelations, Apologies—can be conveniently grouped under the heading of *Text books*, as having been written for the instruction of their readers. In this class the first we shall mention is the *Antitheses* or *Separatio legis et evangelii*. Of this we know little more than the name, and that it was the chief work of Marcion; it is mentioned by Tertullian (*adv. Marc.* 119; see CANON, § 69).

Four-and-twenty books of Basilides, or it may be, of one of his followers 'upon the Gospel' (*ἐπὶ τὸ εὐαγγέλιον*; so Eus. *HE* iv. 77) or 'exegetics' (*ἐξηγητικά*; so Clem. Alex. *Strom.* iv. 1283).

Letters, Homilies and Psalms, by Valentinus or his adherents, are referred to by Clement of Alexandria, Hippolytus, Tertullian.

A 'treatise against all the heresies that have existed' (*σύνταγμα κατὰ πασῶν τῶν γεγενημένων αἱρέσεων*), by Justin, is named by himself in *Apol.* 126.

Other works also are, rightly or wrongly, attributed to Justin.

Philosophical, doctrinal, polemical, ecclesiastical writings by Isidorus, Apelles, Agrippa Castor, Tatian, Miltiades, Apollinaris, Melito, Theophilus, Rhodon, and others in confutation of 'heretics' or in recommendation of their 'errors.'

Greater or smaller treatises wholly or partially incorporated or worked into later *Canones, constitutiones*, confessional writings, episcopal lists, etc.

The chief work of this description, known to us since 1883, is the *Didachè* (see APOCRYPHA, § 31; CANON, § 65; Warfield, *Bibl. Sacr.* 1886, pp. 100 ff.; Hennecke, *ZNTW*, 1901, pp. 58-72).

Five books of 'Memoirs' or 'Commentaries' (*Ἰστορήματα*) by Hegesippus, begun under Anicetus (154/5-165/7), completed under Eleutherus (173/5-188/9), of which fragments are preserved in Eus. *HE*, are more of a polemical, anti-gnostic, than of an historical, character.

OLEASTER

The much discussed work of Papias was probably a commentary on one or more of our canonical gospels (see GOSPELS, §§ 65, 94).

'Memoirs' or 'Commentaries' (Ἐπισημύματα)—by Heracleon, according to Origen—collected by Brooke (ZS 14, 1891) belong to a commentary on the Fourth Gospel (see CANON, § 69).

On the Resurrection of the Dead (περὶ ἀναστάσεως νεκρῶν; edited by Schwartz, TU 42) was written by Athenagoras in answer to objections to the doctrine of the resurrection and in exposition of the arguments in its favour that can be drawn from the writings of philosophers, or from the constitution and destiny of man.

The literature of the subject is immense. It includes all studies, whether older or more recent, on the NT, the Apostolic Fathers and other Christian writers of the first two centuries. For brevity's sake we may refer to the 'Introductions' to the NT (see PAUL, § 51); Harnack, ACL 1 1893, 21, 1897; Krüger, ACL, 1895, and 'Nachträge', 1897. W. C. v. M.

OLEASTER (אֵילָן עֵץ); Is. 41:19 RVmg, EV OIL TREE (q.v.). Cp OLIVE, § 2.

OLIVE (אֵילָן); ελαια Gen. 8:11 Ex. 27:20 30:24 etc.) is often mentioned in OT as well as several times in NT.

The Hebrew name (אֵילָן), is found in 1. Etymology. Aram., Eth., and Arab., but not in Ass. In Arab. *zayt* usually stands for the oil, and a longer form *zaytūn* for the tree.

Guidi's inference (*Della Sede*, 37) that both the name and the culture of the olive were a comparatively late importation into Arabia—supported by Strabo's statement (783) about the Nabataean country *εὐκαρπος ἢ πολλὰ πλὴν ἐλαίου*, and the fact that various words for *lamp*s were borrowed by Arab. from Aram.—is accepted by Fränkel (147), but denied by Hommel (*Aufs. u. Abhandl.* 99).

The origin of *zayith* was formerly sought within the Semitic languages in אלה, 'to be bright' (cp יר, Ges. *Thes.*); but Lagarde in a brilliant article (*Mitth.* 3214 ff.) maintains a derivation from Armenian *tsēth*, which may also be the source of Egyptian *djoit* or *djoit*, a word which, in a slightly different form, is found in an early Pyramid text (Hommel, *l.c.*). If this etymology be accepted, it has an important bearing on the history both of language and of civilisation. The word would be an example of a very early loanword incorporated from without into the common Semitic stock, whilst the knowledge of olive cultivation might be inferred to have reached Egypt on the one hand and Palestine on the other from some early seat in Asia Minor—probably Cilicia, Lagarde thinks, in view of the fact that on the S. coast of Asia Minor the wild olive 'forms veritable forests' (De Candolle, *Origine*, 225). The Arabic word passed along the N. coast of Africa into Spain, and was also borrowed by Persian and Turkish. The Greek and Latin words are of quite independent origin.

Although in Gen. 8:11 a branch of *wild* olive seems to be intended, everywhere else *zayith* denotes the cultivated variety. In Neh. 8:15 this is distinguished from the oleaster (*Eleagnus angustifolia*), if that is the correct identification of *עֵץ זַיְתִּים* (see OIL TREE). The two terms are brought together in a distich of Ben Sira (Ecclus. 50:10, Heb. text)—

As a luxuriant olive (אֵילָן) full of berries,
And as a wild-olive tree (עֵץ זַיְתִּים) with branches full of sap.

No wonder that references to the olive tree abound; it is as characteristic of Palestine (Dt. 8:8) as the date-palm is of Egypt, and shares the notice of Hebrew writers with corn and the vine. Once we find the phrase אֵילָן זַיְתִּים 'olive orchard' (Judg. 15:5). The special epithet of the olive is אֵילָן לֵךְ—i.e., 'luxuriant'—not 'green,' for the leaves of the olive are not strikingly green. The uses of its oil, for lighting, as an ingredient in food, and as a salve or ointment, are too familiar to

* See Driver on Dt. 12:2.

OLIVES, THE MOUNT OF

need illustration, nor need we refer here to GETHSEMANE [*q.v.*]. Olive trees stand as an image of fresh beauty combined with fruitfulness (Ps. 52:8 [10] 128:3 Jer. 11:16 Hos. 14:6); the process of 'beating' or 'shaking' the trees to bring down the ripe fruit is referred to¹ in Dt. 24:20 (for the law about gleanings cp Ex. 23:11) Is. 17:6 24:13; and the treading or pressing out of the oil in Mic. 6:15.

In Rom. 11:17-24 we have an allusion to the process of grafting, which has since ancient times been applied in order to grow branches of the finer cultivated olive upon the stem of the oleaster (ἀγριέλαιος); the writer, for the illustration of his argument, imagines a reverse process—the grafting of wild olive branches upon the cultivated plant.

The area over which *Olea europæa*, L., is found growing spontaneously is so large that it is almost impossible to say where or how early it may have been first cultivated. As De Candolle

3. Home of olive. (*op. cit.* 223 ff.) shows, however, its range may not in early times have been so extensive. The Egyptians certainly knew it very early as a cultivated plant. The Greeks believed Attica to have been its earliest home (Herod. 5:82), and it was cultivated among them from a great antiquity. The Syrian cultivation may reach back at least as far as either of these (cp Lagarde, *l.c.*), and Schweinfurth and other botanists incline to the view that the olive was of African origin, and thence spread along the Mediterranean region.

N. M.

[Two passages in the Psalms seem to require notice here: (a)

4. Pss. 52:8 Ps. 52:8 [10] and (b) 128:3. In passage a olive-trees in the temple-courts may justly surprise us, 128:3. for there is no trustworthy evidence that trees were planted there. Most probably the text is in disorder, as the vertical line called *Pasek* suggests. If we may read—

And I, the poor and needy one, וְאִנִּי עֲנִי וְאֶבְיָן,
In the courts of the house of my God, בְּחִצְרוֹת בַּיִת אֱלֹהֵי
the difficulty is removed without violence (Che *Ps.* (2)).

In passage b, there may be an allusion to the way in which the olive tree propagates itself. When the trunk decays, fresh stems spring from the roots, and a group of olives takes the place of a single tree. As the parent stem decays, the suckers grow up, tall and strong, in their place, so that it may perhaps be a true tradition that in the famous olive-grove of Gaza (see GAZA, § 4) no trees have been planted since the Moslem conquest.—T. K. C.]

N. M., §§ 1-3; T. K. C., § 4.

OLIVES, THE MOUNT OF (הַר הַזַּיְתִּים), Zech. 14:4 bis; τὸ ὄρος τῶν ἐλαίων [C, NT, Jos.]; *mons Olivarum*; in 2 S. 15:30 מֶלֶךְ הַזַּיְתִּים הַיָּמִינִי, ἡ ἀναβάσις τ. ε., *clivus*,

1. Names. 'ascent'; in Acts 1:12, ὄρος τὸ καλούμενον ἐλαίων, *mons qui vocatur Oliveti*, 'the mount called Olivet' [Olivet also in 2 S. 15:30 AV; cp Jos. *Ant.* vii. 9:2], afterwards called by the Jews הַר הַמְשֻׁחָה, *mons unctiosus* (on the expression מְשֻׁחָה הַר, 2 K. 23:13 see below, and cp DESTRUCTION [MOUNT OF]), and still later, *mons luminum* (explained in the Middle Ages as referring to the multitude of lights burning in the various sanctuaries on the mount) or also *mons trium luminum*—with reference to the triple light (a) of the temple, (b) of the rising sun, (c) of the oil of the olive trees, according to the rabbis; cp PEFQ, 1897, pp. 75-77, 397-398—or, more correctly, according to Reland, *mons trium culminum* (from its three summits; see below), and at the present day *Jebel es-Zeitūn*, or more commonly, *Jebel el-Tūr* (sometimes *Jebel Tūr es-Zeit*).

The name applies primarily in a general way to the whole ridge (on the limitation to a part of this chain, see below [3]), coming from the NW.,

2. Description. but stretching N. and S. for about 2½ m. on the E. side of Jerusalem, beyond the ravine of the Kidron valley, thus forming a sort of rampart parallel to the Bezetha and Temple Hills (see sketch map above, col. 2410). Geologically the formation is a hard cretaceous limestone (called by the Arabs *mizzeħ*), with superimposed strata of soft cretaceous limestone (Senonian, called by the Arabs *kakuleħ*), and quaternary deposits on the summit. The mount is easily climbed in a quarter of an hour from the Kidron; it is less stony

¹ In many parts of Spain and Greece, and generally in Asia, the olives are beaten down by poles or by shaking the boughs (*EB*⁹ 17:762).

² Conder, *Tent Work*, 2:261.

OLIVES, THE MOUNT OF

than some others near it, and formerly was rich in various plantations, especially (as the name implies) olive plantations; the number of these has greatly diminished. There are three distinct elevations separated by depressions in the ridge.

(1) The elevation on the N., where the house of Mr. Gray Hill now stands (2690 ft. above sea level), currently known as Mt. Scopus (but wrongly, the true Scopus being more to the W., beside the Nablus road, at the point called Rās-el-Mesharif; cp *PERQ*, 1874, pp. 94, 111); the native name appears to be *es-Sūwan*.

(2) That on the S., now known as Jebel Baṭn el-Hawa (Mount of the Belly of the Wind), 2395 ft., having the village of Siloam on its western flank. By Josephus (*B/* v. 12.2) it is called 'the hill overlooking the ravine of Siloam'; by tradition, ὄρος προσοχθίσματος, σκανδάλου, διαφθοράς, mons offensionis or scandali, being identified with the hill spoken of in 1 K. 11.7 as 'before' (על־פני) Jerusalem, in connection with the pagan sanctuaries set up by Solomon for his foreign wives,¹ and also with the hill (to be regarded, however, as distinct), which in 2 K. 23.13 is called קְרִית־הַחַיִּיטָה (EV, mount of corruption, RVmg, 'or, destruction'). For a discussion of this phrase, which was unintelligible to the translator of *Θ*, see DESTRUCTION [MOUNT OF]; the hill intended by it was probably the Mt. of Olives, properly so-called, and as for the sanctuaries situated 'on its right hand'—i.e., to the S.—they may have stood on the Jebel Baṭn el-Hawa, but equally well may be supposed to have been on the hill called by tradition the Hill of Evil Counsel, now locally known as the Jebel Abū-Tūr, to the S. of Jerusalem beyond the Wādī er-Rabābī. The Jebel Baṭn el-Hawa is separated from the Mt. of Olives proper by a sharp depression, through which passes the road to Bethany, and in which are situated the new abattoirs of Jerusalem.

(3) Between the two already mentioned is the Mt. of Olives proper—the distance from Jerusalem is variously given as 8 furlongs (Acts 1.12, 'a sabbath day's journey'), 5 furlongs (Jos. *Ant.* xx. 8.6) or 6 furlongs (Jos. *B/* v. 23)—described as before (על־פני) Jerusalem on the east (קְרִית־הַחַיִּיטָה), Zech. 14.4), on the east side (קְרִית־הַחַיִּיטָה) of the city (Ez. 11.23), and over against (κατέναντι) the temple (Mk. 13.3). Here again three culminating points have to be distinguished. The first, on the E. (2664 ft.), is now marked by the conspicuous Russian tower; the second (2636 ft.), farther to the W., exactly faces the temple; here stand (a) the chapel of the Ascension on the site of various Christian buildings, the oldest of which goes back to the time of Constantine; (b) the Arab village of Keḫf et-Tūr, first mentioned in the fifteenth century; (c) several other sanctuaries; the third, more to the N. (2684 ft.), is locally known as Karm es-Seyyād or Karm Abul-Hawa, and to tradition as *Viri Galilæi*; see below (§ 5). A carriage road, made for the Empress of Germany in 1898, leads from the Nablus Road to Viri Galilæi and thence onwards to the Chapel of the Ascension.²

The view from the Mt. of Olives is very extensive. Westward, it commands a bird's-eye view of Jerusalem, 'in the form of a theatre,' as Josephus expresses it (the summit is 218 ft. above the Ḥaram). To the NW. is seen Neby Samwil, and to the N. the mountains of Benjamin and Ephraim; to the S. are those of Judah, and, in particular, the 'Frank Mountain' (Bethlehem is not visible; but from the top of the Russian tower can be seen the bell-towers of the Church of the Nativity); to the E. are the arid mountains traversed by the road from Jerusalem to Jericho (Bethany is hidden), the Ghōr, the Dead Sea, the mountains of Gilead and Moab. Those, however, who claim to have seen Jerash, the greater Hermon, Ebal and Gerizim, the Mediterranean, are in error.

In the OT the Mt. of Olives is mentioned in four places:—(a) 2 S. 15.23-16.1. David, in flight from Absalom, crosses the Kidron and climbs up the other side to where, according to RV, 'God was worshipped' (RVmg,

¹ A later tradition, going as far back as 1283 A.D., places here not the heathen sanctuaries, but the harem of Solomon.

² The western flank of the Mt. of Olives has been from early times, and still continues to be, used for purposes of burial. The most ancient of the tombs, caves transformed into sepulchres, are now called (haslessly) 'Tombs of the Prophets,' and are situated to the SW. of the Latin buildings. Cp H. Vincent, *Revue Biblique*, 10 (1901), pp. 72-88; *PERQ*, 1901, pp. 309-317.

'where he was wont to worship God'; AV less correctly, 'where he worshipped God'; on the other side he descended to BAHURIM (*q.v.*; unidentified). (b) Ezekiel (11.23) sees the 'glory of Yahwè' going forth from the temple and resting on the Mt. of Olives; cp 43.2, where, conversely, the glory of Yahwè comes to the temple from the E. (c) In Neh. 8.15 it is said: the people went to 'the mount' for branches of olive, etc.; various interpreters understand the Mt. of Olives here. (d) Zechariah (14.4) sees Yahwè in the great day plant his feet on the Mt. of Olives, which is cleft by an eastward and westward valley to make way for the fugitives.

Later rabbinical Judaism attached the rite of the red heifer (Nu. 19; Mish. *Parah*, 8.6) to the Mt. of Olives, where also at the appearance of each new moon a fire was kindled visible as far as from Karn Šartabeh. A Jewish legend fixes the abode of the divine Shekinah on the Mt. of Olives for three and a half years.

The NT references are five:—(a) Mt. 21.1 Mk. 11.1 Lk. 19.29 (Jesus crosses the Mt. of Olives on the day of his triumphal entry into Jerusalem); (b)

4. NT references. Mt. 24.3 Mk. 13.3 (scene of his discourse concerning the temple); (c) Lk. 21.37

Jn. 8.1 (Jesus withdraws for the night—as, according to Lk. was his habit—to the Mt. of Olives); (d) Mt. 26.30 Mk. 14.26 Lk. 22.39 (mentioned in connection with GETHSEMANE [*q.v.*]); (e) Acts 1.12 (after the ascension, the apostles return from the Mt. of Olives). Christian tradition, resting undoubtedly on the last-cited passage, but also influenced by Zech. 14.4, has, since the time of Eusebius (about 315 A.D.), regarded the summit of the Mt. of Olives as the scene of the ascension; a sanctuary

5. Scene of the ascension. ἀκρωπέλας, which varied in the course of centuries; from the fourth century onwards there has been shown one of the footprints (now right, now left) of Jesus on the rock (again an echo of Zech. 14.4). In Lk. 24.50 the scene of the ascension is placed very definitely at Bethany (he led them εἰς πρὸς Βηθανίαν

AV, 'as far as to Bethany,' RV less correctly, 'until they were over against Bethany'). Unless two conflicting accounts be admitted, that of Lk. must rule, the passage in Acts saying merely that the disciples returned from the Mt. of Olives. 'There can be no doubt that Lk. means to say that he led them to the place called Bethany' (Tobler, 83). It may be added that in the time of Jesus there were houses on the top of the Mt. of Olives. The tendency to multiply sacred sites, so often shown by tradition, has caused the scene of the apparition of the angels ('Viri Galilæi,' Acts 1.11; see above, § 2, [3]) to be separated from that of the ascension itself. A further designation, Galilæa (which is not to be confounded with Viri Galilæi), is the result of a harmonistic effort to bring Mt. 28.10 (cp v. 16), which speaks of an appearance of Jesus on a mountain in Galilee, into conformity with the indications of Mk. and Lk., which make Jerusalem the scene of the manifestation. The attempt is old and has been often repeated; the last to make it is R. Hofmann, whose argument is interesting but unconvincing. Cp GOSPELS, § 138.

From the fourth century (Bordeaux Pilgrim, 333) onwards through the Middle Ages and down to the sixteenth century,¹ in accordance with the tendency of tradition to bring all the biblical sites as near to Jerusalem as possible, pilgrims were shown the scene of the transfiguration as well as that of the ascension on the Mt. of Olives. The similarity of names (Mt. Tabor, Jebel et-Tūr; and Mt. of Olives, Jebel et-Tūr) may possibly have contributed to this error. The interest of the Mt. of Olives for the Christian lies more in the mountain as a whole than in any particular part of it. As the Abbé L. Camus (*l'oyage aux Pays Bibliques*, 1.252) has it: 'Quand les reliques sont des montagnes, on peut admettre leur authenticité.'

Tobler, *Die Siloahquelle und der Oelberg*, 59-313; Reland, *Palästina*, 52.337-341; Robinson, *Biblical Researches in Palästina*(²), 1.274-275, 604-605; *Phys. LU. G.

OLYMPAS (ΟΛΥΜΠΑΣ, a contracted form of ΟΛΥΜΠΙΟΔΩΡΟΣ) is saluted in Rom. 16 15; cp ROMANS, §§ 4, 10. Later legend (see the ΥΠΟΜΝΗΜΑΤΑ of Peter and Paul of the pseudo-Symeon Metaphrastes) said that he was ordained bishop of Philippi by Peter, and beheaded with Herodion at Rome when Peter was crucified.

OLYMPIUS (ΟΛΥΜΠΙΟΣ [AV]), 2 Macc. 62. See JUPITER.

OMAEERUS (ΜΑΗΡΟΣ [B]), 1 Esd. 9 34 AV = Ezra 10 34, AMRAM, 2.

OMAR (אֹמָר; ωμαρ [BADEL]), one of the sons of Eliphaz; Gen. 36 11 (ωμαν [ADE]) 15 1 Ch. 1 36.† Probably a corruption of Jerahmeel, like IRAM (so Che.) in Gen. 36 43 1 Ch. 1 54.

OMEGA. See ALPHA.

OMER (אֹמֶר), Ex. 16 36 etc. See WEIGHTS AND MEASURES.

OMRI (אֹמְרִי) may either be an ethnic like Zimri, and many of the names which now close with ׀, instead of ׀ [see NAME], perhaps [cp OMAR] from Jerahmeel [Che.]; or, it may be put for אֹמְרִיָּהּ,

1. OT [Che.]; or, it may be put for אֹמְרִיָּהּ, 'worshipper of Yahwè', cp Arab. names **references**. 'Amir and 'Omar, see Robertson Smith, *Kinship*, 265 f.; in Aram. inscr. אֹמְרִיָּהּ [C/S 2, no. 195] and אֹמְרִיָּהּ [ib., no. 173], cp JAMBRI; זאמבר[ע] [BA, but occasionally אַמבר(ע)ו], אַמברו [L], אַמברינוס [Jos. *Ant.* viii. 12 5]. **1.** Father of Ahab and King of Israel (900-875 B.C., Schr.; 890-879 B.C., Kamph.), 1 K. 16 15-28. He was originally 'captain of the host, and was besieging Gibbethon, a Philistine town, when he heard that his royal master Elah had been slain by ZIMRI (*q.v.*). At once he left Gibbethon and came to Tirzah and besieged the usurper Zimri, who, finding himself unable to hold out, closed his reign of seven days by a voluntary death (see ZIMRI). But the victor had yet another rival to fear. TIBNI b. Ginath and his brother Joram (cp 1 K. 16 22 23) were in arms against Omri, and it was not until they died that his authority was secure.¹ That he had the eye of a statesman is clear from his selection of SAMARIA (*q.v.*) as capital in preference to TIRZAH. His struggles against the Aramæans of Damascus were not particularly successful; he had to concede certain privileges to them in his own capital (1 K. 20 34), and was forced to surrender several Israelite towns, including, it would seem, the important Ramoth-gilead (22 3); see BENHADAD, § 2. The meagre accounts of him in the OT are supplemented slightly by the Moabite inscription.

From the stele of Mesha, we learn that Omri reasserted his claim to Moab and gained a hold on Mebeba and the surrounding district, which was retained by him for some years (cp AHAB). The thoroughness of the subjection is proved by the enormous tribute paid to Israel by Moab (cp 2 K. 3 4). See MESHĀ.

Omri is the first Israelite king to be mentioned on the Assyrian inscriptions, and the widening of the political horizon of Israel marks the commencement of a new epoch. It is possible that Omri himself paid tribute to Assyria, and through its help obtained the throne (cp Ki. 2 259). On inscriptions from the time of Shalmaneser II. (854) down to Sargon (720) we find the northern kingdom

2. Assyrian **references**. Omri himself paid tribute to Assyria, and through its help obtained the throne (cp Ki. 2 259). On inscriptions from the time of Shalmaneser II. (854) down to Sargon (720) we find the northern kingdom

¹ Knowing, as we do, the manner in which late revisers have endeavoured to synchronise the events of the two kingdoms of Israel and Judah, we cannot, by comparing v. 15 with v. 23, fix the length of Omri's struggle with Tibni at four years (see CHRONOLOGY, § 7).

designated as *māt Bit-Ḥumri*, 'land of the house of Omri'; or simply *māt Ḥumri*, 'land Omri'.¹ Jehu even is called the 'son of Omri' (Schr. *KAT* 190 ff.). The use of this phrase shows how great was the reputation which Omri enjoyed abroad (Stade, however, supposes that the Assyrians did not learn of the existence of Israel till Omri's reign, and that, as years went by, they clung to the original name, without troubling to change it [*GI* 1 521]). Another sign of the influence of Omri would be the strange phrase of an anonymous prophet in Mi. 6 16, 'the 'statutes of Omri'; but the text is doubtless corrupt (see MICAH [BOOK], § 3). The dynasty which he founded lasted for half a century, and was only overturned by the hatred of the prophets to the worship of Baal. It is remarkable that we are told so little about him. Cp HISTORICAL LIT., §§ 5, 7.

2. b. Becher, a Benjamite, 1 Ch. 7 8 (אַמְרֵיָּהּ [BAL]).

3. A descendant of Pharez, 1 Ch. 9 4 (אַמְרֵיָּהּ [BA], אַמְרֵיָּהּ [L, who appears to identify Omri and IMRI, a name which BA omits]).

4. b. Michael, of the tribe of ISSACHAR (§ 4 n.), 1 Ch. 27 18 (אַמְרֵיָּהּ [BL], אַמְרֵיָּהּ [A]).

ON (אֹן; אֹן [B], אֹןאֹן [AF], אֹמְנָן [L]), b. Peleth, a Reubenite, the associate of Dathan and Abiram (Nu. 16 1). The name On seems to have attached itself to Jerahmeelite territory; hence it is parallel with Cushan and Mišsur, according to an almost certain restoration of Hab. 3 7, 'On is affrighted, the tents of Cushan are in dread,² the tent curtains of Mišsur tremble.' See DATHAN AND ABIRAM, and cp JERAHMEEL, § 3. PIBESETH.

The names On, Onam, Onan, Ono, Ben-oni point to the existence of a clan and of a district in the far S. called On, and there is a group of passages in the Prophets, commonly much misunderstood, in which the same S. Palestinian district is probably referred to, viz., Am. 1 5 ('and inhabitants from Rehoboth-on'), v. 5 ('Bethel [the southern Bethel in the district of On?] shall become Aven'), Hos. 10 8 ('the high places of On-jerahmeel'), Hab. 3 7 ('On shall be affrighted'), Ezek. 30 17 ('the young men of On and Jerahmeel'). For the explanation and justification of these readings see *Crit. Bib.*; we can only mention here that the Bethel of Amos and Hosea was probably the sanctuary of the golden calf (cp PROPHECY, § 35), not far from Ḥalūšah (=Dan?) in the Negeb. It is also by no means impossible that under the present Egyptianised story of Joseph, there lies an earlier story, which laid the scene in N. Arabia, and gave Joseph for a father-in-law a priest of On, a Zarephathite (זַרְפַּתִּי = זַרְפַּתִּי). Note that On in Nu. 16 1 is 'b. Peleth'—*i.e.*, a Pelethite (= Zarephathite)—and that REUBEN appears originally to have been a southern tribe (see PELETH); also that in Neh. 6 2, for reasons given elsewhere (see *Crit. Bib.*), the place of meeting suggested to Nehemiah was probably, not 'in [one of] the villages in the plain of Ono,' but 'in Jerahmeel, in Rehoboth of On' (cp Am. 1 5 above); and lastly, that in Neh. 11 35 we should probably read for 'Ono, Ge-haharashim' [RV^{ms}], 'On of the Geshurites' (see GESHUR, 2). Every one of these corrections throws light on a dark place in the OT writings; hence their introduction into a work like the present.

T. K. C.

ON (אֹן; אֹן; ἡλιούπολις; ³ HELIOPOLIS), the city of POTIPHERA (*q.v.*), the father-in-law of Joseph (Gen. 41 50 46 20; also Ezek. 30 17 18 26; see AVEN), also mentioned as Beth-shemesh in Jer. 43 13 (so MT and 18; but the text needs correction; see BETH-SHEMESH), and in the true text of Is. 19 18 (cp N* Symm., see HERES, CITY OF), and in 18 of Ex. 1 11 (καὶ ὠν [L, ωρ unless this is a misprint in

1. Name. 41 50 46 20; also Ezek. 30 17 18 26; see AVEN), also mentioned as Beth-shemesh in Jer. 43 13 (so MT and 18; but the text needs correction; see BETH-SHEMESH), and in the true text of Is. 19 18 (cp N* Symm., see HERES, CITY OF), and in 18 of Ex. 1 11 (καὶ ὠν [L, ωρ unless this is a misprint in

¹ For the designation of a nation as the 'house' of a king or of a founder of a dynasty, cp Hos. 5 1. Mesha, too, speaks of the *house* of Omri's son (l. 7). Cp Wl. *KAT* 7⁹, 247.

² So Perles (*Analekten*, 66) and Nowack; but מִשְׁסֻר must also be restored for מִשְׁסֻר.

³ In Gen. 41 45 ἰου πόλις [A*], ἰλιού π. [A1], 41 50 46 20 ἰλιού π. [A].

Lag.) Η ΕΣΤΙΝ ΗΛΙΟΥ ΠΟΛΙΣ) as well as in Jer. 43 13 (a gloss on ΗΛΙΟΥ ΠΟΛΙΣ).

The name of the Egyptian 'On' (for the S. Palestinian 'On', see preceding article) is written *ꜥw*¹ (the initial Aleph would admit also of being read as a y). According to a famous mythological text (Destr. 19), the name would be etymologically connected with the word preserved in Coptic as *εγνι*, 'millstone,' so that the *w* would have to be read before the *n*. The late pronunciation On is, at any rate, traceable, not only in *Ⲭ*, but even in the Assyrian *Unu* (Asur-banipal).² From the famous temple of the sun-god the city was perhaps also called *Pr(r)-Rē'*, 'house of the sun-god'; cp the Greek and Arabic designations.³

On-Heliopolis, situated very near the southern end of the Delta, E. of the Pelusiac branch of the Nile,

2. Importance. We find, at least, that from the texts of the pyramids to the latest theological writings it is described as the holiest city, the favourite place of the sun-god whence it is easiest to find access to heaven. In its temple ('the House of the Prince') was a sacred tree which is identified with the tree from the branches of which the sun-god rises every morning, etc.⁴ The earliest divinity worshipped there seems to have been Atum(u), figured in human form, and explained by the later theologians as the setting sun. Rē' and Harmachis were also worshipped. A god explained as the Heliopolitan form of Osiris had the name Sep (cp Osarseph, the name of Moses in Manetho [JOSEPH ii., § 1]). The most sacred animal there was the bull called Mnēvis by the Greeks.⁵ The name of the high priest (*wr-m*) 'greatest in seeing' (i.e., observing the stars) and his sacrificial costume, covered with stars, point to the high reputation of the Heliopolitan astronomers and astrologers. Even in Greek times the learning of those priests (*Αιγυπτίων λογίων-ταροι*, Herod. 23) was so famous that Greek philosophers like Plato and Eudoxus were said to have visited them to study their wisdom. So important was the city to which Potiphara (cp JOSEPH ii., §§ 3, 11) was said to have belonged.

Heliopolis was the capital of nome (the thirteenth of Lower Egypt), but seems never to have played any political part except, perhaps, in the time

3. History. of the Hyksos who are said to have resided (?) there.

Being situated near the W. end of Goshen, on the road from Goshen to Memphis, On had, later, a very large Semitic population. As early as in the time of Rameses III. a quarter inhabited by some thousands of Asiatic Apurii is mentioned, and before the foundation of Alexandria Heliopolis doubtless ranked high among the cities with a partly Jewish population.⁶ The Jewish city Onion and the temple of Onias (see ONIAS, § 13; cp

¹  Brugsch, *Dict. Géogr.* 259.

² Delitzsch (*Par.* 318) would compare this *Unu* with Hermonthis near Thebes which had the same name in earlier times. As, however, its name at a later period always received the addition *rēs(i)*, 'the southern' or *Montu* 'of [the god] Month,' in opposition to the northern 'On,' Delitzsch's idea is highly improbable. Cp also *CS* 102 a, 2 (Bloch, *Glossar.* 14) *ⲠⲚⲓⲛ*.

³ Diodorus 1 12 concludes from the name that the sun-god founded the city. On the Egyptian form see Brugsch, *Dict. Géogr.* 499 f. (with caution).

⁴ It is, certainly, not accidental that, after the downfall of paganism, the Christian Egyptians always revered a tree in or near Heliopolis, claiming that it had protected the Virgin Mary and the child Jesus on the flight to Egypt. The tree of Mary, shown at present, was planted somewhat over 200 years ago. No doubt it is a successor of the holy persea tree of antiquity.

⁵ The sacred bird of On, the *bnw*, *byrw* (a crested heron), was considered as a symbol of the morning sun; the strange fables attached to it by the classical writers (Herod. 2 73, etc.) are not found on the monuments. Cp PHENIX.

⁶ The statement of Juba (in Plin. 6 177) that it was founded by Arabs evidently refers to the same fact.

DISPERSION, § 6, and ISRAEL, § 71) were near it, and several neighbouring ruins have, at present, names pointing to Jewish communities—e.g., *Tell el-Yahūdiye*, 'the hill of the Jewess'; a 'Vicus Judæorum' occurs already in the Roman itineraries. *Ⲭ*'s addition to Ex. 1 11 is quoted above. Thus the eastern frontier of the Delta was occupied by a continuous line of Jewish settlements.

At the beginning of the Roman period, Strabo (p. 805) describes the city as deserted, although the great temples had still their population of priests. The ruins near the modern village el-Matariye are, at present, very insignificant; the only considerable remnant of the great temple of the sun is an obelisk erected by User-tesen I. of the twelfth dynasty. The Arabs called the city 'Ain esh-Shems, 'fountain of the sun.' Whether the sweet well¹ near the sacred tree of el-Matariye furnished the name, is doubtful; the ruins of Heliopolis are, at any rate, too far N. for us to regard the well as the sacred basin of the sun-temple. W. M. M.

ONAM (Ⲕⲛ), § 77; on the name cp GENEALOGIES i., § 5, n. 2; JERAHMEEL, § 2 f.; and see ON i., ONAN).

1. An Edomite clan (Gen. 36 23, *ⲟⲙⲁⲛ* [AEL], -μ [D]; 1 Ch. 1 49, *ⲟⲙⲁⲛ* [BA], *ⲟⲙⲁⲛ* [L]).

2. A Jerahmeelite sept or clan (1 Ch. 2 26, *ⲟⲥⲟⲙ* [B], *ⲟⲟⲟⲙⲁ* [A], *ⲁⲛⲁⲛ* [L]). See JUDAH, JERAHMEEL, § 2.

ONAN (ⲟⲛⲁⲛ), § 77; ΔΥΝΑΝ [BADEFL], cp ON i., ONAM), one of the five sons of JUDAH (*g. v.*), Gen. 38 4 8-10 46 12 Nu. 26 19 1 Ch. 2 3.

ONESIMUS (ΟΝΗΣΙΜΟΣ [Ti. WH]) according to Philem. 10, is the name of a runaway slave Christianised by Paul and sent back to his master with our canonical 'Epistle of Paul to Philemon.' Later tradition makes him bishop of Ephesus. Another Onesimus is mentioned in Col. 4 9 as a Christian at Colossæ, who has recently been with Paul. According to some he is identical with the person called a slave in Philemon, and accordingly that epistle is held to be earlier than Colossians.

Attention has frequently been drawn to the meaning of the name (Onesimus = 'useful') and doubts on that account have been thrown on the historicity of Onesimus, or, at least, of the Onesimus of Philem. 10; so far as appears, however, without sufficient ground. A slave called Onesimus is really intended, although his presence in this place is probably a fiction, and the name borrowed from Col. 4 9. See PHILEMON [EPISTLE].

W. C. v. M.

ONESIPHORUS (ΟΝΗΣΙΦΟΡΟΣ [Ti. WH]) is mentioned twice in 2 Tim. Apparently we are to suppose that he was dead when the epistle was written, for in both places his 'house' (family), not he himself, is placed in the foreground. (a) In 1 16-18 the divine mercy is besought for his house as a reward for his mercy to Paul (cp Mt. 5 7). It is assumed that Timothy knows the details of his ministry to Paul perfectly well, but it is a pleasure to Paul to refer to his repeated kindness, not only at Ephesus but also at Rome: 'he oft refreshed me and was not ashamed of my chain; but when he was in Rome, he sought me out very diligently and found me.' (b) At the close of the epistle (4 19) this kind friend's house or household is specially saluted together with Prisca and Aquila.

Here two MSS (46 109) contain the insertion, *Λεκτραν την γυναικα αυτου και Σιμωναν* [Ση.] *και Ζηνονα τους υιους αυτου*, which, though it stands after 'Prisca and Aquila,' really belongs to 'the house of Onesiphorus' (cp *Acta Pauli et Thecla*, 2).

ONIARES (ΟΝ[Ε]ΙΔ ΔΡΗΧ [Avid. Nc. a vid. V*, see Swete]), 1 Macc. 12 20. See SPARTA.

ONIAS

Name (§ 1).	Murder of Onias II. (§ 8).
References (§ 2).	Josephus and Onias IV. (§ 9).
Date of Onias I. (§ 3).	Trustworthiness of 2 Macc. (§ 10).
Date of Onias II. (§ 4).	Conclusions (§ 11).
His official position (§ 5).	Date of Onias IV. (§ 12).
His relation to the Tobiads (§ 6).	Temple in Heliopolis (§ 13).
Identity of Onias II. and III. (§ 7).	Literature (§ 14).

¹ The Virgin Mary is said to have washed the child Jesus in it, an indication that the well was sacred in pagan times.

Onias (ΟΝΙΑC) is the Greek form of a Jewish name which we find borne by various persons chiefly of

1. Name. priestly origin in the third and second centuries B.C. It stands sometimes for Heb. יוחנן (Eccles. 50:1; *Ionian* [B*N*]); sometimes for Heb. חנין, which occurs amongst the names in the inscription of the Bnē-Ḥēzir on the so-called Sepulchre of Jacob in the valley of Kidron near Jerusalem.¹ Both forms come from the same root (חן, חנן), and the meaning of both is the same.

In the printed texts of the Talmud the name usually appears as חנוני (Hōnyō); but it is noteworthy that good MSS also exhibit the form נחוניין (Nēhōnyōn: Schür. *GF*¹² 2546, (3) 399, ET 4288). As חנוני is equivalent to the older Hebrew form חנייה, both the Hebrew forms (חנייה and יוחנן) are represented by the Gk. 'Onias.

Unfortunately it is impossible to say in any individual instance whether the Greek name 'Onias represents the one Hebrew form or the other.

The following is a list of the persons known to have borne the name.

2. References. (a) Onias I., son of Jaddua or Jaddua (Jos. *Ant.* xi. 87 [§ 347], xii. 25 [§ 43]; cp Neh. 12:11); see § 3.

(b) Onias II., son of Simon I. the Just (Jos. *Ant.* xii. 25 [§ 44] xii. 41-10 [§§ 156-224]); see §§ 4-8 II.

(c) Onias III., son of Simon II. (Jos. *Ant.* xii. 4:10 [§ 225] (= xiii. 58 [§ 167]), 5:1 [§ 237]); see § 7 f. II.

(d) Onias IV., son of Onias III. (Jos. *Ant.* xii. 5:1 [§ 237], 9:7 [§ 387]), or son of Simon (Jos. *BJ* vii. 10:2 [§ 423]); see §§ 9-13.

(e) Onias, third son of Simon II. (Jos. *Ant.* xii. 5:1 [§ 238 ff.]), usually called Menelaus (cp xii. 9:7 [§§ 383-385]); see § 13 (e).

(f) Onias, a pious Jew, killed at Jerusalem in 65 B.C. (Jos. *Ant.* xiv. 2:1 [§§ 22-24]).

(g) Onias, father of John, who was sent along with others by Hyrcanus to Rome (Jos. *Ant.* xiv. 10:10 [§ 222]).

Of these seven, (f) and (g) may be left out of account in this article as being of no importance for our present purpose; on the other hand it will be necessary to bring together and to sift everything that our sources contain with regard to the first five.

(a) *Onias I.*—As regards Onias I., we know from Jos. *Ant.* xi. 87 (§ 347) that his father was Jaddua (or

Jaddua, Neh. 12:11, from *Ant.* xii. 25 (§ 43) that his son was the high priest Simon the

3. Date of Onias I. Just. According to *Ant.* xi. 84 f. (§ 322 ff.).

Jaddua was contemporary with Alexander the Great. Of this synchronism, however, Willrich (*Juden u. Griechen*, 22) has argued that it must be given up, the whole of the Jewish Alexander-legend being unhistorical. This, no doubt, goes too far; the synchronism may be correct even if the details of the story be imaginary. We can no longer rely upon it, however, for determining the date of Onias. Onias I.'s son, Simon [I.] the Just, appears in *Ant.* xii. 25 (§ 43 f.), as the predecessor of Eleazar who, according to the epistle of Aristaeas, lived in the time of Ptolemy II. Philadelphus (285-247 B.C.). According to this, the date of Onias I. would be somewhere about 300 B.C. The epistle of Aristaeas, however, cannot be regarded as a first-rate chronological authority, and Josephus does not seem to have had at his disposal any complete list of the Jewish high priests from which he could have taken Eleazar (Willrich, *ut supra*, III). We next turn, therefore, to the Simon who is mentioned in Eccles. 50:1: 'The greatest among his brethren and the glory of his people was Simon, son of Johanan (Ιωναν [*P*N*], Ολιου [BBB N^c-a]) the high priest.' By comparison with the high priests of the post-exilic Jewish community named in Josephus, this Simon has been identified with one or other of two persons—either

¹ [Chwolson, *Corpus Inscr. Hebr.* no. 6; cp Driver, *TBS* 23.]

with the Simon [I.] the Just, already mentioned, or with Simon [II.] whose father, according to Josephus (*Ant.* xii. 4:10 [§ 224]), would seem also to have been named Onias (see below, § 7 f.). The splendid eulogy passed in Eccles. 50:1 ff. gives the idea of an important personality whose merits did not allow him to be forgotten by posterity. Now, unquestionably the history supplies us with only one man answering such a description—Simon the Just; Josephus also praises Simon [I.] though briefly (*Ant.* xii. 25 [§ 43]), whilst as regards Simon II. he chronicles only his father's name, his sons' names, and his death (*Ant.* xii. 5:1 [§ 237] 4:10 [§ 225]). In all probability, therefore, those scholars are right who take Eccles. 50:1 as referring to Simon [I.] the Just (see, however, *ECCLESIASTICUS*, § 7). In that case we shall do well to place him somewhere not too early in the third century. If Simon lived somewhere about 250 B.C. then the approximate date for his father, Onias I., will be about 280 B.C.

(b) *Onias II.*—According to Jos. *Ant.* xii. 4:1-10 (§§ 156-224), Onias II., at first sight, appears to have been contemporary with Ptolemy III.

4. Date of Onias II. Euergetes (247-221), Ptolemy IV. Philopator (221-204), and Ptolemy V. Epiphanes (204-181). His father was Simon [I.] the Just, but he did not succeed his father immediately, being under age at the time of his death. On this account, according to *Ant.* xii. 25 (§ 44) and 4:1 (§ 157), the high-priestly dignity was held first by Eleazar, brother of Simon and son of Onias I., the high priest of the Epistle of Aristaeas, and afterwards by Manasseh, an uncle of Eleazar (perhaps a brother of Onias I.?). Whether the succession of high priests, and in particular the minority of Onias II. here given, rests really upon tradition has been rightly doubted by Willrich (110 f.) and Büchler (40 ff.). Josephus seems to have assumed the minority of Onias simply in order to make room for the Eleazar of the epistle of Aristaeas; of Manasseh nothing is elsewhere known. It is therefore, to say the least, doubtful whether these data have a historical character. On the other hand, we do possess a trustworthy narrative—however amplified and distorted by various unhistorical anecdotes—in the association of Onias II. with the rise of the Tobiad Joseph as farmer of taxes (*Ant.* xii. 4:1-10). Willrich (96 f.) takes the narrative as referring to the opposition between Menelaus (= Joseph) and Jason (= Onias). Wellhausen regards it (*IIG*², 242) as being 'on the whole unhistorical although not on that account altogether worthless.' Büchler (43 ff., 91 ff.), on the other hand, has successfully shown that the twenty-two years of the revenue-farming of Joseph can be understood only of the time of the Egyptian kings Ptolemy IV. Philopator (221-204 B.C.) and Ptolemy V. Epiphanes (204-181 B.C.) and must be placed somewhere about 220-198 B.C.

This does not harmonise indeed with the words with which Josephus (*Ant.* xii. 4:1 [§ 154]) introduces the story; the reference to the marriage of Cleopatra the daughter of Antiochus III. (222-187) with Ptolemy V. Epiphanes allows us to reckon backwards only from 193. Nevertheless, the Egyptian revenue-farmer Joseph and the things attributed to him in the story, are compatible only with a period of Egyptian lordship in Palestine, in other words before 198 B.C. We may regard it as made out that the mention of Euergetes the father of Philopator in 4:1 (§ 158) is a later (and erroneous) insertion in the text (see Niese, *ad loc.*).

From this narrative (*Ant.* xii. 4:1-10) can be drawn the following details of the circumstances and conditions

5. His official position. then existing.—After the Egyptian governor of Coele Syria, Theodotus the

Etolian, had in 219 invited Antiochus III. to the conquest of the Coele Syrian province, and its southern portion had received Syrian garrisons in the course of 218, Onias II. discontinued payment of twenty

talents of tribute to Ptolemy IV., believing that the Egyptian suzerainty over Jerusalem was at an end (*Ant.* xii. 41 [§ 158 f.]). Though this sum is spoken of as in behalf of the people (ὁ ὑπὲρ τοῦ λαοῦ φόρος), we are not to understand by it the tax or tribute which the Jews as a whole had to pay to Ptolemy, but only a due which Onias II. had to pay on his own account, and which therefore he provides out of his private revenue (ἐκ τῶν ἰδίων). It is closely connected with the personal position of Onias II., which is sometimes described as a presidency (προστασία τοῦ λαοῦ) and as a rulership (ἀρχειν), sometimes as a high-priestly dignity (ἀρχιερατικὴ τιμὴ) or as a high-priesthood (ἀρχιερωσύνη) (*Ant.* xii. 42 [§§ 161-163]). If he goes on with the payment he retains his dignity; if he discontinues, he loses his office and at the same time exposes to peril the Jewish inhabitants of the land (§ 159). We thus see that the dignity he holds is dependent on the king and mixed up with politics, and thus is not in any necessary connection with the Jewish high-priesthood.

Such a state of matters is easily intelligible so far as the expressions 'presidency' (προστασία τοῦ λαοῦ) and 'rule' (ἀρχειν) are concerned; but the phrases 'high-priestly dignity' (ἀρχιερατικὴ τιμὴ) and 'high-priesthood' (ἀρχιερωσύνη) are surprising; the position of 'ruler' depended on the will of the foreign overlord of the Jews, but that of high priest was purely an internal affair of the religious community. The narrative of *Ant.* 12.4, however, proceeds on the view that the presidency (προστασία τοῦ λαοῦ) and the high-priesthood (ἀρχιερωσύνη) over the Jews were now at last inseparable, so that a high priest who should become divested of his political position (at the head of the people) conferred by the king was thenceforth no longer in a position to retain the spiritual office.

Büchler seeks to solve the difficulty with regard to the chief-priesthood (ἀρχιερωσύνη) by supposing that the Ptolemies and Seleucids nominated for the separate provinces governors-general (στρατηγοί) who, in addition to their own proper (political) designation, bore also the title of chief priest (ἀρχιερεῖς) or even—so far as Jerusalem was concerned—had to exercise certain rights as regarded the sanctuary (cp 2 Macc. 3.4: Simon is 'overseer of the temple' [προστάτης τοῦ ἱεροῦ] as an official of the king). According to this view—in support of which Büchler (33) adduces certain inscriptions in addition to 2 Macc. 3.4—in *Ant.* xii. 41 f. it is only this political chief-priesthood (ἀρχιερωσύνη) that comes into account, not the spiritual headship of the Jewish community. Onias II. must in that case have been chief priest (ἀρχιερεῖς) in a double sense; but this is hardly credible.

The decision of Onias II. to go over to Antiochus III. was premature. His grand-nephew, the Tobiad

6. His relation to the Tobiads. Joseph, judged the situation more accurately. He cast in his lot unreservedly with the Ptolemies, was skilful enough to ingratiate himself with the Egyptian envoy in Jerusalem, and received from Ptolemy IV. the official positions which until that time had been held by Onias [*Ant.* xii. 43 [§ 172 f.]] (and, moreover, had nothing to do with the farming of the taxes in southern Syria [4.4 [§ 175 f.]]). This occurrence had an important bearing upon the position of the high priests of the Jews in Jerusalem. Until now the spiritual head of the community had been at the same time its representative in its political relations with the foreign overlord; now the care of these 'foreign affairs' was dissociated from the priestly office and committed to a secular person—the Tobiads were Benjamites (2 Macc. 3.4; and see § 12). The change meant a substantial diminution of the high priest's power and gave rise to many disputes within the community, Joseph having asserted and maintained his new position as fully as he could as against the high priest.

The struggle between the elder sons of Joseph and the youngest, Hyrcanus, as also the setting-up by Hyrcanus of a dominion of his own in the trans-Jordanic territory (182 B.C.), where in 175 he committed suicide from fear of Antiochus IV. (*Ant.* xii. 47-9 11 [§§ 196-222, 223-236]) render it very probable, if not even certain,

that Hyrcanus held by the Ptolemies to the end whilst his elder brothers went over, very likely before 198, to the side of the Seleucids. Only under such a presupposition can we understand the political attitude of persons with whom 2 Macc. makes us acquainted. The brothers Simon, Menelaus, and Lysimachus, that is to say, necessarily (on account of Menelaus) belong to the Tobiads; according to Büchler (34 f.) they are the sons of Joseph with whom the narrative of *Ant.* xii. 49 11 (§§ 218 f., 228 f.) deals. Simon under Seleucus IV. (187-175) has the position of 'overseer of the temple' (προστάτης τοῦ ἱεροῦ: 2 Macc. 3.4); they must already, therefore, at some earlier date have abandoned the cause of the Ptolemies. The high priest Onias, on the other hand, according to 2 Macc. 3.10 stands in connection with the 'Tobiad' Hyrcanus; he is the opponent of the elder brothers and now, therefore, in all probability is a friend of the Ptolemies. According to 2 Macc. 3 the mission of Heliodorus, who is represented as having attempted at the command of Seleucus IV. to violate the temple treasure in Jerusalem, ought to fall within the time of his priesthood. The legend, it would seem, is designed in its own fashion to establish the actual fact that in spite of the royal command the treasure remained untouched. How this immunity was secured remains uncertain; perhaps it was on account of the excellent relations subsisting between Heliodorus and Onias II.

The personality of Onias II. appears in totally different lights in *Ant.* 12.4 and in 2 Macc. 3 f. In Josephus he figures as a narrow, covetous man, in 2 Macc. as celebrated for his piety, his zeal for the law, and his effective solicitude for the city and the community. This diversity of judgment is to be accounted for by the difference of the sources. The narrative of Josephus is written in the interest of Joseph the tax-farmer, perhaps by a Samaritan (Willrich, 99; Büchler, 86 f.); in 2 Macc. 3 f. we hear the voice of an uncompromising friend of the temple at Jerusalem.

(δ and ε). In what has been said above, the Onias of 2 Macc. 3 has been identified with Onias II. The correctness of this identification must be further examined.

7. Identity of Onias II. and III. On the data of Josephus it is more natural to take 2 Macc. 3 f. as relating to Onias III. For, according to *Ant.* xii. 4 10 (§ 224), Onias II. died in the reign of Seleucus IV., he was succeeded by his son Simon (II.), who in turn was succeeded by his son Onias (III.) who died at the beginning of the reign of Antiochus IV. Epiphanes (*Ant.* xii. 5 1). On this view the close of the high-priesthood of Onias II., the whole of that of Simon II., and nearly the whole of that of Onias III., all fell within the period of Seleucus IV.

According to 2 Macc. 4, on the other hand, no Jewish high priest dies in the beginning of the reign of Antiochus IV.; it is only at the instance of Menelaus (after 172) that Onias is murdered (4 30 f.), that is to say, at a period when, according to Jos. *Ant.* xii. 5 1, Onias III. had already been dead for some years. If, accordingly, the Onias III. of Josephus is the person intended in 2 Macc. 3 f., it would be necessary to suppose that the events of 2 Macc. 3 f. happened precisely in the closing years of Seleucus IV. Even so, however, the contradiction between Josephus and 2 Macc. with regard to the death of this Onias would remain.

A further circumstance, moreover, requires to be noticed. Josephus names Simon (II.) as having been high priest between Onias II. and Onias III. (*Ant.* xii. 4 10 [§ 224]) and informs us (4 11 [§ 229]) that Simon II. held with the elder sons of Joseph on account of relationship, and thus not with Hyrcanus. This statement remains unintelligible if we hold this Simon to have been an Oniad; for the Tobiad brothers were all alike related to the Oniads through the mother of their father Joseph (*Ant.* xii. 4 2 [§ 160]).

Büchler (39 f.) seeks to dispose of this difficulty by supposing the Simon II. of Josephus to be in truth the 'overseer of the temple' (προστάτης τοῦ ἱεροῦ) named in 2 Macc. 3.4, the Tobiad who 'for kinship's

sake' held by his full brothers, not his half-brother Hyrcanus (*Ant.* xii. 16 [§ 186 ff.]); that in the source followed by Josephus he was called chief priest (ἀρχιερεὺς)—as a king's officer named by the Seleucids—that Josephus had understood the word wrongly as referring to the Jewish high-priesthood, and thus included Simon in the list of the high priests. The statement of Josephus in *Ant.* xii. 411 [§ 229] really does speak in favour of this supposition. In that case, Simon II. would have to be deleted from the list of Jewish high priests. This would carry with it the further consequence that Onias II. was immediately succeeded by Onias III. It is contrary, however, to old-Jewish customs for father and son to bear the same name. Thus we are led finally to the supposition that Onias II. and Onias III. are one and the same person. The same conjecture has already been put forward by Schlatter and Willrich (114).

The murder of Onias, however, spoken of in 2 Macc. 430 ff. is open to grave doubt. He is there represented

8. Murder of Onias II.

as having been craftily put to death by Andronicus at Daphne near Antioch after the expulsion of Jason (175-173). Formerly this datum used to be regarded as so certain that, as a rule, the obscure words in Dan. 9:26—מְשִׁיחַ מֶלֶךְ—were explained by reference to it. Of late, however, great doubts have been expressed. Wellhausen and Willrich have pointed out that, according to Diodorus Siculus (xxx. 72) and Johannes Antiochenus (ap. Müller, *Fr. Hist. Gr.* 4, p. 558) the regent Andronicus puts to death the son of Seleucus IV. at the instance of king Antiochus IV., and subsequently is himself punished with death. Both scholars are of opinion that 'the circumstances of the murder of the prince have simply been transferred to the high priest,' and therefore that the narrative of 2 Macc. 430 ff. as to the death of Onias is false. Certainly the account just given of the end of Andronicus is more credible than the story in 2 Macc. Strictly, however, it does not follow that the murder of Onias at Antioch is a pure invention: it is possible still to hold it true even if one were to come to the conclusion that the participation of Andronicus or other details in 2 Macc. 4 are unhistorical.

It is surprising, it must be admitted, that Josephus should know nothing of this singular end of a Jewish high priest. The words in Dan. 9:26 are, taken by themselves, so indefinite that they cannot supply confirmation of what is said in 2 Macc. 4. Moreover, they have recently, and doubtless with greater truth, been taken by such scholars as Renan, Baethgen, and Wellhausen as referring to the cessation of the legitimate high-priesthood altogether, in parallelism to *v.* 25, where the inauguration of the high-priesthood after the exile is brought into prominence.

Thus, the question of the death of Onias turns wholly upon that as to the degree of confidence we can repose in 2 Macc. as to this matter (see below, § 10).

According to another view this Onias did not die at all as high priest in Jerusalem, but having fled from the

9. Josephus and Onias IV.

hostility of his many enemies in Jerusalem, the Tobiads, founded in Egypt, under the patronage of Ptolemy VI. Philometor, the Jewish temple in Leontopolis. This view is based upon the short statement in *BJ* i. 11 (§§ 31-33), and has recently been advocated principally by Willrich and Wellhausen. Elsewhere (ISRAEL, § 69 b, col. 2261) will be found a brief statement of the construction to be put on the events of 175-170 B.C. according to this view. The struggle between Onias and his brother Jason, of which neither Josephus nor 2 Macc. have anything explicit to say, is after Willrich (88 ff.) to be drawn from the narrative which Josephus (xi. 71) gives regarding the high priest Johannes (= Onias) and his brother Jesus (= Jason).

The present writer is now, however, inclined to question the justice of this view. In any case it must be carefully borne in mind that Josephus nowhere affirms that the founder of the temple at Leontopolis ever held the high-priestly office in Jerusalem. In *Ant.*

xii. 97 (§ 387) 51 (§ 237) xiii. 31 (§ 62) and xx. 103 (§ 236) the Onias who migrated to Egypt is represented as having been son of the high priest Onias III. to whom at home the path to the high-priesthood was barred. In *BJ* vii. 102 (§ 423) this Onias is the son of Simon (so also in Talmud: *ZATW* 6281), 'one of the chief priests in Jerusalem' (εἰς τῶν ἐν Ἱεροσολύμοις ἀρχιερέων); this addition is found also in *BJ* i. 11 (§ 31) (εἰς τῶν ἀρχιερέων); only in § 33 does the phrase run, more briefly, 'the chief priest Onias' (ὁ δ' ἀρχιερεὺς 'Ονίας). There can be no question that this last expression has to be interpreted in the light of what is said in § 31: Onias is there for Josephus not one who is actually discharging, or has discharged, the functions of a high priest, but simply a member of one of the chosen families out of which the high priests were selected (Schürer, *GV*⁽³⁾ 2221 ff.; cp Büchler, 118). Nor does the fact that he is described as son of Simon carry us any further than this. An opinion has indeed been expressed that 'Onias, son of Simon' ('Ονίας Σίμωνος υἱός) is here only short for 'Onias, son of Onias, son of Simon' ('Ονίας τοῦ 'Ονίου τοῦ Σίμωνος). This, however, is nothing more than a harmonising co-ordination with *Ant.* xii. 97 xiii. 31 and no reliance can be placed on it. Whether Simon the father be really the high priest Simon (*Ant.* xii. 410 [§ 224]) or another person, it is impossible to determine. In any case this at least is certain: the Onias who migrates to Egypt is nowhere spoken of by Josephus as having held the high-priestly office. We are therefore compelled, in the end, to distinguish this Onias from Onias III.

It can hardly be merely accidental that 2 Macc. says nothing of a flight of Onias into Egypt, but on the

10. Trustworthiness of 2 Macc.

contrary relates the murder of the 'pious' high priest Onias at Daphne, whilst Josephus repeatedly recurs to the flight of Onias but says nothing of the violent end of a high priest at Daphne. This suggests that the author of 2 Macc. (or his source) may have intended to depreciate the worth of the Onias-temple in Egypt and for that purpose makes Onias the brother of Jason, who was regarded as the founder of the Onias-temple, to be murdered near Antioch so that the connection between the high-priestly Onias and the temple in Leontopolis may be completely severed. Such an intention would be in excellent agreement with the tendency of 2 Macc. to uphold the dignity of the temple of Jerusalem. It would result that the murder of Onias itself, not merely the attendant details, had been invented.

Baethgen (*ZATW* 6 [1886] 280) has adduced the execution of Onias-Menelaus (*Ant.* xii. 97 [§ 384 f.]) to explain the origin of the statements in 2 Macc. 430 ff. With this narrative, however, fall to the ground at the same time two other assumptions: namely, that the murdered Onias is identical with the high priest Onias (II. or III.) and that Jason (2 Macc. 47) raised himself to the high-priesthood as opponent of Onias. This is of importance for our understanding of the events of the period. The last high priest Onias, according to *Ant.* xii. 410 (§ 224), died in the beginning of the reign of Antiochus IV.

The result of our discussion of Onias II. and III. may be summed up as follows. Onias II. was probably the last legitimate high priest of

11. Conclusions.

the Jewish community in Jerusalem. He held this office for a long time, having entered upon it in the time of Ptolemy IV. Philopator,—at latest in 220, and continued in the discharge of it till the beginning of the reign of Antiochus IV. (175-4 B.C.), that is to say, some forty or fifty years. From this period begins the series of those high priests whom the Seleucid kings nominated in virtue of their own might and in defiance of Jewish right: Jason, Menelaus, Alcimus: the author of the book of Daniel refuses to take account of them.

As objections to this solution of the problem may conceivably be urged the length of the term of office assigned to Onias, also the disappearance of the Simon

named in *Ant.* xii. 410. The student who finds these objections too formidable to be overcome, may hold by the statements of *Ant.* xii. 410. According to what we read there, Onias II. will have been high priest until the first year of Seleucus IV., then Simon II. will have held the office for a short time and been succeeded by Onias III. as the last legitimate high priest till 175-4. In that event the statements also of 2 Macc. 3 f. will have to be understood of Onias III., not as was said above (§§ 5-8) of Onias II. On such a view, it is true, one must abandon hope of explaining why it was that Simon held by the elder sons of Joseph (*διὰ τὴν συγγένειαν*: *Ant.* xii. 410 [§ 229]).

For the sake of completeness it ought also to be mentioned that in Josephus (*Ant.* xii. 410 [§§ 225-227]) Onias III. receives a letter of the King of Sparta, Areus, in which the Jews are invited, on account of relationship through Abraham, to enter into close alliance with the Lacedaemonians. The transaction thus alleged vanishes on examination into air; Areus I. reigned in 309-203, Areus II. died somewhere about 255, aged eight years. Cp DUBRETON, § 21, and Büchler, 126 ff., who explains the fable of relationship between the Lacedaemonians and the Jews by the settlement of Jews in the Dorian Cyrenaica.

(d) *Onias II.*—We have already seen that Josephus nowhere designates Onias IV. as an actual high priest.

12. Date of Onias IV. (§ 9 above). In *B/J* 11 (§ 31) it is recorded of him that he expelled the Tobiads from Jerusalem. The same action is intended as is referred to in *Ant.* xii. 51 (§ 239 f.) and 2 Macc. 55 f. where it is attributed to Jason. Jason and Onias, according to *Ant.* xii. 51 (§ 237 f.) 2 Macc. 47, are brothers. The historical accuracy of this relationship may be doubted; for the closely connected assumption that Onias III., Jason, and Onias=Menelaus, were all of them the sons of Simon the high priest (*Ant.* xii. 51 [§ 238 f.]) is certainly false.

Two brothers with the same name are *a priori* unlikely; Menelaus (=Onias) is the well-known leader of the Tobiads (§ 239; 2 Macc. 523 ff.) and does not belong at all to the high-priestly families (cp the contrast in Alcimus, 2 Macc. 143). Josephus erroneously reckoned him as so belonging because he felt bound to infer his high-priestly descent from the fact of his bearing the high-priestly dignity; but 2 Macc. 424 f. is here plainly right: *τῆς μὲν ἀρχιερωσύνης οὐδὲν ἄξιον φέρων*. Jason is represented alike by Josephus and by 2 Macc. 4 as the adversary of the Tobiads; doubtless he belonged to the party of the Oniads; he and the Onias who migrated to Egypt were party allies; whether they were brothers as well must be left undetermined. It is at least possible, if not probable, that Josephus inserted Jason's name in the list of Jewish high priests for the same reason as that mentioned already in the case of Menelaus. Jason was in any case, however, an Oniad and belonged as such to the high-priestly families. Nevertheless the question of his relationship to Onias III. is in a different position from the same question as regards Menelaus.

The attempt to expel the Tobiads from Jerusalem brings us down into the very thick of the conflicts under Antiochus (cp *B/J* vii. 102 [§ 423]). It happened about 170 B.C. when Antiochus IV. had undertaken his first expedition against Egypt and the report of his death was being circulated in southern Syria. Jason hurried back from the trans-Jordanic territory whither he had withdrawn from Menelaus in 172-1, received the support of the people of Jerusalem, and compelled Menelaus and his followers to take to flight. These betook themselves to Antiochus IV. and induced him to restore Menelaus at the point of the sword. This was done as Antiochus was returning from Egypt in 170. Jason fled first to the E. of the Jordan and subsequently to Egypt, probably to Cyrene (Büchler, 126 ff.), whilst Onias betook himself to the court of Ptolemy VI. Onias' flight thus falls to be dated in 170-169 B.C. The situation is stated quite differently in Josephus (*Ant.* xii. 97 [§ 387] xx. 103 [§ 236]).

Onias is represented in Jos. as not having left Jerusalem until Alcimus had been raised to the high-priesthood by Antiochus V. Eupator, and he saw himself superseded. This date (163-2 B.C.) appears to be too late. Still the intervention of the Romans in 168 did bring about a certain cessation of hostilities between the Seleucids and the Ptolemies, so that political fugitives from Syria could no longer hope so readily for a favourable reception at the court of Alexandria. Moreover, in Judæa itself, about 163 the national resistance to the Seleucids was

already organised, and it is difficult to see any reason why Onias should at that date set off for Egypt in order to cool his hatred of the Greeks.

According to what we learn from Josephus (*c. Ap.* 25 [§ 49 ff.]) the Jews who accompanied Onias to Egypt seem to have played a prominent part in **13. The temple in Heliopolis.** the army of Ptolemy VI. Josephus speaks of Onias and Dositheus as generals of the entire army and adds that in the war between Ptolemy (VII. Physkon) and Cleopatra (the widow of Ptolemy VI.) Onias adhered to Cleopatra and took successful part in the operations in the field. The sons also of Onias, Helkias and Ananias, were entrusted by queen Cleopatra (108 and 104 B.C.) with the conduct of the war against her son Ptolemy Lathūrus (*Ant.* xiii. 104 [§§ 285-287]—following Strabo—131 [§ 348 ff.]). Special interest attaches to the building of the Jewish temple in Egypt which is attributed to Onias. It is fully dealt with in what so far as we can judge is a genuine passage in *B/J* vii. 102-4 (§ 420 ff.). Onias seeks to gain Ptolemy VI. to his purpose by urging political considerations; the building of a Jewish temple, and full freedom granted to Jews for the exercise of their religion there, would win over all Jews to the Egyptian side. Ptolemy accordingly granted him a site in the nome of Heliopolis, 180 stadia from Memphis. Onias caused this site to be fortified and erected his temple in such style that it had the appearance of a citadel sixty cubits high. As a whole it did not resemble the temple in Jerusalem; only the altar and the sacred vessels (*ἀναθήματα*), apart from the golden candlestick, were the same as in Jerusalem. The temple was endowed with land so that the priests had a liberal income. Jealousy of Jerusalem is represented by Josephus as Onias's motive. The whole district was called 'Onias's land' (*ἡ Ὀνίου χῆρα*). This temple lasted longer than that of Jerusalem.

The Jewish diaspora in Egypt was profoundly moved by the fall of Jerusalem in 70 A.D., and Lupus the governor fearing that the temple of Onias might become a religious centre for revolutionary movements, received from Vespasian, in answer to his own representations, orders to demolish the structure. Lupus at first merely closed the temple; but his successor Paulinus made it completely inaccessible after having plundered it of its furniture (*ἀναθήματα*). This was in 73 A.D. Josephus represents it as having stood for 343 years, on which reckoning it must have been founded about 270 B.C. This date, however, is absolutely excluded by the foregoing data of Josephus himself; there must be some error in the figures. It is usual to assume 243 as the original reading; this would give 170 B.C. as the year of foundation. We may conjecture that the plan and its execution were not earlier than the desecration of the temple in Jerusalem by Antiochus IV. in 168, but also earlier than the granting of freedom of worship by Antiochus V. in 163.

The data supplied by Josephus in *Ant.* xiii. 31 ff. (§§ 66-70) 104 (§ 285) exhibit considerable discrepancies. The two letters incorporated—that of Onias to Ptolemy and Cleopatra, and their answer to it—are both without a doubt mere literary fabrications, of which the answer is still more worthless than the other. In Onias's letter the site for which he asks is an old disused sanctuary in the enclosure (*ὄχυρωμα*) of rural Bubastis (*ἀγρία Βούβαστις*); in the answer it is a ruined sanctuary of rural Bubastis (*ἀγρία Βούβαστις*) in Leontopolis in the district of Heliopolis (cp *Ant.* xii. 97 xx. 103). It is customary in accordance with this last statement to speak straightway of the temple in Leontopolis; it is questionable, however, whether the various definitions of the site exactly agree. According to *Ant.* 31 (§ 67), 104 (§ 285), the temple was built after the model of that in Jerusalem. The sole motive, according to 31 (§ 63) was the personal ambition of Onias; its erection is spoken of (32 [§ 69]) as sinful and a transgression of the law. The discrepancy of the accounts gives Büchler (239 ff.) occasion to conjecture the real question to be whether it was a (Jewish) temple of Onias or a (Samaritan) temple of Dositheus that was actually built. From the indications regarding the temple in *B/J* vii. 10 Büchler is rather inclined to conclude that it was Samaritan (255). Against this inference, however,

weighty considerations can be urged. Had the temple been Samaritan, assuredly the allusion to it in Is. 19:18 would not have been admitted into the Jewish Canon, and the Mishna would not have found it necessary to discuss the question whether sacrifices and vows in connection with the Onias temple were valid also for the temple of Jerusalem (Schürer, *GP*¹³ 399).

(c) For the Onias named by Josephus in *Ant.* xii. 5:1 (= 238 f.) as the youngest son of Simon II., see MENELAUS.

ONIONS (אֲנִיָּוִן, *bēšālīm*, for cognates see BDB; κρο[μ]μυδά, longed for by the 'mixed multitude' and the Israelites, Nu. 11:5†. The onion (*Allium Cepa*, L.) of Egypt has always had a high reputation (Plin. *NH* 196 ff. 101, Juv. 15:9; cp Wilk. *Anc. Eg.*⁽²⁾, 225 f.). Hasselquist (*Travels*, 290) speaks with enthusiasm of their sweetness and softness. Very possibly, however, the original story (see MOSES, § 5 f.) meant the onions grown in the Negeb near Zarephath, 'mixed multitude' being due to corruption. See E. H. Palmer's description of the country (NEGEB, § 5 f.). Cp ASHKELON (end), FOOD, § 6, and see Löw, 74 ff. and De Candolle, *Origine*, 52 ff.

ONO (אֲנוֹ or אֲנִו; cp ONAM, ONAN; usually אֲנוֹ or אֲנוֹן, generally אֲנוֹ [L], once אֲנוֹן [I Ch. 8:12, B, where L has אֲנוֹן]; the Onus of I Esd. 5:22 EV, is simply a transliteration of the Gk. genitive.

A town near Lydda (Neh. 6:2; *evw* [B], *awa* [NA]) which, if the text be right, should include the so-called 'valley of the craftsmen' (Neh. 11:35 [BN* A om.] I Ch. 4:14). See CHARASHIM, VALLEY OF. The biblical notices are all post-exilic; but the mention of the place (under the form Auanau or, as W. M. Müller gives it, 'O'-no) in the Karnak list of Thotmes III. (no. 65) proves its antiquity. It may be safely identified with the modern Keft' Anā, about 2 m. to the NNW. of Lod. It was in 'the villages' of the 'plain of Ano' that Sanballat and Geshem proposed to have their meeting with Nehemiah (Neh. 6:2). See HADID, LOD. The text, however, is very doubtful; for a probable restoration see ON, i. (end).

ONYCHA (אֲנִיָּוִן, *š'hēleth*; Ex. 30:34†; אֲנִיָּוִן; *onyx*; cp *Ecclus.* 24:15, ONYX, EV), one of the ingredients of frankincense, generally believed to be the operculum of some species of marine mollusc. The operculum is a horny or calcareous plate attached to the foot of certain Gasteropodous molluscs the function of which is to close the aperture of the shell when the animal has withdrawn into the interior. It is not possible to identify the species of mollusc used; very likely more than one furnished the material. The name suggests a claw or nail-shaped object¹ and this corresponds with the shape of the operculum of the genus *Strombus*, one species of which, *S. tricornis*, is found in the Red Sea; but its operculum is small and insignificant. *Fusus*, another genus which is common in the Red Sea, has also a claw-shaped operculum and is known to have been used in recent times as an ingredient in perfumes. *Murex*, another accessible genus, has a more substantial operculum which may have been put to the same use. When burnt these opercula give off a strong aromatic or pungent odour. They were well known to the ancients, by whom

¹ For the root cp Ar. *saḥala*, 'to peel' (so Di.), less probably, Syr. *šēhal*, 'to drop,' or more correctly 'to filter,' whence Boch. (erroneously) thought of bdellium. The meaning 'peel' is supported by Pesh. and Targ. אֲנִיָּוִן, the rendering of Targ. Ps.-Jon., probably represents the *Costus speciosus* (Löw, no. 395). Cp Winer, s.v. 'Teufelsklaue,' for the view that *š'hēleth* is amber, see K. G. Jacob, *ZDMG* 43:354 (1889).

they were sometimes used for medicinal purposes (cp Diosc. 2:10; Pliny, *HN* 32:46; the Arab. *Ḳazwīnī*, 1:140; Ges. *Thes.* 1388; and Di. *ad loc.*).

Onycha is still largely used throughout Nubia and Upper Egypt as an ingredient in the complicated perfumes with which the Arab women scent themselves. It is gathered along the coast of the Red Sea and transported inland. The method of scenting the person is as follows:—a small bit deep hole is made in the floor of the hut or tent and a fire of charcoal is placed at the bottom of the hole; upon this a handful of drugs, which include ginger, cloves, myrrh, frankincense, cinnamon, sandal wood, onycha, and a kind of sea-weed is thrown. The woman then crouches over the hole enveloped in her mantle or tope which falls from her neck like a tent. In this hot air bath, the fumes of the drugs sink into the skin, and the perfume is retained for a considerable number of days; see Sir S. Baker's *The Nile Tributaries of Abyssinia*, London, 1868. A. z. s.—S. A. C.

ONYX (אֲנִיָּוִן). This is EV's invariable rendering, though RV^{mg.} gives 'beryl' at Ex. 28:9, 20, 35, 27, Job 28:16, 1 Ch. 29:2. For the versions (which differ greatly) see BERYL, where Dillmann's rendering 'beryl' is supported. Kautzsch (*HS*) retains the Hebrew term 'šōham (stone)' unaltered for אֲנִיָּוִן. This is perhaps the wisest course, if we decide not to touch the Hebrew text, for there is apparently no safe explanation of אֲנִיָּוִן even from Assyriology.¹

Experience shows, however, that the readings of the traditional text in references to precious stones are by no means always to be trusted. It is probable that the names of precious stones became corrupted even in documents used by P, and one can easily believe that this writer made up his list of precious stones (as he made up his genealogical lists of names) by including corrupt variants. We have already found one probable case of this (see JACINTH), and we are now on the track of another.

Šōham as a proper name is certainly corrupt (see SHOHAM); it is also corrupt as the name of a precious stone, and the true form of the name is that with which in Ex. 28:20, 39:13 and Ezek. 28:13 it is combined, viz., אֲנִיָּוִן, *yās'phēh*. The corruption was very easy, and wherever the *yās'phēh*-stone was referred to outside the lists in Exodus and Ezekiel the name appears to have been editorially corrected (miscorrected) into *šōham*.

What, then, is the *yās'phēh*-stone? Kautzsch replies, 'the onyx.' But let us reconsider the question in the light of our present result, which appears to be new—i.e., taking into account the passages in which (as the text stands) the *šōham*-stone is specially mentioned, but not the *yās'phēh*. From Gen. 2:12 *šōham* appears to have been plentiful in Havilah. But both the situation of HAVILAH [*q.v.*] and the reading of the text are uncertain, and it would take too long to discuss them here. The *šōham*-stone is called 'the precious *šōham*' (Job 28:16), and is singled out as the gem *par excellence* in Ex. 35:9, 27a, 1 Ch. 29:2. From Ex. 28:9 ff. it appears to have been specially adapted for engraving upon (Ex. 28:9 ff.). Now it cannot be denied that the onyx would have been suitable for the purpose mentioned in Ex. 28:9, and that the variety called ŠARDONYX [*q.v.*] was very highly valued by the ancients. But it must be remembered that every one of the stones specified in Ex. 28:17-20 was to be engraved with the name of one of the twelve tribes, so that there is no compulsion whatever to prefer the onyx for the *šōham*. So far as relates to the passages in which *yās'phēh* occurs, we have seen already (see JASPER) that the opal best satisfies the conditions imposed by them. Considering too that the opal specially deserved the title of 'precious' applied to the *šōham* in Job 28:16 (where it is even combined with the sapphire), we may safely offer 'opal' as a probable rendering, wherever MT gives either *yās'phēh* or *šōham*.

¹ According to Jensen (*ZA* 10 [1895] 372) *šōham* would represent an original *šuhm*,* which could not in ASSYRIAN give *sa(a)mtu*, the word which some (see BERYL) connect with *šōham*.

We must not urge in favour of the onyx that the finest onyxes have for ages been brought from India, for the view that Havilah and Pishon were in India is confessedly antiquated. The characteristics of the onyx are pointed out elsewhere (see CHALCEDONY, § 1). It may be added that it was probably that variety of chalcedony which presents a red layer that originally suggested the name 'onyx' (from *ὄνυξ*, 'a nail'), since the contrast between its layers remotely resembles that between the flesh-coloured part of the finger-nail and the white lunula at its root.

ONYX is also used in Ecclus. 24¹⁵ in the sense of ONYCHA [q.v.]. T. K. C.

OPHEL (עֹפֶל, 'the hill,' MI 22 [MESHU, § 3]), the SE. slope of the temple hill (see JERUSALEM, § 19), 2 Ch. 27³ 33¹⁴ Neh. 3²⁶ f. 11²¹ (without article in Is. 32¹⁴, RV mg. 'Ophel,' AV 'forts,' RV 'the hill,' and in Mic. 4⁸ RV mg. 'Ophel,' AV 'stronghold,' RV 'the hill'). In 2 K. 5²⁴ we read of an Ophel (AV 'tower,' EV 'hill') at Samaria.

Three of the passages enumerated need consideration. (1) If the text of 2 K. 5²⁴ is right, Elisha's house stood close to an Ophel ('hill') connected with the fortifications of Samaria. But the statement that 'when he (Gehazi) came to the Ophel, he took them from their hand, and bestowed them in the house' is too strange to be admitted as probable. Klostermann's emendation עֲפָלָה, 'the recesses (?) of the house,' is hardly satisfactory; הַתְּעִלָּה, 'the ascent' (cp 1 S. 9¹¹) is suitable and may be right; ע and פ are easily confounded.

(2) In Is. 32¹⁴ the 'hill' and the 'watch-tower' are not to be found in C; they may be a later insertion (Bickell, Marti); cp Neh. 3²⁵⁻²⁷.

(3) Mic. 4⁸ stands in a context full of textual error (see MICAH, BOOK OF, § 4).

In *Crit. Bib.* it is maintained that v. 8, in its original form, probably ran thus:—

And thou, O Jerahmeel [Jerahmeel], Zion's people—thy foes I will collect,
And there shall come the Ishmaelites, the Geshurites,
and the Amalekites.

'Jerahmeel' is the old name of Jerusalem; Isaiah (one may venture to assert) plays upon it very beautifully (29¹⁷ f.; see LORHAMAIAH), and the late prophetic writer of Mic. 4⁸ f. imitates him. The first 'Jerahmeel' is represented in MT by *migdal*, 'tower'; the second by *eder ophel* (rock, hill). Cp EDER, and for a similar suggestion in Gen. 35²¹ see *Crit. Bib.*

T. K. C.

OPHIR (אֹפִיר; in C spelled in eight ways but usually [in B always] with initial *š*; ωφειρ [AC], ουφειρ [AEL], σωφειρ [PNA], σουφειρ [BNAQPL, etc.], σωφαρα [A], σωφειρα [BL], σωφαρα [BA]; Vg. always *Ophir*, except Ps. 45¹⁰ *deaurato* following C διαχρυσου, Job 22²⁴ *auress*, 28¹⁶ *India*, Is. 13¹² *obrizol* [= Ar. *ibriz*?], Pesh. transliterates). There may be a trace of the spelling Sophir in Gen. 10³⁰ (סֹפִיר, 'to Sophir' = סֹפִיר, 'to Ophir'; see GOLD, § 1 c).

According to Gen. 10²⁹ 1 Ch. 1²³ Ophir was a son of Joktan. In the time of Solomon the place so called

1. Biblical references. was the source of gold and other costly objects imported into Palestine (1 K. 10 11 22).

The objects mentioned in 1 K. 10²² are gold, silver, *senhabbim*, *kōphim*, and *tukkiyyim*. *Senhabbim* may be a combination of 'ivory and ebony' (see EBONY, § 2 δ); but it may also be an error for סֶהַבֵּי (Klo.), 'onyx-stones' (but see ONYX).

In this case סֶהַבֵּי וְתַקִּיִּים will be best explained as corrupted from a dittographed סֶהַבֵּי הִינדוּ (the name of a precious stone,² corrupted elsewhere in OT; see TOPAZ). The usual explanation of *kōphim* and *tukkiyyim* is altogether improbable; it is not supported by CBL, nor are 'apes and peacocks' referred to by the Chronicler. In 1 K. 9²⁸ only gold is mentioned; but in 10¹¹ almuggim-timber and precious stones are referred to. Almuggim was most probably a rare hardgrained wood from Elam.³ See ALMUG, APE, PEACOCK, EBONY, IVORY.

¹ On this word, and on *σπουρον*, which some connect with Ophir, see CRYSTAL, d; GOLD, § 1.

² The peculiar appropriateness of this suggestion will appear from a reference to Gen. 2¹², where, according to a critical emendation which seems to represent at any rate one stage in the history of the text, the *hipindu*-stone as well as the *sōham* and gold, came from Havilah; cp GOLD, § 1 (b).

³ In MT of 2 Ch. 28 [7] Solomon sends for almug-timber from Lebanon, instead of Ophir, and critics have reproached the Chronicler for ignorance. But הַלְבָנוֹן (the initial ב is dittographed) is simply an incorrect variant for אֲלֻמְגִים, 'almuggim.' Exactly the same error is made in Cant. 3⁹ where 'wood of Lebanon' should be 'almug-timber'; cp 3¹⁰ where 'purple' (argaman) should be 'almug.' See *Crit. Bib.*

Ships (unless, indeed, as Kittel supposes, it was only a single ship; cp C, *μια . . . ναῦς*) were despatched thither by SOLOMON [q.v.] in conjunction with Hiram,¹ and at a later time JEHOASHAPHAT [q.v.] would fain have followed his example (1 K. 9²⁸ = 2 Ch. 8¹⁸ 1 K. 10¹¹ 22 = 2 Ch. 9¹⁰ 21 1 K. 22⁴⁸ f. = 2 Ch. 20³⁵⁻³⁷). Hence in poetry and late prose 'gold of Ophir' = 'fine gold,' Is. 13¹² Ps. 45¹⁰ [MT] Job 28¹⁶ 1 Ch. 29⁴, and even by itself Ophir can mean 'fine gold'; so, e.g., in Job 22²⁴, and possibly in Ps. 45¹⁰ (see GOLD, § 1 e).

Respecting the site of Ophir there are five views which claim to be considered:—

1. Lassen (*Indische Alterthumskunde*, 1538 f.), followed by Delitzsch, identifies Ophir with the Abertia of

2. Sites for Ophir. Ptolemy, the Abhira of the Sanskrit geographers, which was on the W. coast of India, near the mouths of the Indus. To this view there are serious objections.

That India is meant, was held long ago by Vitrings, Bochart, and Reland, and has the authority of Jos. (*Ant.* viii. 64), who says that the land formerly called *Σωφειρα*, but now *Χρυσή*, belongs to India. C, too, probably means this by its *σωφειρ* (and the like); cp the Polyglot Arabic version of Is. 13¹² (*Hind*). It is usual to refer to the Coptic vocabularies in which India is called *Sophir*,² and to the old city of *Σουφαρα* (Ptol.) or *Οὐφαρα* (Arrian), which was on the W. of Malabar in the neighbourhood of Goa. There are, however, four serious objections:—(1) A maritime trade with India hardly existed prior to the seventh century B.C., and the Jews at any rate cannot be assumed to have known India before the Persian period (see INDIA). (2) The objects mentioned in 1 K. 10¹¹ 22 do not at all necessarily point to India (see ALMUG, TAPES, APE, PEACOCK). (3) The Indian gold that was exported took the form of gold dust. (4) Gold was not imported from Barbarike—the port for Abertia and the Indian Delta. See Arrian, *Periplus*, 39, where a full list of Indian exports is given, and cp Peters, 50; Keane, 53 f.

2. Peters (*Das goldene Ophir Salomos*, 1895) warmly advocates the identification of Ophir with the mysterious ruins of Zimbabwe in Mashonaland discovered by Mauch in 1871 (31° 7' 30" E. long., 20° 16' 30" S. lat.), in a district between the Zambesi and the Limpopo sown broadcast with the ruins of granite forts and the remains of ancient gold-diggings in the quartz reefs. Peters also thinks that Ophir and the Punt of the Egyptian inscriptions are identical, and that they are situated in the modern Rhodesia. Certainly gold was abundant there in antiquity, and topazes and rubies are said to be found in the Revwe river near Sofala. The very name Ophir Peters finds preserved in the name Fura (about 15 m. S. of the Zambesi), which he traces to Afur, by which name the Arabs of the sixteenth century knew this district. (Cp the summary and criticism in Keane, 30-35.)

There are two special objections, however, to this view:—(1) This SE. African district was unknown to the ancients, and even to the Arabian geographers before the thirteenth century. (2) Punt was, according to Maspero (*Dawn of Civ.* 396, n. 6), the country between the Nile and the Red Sea, though the name was afterwards extended to all the coast of the Red Sea, and to Somaliland, possibly even to a part of Arabia. It is only in the extended sense that Punt can come into consideration (cp EGYPT, § 48).

3. Benzinger suggests identifying Ophir with the land of Punt—i.e., the Ethiopian coast of the Red Sea with the opposite coast of Arabia. This partly coincides with Sprenger's view (*Alt. Geogr. Arab.* 49 ff.) that Ophir was on the W. coast of Yemen. It is quite true that ingots of gold were sent from Punt as tribute to queen Ha't-šepsut ('Hatusu,' 18th dyn.). But Punt was not, like Ophir, the land of gold *par excellence*; gold only figures amongst other precious objects, the first of which are 'the good woods of Tanuter' (the land of the gods—i.e., the holy land), *šmy* or gum arabic trees producing green *ana*, ebony, and pure ivory.

4. To the preceding identifications there is this additional objection that the inclusion of Ophir among the sons of Joktan points to an Arabian locality. It is not enough, however, to prove the abundance of gold and silver in ancient times on the W. coast of Arabia between the Hijaz and Yemen. For, not to lay stress on the

¹ The notice in 1 K. 10²² was misunderstood by the Chronicler (2 Ch. 9²¹), who supposed the phrase 'Tarshish ships' to mean 'ships that went to Tarshish.' See TARSHISH.

² Champollion, *L'Égypte sous les Pharaons*, 298.

OPHNI

three years' voyage to Ophir and back mentioned in 1 K. 10²² (see below, § 3, end), we should have expected the journey to this part of Arabia to be performed by a caravan (cp 10¹⁵); the queen of Sheba came from SW. Arabia by land (10²).

5. Glaser (*Skizze*, 2357 ff. 368 ff.; cp Sayce. *PSB.* 1, Oct. 1896, p. 174, Keane, pp. 43 ff.) places Ophir on the E. coast of Arabia, stretching up the

3. Probable theory. Persian Gulf. So, too, Hommel (see references in *AHT*, p. 236), who derives Ophir from Āpir, an old cuneiform name for that part of Elam which lay over against the E. Arabian coast, and hence for that coast itself. This he connects with a theory that from an early date there was commercial intercourse between Elam in the E. and Nubia in the W. by Ophir, and, accepting the present writer's theory that 'almug' as a name for a rare kind of timber used for building is derived from Ass. *elammaku* (see *ALMUG*, vol. i., col. 120)—*i. e.*, 'Elamitish'—he claims the almug-timber as one of the exports from Ophir. This is a rather attractive view. Of course the objects taken in by Solomon's agents at Ophir would not in all cases be products of Ophir. From the inland region as well as from more distant parts, merchants would bring their wares to the emporium at Ophir. This was evidently the farthest point of the voyage. There is nothing to prevent us from supposing that Solomon's ships first sailed along the Egyptian coast, then along the Somali coast, and at last along the coast of Arabia till they entered the Persian Gulf.¹ How they trafficked with the natives, we are not told; but Naville (*Temple of Deir el-Bahari*, 315) explains how the objects brought by the men of Punt to the Egyptians sent by Ha't-šepsut were goods to be exchanged against the products of Egypt. Such, no doubt, was the course pursued by the agents of Solomon.

A word must be added here on the remarkable statement of 1 K. 10²². 'For the king had at sea Tarshish ships with the ships of Hiram; once in three years came the Tarshish ships, and brought gold, silver, ivory, etc. Ophir is not mentioned here, and the passage most probably belongs (see Kittel's commentary, but cp Burney in Hastings, *DB* 2 865 a) to a late redactor. If so, it would not be necessary to charge the redactor with having exaggerated (through ignorance) the length of the voyage to Ophir. To go all round Arabia, stopping perhaps on the way, and at any rate waiting long at Ophir, must have required a considerable time. The redactor possibly had an old notice beside him, which he abbreviates. This old notice probably used the expression 'Ophir-ship,' which we may perhaps find in *Q* of 9 26 (reading with Klo. *vain vōphra* for *vain vōpōr*),

See also J. Kennedy, 'Early Commerce of Babylon with India,' *J.R.* 15, 1898, pp. 241-288; 'Ophir' (revised by Kessler) in Riehm's *III¹ B¹* 2 1138 ff.; Soetbeer, *Das Goldland Ophir*, 1880; Leng, *Ophir u. die Ruinen von Zimbatye*, 1886; A. K. Keane, *The Gold of Ophir*, 1901 (virtually identifies Ophir with SEPHAR).

T. K. C.

OPHNI (אֹפְנִי, meaning unknown; 'stench'? § 106; om. *Q*^{BA} 2 אֹפְנִי [L], אֹפְנִי [Pesh.], *ophni* [Vg.], cp *afni*, אֹפְנֵי *OS*² 94 10 222 43), a Benjamite city, grouped with Chephar-ammoni and Geba (Josh. 18 24). Before seeking to identify it, we must be reasonably sure of the name. אֹפְנִי אֹפְנִי stand side by side; the strong probability is that dittography has come into play, and that one or the other of the words should be cancelled. Now Josh. 18 11-28 belongs to P, in whose time the existence of an Ammonite (or Jerahmeelite?) village, or a village which had been Ammonite, would not surprise us (cp PAHATH-MOAB, TOBIAH). If, on the other hand, we prefer ha-Ophni (so MT reads) to ha-Ammoni, how is ha-Ophni (*i. e.*, Beth ha-Ophni, scarcely Chephar ha-Ophni) to be accounted for? There is no obvious meaning, no obvious identification. Probably there is no such word as Ophni.

With Gophna (mod. *Jifnā*; see Baed. 214), so important in later times, we can hardly identify it; Gophna would be rather too far N. (so Buhl, *Pal.* 173). Besides, mod. *Jifnā* presupposes an ancient name אֹפְנִי, 'vine' or אֹפְנִי, 'place of vines.' The valley in which *Jifnā* stands is one of the most fertile in Palestine. On Gophna see Neubauer, *Geogr.* 157. T. K. C.

¹ So Kessler.

² H-P, however, cite אֹפְנֵי, אֹפְנֵי and אֹפְנֵי in certain MSS.

ORCHARD

OPHRAH (אֹפְרָה, 'a hind'?; ὄφρα [BL]). 1. A town mentioned in 1 S. 13 17 as on one of the roads taken by the marauding Philistines from Michmash. It was towards 'the land of SHUAL,' and from the context we may infer that it was to the N. of Michmash. Probably the same as 2.

2. A town in Benjamin, in P's eastern group of cities, Josh. 18 23 (אֹפְרָה [B], אֹפְרָה [A], אֹפְרָה [L]). Perhaps the Ephraim of 2 S. 13 23, and to be identified with the mod. *el-Taiyibeh* (see EPHRAIM ii.). Though too far N. for a Benjamite town, the circumstance that a place of this name is mentioned in 1 S. 13 16 f. in connection with Geba of Benjamin may have seemed to P to justify placing Ophrah in Benjamin (cp HPSm. *ad loc.*). Whether it is the Ephraim of Jn. 11 54 is open to question; this place, near the wilderness of Judah, was very possibly En-crem¹ ('*Ein Kārim*).

3. The city of Gideon (Judg. 6 11 24 8 27 9 5), called 'Ophrah of the Abiezrites' (6 24). It lay in W. Manasseh, and was apparently within an easy distance of Shechem (see 9 5). If Fer'atā, 6 m. WSW. of Nāblus, is not PIRATHON (*q. v.*), it is somewhat plausible² to identify it with Gideon's Ophrah. The name 'Ophrah,' or perhaps Ephrath, may occur, disguised as 'Deborah' in Judg. 4 f.

One of the many examples of the textual and consequently historical errors of the early editors seems to be connected with the name of Ophrah. Underneath the story in Judg. 4 there may be a record of a great battle between the Israelites and the Kenizzites under their king Jabin and his general (*sarza*). The patriotism of the Israelites was stirred up by the 'judge,' or ruler, of the time, whom we know, in Judg. 6-8, as Jerubbaal or GIDEON (*q. v.*), but in Judg. 4 as Deborah—*i. e.*, 'Ophrah' (Ephrath). In Judg. 4 4 f. we should perhaps read 'And Ophrah [a prophetess, a gloss], wife of Zelophehad, judged Israel at this time.' She was the family of Maṭri of the house of Jerahmeel, in the land of Ophrah (Ephrath). It is probable that both 'Jerubbaal' and 'Ephrath' are early corruptions of 'JERAHMEEL' (*q. v.*). Cp LAPIDOTH, and see *Crit. Bib.*

Q usually אֹפְרָה; *Q*^A אֹפְרָה in 8 27 9 5, and *Q*^L אֹפְרָה in 6 11 8 27.

4. (אֹפְרָה [A], אֹפְרָה [L]). The eponym of a Judahite clan called Ophrah, which traced its origin to Meonath (Maon), 1 Ch. 4 14 f. The genealogy is Kenizzite. T. K. C.

OPOBALSAMUM (אֹפְרָה, *nāṭaph*), Ex. 30 34 RV^{mg}, EV STACTE (*q. v.*).

ORACLE. For 'oracle' in the sense of a supernatural message or advice obtained by supernatural means, see DIVINATION, MAGIC. In EV the word represents the following Hebrew and Greek terms:—

1. The 'oracle of God' (2 S. 10 23) is simply (so mg.) the 'word of God' (אִיְהוָה דְבַר, λόγος τοῦ θεοῦ cp Jer. 12 and often).

2. In NT, λόγοι, literally 'words,' everywhere rendered 'oracles,' is used of the Mosaic laws (Acts 7 38, cp Rom. 3 2), the doctrines of the Christian religion (Heb. 6 12), and the utterances of God spoken by Christian teachers (1 Pet. 4 11).

3. The word 'oracle' (דְבַר, *debir*) as applied to a part of the temple at Jerusalem (1 K. 6 5 16 19 f. 7 49 8 6 8 2 Ch. 3 16 [here, however, רִבְוִי (Berth. Ki.), *i. e.*, 'necklace,' = lower border of the capital, should be read] 4 20 5 7, δαβ[ε]ιρ, once δαβεpp [A], once χρηματιστήριον [Ba? b? mg.]; Ps. 28 2, ναός) we owe to Aq., Sym. and Vg.⁴ who wrongly, but not unnaturally, derived the Heb. from *dibber* to speak (hence χρηματιστήριον [so Ba? b? mg. 1 K. 8 6], *oraculum*). The *debir* is properly the innermost room of the temple (so RV^{mg}. Ps. 12; cp Ar. *adubr*, *dabr*, back)—the holy of holies—wherein dwelt Yahwe as manifested in the ark. A similar place was to be found in every temple (*e. g.*, of Baal, 2 K. 10 25, *Q*^L acc. to Klo.); it is the Assyrian *paraku* (see Jastrow, *KB* 6 27), the Gk. *adyton* (*adytum*), and is a survival from the primitive times when the temple was built before the cave wherein the deity was supposed to dwell (cp Gr. μέγαρον from κῆρα, 'cave'). See TEMPLE.

ORATOR. 1. אֹפְרָה, רִבְוִי, *nēḏōn lāhaš*, Is. 33, RV 'enchanter.' See MAGIC.

2. ῥήτωρ, Acts 24 1. Cp TERTULLUS.

ORCHARD. 1. פְּרִדִּים, *gardēs*; ΠΑΡΑΔΕΙΣΟΣ, Cant.

4 13. See PARADISE.
2. κήπος, Bar. 6 7 [70]. See GARDEN.

¹ A corruption of the Greek text may well be supposed.

² Conder, *PEFQ*, 1876, 197; cp GASm., *HG* 329, n. 3.

³ Often in *Q* for אֹפְרָה, the priest's breastplate.

⁴ Theod. oscillates between *δαβεpp* and *χρηματιστήριον*.

ORDINATION. See HANDS, LAYING ON OF.

ORE (רָבֵץ), Job 22:4, RV^{ms}. See GOLD, MINES.

OREB (רֹבֵב, 'raven,' § 68; but see below; ωρΗΒ [BNARTL]) and **ZEEB** (זֵבֵב, 'wolf'? § 68, זΗΒ [BNARTL]), two Midianite princes in one of the two stories of GIDEON (*q.v.*), corresponding to ZIBBANI and ZALMUNNA in the other (Judg. 7:25, cp Is. 10:26). They are said in the narrative to have been slain, the one upon the **Rock of Oreb** (צֹרֵעַרֵב; σουρ [ωρηβ], σουρειν, A), the other at the Winepress of Zeeb (יִרְבֵּוֹא; ιακεφ-ζηφ [ZAL], τῆ κοιλάδι τοῦ ζῆβ [Symm.], ιακεβ τῆ κ. [Theod.]), but 'Isaiah' (if the text is right) speaks of 'the slaughter (defeat) of Midian at Oreb's Rock' (Ἔν τὸ πω θλίψεως, Symm. σουρ Χωρηβ). The discrepancy cannot be explained away. Stade and Wellhausen assume a different tradition. But how improbable that the defeat of an army should be localised at a rock, either by a tradition or even by a late editor of Isaiah (Che. *Intr.* Is. 55)!

Hence the probability that רָבֵץ and יִרְבֵּוֹא are corrupt, and this justifies us in doubting the pointing of עֹרֵב and the consonants of רָבֵץ. 'Raven' and 'wolf' are plausible names, no doubt, and yet they must be wrong. The solution is plain. רָבֵץ is a corruption of רֹבֵב, a variant of רֹבֵב (אֹרֵב), and רֹבֵב or אֹרֵב comes from זֵבֵב. The original story simply told of the capture of Zehūb ('the long-haired,' from the Arabic), prince of the Bedouins ('the desert-dwellers'), and the bringing of the head of the prince of the Bedouins to Gideon on the other side of Jordan. For Zebib, cp the well-attested reference to 'Zabibieh queen (SARAI) of Arabi,' who, like Menahem of Samaria, paid tribute to Tiglath-pileser in 738 B.C. (Schr. *K. u. T.* 253 = *COT* 1245). Tradition loves to *double*; cp Mt.'s two blind men of Jericho with Mk.'s Bartimæus. In the present case this was facilitated by the presence of false readings side by side. In Judg. 7:25 read simply, וַיִּלְכְּדוּ אֶת־רֹבֵבִים שֵׁר עֵינָם וַיִּרְדְּפוּ אֶת־רֹבֵבִים, וַיִּלְכְּדוּ אֶת־רֹבֵבִים שֵׁר עֵינָם הַבְּיָאוּ אֶת־גִּדְעוֹן בְּעֵבֶר הַיַּרְדֵּן. In Is. 10:26 we should probably read רֹבֵבִים שֵׁר עֵינָם עֹרֵבִים, 'like the defeat of Oreb prince of Midian'; עֹרֵבִים may already have been misread as עֹרֵבִים, 'raven,' when Is. 10:26 was written. T. K. C.

OREB (*Choreb*), 2 Esd. 2:33 AV, RV HOREB.

OREN (אֹרֵן, 'fir' or 'cedar' or more probably 'wild-goat'; ἈΡΑΝ [A], ἀραία και ἀμβραμ [B], ἀραμ [L]), a Jerahmeelite family-name (1 Ch. 2:25). See ARAN, and cp JERAHMEEL, § 2 a.

ORGAN (עֹרֵבֵב), Gen. 4:21, etc., RV 'pipe.' See MUSIC, § 4b.

ORION (כְּסִיל; ὠρειων [Job 38:31? also Is. 13:10]; on Ⓞ in Job 9:9 see STARS, § 3 c n.). Since *kesil*, כְּסִיל, means 'fool,' most commentators have supposed the name to allude to a myth of a giant who strove with God and was chained to the sky for his impiety.

Such myths do exist, and Tg. substitutes גִּבְיָא, 'giant,' for כְּסִיל. Cp NIMROD. *Kesil*, כְּסִיל, however, ought not to be confounded with *nabal*, נָבַל (see FOOL), and the term 'cords' in Job 38:31 is hardly that which would be most naturally suggested by such a myth. Cp Delitzsch, *ad loc.*

Kesil has been thought to be a Hebraised form of *ka-sil*, one of two Babylonian names of Orion, the other being *šugi* or *šibu*, with the former name some compare that of the 'wild hunter' Saḥu, in one of the Pyramid texts (Maspero, *Dawn of Civ.* 108; cp Hommel, *Der Bab. Urspr. der Äg. Kultur*, 40). *Ka-sil* is said to mean 'opening of the path'—viz., to the under-world (on which and on the twofold application of the name see Hommel, in Hastings, *DB* 1:218 a). Stucken, however (*Astralmythen*, 31), connects *kesil* with *kesel*, 'thigh,' and compares an Egyptian name for the Great Bear meaning 'thigh' or 'club.' Followed by Winckler (*GI* 282) he connects the story of Abraham with the myth of Orion (not *kesil*); Winckler (*GI* 2:188) even makes *NABAL* (*q.v.*) a development out of Orion. The plural form *Kesilim* occurs only in Is. 13:10, 'The stars of heaven and the Orions (EV 'constellations') thereof,'

where 'Orions' is held to mean 'Orion and stars not less bright.' Ⓞ, however, has simply ὀ 'ὠρε[ε]ων; [ὠριων N']; possibly the text originally ran, 'The Bear, Pleiades, and Orion' (see 'Isa.' *SBOT*, Addenda). Egyptian theology placed the 'noble soul of Osiris' in Orion (Brugsch, *Kel. u. Myth.* 301). T. K. C.

ORNAMENTS. The ornaments mentioned in the OT are treated in special articles. On ornaments for the *head*, see CHAPLET, CROWN, TURBAN, VEIL; on those for the *neck*, see CHAINS, NECKLACE, PERFUME, RING; on those for the *nose* and *ear*, see AMULETS, RING; on those for the *hand* and *arm*, see CHAINS, BRACELETS, RING; on those for the *body*, see GIRTH, MIRROR; on those for the *feet*, see ANKLETS, SANDAL, etc. See also, in general, DRESS, § 5, STONES [PRECIOUS].

General terms for ornaments are: 1. כְּלִי, *keili* (for passages in which it occurs see JEWELL, 7), an ornament mostly of precious metal with perhaps a jewelled inset.¹ *K'li* often has a very general meaning, *vessel*. In NT *kósmos* has the same sense of ornament in general.

2. עָרֵב, 'ādī (ערה = עשה, 'to put on; cp תערה כליה, Is. 61:10 and Hos. 2:13 [15]) used of men, EX. 33:4, of women, Jer. 2:32. In Ezek. 16:11 'ādī is the generic name applied to many forms of ornament.

3. מִגְדָּנוֹת, *migdānoth*, Gen. 24:53 2 Ch. 21:3 Ezra 1:6 ('precious things') may mean ornaments. In the first of these passages they seem to form the *mōhar* or price paid for the bride (Di.).

4. Special terms rendered ornament in EV:

- i. חָלִי, *hālī*, Prov. 25:12 etc.; see BASKETS, NECKLACE.
- ii. לִישָׁאֵב, *lišyāb*, Prov. 1:9, AV (RV 'chaplet'); see CHAPLET.
- iii. אֶפְהָדָה, *āphuddāh*, Is. 30:22, AV (RV 'plating'). It is properly the gold sheathing of the wooden idol-images; cp Dt. 7:25. See EPHOD.
- iv. פְּאֵר, *pe'er*, Is. 61:10, AV (RV 'garland'). See TURBAN.
- v. שְׂהָרֹנִים, *shārōnim* (of camels), Judg. 8:26, AV 'ornaments,' RV 'crescents.' In Is. 3:18 (of women) AV has 'round tires like the moon.' See NECKLACE.
- vi. עֲקָמִים, *ākāmim*, Is. 3:18, AV 'tinkling ornaments,' RV 'anklets.' See ANKLETS. The Hebrew prophets (Is. 3:18-23 etc.) rebuked the excessive use of ornaments by women. Cp also 1 Pet. 3:4 1 Tim. 2:9 f. I. A.

ORNAN (אֹרְנָן), 1 Ch. 21:15 etc. See ARAUNAH.

ORPAH (עֲרֹפָה; ὄρφά [B.A.L]), daughter-in-law of Naomi (Ruth 1:4 14). See RUTH.

ORTHOSIAS (ὀρθωσιας [ANV]), RV Orthosia, 1 Mac. 15:37. According to Tab. Peut., 30 R. m. S. of Antaradus on the coast of Phœnicia.

OSAIAS (ὠσαιας [A]), 1 Esd. 8:48 = Ezra 8:19 JESHAIAH (*q.v.*, 5).

OSEA. 1. (ᾠσία) 4 Esd. 13:40. See HOSHEA, I.
2. (ὠσεε) 4 Esd. 1:39, RV Oseas. See HOSEA.

OSHEA (הַשֵּׁעָה), Nu. 13:8 AV, RV HOSHEA.

OSNAPPAR (אֲסַנְפָּר), Ezra 4:10 RV, AV ASNAPPER (*q.v.*).

OSPRAV (אֲסַרְיָאֵה; ὠσπριῶν; ὀσπριῶν), form uncertain [see Swete], one of the unclean birds (Lev. 11:13 Dt. 14:12†). Evidently some bird of prey is meant, such as the ospray (osprey) *Pandion haliaetus*, zoologically one of the Pandionidae allied to the family Falconidae. This bird is essentially a fish-eater, and may be seen poisoning in the air, then suddenly dropping like a stone into the water, to emerge in a minute with its prey, just as Pliny (*H.V* 10:3) describes the haliaetus as doing. Osprays, however, are somewhat rare in Palestine. Tristram inclines to regard the term *ospiyyah* as generic, and would include several species under it, such as

¹ The setting seems to be intended by משכיות, Prov. 25:11; see BASKETS.

the Short-toed, the Golden, and the Imperial Eagle. The first-mentioned of these is specially abundant in Palestine, and not unlike the ospray (*NHB*, 184). Knobel rather boldly explains 'ozniyyah' as 'the bearded,' and identifies the bird with the Ossifrage: in this case *péres* (פָּרֵס; see OSSIFRAGE) would be some other sort of vulture.

The ospray has also been recognised in Job 9:26 (וְזֵרָבִי 'vulture'), where, for קָרָבִי עִם אֲרָבִי 'they pass like the ships of reed' (ז), we may read קָרָבִי עִם אֲרָבִי 'surely they pass by like osprays' (cp Ⓢ η και ἔστυν).

T. K. C. - A. E. S.

OSSIFRAGE. RV GIER-EAGLE (פָּרֵס 'breaker'; פָּרָץ¹), one of the unclean birds (Lev. 11:13 Dt. 14:12), is the *Gypaëtus barbatus*, commonly known as the Lammergeier, a most magnificent bird with wings stretching 10 ft. across. In some respects this species is intermediate between the Vulturidae and the Falconidae, with one or the other of which it is classed by different writers. Some authorities state that the Lammergeier lives on offal and garbage; but undoubtedly at times it attacks living creatures. As the name Ossifrage indicates, this bird is fond of bones, which, when small, are swallowed, but, when large, are said to be carried aloft and from a height dropped on a rock with the view of breaking them. Snakes and tortoises are subjected to the same treatment, and thus killed. The Lammergeier breeds early in the year, the nest being placed on an inaccessible ledge of rock amongst the gorges it frequents. The species has a wide distribution, extending across Europe and Asia; but it has been exterminated, or is in process of becoming so, in many places. This grandest of the vulture tribe is perhaps referred to in the *Eulogy on Wisdom*.

In Job 28:8 RV gives 'The proud beasts have not trodden it'; but 'pride' is most questionable, and for בני שָׁחַן we should probably read בְּנֵי פָרֵס 'the young vultures' (lit. ossifrages) = 'the CORMORANT' (*q.v.*). See also OSPRAY.

It is also practically certain that in Job 9:25 the complaint of Job is that his 'days are swifter,' not 'than a post (תְּכֵן רֶגֶן),' but 'than an ossifrage' (תְּכֵן פָּרֵס). We thus get, in *vv.* 25 *f.*, all the three swiftly-flying birds of prey grouped together in Lev. 11:13 Dt. 14:12.

A. E. S. — T. K. C.

OSTRICH. The ostrich (*i.e.*, *Struthio camelus*) is mentioned several times in the EV, and is the correct rendering of three Hebrew words.

בַּת הַיַּעֲנָב (עֵנָב, בַּת יַעֲנָב), *bath ya'anah*, στρουθός (4 times) *strouthios* (3 times); *struthio* in Lev. 11:16 Dt. 14:15 Job 30:29 Is. 13:21 34:13 43:20 Jer. 50:39 and Mi. 1:8 RV, where AV erroneously has OWL (*q.v.*, זָב), AVmg. 'daughter of the owl.' The Hebrew name seems to mean 'daughter of greed,' in allusion to the bird's voracity, or 'daughter of the desert,' cp the Arabian name of the ostrich, 'father of the plains' (see BDB).

2. עֵנָב, στρουθίων (Lam. 4:3, Kri.), plur. of a form closely related to the above.

3. רֵנִים, *repménaw*, *struthio* (Job 39:13, AV, PEACOCK (*q.v.*)), supposed to be derived from the hoarse melancholy cry which the ostrich makes; but G. Hoffmann acutely suggests יַעֲנָב (cp 2), which Budde and Duhm adopt. On the ostrich-section cp Job ii., § 10.

4. הַפְּרָדָה, *asida* (Job 39:13, AV), and 5. יַעֲנָב, *ya'anah* (*ib.* AVmg.), receive antiquated renderings; see STORK.

The ostrich (*Struthio camelus*) at the present day hardly extends northward of the Syrian desert which lies E. of Damascus, though there is historical evidence that it was formerly more widely spread in the E.

¹ פָּרָץ and פָּרָץ of B = פָּרָץ and פָּרָץ of A in Lev. 11:13, miswritten פָּרָץ. Became פָּרָץ under the influence of פָּרָץ in 2:8 b. On פָּרָץ in Job 41:21, see LION.
² נ and פ are confounded, e.g., פָּרָץ, 2 S. 23:35 = נָעָרִי, 1 Ch. 11:37. נ of course could with especial ease be miswritten for פ.
³ It is equally probable that *repménaw* = נְעִילָה (transliterated by נֵעֵ.א) and that the name of the bird has fallen out.

portions of Asia.¹ Full details respecting the habits of the bird would be superfluous here. It will be sufficient to mention that in the breeding season ostriches assemble in troops of four or five—one cock and the rest hens. The latter lay some thirty to forty eggs in a common nest scooped in the sand, over which they brood in turns, the male taking the main share. Around the nest are scattered a number of unincubated eggs which are said to serve as food for the young when hatched; their presence may explain the reflections on the care of the ostrich for its young, found in Job 39:15. The ostrich is several times referred to as inhabiting desert places (Is. 13:21 34:13 43:20 Jer. 50:39), and its great speed when running did not escape the observation of the writer of Job 39:18—an allusion which would show that the ostrich was hunted in his time. At night it emits a hoarse melancholy note, compared by Tristram to the howling of an ox in pain, and on this account it is mentioned along with the jackal in Mi. 1:8 Job 30:29.

The ostrich was one of the unclean birds (Lev. 11:16 Dt. 14:15), and is not eaten at the present day, as a general rule, save among the African Arabs. The fat of the bird is sometimes used as a medicine. The feathers have always been esteemed, and at the present day the Arabian chief will bind a tuft of ostrich plumes around his spear-head as a sign of rank.

For later Hebrew details of the ostrich (נְעִמְיָחָא), see Lewysohn, *Zool. d. Talm.*, § 240.

A. E. S. — S. A. C.

OTHNI (עֲתָנִי; ΘΩΝΗ [B], ΘΩΘΗ [A], ΘΩΘΗ [L]; cp OTHNIEL), a doorkeeper, son of Obed-edom (1 Ch. 26:7).

OTHNIEL (עֲתָנִיאל, § 39; ΘΩΘΗΝΙΑ [BAL]; cp GOTHONIEL), a Kenizzite clan (cp 1 Ch. 4:13), described as the younger brother of CALEB, who settled at Kirjath-sepher (Debir), and married ACHSAH (*q.v.*) (Josh. 15:17 Judg. 1:13). His deliverance of Israel (properly S. Judah) from the Edomites (read אֲרָם for אֲרָם), or rather the Jerahmeelites (נַהֲרִים), is probably a corruption of the Jerahmeel, a gloss on אֲרָם, is briefly narrated in Judg. 3:7-11 (see CUSHAN-RISHATHAIM, JUDGES, § 5). Comparing 1 Ch. 27:13 and *v.* 15, we are led to suspect that Othniel and the Zarhites are closely connected. Nor is it hard to justify this. עֲתָנִיאל has not yet been explained, but is probably only another form of אֲתָן; ETHAN, we know, was an Ezrahite or Zarhite. The southern clans became more and more prominent in the later period. Cp KENAZ. T. K. C.

OTHONIAS (ΘΘΗΝΙΑΣ [BA], 1 Esd. 9:28 = Ezra 10:27, MATTANIAH, 7).

OUCHES (כִּיטְבָנוֹת, *misb'noth*; שִׁבְיָן, to interweave? Ex. 28:11 13 14 25 39:6 13 16 18; the word also occurs in Ps. 45:14 (ΚΡΟΚ(Α)ΩΤΟΣ); cp also Ex. 28:20, כִּיטְבָנוֹת, ΚΥΝΔΕΔΕΜΕΝΑ ΕΝ ΧΡΥΣΩ). First, as to the word 'ouche.' It arose by a very early error ('a nouche' being mistaken for 'an ouche') from an adopted Old French word *nouche*, *nosche*, 'clasp, buckle,' and seems to have acquired the sense of 'gold ornament.' In Ex. it is clear that the gold settings of the engraved stones are intended; these settings were not solid pieces of gold, but formed of woven wire wreathed round the stones in *cloisonnée* work, a sort of filigree. How this wire was produced we learn from Ex. 39:3 (cp EMBROIDERY, § 3).

In Ex. 39:6 13 Ⓢ has περιστεραλωμενους and συνδεμενα, but in 28:13 *f.* 25 and 39:16 18 ἀστροειδεις (which also occurs in 1 Macc. 4:57, where EV, improbably, however literally, '[small] shields'). This appears to be a good rendering. By 'little shields' Ⓢ means what we call rosettes; these were of filigree work, and to them were attached the chains of gold by which the *hōden* or BREASTPLATE (*q.v.*) of the high priest was kept firm.

In Ps. 45:14b [13b] the same word occurs, AV rendering 'her clothing is of wrought gold,' RV is in-

¹ The ostrich appears on the elaborate decoration of the royal robes, and upon cylinders. Perhaps it was considered sacred.' Perr. and Chip. *Art in Ass.* ii. 153, and figs. 75, 76.

wrought with gold.' If, however, פנימה in v. 14a should be read פנינים —i.e., 'pearls,' or perhaps (see col. 895 f.) 'corals' or 'corallites'—it becomes possible to combine this word with v. 14b, and render 'of pearls woven in gold (כִּסְבוּצוֹ הַזָּהָב) is her garment.' But Wellhausen (SBOT), in taking this view, disregards Hebrew metre. It is surely better to follow MT's division of the verse, and to render 'Brocade of gold is her raiment' (Che. Ps. 12).

Duhm rearranges the clauses unsatisfactorily. In Prov. 25 11 כִּסְבוּצוֹ probably underlies the much-disputed word כִּסְבוּצָה; a fine proverb is thus restored to the group of passages with which we are dealing (see BASKETS, col. 499, esp. n. 1). T. K. C.

OVEN (אֵפֶן, tannūr; κλιβανός; clibanus; Ex. 83 [728] Lev. 24 [not 24] 79 [639] 11 35 26 26 Ps. 219 [10] Lam. 5 10 Hos. 7 4 6 Mal. 4 1 [3 10] Mt. 6 30 Lk. 12 28). See FURNACE, 5, BREAD, § 2, c, and COOKING, § 4.

OVERSEER. 1. פֶּקִיד, pāqid (√פקד, in Heb. and Ass. implying supervision or control), is used in Jer. 20 1 29 26 2 Ch. 24 11 31 13 Neh. 11 22 12 42 of various temple officials (καθεστάνους, ἐπιστάτης, προεστῆτης, ἐπίσκοπος), superintending 'Levites,' 'singers,' or 'the house of Yahwè'; see TEMPLE SERVICE. The word is also met with in Neh. 11 9 14 (ἐπίσκοπος), is used of a military officer in Jer. 52 25 || 2 K. 25 19 (ἐπιστάτης), and is applied to ZEBUL (q.v.), Ahimelech's officer (ἐπίσκοπος), in Judg. 9 28, to Pharaoh's overseers (τορμάχαι) in Gen. 41 34, and to the officers (κομάρχη) appointed throughout the empire by Ahasuerus to find a successor to Vashti (Esth. 2 3).

- 2. שֹׁרֵט, šōṣēr, Prov. 6 7. See SCRIBE.
- 3. מְנַצֵּחַ, mēnāṣṣēḥ, 2 Ch. 2 18 84 12 (ἐπιστάτης), of superintendents of the corvée. The word occurs also in the titles of fifty-five Psalms, where it is rendered 'Chief Musician'; but see MUSICIAN, CHIEF.
- 4. ἐπίσκοπος, Acts 20 28; cp Acts 1 20, AV, 'his bishoprick (ἐπισκοπή) let another take,' but RV 'office' with mg. 'Gr. overseership.' See BISHOP, MINISTRY.

OWL. The owl is mentioned at least twelve times in AV; and though a strict examination of passages displaces the owl for some of them, it reappears in other words its presence has been forgotten.

The Heb. words to be considered are:—

- 1. בַּת (בְּנִית), bath (bēnīth) ya'ānāh, Is. 13 21, etc. AV; RV OSTRICH [q.v.]; 2. לִילִית, līlīth, Is. 34 14, AV SCREECH-OWL, but see LILITH; and 3. קִפְפֹּז, kippōz, Is. 34 15, AV Great Owl, undoubtedly a reptile, see SERPENT (§ 1 [8]). The remaining names are those of 'unclean' birds, mentioned as such in Lev. 11 17 f. Dt. 14 16 f.

4. יַנְסִיֵּף, yansīyph. This bird is grouped in the legislation with the kālak (see CORMORANT), and the kōs (see below, 5), and, like the RAVEN, is used by a prophet to typify the desolation of Edom, Is. 34 11 (יַנְסִיֵּף, yansīyph, RVmg. BITTERN). The word may be the same as the Ass. ēššēpu (from ēušēpu), a bird which frequents ruins (Del. Prol. 80 f.; ZDMG 40 719, n. 1). Both here and in Lev. 5 understands the Ibis (see HERON).

5. כֹּס, kōs, EV 'little owl.' In Ps 102 6 [7] the 'kōs of the ruins' is parallel to the 'kō'ath of the desert' (see PELICAN). 6 both here and in Lev. gives νεκτοκόραξ or screech-owl; Tg. Onk. in Lev. קִרְקִי² which is Ass. kadu. We cannot venture to connect the name with כֹּס 'bag,' and on this ground to identify the bird with the pelican (Boch).

6. תִּנְשֵׁמֶת, tīnšēmeth, RV 'horned owl'; AV 'swan' (see SWAN), Lev. 11 18 (τροφουρίων [B], -ρῶν [A]; Dt. 14 16 f. (e) βῆτις [BFL], θῆτις [A]). The position of the name in the lists favours RV, which has also ancient authority (Targ., Sam., see Di.-Rys.).

The restoration of the owl to certain passages where its presence had previously been unsuspected is an important result of textual criticism. In Is. 59 10 קִפְפֹּז (AV 'as in the night'; RV 'as in the twilight') should no doubt be קִפְפֹּז 'like the owl.' It is || לתושבתם, which should certainly be לתושבת. The word תושבת (see 6) has indeed been unfortunate. It is represented in the text of Ps. 39 12 by תָּמָס and אֵיךְ; in Ps. 58 8 by תָּמָס and אֵמָת, and in Is. 59 10, as we have seen, by the hitherto unintelligible תְּשִׁבְתֵּם. The sense produced by the required restorations is as follows:—(a) Is. 59 10, 'We grope, as blind men, by the wall; like those who have no eyes, we feel our way; at noonday we resemble (תְּשִׁבְתֵּם) the owl; we are become like

¹ The owl, however, is sometimes eaten in Arabia, see Doughty, Ar. Des. i. 305, 604.
² Cp Di. on Lev. 11 17. Frd. Del. formerly (Ass. Studien, 100; Heb. Lang. 33) connected קִפְפֹּז with Ass. kasīsu, but, as he points out himself (Prol. 80), this is rather a falcon.

unto the screech-owl' (לֵחַ רִקְיָנוֹ). The passage continues, 'We all groan like bears, and mourn sore like doves.'

(b) Ps. 39 12 [11], 'In the midst of deep gloom I grope, I am become like the owls.' The passage continues, 'All my piety is like spider's webs; surely a (mere) breath is all piety.'

(c) Ps. 58 8, 'On the highway let them walk in obscurity, like owls which never see the sun.' In the third of these passages Tg., which misunderstands תָּמָס, imagines אֵמָת to denote the mole (see MOLE, 2). See Che. SBOT, 'Isa.' Heb. 201 f.; Psalmis²).

Next as to the identifications. We may plausibly identify the yansīyph (4) with the Bubo ascalaphus.

2. Identifications. This is one of the commonest species of the Eagle Owl. It sometimes resorts to burrows in the ground, but also frequents caves and mines, and is specially abundant round the Idumeæan Petra. The kōs (5) may be Carine glaux (so Tristram), a sub-species of C. noctua, a bird of 'grotesque actions and ludicrous expression,' which nevertheless was the classical emblem of Pallas Athene, and is stamped upon the coins of Attica. But we must not be too sure of any identifications. The names of owls are generally derived from their hoarse cry, and need not have been applied with any strictness. Both the divisions of the sub-order Strigæ (called respectively Striginæ and Alucinæ) are represented in Palestine. To the Striginæ belongs the Strix flammea, or Barn-owl, an almost cosmopolitan species, which haunts the ruins of the Holy Land. In Palestine Tristram also found the Ketupa ceylonensis, a species of an essentially Indian genus with bare legs and fish-eating habits; Asio otus, the O. vulgaris of some, the Long-eared Owl, which inhabits woods, especially in N. Palestine; A. accipitrinus, or Short-eared Owl, found only in winter; Syrnium aluco, the Tawny Owl,¹ a woodland species which in Palestine has a gray, not a tawny, hue; Scops giu, whose specific name is derived from its cry, common in the spring; and the Bubo ascalaphus and Carine glaux (see above).

Frequent representations of the white and horned owl are found in Egypt. The owl does not appear, however, to have borne at any time a sacred character among the Egyptians, although many mummies have been found in the necropolis of Thebes. A. E. S.—S. A. C.—T. K. C.

OX (אֵז [BNA], עֹזִי, cp Gen. 22 21 [A]; Vg. IDON), ancestor of Judith (Judith 8 1).

OX (שֹׁרֵט, etc.), Ex. 20 17 etc. See CATTLE.

OZORA (אֲזֹרָא [BA]), 1 Esd. 9 34 AV, RV EZORA (q.v.). See also MACHNADEBAI.

¹ The name aluco has really been interchanged with that of the Strix, so that S. stridula is the Tawny Owl and Syrnium aluco the Barn-owl; but in this article recent custom has been followed.

with oil to make a kind of paste. The idea was to increase the prominence and beauty of the eye (קָנַת 'to rend,' of the eyes, Jer. 43o) by staining the eyelids and brows with the powder. This is clear from the enlarged form of the eye in ancient Egyptian pictures (cp also Juvenal, *Sat.* 293; Pliny, *Ep.* 62).

The elements of this powder were the sesquisulphuret of antimony, the black oxide of copper, the sulphide of lead; even the powder of lamp-black, of burnt almonds, or frankincense might be used. Antimony was the most precious kind, but had to be imported from the most remote countries (India? Europe?), and was extremely rare. See EGYPT, § 39, Budge, *Mummy*, 229 f., Wilkinson, *Anc. Eg.* 2 348, Erman, *Life in Anc. Eg.* 230, and ZDMG, 1851, pp. 236 ff. For Arabia, see Doughty, *Ar. Des.* 1585.

In Hebrew this paint was called פָּהַק,¹ *pāh*; cp 2 K. 93o (וַיִּבְרַח עֵינֶיהָ בַּפָּהַק RV, 'she painted her eyes')² and Jer. 43o. In post-biblical times the usual word is קָהַק (cp the verb Ezek. 23 4o [σπιβίζομαι] = Ar. *kaḥḥala*).³

Pāh occurs twice in an apparently different sense. In Is. 54 11, it is foretold that the stones of the new Jerusalem shall be laid in פָּהַק (EV 'fair colours,' RVmg. 'antimony'), which may be a figurative expression for the black asphalt-mortar that was used in buildings of ancient Jerusalem (Guthe, *Th.LZ.* 1892, p. 26). Ewald, *Welhausen (Prol. ET, 391)*, Cheyne (*SBOT*), and Marti, however, after פָּהַק would read קָהַק, 'emerald,' and possibly the same change is required in 1 Ch. 29 2, and אֲבָנֵי אֲלֹהִים (πολυτελείς); cp commentaries *ad loc.*

Kohl bottles have been found in Egyptian tombs together with needles for applying the powder; some of the bottles are divided into cells to contain (it would seem) mixtures of different colours or qualities. Similar receptacles were doubtless used among the Hebrews; one of Job's daughters bears the characteristic name קַרְתָּהַפָּהַק ('paint-horn'); but see KEREN-HAPPUCH.

S. A. C.

PALACE.⁴ Of the eleven words rendered 'palace,' 2, 3, 4, and 9 offer some special points of interest.

1. **בֵּית (בְּיָר)**, *bēth (hammēlek)*, a simple and natural phrase, usually in EV and always in RV rendered 'the king's house' (1 K. 9 11 10 10 12, etc.; cp HOUSE), though in 2 Ch. 9 11 and occasionally elsewhere AV has 'king's palace.'

2. Another word meaning royal or stately dwelling-place is הֶכְלָל, *hēkāl* (2 K. 20 18 Is. 13 22, etc.), ultimately perhaps a loan-word through Ass. from Sumer. *e-gal* = 'great house'; so BDB; cp Haupt, *Amer. Journ. of Phil.*, Oct. 1887, pp. 273 f.; G. Hoffm. *Phön. Inschr.* 25 n. 1 (from הֶכְלָל, 'to inclose').

3. **אַרְמוֹן**, *'armōn*, אֲרָמִים, occurs mainly in the prophetic books (Is. 25 2 32 14 Jer. 30 18 Am. 1 4 7 10 12; see also Ps. 48 4 14 [13]). MT has אֲרָמִים בֵּית הַכֹּהֵן, 'citadel' (but EV 'palace') 'of the king's house' in 1 K. 16 18 2 K. 15 25. Here, however, אֲרָמִים (ἀνάτρον, *énavtíon* [BA], év [L]), and Jon. (אַרְמוֹן = אֲרָמוֹן), may point (see Klost.) to the conjectural reading אֲנָרוֹן = ἀνδρῶν or ἀνδρῶν (Herod. 1 34, etc.), the men's apartment or banquetting-hall (cp Moore's suggestion, *PORCH*, 3). In 2 Ch. 36 19 כל אֲרָמוֹתֶיהָ, 'all her [Jerusalem's] palaces,' represents the כל בית גֵּרוֹל, 'every great house,' of 2 K. 25 9.

4. **אַלְמֹנֹת**, *'almānōth*, in Is. 13 22 (AV 'desolate houses,' AVmg. 'palaces,' RV 'castles') ought probably to be read אֲרָמֹת (Pesh., Tg., Vg.; Di. and most). The alleged sense 'castle' for Ass. *almattu* (Frd. Del. formerly [cp BDB]) is not made out.

5. **הַרְמוֹן**, *harmōn*, Am. 4 3, where AV takes אֲרָמוֹן as הרמוֹן.

¹ Perhaps from a root = 'to grind to powder'; cp Syr. *ethpabḥak*. May we connect with *phōnos* (orig. sea-weed) 'red colour'; cp Lat. *fucus, fucare, rouge dye*? Or have we a mere accidental coincidence?

² WMM in *OLZ*, 1900, p. 399, proposes to read וַתִּבְרַח עֵינֶיהָ (a denom. of בָּרַח; see preceding col., n. 3) instead of וַתִּבְרַח; an ingenious but not altogether necessary change.

³ Whence (through the nouns *kaḥl, kihāl*) by successive changes of meaning comes the modern 'Alcohol.' It is perhaps hardly necessary to mention the old supposition that an allusion to the practice is made in יִשְׁקָרוֹת עֵינַי, Is. 3 16 (cp *shakar, fucare*).

⁴ Lat. *Palatium* (√*pa*, 'protect'), the name of the first of the 'seven' hills of Rome to be built on, that on which Augustus fixed his residence.

But see HARMON, to which add that, according to Cheyne, *ירחמאל* seems to be a corruption of יִרְחַמֵּל (Jerahmeel). See PROPHECY, §§ 10, 35.

6. and 7. **בֵּירָה**, *bīrah, bīranīyōth*; Gk. *Báris*. See CASTLE, 3, and cp JERUSALEM, col. 2425 and n., col. 2428; also TEMPLE.

8. **בִּירָה**, *bīrah*; Cant. 8 9 (RV 'turret,' RVmg. 'battlements'), Ezek. 25 4 (RV 'encampments'), Ps. 69 27 [25] AVmg. (EV 'habitation,' RVmg. 'encampment'). See CAMP, § 1.

9. **אֲפֵדֶן**, *'appiden*, in Dan. 11 45, of the אֲפֵדֶן 'the tents of his palace'—i.e., 'the tents which form his (Antiochus's) headquarters.' An Aram. loan-word=Old Pers. *apadāna* 'palace' (see BDB). But the supposed sense is not good, and the loan-word is unexpected. See ELYMAIS; PERSEPOLIS.

10. **אֲלֵה** Mt. 26 3, etc.; RV COURT [*g.w.*].

11. **πραιτώριον** Phil. 1 13, etc. See ΠΡΑΤΟΡΙΟΝ.

Of David's palace all we are told is that it was built by carpenters and masons sent by Hiram king of Tyre (2 S. 5 11). Of the palace buildings of

2. 1 K. 5-8. Solomon, on the other hand, we have a somewhat detailed account in 1 K. 5-8; this description, however, is not such as enables us to form a clear conception of all the details. Apart from the fact that the text has been greatly worked over and is very corrupt,¹ the description itself is very unequal. Whilst the temple (upon which the attention of a later age naturally concentrated itself) is described with great fulness, we learn of various secular buildings little more than the names. It is plain that the buildings intended for the king's private residence were less known to the author, simply because he had little or no access to them. He seems to have been a priest, or at all events not a palace official. As regards the royal harem, moreover, it will be obvious that the author could not be in a position to describe it. To this must be added a certain want of skill on his part: that he was unpractised in this kind of description is shown, not only by the awkwardness of his style, but also more particularly by the fact that he often leaves out of sight and omits altogether those very points which are most important of all for enabling the reader to form a picture of a building. Finally, to us still more than to the old copyists the technical expressions are often very obscure, indeed quite unintelligible. In these circumstances we must give up all hope of reaching a complete understanding of our present text (cp below, § 5 f.).

So much, at least, we can clearly gather from the description: that the buildings of Solomon formed one

3. **The courts.** great whole, a mutually connected group. The group was all contained within a single enclosure (הַחֲצֵר הַגְּדוֹלָה),² made of three courses of great hewn stones (יָקָרוֹת), and a course

¹ On the contents of these chapters, cp Stade in *ZATW* 3 129-177 (1883), and the commentaries of Klostermann, Benzinger, and Kittel. The narrative does not come before us in its original form; it has undergone much redaction and received many additions, especially in that part which treats of the temple and its furniture. Moreover, it has suffered greatly at the hands of copyists, so that it is now one of the worst preserved texts we have. There are various reasons for this; but the main one undoubtedly is that much of the architectural terminology, and indeed much else of the often difficult technical description, was no longer intelligible to the later copyists, who had not the objects themselves before their eyes. To supplement the description from other sources is possible only in the case of the temple; as regards the rest of the buildings now under consideration, we have no other accounts whatever.

As for the date at which the description was composed, Stade lays weight principally on the fact that the temple by that time had already absorbed all the main interest, and that the royal castle had taken a place of only subordinate importance, which was far from having been the case in Solomon's time, or that of his immediate successors. On the other hand, however, it has to be observed that in the description itself there is not wanting evidence which goes to show that this phenomenon is due to the redaction merely, and that in its original form this predominance of the temple was not observable. The present order, for example, which makes the building of the royal residence, one might almost say, a mere incident between the building of the temple and the preparing of the temple furniture, and brings in the dedication of the temple as the closing scene of the whole undertaking, cannot be the original one.

² חֲצֵר means both 'court,' and also the wall enclosing it.

of cedar beams above (1 K. 7912; cp Benz. *ad loc.*). Within this enclosure lay all the separate buildings and, more particularly, the temple, which in turn lay within an enclosed court of its own. This is referred to as the inner court (הַחֲצַר הַפְּנִימִית or הַחֲצַר הַפְּנִימִית; 1 K. 636 712b). In Jer. 3620 this court containing the temple is called the 'upper' (AV 'higher') court; one went down from it through the 'New gate' to the king's house (Jer. 2610). This is a fact to be borne in mind: the palace lay on a lower level than the temple, and accordingly we are to understand that the 'great court' was lower than the temple court, which rose above it as a higher terrace. This temple court also was enclosed by a wall of three courses of hewn stones, surmounted by a course of cedar beams. Like the temple, the royal palace, together with the harem, was surrounded by its own enclosure. This is called in the description of the buildings 'the other court' (הַחֲצַר הַאֲחֵרָה; 1 K. 78), but elsewhere (2 K. 204) 'the middle court' (הַחֲצַר הַתְּיִכְנָה). From the standpoint of this last narrative—for Isaiah goes from the royal palace through the middle court into the city—the temple court is the

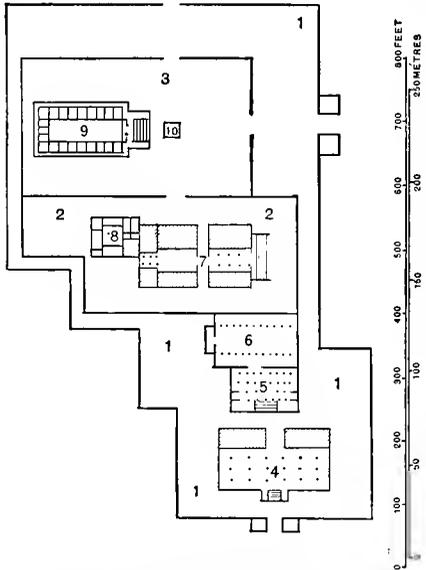

FIG. 1—Plan of the buildings of Solomon (after Stade).
 1. 'Great court.' 2. 'Second court.' 3. 'Court of the Temple.'
 4. House of the forest of Lebanon. 5. Hall of Pillars.
 6. Hall of Judgment. 7. Royal Palace. 8. Harem. 9.
 Temple. 10. Altar.

'inner,' that containing the royal palace proper is the 'middle,' and that in which the state buildings are situated is the 'outer' court. To infer, however, that this last was a distinct court separated off like the two others by an enclosing wall of its own is not necessary; it is excluded by the formal description, which knows nothing of any such court. As the subjoined plan shows, it is perfectly possible that this court may simply be identical with that portion of the great court which contains these state buildings. Neither did the state buildings require to be shut off from the great court by a wall of their own; for access to them, as distinguished from the temple and the king's private palace, was free to every one. Further, as regards the relation of the two smaller courts to the great court, it seems probable that the great court enclosed the two inner courts on all sides, so that the outer containing wall at no point coincided with any one of the inner walls (see plan). Conversely, there is much to be said for the view that the two inner enclosures—that of the temple and that of

the royal palace—were separated only by a party wall (see plan), so that the king could go directly to his palace-sanctuary and court-chapel without having to pass through the great outer court that was open to every one.

The architectural description enumerates, apart from the temple, the following five buildings as belonging to the one group we have spoken of:—(a) the house of the forest of Lebanon (1 K. 715); (b) the hall of pillars (76); (c) the hall of judgment (77); (d) the palace (78a); (e) the harem (78b). If we assume the writer to have followed a certain order in his description, the enumeration just given will answer to the respective situations of the buildings, so that the visitor to the royal castle would first come upon the house of the forest of Lebanon (4 in plan); next in order he would come to the state buildings (the hall of pillars and the hall of judgment; 5 and 6 in plan); behind these, he found enclosed in a court of their own the buildings set apart for the king's own use—dwelling-house and harem (7 and 8 in plan). Lastly came the temple (9 in plan). Thus the king's palace lay 'in the midst' between the temple and the public buildings (see above, § 3). That the palace properly so-called lay in immediate juxtaposition with the temple is expressly testified moreover by Ezekiel, who charges it as a sin against the kings of Judah that they had defiled the holy name of Yahwè by 'setting their threshold by my threshold, and their doorpost beside my doorpost, and there was but a wall between me and them' (Ezek. 437 f.).

The configuration of the ground enables us to draw more precise conclusions as to the position of the buildings. As has been shown elsewhere (JERUSALEM, §§ 16-20, and plan), the 'city of David,' Zion, and Moriah are practically the same; that is to say, the city of David, the palace of David, the palace of Solomon, and the temple lay all of them upon the eastern hill. The ancient contour of this hill has been adequately ascertained by excavations (cp JERUSALEM, col. 2410, plan). It is an exceedingly narrow spur of a high plateau which first runs from NW. to SE., then, at a point a little to the S. of the S. wall of the modern Haram, turns its direction from NNE. to SSW. In this direction also the hill gradually sinks in terraces, till it suddenly falls away at its southern extremity. The eastern and western flanks are still steeper than this abrupt southern slope. By small side valleys the hill is divided into three summits (cp Benz. *HA* 43), and of these only the middle terrace, now occupied, broadly speaking, by the Haram enclosure, presents an area—level, or at least capable of being levelled—of appreciable size (about 100 metres, 328 ft. in length, and 40-50 metres, 131-164 ft. in breadth), which is situated approximately in the centre of the Haram enclosure. It is here that nature on the last hill has provided her site for great buildings. The fall of the ridge towards the SE., moreover, was also not so great but that it was possible, without excessive labour, to erect some additional buildings on the ridge at a somewhat lower level. Nowhere else on the E. hill was there space for any considerable aggregate of buildings; the ground would have first required to be made by gigantic substructions. Now, many considerations support the conclusion—and there are none against it—that the temple of Solomon stood approximately where the 'dome of the rock' now is—more precisely that it stood to the W. of the sacred rock, on which, doubtless, the altar of burnt-offering stood (see TEMPLE). With this as a starting-point, it becomes practicable to infer the sites of the remaining buildings with some degree of certainty. The whole complex of buildings, we may be sure, occupied much less space than the modern Haram. For the external walls of the Haram are, speaking broadly, the work of Herod, and he, as we know, considerably enlarged the

PALACE

temple area. Moreover, so far as Solomon's buildings are concerned, we are precluded from assuming substructions similar to those which astonish us in the work of Herod by the statement that the great outer wall consisted of only three courses (see above, § 3). Such a thing could not possibly be said of any wall like that which we now see. We shall therefore be fully justified

PALACE

of cedar of Lebanon, arranged in three rows (so **Q** BAL; fig. 2; MT, four rows)¹ of fifteen pillars each. Cedar beams upon these support the superstructure, which is also roofed with cedar. According to the text as it now stands, what we are to understand is most probably a large hall above which was a second story containing chambers (see fig. 4). The ground floor was a single

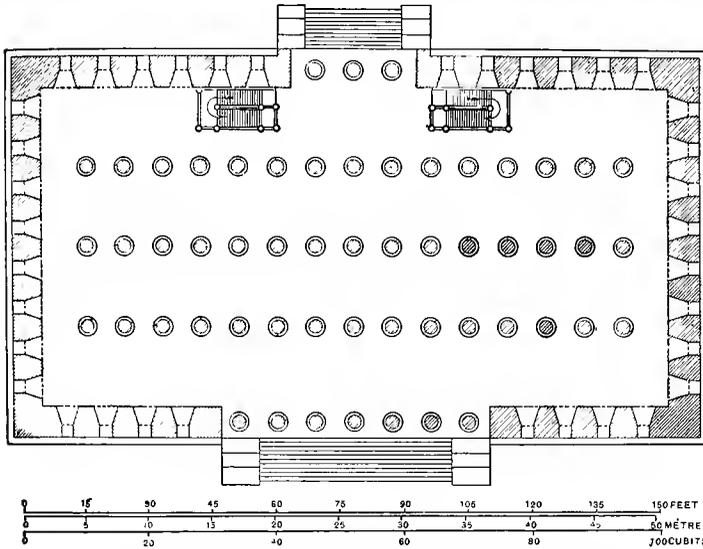

FIG. 2.—Ground plan of the house of the forest of Lebanon.

in proceeding on the assumption that the buildings of Solomon adapted themselves as closely as possible to the conditions of the site. In that case the royal castle can only have extended in a southerly or south-westerly direction from the temple, following the ridge and descending in terraces. Neither eastwards, nor westwards, nor northwards from the temple could space have been obtained without making great substructions. All the incidental notices of the buildings in question in the OT fit in with the site now supposed. The palace proper, if it was to the SE. of the temple, lay on a lower level; compare the regular form of expression which tells us that one went up from the palace to the temple (Jer. 26:10), but came down from the temple to the palace (2 K. 2:19; Jer. 22:1; 36:9 f.). On the other side the palace lay higher than the buildings that extended along the ridge south-eastwards, and higher than the old city of David with David's palace, as again we learn from other texts: Solomon brings the ark up from the old city of David into his castle-sanctuary (1 K. 8:1), and Pharaoh's daughter came up into the house which Solomon had built for her (1 K. 9:24).

The house of the forest of Lebanon (1 K. 7:1-5) is described more fully than any of the others; but the description, in precisely the most important points, cannot be made out with any certainty. The name is derived from the upper story resting on 45 pillars

of cedar of Lebanon, arranged in three rows (so **Q** BAL; fig. 2; MT, four rows)¹ of fifteen pillars each. Cedar beams upon these support the superstructure, which is also roofed with cedar. According to the text as it now stands, what we are to understand is most probably a large hall above which was a second story containing chambers (see fig. 4). The ground floor was a single large hall, 100 cubits (about 49.44 metres, 162 ft.)² in length by 50 cubits (about 24.72 metres, 81 ft.) in width. The number of pillars in each row being fifteen, the distance between each from centre to centre comes out as $(100 \div 16 =) 6\frac{1}{4}$ cubits (3.09 metres, 10 ft.)—a very moderate interval, especially when it is remembered that the pillars themselves must have been of considerable thickness. In the breadth of the apartment, if we regard the three rows as all inside the ground plan, the corresponding distance from pillar to pillar gives $(50 \div 4 =) 12\frac{1}{2}$ cubits (6.18 metres, 20 $\frac{1}{2}$ ft.) as the distance to be spanned by the beams of the roof, a very appreciable distance. The latter becomes greater (see fig. 4) if we suppose with some interpreters that one of the three rows of pillars

formed at the same time the front wall; this would give an interval of $(50 \div 3 =) 16.6$ cubits (8.25 metres, 27 ft.). This would be for cedar beams a very great span; the other interpretation is therefore the more probable. The more moderate span thus given is further diminished by the beams above having 'shoulder pieces' (תְּתִיבֹתָיִם; so **Q** $\mu\alpha\lambda$; in *v. 7b* for MT קִרְיֹת, 'beams'; cp fig. 3). The height of the building

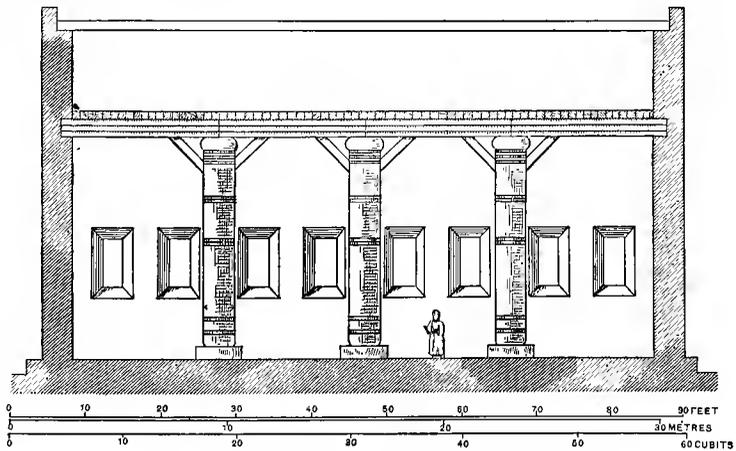

FIG. 3 Section of the house of the forest of Lebanon.

is given as 30 cubits. If of this total we allow some 7 cubits for the upper story, and another 3 cubits for its plinth, roof, and floor, there remains for the hall itself a height of 20 cubits, which presents no difficulty.

¹ That the rows were three appears from *v. 3b*, where the pillars are forty-five and the row contains fifteen.

² On the assumption that the cubit intended is the longer cubit, see WEIGHTS AND MEASURES.

For a hall of these dimensions the window openings would have to be many and large. With regard to these, however, as also with regard to the doors and to the stairs for reaching the upper story, the present text leaves us entirely at a loss, *vv. 4b* and *5b* being quite unintelligible. All we can gather is that the windows and doors were four-cornered, as distinguished from the entrance (*e.g.*) into the holy of holies, which was five-cornered (632), the lintel being in two pieces and forming an angle. Very possibly the front wall, and perhaps also the back wall, was broken by some pillars so as to gain more light. This is assumed in *fig. 2*. This hall of pillars no doubt served, as also Josephus informs us (*Ant.* viii. 52, § 133), as a place of assembly. The upper story was, we may conjecture, divided into separate chambers. We may perhaps conceive the arrangement to have been that three longitudinal walls rested upon the three rows of pillars on the ground floor; this is at least the most natural, architecturally speaking. In these three walls, doors and window openings facing one another must have been pierced for the admission of light; this may perhaps be what is referred to in *vv. 4b 5b*. In connection with the stairs

architecture that differs considerably from that hitherto current. He has adduced strong reasons for believing that the most original and simplest form of the Phœnician and Syrian palace was a walled parallelogram, the interior of which was completed by constructions of wood in such a manner that chambers for dwelling and storage were obtained by means of galleries running round the walls. According to Friedrich the palaces of the Philistines and of the Moabites conformed to this type. He will have it that the temple also was built on this plan (with a wooden framework in the interior), and he brings together all the other buildings of Solomon, alike the royal residence and the state buildings, into one great building—the house of the forest of Lebanon. The main and characteristic part of this palace complex he finds—in accordance with this N. Syrian style of architecture—in the great hall stretching through the whole enclosure of the house (throne-room and judgment-hall) in the centre of the complex, having its roof supported by many wooden pillars. All other apartments, the royal residence, the harem, storerooms, and the like, he regards merely as side-chambers connected with this hall. That this collection of all the buildings

into a single large building is not reconcilable with our present text is obvious; we read in it quite clearly of various separate buildings. On the other hand, we must concede the possibility that the house of the forest of Lebanon was erected as one of the separate buildings of the citadel in this N. Syrian palace style; the use of wooden pillars was naturally an importation in S. Syria, which was poor in timber.

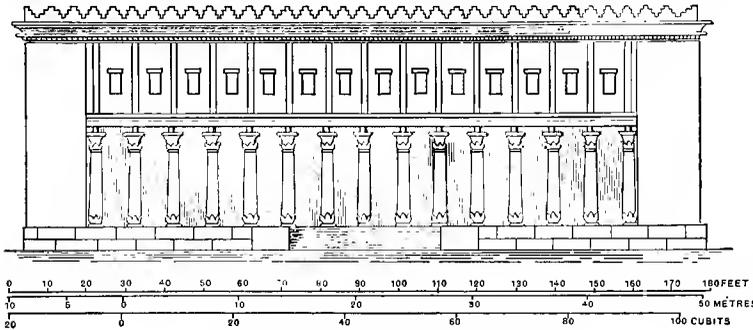

Fig. 4.— House of the forest of Lebanon (after Stade).

which we must imagine somewhere, there will have been in the upper story some corridor or passage from which the chambers on either side opened. As to the darkness of the chambers on the inner side we need not trouble ourselves, for we learn that this house of the forest of Lebanon was not inhabited but served as an armoury (1 K. 10:16 f. Is. 228; cp 392).

When we consider how few are the certain data we possess regarding this building, it is not to be wondered

6. Other theories of it.

at that other interpreters of the text have arrived at quite different conclusions from those suggested above. (i.) Furthest removed from this conception of the building as a large hall with pillars and an upper story, are those attempted reconstructions which agree in assuming an open enclosure surrounded on all sides by a shallow building. In the lower story this building was arranged as a covered portico; the three upper stories consisted of series of chambers (so Keil, Thenius, Klostermann). We are not called upon here to explain in detail how the various writers have sought to bring this reconstruction into agreement with the wording of the text; but we may say that more or less violence is done to it by all of them; nowhere does it make any mention of a courtyard or of a three-storied building or of a portico; such a reconstruction, moreover, demands the assumption of a greatly increased number of pillars (Thenius for example gives 400 to his court of pillars).

(ii.) More attention is due to a third attempt at reconstruction by Friedrich (see below, § 11); it is indeed hard to reconcile with the present text, but as against this difficulty it has to be said that it finds a strong support in the history of architectural art. A close examination of Assyrian buildings in particular leads Friedrich to a characterisation of the Phœnician-Syrian

Next in the description, after the house of the forest of Lebanon, we read (1 K. 7:6) of the hall of pillars

7. The hall of pillars.

(אֵיילֵם הַעֲזָרִים). It measured 50 cubits by 30, and in front of it was a porch with pillars and a flight of steps (perron; or a projecting roof? the meaning of the Heb. word עַזְרָה here used is quite unknown). We may perhaps suppose that it was intended to serve as a sort of ante-room, or waiting-room, to the hall of audience which (see below, § 8) is mentioned immediately afterwards in the description, and on this account we might think of it as also architecturally connected with the other. The word אֵיילֵם is also used of the outer court of the temple. Klostermann, starting from this employment of the hall, suggests that we should read its Hebrew designation as אֵיילֵם הַעֲזָרִים—*i.e.*, the hall of those who stood waiting on the king's service, or who as petitioners in their own affairs or as appellants to his justice were waiting for an audience.

Of the judgment-hall (1 K. 7:7), which, as suggested above, perhaps constituted with the hall of pillars but

8. The hall of judgment.

one building, we are not told either the dimensions or the construction. All we learn is that its walls were panelled with cedar up to the roof. The purpose of the hall is expressed by its very designation (judgment-hall, אֵיילֵם הַדִּבְעָה); it was here that the king sat in judgment (see GOVERNMENT, § 19), and here too that he usually gave audience. The great ivory throne with the lions, which is described as one of the wonders of the world (1 K. 10:18-20), stood there, whence the hall was also called the throne-room (אֵיילֵם הַקִּישָׁא; 1 K. 7:7).

'Inwards' from this hall, in an enclosure of their own

PALACE

(see above, § 3), were the palace and harem (1 K. 7.8).

Of the palace or 'residence' of Solomon
9. Palace and harem. (בְּיָמֵינוּ יִשָּׁב יְצִיב) we are told that it was built after the same manner as the judgment-hall,—thus, doubtless, with a hall in the lower story and panelled with cedar. This palace seems also to have served as residence for Solomon's wives; at least we are not told of a separate house for them, only the most illustrious of them all—the Egyptian princess—received a separate dwelling, which was built in the same manner as the throne-room and Solomon's palace (1 K. 7.8). Where it was situated we are not expressly informed; but it cannot be doubted that it was in the immediate vicinity of the palace and perhaps contiguous with it (so Stade, see Fig. 1)—at any rate with the court of the palace, the 'middle' court (see above, § 3).

With regard to all these buildings what is brought into special prominence is that they were built of 'costly'—i.e., great—stones. These blocks were on both the inner and the outer side cut with the saw (1 K. 7.9-11),

whilst elsewhere, as the old Phœnician architectural remains show, the Phœnicians often built with rough-faced rustic work (*rustica*). For the foundation, stones of from 8 to 10 cubits (about 4.5 metres, 13-16½ ft.) in length with proportionate breadth and thickness were used. In the superstructure smaller blocks, yet still of considerable size (אֲבָנִים יְקִירוֹת כְּקִירוֹת גִּיּוֹת), stones—i.e., blocks hewn according to measure; 1 K. 7.11), and cedar timber were employed. From foundation to cope only fine large blocks were employed; this was the case even with the wall of the great enclosure (see above),¹ whilst elsewhere the Hebrews, little skilled in such constructions, were wont simply to superpose undressed stones one upon another (cp Benzinger, *HA* 231 ff.). This employment of large blocks is quite characteristic of Phœnician architecture. It is *a priori* in the highest degree probable that it was applied in the case of Solomon's buildings. A Hebrew architecture as such there never was; stone-working and the art of erecting detached houses was at that time something rather unfamiliar to the Israelites. David and Solomon alike, therefore, found it necessary to summon Phœnician masons to their aid, and these naturally built in the style with which they were acquainted. Of this Phœnician architecture Renan makes the remark, which will apply also to the buildings of Solomon: 'The fundamental principle of their architecture is the hewn rock, not as in Greece the pillar. The wall takes the place of the hewn rock without losing this characteristic entirely.' Hence the partiality for building with huge square blocks; the greater the blocks the greater the resemblance to the rocks. That these palaces of David and Solomon, built of hewn stone, though insignificant compared with the palaces and temples of Egypt, Assyria, and Phœnicia, should have struck the Hebrews in their then stage of culture as in the highest degree wonderful need not cause us surprise.

By Palestine¹ is to be understood in general the country seized and mainly occupied by the Hebrew

people. We thus exclude the portion of territory which they held only for a time, or only according to an ideal demarcation (cp Nu. 34 [P]) by which the land of the Israelites was made to extend from the 'river of Egypt' to Hamath (?); we accept, on the other hand, another ancient tradition which fixes the extreme borders at Dan (at the foot of Hermon) in the N. and at Beersheba in the S., thus excluding the Lebanon district and a portion of the southern desert. In like manner, though with certain limitations to be afterwards mentioned, the country E. of Jordan stretched from the foot of Hermon in the N. to the neighbourhood of the Arnon. Towards the W. the natural boundary—purely ideal so far as occupation by the Israelites was concerned—was the Mediterranean; but towards the E. it is difficult to fix on any physical feature more definite than the beginning of the true steppe region. That the territory of Israel extended as far as Salcah (E. of Bosra at the foot of the Haurān Mountains) is the statement of an ideal rather than an historical frontier (Josh. 13.11).

Palestine thus lies between 31° and 33° 20' N. lat.; its SW. point is situated about 34° 20' E. long., some distance S. of Gaza (*Ghazza*), its NW. point about 35° 15' E. long., at the mouth of the Litāny (el-Kāsimiye). As the country W. of the Jordan stretches E. as far as 35° 35', it has a breadth in the N. of about 23 m. and in the S. of about 80 m. Its length may be put down as 150 m.; and, according to the English engineers, whose survey included Beersheba, it has an area of 6040 sq. m. For the country E. of the Jordan no such precise figures are available. The direct distance from Hermon to Arnon is about 120 m., and the area at the most may be estimated at 3800 sq. m. The whole territory of Palestine is thus of very small extent, equal, in fact, to not more than a sixth of England. The classical writers ridicule its insignificant size.

Palestine, as thus defined, consists of very dissimilar districts, and borders on regions of the most diverse character. To the S. lies a mountainous desert, to the E. the elevated plateau of the Syrian steppe, to the N. Lebanon and Antilibanus, and to the W. the Mediterranean.

2. General geography. In the general configuration of the country the most striking feature is that it does not rise uninterruptedly from the sea-coast to the eastern plateau, but is divided into two unequal portions by the deep Jordan valley, which ends in an inland lake (see **JORDAN**, **DEAD SEA**). Nor does the Jordan, like the Nile in Egypt, flow through the heart of the country and form its main artery; it is the line of separation between regions that

¹ On the name see below § 18, **PHILISTINES**, § 1; cp **GASM.** *HG* p. 4 and n. 2.

PALESTINE

may almost be considered as quite distinct, and that too (as will afterwards appear) in their ethnographic and political aspects. This is especially the case in the southern sections of the country; for even at the Lake of Tiberias the Jordan valley begins to cut so deep that crossing it from either direction involves a considerable ascent.

The country W. of Jordan is thus a hilly and mountainous region which, forming as it were a southward continuation of Lebanon, slopes unsymmetrically E. and W., and stretches S., partly as a plateau, beyond the limits of Palestine. The mountain range consists of a great number of individual ridges and summits, from which valleys, often rapidly growing deeper, run E. and W. Towards the Mediterranean the slope is very gradual, especially in the more southern parts, where the plain along the coast is also at its broadest. About three-fourths of the cis-Jordan country lies to the W. of the watershed. Towards the Dead Sea, on the other hand, the mountains end in steep cliffs; and, as the Jordan valley deepens, the country draining towards it sinks more abruptly, and becomes more and more inhospitable. The plateaus back from the W. coast-cliffs of the Dead Sea have been desert from ancient times, and towards the east they form gullies of appalling depth. On the farther side of the Jordan the mountains have quite a different character, rising from the river gorge almost everywhere as a steep wall (steepest towards the S.) which forms the edge of the great upland stretching E. to the Euphrates.

The mountains of Palestine consist in the main of strata of the chalk formation; of older precretaceous rocks can be mentioned only a few isolated instances of a breccia-like conglomerate, consisting of fragments of archæan crystalline schists and older porphyry, and traversed by dykes and veins of old plutonic rock. These represent the oldest rocks of Palestine. They are met with only to the SE. of the Dead Sea (Gör es-Sâfiye) and on the eastern border of the W. el-'Arabah, where they are still covered by sandstones and dolomitic limestones of the carboniferous age. The chalk strata belong to the upper cretaceous (Cenomanian, Turonian, and Senonian).

The strata include: (1) the Nubian sandstone on the E. shore of the Dead Sea. (2) Limestone, marl, and dolomite, containing many echinoderms, oysters, and ammonites. Fossils are found in quantities at es-Salt and 'Ayūn Mūsā to the E. of Jordan, as also in the region to the W. of Jerusalem (on this last the so-called *mizzi ahmar*, *dër-yāsini*, and *mizzi yehūdi*, with *Ammonites Rotomagensis*). (3) Massive limestones, dolomites, and silicious limestone, with Rudistes and Nerinea (the Meleke, or cave rock, and *mizzi helū* in the city of Jerusalem itself). (4) Yellowish-white limestone (sometimes ringing under the hammer), with ammonites (*A. quinque-nodosus*), the *kākūle* of the Mount of Olives, used for inscriptions on the tombs. (5) White soft chalk marls containing lamellibranchs (*Leda perditā*), gasteropods, and baculites. (6) Gray to blackish bituminous and partly phosphatic limestones containing fish remains (asphalt limestones of Nebi Mūsā), alternating with variegated red, yellow, gray-green, and dazzling white marls, with much gypsum and dolomite. (7) Flint beds alternating with limestones and marls in the wilderness of Judæa.

Eocene nummulitic limestone occurs but rarely in Samaria (Ebal, Gerizim), more frequently in Galilee. Younger tertiary is entirely absent. The diluvial strata, on the other hand, are very extensive: partly of marine origin on the present coasts of Sharon and the Shēphēlah and southwards to beyond Beersheba, partly of lacustrine origin, deposited by the formerly greatly extended Dead Sea, which occupied the whole of the lower Jordan valley as far as to the N. end of the Sea of Tiberias and deposited beds in the form of terraces. Finally, mention must be made of the dunes on the coast, and the deposits left by the rivers.

Volcanic rocks are very extensively met with all around the sea of Tiberias (Jaulān) and the plain of Jezreel in Galilee, as well as on the plateau to the E. of the Dead Sea (Jebel Shēhān), and particularly in Haurān and in Trachonitis. Cp BASHAN, § 2, and TRACHONITIS.

PALESTINE

The mountain system W. of Jordan must be broken up into separate groups, which, it may be remarked,

are of political as well as physical significance. A first group, consisting of the country N. of the plain of Jezreel (see map of Galilee, above, facing col. 1631 f.), may be subdivided into a large northern portion with summits reaching a height of 4000 ft., and a smaller southern portion not exceeding 2000 ft.

The northern, the Upper Galilee of antiquity, is a mountainous region with a somewhat intricate system of valleys, stretching from the Kāsimiye in the N. to a line drawn from Acre ('Akka) towards the Lake of Tiberias. Of the valleys (more than thirty in number) which trend westwards to the Mediterranean, the Wādi Hūbeishiye, Wādi 'Ezziye, and Wādi el-Karn deserve to be mentioned. Not far W. of the watershed is a plateau-like upland draining northwards to the Kāsimiye. The slope to the Jordan is steep. Jebel Jermak, a forest-clad eminence 3934 ft. above the sea, is the highest *massif*. The whole territory is fruitful, and forms decidedly one of the most beautiful as well as best-wooded districts of Palestine. See GALILEE i., § 4. The plain along the Mediterranean is on the average hardly a mile broad; between cliff and sea there is at times barely room for a narrow road, and at some places indeed a passage has had to be cut out in the rock. South of Rās en-Nākūra, on the other hand, this plain widens considerably; the portion named after the town of Acre is, as far as the town itself, about 4 m. broad.

The mountain structure of the southern subsection, or Lower Galilee, is of a different character—low chains (running east and west in well-marked lines) enclosing elevated plains. Of these plains the most important is that of Baṭṭauf (plain of Zebulun or Asochis), an extremely fertile (in its eastern parts marshy) depression 9 m. long and 2 broad, lying 400 to 500 ft. above the sea, between hills 1700 ft. high. To the SW., about 700 ft. above the sea, is the smaller but equally fertile plain of Tor'an, 5 m. long and 1 m. broad. Among the mountains the most conspicuous landmarks are Nebi Sa'in (1602) near Nazareth, Jebel es-Sih (1838), and especially, to the E. of this last, Jebel et-Tōr or Tabor (1843), an isolated wooded cone which rises on all sides with considerable regularity, and commands the plain of Esdraelon. Eastwards the country sinks by a succession of steps: of these the lava-strewn plateau of Sahl el-Ahmā, which lies above the cliffs that look down on the Lake of Tiberias, but is 300 ft. below the level of the Mediterranean, deserves mention.

The principal valleys of the whole region are: (1) towards the W. the great basin of Nahr Na'mān (Belus of the ancients), whose main branch is Wādi Khālzūn, known in its upper course as Wādi Sha'ib or Wādi Khahab, and, farther S., the basin of the Wādi Melek (Wādi Rummāni), which flows into the Nahr el-Mukatta' (Kishon); and (2) towards the E. the rapid-flowing Wādi Rabaḍiye, Wādi el-Hāmām, and Wādi Fejjās.

There is a certain connection between the plains already mentioned (those of Baṭṭauf, Acre, etc.) and

the great plain which, with an average height of 250 ft. above the sea, stretches S. from the mountains of Galilee and separates them from the spurs of the mountains of Samaria (the central portion of the cis-Jordan country). This great plain (see map, opp. col. 1631 f.), which in ancient times was known as the plain of Megiddo, and also as the valley of Jezreel or plain of Esdraelon, and now bears the name of Merj Ibn 'Amir (pasture-land of the son of 'Amir), is one of the main features of the whole cis-Jordan region (Josephus called it the Great Plain *par excellence*; cp EPHRAIM i., § 3), and presents the only easy passage from the coast districts to the Jordan valley and the country beyond. The larger portion lies W. of the watershed, which at el-'Afūle is 260 ft. above the Mediterranean. In the narrower application of the name, the whole plain forms a large triangle with its

southern corner near Jenin and its western near the mouth of the gorge of the Nahr el-Muqatta' (for here the hills of Nazareth shoot out towards Carmel); and connected with it are various small plains partly running up into the hills. The plain to the S. of Acre, in which marshes are formed by the Kishon and Na'man, and various other recesses towards N. and E., really belong to it.

To the NE. stretches a valley bounded in one direction by Jebel Nebi Dahy (the Lesser Hermon, a range 15 m. long and 1690 ft. high) and in the other direction by the hills of Nazareth and Mount Tabor, where lie Iksal and Deburiye (see CINSLOM, TABOR, DABERATH); then to the E. of the watershed lies the Bire valley, and the well-watered Wadi Jalid from Zer'in (Jezreel) falls away towards the Jordan between the slopes of Jebel Nebi Dahy and the more southern range of Jebel Fu'uk' (cp GILBOA, MOUNT). Finally, towards Jenin in the S. lies the secondary plain of 'Arrabe.

In ancient times the whole country, with its rich basaltic loam, was densely peopled and well cultivated. See GALILEE I., § 4.

To the S. of the plain of Jezreel, which still belongs to the northern part of Palestine, it is much more difficult to discover natural divisions (see 7. S. of Jezreel. map of the hill-country of Ephraim, opp. col. 1311 f., and cp EPHRAIM I., § 3). In the neighbourhood of the watershed, which here runs almost regularly in great zigzags, lie several plains of very limited extent.

The plain of 'Arrabe (700 to 800 ft. above the sea) connected SE. with the Merj el-Gharak, which having no outlet becomes a lake in the rainy season; the plain of Fendekumiye (1200 ft.); and the plain of Rujib, E. of Shechem, connected with the plain of Makhna (1600 to 1800 ft.; cp MICHMETHAH) to the SW. The highest mountains too are generally near the watershed. In the E. lies the south-westward continuation of Gilboa. In the W., Mount Carmel (highest point 1810 ft., monastery 470) meets the projection of the hills of Nazareth, and sends its wooded ridge far to the NW. so as to form the southern boundary of the Bay of Acre, and render the harbour of Haifa, the town at its foot, the best on all the coast of Palestine.

The belt of land along the shore, barely 200 yards wide, is the northern end of the lowland 8. Maritime plain, which, gradually widening, stretches S. towards Egypt.

At 'Athlit (9 m. S.) it is already 2 m. broad, and it continues much the same for 21 m. to the Nahr ez-Zerkā (named by the ancients after the crocodile, which is still to be found in its marshes), where a small ridge el-Khashm projects from the highlands. South of Nahr ez-Zerkā begins the marvellously fertile plain of SHARON (*q.v.*), which, with a breadth of 8 m. near Caesarea and 11 to 12 m. near Yāfa (Jaffa), stretches 44 m. farther to the Nahr Rūbin, and slopes upwards towards the mountains to a height of about 200 ft. above the sea. Its surface is broken by lesser eminences, and traversed by a few coast streams, notably the Nahr el-Falikh.

Between the maritime plains and the mountains proper lies a multiform system of terraces, with a great number of small ridges and valleys. In this the 9. Wadis, only divisions are those formed by the basins of the larger wadis, which, though draining extensive districts, are here too for the most part dry. They all have a general E. and W. direction.

First comes the basin of the Nahr el-Mefjir, bounded S. by the Bayzid range, and debouching a little to the S. of Caesarea; and about 5 miles farther S. is the mouth of the Iskanderūne, which is distinguished in its upper portion as the Wadi esh-Sha'ir, running E. as far up as Nābulus (Shechem), hardly a mile W. of the watershed. It is in this neighbourhood that we find the highest portions of the mountains of Samaria—Jebel Islāmiye or EBAL (*q.v.*), 3077 ft. high, to the N. of Shechem, and Jebel et-Tār or GERIZIM (*q.v.*), 2849 ft. high, to the S. Both are bare and rugged, and consist, like all the loftier eminences in the district, of hard limestone capped with chalk. It was generally possible, however, to carry cultivation up to the top of all these mountains, and in ancient times the highlands of Samaria are said to have been clothed with abundant forest.

From the watershed eastward the important Wadi Fāri'a (also known as Wadi Karāwā in its lower course) descends to the Jordan (cp EPHRAIM I., § 4).

Returning to the western slope, we find to the S. of Nahr el-Falikh the basin of the 'Aujā, which after it leaves the hills is fed by perennial (partly palustrine) sources (see ANTIPATRIS, MEJARKON), and falls into the sea 5 m. N. of Jaffa. As at this place the watershed bends eastward, this extensive basin stretches proportionally far in that direction; and, the right side of the Jordan valley being also very broad, the mountains of the eastern slope soon begin to sink rapidly.

On the watershed, not far from Jifnā, lies Tell 'Asūr (3378 ft.; see BAAL-HAZOR), and with this summit of hard gray

limestone begin the hills of ancient Judah (cp further EPHRAIM I., § 3 f.). South of the 'Aujā comes the Nahr Rūbin (near Jabne), perennial up to the Wadi Sarār (SOREK ?), and reaching, as Wadi Bēt Hanina, as far as the country N. of Jerusalem; the Wadi el-Werd is one of its tributaries.

Farther S. begins the maritime plain of Philistia, which stretches 40 m. along the coast, and, though

10. Philistia, now but partially under cultivation, consists of a light brown loamy soil of extraordinary fertility. It is crossed by many ridges of hills; and to the S. of Ashdod (Esdūd) the highlands advance westwards, and form a hilly district composed of horizontal strata of limestone, sometimes considered part of the lowlands (Shēphēlah), and separated from the more elevated region in the interior by a ridge more or less parallel with the line of the watershed.

The hasins to the S. of the Rūbin are those of Wadi Sulereir, which runs up towards Tell-es-Sūfiyeh (see GATH, MIZPEH) in one direction and to Bēt Jibrin in another, of Wadi el-Hesay, and finally of Wadi Ghazza, which forms the proper boundary of Palestine towards the S., runs past Beersheba as Wadi es-Seba', and receives the Wadi el-Khalil (Hebron) from the NE.

The mountainous district immediately N. of Jerusalem

11. Jerusalem and southwards. is now known as Jebel el-Kuds, of which the loftiest point is the summit of the Nebi Samwil (2935 ft.), rising above the plateau of El-Jib. Near Jerusalem

the watershed lies at a height of about 2600 ft. Wild deep-sunk valleys descend eastwards to the Jordan; the Wadi el-Kelt (see ZEBOIM, VALLEY OF), Wadi en-Nār (Kidron valley), Wadi ed-Dereje, and southernmost Wadi Seyāl deserve to be mentioned. The country sloping to the Dead Sea falls in a triple succession of terraces—a waterless, treeless waste (in ancient times known as the desert of Judah), which has never been brought under cultivation, but in the first Christian centuries was the chosen abode of monasticism. To the N. of Hebron, in the neighbourhood of Halhūl, lie the highest elevations of this part of the central highlands (up to 3500 ft.), which may be distinguished as the mountains of Hebron. Towards Yuttā (JUTTAH) in the S. is a sudden step down; there begins a plateau at a height of about 2600 ft., 500 ft. below the Hebron watershed. The plateau consists of open wolds and arable land, the soil being a white soft chalk; but there are no wells. Southward another step leads down to the white marl desert of Beersheba, abounding in caves. In ancient times this southern district was called the NEGEB; it extends far to the S., but is properly a part of Palestine. The country was in former times a steppe region without definite boundaries, and consequently the abode of nomadic herdsmen. See NEGEB, and map opp. col. 3375 f.

The Jordan Valley having been described elsewhere (see JORDAN, ARABAH), we may pass to a brief sketch

12. E. of Jordan. of the physical character of the country E. of Jordan (see map of Gilead, opp. col. 1727 f., and map of Moab, opp. col. 3167 f., and compare GILEAD, MOAB). This is a more difficult task for several reasons: first, no connected series of investigations and measurements has been made; and, secondly, as the ideal demarcation of the book of Joshua is a hardly sufficient basis on which to build, and the information about the actual state of matters supplied by other ancient sources is insufficient, it is impossible to determine the limits of the country as far as it was occupied by the Israelites.

In the opinion of the present writer, the plain of BASHAN (*q.v.*) can hardly be assigned to Palestine. To the S. of the Yarmūk (Hieromax of the Greeks and Romans, Hebrew name unknown), which falls into the Jordan below the Lake of Tiberias, begins the cretaceous formation; only in the E. of the country the basalt of the Haurān territory stretches farther south. Ascending from the Yarmūk, we first of all reach a mountainous district of moderate elevation (about 2000 ft.) rising towards the S.; this is Jebel 'Ajlūn, which abounds in caves, and, according to

recent explorers, is extremely well watered and of great fertility—the whole surface being covered with pasture such as not even Galilee can show. Eastwards are massive ridges as much as 4000 ft. in height—Jebel Kafkafa and especially Alī'rād—separating this territory from the waterless desert lying at no great depth below. The plateau stretches away to the S. of the deep gorge of the perennial Zerkā (Jabbok), and reaches a considerable height in Jebel Jil'ād (Gilead in the stricter sense). The landmark of the region is Jebel Ōsha' (3590), to the N. of es-Salt, so called from the traditional tomb of Hosea (see GILEAD, § 4). From the deep-sunk Jordan valley the mountains rise grandly in terraces, partly abrupt and rocky; and, whilst fig trees and vines flourish down in the lower levels, valonia oaks, *Laurus Pinus*, cedars, and arbutus grow on the declivities. Owing to its perennial springs, the interior terrace of the country, the ancient Mishōr, is a splendid pasture land, famous as such of old; and abundance of wood and water renders this whole middle region of the trans-Jordan country one of the most luxuriant and beautiful in Palestine. Only a few individual summits, such as Jebel Nebā (Mount Nebo), are noticeable in the ridges that descend to the Jordan valley. The country from the Zerkā southward to the Mōjib (Arnon) is now known as el-Belkā; and beyond that begins the land of Moab proper, which also consists of a steep mountain-wall through which deep gorges cut their way to the plain, and behind this of a plateau poorly watered but dotted over with ancient ruins (see MOAB, §§ 3-5). In this district, too, there are a few individual summits. Here also a mountain-wall separates the plain from the eastern desert; and the mountain district continues farther S. along the Araba (cp EDOM).

Palestine is not exceptionally deficient in water. Perennial streams, indeed, are scarce, and were so in antiquity; but, except in certain districts, as the desert of Judah, the country is not badly supplied with springs. In keeping with the structure of the rocks, the springs usually break out at the junction of the hard and the soft strata. Thus abundant springs of good water occur on the very summit of the cis-Jordan country, as, for example, near Hebron, at Nābulus, and in Galilee; and, though few are found in the immediate neighbourhood of Jerusalem, more than forty may be counted within a radius of 15 to 20 miles round the city. There is no water in the low hilly country behind the coast region; and, though in its northern portion some fairly large streams take their rise, the same is true of the coast-region itself. Rising as they do at the foot of a great mountain range, the most abundant springs in Palestine are those of the Jordan, especially those near Bāniās and Tell-el-Kādi. The mountains of Gilead are rich in excellent water.

A considerable number of hot springs occur throughout the country, especially in and near the Jordan valley; they were used in ancient times for curative purposes, and might still be so used. The water of the bath of el-Ḥammeh, about 2 miles S. of Tiberias, has a temperature of 137° Fahr., and the spring near the Zerkā Ma'in, formerly known as Callirrhoe, as much as 142° Fahr. Hot sulphur springs also occur on the W. coast of the Dead Sea. Many of the springs in Palestine are slightly brackish.

From the earliest times cisterns (*bīr*, Heb. *bē'er*) have naturally played a great part in the country; they are found everywhere in great numbers. Generally they consist of reservoirs of masonry widening out downwards, with a narrow opening above often covered with heavy stones. Open reservoirs were also constructed to collect rain and spring water (see CONDUITS). Many aqueducts, as well as many now ruined cisterns, could be restored without much trouble, and would give a great stimulus to the fertility and cultivation of the country.

Climatically, Palestine may be considered part of the

subtropical zone. At the summer solstice the sun stands 10° south of the zenith; the shortest day is thus one of ten hours, the longest of only fourteen. In a few points, as already remarked, there is a difference between Palestine and the rest of Syria.

14a. Climate and vegetation. The extensive maritime plain and the valley of the Jordan give rise to important climatic contrasts.

1. From its vicinity to the sea the maritime plain is naturally warmer than the highlands. The mean annual temperature is 70° Fahr., the extremes being 50° and 85°. The harvest ripens two weeks earlier than among the mountains. Citrons and oranges flourish; the palm also grows, though without fruiting; melons are largely cultivated; and pomegranate bushes are to be seen. Less rain falls than in the mountains.

2. The second climatic zone consists of the highlands (from 500 to 3000 ft. above the sea), which were the real home of the Israelites. The average temperature of Jerusalem, which may be taken as pretty much that of the upland as a whole, is 62°; but the extremes are considerable, as the thermometer may sink several degrees below the freezing-point, though frost and snow never last long. The rainfall of 20 inches is distributed over about fifty days. In this climate the vine, the fig, and the olive succeed admirably. Even in the southernmost districts (of the Negeb), as well as throughout the whole country, there still are traces of ancient wine-growing. The mountain ridges in this zone are for the most part bare; but the slopes and the valleys are green, and beauty and fertility increase as we advance northwards.

3. In regard to the climate of the third zone, see JORDAN, § 8. The barley harvest here ends with the middle of April. The thermometer rarely sinks below 77°, and it goes as high as 130°.

4. The fourth zone, the elevated plateau of the trans-Jordan region, has an extreme climate. The thermometer may frequently fall during the night below the freezing-point, and rise next day to 80°. The mountains are often covered with snow in winter. Whilst the rainfall in the Jordan valley is very slight, the precipitation in the eastern mountains is again considerable; as in western Palestine, the dewfall is heavy.

From this short survey it appears that Palestine is a country of strong contrasts. Of course it was the same in antiquity; climate, rainfall, fertility, and productiveness cannot have seriously changed. Even if we suppose that there was a somewhat richer clothing of wood and trees in the central districts of the country, on the whole the general appearance must have been much the same as at present. To the stranger from the steppes arriving at a favourable season of the year Palestine may still give the impression of a land 'flowing with milk and honey.'¹ The number of cisterns and reservoirs is proof enough that it was not better supplied with water in ancient times; but, on the other hand, the many ruins of places which were still flourishing during the Roman period show that at one time (more especially in the southern districts, which now possess but few inhabited localities) cultivation must have been carried on more extensively and thoroughly (cp NEGEB, § 6). In general the country enjoyed the greatest security, and consequently the greatest prosperity, under Western rule, which even protected the country E. of Jordan (at present partly beyond the control of the Government) from the inroads of the Bedouins. The Romans also did excellent service by the construction of roads, portions of which (as well as Roman milestones and bridges) still remain in good preservation in many places. Thus it cannot be denied that the resources of the country were formerly better developed than at present. Like all the lands of the nearer East, Palestine suffers from the

¹ On this phrase see above, col. 2104, ll. 3, and NEGEB, § 7.

decay of the branches of industry which still flourished there in the Middle Ages. A. s. (§§ 1-14 a).

The unique position of Palestine—a narrow strip of mountainous country connecting the three great continental areas of Europe, Asia, and Africa—**14b. Flora.** and its remarkable variations of surface and climate within a comparatively small area render it a fitting home for an exceedingly rich and varied flora. There are at present known more than 3000 species of flowering plants, and this number will certainly be increased by future explorations, particularly in Antilibanus and the southern extension of the eastern range. So varied is the flora that its relationships are found in no less than three botanical regions.

i. *Mediterranean area.*—The narrow strip of coast, the slopes of Lebanon and Antilibanus, the tableland of Galilee and the hills of Judæa, Gilead, and Moab, constitute a fairly uniform area, the plants of which are for the most part identical with or closely related to those which flourish at corresponding elevations in Asia Minor and southern Europe, particularly in Turkey, Greece, Italy, and Sicily. This may be termed the 'Mediterranean' area. The relationship of the flora with that of the maritime countries of the eastern Mediterranean is most marked on the coast plains and on the western slopes of the hills on the seaward side of the Jordan. In the mountains east of the Jordan and on the eastern slopes of the western hills the presence of many wanderers of eastern affinity marks the transition from the Mediterranean flora to that of our second region, the Oriental.

1. On the coast plains and the western hills, including the lower slopes of Lebanon, such well-known European genera as Clematis, Anemone, Papaver, Silene, Hypericum, Khamnus, Medicago, Lotus, Lathyrus, Scandix, Lonicera, Anchusa, Linaria, etc., are represented, in most cases by species identical with those found in Europe. The indigenous trees of the coast plains are very few; among them are two British willows, a Mediterranean alder, and the terebinth, which is probably only a variety of the Mediterranean *Pistacia Terebinthus*, L.

2. On Lebanon dense forests are no longer to be seen, and on Antilibanus forest-covered areas are now found only on its eastern flanks. The most prominent tree is the oak, represented by about half a dozen Mediterranean species. Maples, pruni, poplars, the Aleppo pine and the widely cultivated carob (*Ceratonia siliqua*, L.) are also common. A large number of herbaceous species are at present known only from these two ranges, and they all belong to genera which are represented by other species in southern Europe. On the western slopes of Lebanon, between 300 and 3500 ft., occurs *Erica verticillata*, the only heath found in Palestine.

3. The southern uplands west of the Jordan have few trees, and those that occur do not grow gregariously, the land being now practically destitute of forests. Hardly any plants are found here which are not also known from the lower and middle slopes of Lebanon.

4. East of the Jordan, especially on the flanks of the mountains of Gilead, there are forests of oak, Aleppo pine, and terebinth. The most characteristic plants on this portion of the eastern range are those which are common on the western slopes of the hills of western Palestine. Thus the flora of the hills of Gilead and Moab is truly Mediterranean in character although its continuity with that of western Palestine is abruptly broken by the deep gorge of the Dead Sea, and it contains many species of Oriental affinity mingled with the more numerous western types.

5. Above 4000 ft. on the slopes of Lebanon and Antilibanus the low-level Mediterranean species gradually disappear and their place is taken by others which mark the approach to an Alpine flora. Conspicuous among these is the famous cedar of Lebanon, which, within our area, appears to be confined to the middle slopes of Lebanon, where it is now found only in a few small isolated groves. Its apparent absence from Antilibanus is remarkable, though the comparative dryness of the climate of this range is perhaps sufficient to account for it. At about the same elevation are found our single species of rhododendron, a cotoneaster, several roses, and two species of juniper.

6. Above 7000 ft., on Lebanon and Antilibanus, the flora becomes Alpine in character. Trees and tall shrubs are wanting; such shrubby vegetation as there is consists of isolated, small, frequently prostrate bushes of *Cercas prostrata*, *Cotoneaster nummularia*, and other woody species. Rounded clumps of *Acaulhymon libanoticum*, a member of the Leadwort family, form a marked feature on the otherwise almost naked summits. The vast genus *Astragalus* is represented here by many thorny species. In moist and sheltered crevices are hidden several ferns, a family which elsewhere is very feebly represented in our area. The most notable feature of the Alpine flora of these ranges is the almost complete absence of

arctic species such as characterise the Alpine zone in the Alps of Europe and even in a range so far south as the Himalayas. The northern genera which do occur are represented by Levantine species; one of the very few, perhaps the single, arctic species being *Oxyria digyna*, L. The explanation of this remarkable absence of arctic types, which is found also in the Alpine regions of the high mountains of tropical Africa, is to be sought in the geological history of the country.

ii. *Oriental area.*—Our second botanical area is very much smaller and less distinctly characterised than the preceding. The plains of Coele-Syria (separating Lebanon from Antilibanus), Haurān, and Damascus, together with the lower eastern flanks of Antilibanus, possess a flora which may be described as Oriental. Although it includes many Mediterranean species and a few from the Syrian desert, its most marked affinity is with the plants of Northern Syria, Mesopotamia, and Persia. The most characteristic genus is *Astragalus*, which is represented by about thirty species. Next to these, species of *Verbascum* and *Phlomis* are most abundant. The plants of this area, which includes the isolated volcanic range of Jebel ed-Drüz, are very incompletely known, and in the present state of our knowledge its exact botanical relationship with the vast plains and deserts to the east cannot be defined. Many herbaceous species have thus far been found only in these plains. Future exploration will doubtless extend the range of many of these in an easterly direction.

iii. *Tropical area.*—In the gorge of the Jordan and Dead Sea there flourishes a tropical flora which has for the most part African and Arabian affinities, but includes a large number of species from the eastern deserts, many of which are found as far east as the deserts of North West India. On descending the steep declivities of this remarkable cleft, the traveller leaves the Mediterranean flora behind at about the true sea-level.

Among the more remarkable plants which in Palestine are found only in the gorge are *Solanum coagulans*, Forsk., whose fruit has been called the "Dead Sea apple," *Balanites Aegyptiaca*, Del., and *Calotropis procera*, W., all of which are tropical African and Arabian species; *Salvadora persica*, L., identified, probably incorrectly, with the "Mustard-tree," *Zizyphus Spina-Christi*, the 'Christ-Thorn,' and *Populus Euphratica*, Oliv., which extend from Africa to India. The genus *Astragalus* is represented by over 70 species, only about three of which are Mediterranean.

On the shores of the Dead Sea there is a typically tropical halophytic flora, composed largely of species of *Salicornia*, *Suaeda*, and *Atriplex*. Higher up the valley the tree flora includes several species of Willow and Tamarix, which in places form a dense low jungle-growth. This narrow cleft is, from a botanical point of view, one of the most remarkable and interesting features of the country. Isolated from the surrounding area in the course of geological changes and by reason of its depression possessing a torrid climate, it harbours the descendants of a tropical flora which probably flourished over a very wide area in an earlier epoch. Its flora is further modified by the saline nature of the soil of its southern end, due to the absence of a natural outlet for the waters of the Jordan.

H. H. W. P. (§ 14 b).

Of the six regions (based primarily on the distribution of land-birds) into which the surface of the world has been subdivided by zoogeographers, **14c. Fauna.** Palestine belongs to the Palearctic. It lies not far from the middle of the southern districts of the Palearctic region of Sclater and Wallace, and in the Mediterranean sub-region. The Palearctic region includes all Europe, Asia north of the Himalayas, Northern China, Persia and neighbouring lands as far E. as the Indus and the extra-tropical parts of N. Africa, Egypt, and Arabia.¹ Of the sub-regions into which the Palearctic region is divided the Mediterranean is by far the richest, indeed by some authorities it is considered not so much a sub-region as a transition region whose fauna

¹ Some authorities group this vast expanse of land with the N. American continent as one region (the Holarctic), thus reducing the regions to five.

is an association of elements derived from the Palæarctic, the Ethiopian, and the Oriental regions, with each of which the area is contiguous.

In its broader features, then, the fauna of Palestine is that of the Mediterranean sub-region, which includes Spain, the countries S. of the Alps, the Danube, and the Caucasus. Eastwards this fauna extends over Persia, Afghanistan, and Beluchistan, southward across Arabia and Africa, its southern limit being the line of the Tropic of Cancer. Almost in the centre of this district, but a trifle to the E., lies Palestine. Since it is so near the gate which leads from Africa to Asia one is not surprised to find a considerable intrusion of Ethiopian forms. Still this is not so considerable as to alter the dominant Palæarctic facies of the fauna, which is still less modified by animals from the Oriental region. As usual the tracts of desert which lie to the E. of Palestine offer a very effective barrier to the dispersal of both beast and bird; and but for this desert we should doubtless find a greater admixture of Indian forms.

Palestine is characterised by a wide diversity not only of climate (§ 14*a*), but also of soil. Large areas are sandy deserts, and much is stony ground; but there are also tracts of rich corn-fields and fruitful orchards, and although there are now no large forests, there probably were such in the past, and the smaller woods and thickets are still sufficient to give shelter to many sylvan birds and beasts. Both in climate and in the nature of the soil and its products, the country is adapted to a rich and varied fauna.

According to Canon Tristram, Palestine possesses some 113 species of mammals, amongst which, however, **14*d*. Mammals.** are counted several species no longer to be found there, but for whose existence we have, as in the case of the *Bos primigenius*, fossil evidence, or, as in the case of *Felis leo*, the evidence of history. Of these 113, about one half are characteristic of the Palæarctic region.

The mammals belong to the following classes: *Hyracoidea*, 1; *Ungulata*, several species of which are probably introduced as domestic cattle, etc., 23; *Carnivora*, 21; *Insectivora*, 8; *Chiroptera*, 17; and *Rodentia*, 43.

The mammalian fauna is obviously rich and fairly varied for so small an area, the most striking character perhaps being the predominance of the Carnivores and Rodents.

One of the Carnivores, *Ursus syriacus*, as was indicated by Canon Tristram, is not a true species. It is classed by Trouessart as a variety of *Ursus isabellinus*, which extends from the Caucasus to Thibet. Some authorities even regard the last named species as a mere variety of the European Brown Bear, *U. Arctos*. In any case, *U. syriacus* can no longer be reckoned as a species peculiar to Palestine.

Of the 43 rodents, a number which Canon Tristram thinks may easily be increased, he counts no less than ten as peculiar to the district. Some of these have, however, since been shown to have a wider range; thus *Sciurus syriacus* is now recognised as a synonym for *Sc. persicus* which is widely distributed in Europe and Asia. *Gerbillus taniurus* extends to the Euphrates valley. *Dipus hirtipes*, the rough-footed jerboa, does not, according to Trouessart, live in Palestine, where the fascinating little jerboas are represented by *D. aegyptius*, *D. gerboa*, and *D. sagitta*. *Lepus judæa* is recorded from Palestine alone; but *L. syriacus*, *L. sinaiticus*, *Gerbillus taniurus*, *Psammomys myosurus*, *Acomys russatus*, *Mus pratensis*, *Eliomys melanurus* all extend into neighbouring lands such as Syria and the Peninsula of Sinai, and some are found even farther afield.

The rodents thus not only are rich in number but also show a marked proportion of peculiar forms. This is largely due no doubt to the fact that they form the dominant desert fauna. For the most part nocturnal in habit, burrowing in their holes during the day, at night they emerge and seek as food the succulent bulbs and tuberous roots of the desert flowers.

The only peculiar Ungulate, *Gazella arabica*, and the coney, *Procapra syriaca*, also extend through Syria and the Sinaitic peninsula, and the latter throughout Arabia, in the southern parts of which it is represented by a sub-species *P. syriaca jayakari*. The 13 other species of Procapra which together make up the class Hyracoidea are confined to the African continent and are widely distributed throughout the continent except along the northern border.

It may further be mentioned that of the 113 mammals recorded by Tristram 34 are common to the Ethiopian

region and only 16 to the Indian, a further proof of the efficiency of such a desert as that which stretches out E. of Palestine as a barrier to the dispersal of animals.

The birds are even more pronouncedly Palæarctic than the mammals; of the 348 species recorded by **14*e*. Birds.** Tristram, 271 are also Palæarctic, 40 Ethiopian (10 of which are also Indian), 7 Indian, 30 are claimed to be peculiar. Thus the avifauna is remarkably rich for so small a district, and this is partly due to the wealth of bird life at times of migration. Palestine has a winter season for many birds that summer farther north and a summer season for others that pass their winter in warmer climes. The essentially Palæarctic character of the birds is perhaps best brought home to us by the statement that 134 species are common to Britain and Palestine.

One of the interesting features of the avifauna is that of the 30 species common to Palestine and the Ethiopian region alone 18 are found only in the Jordan and Dead Sea basins. In fact this deep cleft shelters the Ethiopian and Indian forms, very few of which are found outside it, whilst in it, except for some winter migrants, hardly any Palæarctic birds are found. Thirteen of the 30 classed by Tristram as new or peculiar birds have closely allied Palæarctic forms. Eleven, however—and these are all found in the Dead Sea basin—are allied to Ethiopian or Indian forms, or to forms common to these two regions. On the whole the approximation is greater to the African avifauna than to the Indian; but this is not so pronouncedly so as in the case of the Mammalia.

Amongst the reptiles and Amphibia we find less trace of an Ethiopian invasion.

14*f*. Reptiles and Amphibia. Of the 91 reptiles and Amphibia recorded by Tristram some 11 are peculiar, 49 occur also in the Palæarctic region, 27 in the Ethiopian, and only 4 in the Oriental. There are in Tristram's list 33 Snakes, 44 Lizards, many of which are deserticolous in appearance and habits, 7 Chelonians, 2 of them marine, and the single species of Crocodile, *C. niloticus*, which is found nowhere out of Africa but in Syria and Palestine, where judging from travellers' tales it is much less common than formerly.

The Amphibia include a newt, the beautiful *Triton vittatus*, *Bufo viridis* s. *variabilis*, the green toad; *B. pantherina* s. *mauritanica*, the pantherine toad; *Pelobates syriacus*, the Syrian spadefoot toad; *Kana esculenta*, the edible frog, and *Hyla arborea*, the tree frog. Doubtless further search would be rewarded with other species of Amphibia.

The ichthyological fauna is by far the most characteristic of the five vertebrate groups. Of the 43

14*g*. Fishes. species, only 8, and these found in the rivers of the coast, belong to the ordinary piscine fauna of the Mediterranean basin. Out of 36 species found in the Jordan system only one is common to the ordinary Mediterranean fauna.

Two others, *Chromis niloticus* and *Clarias macracanthus*, occur in the Nile; 17 others are found in the lakes and rivers of Syria and SW. Asia, whilst 16 species of the families *Chromidae*, *Cyprinodontidae*, and *Cyprinidae* are peculiar to the river Jordan and its subsidiary streams and lakes. The discovery of *Chromis* (7 species) and *Hemichromis*, typically genera of the East African lakes and rivers, in the valley of the Jordan is one of the most remarkable pieces of evidence of the connection of this gorge with the Ethiopian region.

A good deal of work has been done on the molluscan, the arachnid, and certain classes of the insect fauna;

but, as is usually the case, our knowledge of the Invertebrata lags behind that of the **14*h*. Invertebrata.**

Vertebrata. In many cases the divisions of the land made in accordance with the distribution of the various groups of Invertebrata, in no way corresponds with the areas laid down by Sclater; and for this reason, and because in the present state of our knowledge of the invertebrates of Palestine it would be premature to generalise, we shall not consider the invertebrate fauna in this article.

A. E. S., §§ 14*c-h*. Evidence of Palestine's being inhabited at an early date is afforded by many megalithic monuments similar

in character to those so often met with elsewhere in widely separated quarters of the globe. It would be rash to base upon these too definite conclusions regarding the primitive population of the country.¹

¹ In this respect Conder's *Syrian Stone Lore* (1886), for example, is much too positive.

For thousands of years Palestine was an object of conflict between the vast monarchies of western Asia.

As Egypt, whenever she sought to extend her power, was from the very position of the country naturally led to make herself mistress of the E. coast of the Mediterranean, so, on the other hand, there were no physical boundaries to prevent the westward advance into Palestine of the Asiatic empires. For both Egypt and the East indeed the country formed a natural thoroughfare, in time of war for the forces of the contending powers, in time of peace for the trading caravans which carried on the interchange of African and Asiatic merchandise.

It may, to a certain degree, be accidental that we have no detailed reports of the Syrian expeditions of the first pharaohs of dynasty 18 (cp EGYPT, § 53). From the time of the great conqueror Thutmose III., we find lists of foreign countries or cities very frequently as mural decorations of the temples. The most important referring to Palestine (*As. u. Eur.* 157 f.) are:

- i. The list of Thutmose III. in Karnak (T), 118 names, embracing northern and middle Palestine. Socoh (No. 67) is the southernmost city which we can determine; *Y(a)-ra-za* (No. 60), said to have been farthest S., cannot be localised (*As. u. Eur.* 152, 150).¹
- ii. The list of Rameses II. in Karnak (R), enumerating rebellious Palestinian cities (chiefly in Middle Palestine) which he had resubjugated (*As. u. Eur.* 165; copied in Medinet Habu by Rameses III.: see *Rec. de Trav.* 20 114 [1898]). Both texts will soon be republished by the writer in *MFAC*.
- iii. Another small list (R₂) of such rebel cities in N. Palestine and north of it, is found on a representation in the Ramesseum (*As. u. Eur.* 220). It is much mutilated.
- iv. The list of cities of Judah and Israel conquered by Šošenq—Šhishak (Sh.: *As. u. Eur.* 166); strictly, the only list referring to biblical times. It seems to go back to sources written in Canaanitish (Phoenician) letters, whilst the other official lists all show traces of cuneiform originals.
- v. Finally, we might mention various small lists of Sety I. (St.), pertaining more to Phœnicia (eg., *As. u. Eur.* 191), and
- vi. The enumerations of cities and countries in the so-called 'Travel of an Egyptian', in (hieratic) papyrus Anastasi I. (An.) (time of Rameses II.; now generally understood as satirical and fictitious in the part in question; *As. u. Eur.* 172).

The rest of our material consists of single occasional references.

For the criticism of these lists the writer must emphasise more than ever (*As. u. Eur.* 157) that they contain nothing but loose enumerations of names without any systematic arrangement. All attempts to find in the order of the names larger geographical groups or even the marches of the Egyptian armies have failed.

The popular character of the inscriptions, which were primarily mural decorations, explains this deplorable lack of order and precision. (Compare the sharp distinction which the Assyriologist has to make between the strictly historical texts and the 'Prunkinschriften' or 'texts of general laudatory phrases.') For the mode of transcription, it must be borne in mind by the non-Egyptologist that the consonants are fairly well rendered (cp. on the principal equations, EGYPT, § 12 a) as far as was possible with the Egyptian alphabet which, unfortunately, does not distinguish between *r* and *l*, or *s* and *z*, but on the other hand keeps carefully asunder *h* and *ḥ*. (The weakest point is the rendering of the dentals *t*, *ṭ*, *ḏ*.) The system of vocalisation, however (EGYPT, *l.c.*), is always more or less arbitrary and ambiguous, and, although far from being perfectly worthless, as has sometimes been maintained, it is to be used only with the greatest possible caution. The present writer transliterates it, as much as possible, in imitation of the cuneiform system (whch. we know, exercised a strong influence on the Egyptian orthography of foreign names) and of the methods of Assyriologists.²

Taking the list of Thutmose III. (Th.) as basis³ and marking the other lists with R (R₂), Sh., St. (*i.e.*, Sety), and An. (*i.e.*, pap. Anastasi I.), we have the following cities which allow certain identifications⁴:

1. *Kad-ḥu*⁵ (An. distinguishes *Kad-ḥu* on the Orontes from *Kad-ḥi* in Galilee).
2. *Megiddo* (*Ma-he-ḥo*, etc.); cp An., St., Sh.
3. *Ḥa-tā-y* (thus, after Sayce, who compared the *Ha-zi* of Amarna, in N. Palestine).
4. *K(ḥe-ti)-su-na*, the *Gad-suna* of Amarna, 267, a קדשון.
5. *De-be-ḥu* (An., *Tu-bi-ḥi*); cp Amarna *Tubih* and biblical מדין (*As. u. Eur.* 396).
6. *T(ḥi)-ti-y-na*, bibl. *Dothain*.

¹ French scholars commonly identify *Y(a)-ra-za* with an alleged modern *Yersā* (?), *Ersāh* (?); but the name is doubtful.

² Consequently, the grave accent indicates not stress but that a sign can be used with the *o* or *e* vowel.

³ The numbers prefixed to the names indicate their position in Thutmose III.'s list.

⁴ Doubtful names which do not admit of geographical identification or a reasonable etymology have been omitted.

⁵ Mistaken by the scribe for the *Kadeš* on the Orontes and, therefore, placed first.

8. *Ra-bi-na*, a northern Libnah (or Lebonah?).
9. *Ke-r-ti-nas(e)-n(ḥ)a*, a Kirjath-Našib; cp *OLZ* 213a.
10. *Ma-ra-ma*, a מרומ—not Merom—also in R₂.
11. *Ti-mas-ḥu*, Damascus mixed in here by mistake.
12. *A-ti-ra* (an Addir); cp Sh.
13. *O-bi-ra*, an Abel; cp on 90.
14. *Ḥam-tu*, Hammath in Naphtali (not the great Hamath on the Orontes, cp *As. u. Eur.* 256).
15. *Ša-ma-na* is, perhaps,² the *Šamkhna* of Amarna,³ or rather *šūmīn*, 'fat place'?
16. *Bi-a-ru-tu*, a Beeroth (in Benjamin?).
17. *Sa-ru-na* (not the plain but a city of Sharon; cp Amarna, 260, after Knudtzon's reading).
18. *Ka-nō* (also St.), Kanah in Asher.
19. *A-ru-na* (also Sh.), 'E-ru-na (*i.e.*, 'Elyôn), described as covering the road across Carmel (*As. u. Eur.* 158).
20. *(E)-s-ti-ru-tu*, Ashtaroth-Karnaim beyond Jordan.
21. *Ma-ḥu-ta*, Makeddāh (of Judæa?).
22. *Ra-ut-sa*, Laish-Dan?
23. *Ḥu-za-ra*, Hazor of Galilee (St., An.).
24. *Pa-ḥi-ra*, frequently mentioned (St., An., etc.) (*As. u. Eur.* 192).
25. *Ke-n-na-ru-tu*, Chinnereth.
26. *(A)-ti-m(e)-m* (an Adurimim? cp An. A-da-mi-mi).
27. *Ḳa-su-na*, Kishion.
28. *Ša-na-ma*, Šbunem (cp Sh.).
29. *Ma-ša'-ra*, Misheal.
30. *A-k-sap*, Aksaph (on An., cp *As. u. Eur.* 96, 173, and above, col. 1310, n. 4).
31. *Ta-a-na-k*, Taanach (Sh.).
32. *Y(a)-b-ra-a-mu*, Yibleam.
33. *Ke-n-tu-(e)-s-na*, a Gath-Ashna; cp Amarna, 257.
34. *A-y(a)-na*, Ijon; cp 95.
35. *A-a-k* (correct 'A-ka), Accho; cp St.
36. *Ru-ša-kad-s*, a 'holy mountain-top,' קדשן קדשן; cp R.
37. *K(e)-ri-(e)-me-na*, a K(thus R.)aryamin.
38. *Ḳa-ra*, a 'Bor.'
39. *Ša-m-ša-(e)-ti-ma* (in a text of Amenophis II. *Ša-m-ša-(e)-ti-u* [*i.e.*, to]-ma), twogods Shamash and Edom joined).
40. *A-nu-ḥ(e)-r-tu*, Anāharath in Issachar.
41. *'p-ra*, Ophra (?).
42. *Ḥa-ša-bu*; cp Amarna *Ḥa-ša-bu* in N. Palestine.
43. *Ti-su-ra-ti*, the Tušulti of Amarna; N. Palestine.
44. *Ne-ge-bu*, not 'the desert place,' נגב (so *As. u. Eur.* 184, and often), but נגב, 'pass' (cp Josh. 19 33?).
45. *(e)-ḥu-s-ḥ(e)-u*, Šashjimi in Amarna.
46. *Y(a)-ra-za*, the Yurza of Amarna, see above, § 15, i.
47. *Y(a)-pu*, Joppa-Japho (also An. and in a novel).
48. *K(e)-n-tu*, a Gath (Sh.).
49. *Ru-ṭe-nu* (hardly Lod).
50. *Ö-nō*, bibl. Ono.
51. *A-pi-ḥe-nu*, an Aphikim or (Aphē?).
52. *Sa-u-ka* (Sh.), Socoh.
53. *Y(a)-ḥ-ma*, elsewhere *Y(a)-ḥam*, described as situated in the plain between Joppe and the Carmel.
54. *Ma-k-ti-ra*, Migdol (St., Sh., etc.), a frequent name.
55. *Ḥu-di-ti*, Hadid.
56. *Ḥar*, a 'mountain.'
57. *Y(a)-ša-p-(e)-ra*, now usually understood as Joseph-el, although the *s* for Samekh would be unusual. Cp Winckler, *GF* 2 68 against it (also JOSEPH i. § 1, ii. § 1).
58. *A(e)-ru-ru* (hardly Gerar).
59. *Ḥ(e)-r-(e)-ra*, 'God's mountain.'
60. *Ra-ba-ḥ* (or *ā*), a Rabbah (?).
61. *Nu-ma'-na* } evidently identical.
62. *N(a)-ma-na* } identical. The name *N(a)man* seems to point to the territory of Benjamin.
63. *Ma-ra-ma-(ḥi)m*, 'heights.'
64. *'ni*, a 'fountain'; נין.
65. *Ra-ḥ-bu*, Rehob in Asher, Sh., An.
66. *Ḥe-y-k-ra-y-m*, 'double temple' (cp *As. u. Eur.* 88).
67. *O-bi-ra*, an Abel. Frequently; cp Sh., St., and 15.
68. *U-ta-ra-a*, Edrei.
69. *O-bi-ra*; cp 90.
70. *A-y(a)-na*, Ijon.
71. *Kā-ra-ma-na* ('vineyards?').
72. *Ḥa-ti-ya* (rather *yā*), Beth-Yahweb?; cp *As. u. Eur.* 313.
73. *Ö-bi-ra*; cp 15, 90, 92.
74. *Ḥa-ra-ḥi-ra*, elsewhere written *Ḥu-r(e)-n-ḥi-ru*, in southern Lebanon; cp *As. u. Eur.* 200, 204.
75. *Y(a)-ḥ(e)-ḥ(e)-ḥ(e)-ḥ(e)-ra*, the much discussed name Jacob-el, also in R; cp *As. u. Eur.* 164 [JACOB, § 1].
76. *Ḳa-zi-ra*, Gezer.
77. *Ra-ba-tu*, a Rabbah; cp Sh.
78. *'am-ḥu*, a 'valley.'
79. *Bi-(e)-ru-tu*; see above, 19.
80. *Bi-ti-ša-(e)-ra*, a Beth-sha-el; cp *As. u. Eur.* 193 (Sh., St., An., etc.).
81. *Ba-ti-n-ti* (*sic*!), Beth-Anath in Naphtali; Sh. correctly gives the 'Ain omitted here.
82. *Ha-ra-ḥ-tu*, Helkath in Asher.
83. *n-ḥ-n(e)-a-mu* (*sic*!), the 'fountain of Jokneam in Zebulun.
84. *K(e)-ḥ-u*, a 'hill.'
85. *Za-fti* (elsewhere *Ze-fti*), on mount Carmel; a northern Zephath.
86. *Be-ra-ḥ-na*; cp Burkuna (thus Knudtzon) Amarna, 43, 164, which seems to have been situated in Issachar.

An. mentions, of strictly Palestinian places, also: Shechem (cp *As. u. Eur.* 394) as *Sa-ka-nā*; *Ḳa-(ḥ)ra-ti-(E)-n-ḥu*, *i.e.*, Kirjath-'Enab (a place NW. of Jerusalem; also in St.); *Y(a)-a-ni-na* (= Kirjath Jearim? evidently corrupted); *Ba-ti* (Beth, *sic*!) *Zu-pa-(i)ra* (*i.e.*, Kirjath Sepher, cp *As. u. Eur.* 174);

¹ Cp *As. u. Eur.* 234, for the mention in texts of Rameses III.

² The 'Ain being omitted because the *ma* sign contained a silent 'Ain. Cp the double value of the point of *ḥ* with Cholam preceding.

³ If *Šamkhna* were a Simeon, שמשון (Winckler), it would be not the tribe but a city.

Ki-y-na (=Gina, Amarna), cp *As. u. Eur.* 174 on the biblical equivalent. A *Zidiptu*, mentioned between the last two places, occurs in Sh. as *Za-d-p-t-ru-i-c.*, Zadpet-El. An *Aduruma* is common to both sources, perhaps Adoram in Juda.

On the list of Shoshenk, see further SHISHAK.
Gaza (*Gazatu* also in An.) is mentioned frequently, *Aškaruni-Ashkelon* twice, *Štūrohēn* (S.) in Simeon three times, *Luz* (*Ruza*) once, the important fortress *Zarethan* on the Jordan (*Za-ra-tu-na*) twice, also the modern *Sannur*, and a number of places which admit no certain identification.

The list of Shishak (Sh.) enumerates of known cities besides those mentioned before: *Hapharaim* (*Ha-pu-ru-m-ā*), *Gibe'on*, *Beth-Horon*, *Kirjathaim* (see *As. u. Eur.* 166, on the necessary emendation of *Ka-d(e)-f(e)-m*), *Ajalon* (*Ay-yu-ru-n*), *Beth-Tappuah* (*Bi-ti-tā-pu, sic!*), *Pnuel*, *Azmon* (? *A-i-za-m-ā*), *Arad* differentiated as 'great Arad' (*A-ru-d-ā ru-bi-t*) and *Arad n(e)-ba-tā*, perhaps *Jerahmeel* (*Yu-ra-ḥu-ma*). W. M. M.

On the light shed by the Amarna letters (ISRAEL, § 6) and the Assyrio-Babylonian documents, see SYRIA, and on Me(r)neptah's 'Israel' inscription, see ISRAEL, § 7. On the ethnology of primitive Palestine, see CANAAN, and on the relatively late and artificial details of the geography of the various Israelitish tribes see the several articles.

Down to a very late date (the time of the Maccabees) the Israelites were almost entirely shut out from the sea-coast. To the N. of the land of the

16. Israelitish occupation. Philistines the maritime plain was in the hands of the Phœnicians; see DOR. Even in the NT mention is made of a district of Tyre and Sidon to which we must not assign too narrow an extension inland. How matters stood in the country E. of Jordan it is hard to decide. The stretch from the N. of the Dead Sea to the Yarmūk (practically to the S. end of the Lake of Tiberias) was the only portion securely held by the tribes of Israel. See GILEAD, BASHAN, MANASSEH, GAD, REUBEN, MOAB, MESHAN, AMMON.

Our information in regard to the divisions of the country during the regal period is very defective. At

17. N. and S. kingdoms. any rate, the list of Solomon's twelve 'officers' in 1 K. 4 (see BAANA, BEN-HUR, BEN-DEKER) is derived from ancient sources. It is noticeable in this document that, whilst the boundaries of some of the districts appear to coincide with the tribal boundaries (cp TRIBE), the political division was not based on the tribal. In the account given in 1 K. 11 mention is made of only one tribeh that remained true to David, by which must naturally be understood the tribe of Judah. The boundary, in fact, so far as it related to the tribal territory of Benjamin, seems to have varied from time to time; cp BENJAMIN (col. 538, beginning). It was to the kingdom of Israel, with its general superiority in strength and influence, that all the Israelite districts beyond Jordan were attached.

That the northern kingdom consisted of ten tribes (1 K. 12) is a highly artificial computation. The small extent of the southern kingdom is evident from a list (if indeed it be trustworthy) given in 2 Ch. 11 of the towns fortified by Rehoboam. As regards the capitals of the northern kingdom, the royal court was originally at SHECHEM (Nābulus), from the time of Jeroboam I. at Tirzah (not yet securely identified; cp TIRZAH), and from the time of Omri at Samaria (Sebasteiye); the house of Ahab had its seat for a season at Jezreel (Zer'in).

To describe in detail the boundaries or divisions of Palestine in later times is rather a historical than a geographical task.

The lists for the post-exilic period (found in the books of Ezra and Nehemiah), containing a series of new topographical names, require a very careful examination, owing to the tendency of the Chronicler to introduce late elements into his literary material.¹ That Edomites forced their way into S. Judah, is a known fact (see EDMO); this part of the country came to be known as Idumea. It also appears that there was a Jewish population not only in a portion of the old territory of Judah and Benjamin, but now to the N. of Bethel.

Before we proceed to the Græco-Roman period it will be well to consider the names by which the country in general was called at different times.

¹ On the difficult questions involved, cp Ed. Meyer, *Ent. d. Jud.* (1896), p. 151. See also EZRA-NEHEMIAH, and special articles on these 'new names' in the present work.

i. Gilead was the centre of the power of the Israelites on the E. side of Jordan, and the whole country which they possessed there bore this name. Gilead consequently is

18. General names. opposed to Canaan, the 'Promised Land' (cp col. 1885, n. 1). The southern portion ultimately received the name of the individual tribe of Judah, as indeed the northern kingdom was frequently called after the most powerful tribe of EPHRAIM (*q.v.* i. § 1; JOSEPH i.).

ii. The name of the southern kingdom appears in cuneiform inscriptions as *māt (ir) Ya-u-du (di)*; and it is said (see AHAB, § 4) that *māt Sir'lai* occurs once for the land of Israel, though more frequently it is called *māt Humri* (Land of Omri). That even the Assyrians occasionally included Judah under the designation *Palastu* or *Pilistu* (Philistia) has not been absolutely proved; but there is nothing improbable about the supposition. It cannot be taken for granted, however, that the cis-Jordan country bore the name of land of the Philistines at a time when it was the scene of a great development of the Philistian power; the name was rather, as so often happens, extended by their neighbours from Philistia proper to the country beyond, and from the Egyptians it passed to the Greeks. In the OT *Pēlēšet* (see PHILISTINES, § 1) is still always restricted to the Philistian coast-plain; the same is the case in Josephus; and in Herodotus, though the usage is not very explicit, *Palæstina* appears usually to have no wider application. Gradually, however, the designation *Palæstina Syria*, or simply *Palæstina*, came into vogue, and was made to include even the country E. of Jordan, and consequently the whole territory between Lebanon and Sinai. See, further, PHILISTINES, § 1, etc.

We now return to the divisions of Palestine. Already in the book of Kings (that is, by the time of the exile)

19. Later divisions. the name *Shōmērōn* (SAMARIA) is applied to the territory of the northern kingdom, for mention is made of the 'cities of Samaria' (2 K. 17 26 23 19; cp the late narrative-passage, 1 K. 13 32). In the apocryphal books of the OT, *Judea* and *Samaria* (*Σαμαρείτις, Σαμαρίς, Σαμαρεία*) are opposed to each other; but the limits of the two divisions at the time of Christ, and for centuries previously, can hardly be laid down.

Thus in Josephus the Mediterranean coast as far N. as Acre is assigned to *JUDÆA* (*q.v.*); towards the S. this country was bounded by *Idumea*; in the N. it extended to about 8 m. to the S. of Nābulus (Shechem). Whether *SAMARIA* (*q.v.*) extended from the Jordan to the sea is uncertain; in the N. it reached the southern edge of the plain of Esdraelon, the frontier town being 'En Gannim (Jenin). Galilee was originally the district in the neighbourhood of Kedesh, afterwards distinguished as Upper Galilee. The Jewish population was there largely mixed with Phœnicians, Syrians, Greeks, and even Arabs (see GALILEE). The whole maritime region to the N. of Dor was still called Phœnicia in the time of the Romans, and thus does not strictly belong to Palestine in our sense of the word.

Along the coast, as well as more especially in the N. of the country, many Greek colonies were established; how strong the foreign influence must have been in Samaria and Galilee is evident from the preservation of so many Græco-Roman names like *Neapolis* (Nābulus), *Sebaste* (Sebasteiye), *Tiberias* (Tabariye). Elsewhere too, in the S. for example, the old nomenclature was altered: *Ælia* was substituted for Jerusalem, *Azotus* formed from *Ashdod*, and so on; but the old names were always retained in the mouth of the people. The N. of the country and the trans-Jordan region were much more thoroughly brought under the influence of the Greeks and Romans than the south.

The Greek towns in some cases date from the time of Alexander the Great, and others were founded by the Ptolemies; but most of them owe their origin to the Seleucids. One district of the trans-Jordan region retained at that period its old name in the Greek form of *Peræa*. Josephus says that this district extended from the Jordan to Philadelphia (Rabbath Ammon, Ammān) and Gerasa (Jerash), went southward as far as *Macherus* (Mkaur on the Zerḳā Mā'in), and northward as far as *Pella* (Fahl) opposite *Beisān*.

Adjoining *Peræa*, and mainly to the E. of Jordan, lay the *DECAPOLIS* (*q.v.*), which was not, however, a continuous territory, but a political group of cities occupied by Greek republics distinguished from the tetrarchies with their Jewish-Syrian-Arabic population in the midst of which they were scattered.

Little requires to be said about the division of the country in later Roman times.

In the fifth century a threefold partition began to prevail:—*Palæstina Prima* (roughly equal to *Judæa* and *Samaria*), *Palæstina Secunda* (the countries about the upper Jordan and the Lake of Gennesaret), and *Palæstina Tertia* or *Salutaris* (*Idumea* and *Moab*). In the time of the crusades the same

names were applied to three divisions (at once political and ecclesiastical) of the country W. of Jordan,—*Palæstina Prima* or *Maritima* being the coast region as far as Carmel (with *Cæsarea* as its archbishop's see), *Palæstina Secunda* comprising the mountains of Judah and Ephraim (with the patriarchal see of Jerusalem), and *Palæstina Tertia* corresponding roughly to Galilee (with its bishop's see at Nazareth). The country E. of Jordan was called *Arabia*, and was in like manner divided into three parts lying N. and S. of one another.

Palæstine is by no means so strikingly a country apart as is usually supposed. It lay, as already mentioned,

near the great military highway from western Asia to Egypt and Africa. The traffic by sea was also formerly of importance; and even in the Middle Ages something was done for the protection of the harbours. At no time, however, was the country in the proper sense of the word rich; it hardly ever produced more than was necessary for home consumption. The great trading caravans which passed through were glad for the most part to avoid the highlands, and that region at least was more or less isolated.

The following is a brief survey of the principal routes, partly as they ran formerly, partly as they are used still.

From Egypt a road runs by el-'Arīsh (Rhinocolura) or 'the RIVER OF EGYPT' (*q.v.*) by Rafah (Raphia) to GAZA (*q.v.*). From Gaza another runs by Umm Lākīs, formerly identified with LACHISH (*q.v.*), and Bēt Jibrin (Eleutheropolis) across the mountains to Jerusalem. Northwards from Gaza the main route continues along the plain at some distance from the sea (which in this part has piled up great sand dunes) to el-Mejdel (perhaps Migdal Gad) near Ashkelon, and so on to Ashdod (Esdūd, Azotus). From Ashdod a road runs by 'Aqir (Ekron) to Ramle, an important town in the mediæval Arabian period, and Ludd (Lōd, Lydda). From these towns, which are connected with the port of Yāfā (Japho, Joppa), there run to Jerusalem three routes, of which the one most used in antiquity was evidently the northern one passing by Jimzu (Gimzo) and the two Bēt 'Urs (Beth-horon), not the one now followed—viz., by 'Anwās (Nicopolis) and Wādī 'Alī. From Yāfā a road continues along the coast by Arsūf (Apollonia) to the ruins of Kaisariya (Cæsarea), then past Tantūra (ruins of Dor) and 'Athlīt (Castellum Peregrinorum of the crusaders) and round the foot of the promontory of Carmel to Haifa and Acre (a town of great importance from early times). Another route starting from Ludd runs north, close to the mountains by Antipatris (now Keḥr Sābā or Rās el-'Ain') and Kaḳūn, and ends at Khān Lejjūn. The Great Plain offered the easiest passage from the coast inland. el-Lejjūn (a corruption of the Latin *Legio*) was certainly an important point; it is still generally identified, according to Robinson's suggestion, with the ancient MEGIDDO (*q.v.*). In the vicinity lie the ruins of Ta'annuk (Taannach), and farther SW. the great centre of Jenīn (see EN-GANNIM). From Acre there also runs a road directly E. over the mountains to Khān Jubb Yūsuf. The coast road from Acre northwards passes through ez-Zīb (Akhziv, Ecdippa) and by the two promontories of Rās en-Nāḳūra and Rās el-Abyad (Scala Tyriorum), and so continues to the maritime plain of Tyre.

To return to the S., from Egypt (Suez, Arsinoe) the desert was crossed to Ruḥeibe (Rehoboth), Khalasa (Elusa), and Bir-es-Seba' (Beersheba), the route went northward to ed-Dāheriye (see ACHSAH) and el-Khalīl (Hebron). In like manner a road from Aila up the Arabian valley crossed the pass of eṣ-Ṣufāh (see HALAK, MOUNT) to Hebron.

One of the most frequented highways traverses the central mountain chain northwards, and though somewhat difficult in various parts, connects some of the most important places of central Palæstine. Starting from Hebron, it runs past er-Rāma and Halhūl through the Wādī el-Biār, and leaving Bethlehem on the right holds on to Jerusalem, where a branch strikes E. by Khān Hadrūr (probably there was once another route) to Jericho. From Jerusalem northwards it naturally continues by Sha'fat past er-Rām (Rama) to el-Bire (Beeroth), and then onwards by 'Ain el-Haramiye (see BACA, VALLEY OF), Sinjīl, and Khān Lubban through the Mukhna plain to Nābulus (Shechem). From this point a route runs down to the Jordan and es-Salt (Ramoth Gilead?); another passes by Tūbās (Thebez) north-eastward in the line of the Jordan valley to Beisān (Bethshean, Scythopolis). The road across the highlands passes a little to the E. of Sebasṭiye (Samaria, Sebaste), running along the W. side of the Mer-el-Gharāḳ and past Tell Dōthan (Dothan) to Jenīn. Thence the road northward to Nazareth skirts the E. side of the plain of Esdraelon, and from Nazareth a path strikes to Acre. The caravan route proper passes from el-'Afulē north-eastwards past Jebel et-Tūr (Tabor) to Khān et-Tujjār (where several roads cross), and reaches the Lake of Tiberias near Mejdēl (Magdala). It keeps by the shore only for a short distance. Having traversed the small plain of Gennesar, it begins again to climb the mountains where they approach the lake at Khān Mīniye (which, however, for many reasons, cannot be Capernaum [but see CAPERNAUM]), and then it goes on to Khān Jubb Yūsuf, strikes down again into the

valley of the Jordan, and crossing the river at Jisr Benūt Ya'kūb holds on across Jebel Hish to Damascus.

The mountain district of Samaria is crossed by a great number of small roads; but none of them are true caravan routes or worth particular mention. An old caravan route once ran northwards up the Jordan valley from Jericho to Beisān; and from Beisān an important, now less frequented, road crossing the river at the bridge el-Mejāmi' struck N.E. to Fik, Tseil, and Nawa in Haurān, and finally to Damascus.

In the country E. of Jordan a great highway of traffic ran from Petra (or really from the Elanitic Gulf) by Kerak (Kir Moab) to Rabba (Rabbath Moab, Areopolis); in front of Aroer ('Ar'ūr) it crosses the Mōjib (Arnon) and runs northwards through the highlands to Heshbān (Heshbon), and thence to 'Ammān (Rabbath Ammon, Philadelphia). A route also led from Jericho to es-Salt (which could also be reached from Heshbān) and thence northwards to the Jabbok and Jerash (GERASA); then from Jerash one stretched NW. by Tibne to Māḳēs (Gadara) and the valley of the Jordan, and another N.E. to the Zumle and Haurān or more precisely to Boṣra (Bostra), and so on to Damascus. It must also be mentioned that the great pilgrim's track direct from Damascus to Medina and Mecca skirts the eastern frontier of the country.

A great many roads await more detailed investigation; what has been said may suffice to show what lines of communication there were and still are between the more important places of Palæstine. See TRADE AND COMMERCE.

There are no trustworthy estimates of the number of inhabitants in the country at any period of its history.

21. Population. Certain districts, such as Galilee, have, there is no doubt, from early times been much more populous than certain other districts; the desert of Judah and some portions of the country E. of Jordan must all along have been very sparsely peopled. The figures given in the book of Numbers indicate that the whole country contained about 2½ million souls,—it being assumed that the statistics do not refer to the time of the wandering in the wilderness, and that the details may be suspected of being artificially adjusted. The number 2½ to 3 millions may indeed be taken as a maximum; the population can hardly ever have been more than four times its present strength, which is estimated at 650,000 souls. Thus, in the most flourishing period, about 250 to 300 inhabitants would go to the square mile, whilst at present there may be about 65, a number which is rather above than below the mark.

The population of Palæstine, even at an early date, was very mingled; for even at the time of the immigration the Israelites included foreign elements, and later they absorbed or were absorbed by the Canaanites. The Philistines, Moabites, and others in course of time were merged in the new nationality. From the period of the exile colonies from the E. settled in the country, and so powerful did the Aramæan contingent gradually grow that Aramæan became the popular tongue (HEBREW, § 7; ARAMAIC, § 2*f.*). Next were added Greek and Roman colonies.

The Arabic element exerted considerable influence even before the days of Islam; with the Mohammedan conquest it became the dominant power, though it was only by slow degrees that it obtained numerical superiority. The Arab tribes transplanted to Palæstine their old distinctions, especially that between northern and southern Arabs (Kais and Yemen). The Arab peasantry is still divided into clans; for example, the districts of the Beni Hasan and Beni Malik to the W. of Jerusalem, those of the Beni Harīth, Beni Zeid, and Beni Murra to the N., and that of Beni Sālim to the E. Till recently the relation of the separate clans of fellāhin was one of mutual hostility, and, unhindered by the Turkish government, they engaged in sanguinary conflicts.

In manners and in language (though Arabic is universally in vogue) the Palæstine peasants retain much that is ancient. It is extravagant, however, to maintain from the traditions they preserve that primeval Canaanite elements survive among them. The prevalent type, in fact, is Syro-Arabic, or in many districts pure Arabic; and their superstitious customs are partly remains of Syrian beliefs, partly modern Arabic reproductions, under similar external conditions, of ancient superstitions. These remarks are applicable to the saint worship at present spread through the whole Oriental world. A. S. (§§ 1-14 a, 16-21); H. H. W. P. (§ 14 b); A. E. S. (§§ 14 c-h); W. M. M. (§ 15).

The older literature—down to 1878—is registered by R. Röhrich, *Bibliotheca Geographica Palaestinae* (1890). In the newer exploration of Palestine the credit of **22. Literature.** having effectively led the way is due to E. Robinson (*BR*, 1841; *Later Biblical Researches*, 1856). Of recent French work upon Palestine the most important is that of De Guérin (*Description de la Palestine*, 1868 ff.). The Palestine Exploration Society published in 1880 Conder and Kitchener's *Map of Western Palestine* (twenty-six sheets; in 1881 in six sheets). The maps themselves contain much that is precarious and doubtful; but on the other hand the Memoirs, Name Lists, etc., by which the larger map is accompanied, are of permanent value. G. A. Smith's *HG* is excellent and critical, and contains copious references to the literature of the subject. The *PEFQ St.* (from 1869 onwards), as also the *ZDPV* (from 1878) must also be mentioned.

PALLU (פַּלְלוּ); φάλλου [BADFL], one of the sons of REUBEN, Gen. 46.9. Ex. 6.14 Nu. 26.58 1 Ch. 5.3 (in Gen. φάλλουδ [A], φάλλου [L], in Nu. φάλλου [BAL, but φάλλου [B] in v. 8], in Ch. φάλλου [L]). The gentile, Palluithes (פַּלְלוּת, φάλλουθ [BAFL]), occurs in Nu. 26.5.

'Carmi' and 'Pallu' (sons of Reuben) both probably represent fragments of 'Jerahmeel,' viz., יְרַחְמֵאל and יְרַחְמֵאל. Cp PELEG.

T. K. C.

PALMA CHRISTI, PALMCRIST (פַּלְמָא כְּרִיסְטִי), Jon. 4.6 EV^{mg}, EV GOURD (q.v.).

PALMER-WORM (דַּיָּוָה), root meaning 'to cut off'; ΚΑΜΠΗ; *eruca*; , mentioned thrice in the OT (Joel 1.4 2.25 Am. 4.9†). Probably the leaf-eating larva of some lepidopterous insect was intended; like our word 'caterpillar,' the term was probably used vaguely.

The Greek κάμμη, which expresses the idea of 'bending' or 'looping,' may perhaps denote a looper or measuring worm—the larva of some geometric moth.

'Palmer-worm' in the sense of 'caterpillar' is said still to linger in some local dialects (e.g. in that of the New Forest).

A. E. S.

PALM TREE. 1. תַּמָּר, *tāmār* (ΦΟΙΝΙΞ, Ex. 15.27 Lev. 23.40 Nu. 33.9 Dt. 34.3 Judg. 1.16 3.13 2 Ch. 28.15 Neh. 8.15 Ps. 92.12 [13] Cant. 7.7 f. [8 f.] Joel 1.12; also Jn. 12.13 Rev. 7.9†).

In Hebrew, Syriac, and Ethiopic *tamar* is the name of *Phoenix dactylifera*, L.; in Arabic it denotes not the tree, but its fruit.

Arabic has two names for the tree—*akal* and *nahl*; the former, which is also found in Aramaic and occurs in Gen. 10.27 as the name of an Arab tribe (see DIKLAH), has the special signification of a palm bearing plentiful dates, but of an inferior sort: whence Guidi (*Della Sede*, 20) has ingeniously conjectured that it is the *olter* Arabic name, derived from a time when the palm received little or no cultivation, and bore inferior fruits. *Nahl*, on the contrary, which is peculiar to Arabic, he connects with the sense of *excellence*, and supposes it came into use later to denote the cultivated tree which bore a larger and finer fruit. The history of the Hebrew word is obscure. Some scholars connect it with the verb 'itma'arra' to stand stiffly upright; but a more probable suggestion is Guidi's (i.e. that *tamar* is a dialectic variation of *tamar*, which means 'fruit' in general, and came to be specially applied early in the history of the Semitic languages to the palm and its fruit, as the fruit *par excellence*).

The fact that this word is common to Hebrew, Aramaic, and Arabic² proves it to be very ancient; its absence from Assyrian is one of the proofs on which von Kremer, Guidi, and Hommel base their theory that the Assyrians and Babylonians were the first of the Semitic nations to quit the parent stock.

As the camel among animals, so the palm tree among plants possesses primary importance in the life of desert

2. Its cultivation. people like the Arabs. It has existed since prehistoric times over a vast area 'in the dry, warm zone which extends from the

¹ In Ex. 15.27 Nu. 33.9, Θ has for דַּיָּוָה, στελέχη φοινίκων.

² Eth. *tamar* has by some scholars (e.g., Hommel, *Säugthiere*, 412) been regarded also as an ancient word; but Guidi gives reasons for supposing that it is a comparatively late loan-word from Arabic.

Senegal to the basin of the Indus, chiefly between the 15th and 30th degrees of latitude' (De Candolle, *Origine*, 240). There has been much discussion as to where it was first cultivated (see esp. Th. Fischer's monograph *Die Dattelpalme*, Ergänzungsheft no. 64 zu Petermann's *Mittheilungen*); but it is enough to say that we have evidence of very early cultivation in Egypt, Babylonia, and (so far as we can indirectly infer in the absence of records) Arabia. Syria, on the other hand, lies somewhat N. of the proper latitude for the palm; and, with the exception of the famous palm-group at Jericho, the tree has probably never been common in Palestine, though the biblical references are sufficient to show that its appearance was not unfamiliar (note especially the 'palm tree of Deborah,' Judg. 4.5, and its mention in Joel 1.12 among common fruit-trees).¹

As is well known, the palm flourishes best in a dry and even rainless atmosphere, provided that its roots can reach a supply of subterranean water. This has in some cases to be provided by artificial irrigation; in others the need is supplied by nature.² The twelve wells of Elim, beside which the seventy palm-trees grew, seem to point to early cultivation in that region (see ELIM). The place-names TAMAR (q.v.) and Hazezon-Tamar³ (see EN-GEDI) confirm this inference, and though the title 'city of palm trees' was doubtless applied to different places (cp Bertheau on Judg. 1.6 [and especially Greene, *The Hebrew Migration from Egypt*, 273]), one of which was ZOAR (q.v.), no place bears it with so much justice as Jericho (Dt. 34.3 2 Ch. 28.15, and probably Judg. 1.6 3.13; but cp JERICHO, § 2). The group of palms at JERICHO (q.v., § 10) which has now entirely disappeared, must in ancient times have been very large. It is referred to by Theophrastus, Diodorus, Strabo, Pliny, Tacitus, and of course also by Josephus, who remarks (*B/* iv. 83) that the 'fatter' sort of palms, when pressed, yield a fairly good honey (see BEE).⁴

[The abundance of palm trees in Babylonia, and the veneration for sacred trees in the form of conventionalised palm trees, is naturally referred to under PARADISE (§ 11, col. 3579). Tylor and Haupt have described with much fulness of scientific and Assyriological knowledge the sacred ceremony of the artificial fecundation of the palm tree (*PSBA* 12.383 ff.; note in Toy's *Ezekiel*, transl., *SBOT* 182 ff.). Winckler's theory that the *tamar* in Palestinian place-names has a mythological explanation seems to be derived from the acute mythologist Stucken (*Astralmythen*, 73-75); according to him *tamar* is the Palestinian counterpart of the Babylonian goddess Ištar (see, e.g., Wi. *G12* 98.227). See, however, n. 3, and cp TAMAR.]

In Hebrew poetry the palm tree is an image of prosperous growth (Ps. 92.12 [13]) and tall comely stature

3. In poetry. (Cant. 7.7 f. [8 f.]). With the use of its branches at the feast of booths (Lev. 23.40 Neh. 8.15) we may connect the 'branches of palm trees' in Jn. 12.13; whence are derived the reference in Rev. 7.9, and the use of palms in the services of the Christian church. Much information as to statements about the palm in later Hebrew will be found in Löw, 109 ff.

The branches or date-stalks (AV 'boughs') of the palm are once referred to (Cant. 7.8 [9]) by the name פְּסָפְסָיִם. The corresponding Aramaic word *sāānā* is likewise specially appropriated to the date-bearing stalks (Löw, 119).

¹ (Palms grew in the Middle Ages at Tiberias, according to Makdisi (quoted by Del. *Ein Tag in Kapernaum*, 151), and probably grew in ancient times, as Tristram states that they still do, within Jerusalem (see FURNACE, 5)).

² Trees naturally supplied are termed by the Arabs 'baal palm trees' (*Rel. Sem.* (2) 99).

³ [It is possible (see *Crit. Bib.*) that תַּמָּר, 'palm tree,' and יְרַחְמֵאל, 'Jerahmeel,' have sometimes been confounded by the scribes. This applies to Baal-tamar, Judg. 20.33, near Gibeah; to 'Ir hat-tāmārīm, the city of palm trees; and to Hazezon-tamar, which should perhaps be read Kadesh-Jerahmeel (= the En-gedi of 2 Ch. 20.2).]

⁴ See Schürer, *G112* 1.311-313.

2. Whereas תָּמָר, *tāmār*, occurs only as a noun in the absolute state, תָּמָר, *tōmer*, twice (Judg. 45 Jer. 105†) appears as a construct; it is difficult to believe that this traditional pointing really represents the true original form. On Judg. 45 see *Crit. Bib.*

3. תְּמָרָה, *tīmōrah* (on the spelling see Baer on Ezek. 40 22), is repeatedly used (1 K. 6 etc.) for the palm as an architectural form. This tree played an important part in the development of Egyptian architecture (Fischer, *op. cit.* 5). See TEMPLE.

[4. תָּר, *nīhal*, according to Perles (*JQR* 11 [1899] 688 f.), sometimes means 'palm tree'; so at any rate in Nu. 24 6 Ecclus. 50 12 (reading תָּר תָּר כַּנְיָרָה 'like palm-branches,' cp 6 of Ecclus. 45 στέλεθη φωνίκαυ, and see above, § 1, first note). Probably this is right; and, taking a hint from Schultens, who for a time took תָּר, *ādā*, in Job 29 18 to mean 'palm tree' (*Liber Jobi*, 1737, p. 813 b; see PHUENIX), we shall do well to read תָּר for תָּר in Job (*l.c.*), rendering the whole passage,

And I said, I shall grow old like the cedar (תָּרָה אֶתְּמָרָה),

Like the palm tree (תָּר) I shall multiply days.

On Nu. (*l.c.*)—where for תָּרָה read תָּרָה—and Job (*l.c.*) see Cheyne, *Ezra. T.* Dec. 1899, and for the older views see Dillmann.—T. K. C.]

PALTI (פַּלְטִי § 52; פֶּלְאֵט[ε] [BAL]). 1. Husband of MICHAL (*q.v.*), described as a 'son of LAISH,' that is to say, probably, a citizen of Laish or LAISHAH (read, however, 'Shalisha'), to which 1 S. 25 44 appends the gloss 'which was of GALLIM'—*i.e.*, of Beth-gilgal (1 S. 25 44 2 S. 3 15; פֶּלְאֵטִי [BA], פֶּלְאֵטִי [L, gen.]). In 2 S. 3 15 he is called PALTIEL. See BAHURIM.

Note (1) that both Gallim and Bahurim are probably distorted fragments of Jerahmeel (they are designations of the centre of a Jerahmeelite clan); (2) that Michal and Merab are very probably the same person, both names having sprung from Jerahme'elith, and consequently (3) that Palti (miswritten in 2 S. 3 15 Paltiel) and ADRIEL (*q.v.*) are also the same person. Probably Palti comes from Palti or Pelethi (תְּלֵי) — a corruption of Šarephāthi (see PELETHITE), and 'Adriel from Jerahme'el. The names are virtual synonyms; in 1 Ch. 27 10 a Paltite is described as 'of the b'nē Jerahmeel' (crit. emend.; see PALTITE). See further MERAB, MEROPLATHITE, SAUL, § 6.

2. b. Raphu, a Benjaminite chief, one of the twelve 'spies' (Nu. 13 9 [P]). Very possibly to be explained as no. 1; cp Japhleti, which may have a similar origin. RAPHU probably comes either from Jerahme'el or from Šarephathī; cp 1 Ch. 4 12, and see PASEAH, REPHAEL.

PALTIEL (פַּלְטִיֵּל, §§ 30 52; as if 'God's deliverance,' but see PALTİ). 1. See PALTİ (1). 2. b. Azzan, of Issachar, one of the 'princes' nominated to divide Canaan amongst the tribes (Nu. 34 26 [P]; פֶּלְאֵטִיֵּל [BALFvid. (פֶּלְאֵטִיֵּל)]).

PALTITE (פַּלְטִיֵּת; ο κελωθει [B], ο φελαωνει [A], ο φαλλωνι [L]), the designation of Helez (Hilles?), one of David's thirty (2 S. 23 26), meaning, according to most scholars, a man of BETH-PALET (*q.v.*).

The 'Pelonite' (תְּפִלֹּנִי) of 1 Ch. 11 27 (ὁ φελαωνει [BN], ὁ φαλλωνι [A], ὁ φελλωνι [L]), 27 10 (ὁ ἐκ φαλλους [BA], ὁ φαλλωνι [L]), is, most commentators think, a corruption of 'Paltite' (so Kittel); Marquart (*Fund.* 19), however, would read 'Keilathite' (תְּקֵלֶתִי); cp B above) on the ground that 'man of Beth-palet' should strictly be בֵּית תְּפִלֹּנִי. But Paltite seems to be the name of the clan, and Beth-palet that of its chief settlement. In 1 Ch. 27 10 Helez is further described as 'of the b'nē Ephraim'; perhaps (as in 1 S. 1 1) אֶפְרַיִם may be a corruption of [תְּפִלֹּנִי]. PALTİ (*q.v.*) seems ultimately to mean 'Zarephathite'; *i.e.*, the clan had a Zarephathite or Jerahmeelite connection.

T. K. C.

PAMPHYLIA (ΠΑΜΦΥΛΙΑ, Acts 2 10 13 13 14 24 15 38 27 5, 'the sea of Cilicia and Pamphylia'; 1 Macc. 15 23).

Pamphylia was properly the strip of plain bordering the bay of *Adalia*, that remarkable indentation in the southern coast of Asia Minor between Capes *Chelidonia* and *Anamur*. The plain itself retreats like a bay into Mt. Taurus at its back, and at the eastern and western extremities of Pamphylia the hills advance and rise often sheer from the water (see PHASELIS). The narrowness of the territory of the Pamphylians is indicated by the fact that in 480 B.C. they provided only thirty ships to the fleet of Xerxes, as against fifty

1 Plur. תְּפִלֹּנִים or תְּפִלֹּנִת.

from Lycia, and one hundred from Cilicia, the neighbouring territories on the E. and the W. (Herod. 7 91 f.).

The Romans put Pamphylia under the governor of Cilicia in 103 B.C.—Cilicia at this period 'being the

2. History. Roman term for a great, ill-defined, half-subdued agglomeration of lands, comprising parts of Cilicia, Pamphylia, and other regions' (Rams. *Hist. Comm. on Galatians*, 103 f.).¹ Coming down to 36 B.C., we find Pamphylia—or rather the more inland mountainous part of it, which apparently had been under the surveillance of Polemon of Laodiceia (Rams. *op. cit.* 110)—added to the territories of the Galatian Amyntas (Dio Cass. 49 32; Strabo, 571). When Amyntas was slain by the Pisidians in 25 B.C. (see GALATIA, § 3) Pamphylia was not incorporated with the Province Galatia, but was treated as a separate governmental district,² and subordinated probably either to the governor of Galatia or to that of Syria and Cilicia. It was apparently not until 43 A.D., in the reign of Claudius, that Pamphylia and Lycia were combined as a separate imperial province (Dio Cass. 60 17; see LYCIA).

The character of the country, a narrow strip, about 80 m. long (640 *stadia*, Strabo, 667) and never more than 20 m. wide, separated from the interior by the steep and lofty range of Taurus, accounted for the fact that none of the Pamphylian cities became important. The mountain wall of Taurus prevented all heavy traffic from crossing the short lines between the plateau and the southern sea, and turned it along the road that led to the Ægean' (Rams. *Hist. Geogr. of AM*, 58). The climate also, with hot, damp, and stagnant air, was unfavourable to Greek settlers. Consequently Pamphylia never became completely Hellenised; the native element, oriental in its sympathies and character, triumphed over the Greek. The Pamphylians, in these circumstances, showed a backward civilisation (Strabo, 570: 'though living S. of the Taurus, they have not quite given up their robber-habits, and do not allow their neighbours to live at peace'). See SIDE.

Pamphylia was visited by Paul and his companions, in the regular course of their mission, after traversing

3. Paul's visit. Cyprus (Acts 13 13). Nevertheless, no work was done in the province; Paul passed on to Antioch in Pisidia (*v.* 14). Taking this fact in conjunction with the statement in Gal. 4 13, that through 'infirmity of the flesh' the Gospel was first preached to the Galatians, Ramsay has plausibly suggested that 'the sudden plunge into the enervating atmosphere of Pamphylia' brought upon Paul an attack of fever, and compelled him to go to the higher ground of the interior (*St. Paul the Traveller*, 93; *Church in the Rom. Emp.* (6) 61 f.). This theory has the merit of satisfactorily explaining the refusal of John Mark to accompany Paul beyond the Taurus (*v.* 13, cp Acts 15 38). On the return journey mission work was attempted in Perga, apparently with slight success (Acts 14 25; cp NEAPOLIS). The only other Pamphylian town mentioned in the NT is Attaleia. That a considerable number of Jews were found in the country about 139 B.C., we learn from 1 Macc. 15 23, as well as from Acts 2 10; and, conversely, the slow progress made by Christianity here during this early period is evidenced by the fact that Pamphylia, as well as Lycia, does not occur in the list of 1 Pet. 1 1.

(Pamphylia, in part, is elaborately described in Lanckoronski's *Städte Pamphyliens und Pisidiens.*) W. J. W.

PAN. For (1) סִיר, *sir*, (2) כִּיּוּר, *kyiūr*, and (3) פִּרּוּר, *pirūr*; see COOKING, § 5, i. a, b, and c (on *sir* see also ALTAR, § 9 a). For (4) כֹּתֶבֶת, *maḥābath*, and (5) חֲבִיתִים, *hābīṭīm*, see COOKING, § 7; for (6) מַרְחֵשֶׁת, *marḥšēth*, see COOKING, § 7; for (7) מַסְרֵת, *mašrēth* (2 S. 13 9 f.) see COOKING, § 5, i. (where the reading is emended), and for פֶּלְחָה, *šēlāhah* (2 Ch. 35 13) see CRUSE, 3.

PANEL (פֶּנֶלָה), 1 K. 7 28 RV^{mg.}, AV BORDER. See LAVER.

¹ Cp Cic. *Verr.* ii. 1 38, 'quomodo Lyciam, Pamphyliam, Pisidiam, Phrygiamque totam . . . affixerit': summed up as provincia Cilicia, *id. op. cit.* chap. 17. This refers to 80 B.C.

² Dio Cass. 53 26, τὰ τε χωρία τὰ ἐκ τῆς Παμφυλίας πρότερον τῷ Ἀμύντῳ προσσηθέντα τῷ Ἰδίου νομῷ ἀπεδόθη.

PANNAG (פַּנָּג; כּוּלָּהּ [PBAQ]), in Ezek. 27 17 † is taken by AV apparently as a place-name and by RV as a common noun, untranslated, with the marginal note 'perhaps a kind of confection' (cp BAKEMEATS, § 3, end).

The text needs correction, as most critics allow. Cornill proposes to read פַּנָּג, 'wax'; but almost certainly פַּנָּג, 'vine' is the right word. For RV's 'and pannag, and honey,' read 'and grape-syrup' (פַּנָּג שֶׁבֶרֶת). The Hebrew phrase is parallel to the Mishnic phrase for date-syrup (פַּנָּג שֶׁבֶרֶת). Bliss's view of the apparatus traceable at the wine-presses at Tell el-Hesi is thus confirmed. Cp HONEY, § 1 (3). Observe that פַּנָּג (see STORAX) precedes, for so we should read for MT's פַּנָּג (see MINNITH); in Gen. 43 11 the very same products are mentioned together. Cp DABBRESHETH. T. K. C.

PAPER (χαρτης), 2 Jn. 12†. See POPYRI, § 2.

For the 'paper-reeds,' RV 'meadows' (הַרְיָ) of Is. 19 7 † see REED, 2, and NILE.

PAPHOS (Πάφος, Acts 13 6 13). The town visited by Paul and Barnabas on the first missionary tour was

1. Site. New Paphos (mod. *Baffo*), originally the port of Old Paphos. The kingdom of Paphos, in the extent of its territory, its wealth, and its fame, was second only to that of SALAMIS (*q.v.*). It embraced the western part of Cyprus, touching on the N. the territory of Soli, on the S. that of Curium, and extending inland a distance of 20 m. as far as the range of Troodus. While under an independent king, its capital was Old Paphos (Παλαιά Πάφος, later Παλαιάπαφος; cp Strabo, Paus.), the modern *Kuklia*, on the left bank of the Bocarus (mod. *Didriao*), about 10 m. SW. of *Baffo*, and 2 m. from the sea (cp Strabo, 683, ὅσον ἐνδέκα σταδίοις ὑπὲρ τῆς θαλάττης ἰδρυμένη, ὑφορμον ἔχουσα).

Paphos owed its celebrity to the temple and worship of the 'Paphian Queen' (ἡ θεὰ ἢ Παφία, or ἢ Παφία

2. Native cult. Simply, in inscr. also *Fánaσσα*. See *Samm. der gr. Dialekt-inschriften*, I 1 ff., 15 ff.) whom the Greeks identified with Aphrodite (see PERGA).

The temple was near Old Paphos (Paus. viii. 5 2), which thus became the religious capital of the island. The kings of Paphos, of the clan of the Cinyradae, were also hereditary high priests of the temple, a dignity which they retained down to the annexation of the island by the Romans in 58 B.C.¹

In course of time the old town lost its importance, and the port usurped its position and became the administrative capital of the island in Roman times (cp Acts 13 7);² but the wealth and greatness of the shrine of the goddess were not thereby impaired (cp Strabo, 683).

The cult was that of a nature-goddess similar in character to the Babylonian Ištar, the Phoenician Astarte. She was a native goddess of the Anatolian peninsula and the Aegean islands (cp Rams. *Cities and Bish. of Phrygia*, 189 ff.; *Hist. Comm. on Galatians*, 35 f.). As the result of long and close intercourse with Syria, this worship in Cyprus was overlaid with Phoenician elements.

The characteristic of the worship lay in the strongly organised college of priests or priestesses living, often in thousands, round the temple (cp Strabo, 558, of Comana Pontica; see DIANA), and the sensual excesses of the devotees, and their self-mutilation (cp Athan. *Contra Graec.* 10, τὴν ἐπιθυμίαν θεοποιήσαντες προκεκνούσιν, the Cyprian cultus the 'deification of lust'). As at other centres of the worship, the goddess was represented only by a conical stone (cp Max. Tyr., τὸ δὲ ἀγάλμα οὐκ ἂν εἰκάσαις ἀλλ' ὅτι ἢ πυραμίδι λευκῇ; Tac. *Hist.* 2 3. Cp Coins, and see PERGA. So also at Pessinus in Galatia).

Models of the image were sold as charms (Athen. 15 18; cp the 'silver shrines' at Ephesus, Acts 19 24, used somewhat differently). The fame of the Paphian shrine attracted costly gifts and distinguished pilgrims (for example, Titus visited it before undertaking his campaign against the Jews, Tac. *Hist.* 2 2 f.).

¹ The modern Primate of the island is entitled μακαριώτατος, and perhaps inherits his privileges from the pre-Christian priestly guild (Gardner, *New Chapters in Greek History*, 172).

² New Paphos in its turn gave way to a new settlement about a mile to the N., the modern *Ktima*, the administrative capital of the district.

The apostles appear not to have come into direct conflict with this worship, as Paul was destined to do later at Ephesus. It should be re-

3. Paul's visit. membered that an analogous cult must have been familiar to them at Antioch in Syria. Although a considerable time must be implied in the expression 'go through the isle' (Acts 13 6, AV, διελθόντες ἄλλην τὴν νῆσον), this did not bring them into collision with the native priests as the work was confined to the Jewish synagogues (*v.* 5). The conflict with Elymas (Bar-Jesus) before the Proconsul was, on the face of it, a personal one. (See, further, BARJESUS, PAUL.)

See P. Gardner, *New Chapters in Greek History*; D. G. Hogarth, *Devia Cyprica*. All that ancient authors say about Paphos gathered by M. R. James in *Journ. of Hell. Studies*, 9 175 ff. For description of temple, excavations, etc., see *ibid.*, 158-215. W. J. W.

PAPYRI¹ The use of papyrus as writing material is very ancient. According to Kenyon,² the oldest of

the written papyri that have come down to our day is a leaf containing

1. Papyrus as writing material. accounts dating from the reign of King Assa of Egypt (about 3580-3536 B.C.). From these early times down to a late date in the Arabian period papyrus continued to be, in a very special sense, the characteristic writing material of Egypt. Although apparently at first sight brittle and perishable, it is in point of fact as indestructible as the pyramids and obelisks, and it is to the magnificent power of resistance possessed by the papyri that, to a large extent, we owe the revival of knowledge of ancient Egypt which has occurred in recent times.

As to the mode of preparation of papyrus leaves inaccurate statements are frequently met with. Very recently it has been said,³ but incorrectly, that they were made from the 'bast' of the papyrus plant. The elder Pliny (*H.N.* 13 11-13) gives a description⁴ of the process of manufacture which technical examination of extant papyri has made intelligible. It is thus explained by Kenyon:⁵

'The pith of the stem of the papyrus plant was cut into thin strips, the width of which was of course determined by the thickness of the stem, while their length varied considerably . . . These strips (Lat. *phylara*) were laid side by side to form a sheet. Each sheet was composed of two layers, in the one of which the strips ran horizontally while in the other they were perpendicular. The layers were attached to one another by glue, moistened with water—preferably, it would appear, the turbid water of the Nile, which was supposed to add strength to the glue. The sheets thus made were pressed, dried in the sun, and polished so as to remove unevenness in the surface; and they were then fit for use.'

The papyrus plant, from the pith of which the strips just spoken of were obtained, *Cyperus papyrus*, L., *Papyrus Antiquorum*, Willd., besides occurring in Egypt,⁶ is met with in Sicily, especially near Syracuse, and also in Italy by the Thrasymene lake.⁷

The size of a papyrus leaf is, as ought never to have been questioned, variable. Kenyon⁸ has brought together some measurements. For most writings of a non-literary nature (letters, bills, receipts, etc.) a single

¹ The etymology of the word 'papyrus' remains uncertain. See Nestle, *Einführung* (2), 41; Lagarde, *Mitteil.* 2 260. [For the etymology generally accepted among living Egyptologists, cp EGYP, § 8. Bondi, starting from the Talmudic orthography פּיפּייר, was the first to propose to take the name papyrus as פּאפּוּס (for the better form פּוּסוּר, cp NILE) 'the (thing or product) of the river'—i.e., 'the river-plant.' This etymology is highly probable, or at least superior to all other etymological attempts.—W. M. M.]

³ Gregory, *Toxkritik.* 1 7 (1900).

⁴ This description has been popularised by G. Ebers in his *Kaiser Hadrian*. Cp also Ebers, 'The writing material of antiquity' in *Cosmopolitan Magazine*, New York, Nov. 1893 (Nestle (2), 40).

⁵ *Palaography*, 15.

⁶ B. de Montfaucon, 'Dissertation sur la plante appellée Papyrus' in *Mém. de l'Acad. royale des Inscriptions et Belles Lettres*, 6 (1729) 592 ff.; Franz Woenig, *Die Pflanzen im alten Ägypten, ihre Heimath, Geschichte, Kultur*, 1886, pp. 74 ff. [Cp EGYP, § 8; RUSH.]

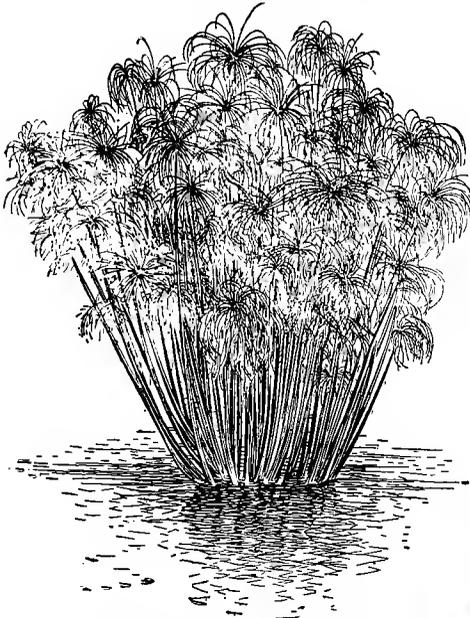

⁷ See Hoskyns-Abrahall, *Acad.* 19th March 1887, 776 (Nestle (2), 40).

⁸ *Palaography*, 16 f.

leaf was sufficient; for longer texts, especially of a literary character, the required number of leaves were glued together into a roll.¹ The papyrus-roll was the classical form in which literary productions appeared in antiquity. Ordinarily the writing was upon that side of the leaf on which the fibres run horizontally (*recto*); the back (*verso*) was made use of only on exceptional occasions.² If a papyrus leaf is found to be written on both sides and by different hands, it is, generally speaking, safe to assume that the writing on the recto side is the earlier. It is only in rare cases that the leaves of a papyrus roll are written on both sides.

Nestle³ recalls Rev. 51 βιβλίον γεγραμμένον ἔσωθεν καὶ ὀπίσθεν where some MSS. have ἔσωθεν καὶ ἔξωθεν or ἔμπροσθεν καὶ ὀπίσθεν.

In the later centuries of antiquity the papyrus book—the Codex—is met with as well as the papyrus-roll, and ultimately, as we know, the codex gained the upper

Papyrus Plant (from living specimen at Kew).

hand. It is not accurate to say that the transition from the roll to the codex began with the introduction of parchment.

A few examples will suffice. The British Museum possesses a fragment of a codex of the *Iliad* written upon papyrus and probably dating from the third century A.D.;⁴ amongst the Oxyrhynchus Papyri there is a leaf from a codex of the Gospels or of the NT, containing Mt. 11-9, 12, 14-20 and dating from the third century; the same collection includes other biblical codex fragments. The Heidelberg University Library possesses twenty-seven papyrus leaves of a LXX codex dating from the sixth or the seventh century. The famous so-called Logia-fragment of Oxyrhynchus also comes from a codex.

Even if there were no allusions to the papyrus in the OT, the immense importance of recent papyrus finds

2. Biblical references. for the study of biblical and Christian antiquity would fully account for the existence of an article on the subject in a biblical encyclopædia. The Hebrew writers, however, do occasionally refer to the papyrus plant (מִצְרַיִם, Is. 18:2 RV, Ex. 23 RV^{mg}; see RUSH), and as a writing material we find a reference to papyrus in 2 Jn. 12, where χάρτης (EV 'paper') clearly indicates a papyrus leaf. Again,

¹ Kenyon, *op. cit.* 17 ff.

³ *Einführung* (2), 41.

⁴ Kenyon, *Palaography*, 27, where also other examples will be found.

in the well-known passage, 2 Tim. 4:13 (see PARCHMENT), we cannot doubt that by τὰ βιβλία papyrus books are intended.

Since 1778 when an unknown European dealer in antiquities bought from Egyptian peasants an original papyrus roll of 191-2 A.D. and at the same time witnessed how they set fire to some fifty others and revelled in the aromatic perfume thus produced,¹ the lower valley of the Nile has yielded a vast wealth of papyri written in all possible languages and separated in time by thousands of years. Already in the second and third decades of the nineteenth century not a few papyri from Memphis and Setopolis in Middle Egypt, and from This, Panopolis, Thebes, Hermonthis, Elephantinè, and Syenè in Upper Egypt, had reached our European museums, though noticed by few, and read and studied by still fewer scholars. Then, to leave out of account various single finds in other years, came the great discoveries in the province of el-Faiyûm (see EGYPT, § 50) in 1877, when the heaps of ruins to the N. of Medinet-el-Faiyûm (ἡ τῶν Κροκοδείλων πόλις, afterwards called ἡ τῶν Ἀρσινοειτῶν πόλις) yielded hundreds and thousands of precious leaves and fragments of leaves. Since that date find has succeeded find with great rapidity. The most remarkable point to notice is that most of the papyri have been unearthed with the spade. From this we gain a most valuable hint as to the light in which these documents of antiquity are to be viewed. In the papyri which come to us from the Faiyûm, from Oxyrhynchus (el-Behnesa), and elsewhere we are not to see the remains of great collections of archives, but only what has survived from ancient waste-paper-baskets and rubbish heaps to which had been consigned old minute-books and ledgers from public or private offices, second-hand and worn-out books which were destined after a long slumber in oblivion to possess in the far future an importance never dreamed of by their writers.

The great mass of the papyri is non-literary. Law-papers of the most various kinds—leases and loans, bills and discharges, marriage-contracts and wills, certificates, magisterial orders, advertisements and notices of penalties, minutes of law proceedings, assessments in large numbers; besides letters and notes, school exercises, magical texts, horoscopes, day-books, and so forth. The contents of these non-literary writings are as manifold in their variety as life itself. Those in Greek, numbering many thousands, cover a period of about a thousand years. The oldest go back to the early Ptolemies and thus to the third century B.C.; there are others that bring us down far into Byzantine times. The whole shifting scene of Greek and Roman history in Egypt during this long interval passes in these leaves before our eyes. Of the significance of these Greek documents alone—not to speak of the abundance of others in Coptic, Arabic, Latin, as well as other languages—for our knowledge of antiquity in the largest sense of that word there can be but one opinion. They mean a resuscitation for us of a large part of ancient life. They bear witness to the conditions of the past with an accuracy, a warmth, and a fidelity such as can be predicated of no ancient author and of only a very few of the ancient inscriptions. The tradition handed down to us by the writers of antiquity is always, even at its best, secondary; it is always more or less artificial and sophisticated. The inscriptions are often cold and dead things like the marble on which they are carved. The papyrus leaf is alive; one sees autographs, individual peculiarities of penmanship—in a word, men; manifold glimpses are given into inmost nooks and crannies of personal life for which history has no eyes and historians have no glasses. These insignificant-looking scraps give a vitality that was previously

¹ Wilcken, *Die griechischen Papyrusurkunden*, 10; cp also with what follows.

wanting to the history of law in the first instance, but also to the history of human culture in general, and in a very marked degree to the study of historical philology. It may seem a paradox; but it can safely be affirmed that the unlitary papyri are more important in these respects than the litary. The peculiar treasures of science which lie hidden in those new fields are not the fragments of ancient art and literature which they may perchance contain, but the fragments of living, palpitating actuality which we may hope to recover from them. It will be a matter of regret if, while every scrap of any ancient book is forthwith treated as a sacred relic and published in facsimile whatever its inherent merit, the non-litary remains are only partially made known. Any trivial lease, for example, may perhaps contain a form of expression which supplies the long sought missing link between a form of the *kouvé* in its beginnings and another of a neo-Grecian dialect that has been developed therefrom.

(a) In the prevalent tendency to over-value the litary element it is not surprising that theological research should have found its chief enrichment in the fragments of biblical and old-Christian papyri. Christian books which have been recovered. It is certainly true that we have abundant cause to be thankful for every addition to our knowledge in what concerns texts and sources. The most important of the recent discoveries—at least so far as Greek is concerned—may be here briefly enumerated. Inexhaustive lists are given by C. Häberlin¹ and F. G. Kenyon.²

26. Heb. 1 1, Amherst Papyri, 36.¹
27. An amulet containing passages from Ps. 90 [91], *Ps.*, Rom. 12 and Jn. 2, in Archduke Rainer Collection, Inv. no. 8032 (Guide, no. 528).

E. Other Old-Christian Literary Texts.

28. Fragments of an extra-canonical Gospel (?), in the Archduke Rainer Collection: portions of the narrative of Peter's denial. A full discussion of this fragment with careful reference to the voluminous literature that has appeared regarding it will shortly be published by Dr. H. Müller of Paderborn.

29. The so-called Logia-Fragment, Oxyrhynchus Papyrus no. 1, published also separately as *Logia Inoue: Sayings of Our Lord from an early Greek Papyrus discovered and edited, with Translation and Commentary*, by Bernard P. Grenfell and Arthur S. Hunt, Lond., 1897. This fragment also has been the subject of a voluminous literature of which it is impossible to give an account here; an exposition of the questions which have been raised by this important discovery would far exceed the limits of our space. This, however, may be remarked: the crucial question is not as to the origin of the leaf (whether from the Egyptian or some other extra-canonical gospel or from some other writing) but simply as to the genuineness of the words of Jesus which it records—a question to be answered only on internal grounds. The present writer takes a more favourable view of them in this regard than is done by most of his fellow-workers.

30. Fragments of a Hebrew-Greek *Onomasticon sacrum* in the Heidelberg University Library.²

31. The Shepherd of Hermas, *Sim.* 2 7-10 u. 4 2-5, Berlin Museum.

32. Fragment of a book (by Melito of Sardes ?) upon Prophecy with a citation from the Shepherd of Hermas, *Mand.* 11 9 f.,³ Oxyrhynchus Papyrus, no. 5.

33. Fragment of a Gnostic (Valentinian ?) writing, Oxyrhynchus Papyrus, no. 4 verso.

34. Fragments of Basil of Cæsarea *ep.* 5, 6, 293, 150, 2, Berlin Museum.

35. Fragments of Gregory of Nyssa *θεωρία εις τον του Μουσεως βιον*, Berlin Museum.

36. *Vite Sanctorum*, Paris Musées Nationaux, no. 7403, 7404, 7405, 7408, and Fond du Faouon, no. 261.

37. Theological Fragments in Brit. Mus. Pap. no. 455.

38. *Ibid.* no. 113; neither this nor the preceding has as yet been fully determined.

39. Fragments of Cyril of Alexandria, *de adorazione in spiritu et veritate*, Dublin.

40. Cyril-fragments in the Archduke Rainer Collection.

41. Letter of a Patriarch of Alexandria to the churches of Egypt, with citations from the commentary of Cyril on the Gospel according to John, Brit. Mus. Pap. no. 729.

To this list have to be added several liturgical and homiletical fragments.

For theology great importance attaches also to the fragments, in Coptic, of biblical, gnostic, and other old Christian writings—such as the *Acta Pauli* in the Heidelberg University Library now being published by Carl Schmidt.

(b) The non-litary papyri also supply matter which is of direct importance for the study of Christian antiquity. This remark applies, to take one example, to those documents—ranging from the period of the Ptolemies down to the late Cæsars—which name Jewish inhabitants of the most various places in Egypt and thus contribute to our statistical knowledge of that cosmopolitan Judaism which so powerfully affected the spread of Christianity. Or again, those papyri which enable us to settle the chronology of the prefect Munatius Felix and thus to fix the date of an important work of Justin Martyr's (*Ἀπολογία ὑπὲρ Χριστιανῶν*); once more, the famous Libelli of certain libellatici which have reached us from the days of the Decian persecution are highly important documents from a great period rich in martyrs. Then, too, we have many private letters of otherwise unknown Christians which have long been published, but have never as yet received the attention they are well entitled to claim. Even the legal documents belonging to the Christian period contain in their formulas, and occasionally also in details of their varied

¹ The Louvre, Paris, possesses an as yet unedited fragment of the Epistle of Gizeh.

² About to be edited by the present writer.

³ So A. Harnack (*S.B.A.*, 1898, 516-520). In Kenyon, *Palaography*, 137, the fragment is given as a portion of the *Pastor Hermas* itself.

contents, many fresh contributions towards the history of Christianity.

In speaking in some detail of the importance these non-literary papyri have for the biblical student, their value for Greek philology in general—and especially for the study

of the Greek OT and NT—is what requires mention first.

Until the papyri were discovered there were practically no other contemporary documents to illustrate that phase and form of the Greek language which comes before us in the LXX and NT. In those writings, broadly, what we have, both as regards vocabulary and morphology, and not seldom as regards syntax as well, is the Greek of ordinary intercourse as spoken in the countries bordering on the Mediterranean, not the artificial Greek of the rhetoricians and litterateurs, strictly bound as it was by technical rules. This language of ordinary life, this cosmopolitan Greek, shows unmistakable traces of a process of development that was still going on, and in many characteristic respects differs from the older dialects, as from the classical Attic. It is true that a few extra-biblical specimens of this later Greek were not wholly wanting; there were for example inscriptions dating from the period of the Diadochi and Roman emperors, the vocabulary of which often shows surprising affinities with that of the OT and the NT. Hardly any attention was given to these, however, with the result that a widespread opinion arose—it may be said to be the prevailing opinion even now—that the Bible or at least the NT is written in a special kind of Greek—called 'biblical' or 'New Testament' Greek. Prof. F. Blass, as recently as 1894,¹ laid it down that NT Greek 'is to be regarded as something by itself and following laws of its own.' This thesis is a factor of great potency in exegesis, especially in that of the NT, and at the same time a refuge and shelter for everything that is arbitrary and devoid of method. It will not, however, be able to hold its ground long in presence of the papyri. It is one of the pre-eminently valuable results of the recent finds—with which we may also group the ostraka² and inscriptions, that they correlate the Greek OT and NT with other contemporary texts, and compel what used to be called *Philologia Sacra* to become in the best sense of the word secular.

A few special points may be particularised.

(a) The papyri render possible a full realisation of the fact that the LXX is an Egyptian book. The fact itself of course is not new; but it is by the unearthing of these hundreds of leaves which we now possess, written under the same sky, in the same air and at the same time with the venerable Bible of the Jewish Dispersion and of the most ancient Christianity, that we are able in imagination to restore the book once more to its original home. Every translation involves alteration. Luther's Bible is a German Bible not merely because it is a rendering in German but also because it could not pass through the mediating mind and genius of its great translator without receiving some impress of his personality. So in like manner the LXX was not merely a rendering into Greek, it is also an Egyptianising of the OT.

If in the MT of Gen. 50:2f. we read of 'physicians' who embalmed the body of Jacob and the translator has called them 'embalmers' we see in this an added detail due to the influence of their surroundings; ἐνταφιαστῆς was, as a papyrus dating from 99 B.C. informs us, the technical name for the functionary whose business it was to embalm.³ Or when חַיִּים יְבִינִי in Joel 1:20, and חַיִּים יְבִינִי in Lam. 3:47 are rendered ἀφέσεις ὑδάτων we have again an Egyptianising trait: a papyrus of 258 B.C. shows us that ἀφέσεις τοῦ ὕδατος was the technical expression for the freeing of water by opening the Nile sluices; the translators lead the Egyptian reader who knows no water-courses to think of canals.⁴

² U. Wilcken, *Griechische Ostraka aus Aegypten u. Nubien*, 2 vols., 1890. Cp *Theol. Lit.-Ztg.* 26 (1901) 65 ff.

³ Deissmann, *Bibelstudien*, 117 (ET *Bible Studies*, 120 f.).

⁴ *ib.*, *op. cit.* 94 ff. (98 ff.).

(b) The papyri render possible a more accurate investigation of the orthographical problems which come before the editor of the canonical texts.

For copious illustrations on this point, see Deissmann, *Neue Bibelstudien*, 9 ff. (= *Bible Studies*, 181 ff.) and Moulton (*Grammatical Notes from the Papyri*, 31 ff.; *Notes from the Papyri*, 281).

(c) The same remark applies to the morphological problems (Deissmann, *Neue Bibelstudien*, 14 ff., ET 186 ff.; Moulton, *Gramm. Notes*, 34 ff.; *Notes*, 281 f.).

(d) The syntax also of the biblical texts is brought into a clearer light (Deissmann, *op. cit.* 22 f., 194 ff. and Moulton, *op. cit.* 282).

For instance, we know¹ from the NT of the manner of expressing a distributive by a repetition of the cardinal number: καὶ ἤρατο αὐτοὺς ἀποστέλλειν δύο δύο (Mk. 6:7). This usage, which we find Blass² still declaring to be Semitic, can be traced back to pre-Christian times: we find δύο δύο already in the LXX (Gen. 7:15 and often³). The same usage survives in new Greek. But Karl Dieterich⁴ in adducing an instance from the long interval between NT times and the period of the rise of the New Greek from the *Apophth. Patr.* (500 A.D.) desiderates some instance from inscriptions or papyri. An Oxyrhynchus Papyrus (no. 121) now supplies the missing link: a certain Isidorus writes to a certain Aurelius that he is to tie the twigs into bundles of three apiece (εἶνα δέση τρία τρία).

(e) Most notably of all is the Lexicon of the LXX and NT enriched by the new discoveries. In this region the unhistorical conception of 'biblical' or 'New Testament' Greek characterised above is still very widely prevalent. One of the main supports of such a conception has been the existence of so many 'biblical' or 'New Testament' ἅπαξ εἰρημένα. These words, so it is asserted, make it abundantly clear that the language of every-day life was inadequate for the needs of the apostolic preaching; Christianity had to coin new words. Now, it is of course self-evident, from the point of view of scientific philology, that Christianity, like any other new movement affecting civilisation, must have produced an effect upon language by the formation of new ideas and the modification of old ones. But we are not on that account forthwith justified in isolating a biblical or Christian 'Græcitas.' Many of the so-called biblical ἅπαξ εἰρημένα are, as might have been conjectured before, merely ἅπαξ εὐρημένα which remained so only until an inscription, a papyrus, or a passage formerly overlooked happened to show the anxiously treasured word-jewel to have been the property of 'profane' Greek as well.

The following words still stand in the Lexica as special biblical words, but as recent study informs us, are not so in point of fact: ἀγάπη, ἀκατάγνωστος, ἀντλήμπτωρ, ἐλαιῶν, ἐναντι, ἐνώπιον, ἐνάρεστος, εὐλάτος, ἱερατεῖα, καθαρίζω, κυριακός, λειτουργικός, λογεῖα, νεόφυτος, οὐλεῖν, περιδέρειον, ἀπό πέρυσσι, προσευχή, πυρράκης, στομῆτριον, φιλοτροτεῖα, φρεναπάτης.⁵ This list could even now be enlarged.

It is further to be observed that a large number of words to which it has been customary⁶ to give specifically 'biblical' or 'Christian' special meaning can now be shown to bear the same meaning also in contemporary extra-biblical sources. In particular, the category of lexical 'Hebraisms' must, in the light of the knowledge now available, be subjected to a careful revision.⁷

(f) There is yet another aspect of the value of the papyri for the student of the OT and NT and of early Christianity on which a word or two ought to be said: their value, namely, as illustrating the character of a considerable part of the field in which the first missionaries in the discharge of their world-mission first sowed their seed. The men of the period of the 'fulness of the time' (Gal. 4:4) are made to live again before our eyes in these

¹ Cp *Theol. Lit.-Ztg.* 23 (1898) 630 f.

² *Gramm. des NTlichen Griechisch*, 141.

³ Winer-Linemann, *Gramm. des NTlichen Sprachidioms*, 234, refers to Æsch. *Pers.* 981: μυρία μυρία=κατὰ μυριάδας.

⁴ *Untersuch. zur Gesch. der Griechischen Sprache=Byzantinisches Archiv*, 1:188 (Leipzig, 1898).

⁵ The proofs will be found for the most part in Deissmann, *Bibelstudien* and *Neue Bibelstudien*.

⁶ See, for example, Hermann Cremer.

⁷ See art. 'Hellenistisches Griechisch' in *PRE* 3:7 627-639, especially 637 f.

priceless leaves; with their toil and their cares, their farness from God and their yearning after him;—especially the men of the middle and lower class, to whom the gospel was chiefly addressed and amongst whom it won its chief triumphs. If the Bible student has more than a merely philological interest in what he studies, and has an eye capable of discerning more than the merely superficial aspects of things, he will find himself a large gainer by the study of the papyri in all that relates to the history of Christian religion and civilisation. The value of such gain does not need to be insisted on here.

An excellent introduction to the study of the papyri will be found in the little work of Ulrich Wilcken (*Die griechischen Papyrusurkunden*, 1897). For the palaeography see F. G. Kenyon, *Pal.*, 1899. For the history of papyrus as writing-material see K. Dziatzko, *Untersuchungen über ausgewählte Kapitel des antiken Buchwesens*, 1900; Th. Birt, 'Zur Gesch. d. antiken Buchw.' in *Centralblatt für das Bibliothekswesen*, 17 (1900) 545-505; R. Wünsch, *Berliner philol. Wochenschrift*, 21 (1901) 684-692. The most careful account of the Papyri publications and of the literature connected with them is that of Paul Viereck ('Bericht über die ältere Papyrusliteratur' in *Jahresber. u. d. Fortschritte der klassischen Alterthumswissenschaft*, vol. 98 (1898), 3135-186, and 'Die Papyrusliteratur von den 70er Jahren bis 1898' in the same work, vol. 102 (1899), 3244-312). Everything further that may be required will be found in the *Archiv f. Papyrusforschung u. verwandte Gebiete*, edited by Ulrich Wilcken (1900 ff.). In their biblical aspects the Papyri are discussed by G. Adolf Deissmann (*Bibelstudien*, 1895, *Neue Bibelstudien*, 1897; both done into English by A. Grieve in *Bible Studies: contributions chiefly from Papyri and Inscriptions to the history of the Language, the Literature, and the Religion of Hellenistic Judaism and Primitive Christianity*, 1901). Further similar studies were given by J. H. Moulton in 'Grammatical Notes from the Papyri' in *The Classical Review*, 15 (1901), 31-38 and in 'Notes from the Papyri' in *The Expositor*, April, 1901, 271-282. Cp also G. A. Deissmann, *Die sprachliche Erforschung der griechischen Bibel, ihr gegenwärtiger Stand und ihre Aufgaben*, 1898.

G. A. D.

PARABLES. [The wide use of 'parable' implied in the EV of Nu. 23 7 (וַיִּקַּח אֶת הַפָּרָבָה), 'and he took up his parable']

1. Meaning of word. is unfortunate. מִשְׁלָל (*māsāl*) is an elastic word, and will not bear a single rendering. It was a pointed, veering speech that Balaam pronounced, with the authority of a soothsayer, not a 'parable.' What is a 'parable'? It is easier to define than *māsāl*, and yet a single definition will hardly cover all phenomena. König, in his instructive work, *Stylistik, Rhetorik, Poetik in Bezug auf die Biblische Litteratur* (1900), defines it as a narrative whose subject is personal but unnamed, and which is feigned in order to present something [didactically important] with special vividness (89). In this sense five sections of the OT are, according to him parables, viz. 2 S. 12 1-4 14 6 f. 1 K. 20 39 f. Is. 5 1-6 28 24-28 (but the last is no narrative). Ezekiel's 'parables' are expressly called מִשְׁלָלִים (*māsālim*); see Ezek. 20 49 24 34, and though in the latter passage the Tg. renders by פְּרֹפְתִי, 'a prophecy,' there can be no doubt that 24 36-5 is virtually a narrative; the commands are given to an unnamed person, who is of course supposed to carry them out. Parabolic actions do in fact come as close as possible to narratives; 24 36-5 may fitly be grouped with 3 26-26, and 4 1 ff. (see EZEKIEL, BOOK OF, § 9). It is worth noticing that the Syriac *mathla*, which exactly corresponds to *māsāl*, is used for παραβολή in Mt. 13 18 31 33. etc., 21 45 Mk. 4 2, etc., Lk. 5 36 6 39 14 7 etc., and the use of *mathla* in this sense is frequent in the Talmud. It is not, however, of the OT parables, nor yet of those of the Talmud, that the reader will be thinking when he turns to the present article, but of those of the NT, with which, if opportunity permitted, it would be helpful to compare the highly original parables (e.g., those of the sower and the mustard-seed) of the Buddhist literature.]

The word 'parable' occurs twice in the NT (Heb. 9 9 and 11 19) in a sense almost synonymous with type, or antitype, or figure—the lesser thing or event whereby some greater future thing or event is foreshadowed. Abraham by faith receives back in 1 'parable' his son Isaac whom he has offered in sacrifice, that is to say, he receives him as a prophecy of the risen Christ; and the tabernacle was but a 'parable' of the time that is now, a type of the era of salvation. In both passages παραβολή is used as a terminus technicus of that artificial exegesis which by application of an allegorising method discovered a new and deeper meaning in the persons and events of the OT: comp. Gal. 4 21 ff., where Hagar and Sarah,

without any implied denial of their historical existence as wives of Abraham, are understood as signifying respectively the covenant of Sinai, of which the essence is bondage, and the new covenant with its heavenly freedom.

The remaining passages of the NT where the word parable occurs are all in the Synoptic Gospels: Mk. 4 Mt. 13 Lk. 8 make it clear that these

3. Parables of the Synoptists. evangelists regarded the parable as a form of teaching largely used by Jesus. Twenty utterances—three common to all and two common to two—are expressly called parables by the Synoptists; but the omission of the designation in connection with other similar utterances is only accidental: some interpreters have chosen to find as many as 100 parables in the gospels, and even a cautious enumeration brings the number up to about 60. Alike in compass and in character they vary greatly; from the short saying, such as (Lk. 4 23) 'Physician heal thyself,' up to the story of the Prodigal Son, contained in twenty-two verses of Lk. 15, all sorts are represented.

The element they possess in common, according to the evangelists, is their figurative, metaphorical character, —the fact that they signify something

4. Evangelists' conception. different, something deeper, than the words at first sight convey,—that, accordingly, like the allegory taken up in Gal. 4 21 ff., they need an explanation, a key. An example of such explanation is offered in Mk. 4 14 ff. Mt. 13 18 ff. Lk. 8 11 ff., in connection with the parable of the sower, according to which the seed is the word of God, those by the wayside are the hearers out of whose hearts Satan snatches away that which has been sown as soon as it has been heard, and so forth. Still more striking is the interpretation of the parable of the tares which is given at the disciples' request, Mt. 13 37 ff.: the sower is the son of man, the field is the world, the good seed are the children of the kingdom, etc.; trait after trait in the parable is referred back to its true meaning which lies concealed behind the words when taken literally. Exactly the same thing is intended in Jn. 16 25 29 where Jesus is represented as speaking to his disciples in similitudes (*ἐν παροιμίαις*), and as indicating that frank utterance is reserved for a coming time; the similitude (*παροιμία*) of Jn. 10 6 (of the door and the shepherd), as also the figure of the vine and the branches (15 1 ff.), are regarded by the fourth evangelist as identical in nature with the parables of the synoptists. It is worth noticing, however, that, according to him, Jesus employed this form of figurative speech in speaking to his disciples; whilst, according to Mk. 4 Mt. 13 Lk. 8, it was exclusively reserved for the unresponsive masses—'without a parable spake he not unto them'—but when they were alone he explained all to his disciples (Mk. 4 34); the parable is of the nature of a riddle spoken so that it may not be too easily understood, it is intended to hinder conversion—in fact, to harden (Mk. 4 11 f.).

Mt. after his fashion finds this purpose already indicated prophetically in Is. 69 f. and, of parabolic speech generally, in Ps. 78 2; but he cannot express its hardening tendency more bluntly than it had already been expressed in Mk.

It is plain, however, that we have to do here with an artificial construction [cp GOSPELS, § 128 g, col. 1866].

5. Real purpose. In fact there survive in Mk. 4 33 traces of another view, however Mk. himself may have understood the words: 'with many such words spake he the word to them as they were able to hear it,' that is to say, by means of the parable he condescends to make it easier for them to understand the mysteries of the kingdom of heaven. Indeed, the evangelists are betrayed into self-contradiction, for they by no means represent Jesus as speaking to the masses of the people only in parables; see, among other instances, Mt. 5-7 23; further, according to Mt. 21 45, for example, the high priests and Pharisees, who surely deserved no better treatment than the common people,

are represented as having 'understood' the parables that were addressed to them; and, lastly, Jesus often enough avails himself of the parable within the circle of his disciples, as, for example, even in Mt. 13.44 ff. 47 ff.; and no more, in those cases, than in Mk. 2.19-22 where he seeks to justify his disciples for their omission of the observance of fasting, can it have been his purpose to conceal his meaning. Moreover it is inconceivable that Jesus who, in the parable of the sower, whilst recognising the existence of very different kinds of hearers, sees among them none who ought to be unable to understand at all, should have desired thus rigidly to exclude the masses from salvation—the masses who flocked to him so eagerly for the word, who, moreover, according to Mt. 21.46 held him for a prophet (so ardently, that the Pharisees out of fear of them were compelled to hesitate in their plans for his death), and (Mt. 22.33) were 'astonished at his doctrine'—it is inconceivable that he should have so desired when, as we read in Mk. 6.34, moved by compassion for the sheep having no shepherd, he 'began to teach them many things.'

If, however, the evangelist's conception of the end for which the parables of Jesus were used must be given up as unhistorical, so also, along

6. Nature of the parables. with it, must we abandon their views of the nature of these parables.

If Jesus did not make use of parables with the sole purpose of veiling his meaning, but rather precisely in order to make it clear, elucidating new truth by means of the familiar and commonly known, then the parable does not belong to the same region of things as the allegory, where an interpretation is requisite, but comes under the same category as the similitude and the fable; it is, as the etymological meaning of the word implies, that form of speech in which two statements or series of statements, resembling one another yet drawn from distinct spheres of observation, are laid alongside of one another.

The parable, in fact, is an amplified comparison. When Jesus (Mt. 10.16) said, 'be ye wise as serpents,' or (17.20) spoke of having 'faith as a grain of mustard seed,' it was not to set his hearers a-searching for some deeper occult meaning of the words 'serpent' or 'mustard seed,' but only to bring these familiar images vividly before their minds so that, thus helped, their imagination might be better able to realise the amount of wisdom and the degree of faith he meant to suggest. If in Mk. 19.24, in order to give a vivid impression of the difficulty the rich man has to overcome in entering the kingdom of God, Jesus hyperbolically compares it with the difficulty of a camel (see CAMEL, § 5) in passing through the eye of a needle, it is precisely in the same manner and with the same effect that in Mk. 13.28 ff. he uses the parable of the fig tree; the certainty with which the observer is able to conclude from the appearance of the young and tender shoots of the fig tree that summer is coming, is paralleled by the certainty with which we may be sure that the signs of the coming parousia will be followed immediately by the parousia itself. It is not meant that the parousia is like summer, or that the tender shoots of the fig tree have any resemblance to the troubles of the last days; the point is that the symptoms of the coming irresistibly lead to the coming itself; the law with which every one is familiar in its relation to summer ought to be applied also with reference to the parousia. A 'similitude'—and half the gospel parables are simply similitudes—its simply consideration of *one* thing or *one* aspect, extended by way of comparison to the relation of *two* things or aspects. It is not necessary that the two halves of a comparison, both of which require to be understood, should each of them admit of being in every case elaborated with scrupulous minuteness.

In Mk. 2.17 it is true that the proposition enforced—namely, that Jesus came into the world not for the righteous but for sinners—falls into exact parallelism with the corresponding proposition that the physician exists not for those who are well, but for those who are ill. But for Mk. 2.19 one must first go to v. 18 for the parallel to the thesis about the children of the bride-chamber not fasting as long as the bridegroom is with them; in the two parables of the old cloth on the new garment and of the

new wine also (vv. 21 f.), it is left to the reader himself to exercise his own intelligence in finding out why the folly of patching a new garment with an old rag is brought thus vividly before him.

Sometimes there is simply a general indication of a sphere of things wherein the course of events is similar and where similar laws prevail, as, for example, the familiar sphere of husbandry (Mk. 4.26 f.: the kingdom of God is as if a man, etc.; Mk. 4.30 f.: whereto shall we liken it? It is like a grain, etc.) where the formulas that are used indicate clearly enough the simple point of comparison that lies at the root of the parable.

Again, a large number of the parables of Jesus are in narrative form—e.g., Mk. 4.3 (the sower), Mk. 12.1 ff.

7. Narrative parables. (the wicked husbandmen), and especially some of those which are peculiar to Lk. (15-19). These last, indeed,

admit of being classed by themselves as a separate group; they are exactly what in profane literature are usually called fables. The desire for visual presentation here goes one step farther than in the ordinary similitude; the law which is represented in the latter as being, within its own field, of general validity, is in the other case individualised, in the living form of a story that makes a deeper impression; it is set forth in a concrete instance which helps it to carry conviction to the mind in the higher sphere of religious truth.

Here the parable does not speak of old wine or new bottles in general, but of a certain father who had two sons, and who passed through certain experiences which are described, of a certain nobleman who went into a far country and handed over his monies to be managed for him by his servants in his absence, and so forth. Here again the nobleman, his talents, his servants, and the rest, do not mean anything different from what the words ordinarily convey, but the same judgment as we are led to form on hearing the story we are called on to extend to similar conditions of things in the religious sphere; from the lower we must learn to ascend to the higher truth.

A special variety of this second form of parable is represented in four examples in Lk.: the Good Samaritan

8. Illustrative instances. (10.30 ff.), the Foolish Rich Man (12.16 ff.), the Rich Man and Lazarus (16.19 ff.), the Pharisee and the Publican

(18.9 ff.). Like the others they are narratives; but here the narrative moves from the beginning on the higher religious and ethical plane, the laws of which are to be set forth; the story is itself an instance of the proposition to be demonstrated. Here there is neither comparison nor allegory, there is no 'laying alongside' of two things that they may be compared; if we are precluded from using the word 'parable' we must call them illustrative instances which establish an abstract religious or ethical truth by the evidence of a concrete case. But any one finding parabolic stories in which the comparison with the higher reality was entirely left to the imagination of the readers placed in close juxtaposition with illustrative instances which in outward form are not distinguishable from them (cp Lk. 15.11-32 and Lk. 18.9 ff.) might very easily regard the two sorts as identical.

The frequent omission of the second half of the parable—the half in which the precise 'mystery of the kingdom of heaven' which it sets forth is

9. Mistaken exegesis. explicitly defined—also explains why it was that the character and object of the

parables of Jesus was so early misunderstood. Men found it impossible to imagine that the Saviour of the world should have indulged in long narratives drawn from the events of everyday life, and even narratives of the triumph of unrighteousness if only it is associated with cleverness (Lk. 16.1 ff.), almost (it would appear) for mere purposes of entertainment, or that he should have seriously directed the thoughts of men to such trifling matters. With him, it was thought, every word ought to speak of the kingdom of heaven, and of the way to everlasting life. In this way a second meaning came to be attached to his parabolic utterances; they were allegorised so that they no longer (in spite of the words) spoke of husbandry or fishing, but of God and his word; that which in the intention of the speaker

was to be suggested by them and thought of in connection with them, was actually introduced into them. Having thus been turned into dark and mysterious utterances, they now had assigned to them quite a different purpose from that which they had fulfilled when they were used as aids to clear understanding and to conviction: the purpose, namely, of concealing the truth from the uninitiated.

By this misapprehension endless difficulties for the understanding of the parables were created; the history of the exegesis of the gospels from the earliest antiquity downwards to the present day hardly anywhere shows so great confusion, and so immense a variety of interpretations, as it does in the case of the parables.

Whilst some interpreters, following the example of interpretation (which is due to the evangelist only) given in Mt. 13³⁷ ff., exercised all their ingenuity in discovering in a rigorously consistent manner the deeper meaning of even the smallest detail—as, for example, in Lk. 15²², to find the spiritual significance of the robe, the ring, and the shoe—the exegetic tact of others perceives the futility of such an undertaking and contents itself with giving the meaning of the essential features; but in doing so the parable is made a bizarre and inartistic mixture of literal and figurative speech.¹

Here again, as in so many other points, it is possible for us to reject the synoptists' view of the matter and yet retain our confidence in the trustworthiness of their tradition.

10. Genuine-ness.

That they have handed down to us fully and without alteration the parables as spoken by Jesus is indeed a proposition that no one will venture to maintain. That there must have been at least some alteration is conclusively shown by the variations observed in the parallel traditions preserved by different evangelists: for example, in Lk. 15⁴ ff. as compared with Mt. 18¹² ff., or in Lk. 19¹² ff. as compared with Mt. 25¹⁴ ff. The very fact, however, that the parables, as given by the evangelists, have retained so much that is absolutely incompatible with their theory about them, proves conclusively how conservative has been the evangelists' treatment of the materials lying to their hand; the same thing is evidenced by the admirable clearness, the lively and vivid naturalness, which distinguish the gospel parables as soon as they are correctly apprehended, and cleared of some accretions due to those through whom they have been handed down. Most of them unmistakably declare themselves to be creations of a unique originality, and what makes them of very special importance for us is that almost throughout they bear unmistakable evidence of genuineness, and thus tell us with no uncertain voice that which lay nearest to the very heart of Jesus.

Among older exegetes the palm for textual elucidation is carried off by Chrysostom, Calvin, and the Jesuit Maldonatus.

Of recent monographs the following may be mentioned. (*German*): F. L. Steinmeyer, *Die Parabeln des Herrn*, 1884 (strongly allegorising, but original); F. Göbel, *Die P. Jesu methodisch ausgelegt*, 1879-80 (steers an intermediate course); A. Jülicher, *Die Gleichnisreden Jesu*, 1. ed. [generally] 1899; ii. [expository], 1899. (*Dutch*): C. E. Van Koetsveld, *De Gelijknissen van den Zaligmaker*, 1869, 2 vols. fol. (an exposition distinguished by learning and fitness of conception, but unfortunately without criticism of the evangelical tradition). (*English*): E. Greswell, *An Exposition of the Parables of our Lord*, 5 vols, 1834 ff. (vast accumulation of materials); R. C. Trench, *Notes on the Parables of our Lord*, 1841; 141, 1880 (very able, but does not keep within the limits itself lays down); A. B. Bruce, *The Parabolic Teaching of Christ*, 1882 (sounder in exegesis than Trench, yet hardly clear enough in principle). A. J.

PARACLETE. The word ΠΑΡΑΚΛΗΤΟΣ is met with, in the NT, only in the Johannine writings (Jn. 14²⁶ 15²⁶ 16⁷ 1 Jn. 2¹).

In Job 16² אֲנִי, and Theod. use it to render אֲנִי, while Ⓞ has παρακλήτωρ (see below § 3); and in Zach. 1¹³ Ⓞ renders אֲנִי by παρακλητικός.

¹ B. Weiss, in his commentaries on Mk. and Mt. (1872, 1876) was the first to break with this method in principle; but unfortunately he failed to see clearly enough the impossibility of holding to the theory of a hardening tendency as applied to a form of speech which was expressly designed to make the subject-matter plainer.

From its form (cp κλητός, ἐκλεκτός) the word can only have a passive meaning: 'called in,' 'summoned to help.' The Itala translates *advocatus*, and in classical Greek—it

1. The term. does not occur in the LXX—it usually signifies one who defends before the judgment seat, the counsel for the defence; it has even found its way into the Targum and into Talmudic Hebrew. One of the examples of its use in the Targum is specially interesting, because it suggests a point of contact between the NT expression and a late portion of the OT. In the speech of Elihu (a late insertion in a late book—see Job [Book] § 12), we find that in order to produce repentance, and so to 'redeem a man from going down to the pit,' a special angelic agency is required—that of a 'mediator' or 'interpreter'¹ (Job 33²³ f.). For this 'interpreter' the Targum has אֲנִי פִרְקֵי (= παράκλητος). The opposite agent in the Talmud is אֲנִי פִרְקֵי (= κατήγορος).

In 1 Jn. 2¹ the rendering 'advocate' for παράκλητος is demanded by the context: 'if any man sin' (and so has

2. Usage. exposed himself to the condemnation of the divine Judge), 'we have an advocate with the Father, one to speak for us, even Jesus Christ the righteous; and he is a propitiation for our sins'—a mode of representation that would very naturally present itself as soon as the idea of the atoning death of Jesus, along with that of his return to the right hand of the Father, had begun to bear its fruit in the consciousness of believers.

In the Fourth Gospel, however, it is not Christ who is designated as the Paraclete; on the contrary, Christ distinguishes the Paraclete in the clearest possible way from himself as well as from the Father; the word there is a name (of which no further explanation is given) for the Spirit of Truth, or the Holy Spirit, which the exalted Redeemer is to send to his disciples 'from the Father'—i. e., from the place where the Father is ('who cometh forth from the Father,' 15²⁶ 16⁷), or, otherwise, whom the Father is to bestow on the disciples, at his intercession and in his name, as an enduring possession. This Spirit the world will be unable either to see or to know; unlike the Son he will descend unseen, and his remaining with the disciples is more precisely spoken of as an indwelling in their hearts (14¹⁷). His work—as spirit of truth, it could not be otherwise—is to testify of Christ (15²⁶), to bring to the remembrance of the disciples all the words of Christ, and to instruct them in all things; in other words, to carry on Christ's work uninterruptedly during the period that intervenes between his lifting up and their final reunion with him; indeed, to bring that work to perfection on a higher level—according to 16¹³ to lead the disciples into all truth—inasmuch as Jesus, while with them, out of consideration for their weakness had been compelled to leave much unsaid (16¹²). The counterpart of his exalted work in the disciples is that which he exercises towards the world, where he has the function of an ἐλέγχων (AV 'reprove,' RV 'convict') which he executes in three decisive points—sin, righteousness, judgment. A further indication of the magnificence of the part assigned to the Paraclete in the Fourth Gospel is given in 7³⁸ f., although the use of the name is there avoided.

Why now does this Holy Spirit, through whom, though dependent on the Son as well as on the Father, the work of God in believers is to be

3. Interpretation. brought to its completion, receive the name of Paraclete? The evangelist cannot merely have taken over the name from some source or other without further consideration as to its meaning; in 14¹⁶, the place where it first occurs, he speaks of him as another Paraclete; this does not necessarily imply that he wished to keep the title of παράκλητος for Christ also, but he must have meant at least that this other Paraclete was now to begin discharging in a fuller measure the functions of a παράκλητος towards the disciples, whose fear is that they are about to be left orphans. In this there is not any idea of a vicarious presence of Jesus, any more than

¹ See Delitzsch, *Hiob*(2), 441; Chene, *Job and Solomon*, 44 f. [See Job (Book), § 12, col. 2484. Whatever the original reading may have been, the author of the present reading thought of an angelic Paraclete.]

there is of his being God's representative with men God never needs any advocate or spokesman. Older and better grounded is the interpretation of *παράκλητος* as meaning Comforter, or more generally, Exhorter, 'one whose office is *παράκλησις*.' In the farewell discourses of the Master the reference to a Comforter as about to be sent would be indeed appropriate, and from Origen onwards many Greek exegetes have advocated this interpretation. Since Aquila and Theodotus actually substitute for the *παράκλητος* of Job 16 *παράκλητοι*, it seems to be made out that in late Greek usage the lexical impossibility involved—that of taking *παράκλητος* actively, just as if it were *παρακαλῶν*—had actually become possible. We have no reason, however, for expecting to find in Jn. any other meaning of the word *παράκλητος* than that which it has elsewhere. It is indeed true that in no place does he point at the work of the Spirit as being to defend believers in the judgment,¹ in the manner in which we find this attributed to the son in 1 Jn. 2:1; but just as the Latin *Advocatus* often occurs in a more generalised sense as equivalent to 'helper' or 'protector,' we find similar instances also in the case of *παράκλητος*; in Philo, who frequently makes use of the word, it is sometimes to be taken in the broader and sometimes in the narrower sense (see Hatch, *Essays in Biblical Greek*, 1889, p. 82 f.); in *De mundi opif.* 6, the only feasible meaning is even something like 'instructor,' 'adviser.' Just so is the word employed in the gospel; in place of the Son about to return to the Father, the seemingly forsaken disciples are to receive the *patronus*, the 'helper' *καρ' ἐξοχήν*, the spirit of truth, who will take them up and lead them on, in the struggle for light and life, step by step, from victory to victory.² A. J.

- Literature (§ 16).

The Hebrew *Pardēs*, פֶּרְדִּים (Syr. *pardaisā*, Gk. ΠΑΡΑΔΕΙΣΟΣ) is from Old Pers. *pairidaēza*, 'an enclosure, a place walled in' (see Justi, *Handbuch der Zendsprache*).

The word occurs in Neh. 2:8 Cant. 4:13 Eccles. 2:5 in the sense of 'park'; in Gk. *παράδ.* = ἄ, 'garden' (see GARDEN, begin.).

Evidently *παράδ.* suggested the idea of abundance of water (cp Eccles. 2:30 f.; Susan. 15 [Theod.]); the 'tree of life' and the 'water of life' naturally go together. On the occurrence of the

¹ B. W. Bacon (*JBL*, 1896, pp. 64 ff.) thinks that *παρακλ.* in Jn. 15:26 (the first occurrence of the word, according to his theory of the displacement of Jn. 14) may have the ordinary sense of an advocate, or helper, before a human tribunal. He regards Jn. 15:18-16:4 as a recast or paraphrase of Mt. 10:16-25. In the opposition which the Church will encounter from the world in her witnessing for Christ, she will be assisted by a divine Paraclete, who 'will testify' of Jesus; 'for it is not ye that speak, but the spirit of your Father which speaketh in you' (Mt. 10:20).

² Following up a suggestion of Gunkel, Zimmern (in *Vater, Sohn, u. Fürsprecher in der babylonischen Gottesvorstellung*, 1896; see especially p. 13, n. 1) has recently raised the question whether the Jewish-Christian doctrine of the Paraclete may not contain elements of Oriental speculation; he recalls what the Babylonian fire-god does, acting as the advocate of men at the instance of Ea and Marduk. It is to be remarked, however, that the idea of a heavenly being engaging in the work of intercession for men is of such wide diffusion (see, e.g., Job 33:24, quoted already, which certainly looks like a purely Jewish passage) that we cannot take the Babylonian Nisuku as its source; and, moreover, in the Fourth Gospel no intercessory function is attributed to the Paraclete. The name Paraclete, at any rate, will certainly not be of Babylonian origin; Jn.'s employment of it is sufficiently explained, if explanation is needed, from his acquaintance with Philo or with the Philonic theology; in Philo, however, it occurs (*Vit. Mos.* 314), not as the designation of a third person in the Godhead, but as a predicate alongside of *τελειότατος τὴν ἀρετὴν υἱός*, which reminds us only of 1 Jn. 2:1.

word *pardesu* in Assyrian, see *PSBA*, Dec. 1896; *Z.* 1 6 290, and on the late non-literary Greek usage, cp Deissmann, *Bibelstudien*, 146. At the present day, τὸ παράδεισος is still the popular term for the valley descending southward from the sacred hill-forest at Idalion in Cyprus (Ohnefalsch-Richter, *Λύβρος*, 110).

A 'paradise' is properly a garden or orchard; but we shall here restrict ourselves to what we may quite simply and naturally call the mythical Paradise, a belief in which sprang up ages before the birth of history, and the significance of which is independent of historical criticism. There are many mythic paradises; the region in which that of the Hebrews was located bears the name of עֵדֵן, 'Eden,' Gen. 2:8 10 4 16 (*עֵדֵן*). Hence Paradise itself is called עֵדֵן עֵדֵן, 'the garden of Eden,' 2:15 (*παράδεισος*), 3:23 f. (*παράδ. τῆς τρυφῆς*, so G¹ in 2:15), Ezek. 36:35 (*κήπος τρ.*), Joel 2:3 (*π. τρ.*), or more shortly עֵדֵן, 'Eden,' Is. 51:3 (*παράδ.*), Ezek. 28:13 31:9 16:18 (*ἡ τρυφή*). In Eccles. 40:27 the Heb. text says that the fear of God is 'like Eden a blessing'—*i. e.*, full of blessing (ברכה, בְּרָכָה). We also find Paradise described by the phrases (עֵדֵן אֱלֹהִים), 'the garden of Yahwē' (or 'of God'), Gen. 13:10 Is. 51:3 Ezek. 28:13; and 'the holy mountain of God,' Ezek. 28:14.

Sound critical method requires us to begin by ascertaining the form or forms of the Hebrew tradition, and in

2. Method of inquiry. classical passages respecting Paradise in Ezekiel and in Genesis. We can build

to some extent on what has been already said in other articles (see CHERUB, §§ 2, 6; CREATION, § 20; DELUGE, § 17), and here as elsewhere the amount of reference to modern scholars and investigators is no measure of our obligations to them for stimulus and instruction. It has been necessary, however, to do all the critical work afresh from the first. A mere register of what is stated in books is not illuminative; in a continually advancing study we cannot be bound by authorities.

At the point which we have now, as a body of workers, reached, an enlargement of our methods is enforced upon us. It is our slowness to act upon this which is almost the chief hindrance to our progress in biblical study. Old methods, where sound, must not indeed be renounced, but new methods must be applied, and that on an extensive scale (to avoid hasty conclusions), for it must be confessed that even critics whom one could not justly call unmethodical, have often gone astray through relying too much on a single method, and deciding questions before the whole body of facts lay spread out before them.

(a) As to Ezekiel. In certain very remarkable passages of this prophet,² two royal personages are

3. Ezekiel's Eden. 'Eden, the garden of Elohim'—the wise and wealthy king of Tyre (28:12 f.) and Pharaoh, king of Egypt (31:8 f. 11 16 18). Why this metaphorical description is selected for these two kings is not clear. The king of Egypt, in particular, seems misplaced there, for the Jews cannot be supposed to have known that the Egyptians had their own very full conception of the supernal Paradise,³ and geographically the OT Paradise is specially Asiatic. And why too should it be said that the king (or 'prince,' as he is strangely called in 28:2) of Tyre was perfect in wisdom (*vv.* 3-5 7 12 17)? The explanation we can offer is one which would be very surprising if there were not parallels for it both in the prophetic and in the narrative books. The prophecies in Ezek. 26-32 have probably been edited by some later writer than Ezekiel, and made to refer to Tyre and Egypt, whereas originally they referred to the king (or prince) and people of the N. Arabian Mušri.⁴ The case is precisely similar to

¹ Cp *אֱבֵרָוֹן*, אֱבֵרָוֹן; אֱבֵרָוֹן, אֱבֵרָוֹן.

² Cp the commentaries of Smend, Bertholet, Kraetzschmar; also Toy's Hebrew Text and new translation in *SBOT*. See also Gunkel's *Schöpfung und Chaos*, 146; *Genesis*, 30 f.

³ The Field of Ialu (see Maspero, *Dawn of Civ.* 168, 180, 183, 196).

⁴ אֱבֵרָוֹן has been altered from אֱבֵרָוֹן, and אֱבֵרָוֹן should be pointed אֱבֵרָוֹן—see MIZRAIM, PATHROS.

that of Jer. 46-51, and (as we shall see) to that of Gen. 2:10-14, as in *Critica Biblica* we shall develop at some length. We can now understand the wisdom ascribed to the divinely favoured king in Ezek. 28. The Mišrites, like the Edomites, enjoyed a high reputation for wisdom; to say that Solomon was wiser than the Jerahmeelites and the Mišrites was the highest possible eulogy¹ (1 K. 4:30). Of course in his original perfectness the king of Mišsur was just as exceptionally wise as Solomon; he was indeed the equal of the 'sons of God'; for he dwelt in the mountain and garden of Elohim (see CHERUB, § 2). No Babylonian monarch could be more conscious of his supernatural privileges than this king. There he walked to and fro in his 'holiness, like the first man before he yielded to temptation. His 'guilty acts,' however, or, more precisely, his 'unrighteous traffic'—here we pass from allegory into history—offended Yahwè, and the cherub (the mythic allegory resumed) which guarded the sacred mountain and its precious stones, destroyed him, by casting him, like the Etana of a Babylonian legend (see ETHIAN), with his 'holiness profaned'² to the lower earth; or, to leave mythology, a fire came forth from the very midst of his kingdom which consumed him.

To understand this passage it will be well to compare it with Is. 14:4-20, which, as is pointed out elsewhere,³ refers not to some Babylonian 4. Is. 14:4-20. or ASSYRIAN king but to the king of Jerahmeel in N. Arabia, by whom in the Chaldaean period the Jews were oppressed. In v. 12 this king is called, not 'Lucifer' or 'the daystar,' but 'Jerahmeel,'⁴ and the 'mount of congregation' (הר מועד—i.e., the mountain of Elohim) where he claims to dwell, but from which (cp Ezek. 28:16) he shall be cast out, is described as being בִּרְכֵי צֶמֶן—i.e., probably, 'in the recesses of Šafōn (Sifān)' which seems to have been a name nearly equivalent to Mišsur (the ethnic belonging to it is *Sefonī*=Sefani); cp SHAPHAN, ZAPHON, ZEPHANIAH. It is not impossible that a very unlikely phrase in Ezek. 28:14 (EV, 'thou art, or wast, the anointed cherub that covereth')⁵ should, by critical emendation, be read '(thy dwelling was) in the recesses of Cushan [see CUSH, 2]; thy throne (thou exaltest).'

See further *Crit. Bib.* It may be noted here that a particular phrase (בְּלִים) which at first sight appears destructive of the above hypothesis is corrupt. Any one can see this in Ezek. 28:2, where 'I sit in a seat of God in the heart of the seas' cannot be right. But if one passage in the group is corrupt, all the other passages are so too—i.e., the original prophecy became corrupt in one place, and because it suited the editor's interest to read 'Tyre' for 'Mišsur,' he harmonised the other passages (27:4⁶ 25 27 28) with it. The original reading most

¹ In 1 K. 4:30 Solomon is said to have been 'wiser than the sons (son?) of Jerahmeel' (see MAHOL, SOLOMON). In Ezek. 28:3 (emended text) we read, 'Behold, thou art wiser than Jerahmeel; (even) those of Haluṣah cannot reach thee' (הֲנֵה תֵּבֵם אֲתָה מִיְהוּסָאֵר הַלְּצִמְתִּים לֹא יִמְצְאוּךָ). Cornill's correction 'magicians,' is brilliant, but 'it' itself is a suspicious word. Kraetzschmar keeps MT's מְכַסְּתִים, but emends עֲקֵשָׁה into עֲלִפָּה, which is not very plausible. A historical key was wanted for a satisfactory emendation. Haluṣah (see ISAAC, § 1, ZIKLON) was a city in the Negeb renowned in the Jerahmeelite and Hebrew religious legends.

² Read קָרַעַת (v. 18) with Toy.
³ The view given in ISAAH II., § 9 (9), with which the views of Marti and Dillm.-Kittel may be compared, plausible and reasonable as it is, needs rectification. The passage thus becomes a member of a large group of passages, the obscurities of which can now for the first time be fully removed. See *Crit. Bib.*

⁴ Read יְהוּסָאֵר; see LUCIFER.
⁵ O covering cherub' (v. 16, EV) is due to an absurd error of the text. מְכַסְּתֵי אֲבָנֵי אֵשׁ is a corruption of אֲבָנֵי אֵשׁ; thy coverings were stones of fire—i.e., precious stones; this is a repetition of the clause at the end of v. 14 (a similar correction).

⁶ In 27:4 Cornill most wisely reads וְבִיָּהּ for MT's וְבִיָּהּ, but omits the corresponding correction וְבִיָּהּ, for בִּיָּהּ.

probably was בְּבֵית אֱלֹהִים, 'in the mansion of God,' except in 28:8, where we must read וְתָמוּת יְהוּסָאֵל כְּבֵית אֱלֹהִים, 'and thou shalt die, O Jerahmeel, (cast out) from the mansion of God.' There is also corruption in Is. 14:8, which in its original form referred probably to the songs of the cities of Bejamin, which had suffered so greatly from the raids of the Cherethites (i.e., Rehobothites), a section of the Jerahmeelites.

This form of the Paradise-story is remarkable for its mention of the divine mountain in Eden with its garden or grove (on the summit?) and its 'stones of fire' (i.e., precious stones; see CHERUB, § 2, n. 2), also from its affirmation of the original blamelessness of the man who dwelt in Eden. This important feature of the story may perhaps refer to the time when the Kenites were the tutors of the Israelites in the worship of Yahwè (see MOSES, § 14). The 'unrighteous traffic' by which the Mišrite king provoked Yahwè may be the traffic in Israelite slaves—captives of war (Am. 1:9, reading מִצָּר for צָר). Plainly the garden of Eden was, according to Ezekiel, in the Jerahmeelite land—i.e., in N. Arabia.

(b) As to Genesis. The writer of Gen. 2:4b-8 assumed that the original occupation of man was agriculture; ¹

5. Gen. 2:4; but in 2:4b-7 he imagines a time before text examined. the commencement of agriculture, and he is apparently indebted to an older and fuller narrative which began with a description, only slightly exaggerated, of the physical phenomena witnessed by the first colonists of Babylonia (see col. 949). Gunkel, it is true, thinks that the mention of 'bushes' (שִׁתִּי) and 'herbs' (עֵשְׂבִי) in v. 5 points specially to Palestine. But שִׁתִּי הַיְדֵּשׁ is almost certainly a corruption² of הַצִּיר, 'grass' (cp Is. 15:6; Ps. 37:2). 'Grass' and 'herbs'—the only natural parallels—are as appropriate in Babylonia as in Palestine, while אֲרָ (if rightly explained as=Bab. *edd* 'flood'³) must come directly from a Babylonian story. Instead of קִרְיָהוּרַיִן, 'from the earth,' we should perhaps with Haupt read 'עֲלֵהּ, 'upon the earth';⁴ so the full Babylonian colouring is restored.

Like Holzinger (see below) the present writer was once inclined to read עֵין אֲרָ (E, Pesh., Vg., actually render 'fountain'), and הַמַּיִתָּה תֵּנֶן. He rejected this solution, however, (1) because the explanation given on col. 949 (not considered by Holz.) is perfectly valid, (2) because he hopes to have made it probable that the substratum of vv. 10-14 is not secondary, and (3) for the reason mentioned above. Holzinger thinks that the mention of the want of rain and of the drenching flood (אֲרָ) side by side is incongruous. If there was a 'flood,' plants would surely have appeared. But such an excessive flood as is supposed was a poor substitute for orderly rain, and it is admitted on col. 949 that water-plants must have appeared for a time—in short, the description is not without some mythic exaggeration.

Of course, something which the narrator has omitted must be supplied mentally; the 'flood' spoken of must have been subjugated by Yahwè before he planted the garden or park in Eden, and we should expect a reference (such as we find in one of the Babylonian myths⁵) to the setting of the streams 'in their places.' We have now to study the great geographical enigma in 2:10-14. The passage is rendered thus in RV:

'And a river went out of Eden to water the garden; and from thence it was parted, and became four heads. The name of the first is Pishon; that is it which compasseth the whole land of Havilah [rather Hahavilah], where there is gold; and the gold of that land is good; there is bdellium and the onyx stone. And the name of the second river is Gihon: the same is it that compasseth the whole land of Cush. And the name of

¹ This is enough to show that the Paradise-story did not originate either among the Hebrews or among the Jerahmeelites. Cp Wellh. *Proh.* 324, n. 1.

² Note the warning Patek. הַצִּיר springs from an early correction of הַצִּיר.

³ See CREATION, § 206, with n. 3; GARDEN, § 5; Ball's note in 'Genesis,' *SBOT* Heb. 47, and Haupt's, *ibid.*, 118.

⁴ *Proceedings of the American Oriental Society*, 1896, pp. 158 ff.

⁵ See CREATION, § 5.

the third river is Hiddekel: that is it which goeth in front of Assyria.¹ And the fourth river is Euphrates.

Most recent critics agree in thinking that this is not a part of the original narrative (so Ew., Di., Bu., Toy, Bacon, *Oxf. Hex.*, Holz., Gunkel; cp GARDEN, § 5). They remark that it is too learned for its context and interrupts the story, and Holzinger thinks that the contents are, partly at least, a creation of the writer's fancy. This able critic also thinks that v. 6 once stood somewhere after v. 8, in the description of the garden. Of these suggestions, the easiest to deal with is the last, which indeed has also occurred to the present writer (see above). The objection to placing v. 6 elsewhere is that it needs to be explained how Yahwè could get the trees to grow; in perfectly dry soil this would of course be impossible. As for the 'learning' of the passage, the word must at any rate be used in a qualified sense. It is presumably meant that the writer reports the fantastic geographical notions which have reached him; and certainly Delitzsch, Haupt, and Sayce have done their best (see below) to make this view acceptable. But textual criticism must precede and clear the way for archaeology, and it is in textual criticism that we are still somewhat behind. The signs of probable corruption in vv. 10-14 are so striking (in v. 10 they have been pointed out already by Holz.) that we are bound to apply the methods of correcting the text which have already served us so well in many other cases. Verse 11 f. has been emended elsewhere (GOLD, § 1; TOPAZ); but the form of text there proposed can only represent the intermediate stage between the original and the present text. Verses 10-14, in their original form, probably ran nearly as follows:—

'And a stream went out from Eden to water the garden, and afterwards it spread itself out² and watered the whole of Mišrite Arabia (יְמֵינֵי יִשְׂרָאֵל וְהַיְתֵמָה אֲחֻזְיֵי יִשְׂרָאֵל כְּמִצְרַיִם).

By a mistake such as occurs again and again,³ עֵרְבָה, 'Arabia,' was misread אַרְבַּעָה, 'four'; רָשִׁים (which our dictionaries boldly render 'arms' or 'branches') comes from אֶרְבֹּת; אֶשְׂרָה is frequently substituted in the traditional text for אֶשְׂרָה (one cannot always be quite sure which is right). When the 'four heads' had thus been brought into existence, it only remained to identify them. The old Babylonian myth had been naturalised in Jerahmeel, and, even when adopted by the Hebrews, its geography long continued to be purely Jerahmeelite. Consequently, if Jerahmeel, as known to the editor of the corrupt text, could not furnish the requisite four streams, all that could be done was to imagine that, at a distant period, while the enchanted garden existed, there were four streams. The following may be nearly what the editor, and the interpolator who followed him,⁴ wrote in explanation of the partly misread words in v. 10, 'it spread itself and became four heads':—

'The name of the first is Pishon; that is it which encircles the whole land of Hahavilah [the land of Cush, Mišsur, Jerahmeel, and the bnè Ishmael]. And the name of the second stream is Rehoboth; that is it which encircles the whole land of Cush. And the name of the third stream is Jerahmeel; that is it which flows E. of Geshur (or Mišsur?), and the fourth stream is Ephrath.'⁵

¹ AV and RVmg. 'toward the east of Assyria,' so Aq., Targums, Dillm. (1), Del., Kautzsch, Reuss, Gunkel; AVmg. 'eastward to Ass.,' Strack, 'in front of Ass.,' cp *κατέναντι*; Kautzsch-Socin (1), 'along Ass.,' Kau.-Socin (2), 'hitherto from Ass.' Whitehouse (*Expos.* 7 [1888] 135) follows G. Dillm. (2) and Holzinger are uncertain. Evidently there is some error in the text; the suspicious word is אֶשְׂרָה.

² The same sense as in Ezek. 111 (פְּרִיחֵי). See BDB, and Ges.-Bu., s.v. פָּרַר.

³ Usually עֵרְבָה (Arabians) is misread אַרְבַּעָה, 'forty.' So in Gen. 74, where read 'on the land of the Arabians and the Jerahmeelites'; 1 K. 198, where Elijah's journey is described as 'in the road (?) of the Arabians and Jerahmeelites'; also the passages, quoted in MOSES, § 11, to which we may doubtless add Gen. 1513 (reading 'and the Arabians and Jerahmeelites shall afflict them'; עֵרְבָה=אֶרְבָּים).

⁴ The interpolated gloss is placed in square brackets.

⁵ Ephrath is one of the popular distortions of Jerahmeel (cp

We shall return presently to the very different form of text which now represents this early insertion. What

6. Jerahmeelite form of story. It is most important to call attention to just now is the fact that the early Hebrew legends are predominantly

Jerahmeelite. We do not of course deny the potent influence of Babylon, which indeed we have already pointed out in 246-7. We also affirm the probability of a revival of Babylonian influence on Hebrew traditions at a later period (cp CREATION, § 23). But we assert that the original Hebrew legends were received from the Jerahmeelites, among whom, both on the N. Arabian border and in Palestine itself, the early Israelites lived. The Jerahmeelite colouring of the Hebrew legends may have been injured by scribes, but by no means have all traces of it been effaced. Thus the traditional text may tell us that 'Yahwè [Elohim] planted a garden in Eden eastward' (Gen. 28); but it is certain that גַּרְדֵּן and גַּרְמָה are common corruptions of יִרְהַמְאֵל; and with the Paradise-story of Ezekiel before us we cannot hesitate to read, 'Yahwè [Elohim] planted a garden in Eden of Jerahmeel.' A recent writer,¹ noticing features of the Paradise-story 'which every scholar feels never originated on Jewish soil, and for which Babylonian lore fails to account,' asks what inland country in or near a desert like Arabia can have been the source of the narrative. It may be hoped that this question has been answered.

So too, it is plausible to hold that the deluge was originally described as overwhelming the land of the Jerahmeelites (see col. 3573, n. 3), and the ark as settling on 'the mountains of Jerahmeel' (יִרְהַמְאֵל, partly miswritten, partly emended in the traditional text as אֲרָרָט 'Ararat'). So too 'the beginning of Nimrod's kingdom was Jerahmeel' (on this reading of Gen. 10 see NIMROD), and it was 'as they journeyed in Jerahmeel' (Gen. 112, text, אֲרָרָט *z. z.*, (1) eastwards, Dillmann; (2) in the E., Kalisch, Kautzsch, Holzinger; (3) from the E., Gunkel; cp *ἀνατολῶν*) that the primitive men 'found a plain in the land of Geshur' (text, SHINAR, *q. v.*). So too the warlike story in Gen. 14 is largely concerned with 'Jerahmeel,' and the region chosen by Lot (1310f.), where lay the cities destroyed by a judgment, was originally placed in Jerahmeel (כְּבַר and כְּבַר *z. z.*, 10f.; and כְּבַר in v. 11 being corruptions of יִרְהַמְאֵל [בְּ] יִרְהַמְאֵל, see SODOM, MELCHIZEDEK).

We have still to ask, How does the name Eden fit into our present theory? According to Reuss and

7. Name 'Eden.' Dillmann it is a purely symbolic name invented by the Hebrew narrator, and meaning 'pleasure' (*ἡδονή*).² Certainly we can easily imagine that later Hebrew writers (but hardly Ezekiel) gave the name this interpretation (cp 4 Esd. 753), and both Delitzsch and Duhm have seen an allusion to this meaning in the phrase (not, it is to be feared, beyond critical questioning) נוֹחַ עֵרְבָה, 'the stream of thy pleasures,' in Ps. 369[8]. But purely symbolic names in ancient myths are improbable; נֹחַ (Nod) may suggest the sense of 'wandering,' and 'Eden' that of 'pleasure,' but the names were originally geographical. The 'father of Assyriology' (Sir H. Rawlinson) conjectured that Gan-Eden was a popular Hebraised form of Gunduniš = Kar-duniāš. This is the name of an extremely fruitful territory which, like Frd. Delitzsch in 1881, Rawlinson supposed to be

RACHEL). Why has the fourth stream no geographical description? Either because it was so well known (was it the so-called RIVER OF EGYPT?), or because no fresh variation of the previous description appeared possible; 'Jerahmeel' and 'Ephrath' are in fact the same.

¹ Worcester, *The Book of Genesis*, etc. (1901), p. 157.

² Kalisch supports the rendering 'in the east' by a reference to 1311 Is. 911[12]; but in both places יִרְהַמְאֵל is surely the right reading. The corruption, however, is an early one, and Jensen (*Kosmol.* 214, n. 1) even thinks that this יִרְהַמְאֵל has influenced the view of the situation of Paradise given by Cosmas Indicopleustes, *ἡμέρας* [ξ] δὲ πάλιν τοῦ Ὀκεανοῦ ἔχει ἕνα ἕνα ἕνα ἐῖθε καὶ ὁ παράδεισος κατὰ ἀνατολὰς κείτου. Similarly, according to Kohut (*JQR* 222f., 1890), the statement in the Vendidad (224) that Yima, the first man, went 'to meet the sun,' is suggested by יִרְהַמְאֵל.

³ Reuss (*La Bible*) would emend יִרְהַמְאֵל into יִרְהַמְאֵל, 'a garden of pleasure.'

close to Babylon, but which, as Tiele and Winckler have shown,¹ was in S. Babylonia, close to the Persian Gulf, and means Kaldi-land. Obviously this will not accord with our present theory; but who any longer defends it? We might, however, if no better course presented itself, accept Frd. Delitzsch's comparison of the Bab. word *edinu*, a synonym of *šēru*, meaning 'field, plain, desert' (*Par.* 79). 'Eden-jerahmeel' in the text as restored above would then mean 'the desert of Jerahmeel,' and we might venture to compare Gen. 11 1, where we should not improbably read, 'Now the whole human people was (of) one speech in the wilderness of the Jerahmeelites' (בְּרִבְרֵי יִרְחַמְאֵלִים) for (וּבְרִבְרֵי אַחַרִּים).² The explanation is nevertheless almost certainly wrong; 'Eden' is the name of a part of N. Arabia, and virtually equivalent to Cush or Miššur, or perhaps (see Che. *Ps.*⁽²⁾ on Ps. 74 15) to Ethan. There is a difficult passage in Amos (14 f.), which has hitherto not been satisfactorily explained,³ but which becomes clear if the Hazael mentioned is a N. Arabian king (see Schr. *KAT*⁽²⁾, 207), and if 'Dammešek' (as in 1 K. 19 15) is miswritten for 'Cusham,' and 'Aven' for 'On' (as in Hab. 3 7); in this case 'Beth-eden' will of course be on the N. Arabian border, and 'Aram' will be = 'Jerahmeel.' See also 2 Ch. 29 12, where 'Eden' (עֲדֵן) ben Joah is a Gershonite, and cp the name Adonijah (אֲדֹנִיָּה), which is at any rate most probably an expanded ethnic.⁴

Here it is necessary to guard ourselves against misconception. We have no objection whatever to explain

8. Babylonian theories.

vv. 10-14 in their present form in the light of Babylonian lore so far as we can. The nucleus of these verses had come down to their second (?) editor in a corrupt form, and he edited it presumably in the same way as Gen. 11 1-9—i.e., on the theory that it had some reference to Babylonia. He had probably heard of the Babylonian belief, expressed at the end of the great Deluge-story, in a terrestrial Paradise 'at the mouth of the streams' (*ina pī nārāti*); see DELUGE, §§ 2, 15, 17. These streams were, according to Jensen (*Kosmol.* 213), no other than the Tigris and the Euphrates.⁵ It is reasonable to suppose that a Hebrew editor of Gen. 2 10-14 would (like the writer or compiler of Dan. 10)⁶ identify 'Hiddekel' with the Tigris, in spite of the initial Hī [see HIDDEKEL], and 'Pērāth' with the Euphrates. Thus he would provide himself with two out of the four streams required by *v.* 10, as he read it. The present writer cannot satisfy himself that he attempted anything more than this. Still, when we consider that Alexander the Great supposed at first that the sources of the Egyptian Nile were in NW. India, it becomes barely conceivable that a Hebrew writer might regard the imaginary upper course of the Nile in Asia as one of the streams of Paradise, and connect the (corrupt) name Gihon with it.⁷ We can even imagine with

¹ Tiele, *BAG* 79 f.; Winckler, *Unters.* 135 f.

² ⚔ gets over the difficulty of the traditional text by a paraphrase, καὶ φωνῆ μία πάντων; Dillmann renders, 'the same words, or expressions.' Holzinger admits the harshness of the phrase. Can we acquiesce in it when אַחַרִּים and אֲדֹנִיָּה (or the like) are obviously such common corruptions of יִרְחַמְאֵל and יִרְחַמְאֵלִים?

³ See Driver in the *Cambridge Bible* and Nowack in *HK*, *ad loc.*

⁴ A close inspection of the names of David's sons will justify the statement. See special articles.

⁵ According to the Bundahīs (ch. 20 in West's translation) two chief rivers, called the *Urag* and the *Vēh*, rise in the Iranian sacred mountain Albūrz, but also eighteen other streams, the list of which begins with the *Diqlat* (Tigris) and the *Frāt* (Euphrates). Albūrz is the later contraction of Hara-berezaiti, above which (for there is no favouritism as in Babylonia) the souls of all the righteous go up (*Vend.* 19 30).

⁶ Very possibly, however, in a document used and misunderstood by the editor of Daniel, Hiddekel may have been corrupted out of 'Jerahmeel.' Cp PURIM, § 6 (end).

⁷ Halévy, however (*Revue semitique*, 1893, p. 33), identifies the Persian Gulf, continued westward towards the Red Sea, with the Gihon, which 'compasses the whole land of Cush.'

Haupt¹ that he might connect the remaining (corrupt) name Pishon with the Persian Gulf (the Bab. *nāru marrātu*; see MERATHAIM), or rather with the Persian Gulf joined to the Red Sea, which, he may have thought, formed one great river encircling the whole of Hahavilah (i.e., Arabia² except the northern part), and springing from the same source as the (supposed) Asiatic upper course of the Nile.

To complete our account of Haupt's theory, it should be added that he lays great stress on the phrase in Is. 14 13 which we have translated above 'in the recesses of Sāphōn'; like other scholars, he adheres to the usual rendering of סָפְחֹן, 'north,' and, to explain this phrase as well as that in Ps. 48 3 [2],³ supposes (with Hitzig, Stade, and Smend) that the Jewish exiles in Babylonia believed that Yahwē dwelt in the N., not (as of old) at Horeb. As a consequence, he thinks that the exiles transferred the gan-Eden to Armenia (i.e., the NE.), near the common source of the Euphrates and the Tigris. From this great body of water, according to Haupt, the Jews believed two other streams—viz., the Asiatic course of the Nile and the Persian Gulf—to have branched off, to the E. of the Tigris. But the exegetical and critical objections to this view of the transferred dwelling-place of Yahwē (for some of which see Kraetzschmar, *Ezech.* 9) are insuperable.

A brief mention must also be given to the view of Frd. Delitzsch in 1881 (in his *Wo lag das Paradies?*) which for a time attracted Prof. Sayce.⁴ Taking the Heb. *eden* as = Bab. *edinu* 'plain,' he locates Paradise in the plain of Babylonia, the northern part of which is watered exclusively by the Euphrates. The Pishon and the Gihon he identifies with the Pallacopas (the *nār Pallukat* of the inscriptions) and the Shaṭṭ en-Nil canals,⁵ which may have been river-beds before they were made subservient to Babylonian irrigation. But Delitzsch's attempt to explain the names PISHON [*g.v.*] from *pisan(n)u* and Gihon from *Gug'āna* or *Guh'āna*, a name of the Araḥtu, is admitted to have been unsuccessful. Sayce therefore (*Crit. Mon.* 101) would now place the garden of Eden in the neighbourhood of Eridu, the sacred city of Ea. This is certainly plausible. Eridu (now *Abu Shahrein*), though at present far inland, was once on the sea-coast, and Jensen (*K'asmol.* 213) refers to a place in the inscriptions where the 'mouth of the streams' is mentioned in connection with Eridu. It is here that we should most probably place the enchanted island where Par-napištim, the hero of the Deluge-story, was placed by the gods, and where, according to a hymn or incantation, a magic palm grew, with precious stones for fruits (cp Ezekiel's 'stones of fire' = precious stones). Sayce thinks that the river of the Hebrew Paradise is the Persian Gulf, into which four streams flowed—viz., the Euphrates, the Tigris, the Kercha (= Choaspes), and the Pallakopas canal. Unfortunately for this theory, there appear to be no Babylonian names for the last two of these streams from which 'Pishon' and 'Gihon' might fairly be derived.

With regard to Lenormant's theory (*Les origines*, vol. i.) that the primitive Paradise lay where Zend tradition placed it, in the highlands of the Hindu Kush, it may safely be said that whatever resemblances there may be between Gen. 2 f. and the account in Fargard 2 of the Vendidad, are much more likely to be due to borrowing (possibly at more than one period) on the part of the Iranians, than to the derivation of both accounts from a common Aryan source. Babylon must be the parent of the Paradise-myth as known to the Iranians, the Jerahmeelites, and the Hebrews; otherwise, why should this myth have been known only to a favoured few of the Aryan and the Semitic peoples?

The theories which make the Hebrew Paradise-story

¹ *Wo lag das Paradies?* (from *Ueber Land und Meer*, 1894-95, no. 15), 7 f. Haupt adopts Nestle's etymology of PISHON [*g.v.*], and explains it as 'the stream with high waves.'

² It is significant, however, that we never hear again of the gold of Hahavilah.

³ On this much misunderstood passage see CONGREGATION (MOUNT OF). When will Bredenkamp's aspiration (*Gesetz u. Propheten*, 145) be fulfilled, and the 'fatal mountain of the gods' be banished from the hymn-book of Israel?

⁴ See review of Del. *Paradies* in *Acad.*, Nov. 5, 1881, p. 349.

⁵ Delitzsch identifies the Shaṭṭ en-Nil with the ancient canal called Araḥtu; but according to Haupt (note in Toy's *Ezekiel*, Eng. ed., *SBOT* 93 f.), the Araḥtu was to the N. of Babylon, and the Shaṭṭ en-Nil is probably the (*nāru*) Kabaru, at Nippur (see CHEBAR).

simply a loan from Babylonia having failed, we return to the hypothesis of a partly Babylonian, partly Jerahmeelite tradition.

9. Eden in Jerahmeel.

The Jerahmeelites, from whom the Israelites took the story, probably located Paradise sometimes on a vastly high mountain, sometimes in a garden (at its foot?), in some part of the Jerahmeelite territory. Cp Che. Ps.⁽²⁾ on Ps. 74¹⁵. The mountain (with a sacred grove on its summit) has dropped out of the story in Gen. 2^f, but is attested in Ezek., and in the Eth. Enoch 24^f. (cp 18⁶⁻⁹) the tree of life is placed in a mountain-range in the S.¹ As to the locality, if it be correct that by the Hebrew phrase ארץ נחל חלב ודבש, 'a land flowing with milk and honey,' a part of the Negeb was originally meant (Nu. 13²³⁻²⁷, on which see NEGEB, § 7), we might infer that this fruitful land, with its vines, pomegranate-trees, and fig-trees (cp Gen. 3⁷), had once upon a time been the Jerahmeelite Paradise. The phrase quoted from Nu. 13²⁷ may seem an exaggeration; but we can hardly doubt that the river of milk and honey which (cp 'Secrets of Enoch,' ch. 8) flowed through Paradise is the earthly antitype (the ancients would have said, the continuation) of the river which flowed through the Elysian fields of the Milky Way² (cp col. 2104, n. 3).

This view is in essential agreement with that of Sayce—that the four rivers of Paradise were originally the rivers of the four regions of the earth, which were fed by the ocean-stream that girdled the earth and descended from the sky (*Acad.*, Oct. 7, 1882, p. 263). The Paradise-myth belongs in fact to the same cycle as the Creation and Deluge stories. All these narratives come from Babylonia; but in spite of their present scenery, all are connected with sky-myths, the first men being originally viewed as divine men, the companions of the sky-god, and the flood, equally with the great ocean-stream, being the counterpart of the heavenly ocean (cp DELUGE, § 18).

At the same time we must bear in mind that Paradise is, by its very conception, an enchanted land. From a mythical point of view, it was quite conceivable that more distant parts of N. Arabia than that referred to above, though bleak and bare afterwards, might, in the world's childhood, have been covered with pleasant trees. Certainly the language of Is. 14¹³ (end), which may well be drawn from tradition, would seem to suggest a somewhat remote part of the region called Šāphôn.

Gunkel's theory (*Gen.* 33) is unsatisfactory in so far as it places the 'mountain of Elohim' in the far N., identifying it with the north pole³ (the

10. Gunkel's 'station' of Bel in Babylonian cosmology.

theory). Another part of it, however, is well worth considering—viz., the view that the Paradise of the Hebrew writer is no narrower region than the earth itself. This may indeed be, strictly regarded, an exaggeration; but it contains an important truth which is often overlooked. It is true that, just as the upper river of milk and honey belonged to the whole sky, so far as it was inhabited by gods and by blessed souls, so the river of Paradise belonged, theoretically, to nothing of less magnitude than the earth; originally indeed the earth, viewed as a great mountain, may have been the *har Elohim*. The Hebrew story itself (see the short form of *vv.* 10-14, § 5) by no means states that the course of the river was confined to the garden. Thanks to this beneficent stream, N. Arabia (the representative of the outside world) was delightful as compared with the earlier time described in Gen. 2⁵. Thus room was left for other myth-makers to devise different geographies of Paradise. The myth is at home, not only

¹ Charles (Enoch, p. 98) expresses surprise that the tree should be in the S. From the old Hebrew point of view, however, it is not wonderful. It is the moderns who have confused our ideas through false inferences (see §§ 8, 10).

² Cp Hymn to the Nile (Guéysson's transl., *RP*(2), 348), 'Watering the orchards created by Ra, to cause all the cattle to live, thou givest the earth to drink, inexhaustible one! path that descend from the sky'; cp Gunkel, *Genesis*, 33.

³ Cp EARTH (FOUR QUARTERS), § 2; Jensen, *Kosmol.* 25. But the Babylonian Paradise was in the south, and so too is Horeb, the 'mountain of Elohim.'

among the Iranians (who derived it from Babylon, but modified it to suit themselves), but also 'among the American Indians, the Sioux and the Aztecs, the Mayas, the Polynesians.' Brinton, who points this out, adds, with theoretical accuracy, that 'the four rivers are the celestial streams from the four corners of the earth, watering the tree as the emblem of life.'¹

We now pass on to other details. Chief among the trees of the garden were 'the tree of life in the midst of the garden, and the tree of knowledge of good and evil' (2^{9b}).

11. The two trees; the serpent.

Of any of the trees the man who was placed in the garden was permitted by Yahwè to eat, except (as the text now stands) of 'the tree of knowledge of good and evil.' It is obvious (though Winckler² apparently thinks otherwise) that there must have been an earlier form of the Hebrew myth in which only one tree was specially named. Budde and Gunkel agree in fixing upon 'the tree of knowledge of good and evil'; Kuencn, more wisely (*Zh.* 7 18 136), prefers the tree of life. Of course, as Budde remarks, 'the original narrator cannot possibly have reported that the man had been permitted to eat of the tree of life as well as of the other trees of the garden.'³ Consequently, it being probable on various grounds (see, e.g., 3^{23 f.}, and cp Gunkel) that our present narrative is composite, it is assumed (at least by Gunkel) that in one of the literary sources only one tree—that mentioned above—was specially named, whilst in the other two trees were mentioned.⁴ There is much to be said for this theory. Still, it must be confessed, not only that the closing words of 2⁹ appear to drag,⁵ but that the phrase 'the tree of knowledge of good and evil' is both obscure and (in a myth like this) improbable. The worthiest, but at the same time the least defensible, interpretation is no doubt that of Jastrow (*Rel. Bab. and Ass.* 553, note)—viz., that 'good and evil' means our 'everything,' or the Babylonian 'secrets of heaven and earth.' The poorest, and yet on the whole the easiest, is that 'knowing good and evil' means the art of living smoothly—e.g., with reference to the sexual distinction. But can we believe that any good Hebrew writer would have devised such a phrase as this out of his own head? In all such cases textual corruption is the root of the evil.

The narrative in its present form does not require emendation; even the repellent phrases in 3⁵⁻²² have to stand. But in the original narrative the words which closed 2⁹ were probably parallel to בְּתוֹךְ הַגַּן, 'in the midst of the garden.' Is there any probable Hebrew phrase which can underlie וְעַן הִרְעָה מִטֵּב וְעַן הִרְעָה מִרָע, having regard to the habits and dangers of the scribes? There is—one may very plausibly read מִבְּטֵן הָאֲרֶזִים,⁶ 'in the navel of

¹ *Religions of Primitive Peoples*, 126. Cp Sayce, review of Lenormant's *Les origines*, vol. ii., *Acad.*, Oct. 7, 1882, p. 263.

² In the Alexander legend Alexander receives his oracle from two special trees in a παραδεισος. Winckler (*GI* 2 108) compares these two oracular trees with the two trees in the Hebrew Paradise, both called (according to him) 'tree of the knowledge of good and evil.' One of them, he says, became the tree of life, by a confusion with the (Babylonian) plant of life (see § 12). May we not rather say that the original tree of life declined into a plant in the S. Babylonian myth, as with the Hindoos it shrivelled up into the lotus-flower on which I'rahma rests?

³ *Die biblische Urgeschichte*, 53. It may be noted that from a feeling of the inconsistency of magic with moral religion all mention of the magic tree of immortality—the Gaokerena—is excluded from the ancient Zoroastrian hymns called the Gâthâs. Cp *OPS.* 400-439.

⁴ This view is at any rate simpler than that given by Budde in 1883.

⁵ Driver has made a gallant attempt (*Hebraica*, Oct. 1885, p. 33) to save the text; he quotes a number of examples to show that 'the order is quite regular and natural.' But is it quite natural in this context? It is certainly awkward not to be told expressly whether the 'tree of knowledge of good and evil' was in the centre of the garden, or elsewhere. Kautzsch and Socin (*Genesis*(2), 4) remark, 'One cannot help noticing that these words drag; one of the two trees seems to be alien to the original context.'

⁶ מִבְּטֵן הָאֲרֶזִים comes from וְעַן הִרְעָה מִטֵּב וְעַן הִרְעָה מִרָע. The uncommon phrase מִבְּטֵן הָאֲרֶזִים was dittographed; corruption followed.

the earth.' In the Book of Jubilees, chap. 8, Jerusalem the holy city is called the navel or *ομφαλος* of the earth (like Delphi in Greece); cp also Eth. Enoch 26.1, with Charles's note. It is quite probable that the centre of the Jerahmeelite Paradise was similarly described, and that it was marked out by the tree of life—*i.e.*, everlasting life—which grew there. The editor had before him a corrupt text, and instead of inventing he made the best possible sense of his doubtful material, using the very gentlest manipulation.

The sense which the editor put upon his text was in fact not unnatural if he knew of another form of the Paradise-story, according to which Yahwé, like Ea in the Adapa myth, endowed his creature man with wisdom (Job 15.7; cp CREATION, § 21), but denied him immortality. This parallel story may at least have given him the idea of a tree of knowledge, though the range of knowledge had to be limited. He did his little best with the text, and—what is more important—he sought to lift up the story in its revised form to a higher level. Though the serpent accuses Yahwé of deception (Gen. 3.4.), and though deception on the part of Yahwé was very possibly asserted in the original myth, the narrator does not mean us to admit the truth of the accusation. The penalty of death may be delayed; it is not removed. The narrator also gives no hint as to the kind of tree meant by the tree of life—information which might perhaps have been injurious to the interests of religion.

Can we go behind the narrative, and try to identify the trees? From the mention of 'fig-leaves' (3.7) one may perhaps infer that the narrator (*i.e.*, the editor) meant the fig-tree, one of the most valued trees of Palestine, and also, as it happens, one of the sacred trees of Babylonia.² The tree of life might well, in Palestine, have been the terebinth; the sacred tree of MAMRE (*q.v.*) was a terebinth. But in any Babylonian version of the myth the tree of life would naturally be the date-palm. 'Here' (*i.e.*, in Babylonia), says Sir G. Birdwood,³ 'if I may judge from the banks of the Shatt el-Arab, along which I botanised for more than a week in 1856, the only true native tree is the date-palm.' Its fruit in antiquity formed the staple food of the people, and date-wine was their drink.⁴ It was also chief among the sacred trees; the famous mythic palm-tree of Hindu has been referred to already. In Enoch (24.4) we read of the tree of life that 'its fruit was like the dates of the palm'; this was the most natural way of supplementing the old Hebrew story.

The result at which we have arrived removes some serious difficulties. It is satisfactory to have reason to believe that 'life' and 'wisdom' were not in the original story regarded as separate. 'Knowledge,' no doubt, has different meanings. But it was a true insight which dictated the statement that Enoch passed away from earthly view, because God had taken him (Gen. 5.24). He who shared God's wisdom (see ENOCH) ought also to share his immortality, a statement which, in the fulness of time, becomes transfigured into the truth, 'This is life eternal, to know thee the only true God.'

But can no fresh light be thrown on the serpent, who is classed among the 'beasts of the field' (3.1), and yet possesses such extraordinary faculties? We are only able as yet to express suspicions, and this can best be done in the form of questions (cp SERPENT). Was the serpent originally the semi-divine guardian of the tree of life, like the dragon of the garden of the Hesperides? Was the 'temptation' in the primitive story a friendly counsel, which presupposed indeed that the words of Yahwé were deceptive (cp the Adapa-myth), but which is not to be judged as a deliberate act of rebellion against the supreme Will? We know not. But we may at least reject a recent theory ascribed by Jastrow to Haupt, based on the interpretation of אָנָה (Eve) as

² The limitation of 'life' in Eth. Enoch (see 25.6) is not in accordance with Gen. 2.3. The divine beings themselves eat of the fruit of this tree, and certainly they live for ever (עֲלֵיָם, 3.22, not 'for a long time').

³ See the sacred tree (a conventionalised fig-tree) represented on p. 182 of Toy's *Ezekiel*, translation, *SBOT*.

⁴ *Asiatic Quarterly Review*, Jan. 1886, p. 41.

⁵ Cp Lenormant, *Les origines*, 181 f.; Maspero, *Dawn of Civ.*, 555 f.

'serpent' (see col. 61, n. 3)—*viz.*, that 'the serpent' was originally the woman, 'who, by arousing the sexual passion, leads man to a "knowledge of good and evil."' Surely the speaking serpent¹ is no afterthought, but a primitive element in the story. That the curse pronounced on the serpent is primitive is not equally clear, and it is perhaps all the more permissible to allegorise it for edification. Nor can we add anything fresh on the cherub and on the flashing sword (on both, see CHERUB).

No Babylonian tree of wisdom is known to us. But (a) in the Babylonian earthly Paradise there was both water of life² and a 'plant which makes the old young'³—a plant which is presumably the original both of the Hebrew tree of life and of the Iranian tree of immortality called Gaokerena.⁴ And when Par-napištim and his wife were placed in the Babylonian Paradise, it followed that they had free access to both.⁵ (b) This was not the case with the hero of another remarkable myth, named Adapa, who, though permitted to see the secrets of heaven and earth, was prevented by his divine father Ea from partaking of the 'food of life' and the 'water of life.' 'When thou comest before Anu,' said Ea, 'they will offer thee food of death. Do not eat. They will offer thee waters of death. Do not drink.' Adapa obeyed his commands; but it was a deception on Ea's part, and the sky-god Anu is represented as being 'astonished' (or 'grieved'?) that Adapa should have foregone the privilege offered to him.⁶ Sayce (*Crit. Mon.* 94, and elsewhere) has considerably exaggerated the illustrative value of this myth, and there is a 'great gulf fixed' between 'Adapa' and 'Adama.' It is quite possible, however, that the threat of death as the penalty for eating the forbidden fruit was suggested by the speech of Ea to Adapa, quoted above; at the very least, the two tales are too much akin not to have a common source.

(c) Another story which deserves to be mentioned is that of Eabani. But beyond the point already used as an illustration (the formation of Eabani out of clay, CREATION, § 20, n. 4) it appears unsafe to venture. Jastrow's use of the comparative method has perhaps led him to some serious misinterpretations of the story of 'Adam and Eve.'⁷ Into these we need not here enter. But two points on which he has suggested a new theory can hardly be passed over. (1) As to the naming of the animals (Gen. 2.19 f.). Is this really a euphemism to be illustrated by the story of Eabani (but cp Maspero, *Dawn of Civ.*, 576 ff.)? The passage in Gen. is no doubt difficult, but only through its present context. It seems to have come from another Paradise-story according to which the first man was endowed with extraordinary intelligence. It has, properly speaking, no connection with the creation of 'Eve.' The passage should probably run thus, 'And out of the ground . . . and brought them to the man, but for man (?) he found no help corresponding to him.' The naming of the

¹ The Book of Jubilees says (contrary to the spirit of the underlying myth) that all animals spoke before the Fall.

² See Zimmern, 'Lebensbrot und Lebenswasser im Babylonischen und in der Bibel,' *Archiv für Religionswissenschaft*, Bd. 2; Jeremias, *Die Bab.-ass. Vorstellungen*, etc. 91 ff. The Hebrew story must also once have referred to this water; see Prov. 10.11 13.14 14.27, and cp Rev. 22.1 f., 17. Elsewhere, too, the tree and the fountain of life go together (*e.g.*, according to Schirren, in New Zealand), and every sacred tree, properly, has near it a sacred fountain.

³ On Winkler's theory see col. 3578, n. 2.

⁴ This was a white Haoma tree, said to grow in the middle of the mythic sea Vouru-kasha. By drinking of its juice on the day of the resurrection men would become immortal. The Haoma plant used in the sacrifices was the yellow Haoma which grows on the mountains. See *Yast*, 2.3; *Yasna*, 106.10; *Zendavesta (SBE)*, i, Introd. lix.

⁵ Cp Jensen, *Kosmol.* 227, 383; Jeremias, *op. cit.* 87-95.

⁶ Jastrow, *Rel. of Bab. and Ass.*, 549, 552; cp Zimmern in *Gunkl. Schöpfung*, 420 ff.; Jensen, *KB*, 6.1, 93 ff.

⁷ 'Adam and Eve in Babylonian Literature,' *AJSL*, July 1899, 193 ff.

animals is a mark partly of the wisdom of the first man, partly of his lordship over the animals (cp NAME, NAMES). We are reminded of the version of the Paradise-story in Ezekiel, where the first man has also a splendid state-dress (not a mere coat of skins), and who, if he sins, sins in a grand way. (2) As to the name of the first woman. Jastrow connects חַוָּה, Hawwā, with Ukhat in the story of Eabani, but prematurely (as well as most unsuitably). Before we try to account for the name we must apply criticism to the text. Now אִם כִּלְיָהּ (EV 'the mother of all living') in Gen. 3:20 is just as corrupt as בְּאֵר יִרְיָהּ רֹאִי (EV Beer-lahai-roi) in 16:14. The passage probably ran originally, 'And Jerahmeel called the name of his wife Hōrīth (חֲרִית), that is, a Jerahmeelitess' (רְחֵמְאֵלִיתָּהּ). 'Jerahmeel' and 'Horith'—the original first men—became Ha-adam and Hawwah (AV, Adam and Eve). Almost throughout, the story has been adapted to the new reading חֲרִית (instead of יִרְיָהּ), but here and there passages occur which have become hopelessly obscure through the alteration.

And what, we may now ask, is the object of the beautiful Hebrew story of Paradise? As it now stands, it gives an account of the origin of the gravest phenomena of human life. We see the toiling man, the subject woman, the pains of childbirth, the sad farewell of death. Yet we know that the man was 'God's son' (Lk. 3:38) and dwelt in his garden; how is it that paradise joys and paradise simplicity have disappeared? The sense of shame, too, so specially human, how is this to be accounted for? And the serpent—how comes it to be at once so intelligent (φρονιμώτατος; cp Mt. 10:16, φρόνιμοι ὡς οἱ ὄφεις) and so hostile and dangerous to man? It is all owing to fateful events which occurred in the primitive age. The narrator has no special curiosity about sin. He only brings in the sin of the first man to explain the expulsion from Paradise and the rest. Of course, we do not accuse the narrator of being indifferent to sin. In a style which is far more impressive than that of a preacher he inculcates the fear of God and obedience to his commandments, and he acquiesces in the justice of the punishment of the offenders. But the existence of sin is not one of his problems; there is an intellectual chasm between him and Paul. One must admit that there is also a difference between this somewhat pessimistic story and many of the narratives which follow. Abraham especially, in the eyes of the narrators, no sinner, and is very near and dear to God. One may venture to add that the illusion which tempted the first man was a relatively modest one—it was not to become God (the exaggerated aspiration of the Indian), but to become as God in a single point; and that, after his doom had been pronounced, he exhibited no Titanic insolence, but, as Milton has rightly noticed, was humble and resigned towards the supreme will.

Such is the primary object of the story of Paradise, and such is the explanation. But the primitive myth—had that no object? and was the original object wholly lost through being elevated morally by the Hebrew narrator? No. The original object was partly to put man on his guard against exciting the φθόνος of the Deity, partly to cheer him by describing the felicity of the golden age, which golden age may and must in the drama of history return (cp 4 Esd. 8:52, but also Is. 116-9 65:25 51:3). Look where we will, we find 'that man has ever looked on this present world as a passing scene in the shifting panorama of time, to be ended by some cataclysm, and to be followed by some period of millennial glory.'² This millennial glory is the restora-

tion of Paradise (cp MILLENNIUM). The φθόνος of the Deity is not indeed a Christian conception; but something slightly resembling it is not wanting elsewhere in the OT (see, e.g., Gen. 11:6 f., Is. 2:12-21). The restoration of Paradise, however, is thoroughly congenial to the Christian; only it is to the heavenly, not the earthly Paradise, that he aspires—to enjoy God and be with him for ever.'

That the details of the Paradise-story took hold of the later Jews is obvious; we cannot, however, show that it exerted any influence on the early Israelites. It may, nevertheless, in some form, have been widely known at any rate in Judah, though the prophets apparently did not think it important to refer to the story.

Among the later references Job 15:7 f. can hardly be quoted; it is not the same but a parallel myth that we there have before us (CREATION, § 21). The 'fountain of life' in 1st Proverbs (see above, col. 3580, n. 2) is a detail not found in Genesis; Proverbs (3:18 11:30 13:12 15:4), however, also refers to the 'tree of life,' though accidentally the expression is simply a figurative synonym.¹

In Enoch the tree of life and that of wisdom (φρόνησις) are separately described. The tree of life is represented as one of a number of fragrant trees, encircling the throne of God, which throne is the middle and highest of seven mountains in the south (24:3-25:7; cp § 9, n. 1). 'The tree of wisdom (φρόνησις) in the garden of righteousness is like the carob tree (see HUSKS); it imparts great wisdom to those who eat of it'; Rufael expressly identifies it with the tree of which Adam and Eve ate (32). In the 'Secrets of Enoch' (8) we again hear of the tree of life. It is in Paradise, which, as in 2 Cor. 12:4, is placed in the third heaven. It is further described as 'in that place in which God rests when he comes into Paradise,' and as 'on all sides in appearance like gold and crimson, and transparent as fire,' and as covering everything.

For the different statements of the Ethiopic Enoch as to Paradise, see Charles's note on 60:8. It is a remarkable illustration of the permanence of mythic phraseology that in the book *Secrets of Enoch* (85 f.) we read of four (or two) streams going forth, which pour honey and milk, oil and wine,² and are separated in four directions, and go down to the Paradise of Eden, between corruptibility and incorruptibility, and thence go along the earth. To Moses, too, the 'greatness of Paradise' is revealed in the Apocalypse of Baruch (59:8); cp *Ta'umith*, xca. See also 4 Esd. 7:53 8:52; Test. Levi 18; and note the gloss upon 'as the days of the tree' (Is. 65:22) in *Ḥ* and the Targum. Lastly, note a fine passage in the Psalms of Solomon (14:3b), ὁ παράδεισος τοῦ κυρίου, τὰ ξύλα τῆς ζωῆς, ὄσους αὐτοῦ. The magic element is here entirely removed.

The NT references are Lk. 23:43 2 Cor. 12:4 Rev. 2:7. Here παράδεισος is used in a technical sense (not so פָּרַדֵּס in MH). On Paul's reference see above, and on the heavenly Paradise as the abode of the righteous see Weber, *Jüd. Theologie*, 344 ff. The Midrash on the Psalms says that the dwellers in Paradise see the face of God; they are indeed nearer than the angels. It is the antithesis to Gehinnom, and was created before the world. See ESCHATOLOGY, §§ 20, 63, 75, 79, 103; and on the Reformation antipathy to allegory, on the NT treatment of the Paradise-story, on the story itself, and on the names of the first two human beings, ADAM AND EVE.

While this article was passing through the press, appeared an essay by Hommel entitled *Vier neue Landschaftsnamen in AT, nebst einem Nachtrag über die vier Paradiesesflüsse in altbab. u. altarab. Uebersetzungen* (also to be found in *Aufsätze u. Abhandlungen*, 31), in which it is maintained that the Babylonians knew four Paradise-rivers, analogous to the four Paradise-rivers of the Hebrews. These rivers Hommel localises (cp AHT 314 ff.) in northern and central Arabia, the נַחַל and מִשְׁרַן of Gen. being, according to him, central Arabia and Edom respectively. Hommel, however, equally with Winckler, fails to notice the strong evidence of a Jerahmeelite origin of the

¹ Cp Budde, *Die bibl. Urgesch.* 85.
² Charles well compares *Koran*, Sur. 47:15 where Paradise is described as having rivers of incorruptible water, milk of changeless taste, delicious wine, and clarified honey.

¹ רְחֵמְאֵלִיתָּהּ is a perfectly correct gloss, חַוָּה being probably a fragment of רְחֵמְאֵלִיתָּהּ. Cp the name of Esau's wife, Gen. 26:34 (emended under JUDITH).

PARAH (פָּרָה), i.e., 'the cow' ?; פָּרָה [B]. אֶפְרַיִם [A], אֶפְרָא [L], ~ town in the territory of Benjamin mentioned with OPHRAH ('fawn'?). Josh. 18.23. Identified by Guérin with the ruins called *Fāra*, in the lower part of the *W. Fāra*, on a hill in the middle of the valley, about 3 m. NE. of Anathoth. The valley is always fresh and green from the beautiful 'Ain Fāra (see EUPHRATES, 2), and though to-day nothing is more austere than this savage gorge, haunted by birds of prey, and at evening by wild beasts from the mountains, numerous relics of ancient buildings are visible (Guérin, *Judée*, 3.71-73; *PEF.* 3.174). There is another Fāra, SW. of Kedesh-Naphtali, not far from Keř-Bir'im. The name Parah or Happārah is scarcely in its original form. Probably the article is prefixed to the Benjamite Parah to distinguish it from the other Parah (Fāra).

PARAN (פָּרָן); cp the Arab tribal names, *farrān*, *fārān* [Ges.-Bu.]; Wetstein, in *Del. Gen.*(4) 587 n., derives from פָּרָן, 'to dig out'; פָּרָן [BN*ADFQL]. It is not easy to understand all the OT passages relative to Paran. Most scholars will agree, however, in identifying the wilderness of Paran with the lofty tableland of limestone called et-Tih, which is bounded on the S. by Jebel et-Tih, on the W. by the Jebel Helāl and the Jebel Yelek (towards the Wādy el-'Arīš), on the N. by the 'Azāzimeh mountain plateau (see ZIN), and on the E. by the Arābāh. In a larger sense it appears also to have included the wilderness of Zin in which Kadesh is located (Nu. 20.1, etc.), and therefore to have stretched up to the NEGB (*v. v.*). This wider sense is presupposed in Gen. 21.21, 'and he (Ishmael) dwelt in the wilderness of Paran, and his mother took for him a wife from the land of Miřrim.' The narrator means that Paran and Miřrim are virtually synonymous, so that if Miřrim included Kadesh (which has been elsewhere—see MIZRAIM—assumed), Kadesh can be said with equal justice to have been in the wilderness of Zin and in that of Paran. In fact, Nu. 13.26 states that the spies came to Moses 'to the wilderness of Paran, to Kadesh.' Here, it is true, קָדֵשׁ, 'to Kadesh,' is a redactional insertion (R_p, see Bacon); but the insertion is geographically correct.

Dt. 33.1 f., 'Yahwē came from Sinai, and heamed forth from Seir upon them; he shone brightly from Mt. Paran, and came from Meribath-Kadesh' (see KADESH, § 2, MASSAH, § 2 f.). The passage only becomes perfectly clear when we admit that Kadesh and Paran are geographically connected. 1 S. 24.1, 'Behold, David is in the wilderness of En-Kadesh' (so we should probably read, for 'En-gedi': 1 see KADESH [Barnaal]; 25.1, 'And David arose and went down to the wilderness of Paran.' Most critics (*e.g.*, We., Dr., but not H. P. Smith) follow 25 in emending MT's פָּרָן into פָּרָן, which occurs in the next verse (cp MAON). But the harder reading is to be preferred. From the wilderness of Kadesh David went down to the wilderness of Paran (in the narrower sense). It should be noticed that 25.1b and *v. 2 f.* come from different sources.

1 Greene (*Hebrew Migration from Egypt*, 1879, p. 271) sees very clearly that the *midbar* of Paran and that of 'En-gedi' were not far apart. He also (273) suggests that En-gedi may be a corruption of En-Kadesh. We cannot, however, with Greene abolish the traditional 'En-gedi' altogether.

Nu. 20.1 27.14 (=Dt. 32.51) 33.36 34.4 (cp Josh. 15.3); in these passages (all P or R_p) Kadesh is distinctly said to be in the wilderness of Zin (Nu. 33.36 even says, 'in the wilderness of Zin, that is, Kadesh'). Nu. 10.12 12.16 13.3 26 (all P) place Paran between Sinai and the Negeb. In Dt. 1.1 a new usage (but on the text see SUPH) appears. Paran may here designate a locality in the wilderness of Paran (Buhl, etc.); so, too, if the text is right, in 1 K. 11.18, but here פָּרָן is very possibly miswritten for מִצְרַיִם or מִצְרָיִם—i.e., the N. Arabian Miřrim (see HADAD, MIZRAIM, § 2 b).

The description of Paran given by Eusebius and Jerome (*OS* 298.64 122.28) is surprising. Pharan is a town over against Arabia southward, three days' journey from Aila eastward. Horeb, too, according to Eusebius (*OS* 301.40), was beyond Arabia, and Jerome adds (112.23) that it was near the mountain and the desert of the Saracens called Pharan. Eusebius and Jerome were evidently misled by the name, Feirān, of the principal wādy in the Sinaitic peninsula, on the N. side of the Jebel Serbāl. Rephidim, they say (*OS* 287.86 145.25), is near Pharan—i.e., near the walled episcopal city of Pharan (cp REPHIDIM). It is very strange that Greene (*Hebrew Migration*, 319) should think this tradition defensible. The Mountain of Elohim, he says, was 'indifferently called Sinai, Horeb, Paran.' Cp SINAI.

Mt. Paran is mentioned twice: Dt. 33.2 (see above), and Hab. 3.3 (|| TEMAN). The latter passage favours the view of Buhl that 'Mt. Paran' means 'the range of hills between Sinai and Seir, which stretches beside the Elamitic Gulf as far as Aila (Elath).' This very late passage, however, is merely a new and condensed edition of Dt. 33.2, where Mt. Paran is parallel to Kadesh. It is better to explain 'Mt. Paran' in accordance with this earlier passage as meaning Jebel Mağrah¹ (Palmer's Magrah), an extensive plateau which, though intersected by several broad wādys, runs northwards, without any break, to 1 point within a few miles of Wādy es-Seba'. It may be added that, as Holland discovered in 1878, the Jebel Mağrah and the Jebel Jerāfeh (SE. of the 'Azāzimeh mountains) do not form one continuous ridge, but are separated by a wādy, and that this wādy is probably the 'road of Mt. Seir' mentioned in Dt. 12.3. This enables us to understand better how Teman (= Edom) and Mt. Paran could be regarded as parallel, though they are less strictly parallel than Mt. Paran and Kadesh.

We also meet, in Gen. 14.6, with **El-Paran** (אֵיל פָּרָן), *ēw* [תָּהָן] *rep[ε]μ[β]γ[υ]θου τῆς φαραν*; Onk. Sam. 'plain [מִישָׁרָה] of Paran' [see MOREH, PLAIN OF]), a point described as being 'עֵלֵי-מִשְׁפָּט', 'by the wilderness,' at which, according to the present text, Chedorlaomer 'turned' in order to reach En-mishpat or Kadesh, and the country of the Amalekites and of certain Amorites. It is usually identified with the famous ELATH (אֵילָת) at the N. end of the Elanitic Gulf. This is not unpalatable, according to the geographical view suggested by the present text. Still, the assumption that the full name of Elath was El-Paran ('palm(s) of Paran'?) is by no means likely; we should have expected Elath-Arābāh. That the wilderness of Paran was considered to extend to the Elanitic Gulf, is also unlikely. It is probable that we have here one of the many corruptions which disfigure the text of Gen. 14. The point intended may have been somewhere in the low hills near the Wādies Ghamr and Jerāfeh, in the ancient 'road of Mt. Seir' (see above, also Palmer, *Desert of the Exodus* 424.). But cp SODOM. T. K. C.

PARAS, EV Persia (פָּרָס); ΠΕΡΣΑΙ [BAQ]; Ezek. 27.10 38.5), according to Dillmann (Schenkel's *BL* 4470) a N. African people; he compares the Perorsi and Pharusii of Pliny (58). EV cannot be right; certainly, too, Ezekiel mentions 'Paras' in connection with 'Lud' and 'Put'—which Dillmann regards as N. African peoples (in Ezek. 38.5 'Lud' may have accidentally dropped out of the text; cp 38.5). When, however, we consider the frequent errors of MT, we have no right

1 Palmer, *Desert of the Exodus*, 510.

2 Guthe, *ZDPV* 8.218 (1885); cp Palmer, *op. cit.* 421.

ground which he gives. For the Assyrian parallel mentioned by Delitzsch seems to show that Par'osh may really have been a personal name among the Israelites. Meyer's right course would have been to deny that a family called the 'Flea-clan,' can have been the first family in the land. He might then have gone on to propose a better explanation of the name. ו and נ being phonetically akin, פִּרְעֻשׁ may be miswritten for פִּרְאֻשׁ, Pir'ath or Par'ath, a name which is presupposed by PIR'ATHON (q.v.) mentioned in Judges.¹

Cp FLEA, where it is maintained that the insect is nowhere expressly mentioned in the OT. T. K. C.

PARSHANDATHA (פִּרְעֻשׁ; ΦΑΡΣΑΝ ΚΑΙ ΒΕΣΤΑΝ [B], φαρσανεσταν [N* vid.], -ταιν [N^c.a], φαρσανεσταν [ALβ]), eldest son of HAMAN (q.v.) Esth. 9.7. For the name compare perhaps Old Persian *fraṣna data* 'granted by prayer' (Benfey).

PARTHIANS (παρθοι), Acts 2:10†. See PERSIA.

PARTRIDGE (פִּרְיָוֶן, *hōrē*), 1 S. 26:20 (ΝΥΚΤΙΚΟΡΑΪ, but see below), Jer. 17:11 and Eccles. 11:30 (ΠΕΡΔΙΞ).

No one could be surprised to find the partridge referred to in the OT. The *Caccabis chukar* (a sub-species of the more widely-distributed *Caccabis saxatilis*) is the commonest game-bird in Palestine. A smaller species, *Ammoperdix heyi*, takes the place of the *C. chukar* in the Dead Sea area and the Jordan valley, where it is abundantly represented. A third kind, *Francolinus vulgaris*, the black partridge of N. India, occurs in several parts of Palestine, but is not numerous, and another species of *Caccabis*, *C. melanocephala*, is found in SW. Arabia.

It is certainly a thoroughly natural expression that is assigned to David in 1 S. 26:20. Of the *Caccabis chukar* it is said that its ringing call-note may be heard everywhere in the hill-country of Judah. When hunted, these cheery birds scud up the hills with great rapidity; at last, wearied out, they can be knocked over with a stick. More generally, however, they are captured by 'long narrow runs, carefully formed of brushwood, leading to the cave in which the decoy-bird is concealed' (Tristram); often indeed partridges themselves are the decoy-birds (as is mentioned, for classic antiquity, by Aristotle and Elian); cp Eccles. 11:30, and see FOWL, § 10 f.

One of the three passages of EV in which 'partridge' occurs gives a perfectly satisfactory sense. In Eccles. 11:30 the guile of a proud man is compared to a decoy partridge in a cage and to a spy. In 1 S. 26:20, however, we have a slight feeling of surprise that Saul's pursuit of David should be compared to nothing nobler or harder than the chase of partridges, and in Jer. 17:11 the reference (in RV) to a partridge 'that gathereth young which she hath not brought forth' has met with no adequate explanation. The partridge has far too many eggs of her own to care to steal the eggs of other birds. No popular superstition suggestive of such an idea as that given in the prevalent version of Jer. 17:11 is in the least likely to have arisen among such observant people as the Israelites; we may safely let Bochart's *Hierozoicon* repose on its shelf.

A doubt will naturally arise as to the state of the text, more especially when we find in Judg. 15:19 the term *Ēn-hakkōrē*, which, against the context, is explained by some 'Partridge-spring,' but which must either be 'Well of him that called' or be a corruption (in combination with Lehi) of 'Jerahmeel' (see LEHI).

In 1 S. 26:20 our choice seems to lie between inserting פִּי, 'a hawk' (as suggested by a marginal note to Tg. Jon. in *Luc. Proph.* xviii), so that Saul would be compared to a hawk and David to a partridge, or (since פִּרְיָוֶן is not the right verb to be coupled with פִּי) changing קרא into פִּירָא, a 'wild ass,' in accordance

¹ We must not compare Parsua, the name of a land in W. Media.

with the critically emended text of 1 S. 24:15 [14] (see FLEA, col. 1533 foot). In Jer. 17:11 a more searching examination of the text is required. Cornill (*SBOT, Jer.*, Heb.) says that this is one of those passages which have been misplaced by an error of the scribes, whilst Giesebrecht denies it to Jeremiah altogether. We may indeed reasonably deny it to Jeremiah (see JEREMIAH [BOOK], § 18, col. 2389); but we must not deny its connection with 1 S. 5:8. It is in fact parallel to 1 S. 5:8, and should probably run, 'Cursed is the pernicious man who acquires riches, but not rightfully,' etc.—i.e., קרא רגל ולא יר, and is corrupted out of פִּרְיָוֶן אֲרָר נֶבֶר בְּלִיעֵל. It is surely better to try to restore what the prophetic writer may have said than to spend time in seeking to explain what no Hebrew writer can have said.

In 1 S. 26:20, H. P. Smith (*Samuel*, 233), after Klost., would emend פִּרְיָוֶן into פִּירָא (‘as the eagle hunts the partridge’). But (1) פִּירָא is the wrong verb; (2) *νυκτικόραξ* (Θ) nowhere represents פִּירָא; and (3) the vulture (נֶבֶר) is a carrion-feeding bird. T. K. C.—A. E. S.

PARUAH (פִּרְיָוֶן; ΦΑΡΟΥΧ [A], ΒΑΡΔΑΟΥΧ [I], ΦΟΥΔΑΟΥΧ [B]), the father or clan of the prefect of ISSACHAR (§4, n. 4) under Solomon (1 K. 4:17).

If 'Jehoshaphat' is really a late transformation of Zephathi (see SHAPHATH), 'Paruah' probably comes from Hareph (הֲרָפָה), or Haruph (הֲרֻפָה), a Calebite clan-name (1 Ch. 2:51). Note that in 1 Ch. 12:5 Shephathiah (i.e., Zephathi) is called 'a Haruphite.' Paruah ('blooming,' NAMES, § 57) is surely miswritten.

T. K. C.

PARVAIM (פִּרְיָוֶן; ΦΑΡΟΥΑΙΜ [BA], -ΕΙΜ [L]; Vg. Pesh. Ar. take it as an adj. *decore multo*, etc.). 2 Ch. 3:6 states that Solomon 'overlaid (וִינָה) the house, or temple, with אֲבִנֵי יָקָרָה or costly stones, for adornment, and the gold was gold of Parvaim.' The statement respecting the gold is unconnected with what precedes. We must, however, resist the easy hypothesis of a gloss, and seek for a solution of the problem which brings the clause into relation with the immediate context. Investigation leads to the theory that Parvaim is a corruption of *בְּרִיָּוֶן* 'fir-trees,' whilst 'and the gold was gold of' must be changed to 'and covered (it) with timber of.' The passage belongs to the Chronicler's account of the building of the temple.

The Pasek after וַיִּבְנֵה in 2 S. indicates that the text is in some disorder, and the fact that closely similar words recur at intervals in 1 S. 4-7 suggests that corruption and dittography may very possibly have combined to produce the present text. *לְתַפְאֵרָה*, being such an unnecessary appendage, is specially suspicious. *תַּפְאֵרָה* certainly comes from *תַּרְשֵׁן* 'fir-trees.' This appears originally to have stood in the margin as a correction of פִּרְיָוֶן, for which we should also read *בְּרִיָּוֶן*; it is dittographed from 1 S. 5:8 which suggests that *וְהוֹבֵב וְהָבָה* is probably corrupted from *וְהָבָה עֵץ*. From *וְהוֹבֵב וְהָבָה* must evidently be transferred to 2:4 (the opening words are of the nature of a ditto gram). 2 S. 5:7 may have been nearly as follows,—'and he covered the greater house with costly stones (?) and with fir-timber.' All besides is either misplaced or dittographed.

If the rest of the text of 2 Ch. 3:6 were sounder, Glaser's identification of Parvaim (*Shiloh*, 2:347) with Sak-ul-Farvaim, of which we hear from the Arabian geographer Hamdāni, would be more plausible. T. K. C.

PASACH (פִּסַּח; ΒΑΣΙΧΧΙ [B], ΦΕΧΧΙ [A], ΦΑΧΕΧ [L]), a name in a genealogy of ASHER (q.v. § 4 ii.), 1 Ch. 7:33†.

PAS-DAMMIM (פִּסַּח דָּמִים; ΦΑΣΟΔΟΜΗ [BN], -IN [A] τοις σερραμ [L], *פִּסַּח דָּמִים* [Pesh.], *phesdomim* [Vg.]), the place where Eleazar ben Dodo (Dodai) performed an exploit during the war with the Philistines, 1 Ch. 11:13. The || passage (2 S. 23:6) has בְּרֵפְאִים ('when they defied,' so *ἐν τῷ ὄρειδισαί; εν σερραμ* [L]). The original reading was probably either בְּעֵקֶב רֵפְאִים 'in the valley of Rephaim' (Marq. *Fund.* 17), or בְּעֵקֶב אֲרָמִים 'in the valley of the Arammites (= Jerahmeelites),' or more probably both readings were current (Che.). See *Crit. Bib.*, and cp REPHAIM, VALLEY OF, and cp EPHESDAMMIM, LEHI.

PASEAH (פִּסַּח, § 66 'halting,' *i.g.* Claudius).

1. Brother of Beth-rapha (from 'Beth-šārephathim'?) and TEHINNAH (q.v.) in a Calebite genealogy, 1 Ch. 4:12. 'Paseah' is possibly a corruption of JERAHME'EL [Che.]; cp Pissēah, an assumed link in the develop-

ment of MEPHIBOSHETH (*g.v.*) out of Jerahme'el (*θεσσαρη* [B], *φασση* [A], *φασσε* [L]).

2. The B'ne Pashah are mentioned among the post-exilic Nethinim; Ezra 2 49 (*φισον* [B], *φαση* [A], *φασσα* [L]); Neh. 7 51 (*Phasah* [AV], *φαση* [B], *φαση* [N], *φασση* [A], *φασσα* [L]). In 1 Esd. 5 31 the name appears as PHINEE (*φινος* [BA], so RV, but AV PHINEES).

3. Father of Jehoiada, 3; Neh. 3 6 (*φασεκ* [BNA], *φασσε* [L]).

PASHHUR; so RV, but AV PASHUR (*פּשׁוּר*); ΠΑΣΧΩΡ ΕΛΕΥΘΕΡΟΣ, OS 204, 25; *Π* ΠΑΣΧΩΡ generally). It is natural to compare ASHHUR (*g.v.*),¹ but some of *Π*'s readings (see 3) suggest a corruption of ΠΕΔΑΖΟΥΡ [Che.]; cp Jer. 20 3. See also HAPPIZZEZ.

1. Pashhur, one of the B'ne IMMUR (*g.v.*), was chief officer in the temple in Jeremiah's time, probably therefore second only to the chief priest² (Jer. 20 1-6). He was also a prophet, but of quite another type from Jeremiah (*v. 6b*; cp *v. 31*), whom he caused to be put into the stocks for his prophecies of woe, and thereupon received the name MAGOR-MISSABIB (contrasting with Pedahzur, 'God hath ransomed'), and the warning that he would share the general fate of captivity. He is identified by some with the father of another opponent of Jeremiah, named Gedaliah (Jer. 38 1), but on no special grounds.

2. Pashhur b. Malchiah was one of two sent by Zedekiah to Jeremiah imploring him to inquire of Yahwè on behalf of the nation (Jer. 21 1 38 1). Some identify him with the Pashhur b. Malchiah, mentioned in a document of the age of Nehemiah which forms the basis of 1 Ch. 9 3-17 and Neh. 11 4-19; 1 Ch. 9 12 (*φασχωρ* [A], *φασουρ* [L]); Neh. 11 12 (*φασουρ* [B], *φασουρ* [NA], *φασουρ* [L]). That personage certainly belonged to a priestly family; but since Pashhur is not called so in 21 1 we may assume that he did not exercise priestly functions. It may be doubted whether Pashhur was properly a personal name (see 3); identifications are therefore uncertain.

3. The B'ne Pashhur, a post-exilic family: Neh. 7 41 (*φασεουρ* [B], *φασουρ* [NA], *φασασουρ* [L])=Ezra 2 38 (*φασουρ* [B'], *φασουρα* [B'], *φασουρ* [A], *φασδασ*, [L])=1 Esd. 5 25, PHASARON, RV PHASSURUS (*φασσουρον* [B], *φασσουρον* [A], *φασασουρ* [L]). Six of their number are mentioned as having married foreign wives, Ezra 10 22 (*φασουρ* [BNA], *φασουρ* [L])=1 Esd. 9 22, PHAISUR (*φαισουρ* [B], *φαισου* [A], *φασασουρ* [L]); the family itself is referred to at the closing festival under Nehemiah (Neh. 10 3 *φασουρ* [BNA], *φασουρ* [L]).

PASS, PASSAGE, PASSAGES. In 1 S. 13 23 *ma'abân*, מַאבָּאן, and in 1 S. 14 4 Is. 10 29 *ma'barâh*, מַבְרָא, is in AV 'passage'; in all three cases RV has 'pass.' See MICHMASH. In Gen. 32 22 [23], Josh. 27 Judg. 3 28 1 s. 16 2 EV gives 'ford' for (מַבְרָא), as also does RV in Judg. 12 5 f. where AV has 'passages.' See FORD. RVmg. also has 'fords' in Jer. 51 32 where EV has 'passages' ('of Babylon). On Jer. 22 20 (AV 'passages' RV 'Abarim') see ABARIM.

PASSOVER
and
FEAST OF UNLEAVENED BREAD

Harvest festival (§ 1).	'Sacrifice of first-born theory
Unleavened (§ 2).	(§ 8).
The offering (§ 3).	Pésah ritual (§ 9).
Canaanitish origin (§ 4).	Meaning of blood rite (§ 10).
A <i>lag</i> ; no fixed day (§ 5).	Why an evening rite (§ 11).
Commemoration theory (§ 6).	Course of development (§§ 12-17).
Passover (§ 7).	Literature (§ 18).

The old legislation in the so-called 'Decalogue of J' (Ex. 34 18-26; see DECALOGUE) and in E (Ex. 23 14-16)

1. **Harvest festival.** gives the first place among the great feasts of the year to the feast of unleavened bread.

Many scholars, however, regard Ex. 34 18, the verse of primary importance in connection with the present subject, as not original (see for example Steuernagel on Dt. 16 1). According to Steuernagel J knows nothing of a feast of unleavened bread (*massôth*) but only (*v. 25*) of a passover festival in which the firstlings of the herd and of the flock were sacrificed. Even on literary grounds, however, we cannot accept this view. According to *v. 23* J knows of three annual festivals. If *v. 18* is deleted

¹ [Names with *pas* (earlier form *pasâ*) 'portion' (*i.e.*, property) of a divinity (*Manet*, *Isis*, *Me'it*? Liebl. 25 25) are far from being uncommon in Egyptus.—W. M. M.]

² Zephaniah, who in Jer. 29 26 is called an 'officer' (פְּקִידִי, in 52 24 is called 'secondpriest' (שְׁנֵי הַכֹּהֲנִים).

only two of these are named and the third distinguished only by the character of its offerings. The structure of *v. 23*, however, quite plainly presupposes that this last also has been named, and that, too, in the first place and before *v. 19*. We shall have to suppose, accordingly, that originally the passover festival was named in *v. 18*, which according to J also had reference to the Exodus, and that at a later date the *massôth* festival was introduced in its place from Ex. 23. No substantial reason for such a correction can be suggested; for the idea of seeking to supersede the passover festival by the *massôth* festival could never have occurred to anyone; nor yet can the purely literary motive—that of bringing into line with Ex. 23 14 f.—be alleged here, for as will be shown immediately it is Ex. 23 14-16 that has been itself corrected, or, let us say, supplemented by the addition of *v. 17* f. and thus again brought into agreement with J. Finally, it is exceedingly doubtful whether in Ex. 34 23 (J) the name *pésah* for the festival in question is original (see below, § 7); if it is an insertion, it is doubly difficult to understand why it should previously have been deleted in *v. 18*. The tendency of the redaction, as of the whole development, is much rather in the direction of placing the passover, as distinguished from the feast of unleavened bread, more and more in the foreground (see below, § 12 f.).

On the questions as to whether Ex. 23 14-19 belongs to the Book of the Covenant and to E generally, and as to the relations between these verses and Ex. 34 18-26, no agreement has as yet been arrived at. It is often supposed that the passage in the Book of the Covenant is not original but a later introduction from J (Baentsch, *Das Bundesbuch*, 52 f. 99 f.; Kautsch, *HS*; and others). Ex. 23 14-19, however, is not a unity; *vv. 14-16* are to be held separate from *vv. 17-19*. This appears immediately from a comparison of *vv. 14* and 17, which are doublets though they do not say quite the same thing. Still more clearly does this appear when the phraseology is compared with that of J. *Vv. 17-19* are, apart from the absence of the word *pésah*, word for word coincident with Ex. 34 23 25 26; *vv. 15* f. on the other hand, diverge from J not only by their omission of the precept about firstlings but also expressly by their designations of the festival in *v. 15*, whilst *v. 14* is altogether absent from J. Thus, whilst there is everything to suggest that *vv. 17-19* are taken from J, *vv. 14-16* cannot possibly have come from that source, but must belong to E. In the present case, therefore, it is E that has been subsequently brought into conformity with J by introduction of the precepts of *vv. 17-19*, which were foreign to the original law. If this be so, we must go back for the form of these verses to their original form in Ex. 34 23 f.—in other words, the name *pésah* was not originally used in Ex. 34 25. In taking over the verses nothing, it is certain, was changed, for the very object of the transference was to correct E in accordance with J.

The name of the feast of 'unleavened bread' (*יְמֵי הַמַּצּוֹת*, *éorhê tawn ázûmwn* [Lk. 22 1, Jos. *BJ* 2 12], *hémérai tawn ázûmwn* [Acts 12 3 20 6], *festus* [or *diei*] *azymorum*) has reference to the *massôth*¹ which were eaten while the festival lasted. For the meaning of the feast in the passages just cited we must look to the connection with the two other great annual feasts—that of 'weeks' and that of the 'ingathering'—in which it is there found. These last are quite unmistakably connected with husbandry (see PENTECOST; also TABERNACLES, § 1). This establishes an antecedent probability that the third feast also had the same underlying idea—was, in fact, the festival of the beginning of harvest. The date, in the month of Abib—though no doubt it may have been a later addition to the law—points to the same conclusion. This interpretation of the feast comes still more clearly to the front in Dt., where the law as regards all three festivals is (Dt. 16 16 f.) that the celebrants 'shall not appear before Yahwè empty-handed; every man shall give as he is able according to the blessing which Yahwè thy God has given thee.' The offerings of the *massôth* festival are thus, according to D, thank-offerings for harvest blessings just as are those of the other great feasts. Dt. 16 9 tells us, more precisely, that the *massôth* festival was the festival of putting the sickle to the standing corn. It fixes the date of the feast of weeks, so called because celebrated seven weeks after *massôth* (see PENTECOST, § 1), by the formula 'seven weeks shalt thou number unto thee from the time that thou beginnest to put the sickle to the standing corn'; cp also Lev. 23 15, where the day from which these seven weeks are to be reckoned is still more accurately fixed (see below, § 14). That its relation to the harvest was

¹ מצות is the opposite of חַמֵּץ (*hâmêz*); see LEAVEN. The original meaning of the word is uncertain. Ges. explains it as 'sweet,' Bochart (*Hieroz.* 1 669 f.) as 'clean, pure,' Fleischer (see Levy, *NHWB* 3 315) as 'exhausted,' 'strengthless,' 'desiccated.'

not incidental merely is shown by the ritual of the feast, as still presented in Lev. 23⁹ (H), by which the people are enjoined to bring a sheaf of the first fruits with sacrifices on the day after the first Sabbath of harvest (see below, § 14). Before this date it was not lawful to eat either bread or parched corn or fresh ears (*v.* 14). This offering of the first fruit sheaf is so fully regarded as the characteristic and main rite of the festival, and the day of its presentation as that of the proper feast, that the seven weeks to Pentecost are reckoned from it (*v.* 15).

The characteristic custom of eating only unleavened bread at the festival is thus explained easily and naturally.

2. Unleavened. The maṣṣōth are upon the same plane with the parched corn (כֶּסֶם, *kālī*, see FOOD, § 1), a favourite food during harvest (cp Ruth 2¹⁴ Lev. 23¹⁴), the use of which at this season still survives in Palestine. In the midst of the labours of the harvest-field, when the first barley sheaves were being reaped, people did not take time to wait for the slow process of leavening the dough, but baked their bread from unleavened dough, just as at other times unleavened cakes were wont to be baked when time pressed (cp Gen. 18⁶ 19³). In Ex. 12³³ ff. [J] also the practice of eating maṣṣōth and the customs connected therewith are traced back to the Exodus, and the narrative still retains the right conception of this unleavened bread as being bread of haste. In Josh. 5¹ f., where the first passover of the Israelites in Western Palestine is described, the eating of unleavened bread is mentioned in conjunction with that of parched corn as both belonging to the festival: it is the first of the fruit of the land to be eaten after that has been sanctified by the preceding *pésah*; henceforth the manna ceases and the people live on the produce of the land.

Thus the meaning of the festival in all its details becomes transparent; of the new harvest nothing was eaten until a consecration sheaf had been presented to Yahwé and thus the whole crop had been sanctified (see TAKATION). This once done, no time was lost in proceeding to enjoy God's gift. The only point about which any uncertainty can still be felt is as to whether the presentation of a sheaf at the sanctuary, mentioned in Lev. 23¹⁰, is the oldest form of the celebration, or whether perhaps the consecration gift did not originally consist of unleavened barley cakes. The latter view is suggested by the parallel case in which unleavened wheat cakes were presented at the close of the harvest at pentecost (Lev. 23¹⁷; cp PENTECOST, § 3); as also by the fact that in later times there still subsisted the custom of presenting to Yahwé, as a meal-offering of the firstfruits, 'corn in the ear parched with fire, bruised corn of the fresh ear' (Lev. 2¹⁴). There is also a more general consideration which tends to the same result; in the oldest period we find the usual gifts to the deity consisting of various kinds of food, and these in the form in which the human offerers were in the habit of using them; leavened bread, wine, oil, boiled flesh. The offering was a meal for the deity—the 'food of Yahwé,' as the expression still runs in Lev. 3¹¹ (cp Benzinger, *H.A.* 432 f.; also SACRIFICE). When accordingly the old law of Ex. 34¹⁸ lays special stress upon the eating of unleavened bread, the sacrificial presentation of maṣṣōth at this festival may almost be assumed as a matter of course. In process of time a more delicate material was preferred; unleavened bread was presented instead of leavened, and in many cases the place of bread is altogether taken by meal (Benz. *H.A.* 450 f.). The substitution of a first-fruit sheaf for the maṣṣōth would admit of ready explanation from the course of this development.

In what has been said we have at the same time reached a secure conclusion as to the origin of the maṣṣōth festival. As a harvest feast with the ritual presentation of first-fruits of the barley harvest, the feast of

4. Canaanitish origin. The maṣṣōth festival. As a harvest feast with the ritual presentation of first-fruits of the barley harvest, the feast of

maṣṣōth presupposes agriculture and a settled life in Canaan. Elsewhere (see FEASTS, § 3) expression has been given to the conjecture that maṣṣōth, as well as the other feasts, was of Canaanitish origin. We have, it is true, no direct evidence of the existence among the Canaanites of any such spring festival; but a thanksgiving harvest festival is attested in Judg 9²⁷, and to presume a corresponding festival at the beginning of harvest is not too hazardous. The Israelites themselves, as will be shown immediately (§ 7), brought with them out of the wilderness an entirely different festival which they subsequently combined with that of maṣṣōth. The very fact that their passover was not changed into a harvest festival, that the harvest festival as an independent feast was combined with the passover, points conspicuously to the conclusion that this spring festival was not an institution which the Israelites had developed on their own account—that it had been found by them when they came, and taken over by them, as an old-established custom. They learned all the practices of agriculture from the Canaanites, and so also in the forefront of these the custom of presenting to the deity their tribute of the produce of the soil. Elsewhere (PENTECOST, § 6) the conjecture is offered that originally perhaps the Canaanites and the Israelites had only one harvest festival in spring, with the meaning just indicated, and that this spring festival divided itself into two only in the course of the subsequent development.

It is obvious that, thus interpreted, the maṣṣōth festival could not originally have been connected with any definite day. In the ancient ordinances of J and E, referred to at the beginning of this article (§ 1), it is assigned, in a quite general way, simply to the month Abib ('green-ears month,' or 'harvest month'). Neither is it a festival celebrated in common by the entire people at once. In Palestine harvest falls at very different dates according to the locality.

In the Jordan valley it may occasionally begin as early as in the end of March, and normally in the beginning of April; in the hill country and on the coast it falls, on an average, some eight to ten days later, whilst in the colder and more elevated districts, such as those about Jerusalem, it may be even three or four weeks later. Cp AGRICULTURE, § 1.

Thus, the feast of the beginning of harvest was celebrated at very different dates at the various sanctuaries throughout the land; but in every case it was celebrated as a *ḥag*—i.e., as a mirthful festival with dances and processions and joyous sacrificial meal (see FEASTS). As distinguished from the family festivals, properly so called, which were celebrated within the domestic circle, and from the clan festivals which were attended only by the members of the clan, this festival was, like the two other great feasts of the year, a public one which brought together the entire community of the place. Hence also the precept in J, that all the males are to appear before Yahwé. An appearance 'before Yahwé' could not be made at every village or on every *bāmāh* (see HIGH-PLACE) where perchance some sacrifice had at one time or another been offered; it could be made only at one of the greater sanctuaries where there was a *bēth Yahwé*, a 'house of Yahwé' of some sort, with an ephod or other sacred object, as, for example, at Shiloh. In the older time, it is true, pilgrimage was wont to be made only once a year to such a sanctuary (1 S. 13); in this respect therefore the precept of J expresses not the oldest prevailing custom but a later development.

Alongside of this explanation of the feast as a harvest one, there arose also, at a comparatively early date, another which interpreted it as commemorative of the Exodus. In Ex. 34¹⁸, indeed, the more precise specification of the date of celebration ('in the month Abib, for in the month Abib thou camest out from Egypt') is by many scholars attributed to the deuteronomic redaction (Wellh. *CH*⁽²⁾ 331 f. (3) 333 f.: in this case the same will apply to Ex. 23¹⁵). Still, even should this be so,

the fact remains that J¹ in Ex. 12³⁴ relates how the Israelites in the hurry of their departure had no time to leaven their dough but had to carry it with them, unleavened, in their kneading troughs. The reference here to the maṣṣōth festival and its characteristic feature is unmistakable. Thus in the addition to Ex. 34¹⁸ substantially all that can be attributed to D is merely the extension of the celebration over a period of seven days.

In the preceding paragraphs the maṣṣōth festival has been, so far, disposed of; not so the entire spring festival as it had come to be celebrated

7. Passover. at the beginning of harvest, even as so early a date as that of the old legislation. For this spring festival, as is explained elsewhere (FEASTS, § 2) had belonged to it another integral part, with another name, other rites, and another meaning—to wit, the feast of the passover.

In the old legislation of E (Ex. 23¹⁴⁻¹⁶) this latter feast is not expressly mentioned by the name passover. In the festal legislation of J (Ex. 34), the passover feast is indeed named in v. 25, but only by a later interpolation (see above, § 1). It would be premature to conclude that the thing itself, or even the name, was not known till the time of D. In D's ordinance (Dt. 16^{1 f. 5 ff.}) what has to be regarded as an innovation upon previous custom is undoubtedly the injunction not to keep the passover at home, since it is accompanied by the presentation of offerings such as is lawful only at the sanctuary. What has to be offered is indicated only vaguely (sheep and cattle), the amount being left undetermined. For greater precision we may turn to the precept of J (Ex. 34^{19 f.}), where in immediate connection with the appointment of the maṣṣōth festival in the month Abib the sacrifice of the firstlings of cattle and the redemption of the human firstborn is enjoined. The existence of a real inner connection between the festival and the offering of the firstborn is attested by Ex. 13^{12 f.}, a passage which is perhaps older than Dt., and at any rate has been heavily redacted in a deuteronomic sense. There the offering of the firstborn is explained by reference to the slaying of the firstborn of Egypt and the sparing of the firstborn of Israel at the Exodus.

On the strength of these various indications the passover is accordingly now explained by the majority of modern scholars (W. R. Smith, *RS*⁽²⁾ 463 f.; Wellh. *ProL*⁽⁴⁾, 86 f., Nowack, *HA* 2¹⁴⁷, and others) as a sacrifice of the firstlings of the herd. Dt. undoubtedly also has this view of the meaning of the festival, and therefore finds it unnecessary to say anything further as to the offerings to be offered. So also J, who for the same reason does not require to mention the passover expressly at all alongside of the maṣṣōth festival, but regards it as coincident with the festival of spring. In the case of E, on the other hand, it is possible to ask whether this is really his view. Here we have rather, as regards the offerings of firstlings of the herd, the quite differently conceived precept (Ex. 22^{29b}) that these animals are in each case to be given to Yahwè on the eighth day after birth. In view of this it has been suggested (e.g., by Nowack, *HA* 2¹⁴⁷ n.) that this regulation is a later addition, in accordance with Lev. 22²⁷, made when passover and sacrifice of firstlings had at last come to be completely separated (see below, § 15). The possibility, however, that E should indeed have been acquainted with the passover, yet not with the passover as the feast of the sacrifice of the firstborn but only in a different meaning, and that this is the reason why he does not cite it at all as belonging to the three great harvest festivals, must be left open.

¹ True, the assignment of this passage to J is not undisputed; it is assigned also to E. The case is not substantially altered, however, by this; it makes relatively but little difference in point of time whether we decide that the view in question first finds expression in J or in E.

This view of the festival as being the sacrifice of the firstborn does not, however, give any satisfying explanation of its origin. For the inferences usually drawn in this connection from the meaning of the festival seem on other grounds to be insecure. It is usually assumed that the sacrifice of the firstborn of the herd means for a pastoral people quite the same thing as the offering of the firstfruits of the field in the case of an agricultural people, and that therefore also this passover festival reaches back into the primitive period of Israel's history before the settlement in Canaan. A trace of this is found in Ex. 10⁹ and in other passages of similar import (in J and in E), where it is related that the custom of holding a spring feast to Yahwè gave the occasion for the Exodus. In these passages, however, an essential point is left out—namely, the proof that an offering of firstborn was here in question.

Wellhausen (as above) has sought to show this from the connection of the entire narrative of JE, interpreting the course of the thought as follows: 'Yahwè has a claim to the human firstborn in Israel (who are to be redeemed) and to the firstborn of cattle. The Egyptians hinder Israel from offering the firstborn to Yahwè; in compensation for this privation Yahwè takes to himself all the firstborn of Egypt.' If it is afterwards said that the passover is observed in commemoration of this act of God, all that is meant is that the passover is in full harmony with that old festival and continues it.

Such a connection, however, of the early spring festival with the passover, and of both with the idea of a sacrifice of firstborn, is by no means necessarily implied in the text itself, however well it may harmonise with it, and it will therefore have to be given up as soon as from more general considerations it is found to be improbable. Considerations of this sort are set forth with some fulness elsewhere (TAXATION). Of chief importance is what W. R. Smith (*RS*⁽²⁾ 463) has emphasised—that the idea of a payment of tribute, a due to the deity such as finds expression in the offering of the firstlings, is wholly foreign to the original worship of Israel, and did not arise till after the settlement in Canaan. A yearly offering of the firstborn in which this idea is expressed is thus quite improbable for the earliest period. Robertson Smith, it is true, has sought, in order to escape this difficulty, to explain the offering of the firstborn of cattle in a wholly different way, namely from the sacred (taboo) character attaching to the first birth. That, however, is quite superfluous labour, for we have no evidence of any other offerings of firstborn from the time before the immigration besides the passover itself, and in the case of the passover there are further reasons—to be mentioned immediately (§ 9)—which make this very explanation impossible for the period in question.

Neither does the parallel with the Arabian spring festival compel us to adopt the explanation of the passover as a sacrifice of firstborn.

Formerly Ewald (*Alt.*⁽²⁾ 467) and more recently W. R. Smith (*RS*⁽²⁾ 227 f. 46f.) connected the passover with the yearly offering of the *alâbir* among the ancient Arabians in the month Rajab which corresponds to the spring month Abib. It is, however, by no means absolutely certain that in the case of this Arabian sacrifice we are dealing at all with a regular sacrifice of firstborn, even if it be the case that in Arabia the time of bearing is in spring (W. R. Smith, as above).

Even if, therefore, at the time of D and even earlier, the passover was unhesitatingly regarded as an offering of the firstborn, we still have no evidence of the existence of such an offering for the period before the immigration, nor can it be established as a probability. Much rather is it probable that the custom of offering the firstlings was only a secondary extension of the practice of offering the fruits of the field. If therefore the passover was an ancient Hebrew festival, as Ex. 12²¹⁻²⁷ and all Israelite tradition assume, it must have had another meaning.

In order to see that it had another meaning we have only to turn to the characteristic ritual of

9. Pésah ritual. the *pésah* festival, which has no appropriateness in connection with a celebration of the offering of first-fruits and does not admit of explana-

tion by means of this conception. The ritual, as prescribed in Ex. 12:21-27, is as follows:—The Israelites are to take a sheep (סֹנֵא, ḡš; πρόβατον; Vg. *animas*) according to their families and kill it as the passover (פֶּסַח). Then with a bunch of 'hyssop' some of the blood is to be struck upon the lintel and door-posts—the sign for [the angel of] Yahwè (see DESTROYER) of an Israelite dwelling. This is to be observed as an ordinance for ever.

The age and literary constitution of this passage has been much discussed (cp Budde, *ZATW* 11 197 f. [1891]). Whilst some maintain it to be old and assign it to J, others (e.g., Wellhausen) regard it as of late date and an appendix to the preceding narrative of P. Here also, however, the literary question is again unimportant, for in substance the ritual is certainly more ancient than that given in Ex. 12:20 [P]. For in P the rite that is to be kept up consists in the eating of the paschal lamb (חֶמֶד; πρόβατον; *agnus*), for which minute directions are given, whilst the sprinkling of the lintel and door-posts with the blood is relegated to a quite subordinate place. In Ex. 12:21-27, on the other hand, the chief emphasis is laid precisely upon this sprinkling as the rite to be repeated every year, and the eating of the sacrificial flesh is not enjoined at all; plainly, with the framer of this law it did not require to be mentioned, being regarded as quite a matter of course.

There can, however, be no doubt that this rite as depicted in Ex. 12:1 f. was very old, even although there is no mention of it elsewhere in J, E, and D. Practices of this kind can never have been the free inventions of a later time; indeed, the whole rite from the point of view of P and the later age was obviously something weird and unintelligible. In P ceremonies with sacrificial blood can be performed only by the priest and at the sanctuary, not in private houses by laymen; and this is the reason why P represents the entire ceremony as valid only for the first passover in Egypt, and makes the celebration for all subsequent time to consist in the solemn eating of the paschal lamb.

Obviously, the rite in question can have nothing whatever to do with the conception of an offering of first-fruits, and has to be explained, if explained at all, in some other way. **10. Meaning of blood rite.** The narrative itself in Ex. 12:1 f. offers the explanation we need. Here the sprinkling with the blood is represented as the means by which the Israelites were protected from the 'Destroyer.'

The narrative will also have it that the name *pēsah* comes from *pāsah* because 'Yahwè will pass over' (פָּסַח) the door, and will not suffer the Destroyer to come into your houses' (v. 23). On this view the passover was not originally a regular spring festival, but rather a solemn observance by which it was sought to gain protection in times of pestilence and the like (so also Marti, *Gesch. Israelit. Rel.* (9) 40 f.). The idea lying at its foundation is quite the same as in the case of sacrifice in general; by means of the blood-rite is to be re-established that close fellowship with the deity by which just at such times as these the most effective protection is secured. The sprinkling of the blood upon the door-posts and lintel rather than elsewhere may perhaps have had its origin in the thought that there the household gods whose protection it was sought to secure had their seat. The ceremony observed in the case of the slave who voluntarily chose to continue in his master's service points also in the same direction: his master shall bring him to the 'ēlōhim and place him at the door or door-posts (Ex. 21:6); by the 'ēlōhim we ought probably here also to understand the household gods.

We have the less reason for declining this explanation of the passover, laid to our hand by the narrative itself, since similar usages are met with also in ancient Arabia. Marti (*op. cit.*) justly points to the custom there of sprinkling the tents of an army setting out on its march with blood, as also to the practice of the Bedouins, in time of pestilence, of besprinkling their camels on the neck and side with sacrificial blood in order to protect their herds.

Another possible interpretation¹ of the passover

¹ A complete list of explanations of the passover (*pēsah*) cannot be attempted here. A few may be singled out. Chr. Baur (*Thib. Ztschr. f. Theol.* 1832, p. 40 f.) regarded it as a propitiatory sacrifice, connected with the spring festival, which was offered to God as a substitution for the human male first-born. Vatke (*Rel. d. AT* 492 f.) and others bring the passover into line with the spring festival held among many peoples at the

would be that put forward by Ewald (*Alt.* (8) 460 f.) and others, that it was a sacrifice of propitiation and purification (which preceded [so Ew.] this offering of the first-fruits). In support of this view reference is naturally made to the fact that 'hyssop' is employed elsewhere in connection with purification ceremonies (Lev. 14:64 f. Nu. 19:6, cp Ps. 51:9[7]). Here too analogous rites among the Bedouins can be pointed to (sprinkling with blood a rite of lustration, Palmer, *The Desert of the Exodus*, 118; Goldziher, *Le culte des saints chez les Musulmans*, 31). It does not seem necessary, however, to travel beyond the account given in Ex. 12:1 f. itself for an explanation.

One other point in the ritual demands particular notice: viz., the fact that the *pēsah* has to be slain in the evening—a regulation which does

11. Why an evening rite. not occur in the case of any other sacrifice. True, this regulation is first met with in D (Dt. 16:6); but the custom as such was certainly ancient, and the narrative of Ex. 12:1 f. also makes it clear that evening was the proper time for the paschal sacrifice (cp v. 22b), and Ex. 12:42a may be cited in addition, to the same effect. Here what is being said is that the night is to be for Israel לַיְלֵי שְׂמֵרָה. In 42b the rendering 'night of vigil of Yahwè,' etc., is questionable, indeed, as also is the other point whether this half of the verse comes from the ancient source. The importance attached to the observance of this time-determination in Dt. 16:6 shows that the matter is not merely secondary but is essentially connected with the observance of the festival, and thus with its fundamental significance. The custom accordingly can have its origin only in this, that the festival was somehow connected with the phases of the moon, doubtless in the sense that the practices were carried out at new moon or at full moon, and were then held to have special efficacy.

Let us briefly summarise our results as to the development of the great spring festival down to the time of D.

12. Result: Among the ancient nomad Hebrews it had been the practice on special occasions, for protection against pestilence **early development.** and the like, to sprinkle the door-posts (tent-poles) with the blood of a sheep. The custom afterwards became fixed; every year in spring such a sacrifice came to be offered by each separate family. In this transformation the meaning of the custom of course came to be obscured, and it is always possible that the idea of a lustration gave new contents to it. In any case the passover was, and continued to be in the first instance for some time after the immigration into Canaan, a family festival—having absolutely nothing of the character of a popular festival, a *hag*. In Palestine the immigrating Israelites found among the agricultural Canaanites the custom of consecrating to the *bā'al* of the district, every spring at the beginning of harvest, the first-fruits of the corn, and of celebrating a festival in this connection. The idea lying at the foundation of the observance—that the first-fruits belong to Yahwè—was soon carried over by them to the firstlings of the herd also. In offering these first-born the practice does not seem to have been in the first instance uniform; whilst the Book of the Covenant enjoins that

time of the equinox: *pēsah* (=passing over, transit) according to this view means the triumphant passage of the sun through the equinoctial point into the sign of Aries. [According to Toy (*JBL* 16 178 f. [1897]), פָּסַח, from פָּסַח, to 'leap, limp,' denotes properly a peculiar ritual dance, and hence became the designation of the old nomadic Hebrew spring festival. The lamb offered would thus be 'the lamb or sacrifice of the *pēsah*,' and finally the term פָּסַח would come to designate the feast or the lamb. Cp DANCE, §§ 4, 5.] On dogmatic grounds, so as better to controvert the Roman Catholic doctrine of the sacrificial character of the eucharist, the sacrificial character of the passover has often been denied altogether (Lundius, *Jüdische Heiligtümer*, 5 12 80; Hofmann, *Schriftbeweis* (2), 1270, and others); but this certainly cannot be maintained, as can be seen even from the expression used in Ex. 12:7 ('the sacrifice of Yahwè's passover').

the offering be made always on the eighth day after birth (see above, § 8), J orders that offerings of this description are to be made yearly at the spring festival, the feast of maššōth. At the same time also, or perhaps even at an earlier date, this spring festival is changed from being a mere harvest celebration to being a feast commemorative of the Exodus. This last change happened also, contemporaneously or perhaps even earlier, in the case of the passover feast. As early as the time of J at any rate we find it already interpreted in this commemorative sense and the characteristic customs explained by this reference (Ex. 12₂₁ f.).

Thus in the time of J there were two adjacent festivals: (1) a popular *hag*, the feast of *maššōth*, at which also the firstlings of cattle were offered, and (2) a sacrifice celebrated within the family circle, the *pēsah*, at which the sacrificial victim was slain with a specially solemn ritual. Both festivals fell approximately at the same time, the beginning of spring; both were commemorative of the Exodus; and thus it becomes easy to understand how the two should ultimately have been brought into immediate connection and the *pēsah* slain at the beginning of the maššōth feast. Then followed quite easily and naturally the fourth step—that of bringing the offering of the first-born into connection with the *pēsah*, which then came to be taken quite generally as a firstling-sacrifice, but, of course, with retention of the ancient ritual. If at this stage it was still desired to retain the commemorative association with the Exodus, it became expedient to substitute for the old reference to the 'sparing' of the people the new explanation that all the first-born belonged to Yahwè because at the Exodus he had slain the first-born of the Egyptians, but spared the Israelites.

We find this last step, with all the features we have mentioned, in D as we now have it in Dt. 16₁ f. (The question whether this whole passage is of one and the same origin need not be gone into here, for if we assume that it is not, the union of the two festivals will in any case have to be placed soon after the date of original D.) The stage immediately preceding this is represented by J, and the Book of the Covenant indicates the still earlier steps in the development.

In our attempt to picture to ourselves the course of the development we must not, however, forget that we are unable to pronounce with certainty and in detail as to the transition from one to another of the various conceptions of the two festivals.

It is, for example, quite possible to imagine another course of the development from the stage which we find in E, where the passover as well as the sacrifice of the first-born both still appear as distinct from the maššōth feast; the next step may have been that the passover was first brought into connection with the offering of the firstlings of the herd, and only subsequently, after receiving this interpretation, became amalgamated with the maššōth feast. What specially stands in the way of any more accurate knowledge of the intermediate stages of this development is our ignorance as to the exact form of the legislation of J. The rest of the older literature is silent altogether as to the passover; and we are expressly informed that the passover as enjoined in D was felt to be something wholly new at the time of the finding of the law: 'surely there was not kept such a passover from the days of the judges' (2 K. 23₂₁ f.).

After the amalgamation of the two feasts, the ritual of the spring festival is laid down in D as follows:—The

13. Ritual in D. festival begins with the *pēsah*; sheep and cattle (אֵימֹן וְבָקָר) are to be sacrificed at the sanctuary at even. No leaven is to be eaten, nor may any of the flesh sacrificed at the sanctuary remain over until morning; it is to be eaten there, boiled, that same night. The day after, the participant is free to go home. At home the festival is continued; for seven days no leaven is to be seen, on the seventh day there is to be another festal gathering, and, as being a special festival, this day is to be observed by Sabbatic rest (Dt. 16₁₋₈). The extension of the festival over seven days we may safely take to be an innovation on J and E.

The development of D's fundamental idea—that of

the centralisation of the worship—is seen more plainly here than in the case of the other great feasts. The passover completely loses its specific and characteristic rite—that of the sprinkling of the lintel and door-posts with blood. With a celebration no longer at the separate home but at the common sanctuary, this rite ceases to be practicable. Precisely here, however, we must not regard it as impossible that this particular piece of ritual may already have fallen into abeyance before the time of D. If the conception of the passover as an offering of the first-born may be presumed to have arisen before the time of D, the rite in question must already have lost its peculiar importance. Another inevitable consequence of the centralisation of the worship is the fixing of the date of the feast; as early as Ezekiel we find the fourteenth day of the first month already presupposed as fixed (Ezek. 45₂₁). In other respects the feast participated in the general changes which resulted from the centralisation of the worship (FEASTS, § 9 f.); but the change entitled to special prominence is that it has to be observed at the sanctuary.

The development subsequent to D is clear. Ezekiel does not deal with the ritual in detail, determining only what the sacrifices are to be. On the

14. After D. 14th day of the month (first of the festival), the prince is to slaughter, for himself and all the people, a bullock for a sin-offering, and then on each of the seven days of the feast a he-goat for a sin-offering, seven bullocks and seven rams for a burnt-offering, each with the appropriate meal-offering, an ephah of meal and a hin of oil for every bullock and every ram.

Singularly enough, H has nothing to say about the passover (Lev. 23₉₋₁₄). It speaks only of maššōth, as an agricultural festival at which the first-fruit sheaf is to be brought to the priest, who 'shall wave the sheaf before Yahwè to make you acceptable.' This is to be done 'on the morrow after the sabbath,' and on the day of the waving a yearling lamb is to be offered as a burnt-offering, along with a meal-offering of two-tenths of an ephah of fine flour mingled with oil and the fourth part of a hin of oil as a drink-offering. The specifications of this law go back accordingly to a period earlier in time than the amalgamation of *pēsah* and *maššōth*, which we now find in the existing text of D. Verses 4-8 are a later addition to H from P.

In P, finally, the amalgamation of the two feasts is complete, quite as in D; but in one noteworthy point the law of P marks a retrogression from D.

15. In P. The passover is again made a domestic festival. The regulations laid down in connection with the narrative of the Exodus are given in Ex. 12₁₋₂₀ 43-50 (cp Lev. 23₄₋₈ Nu. 9₁₀₋₁₄).

On the tenth day of the first month every Israelite family is to provide for itself a yearling lamb or kid without blemish. If the household is too small for a lamb, neighbours are to be called in to make up the deficiency. The festival, properly so-called, is to begin on 14th of Nisan, when the lamb is to be slaughtered at even. The lintels and door-posts of the houses are to be sprinkled with the blood; the flesh must be eaten the same night—roasted, not raw or sodden with water. No bone of it is to be broken, and the head must not be severed; nothing of the flesh may be carried from the house. It is to be eaten with unleavened bread and bitter herbs; all participants are to present themselves at the meal equipped as for a journey. Of the flesh nothing must remain over till the morning; anything that happens to remain uneaten must be burnt.

The meaning of some of these details is no longer clear. We do not know, for example, why the lamb had to be chosen exactly on the tenth day of the month. Dillmann (*ad loc.*) suggests that the tenth day, generally, had a certain sacred character in ancient times—traces of which sanctity still survive in Islam. That the lamb has now to be roasted, not boiled as in D, is merely a particular instance of the general principle by which sacrificial flesh ceased to be boiled (Benzinger, *Archäol.* 451; see further, SACRIFICE). The injunction that no bone is to be broken, nor the head severed, may perhaps be intended to symbolise the oneness of all participants

PASSOVER

in the meal. The command to burn whatsoever remains over doubtless has in view the keeping of what is sacrosanct from profanation (cp the precept with reference to the flesh of the sin offering, Lev. 8:17). The bitter herbs at first meant only that such herbs were the usual condiments accompanying a meal; the custom, without any particular meaning in itself, ultimately rose to the dignity of a law. C renders $\pi\kappa\rho\iota\delta\epsilon\varsigma$, wild lettuce (cp *Plin. H.V. 841*) or endive (*Dioscor. 2:160*, Theophr. *H.Pl. 7:11*). Both herbs are found in Egypt and Syria. Cp further BITTER HERBS.

Participation in the passover was strictly enjoined on every male Israelite (according to later usage, from the fourteenth year onwards). All participants had of course to be ceremonially pure. So much weight is laid on this participation by every individual, that special regulations are given for cases in which participation was impossible.

The individual who is unclean or on a journey is bidden to observe the rite on the fourteenth day of the second month; but unless these sufficient reasons can be alleged the penalty of omitting the observance is that of 'cutting off' (see CUTTING OFF). No foreigner is allowed to eat the passover; but the circumcised slave may, and indeed, all non-Israelites who have accepted circumcision.

The main difference from the old ritual lies in the fact that the characteristic rite with the blood which formerly was the central one is no longer so. Looking at the letter of the law one can even doubt whether this particular rite was ever intended to be observed for all time. In the first instance, it is enjoined only for the first celebration of the passover, whilst in the detailed regulations as to the manner of eating, it is continually repeated that they are to be constantly observed. On the other hand, the eating now so much emphasised, for which quite precise instructions are given, is not so much as mentioned in the old legislation. It need hardly be added that the passover is now divested of its sacrificial character; it is henceforward to be slain no longer at the temple but at home.

The *massôth* feast likewise is conjoined with the passover in a manner differing somewhat from that of D. It begins on the day after the passover (not with the passover itself), so that henceforward passover and *massôth* together extend over eight days, whilst in Exodus and D they last only for seven (Nu. 28:17 Ex. 12:18). The main thing in the *massôth* feast is the eating of unleavened bread.

No leaven may be seen in Israelite houses during all these days, and whoso even eats leaven during this period is to be 'cut off'. On the first and on the seventh day of the feast a solemn assembly is to be held at the sanctuary and a sabbath rest observed. For each of the seven daily sacrifices are enjoined on a large scale (Nu. 28:17 ff.): daily two bullocks, one ram, seven yearling lambs without blemish as a burnt offering, besides one he-goat as a sin offering; the accompanying meal-offerings are three-tenths of an ephah of fine flour with oil for the bullocks, two-tenths parts for the ram, one-tenth for the lamb—all this of course over and above the daily burnt-offering and drink-offering.

In one part of the ritual we still find a trace of the original meaning of the feast—in that part, namely, where the sheaf of first-fruits is offered on the day after the sabbath (Lev. 23:9). Which day is here meant is much disputed.

The prevailing view of Jewish tradition is that the 'sabbath' means the first day of the festival itself, in other words the day after the slaying of the passover lamb—i.e., the 15th of Nisan. It is held to be called a sabbath as being a principal feast-day. Such a designation for the days of the feast, it must however be observed, is nowhere else met with. The Sadducees and Karaites, on the other hand (*Mishch. 65 a, Ta'ani'ith 1, 2*) understand by the expression the first ordinary sabbath day falling within the period of the festival, with this difference, that the Karaites when the first day of *massôth* is a 'day after the sabbath'—i.e., a Sunday—cause the offering of the sheaf to be brought, whilst the Sadducees in this case hold the seventh *massôth* day to be the sabbath of the law, and postpone the offering of the sheaf till the day after: both alike are inconsistent with the letter and the meaning of the law.

To interpret the law, we must not take it in connection with the other regulations of P which fix a definite date, for the law itself determines the occurrence of the

PASSOVER

feast only in accordance with the beginning of harvest. If we are not to resort to violence, we can therefore only understand the sabbath as meaning the first sabbath in harvest. As the harvest, of course, never began on a sabbath, the offering of the sheaf could never fall outside the period of the *massôth* feast. This last is a possible eventuality in the interpretation of Nowack and others, according to which the first day of the harvest week, that is, of the week on which the harvest begins, is intended. See further, Dillmann on Lev. 23:11, and Nowack, *HA 2:176 ff.*

In the later observance of the feast it is a remarkable fact that not P but D was followed—at least in the

16. Later. main point, that of the slaying of the lamb at the temple. As early as in 2 Ch. 35:1 f. at Josiah's passover we find the slaughtering represented as being done in the court of the temple and by the hands of the Levites. The blood of the paschal lambs is as in the case of every other sacrifice sprinkled by the priests on the altar and the fat burnt; besides the paschal lambs other animals also are sacrificed as burnt offerings. It will hardly be assuming too much to suppose that the Chronicler here had in view the passover celebration as it was in his own time. The sacrificing of the passover by Levites and priests is confirmed also by Ezra 6:19 for the time which it covers, and by the practice of later Judaism (cp *Pes. 5:1 ff. 6:34*).

The celebration at the time of Christ was in this wise. The passover could be slain only at Jerusalem; this

17. Time brought an immense concourse together. Josephus (*B/Vi. 9:3*) tells us that on one of Christ. occasion (some years before the siege of Jerusalem by the Romans) the number of paschal lambs rose to 256,500; as at least ten men must be reckoned to each lamb this would give us more than two millions and a half of men, not counting those who were ceremonially disqualified. Plainly this is a great exaggeration. Still it is certain that the concourse was so great as to make it impossible for it to find room within the city itself. Till midday on 14th Nisan the houses were being rid of all leaven (*Pes. 13: f. 36*). In the afternoon the paschal lambs were slaughtered in various quarters of the town, their blood poured out by the priests at the altar, and the sacrificial portions offered. Then the lambs were again taken back by the several families to their homes. Not fewer than ten men and not more than twenty ate one lamb together. The bitter herbs and unleavened cakes were dipped into a kind of sweet sauce called *harôseth*.¹ The meal began with a cup of red wine, blessed by the head of the house. The eldest son then asked the father what was meant by this feast and the answer was given by the father or, it might be, by the person who read the narrative of the institution. The *Hallel* (*Pss. 113-114*) was then sung, the second cup was drunk, and thereupon the meal strictly so-called was eaten. This over, with a prayer of thanksgiving the third cup was brought forward, and blessed as before by the head of the house. While *Pss. 115-118* were being sung, a fourth cup was drunk. The Samaritans have preserved a survival of the ancient blood-rite in so far as they mark the foreheads of their children with the blood (cp the description of the Samaritan celebration in Baed. *Pal.*⁽²⁾ 226 ff.).

PASTOR. See SHEPHERD, MINISTRY, § 47.

PASTORAL EPISTLES, the name given to three epistles which bear the name of Paul, and of which two are addressed to Timothy and one to Titus. They are marked off from the other Pauline epistles by certain common characteristics of language and subject-matter, and are called 'pastoral' because they consist almost exclusively of admonitions for the pastoral administration of Christian communities. None of the Pauline epistles have given greater ground for discussion. As they now stand, they are commonly denied by modern critics to Paul, though efforts are being made to find some partial justification of the church tradition (cp EPISTOLARY LITERATURE, § 7, n. 2; col. 1327). See TIMOTHY (EPISTLES), TITUS (EPISTLE).

PATARA (ΠΑΤΑΡΑ,¹ Acts 21 i). Patara is described as a 'great city with a harbour, and temples of Apollo' (Strabo, 666). It lay 5 or 6 m. SE. of the mouth of the river Xanthus, and was, in fact, the port of the city of Xanthus which lay 10 stades up the river (Appian, BC 4 81, Βροῦτος ἐς Πάταρα ἀπὸ Ξάνθου κατῆε, πᾶν εὐκλείαν ἐπινειὼ Ξάνθιον). It gained its importance from its situation on the SW. coast of Lycia, due E. of Rhodes, and consequently on the track of ships trading between the Ægean and the Levant. Therefore Paul, after passing Rhodes, came to Patara, voyaging from Macedonia to Palestine, and there found 'a ship sailing over unto Phœnicia.'² The course thence was S. of Cyprus directly to Tyre (v. 3). It would seem that, for ships sailing to Syria, Patara was the point of departure for the direct run through the open sea (correct force of διαπερῶν in v. 2); whilst, for those going in the opposite direction, Myra, which lay about 35 m. to the E., was the point at which the Karamanian coast was struck (cp Acts 27 5). A good parallel to the entire voyage of Paul on this occasion is found in Livy 37 16,³ for this must at all times have been the highway of maritime traffic. The connection of Patara with Phœnicia is illustrated by the fact that, during the war of Rome with Antiochus (190 B.C.), C. Livius was stationed there in order to intercept the Syrian fleet (Livy, 37 15).

Owing to its commercial importance, Ptolemy Philadelphus of Egypt improved the city, and renamed it 'the Lycian Arsinoe' (Ἀρσινόη ἐν Λυκίᾳ, Strabo, 666); but this title soon fell into disuse. The temple and oracle of Apollo at Patara were celebrated (cp the later coin-types, and Herod. 1 182, Verg. Æn 4 143, Hor. Od. iii. 4 64, Paus. ix. 41 i). A large triumphal arch with three openings, still standing, bears the inscription 'Patara, the metropolis of the Lycian nation'; and there are many other remains, including those of baths built by Vespasian.

For description, see Beaufort, *Karamania*, 5 f.; Spratt and

¹ Pliny 5 100, *Patara, quæ prius Pataros*. On coins *patarazē*; cp Kalinka's 'Zur historischen Topographie Lykiens,' in Kiepert's *Festschrift*, 1898, p. 161 f. The coins begin about 440 B.C. Πάταρα is, of course, a neuter plural.

² The reason for Paul's transhipment at Patara lay in the fact that 'he hastened, if it were possible for him, to be at Jerusalem the day of Pentecost' (Acts 20 16). The ship in which he had come to Patara was either going no farther, or was intending to call at the Pamphylian and Cilician ports.

PATHEUS (ΠΑΘΑΙΟΥC [B]), 1 Esd. 9 23 = Ezra 10 23, ΠΕΘΑΗΛΙΑΗ, *z.*

PATHROS (Πῆτρος) is referred to in four passages:

Is. 11 i (βαβυλωνίας [BNAQ], *Phuthros*); Jer. 44 i (παθουρος [gen.] [BNAQ]), v. 15 (παθουρη [ik. θουρη, R¹], γη παθουρος [Q], *Phathuros*); Ezek. 29 14 (φαθουρος [gen.] [BQ], παθουρος [A], *adnot. ψουμον πατμα [QmG]*), 30 14† (φαθουρος [B], παθουρος [A], φαθουρος [Q], *Phathuros*).

It is usually held that Pathros (= Eg. *p3 t3 rsii*, 'the south land,' Copt. *pto rēs* or *pteres*; Ass. *paturisi*) means Upper Egypt (see EGYPT, § 43; GEOGRAPHY, § 15 [6]; Erman, *ZATW* 10 118 [1890]; Del. *Par.* 310; Schr. *KGF* 283 f.). Plausible as the theory is, it must be re-examined in the light of the belief¹ that prophecies as well as narratives have sometimes been so edited as to obtain a new and very different geographical and historical reference. That 'Pathros' means 'upper Egypt' in the passages as they now stand, cannot be denied; but it has yet to be ascertained whether the original writer really had 'upper Egypt' in his mind. (a) In the first passage (Is. 11 i) there is clearly no certainty that this is the case. Now that it has been maintained that there was probably an Edomite captivity of the Jews (see OBADIAH [BOOK], § 7), and that 'Asshur' is not unfrequently miswritten for 'Geshur,' and 'Babel' and 'Elam' for 'Jerahmeel,' and also that in Gen. 10 14 PATHRUSIM [*g. v.*] is most probably a distortion of Šarēphāthim, it becomes, to say the least, possible that the original reading of Is. 11 i was, 'from Geshur and from Mišrim, and from Zarephath, and from Cush, and from Jerahmeel, and from the Zarhites, and from the Arabians' (cp 6's βαβυλωνίας = בבל = כנען, and see *Crit. Bib.*). (b) In Jer. 44 i we read of 'all the Jews who dwell in the land of מצרים, who dwell at Migdol, and at Tahpanhes, and at Noph, and in the country of Pathros,' and in v. 15 of 'all the people that dwell in the land of מצרים, in Pathros.' Beke, however, has already expressed the view (*Orig. Bib.* 1 307) that the places referred to are in a N. Arabian מצרים. This appears to be correct; only it must be added that the names, except Migdol, have been corrupted. Migdol (a common Hebrew term) is not improbably the Migdal-cusham which underlies the Migdal-shechem of Judg. 9 46 (see SHECHEM, TOWER OF); Tahpanhes and Noph have arisen out of NAPHTUHIM [*g. v.*]; Pathros = Zarephath. (c) Ezek. 29 14 occurs in a prophecy which (like that in Jer. 46) has not improbably been altered and expanded from a prophecy on Mišrim (Mušur in N. Arabia); cp PARADISE, § 1. The original reading must have been very different from what now stands in MT, and very possibly was, 'and I will cause them to return to the land of Zarephath, to the land of Jerahmeel.' (d) In Ezek. 30 14 the traditional text reads 'Pathros, Zoan, No.' But the original reading of the second name was probably 'Zoar'—*i. e.*, 'Mišsur' (see ZOAR), whilst 'No-[anon]' seems to have come from 'Ammon' (a not uncommon corruption of Jerahmeel), and 'Pathros' from 'Zarephath.' Cp PI-BESETH, TAHPANHES. The student will remember that when the ancient editors have been proved to have used much uncritical conjecture, it is the duty of modern critics to employ the ordinary means of critical restoration of the original text. T. K. C.

PATHRUSIM (Πῆτροσιμ), a 'son' of Mizraim, Gen. 10 14 (ΠΑΤΡΟΣΩΝΙΜΙΑ [A and A² in I Ch.], ΠΑΤΡΟΣΩΝΙΜΙΑ [E], -ΙΕΙΜ [L]), 1 Ch. 1 12† (ΦΑΘΕΡΩΣΙΜΙΑ [L, om. B]). If, however, we are to point מצרים, Mišrim, 'פ' will be a corruption of פִּתְרִים, Šarēphāthim (the list containing only S. Palestine peoples). See MIZRAIM, § 2b.

¹ See *Crit. Bib.*, and cp GILEAD, MERATHAIM, PARADISE, SHECHEM, TYRE.

Marquart (*Fund.* 26) would read מִצְרַיִם in Jer. 46^{9b} for the superfluous מִצְרַיִם. If so, it would be best to go a step farther and read מִצְרַיִם, and suppose that a prophecy against Misraim has been altered and expanded into a prophecy against Mizraim. Cp PROPHET, § 45. T. K. C.

PATMOS (Η ΠΑΤΜΟΣ; Rev. 19). Patmos, now called *Patino*, is a barren rocky island, about 10 m.

1. **Site.** long and 5 m. wide (Pliny, *HN* 4.23, *Patmos, circuitu triginta millia passuum*), in that section of the Aegean which was called the Icarian Sea, between Samos and Cos (Strabo, 488). It would, therefore, be a feature in the scene viewed by Paul in his voyage from Samos, 20 m. to the N., to Cos (Acts 20.15 21.1; cp E. D. Clark, *Travels*, 2.194). It is first mentioned by Thucydides (3.33=428 B.C.)—its sole appearance in ancient history, though the ruins of the Hellenic town on the height between the inlets of *La Scala* (E.) and *Merika* (W.) would point to a certain degree of prosperity, of which we have otherwise no hint. The island must, in fact, have been of some importance, as its harbour is one of the safest in all the Greek islands.

In the Middle Ages also it flourished, and from its palms was known as *Palmosa*: the degradation of the vegetation is somewhat foolishly attributed to Turkish rule. The northern and southern portions of the island are united by two isthmuses, only a few hundred yards wide, between which rises the ruin-crowned height above mentioned. On the E. of the southernmost isthmus lies the port: the town is farther S., round the Monastery of St. John.

Patmos owes its celebrity in NT history entirely to the mention of it in Rev. 19. Under the Empire,

2. **Relation to John.** islands were largely used as places of banishment—e.g., Domitian banished Flavia Domitilla, suspected of being a Christian, to Pontia (Eus. *HE* iii. 18.5; Dio Cass. 67.14).¹ It has been suggested by some writers that the influence of the natural features of the view from the highest summit of the island may be traced in the imagery of the Apocalypse: references to the sea are unusually frequent (Rev. 4.6 6.14 13.1 15.2 16.20). [But see APOCALYPSE; also JOHN (SON OF ZEBEDEE), § 9.]

The entire southern section of the island belongs to the Monastery of St. John the Divine (founded by St. Christodoulos in 1088, on the site of an ancient temple), on the summit of the highest hill (*St. Elias*, about 800 ft.). Lower down is a second monastery,

that of the Apocalypse, in which is shown the cave (τὸ σπήλαιον τῆς Ἀποκαλύψεως) wherein the Revelation was delivered. The cave is now a chapel: 'in one part of the roof a rent is pointed out, where the rock was broken at the commencement of the Revelation, and from a somewhat deeper cleft in this the Divine voice is said to have proceeded' (Tozer, *The Islands of the Aegean*, 178 f.).

For description of Hellenic ruins, see *Memoirs Relating to Turkey*, ed. Walpole, 2.294 f.; H. F. Tozer, *The Islands of the Aegean*, 1890, p. 178 f. Most complete account by V. Guérin, in his *Description de l'île de Patmos et de Samos*, 1856; with map of the island. For the legends of St. John at Patmos, see the MS of the monastery, entitled *Αἱ περιόδοι τοῦ Θεολόγου*, composed by Prochorus his disciple (analysed by Guérin, *op. cit.* 20 f.; it contains the composition of the Gospel only, not the Apocalypse). W. J. W.

PATRIARCH (ΠΑΤΡΙΑΡΧΗΣ, *i.e.*, head of a ΠΑΤΡΙΑΔ or family), a designation applied in NT to Abraham (Heb. 7.4), to the twelve sons of Jacob (Acts 7.8 f.), and to David (Acts 2.29). In 4 Macc. 7.19 mention is made of οἱ πατριάρχαι ἡμῶν Ἀβραάμ, Ἰσαάκ, Ἰακώβ, and in 4 Macc. 16.25 of Α. καὶ Ι. καὶ Ι. καὶ πάντες οἱ πατριάρχαι. In 1 Ch. 24.31 Ὁ ὄναρ τῶν πατέρων (‘principal fathers’) is represented by πατριάρχαι Ἀραάβ [B], πατριαὶ Ἀραῶν [A], πατριὰ τοῦ πρώτου [L]; in 2 Ch. 19.8 26.12 πατριάρχαι (οἱ ἀρχόντες τῶν πατριῶν [L] in 2 Ch. 26.12) renders τῶν πατέρων ὄναρ (AV ‘chief of the fathers,’ RV ‘head of fathers’ [houses]), in 1 Ch. 27.22 ἄρχων (AV ‘princes,’ RV ‘captains,’ οἱ ἀρχόντες [L]), in 2 Ch. 23.20 ἡγετῶν τῶν οἰκῶν (EV ‘captains of hundreds,’ τοὺς ἑκατοντάρχους [L]).

PATROBAS (ΠΑΤΡΟΒΑΣ, abbrev. from Patrobius) is one of five who with ‘the brethren that are with them’ are saluted in Rom. 16.14. They seem to have been heads of Christian households, or perhaps class leaders of some sort.

The lists of Pseudo-Dorotheus and Pseudo-Hippolytus represent Patrobas as bishop of Puteoli. Cp ROMANS.

The name was borne by a contemporary of Nero, a freedman; cp Tac. *Hist.* 1.49.2.95.

PATROCLUS (ΠΑΤΡΟΚΛΟΥ [AV]), the father of NICANOR [*q.v.*] (2 Macc. 8.9).

PAU (יָפֹ; פֹּרְוֹר [ADEL]), Gen. 36.39, or פֹּאִי (יָפֹ; פֹּרְוֹר [BA], פֹּלֹוּדָא [L]), 1 Ch. 1.50, the name of the city of Hadad, a king of Edom. Probably we should follow Ⓢ and read יָפֹר, פֵּעֹר (so Ball). See BELA, 2, HADAD (2), PEOR.

Paul, an apostle of Jesus Christ, though not one of the original twelve, but only at a later date added by the Lord himself to the circle of his more intimate followers, soon became one of the most zealous, if not the most zealous, of them all. A Jew by birth, brought up in

¹ Especially so used were the islands of Gyara (*Gyarus*) and Seriphos in the Aegean (cp *Tal. Ann.* 8.68 4.30 15.71; *Juv. Sat.* 1.73, *quid aliquid brevis Gyaris et carcere dignum*, and *id.* 6.563 10.170).

accordance with the strictest precepts of the law, bitterly opposed to the Christianity then beginning to emerge into prominence, as a youth he was one of the witnesses of the martyrdom of Stephen (Acts 7.58-8.3). Anon, while 'breathing threatening and slaughter against the disciples of the Lord' (Acts 9.1), his career is arrested and he is converted on the road to Damascus (Acts 9.2-22). Once a preacher of the gospel, he hence-

¹ The reading is certainly false. Targ., Pesh., Vg., and many Heb. MSS read יָפֹר.

forth, without hesitation or delay, devotes to its service for all the rest of his life all his rare gifts of intellect and heart, his unmatched courage, his immovable fidelity. Finally, after long and indefatigable wanderings, including three great (missionary) journeys, probably about the year 64 A.D., while still in the full vigour of manhood, he suffered martyrdom at Rome. Further details will be found in the Acts of the Apostles, and in his 13 (14) canonical epistles. Apart from one or two comparatively unimportant traditions, these are our sole and abundantly sufficient sources of information.

So thought and spoke almost all scholars of all schools, whether Protestant or Catholic, down to the beginning of the nineteenth century. All that was left for scholarship was to determine as exactly as possible the precise order of the events in detail and the proper light in which to view them, so as to gain a picture as faithful and complete as possible of the great apostle's life and activities. That Acts and the Epistles might be regarded, on the whole, as credible throughout, was questioned by no one.

Towards the middle of the nineteenth century the situation was completely altered. Criticism had learned

2. Criticism in first half of nineteenth century.

to concern itself seriously with the contents of Acts, and to inquire as to the genuineness of certain of the 13 (14) Pauline epistles as read in the NT.

The epistle to the Hebrews had already been excluded from the group by Carlstadt (1520), and among those who followed him in this were Luther, Calvin, Grotius (*ob.* 1681), and Semler (*ob.* 1791). E. Evanson in 1792 raised some doubts as to the Pauline origin of Romans, Ephesians, Colossians; J. E. C. Schmidt in 1798 as to that of 1 and 2 Thessalonians; Eichhorn (1804), Schleiermacher (1807), de Wette (1826) as to Timothy and Titus; Usteri in 1824, as also de Wette and Schleiermacher, following Evanson, as to Ephesians. By 1835 F. C. von Baur had given the *coup de grace* to the 'so-called Pastoral Epistles,' Kern to 2 Thessalonians in 1839; Semler in 1776, followed by others, denied the unity of 2 Corinthians.

Baur, incidentally in his *Pastoralbriefe* (p. 79), declared that we possess only four letters of Paul with regard to the genuineness of which there can be no reasonable doubt—Galatians, 1 and 2 Corinthians, Romans. This thesis became the corner-stone of the new building.

F. C. von Baur, the founder of what was called, from the university in which he taught, the Tübingen school, laid the foundation in his *Paulus* (1845; ²), after the author's death in 1860, by E. Zeller, 1866-1867; ET by Menzies, 2 vols., 1873-1875). In Baur's view, Acts, and also such epistles as were not from the pen of Paul (Peter, or James) himself, ought to be regarded as 'tendency'-writings, designed to make peace or to establish it, as between Peter and Paul, the assumed heads of two parties or schools in early Christianity which were called by their names—Petrinists and Paulinists, Jewish Christians and Gentile Christians; parties which he held to have lived, like Peter and Paul themselves, and for a considerable time after the decease of these great leaders, in bitter hostility towards one another until, so far as they did not lose themselves in various heresies to right or to left, they became merged in one another in the bosom of the Catholic church. For the historian the all-important task now became that of discerning clearly the unquestionably genuine element in the Pauline Epistles, on which alone weight could be laid. With them could be combined only those elements in Acts which were seen not to be in contradiction with the epistles.

This standpoint, if we leave out of account divergences of subordinate importance, was accepted in Germany and Switzerland by many scholars; among others by E. Zeller, A. Schweigler, K. R. Köstlin, K. Planck, A. Ritschl (1849),¹ A. Hilgenfeld, G. Volkmar, H. Lang, A. Hausrath, K. Holsten, R. A. Lipsius, C. Weizsäcker, H. J. Holtzmann, O. Pfeleiderer—we may

¹ In the second edition of his *Entstehung*, however, Ritschl abandoned the Tübingen position.

safely say, in short, by the entire 'old guard' of liberal theology—so, too, in France; in Holland also, until quite recently, by the whole modern school; and in England among others by W. R. Cassells, the long anonymous author of *Supernatural Religion* (vols. 1 and 2, 1874; vol. 3, 1877), and by S. Davidson (*Introduction to the Study of the NT*, 2 vols.; ², 1894).

This also was, on the whole, the point of view occupied by E. Hatch when he contributed to *Ency. Brit.* ³, 18 (1885), the article 'Paul,' from which the following §§ (4-32) of the present article are taken, a few short notes only being added within square brackets.

W. C. v. M.

A. Earlier (*i.e.*, Tübingen) Criticism.

'Saul, who is also (called) Paul' [*Σαῦλος ὁ καὶ Παῦλος*, Acts 13⁹] was a 'Hebrew of the Hebrews'—

4. Origin and name. *i.e.*, of pure Jewish descent unmixed with Gentile blood—of the tribe of Benjamin (Rom. 11:1 2 Cor. 11:22 Phil. 3:5).

In Acts it is stated that he was born at Tarsus in Cilicia (9:11 21:39 22:3); but in the fourth century there still lingered a tradition that his birthplace was Giscala, the last of the fortress-towns of Galilee which held out against Rome (Jerome, *De vir. illustr.* 100:5; *Ad Philem.* 5:23).¹

The fact that Paul was called by two names has been accounted for in various ways. Saul (the Aramaic form, used only as a vocative, and in the narratives of his conversion, Acts 9:4 17 22:7 13 26:14; elsewhere the Hellenised form, *Σαῦλος*) was a natural name for a Benjamite to give to his son, in memory of the first of Jewish kings; Paul is more difficult of explanation. It is first found in the narrative of the conversion of Sergius Paulus, the proconsul of Cyprus (Acts 13:7), and it has sometimes been supposed either that Paul himself adopted the name in compliment to his first Gentile convert of distinction, or that the writer of Acts intended to imply that it was so adopted. Others have thought that it was assumed by Paul himself after the beginning of his ministry, and that it is derived from the Latin *paulus* in the sense either of 'least among the apostles,' or 'little of stature.' These and many similar conjectures, however, may probably be set aside in favour of the supposition that there was a double name from the first, one Aramaic or Hebrew, and the other Latin or Greek, like Simon Peter, John Mark, Simeon Niger, Joseph Justus; this supposition is confirmed by the fact [that in those days many people had in Greek and Latin two or more names, of which there are many examples in the *Oxyr. Pap.* i. ii. ; and] that Paul was not an uncommon name in Syria and the eastern parts of Asia Minor (instances will be found in the *Index Nominum* to Boeckh's *Corp. Inscr. Græc.* [*Oxyrhynchus Papyri*, i. 98 205, *bis*, ii. 9 308]). Whatever be its origin, Paul is the only name used by himself, or used of him by others when once he had entered into the Roman world outside Palestine. Acts speaks of his having been a Roman citizen [*Ῥωμαῖος*, like Attalus ὁ Χριστιανός, condemned to be thrown before the wild animals at Lyons, Eus. *HE* v. 1 44 47 50] by birth (Acts 22:28; cp 16:37 23-7), a statement which also has given rise to several conjectures, because there is no clue to the ground upon which his claim to citizenship was based. Some modern writers question the fact, considering the statement to be part of the general colouring which the writer of Acts is supposed to give to his narrative; and some also question the fact, which is generally considered to support it, of the appeal to the emperor.

That Paul received part of his education at Tarsus,

¹ It was an Ebionite slander that he was not a Jew at all, but a Greek [who wished to marry a Jewish priest's daughter at Jerusalem, for that reason became a proselyte and had himself circumcised, but, when the girl refused to marry him, got angry and began to write against circumcision, the Sabbath, and the whole law] (Epiphan. *Her.* 30:16).

which was a great seat of learning, is a possible inference from his use of some of the

5. Education. technical terms which were current in the Greek schools of rhetoric and philosophy; but, since the cultivation of a correct grammatical and rhetorical style was one of the chief studies of those schools, Paul's imperfect command of Greek syntax seems to show that this education did not go very far [cp HELLENISM, § 9]. That he received the main part of his education from Jewish sources is not only probable from the fact that his family were Pharisees, but certain from the whole tone and character of his writings [though his language and style betray the genuine Greek; cp W. C. van Manen, *Paulus*, 2186-190 3156-160; A. Deissmann, *GGA*, 1896, pp. 767-769; E. L. Hicks, *Stud. bibl.* 5 (1896), pp. 1-14]. According to Acts, his teacher was GAMALIEL, who, as the grandson of Hillel, took a natural place as the head of the moderate school of Jewish theologians; nor, in spite of the objection that the fanaticism of the disciple was at variance with the moderation of the master, does the statement seem in itself improbable. A more important difficulty in the way of accepting the statement that Jerusalem was the place of Paul's education is the fact that in that case his education must have been going on at the time of the preaching and death of Jesus Christ. That he had not seen Jesus Christ during his ministry seems to be clear, for a comparison of 1 Cor. 9:1 with 15:8 appears to limit his sight of him to that which he had at his conversion, and the 'knowing Christ after the flesh' of 2 Cor. 5:16 is used not of personal acquaintance but of 'carnal' as opposed to 'spiritual' understanding; nor does the difficulty seem to be altogether adequately explained away by the hypothesis which some writers have adopted, that Paul was temporarily absent from Jerusalem at the times when Jesus Christ was there. Like all Jewish boys, Paul learnt a trade, that of tent-making; this was a natural employment for one of Cilician origin, since the hair of the Cilician goat was used to make a canvas (*cilicia*) which was specially adapted for the tents used by travellers on the great routes of commerce, or by soldiers on their campaigns (cp Philo, *De anim. idon. sacrif.* i. 2238 ed. Mang.; and see CILICIA, § 3, end). Whether he was married or not is a question which has been disputed from very early times; the expressions in 1 Cor. 7:8-9 were taken by Tertullian to imply that he was not, and by Clement of Alexandria and Origen to imply that he had once been, but had become a widower.

The beginning of Paul's active life was doubtless like its maturity; it was charged with emotion. He himself

6. Inner life. gives a graphic sketch of its inner history. His conversion to Christianity was not the first great change that he had undergone. 'I was alive without the law once' (Rom. 7:9). He had lived in his youth a pure and guileless life. He had felt that which is at once the charm and the force of such a life, the unconsciousness of wrong. But, while his fellow-disciples in the rabbinical schools had been content to dissect the text of the sacred code with a minute anatomy, the vision of a law of God which transcended both text and comment had loomed upon him like a new revelation. With the sense of law had come the sense of sin. It was like the first dawn of conscience. He awoke as from a dream. The commandment came. It was intended to be 'unto life,' but he found it to be 'unto death'; for it opened up to him infinite possibilities of sinning: 'I had not known lust except the law had said, Thou shalt not lust.' The possibilities of sinning became lures which drew him on to forbidden and hated ground: 'sin, finding occasion through the commandment, beguiled me and through it slew me' (Rom. 7:7-11). This was his inner life, and no man has ever analysed it with a more penetrating and graphic power.

In his outward life this sense of the law of God became to Paul an overpowering stimulus. The

7. Outward life. stronger the consciousness of his personal failure, the greater the impulse of his zeal. The vindication of the honour of God by persecuting heretics, which was an obligation upon all pious Jews, was for him a supreme duty. He became not only a persecutor but a leader among persecutors (Gal. 1:14).

What Paul felt was a very frenzy of hate; he 'breathed threatening and slaughter,' like the snorting of a war-horse before a battle, against the renegade Jews who believed in a false Messiah (Acts 9:1-26:11). His enthusiasm had been known before the popular outbreak which led to Stephen's death, for the witnesses to the martyr's stoning 'laid down their clothes' at his feet (Acts 7:59), and he took a prominent place in the persecution which followed. He himself speaks of having 'made havoc' of the community at Jerusalem, spoiling it like a captured city (Gal. 1:13-23); in the more detailed account of Acts he went from house to house to search out and drag forth to punishment the adherents of the new heresy (8:3). When his victims came before the Jewish courts he tried, probably by scourging, to force them to apostatise (26:11); in some cases he voted for their death (22:4-26:10).

The persecution spread from Jerusalem to Judæa, Samaria, and Galilee (9:31); but Paul, with the same spirit of enterprise which afterwards showed itself in his missionary journeys, was not content with the limits of Palestine. He sought and obtained from the synagogue authorities at Jerusalem letters similar to those which, in the thirteenth century, the popes gave to the 'militia Jesu Christi contra hæreticos.' The ordinary jurisdiction of the synagogues was for the time set aside; the special commissioner was empowered to take as prisoners to Jerusalem any whom he found to belong to 'The Way.' Of the great cities which lay near Palestine, Damascus was the most promising, if not the only field for such a commission. At Antioch and at Alexandria, though the Jews, of whom there were very many, enjoyed a large amount of independence and had their own governor, the Roman authorities would probably have interfered to prevent the extreme measures which Paul demanded. At Damascus, where also the Jews were many and possibly had their own civil governor (2 Cor. 11:32), the Arabian prince Arctas (Hāritha), who then held the city, might naturally be disposed to let an influential section of the population deal as they pleased with their refractory members.

On Paul's way to Damascus occurred an event which has proved to be of transcendent importance for the

8. Conversion. religious history of mankind. He became a Christian by what he believed to be the personal revelation of Jesus Christ. Paul's own accounts of the event are brief; but they are at the same time emphatic and uniform.

'It pleased God . . . to reveal his Son in me' (Gal. 1:16); 'have I not seen Jesus our Lord' (1 Cor. 9:1); 'last of all he was seen of me also as of one born out of due time' (1 Cor. 15:8, where *ὡφθη καμὸς* must be read in the sense of the parallel expressions *ὡφθη Κηφᾶ*, etc.); in other words, Paul puts the appearance to himself on a level with the appearances to the apostles after the resurrection). These accounts give no details of the circumstances. Paul's estimate of the importance of such details was probably different from that which has been attached to them in later times.

The accounts in Acts are more elaborate; they are three, one in the continuous narrative (9:3-19), a second in the address on the temple stairs (22:6-21), a third in the speech to Agrippa (26:12-18); they all differ in details, they all agree in substance; the differences are fatal to the stricter theories of verbal inspiration, but they do not constitute a valid argument against the general truth of the narrative.

It is natural to find that the accounts of an event which lies so far outside the ordinary experience of men have been the object of much hostile criticism. The earliest denial of its reality is found in the Judæo-Christian writings known as the *Clementine Homilies*, where Simon Magus is told that visions and dreams may come from demons as well as from God (*Clem. Hom.* 17:13-19). The most important of later denials

are those of the Tübingen school, which explain the narratives in Acts either as a translation into the language of historical fact of the figurative expressions of the manifestation of Christ to the soul, and the consequent change from spiritual darkness to light (e.g., Baur, *Paul*, ET 176; Zeller, *Acts*, ET 1289), or as an ecstatic vision (Holsten, *Zum Evangelium d. Paulus u. d. Petrus*, 3-114). But against all the difficulties and apparent incredibilities of the narratives there stand out the clear and indisputable facts that the persecutor was suddenly transformed into a believer, and that to his dying day he never ceased to believe and to preach that he had 'seen Jesus.'

Nor was it only that Paul had seen Jesus; the gospel which he preached, as well as the call to preach it, was due to this revelation. It had 'pleased

9. Mission. God to reveal his Son in him that he 'might preach him among the Gentiles' (Gal. 1.12 15 f.). He had received the special mark of God's favour, which consisted in his apostleship, that all nations might obey and believe the gospel (Rom. 1.5, cp 1.23 15 15 f.). He had been entrusted with a secret (*μυστήριον*) which had 'been kept in silence through times eternal,' but which it was now his special office to make known (Rom. 11.25 16.25 f.; and even more prominently in the later epistles, Eph. 1.9 3.2-9 6.19 Col. 1.26 f. 43). This secret was that 'the Gentiles are fellow-heirs, and fellow-members of the body, and fellow-partakers of the promise in Christ Jesus through the gospel.' This is the key to all Paul's subsequent history. He was the 'apostle of the Gentiles,' and that 'not from men, neither through man' (Gal. 1.1); and so thoroughly was the conviction of his special mission wrought into the fibres of his nature, that it is difficult to give full credence to statements which appear to be at variance with it.

Of his life immediately after his conversion Paul himself gives a clear account: 'I conferred not with

flesh and blood, neither went I up to Jerusalem to them which were apostles before me; but I went away into Arabia' (Gal. 1.16 f.). The reason of his retirement, to whatever place it may have been¹ (see ARABIA, § 4), is not far to seek. A great mental, no less than a great bodily, convulsion naturally calls for a period of rest; and the consequences of his new position had to be drawn out and realised before he could properly enter upon the mission-work which lay before him. From 'Arabia' he returned to Damascus (Gal. 1.17), and there began not only his preaching of the gospel but also the long series of 'perils from his own countrymen,' which constitute so large a part of the circumstances of his subsequent history (Acts 9.23-25 2 Cor. 11.26 32 f.).

It was not until 'after three years,' though it is uncertain whether the reckoning begins from his conversion or from his return to Damascus, that he went up to Jerusalem; his purpose in going was to become acquainted with Peter, and he stayed with him fifteen days (Gal. 1.18). Of his life at Jerusalem on this occasion there appear to have been erroneous accounts current even in Paul's own lifetime, for he adds the emphatic attestation, as of a witness on his oath, that the account which he gives is true (Gal. 1.20). The point on which he seems to lay emphasis is that, in pursuance of his policy not to 'confer with flesh and blood,' he saw none of the apostles except Peter and James, and that even some years afterwards he was still unknown by face to the churches of Judæa which were in Christ.²

¹ To Haurān (Renan), to the Sinaitic peninsula (Holsten). [Fries (*ZNTW*, 1901, 150 f.) thinks that what Paul wrote was Ἀραβία, and that the place intended was the *ḥarā* of the Talmud, the Ἀραβία of Josephus (Neubauer, *Géogr.* 204 f.; Jos. *Vit.* 51). Fries points out that the Great Rabbi Johanan b. Zakkai taught for several years at this Arabia; and that according to one tradition Paul himself was a Galilean, born at Gischala.]

² A different account of this visit to Jerusalem is given in Acts 9.26-30 26.20; the account of the trance in the temple, Acts 22.17-21, is in entire harmony with Paul's own words.

From Jerusalem Paul went 'into the regions of Syria and Cilicia,' preaching the gospel (Gal. 1.21 23). How

11. Supplemented by Acts.

much that brief expression covers is uncertain; it may refer only to the first few months after his departure from Jerusalem, or it may be a summary of many travels, of which that which is commonly known as his 'first missionary journey' is a type. The form of expression in Gal. 2.1 makes it probable that he purposely leaves an interval between the events which immediately succeeded his conversion and the conference at Jerusalem. For this interval, assuming it to exist, or in any case for the detail of its history, we have to depend on the accounts in Acts 11.20-30 12.25-14.28. These accounts possibly cover only a small part of the whole period, and they are so limited to Paul's relations with Barnabas as to make it probable that they were derived from a lost 'Acts of Barnabas.' This supposition would probably account for the fact that in them the conversion of the Gentiles is to a great extent in the background.

The chief features of these accounts are (i.) the formation of a new centre of Christian life at Antioch (§ 12), and (ii.) a journey which Paul, Barnabas, and for part of the way John Mark took through Cyprus and Asia Minor (§ 14).

i. The first of these facts has a significance which has sometimes been overlooked for the history not only

12. Affairs at Antioch.

of Paul himself but also of Christianity in general. It is that the mingling together, in that splendid capital of the civilised East, of Jews and Syrians on the one hand, and Greeks and Romans on the other, furnished the conditions which made a Gentile Christianity possible. The religion of Jesus Christ emerged from its obscurity into the full glare of contemporary life. Its adherents attracted enough attention to receive in the common talk and intercourse of men a distinctive name. They were treated, not as a Jewish sect, but as a political party. To the Greek equivalent for the Hebrew 'Messiah,' which was probably considered to be not a title but a proper name, was added the termination which had been employed for the followers of Sulla, of Pompey, and of Caesar [see CHRISTIAN, § 4]. It is improbable that this would have been the case unless the Christian community at Antioch had had a large Gentile element; and it is an even more certain and more important fact that in this first great mixed community the first and greatest of all the problems of early Christian communities had been solved, and Jews and Gentiles lived a common life (Gal. 2.12).

What place Paul himself had in the formation of this community can only be conjectured. In Acts he

13. Paul's position.

is less prominent than Barnabas; and although it must be gathered from the Epistle to the Galatians that he took a leading part in the controversies which arose, it is to be noted that he never elsewhere mentions Antioch in his epistles, and that he never visited it except casually in his travels. It may be supposed that from an early period he sought and found a wider field for his activity. The spirit of the Pharisees who 'compassed sea and land to make one proselyte' was still strong within him. The zeal for God which had made him a persecutor had changed its direction but not its force. His conversion was but an overpowering call to a new sphere of work. It is consequently difficult to believe that he was content to take his place as merely one of a band of teachers elected by the community or appointed by the Twelve. The sense of a special mission never passed away from him. 'Necessity was laid upon him' (1 Cor. 9.16). Inferior to the Twelve in regard to the fact that he had once 'persecuted the church of God,' he was 'not a whit behind the very chiefest apostles' (2 Cor. 11.5) in regard to both the reality and the privileges of his commission, and to the truth of what he preached (1 Cor. 9.1-6 2 Cor. 3.1-9 Gal. 1.12). It is also difficult

to believe that he went out with Barnabas simply as the delegate of the Antiochian community; whatever significance the laying on of hands may have had for him (Acts 13.3), it would be contrary to the tenor of all his writings to suppose that he regarded it as giving him his commission to preach the gospel.

ii. The narrative of the incidents of the single journey which is recorded in detail, and which possibly did not occupy more than one summer, has given rise to much controversy. Its general credibility is supported by the probability that in the first instance Paul would follow an ordinary commercial route, on which Jewish missionaries as well as Jewish merchants had been his pioneers. For his letters to his Gentile converts all presuppose their acquaintance with the elements of Judaism. They do not prove monotheism; they assume it.

According to the narrative Paul and his companions went first to Cyprus, the native country of Barnabas, and travelled through the island from its eastern port, Salamis, to its capital, Paphos. At Paphos a Jewish sorcerer, Bar-Jesus, was struck with blindness, and the proconsul, Sergius Paulus, was converted. From Cyprus, still following a common route of trade, they went into the SE. districts of Asia Minor, through Pamphylia to Antioch in Pisidia. At Antioch, on two successive Sabbaths, Paul spoke in the synagogue; the genuineness of the addresses which are recorded in Acts has been disputed, chiefly because the second of them seems to imply that he 'turned to the Gentiles' (Acts 13.46), not as a primary and unconditional obligation, but owing to the rejection of the Gospel by the Jews (cp Acts, § 4). Expelled from Antioch, they went on to Iconium (where the apocryphal Acts of Paul and Thecla place the scene of that improbable but not ungraceful romance), and thence to Lystra, where the healing of a cripple caused the simple and superstitious Lycaonians to take them for gods. Their farthest point was the neighbouring town of Derbe, whence they returned by the route by which they had come to the sea-coast, and thence to Antioch in Syria.

Although the general features of the narrative may be accepted as true, especially if, as suggested above

15. Value of narrative. (§ 11), its basis is a memoir or itinerary not of Paul but of Barnabas, it must be conceded that this portion of Acts has large omissions. It is difficult to believe that the passionate zeal of an apostle who was urged by the stimulus of a special call of Jesus Christ was satisfied, for the long period of at least eleven years, with one short missionary journey, and that, with the exception of a brief visit to Jerusalem (Acts 11.30), he remained quietly at Tarsus or at Antioch (11.25 13.1 14.28). In this period must fall at least a portion of the experiences which are recorded in 2 Cor. 11.23-27, for which no place can be found in the interval between the conference at Jerusalem and the writing of that epistle. The scourging in the synagogues, the beating with the lictors' rods in the Roman courts, the shipwrecks, the 'night and day in the deep,' the 'perils of robbers' and 'perils in the wilderness,' belong no doubt to some of the unrecorded journeys of these first years of Paul's apostolic life. A more important omission is that of some of the more distinctive features of his preaching. It is impossible to account for his attitude towards the original apostles in his interview with them at Jerusalem (Gal. 2.1-10) except on the supposition that before that interview, no less than after it, he was that which he had been specially called to be, the 'apostle of the Gentiles' and the preacher of the 'gospel of the uncircumcision.'

At the end of fourteen years, either from his conversion or from his visit to Peter at Jerusalem [see

16. Paul's relation to the Twelve. CHRONOLOGY, § 73], the question of the relation of the communities which he had formed, and of the gospel which he preached, to the original Christian communities, and to the gospel of the Twelve, came to a crisis. His position was unique. He owed neither his knowledge of the gospel nor his commission to preach it to any human authority (Gal. 1.11 f.). As Jesus Christ had taught and sent forth the Twelve, so had he taught and sent forth Paul. Paul was on equal terms with the Twelve. Until a revelation came to him he

was apparently at no pains to co-operate with them. Between their respective disciples, on the other hand, there was evidently a sharp contention. The Jewish party, the original disciples and first converts, maintained the continued obligation of the Mosaic law and the limitation of the promises to those who observed it; the Pauline party asserted the abrogation of the law and the free justification of all who believed in Jesus Christ.

The controversy narrowed itself to the one point of circumcision. If the Gentiles were, without circumcision, members of the kingdom of God, why was the law obligatory on the Jews? If, on the other hand, the Gentiles had to be circumcised, the gospel had but a secondary importance. It seemed for a time as though Christianity would be broken up into two sharply-divided sects, and that between the Jewish Christianity, with its seat at Jerusalem, which insisted on circumcision, and the Gentile Christianity, with its seat at Antioch, which rejected circumcision, there would be an irreconcilable antagonism. It was consequently 'by revelation' (Gal. 2.2) that Paul and Barnabas, with the Gentile convert Titus as their 'minister' or secretary, went to confer with the leaders among the original disciples, the 'pillars' or 'them who were of repute,' James, and Cephas, and John.¹

Paul put the question to them: Was it possible that he was spending or had spent his labour in vain? (*μηπως . . . εδραμον* in Gal. 2.2 form a direct question depending on *απεθηνον*). He laid before them the 'gospel of the uncircumcision.' They made no addition to it (Paul says of himself *απεθηνον*, and of 'them who were of repute' *ουδεν προσαυθενον*, Gal. 2.26), but accepted it as Paul preached it, recognising it as being a special work of God, and as being on the same level of authority with their own (Gal. 2.7-9). The opposition was no doubt strong; there were 'false brethren' who refused to emancipate the Gentile world from the bondage of the law; and there was also apparently a party of compromise which, admitting Paul's general contention, maintained the necessity of circumcision in certain cases, of which the case of Titus, for reasons which are no longer apparent, was typical. But Paul would have no compromise. From his point of view compromise was impossible. 'Justification' was either 'of faith' or 'by the works of the law'; it was inconceivable that it could be partly by the one and partly by the other.

Paul succeeded in maintaining his position at all points. He received 'the right hand of fellowship,' and went back to Antioch the recognised head and preacher of the 'gospel of the uncircumcision.' Within his own sphere he had perfect freedom of action; the only tie between his converts and the original community at Jerusalem was the tie of benevolence. Jew and Gentile were so far 'one body in Christ' that the wealthier Gentile communities should 'remember the poor.'¹

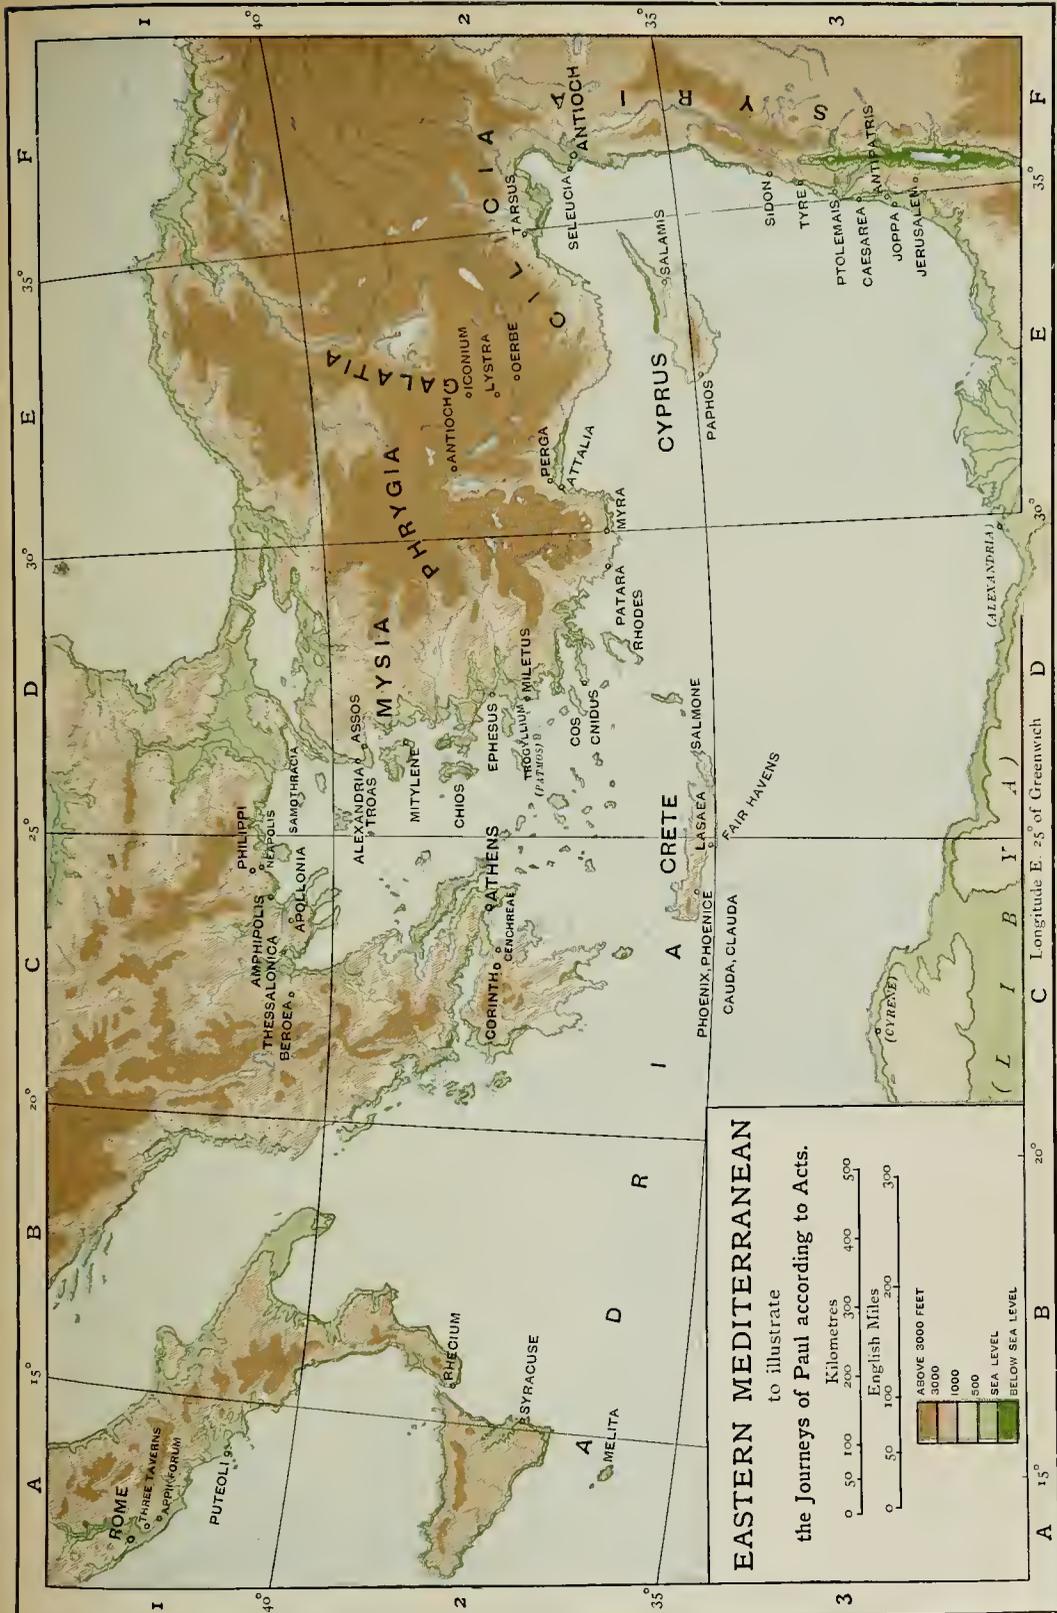

When Paul returned to Antioch, Peter followed him, and for a time the two apostles lived in harmony.

17. Peter and Paul at Antioch. Peter 'did eat with the Gentiles.' He shared the common table at which the Jewish distinctions of meats were disregarded. He thereby accepted Paul's position. When, however, 'certain came from James' he drew back [*φοβούμενος τοὺς ἐκ περιτομῆς*, Gal. 2.12. Barnabas and the whole of the Jewish party at Antioch followed him]. Paul showed that the position of Peter was illogical, and that he was self-convicted (*κατεγνωσμένος ἦν*, Gal. 2.11).

Paul's argument was that the freedom from the law was

¹ Few passages of the NT have been more keenly debated during the second part of the nineteenth century [cp COUNCIL] than the accounts of this conference at Jerusalem in Acts 15.4-29 and Gal. 2.1-10. Almost all writers agree in thinking that the two accounts refer to the same event; but no two writers precisely agree as to the extent to which they can be reconciled. The main points of difficulty in the two accounts are these:—(1) Acts says that Paul went up by appointment of the brethren at Antioch; Paul himself says that he went up 'by revelation.' (2) In Acts Paul has a subordinate position; in his own account he treats with 'the three' on equal terms. (3) In Acts Peter and James are on Paul's side from the first; in Galatians they are so only at the end of the conference, and after a discussion. (4) Acts makes the conference result in a decree, in which certain observances are imposed upon the Gentiles; Paul himself expressly declares that the only injunction was that they 'should remember the poor.'

PAUL'S JOURNEYS ACCORDING TO ACTS.

complete, and that to attach merit to obedience to the law was to make disobedience to the law a sin, and, by causing those who sought to be justified by faith alone to be transgressors, to make Christ a 'minister of sin.' Obedience to any part of the law involved recognition of the whole of it as obligatory (Gal. 5.3), and consequently 'made void the grace of God.'

The schism in the community at Antioch was probably never healed. It is not probable that Paul's contention was there victorious; for, whilst Paul never again speaks of that city, Peter seems to have remained there [?], and he was looked upon in later times as the founder of its church.

This failure at Antioch served Paul as the occasion for carrying out a bolder conception. The horizon of

18. Paul's missionary labours. his mission widened before him. The 'fulness of the Gentiles' had to be brought in. His diocese was no longer Antioch; it was the whole of the Roman empire. The years that followed were almost wholly spent among its great cities, 'preaching among the Gentiles the unsearchable riches of Christ' (Eph. 3.8). Paul became the spiritual father of many communities, and he watched over them with a father's constant care. He gathered round him a company of faithful disciples, sharers in his missionary work, whom he sent sometimes to break new ground, sometimes to arrange disputes, sometimes to gather contributions, sometimes to examine and report. Of his travels, whether with them or alone, no complete record has been preserved; some of them are minutely described in Acts, others within the same period are known only or chiefly from his epistles. In giving an account of them it is necessary to change to some extent the historical perspective which is presented in Acts; for, in working up fragments of itineraries of Paul's companions into a consecutive narrative, many things are made to come into the foreground which Paul himself would probably have disregarded, and many things are omitted or thrown into the shade to which, from his letters, he appears to have attached a primary importance.¹

The first scene of Paul's new activity, if indeed it be allowable to consider the conference at Jerusalem and the subsequent dispute at Antioch as

19. In Galatia. having given occasion for a new departure, was probably eastern Asia Minor, more particularly Galatia. Some of it he had visited before; and from the fact that the Galatians, though they had been heathens (Gal. 4.8), were evidently acquainted with the law, it may be inferred that Paul still went on the track of Jewish missionaries, and that here, as elsewhere, Judaism had prepared the way for Christianity [though it was resolved that he should go to the Gentiles only, Gal. 1.16 2.8.9]. Of his preaching Paul himself gives a brief summary; it was the vivid setting forth before their eyes of Jesus as the crucified Messiah, and it was confirmed by evident signs of the working of the Spirit (Gal. 3.1.5). The new converts received it with enthusiasm; Paul felt for them as a father; and an illness (some have thought, from the form of expression in Gal. 4.15, that it was an acute ophthalmia) which came upon him (on the assumption that this was his first visit) intensified their mutual affection. What we learn specially of the Galatians is probably true also of the other Gentiles who received him; some of them were baptized (Gal. 3.27), they were formed into communities (Gal. 1.2), and they were so far organised as to have a distinction between teachers and taught (Gal. 6.6).

An imperative call summoned Paul to Europe. The western part of Asia Minor, in which afterwards were formed the important churches of

20. In Macedonia. Ephesus, Colossæ, Hierapolis, and Laodicea, was for the present left alone. Paul passed

¹ The most important instance of this is probably the almost entire omission of an account of his relations with the community at Corinth; one of his visits is entirely omitted, another is also omitted, though it may be inferred from the general expression 'he came into Greece' (20.2); and of the disputes in the community, and Paul's relations to them, there is not a single word.

on into Macedonia. The change was more than a passage from Asia to Europe. Hitherto, if Antioch be excepted, he had preached only in small provincial towns. Henceforward he preached chiefly, and at last exclusively, in the great centres of population. He began with Philippi, which was at once a great military post and the wealthy entrepôt of the gold and silver mines of the neighbouring Mount Pangæus. The testimony of the eyewitness whose account is incorporated in Acts 16.12-18 tells us that his first convert was a Jewish proselyte, named Lydia (see LYDIA); and Paul himself mentions other women converts (Phil. 4.2). About the community which soon grew up there is the special interest that it was organised after the manner of the guilds, of which there were many both at Philippi and in other towns of Macedonia, and that its administrative officers were entitled, probably from the analogy of those guilds, 'bishops' and 'deacons.' [Cp MINISTRY, § 57.]

In Europe, as in Asia, persecution attended him. He was 'shamefully entreated' at Philippi (1 Thess. 2.2), and according to Acts the ill-treatment came not from the Jews but from the Gentile employers of a frenzied prophetess, who saw in Paul's preaching an element of danger to their craft. Consequently he left Philippi, and passing over Amphipolis, the political capital of the province, but the seat rather of the official classes than of trade, he went on to the great seaport and commercial city of Thessalonica. His converts there seem to have been chiefly among the Gentile workmen (1 Thess. 4.11 2 Thess. 3.10-12), and he himself became one of them. Knowing as he did the scanty wages of their toil, he 'worked night and day that he might not burden any of them' (1 Thess. 2.9 2 Thess. 3.8). For all his working, however, he does not seem to have earned enough to support his little company; he was constrained both once and again to accept help from Philippi (Phil. 4.16). He was determined that, whatever he might have to endure, no sordid thought should enter into his relations with the Thessalonians; he would be to them only what a father is to his children, behaving himself 'holy and righteously and unblameably,' and exhorting them to walk worthily of God who had called them (1 Thess. 2.10-12). There, as elsewhere, his preaching was 'in much conflict.' The Jews were actively hostile. According to the account in Acts (17.5-9), they at last hounded on the lazzaroni of the city, who were doubtless moved as easily as a Moslem crowd in modern times by any cry of treason or infidelity, to attack the house of Jason (possibly one of Paul's kinsmen, Rom. 16.21), either because Paul himself was lodging there, or because it was the meeting-place of the community. Paul and Silas were not there, and so escaped; but it was thought prudent that they should go at once and secretly to the neighbouring small town of Berea. Thither, however, the fanatical Jews of Thessalonica pursued them; and Paul, leaving his companions Silas and Timothy at Berea, gave up his preaching in Macedonia for a time and went southwards to Athens.

The narrative which Acts gives of Paul's stay at Athens is one of the most striking, and at the same time one of

21. At Athens. the most difficult, episodes in the book. What is the meaning of the inscription on the altar? [see UNKNOWN GOD]. What is the Areopagus? How far does the reported speech give Paul's actual words? What did the Athenians understand by the Resurrection? These are examples of questions on which it is easy to argue, but which, with our present knowledge, it is impossible to decide. One point seems to be clear, both from the absence of any further mention of the city in Paul's writings, and from the absence of any permanent results of his visit: his visit was a comparative failure. It was almost inevitable that it should be so. Athens was the educational centre of Greece. It was a great university city. For its students and professors the Christianity which Paul preached had only an intellectual interest.

They were not conscious of the need, which Christianity presupposes, of a great moral reformation; nor indeed was it until many years afterwards, when Christianity had added to itself certain philosophical elements and become not only a religion but also a theology, that the educated Greek mind, whether at Athens or elsewhere, took serious hold of it.

Of Paul's own inner life at Athens we learn, not from Acts, but from one of his epistles. His thoughts were not with the philosophers but with the communities of Macedonia and the converts among whom he had preached with such different success. He cared far less for the world of mocking critics and procrastinating idlers in the chief seat of culture than he did for the enthusiastic artisans of Thessalonica, to whom it was a burning question of dispute how soon the Second Advent would be, and what would be the relation of the living members of the church to those who had fallen asleep. Paul would fain have gone back to them; but 'Satan hindered him' (1 Thess. 2.17 f.); and he sent Timothy in his stead 'to comfort them as concerning their faith,' and to prevent their relapsing, as probably other converts did, under the pressure of persecution (1 Thess. 3.2 f.).

From Athens Paul went to Corinth, the capital of the Roman province of Achaia, and the real centre of the busy life of Greece. It was not the ancient Greek city with Greek inhabitants, but a new city which had grown up in Roman times, with a vast population of mingled races, who had added to the traditional worship of Aphrodite the still more sensuous cults of the East. Never before had Paul had so vast or so promising a field for his preaching; for alike the filthy sensuality of its wealthy classes and the intense wretchedness of its half-million of paupers and slaves (*τὴν βδελυρίαν τῶν ἐκείσε πλοισίων καὶ τῶν πενήτων ἀβλιότητα*, Alciph. 360) were prepared ground upon which his preaching could sow the seed, in the one case of moral reaction, and in the other of hope. At first the greatness of his task appalled him: 'I was with you in weakness, and in fear, and in much trembling' (1 Cor. 2.3). He laid down for himself from the first, however, the fixed principle that he would preach nothing but 'Jesus Christ, and him crucified' (1 Cor. 2.2), compromising with neither the Jews, to whom 'the word of the cross'—i.e., the doctrine of a crucified Messiah—was 'a stumbling-block,' nor with the Gentile philosophers, to whom it was 'foolishness' (1 Cor. 1.8, 23). It is probable that there were other preachers of the gospel at Corinth, especially among the Jews, since soon afterwards there was a Judaising party; Paul's own converts seem to have been chiefly among the Gentiles (1 Cor. 12.2). Some of them apparently belonged to the luxurious classes (1 Cor. 6.11), a few of them to the influential and literary classes (1 Cor. 1.26); but the majority were from the lowest classes, the 'foolish,' the 'weak,' the 'base,' and the 'despised' (1 Cor. 1.27 f.). Among the poor Paul lived a poor man's life. It was his special 'glorying' (1 Cor. 9.15, 2 Cor. 11.10) that he would not be burdensome to any of them (1 Cor. 9.12, 2 Cor. 11.9, 12.13); he worked at his trade of tent-making. It was a hard sad life; his trade was precarious, and did not suffice for even his scanty needs (2 Cor. 11.9). Beneath the enthusiasm of the preacher was the physical distress of hunger and cold and ill-usage (1 Cor. 4.11). In 'all his distress and affliction,' however, he was comforted by the good news which Timothy brought him of the steadfastness of the Thessalonian converts; the sense of depression which preceded it is indicated by the graphic phrase, 'Now we live, if ye stand fast in the Lord' (1 Thess. 3.6-8). With Timothy came Silas, both of them bringing help for his material needs from the communities of Macedonia (2 Cor. 11.9, Acts 18.5; perhaps only from Philippi, Phil. 4.15), and it was apparently after their coming that the active preaching (2 Cor. 1.19) which roused the Jews to a more open hostility began.

Of that hostility an interesting incident is recorded in Acts 18.12-16; but a more important fact in Paul's life

was the sending of a letter, the earliest of all his letters which have come down to us, to the community which he had founded at Thessalonica. Its genuineness, though perhaps not beyond dispute, is almost certain. Part of it is a renewed exhortation to steadfastness in face of persecutions, to purity of life, and to brotherly love; part of it is apparently an answer to a question which had arisen among the converts when some of their number had died before the Parousia; and part of it is a general summary of their duties as members of a Christian community. It was probably followed, some months afterwards, by a second letter; but the genuineness of the Second Epistle to the Thessalonians has been much disputed. It proceeds upon the same general lines as the first, but appears to correct the misapprehensions which the first had caused as to the nearness of the Parousia.

After having lived probably about two years at Corinth Paul resolved, for reasons to which he himself gives no clue, to change the centre of his activity from Corinth to Ephesus.

Like Corinth, Ephesus was a great commercial city with a vast mixed population; it afforded a similar field for preaching, and it probably gave him increased facilities for communicating with the communities to which he was a spiritual father. It is clear from his epistles that his activity at Ephesus was on a much larger scale than the Acts of the Apostles indicates. Probably the author of the memoirs from which this part of the narrative in Acts was compiled was not at this time with him; consequently there remain only fragmentary and for the most part unimportant anecdotes.

Paul's real life at this time is vividly pictured in the Epistles to the Corinthians. It was a life of hardship and danger and anxiety.

'Even unto this present hour we both hunger, and thirst, and are naked, and are buffeted, and have no certain dwelling-place; and we toil, working with our own hands; being reviled, we bless; being persecuted, we endure; being defamed, we entreat; we are made as the filth of the world, the offscouring of all things, even until now' (1 Cor. 4.11-13). It was almost more than he could bear: 'We were weighed down exceedingly, beyond our power, insomuch that we despaired even of life' (2 Cor. 1.8). He went about like one condemned to die, upon whom the sentence might at any moment be carried out (2 Cor. 1.9). Once, at least, it seemed as though the end had actually come, for he had to fight with beasts in the arena (1 Cor. 15.32), and once, if not on the same occasion, he was only saved by Prisca and Aquila, 'who for his life laid down their own necks' (Rom. 16.4).

What filled a larger place in Paul's thoughts than the 'perils' of either the past or the present was the 'care of all the churches.' He was the centre round which a system of communities revolved; and partly by letters, partly by sending his companions, and partly by personal visits, he kept himself informed of their varied concerns, and endeavoured to give a direction to their life.

Paul probably went from Ephesus to the churches of Galatia and others in Asia Minor. He wrote the

Epistle to the Galatians and the first to the Corinthians. About the particulars, however, of his relations with these communities at this time there are differences of opinion. Seldom do we find more than two of the better known authors agreeing on any view.

An *émancipation* which occurred at Ephesus was, according to Acts, the occasion if not the cause of his leaving that city; 'a great door and effectual had been opened for him' there (1 Cor. 16.9), and the growth of the new religion had caused an appreciable diminution in the trade of those who profited by the zeal of the worshippers at the temple (Acts 19.23 to 20.1). Paul went overland to Troas, where, as at Ephesus, 'a door was opened unto him in the Lord' (2 Cor. 2.12); but the thought of Corinth was stronger than the wish to make a new community. He was eager to meet Titus, and to hear of the effect of his (now lost) letter; and he went on into Macedonia. It is at this point of his life more than at any other that he reveals to us his inner history. At Ephesus he had been hunted almost to death; he had carried his life in his hand; and, 'even when we were come into Macedonia, our flesh had no relief, but we were afflicted on every side; without were fightings, within were fears' (2 Cor. 7.5). But though the 'outward man was decaying, the inward man was renewed day by day'; and the climax of splendid paradoxes which he wrote soon afterwards to the

Corinthians (2 Cor. 6:3-10) was not a rhetorical ideal, but the story of his actual life. After a time Titus came with news which gladdened Paul's heart (2 Cor. 7:7). He had been well received at Corinth. The letter had made a deep impression. The admonitions had been listened to. The Corinthians had repented of their conduct. They had rid themselves of 'him that did the wrong,' and Paul was 'of good courage concerning them' (2 Cor. 7:8-16). He then wrote the second of his extant letters to them, which was sent by Titus and the unknown 'brother whose praise in the gospel is spread through all the churches,' and who had been elected by the churches to travel with Paul and his company (2 Cor. 8:18/).

It was probably in the course of this journey that Paul went beyond the borders of Macedonia into the neighbouring province of Illyricum (Rom. 15:19); but his real goal was again: Corinth. For the third time he went there, and, overcoming the scruples of his earlier visits, he was the guest of Gaius, in whose house the meetings of the community were held (Rom. 16:23).

Of the incidents of Paul's visit to Corinth no record remains; Acts does not even mention it. It was the culminating point, however, of his intellectual activity; for in the course of it he wrote the greatest of all his letters, the Epistle to the Romans. As the body of that epistle throws an invaluable light upon the tenor of his preaching at this time to the communities, among which that of Rome can hardly have been singular, so the salutations at the end, whether they be assumed to be an integral part of the whole or not, are a wonderful revelation of the breadth and intimacy of his relations with the individual members of those communities. But that which was as much in his mind as either the great question of the relation of faith to the law or the needs of individual converts in the Christian communities was the collection of alms

27. Alms for Christian poor. 'for the poor among the saints that were at Jerusalem' (Rom. 15:26). The communities of Palestine had probably never ceased to be what the first disciples were, communities of paupers in a pauperised country, and consequently dependent upon external help.

All through his missionary journeys Paul had remembered the injunction which had sealed his compact with 'the three' (Gal. 2:10). In Galatia (1 Cor. 16:1), among the poor and persecuted churches of Macedonia (Rom. 15:26 2 Cor. 8:1-4), at Corinth, and in Achaia (1 Cor. 16:1-14 2 Cor. 8 and 9), the Gentiles who had been made partakers with the Jews in spiritual things had been effectually told that 'they owed to them also to minister unto them in carnal things' (Rom. 15:27).

The contributions were evidently on a large scale; and Paul, to prevent the charges of malversation which were sometimes made against him, associated with himself 'in the matter of this grace' a person chosen by the churches themselves (2 Cor. 8:19-21 12:17/); some have thought that all the persons whose names are mentioned in Acts 20:4 were delegates of their respective churches for this purpose.

Paul resolved to go to Jerusalem himself with this material testimony of the brotherly feeling of the Gentile communities, and then, 'having no more any place' in Greece, to go to the new mission fields of Rome and the still farther West (Rom. 15:23-25). He was not certain that his peace-offering would be acceptable to the Jewish Christians, and he had reason to apprehend violence from the unbelieving Jews. His departure from Corinth, like that from Ephesus, was probably hastened by danger to his life; and, instead of going direct to Jerusalem (an intention which seems to be implied in Rom. 15:25), he and his companions took a circuitous route round the coasts of the Ægean Sea. His course lay through Philippi, Troas, Assos, Mitylene, Chios, Samos, and Miletus, where he took farewell of the elders of the community at Ephesus in an address of which some reminiscences are probably preserved in Acts 20:18-35. Thence he went, by what was probably an ordinary route of commerce, to the Syrian coast, and at last he reached Jerusalem.

28. Sets out for Jerusalem. 'for the poor among the saints that were at Jerusalem' (Rom. 15:26). The communities of Palestine had probably never ceased to be what the first disciples were, communities of paupers in a pauperised country, and consequently dependent upon external help.

The narrative which Acts gives of the incidents of Paul's life at Jerusalem is full of grave difficulties. It leaves

29. Account in Acts. together in the background what Paul himself mentions as his chief reason for making the visit; and it relates that he accepted the advice which was given him to avail himself of the custom of vicarious vows, in order to show, by his conformity to prevalent usages, that 'there was no truth' in the reports that he had told the Jews 'not to circumcise their children, neither to walk after the customs' (Acts 21:20-26). If this narrative be judged by the principles which Paul proclaims in the Epistle to the Galatians, it seems hardly credible. He had broken with Judaism, and his whole preaching was a preaching of the 'righteousness which is of faith,' as an antithesis to, and as superseding, the 'righteousness which is of the law.' Now he is represented as resting his defence on his conformity to the law, on his being 'a Pharisee and the son of Pharisees,' who was called in question for the one point only that he believed, as other Pharisees believed, in the resurrection of the dead.

What colouring of a later time, derived from later controversies, has been spread over the original outline of the history cannot now be told. Whilst on the one hand the difficulties of the narrative as it stands cannot be overlooked, on the other hand no faithful historian will undertake, in the absence of all collateral evidence, the task of discriminating that which belongs to a contemporary testimony and that which belongs to a subsequent recension. From this uncertainty the general concurrence of even adverse critics excepts the 'we' section (Acts 27: 28:16); whoever may have been the author of those 'we' sections, and whatever may be the amount of revision to which they have been subjected, they seem to have for their basis the diary or itinerary of a companion of Paul, and the account of the voyage contains at least the indisputable fact that Paul went to Rome.

Paul's life at Rome and all the rest of his history are enveloped in mists from which no single gleam of certain light emerges. Almost every writer, whether apologetic or sceptical, has some new hypothesis respecting it; and the number and variety of the hypotheses which have been already framed is a warning, until new evidence appears, against adding to their number. The preliminary questions which have to be solved before any hypothesis can be said to have a foundation in fact are themselves extremely intricate; and their solution depends upon considerations to which, in the absence of positive and determining evidence, different minds tend inevitably to give different interpretations. The chief of these preliminary questions is the genuineness of the epistles bearing Paul's name, which, if they be his, must be assigned to the later period of his life—viz., those to the Philippians, Ephesians, and Colossians, to Philemon, to Timothy, and to Titus. As these epistles do not stand or fall together, but give rise in each case to separate discussion, the theories vary according as they are severally thought to be genuine or false. The least disputed is the Epistle to Philemon; but it is also the least fruitful in either doctrine or biographical details. Next to it in the order of general acceptance is the Epistle to the Philippians. The Epistles to the Ephesians and to the Colossians have given rise to disputes which cannot easily be settled in the absence of collateral evidence, since they mainly turn partly on the historical probability of the rapid growth in those communities of certain forms of theological speculation, and partly on the psychological probability of the almost sudden development in Paul's own mind of new methods of conceiving and presenting Christian doctrine. The pastoral epistles—viz., those to Timothy and to Titus—have given rise to still graver questions, and are probably even less defensible.

30. Doubtful epistles. Even if this preliminary question of the genuineness

Even if this preliminary question of the genuineness

of the several epistles be decided in each instance in the affirmative, there remains the further question whether they or any of them belong to the period of Paul's imprisonment at Rome, and, if so, what they imply as to his history. It is held by many writers that they all belong to an earlier period of his life, especially to his stay at Caesarea (Acts 24²³⁻²⁷). It is held by other writers that they were all sent from Rome, and with some such writers it has become almost an article of faith that he was imprisoned there not once but twice. It is sometimes further supposed that in the interval between the first and second imprisonments he made his intended journey to Spain (Rom. 15²⁴; it is apparently regarded as an accomplished fact by the author of the Muratorian fragment); and that either before or after his journey to Spain he visited again the communities of the Aegean seaboard which are mentioned in the pastoral epistles.

The place and manner and occasion of Paul's death are not less uncertain than the facts of his later life. The only fragment of approximately contemporary evidence is a vague and rhetorical passage in the letter of Clement of Rome (100⁵): 'Paul . . . having taught the whole world righteousness, and having come to the goal of the West (*ἐπὶ τὸ τέλος τῆς δύσεως*), and having borne witness (*μαρτυρήσας*) before the rulers, so was released from the world and went to the Holy Place, having become the greatest example of patience.' The two material points in this passage (1) 'the limit of the West,' (2) 'having borne witness,' are fruitful sources of controversy. The one may mean either Rome or Spain, the other may mean either 'having testified' or 'having suffered martyrdom.' It is not until towards the end of the second century, after many causes had operated both to create and to crush traditions, that mention is made of Paul as having suffered about the same time as Peter at Rome; but the credibility of the assertion is weakened by its connection in the same sentence with the [rhetorical] statement that Peter and Paul [both taught in Italy in the same spirit as they planted and taught in Corinth] (Dionysius of Corinth, quoted by Eusebius, *HE* 2²⁵). A Roman presbyter named Gaius speaks, a few years later, of the martyrdoms of the two apostles being visible at Rome (quoted by Eusebius, *l.c.*); but neither this testimony nor that of Tertullian (*De praescr.* 36, *Scorp.* 15, *Adv. Marc.* 45) is sufficient to establish more than the general probability that Paul suffered martyrdom. There is no warrant for going beyond this, as almost all Paul's biographers have done, and finding an actual date for his martyrdom in the so-called Neronian persecution of 64 A. D.¹

The chronology of the rest of Paul's life is as uncertain as the date of his death. We have no means of knowing when he was born, or how long he lived, or at what dates the several events of his life took place.

The nearest approach to a fixed point from which the dates of some events may be calculated is that of the death of Festus, which may probably, though by no means certainly, be placed in 62 A. D.; even if this date were certainly known, new evidence would be required to determine the length of time during which he held office; all that can or could be said is that Paul was sent to Rome some time before the death of Festus in 62 A. D. (cp further CHRONOLOGY, §§ 64-84).²

¹ The 'Martyrium Pauli' in Zacagni, *Coll. mon. vet. eccl.*, Rome, 1698, p. 535, gives not only details but also an exact date—viz., 29th June 66 A. D.; the day has been adopted by the Latin Church as the common anniversary of St. Peter and St. Paul. All the early evidence which bears upon the point has been collected by Kunze, *Principia patrum ecclesiasticorum testimonia quae ad mortem Pauli apostoli spectant*, Göttingen, 1848 [cp Harnack, *Chronologie* (1897), pp. 240-3].

² How widely opinions differ as to the rest of the chronology may be seen by a reference to the chronological table which is given by Meyer in the introduction to his *Commentary on the Acts*, and after him by Farrar, *St. Paul*, vol. ii. 624. The literature of the subject is extensive; the most convenient summary of the discussions, for English readers, will be found in the introduction to Meyer's *Commentary* just mentioned of which there is an ET [cp Harnack, *Chron.* pp. 233-9; Meyer-

Of his personality Paul himself tells us as much as need be known when he quotes the adverse remarks of his opponents at Corinth: 'his letters,

32. His personality. they say, are weighty and strong; but his bodily presence is weak, and his speech of no account' (2 Cor. 10¹⁰). The Christian romance-writer elaborated the picture, of which some traits may have come to him from tradition: 'a man small in stature, bald-headed, bow-legged, stout, close-browed, with a slightly prominent nose, full of grace; for at one time he seemed like a man, at another time he had the face of an angel' ('Acta Pauli et Thecla', 100³; Tisch. *Acta Apost. Apocr.* 41); and the pagan caricaturist speaks of him in similar terms, as 'bald in front, with a slightly prominent nose, who had taken an aerial journey into the third heaven' (pseudo-Lucian, *Philopatris*, 100¹²).¹

That Paul was sometimes stricken down by illness is clear from Gal. 4¹³ (some have thought also from 2 Cor. 24); and at his moments of greatest exaltation [not only did he enjoy visions and revelations, being elevated into the third heaven, paradise, where he heard inexpressible words; but also] 'there was given to him a stake in the flesh . . . that he should not be exalted overmuch' (2 Cor. 12⁷). The nature of this special weakness has given rise to many conjectures; the most probable is that it was one of those obscure nervous disorders which are allied to epilepsy and sometimes mistaken for it.²

E. H.

B. LATER CRITICISM.

From the first, both in Germany and elsewhere, the Tübingen criticism met with strong opposition as well as with cordial acceptance. The right

33. Transitional views. wing, which protested against it on behalf of tradition, spared (and continues to spare) no effort to recover the invaded territory and to protect it, so far as may be, from further attack. The most powerful champion of this conservative attitude in recent years has been Th. Zahn, author of the *Einleitung in das neue Testament* (2 vols. 1897-99, (2) 1900).

Those who were not so timid about breaking with traditional views or with opinions that had been judged to be no longer tenable, inclined, nevertheless, especially in recent years, to consider that Baur had gone to the extreme limit of criticism and to think that some retreat, along part of the line at least, from his 'extravagances' was necessary. They did not shut their eyes to the great merits of the Tübingen school; but neither would they be blind to their faults and shortcomings which seemed to admit of being summed up in the single word 'exaggeration.' They called themselves by choice the critical school, and could appropriately enough be described as indeed 'moderately' so. Those who have in recent years gone farthest in this reactionary direction (or, let us call it, retrogression) are, in practice, A. Jülicher in his *Einleitung in das NT*, 1894, 1901⁽²⁾, and, in theory, A. Harnack in the 'Preface' (which is not to be confounded with the contents which follow) to his *Chronologie der altchristlichen Litteratur* (= *ACL* 21, 1897).

Later criticism that may fairly enough be called 'advanced,' in the sense that its conclusions differ

Wendt, *Kommentar AG*(⁹) 1899, pp. 53-60; Th. Zahn, *Einl. in das NT*(²) ii. (1900) 620-47; and CHRONOLOGY, §§ 64-84.]

¹ Some early representations of him on gilded glasses and sarcophagi still remain; accounts of them will be found in Smith and Cheetham, *Dict. Chr. Ant.* 2 1621; Schultze, *Die Kata-komben*, Leipsic, 1882, p. 149.

² See Krenkel, 'Das körperliche Leiden des Paulus,' in the *ZWT*, 1873, p. 238, and in *Beiträge 2. Aufhellung d. Gesch. u. d. Briefe des Ap. Paulus* (1890), 4, 'der Dorn im Fleische,' 47-125; and for various views, Lightfoot, *Galatians*, 1892, p. 186; Farrar, *St. Paul*, vol. i., Excurs. 10 652 [van Manen, *Paulus*, 8 284; Meyer-Heinrich, *Kommentar, 2 Cor.*(⁸) 1900, pp. 397-402; Ramsay, *St. Paul the Traveller and Roman Citizen*(¹⁴) 1898, 94 ff. ('a species of chronic malaria fever'). Cp EVE, DISEASES OF, § 4.

more than those of others from traditional opinion starts from the same principles as the 'critical school,' though its opponents prefer such expressions for it as 'scepticism,' the 'radical' or the 'Dutch school,' 'hypercriticism,' 'uncriticism' or (as Jülicher has it recently) 'pseudo-criticism.' The way for it was prepared, not to speak of Evanson (1792), by Bruno Bauer, A. Pierson, S. A. Naber, and others.

By Bruno Bauer in his three volumes entitled *Kritik der paulinischen Briefe* (1850-52), and again after a silence of many years in his *Christus und die Christusum* (1877; see especially pp. 371-387); by A. Pierson in *De Bezorgden en andere synoptische fragmenten* (1858; pp. 68-110); by him and Naber in their *Versamling* (1836); by others in dissertations and discourses on various public occasions in Holland of which some account is to be found in *J.P.T.*, 1883, pp. 593-618; 1884, pp. 562-3; 1886, pp. 418-444 (Dutch: W. C. van Manen, *Het Nieuwe Testament select* 1859, 1886, pp. 89-126, 225-7, 265).

The Pauline question, however, was first brought forward in a strictly scientific form by A. D. Loman of Amsterdam in his 'Quæstiones Paulinæ,' published in *Th. T.* in 1882, 1883, 1886. This broadly-based study, however, in the beginning still intimately connected with the writer's much discussed hypothesis of the symbolical character of the Gospel history and the person of Jesus, Loman did not live to complete. The portions published by him were the 'Prolegomena' to a book on the principal epistles of Paul, in which the necessity for a revision of the foundations of our knowledge of the original Paulinism and the expediency, for this purpose, of starting from the Epistle to the Galatians are fully set forth (1882, pp. 141-185, cp 593-616); a first chapter in which the external evidence for and against the genuineness of that Epistle is exhaustively discussed (1882, pp. 302-328, 452-487; 1883, pp. 14-57; 1886, pp. 42-55), and a second chapter in which the same question is considered in the light of the Canon (1886, pp. 55-113, cp 319-349, 387-406). At a later date an unfinished study, *De Brief aan de Galatiërs*, was posthumously added to these as *Loman's Galatenschap* (1899). Meanwhile various scholars—J. C. Matthes, J. van Loon, H. U. Meyboom, J. A. Bruins—had signified their agreement with him wholly or partially, and he was followed in the path of advancing criticism he had opened up, as regards the question of the sources of our knowledge of Paul, his life and his work, though without for a moment committing themselves to Loman's hypothesis respecting the gospel history, by Rudolf Steck of Bern, D. E. J. Völter of Amsterdam, and W. C. van Manen of Leyden.

Steck's well-written book *Der Galaterbrief nach seiner Echtheit untersucht, nebst kritischen Bemerkungen aus den paulinischen Hauptbriefen* was published in 1888; Völter's 'Ein Votum zur Frage nach der Echtheit, Integrität u. Composition der vier paulinischen Hauptbriefe' was published in *Th. T.* in 1889 (pp. 265-325), but still remains unfinished in its revised form *Die Komposition der paulinischen Hauptbriefe: 1. Der Römer- u. Galaterbrief* (1890). Van Manen, as yet hesitatingly in 1886-87, but decidedly in 1888 as a contributor to *Th. T.* and other periodicals, and subsequently in connection with his academical work, has participated largely in the present discussions.¹

See especially his *Paulus* in three parts: *De Handelingen der Apostelen* (Acts), 1890; *De brief aan de Romeinen*, 1891; *De brieven aan de Korinthiërs*, 1896; followed by a condensed summary of the results arrived at in his *Handleiding voor de Oudchristelyke letterkunde*, 1900. For a somewhat fuller survey of the earlier history of this criticism and of the reception it met with in the learned world the reader may consult his articles entitled 'A Wave of Hypercriticism' in *Exp. T.* 9, 1898, pp. 205-211, 257-9, 314-9.

The same critical principles of the 'later criticism'—recently adopted also by Prof. W. B. Smith of Tulane University, New Orleans (see ROMANS)—have likewise been in some measure followed, however unconsciously in the main, by all those who at one time or another have sought, by postulating redactions, interpolations, and

¹ To such an extent indeed as would justify him in saying without immodesty *quorum pars magna fui.*

additions, to escape from the difficulties in the way of accepting the Pauline authorship of one or more of the 'principal epistles.'

35. Its relation to 'redaction' and 'interpolation' hypotheses. It will suffice to mention (1) with regard to all the four epistles: the view of J. H. A. Michelsen (*Th. T.*, 1873, p. 421) that in these we have the original epistles of Paul published after his death with elucidations and notes; also conjectures by Straatman, Baljon (1884) and Sulze (*Prot. Kirch.-Ztg.*, 1888, pp. 978-85).

(2) So far as Romans is concerned, we have the conjecture of Semler, Baur, and others, that chaps. 15-16, wholly or in part, do not belong to the fourteen preceding chapters, and, according to many, are not from the hand of Paul; that of C. H. Weisse, that chaps. 9-11, of Straatman, that chaps. 12-14, do not belong to the original epistle; of Laurent (1866), that the epistle at a later date was furnished with a number of marginal glosses; of Renan, that it was issued by Paul in more than one form (e.g., 1-11 + 15, 1-14 + part of 16); of Michelsen (*Th. T.*, 1886-7) that we have to distinguish five or six editions in the original text; of E. Spitta (1893) that it is a combination of two letters written by Paul at different times to the Christians of Rome, one before and one after his visit to that city.

(3) With respect to 1 and 2 Corinthians, we have the conjecture of Semler (1776), E. J. Greve (1794), Weber (1798), C. H. Weisse (1855), Hausrath (1870), Michelsen (1873), Baljon (1884), O. Pfeiderer (1887), W. Brückner (1890), M. Krenkel (1890), P. W. Schmiedel (1892), J. Cramer (1893), A. Halmel (1894), J. Weiss (1894), H. J. Holtzmann (1894), H. Lisco (1896) that 2 Cor. is made up of two or more pieces which originally did not belong to one another; of Lipsius (1873), Hage (1876), Spitta (1893), Clemen (1894) that the same holds true of 1 Cor.; and of Straatman (1863-5) and J. A. Bruins (1892) that both epistles contain a vast number of interpolations.

(4) As regards Gal., the same opinion has been held by Weisse, Sulze, Baljon (1889) and Cramer (1890)—the last two in their commentaries.

Yet, however obvious in all this be the unconscious preparation for and transition to the criticism spoken of

36. Its proposed task. in § 34, this last does not occupy itself with such conjectures as those just suggested (in § 35), unless perhaps in special cases, and never with the definite object of escaping by such means from difficulties touching what is called the genuineness of the Epistles. It is ready to submit all such hypotheses to a candid examination, but does not value expedients whereby objections can be silenced temporarily. It does not start from the belief that the *non plus ultra* of critical emancipation has been realised by the Tübingen school; but neither does it think that that school went too far. For it, there is nothing *a priori* 'too far' in this field; and it believes that criticism is ever in duty bound to criticise its own work and to repair its defects. It recognises no theoretical limit whatsoever that can reasonably be fixed. It ranks the critical labours of Baur and his school, notwithstanding all shortcomings and defects, far above those of older and less critically moulded scholars. It wishes nothing better than, *mutatis mutandis*, to continue the research pursued by the Tübingen school, and, standing on the shoulders of Baur and others, and thus presumably with the prospect of seeing clearer and farther, to advance another stage, as long a stage as possible, towards a real knowledge of Christian antiquity.

That is not to be attained, in the judgment of this school of critics, by a simple return to the old views, by accepting the opinions of those scholars who busied themselves with researches of this kind before Baur (in the first decades of the 19th century or in the last of the 18th), nor yet by adopting the traditional conceptions current at a still earlier period whether amongst

candid Protestants or thinking Roman Catholics. No error committed by a younger generation can ever make to be true anything in the opinions of an older generation which has once been discovered to have been false.

Still less does the criticism with which we are now dealing cherish hopes from any mediating policy of 'give and take.' It has found that it does not avail, in estimating the Tübingen theory, in one point or another, to plead 'extenuating circumstances' in favour of tradition whether churchly or scientific, and to offer here or there an amendment on the sketch drawn by Baur (or others after him) of the state of schools and parties in Old Christianity, or to extend the number of the 'indisputably genuine' epistles of Paul from four to six or seven (the 'principal epistles' + Philippians, Philemon and 1 Thess.), eight (+ 2 Thess. or Col.), nine (+ both 2 Thess. and Col.), ten (+ Eph.), if not even augmented by genuine Pauline fragments in the Pastoral Epistles. The defects of the 'tendency criticism' passed upon the NT writings and other documents of early Christianity which have come down to us, whether the criticism in which Baur led the way or that of others like Volkmar, Holsten, S. Davidson, Hatch (who followed Baur, while introducing into his criticism corrections more or less far-reaching), demand a more drastic course. It is needful to break not only with the dogma of the 'principal epistles' in the order suggested by Baur and afterwards accepted by Hatch—Gal., 1 and 2 Cor., Rom.—but also with the dogma of there being four epistles of Paul in any order with regard to the genuineness of which no question ought to be entertained. It was a great defect in the criticism of the Tübingen school that it set out from this assumption without thinking of justifying it. It can be urged in excuse, that at the time no one doubted its justice; Evanson was forgotten and Bruno Bauer had not yet arisen; but none the less the defect cannot be regarded as other than serious. It has wrought much mischief and must be held responsible for the song of triumph now being prematurely uttered even by those whose opposition to criticism is by no means trenchant, the burden of which is, 'Tübingen itself has alleged nothing against these epistles.' The latest school of advanced criticism has learned not to rejoice over this but to regret an unfinished piece of work that ought to have been taken in hand long ago and demands to be taken up now. It regrets that Baur and his followers should not have stopped to consider the origin of the 'principal epistles.' It holds that criticism should investigate, not only those books which have been doubted for a longer or shorter period, but also even those that hitherto—it may even be, by every one—have been held to be beyond all doubt, whether they be canonical or uncanonical, sacred or profane. Criticism is not at liberty to set out from the genuineness—or the spuriousness—of any writing that is to be used as evidence in historical research as long as the necessary light has not been thrown upon it, and least of all may it do so after some or many writings of the same class have already been actually found to be pseudepigrapha. It was and is in the highest degree a one-sided and arbitrary proceeding to go with Baur upon the *assumption* of the genuineness of the 'principal epistles' as fully established, and in accordance with this to assume that Acts must take a subordinate place in comparison with them. It is not *a priori* established that Paul cannot be mistaken, at least as long as we do not know with certainty whether he and the writer of the epistles that have come down to us under his name are indeed one and the same. The investigation of Acts must be carried on independently of that of the Epistles, just as that of the Epistles must be independent of that of Acts. This rule must be applied in the case of every epistle separately as well as in connection with the other epistles which we have learned to recognise as belonging to the same group.

The four 'principal epistles' are not a fixed datum by which Acts and other Pauline writings can be tested unless one is previously able to prove their genuineness. This point has not been taken into account by the Tübingen school—greatly to their loss. As soon as it is observed, it becomes the task of criticism to subject to a strict examination the principal epistles one by one, from this point of view. What, then, is the criterion which may be employed in this investigation? None of the so-called external evidences. These do not avail here, however valuable may be what they have to tell us often as to the opinion of antiquity concerning these writings. So much Baur and his followers had already long ago learned to recognise. The 'critical school' had confessed it, even by the mouth of those among its adherents who had found themselves nearest to the thorough-going defenders of tradition. Where then must the determining consideration be looked for? In the direction where in such circumstances it is always wont to be found: in the so-called 'internal' evidence. It is internal criticism that must speak the last, the so far as possible conclusive, word.

The demand seemed to many too hard, as regarded the 'principal epistles.' The Tübingen school and the 'critical' school alike shrank from making it. The 'progressive' criticism which had meanwhile come into being, submitted to the inevitable. It addressed itself to the task imposed. To the question, with what result? the answer, unfortunately, cannot be said to be wholly unanimous. True, this is a disadvantage under which the opposing party labours no less than the other. There is no criticism in the judgments of which no trace can be found of what can be called a subjective side.

Viewed broadly, and with divergences in points of detail left out of account, what the recent criticism now described has to say regarding Acts is in **37. Its view of Acts** substance as follows. The book professes to be a sequel to the third canonical gospel, designed in common with it to inform a certain Theophilus otherwise unknown to us, or in his person any recent convert to Christianity, more precisely with regard to the things in which he has been instructed (Acts 1:1-5, cp Lk. 1:1-4 24:36-53). We find in it in accordance with this, a by no means complete, yet at the same time (at least, in some measure) an orderly and continuous sketch of the fortunes of the disciples of Jesus, after his resurrection and ascension; of their appearances in Jerusalem and elsewhere; and in particular, of the life and work of Peter, in the first part (Acts 1-12), and more fully and amply of the life and work of Paul, in the second part (13-28).

Even leaving aside any comparison with the Pauline epistles, we cannot regard the contents of Acts, viewed as a whole, and on their own merits, as a true and credible first-hand narrative of what had actually occurred, nor yet as the ripe fruit of earnest historical research—not even where, in favourable circumstances, the author might occasionally have been in a condition to give this. The book bears in part a legendary-historical, in part an edifying and apologetical character. The writer's intention is to instruct Theophilus concerning the old Christian past, as that presented itself to his own mind after repeated examination, to increase the regard and affection of his readers for Christianity, and at the same time to show forth how from the first, although hated by the Jews, this religion met with encouragement on the part of the Romans. Of a 'tendency,' in the strict sense of the word, as understood by the Tübingen school, there is nothing to be seen. The book does not aim at the reconciliation of conflicting parties, Petrinists and Paulinists, nor yet at the exaltation of Paul or at casting his Jewish adversaries into the shade, or at placing him on a level with Peter.

Of the substantial unity of the work there can be no question. We have not here any loose aggregation of fragments derived from various sources. Still less,

however, can we fail to recognise that older authorities have been used in its composition. Amongst these are prominent two books which we may appropriately call (a) Acts of Paul, and (b) Acts of Peter. From a is derived in the main what we now read in 1 23 (D), 436-37 61-15 751-83 91-30 1119-30 13-28; from b, more particularly, much of chaps. 1-12.

(a) The first and older of the two books included mainly a sketch of the life and work of Paul, according to the ideas of those Christians who placed him high, and who, as compared with others, deserve to be called progressive. With this was worked in—but not incorporated without change (unless the corrections which can still be traced are to be laid to the account of the author of Acts)—a journey narrative, very possibly the work of Luke the companion of Paul. See 11 27 (D), 16 10-17 20 5-15 21 1-18 27 1-28 16.

(b) The second book, written in view of the Acts of Paul just described, was an attempt to allow more justice to be done to tradition and more light to be thrown upon Peter.

Perhaps the author of the entire work, as we now know it, in addition to oral tradition, had still other means of information at his disposal (such as Flavius Josephus) and borrowed here and there a detail, but certainly not much, from the Pauline epistles.

Alternately free and fettered in relation to his authorities, the author sometimes used their language, yet, as a rule, employed his own. He followed in their footsteps for the most part, yet frequently went his own way, transposing and correcting, supplementing and abridging what he had found in others. To ascertain the details of the process in every case is no longer possible. On the chief points, a fuller discussion will be found in W. C. van Manen, *Paulus: I. De Handelingen der Apostelen*, 1890.

The spirit in which Lk. set about his work is that of budding Catholicism, which has room alike for 'Paul' and for 'Peter,' and does not shrink from bringing to the notice of the faithful a writing—the Acts of Paul just referred to—devoted to the commemoration and glorification of the 'apostle of the heretics' as Tertullian still called him, albeit clothed in a new dress whereby at the same time reverent homage is rendered to the tradition of the ancients.

Lk.'s true name remains unknown. His home was probably in Rome; but perhaps it may have been somewhere in Asia Minor. He flourished about the second quarter of the second century. There is no necessity for doubting the correctness of the representation that he is one and the same with the author of the Third Gospel.

In the days when the contents of sacred books were held exempt from criticism, the historical value of Acts was much overrated; more recently under the influence of Tübingen criticism it has been unduly depreciated. It is entitled to recognition in so far as it is a rich source of information as to how the Christianity of the first 30 or 35 years after the crucifixion was spoken about, estimated, and taught, in influential circles, about the years 130-150 A.D. It is entitled to recognition also, in so far as we are still in a position to trace, in what has been taken over with or without alteration from older works, how it was that men of that period thought about implied, or expressly mentioned persons, things, and relations. In estimating the value of details, it is incumbent on us always, so far as possible, to distinguish between the original historical datum, the valuable substance of a trustworthy tradition, and the one-fold, two-fold, threefold, or it may be manifold clothing with which this has been invested by later views and opinions, and in too many cases, unfortunately, concealed by them, in such a manner that it is not always possible, even for the keenest eye, to discriminate as could be wished between truth and fiction.

With respect to the canonical Pauline epistles, the later criticism here under consideration has learned to

recognise that they are none of them by Paul; neither fourteen, nor thirteen, nor

epistles. nine or ten, nor seven or eight, nor yet even the four so long 'universally' regarded as unassailable. They are all, without distinction, pseudepigrapha (this, of course, not implying the least depreciation of their contents). The history of criticism, the breaking up of the group which began as early as 1520, already pointed in this direction. No distinction can any longer be

allowed between 'principal epistles' and minor or deuterio-Pauline ones. The separation is purely arbitrary, with no foundation in the nature of the things here dealt with. The group—not to speak of Hebrews at present—when compared with the Johannine epistles, with those of James, Jude, Ignatius, Clement, with the gospel of Matthew, or the martyrdom of Polycarp, bears obvious marks of a certain unity—of having originated in one circle, at one time, in one environment; but not of unity of authorship, even if a term of years—were it even ten or twenty—be allowed. It is impossible, on any reasonable principle, to separate one or more pieces from the rest. One could immediately with equal right pronounce an opposite judgment and condemn—e.g., Romans or Corinthians, compared with the rest, as under suspicion. Every partition is arbitrary. However one may divide them, there will always remain (within the limits of each group, and on a comparison of the contents of any two or three assumed classes), apart from corrections of subordinate importance, clearly visible traces of agreement and of divergence—even on a careful examination of the famous four: Rom., 1 and 2 Cor., Gal. There is no less distinction in language, style, religious or ethical contents between 1 and 2 Cor. on the one hand, and Rom. and Gal. on the other, than there is between Rom. and Phil., Col. and Philem. On the contrary, in the last two cases the agreement is undeniably greater.

Tradition does not assert the Pauline origin of the 'principal epistles' more loudly than it does that of the pastoral or of the 'minor' epistles. External evidences plead at least as strongly, or, to speak more accurately, just as weakly, for the latter as for the former. The internal point just as strongly in the case of Rom., 1 and 2 Cor., and Gal., as they do elsewhere to the one conclusion that they are not the work of Paul. This deliverance rests mainly on the following considerations, each of them a conclusion resulting from independent yet intimately connected researches.

The 'principal epistles,' like all the rest of the group, present themselves to us as epistles; but this is not their

39. Their real character in the ordinary and literary meaning of the word. They are not letters form. originally intended for definite persons, despatched to these, and afterwards by publication made the common property of all. On the contrary, they were, from the first, books; treatises for instruction, and especially for edification, written in the form of letters in a tone of authority as from the pen of Paul and other men of note who belonged to his entourage: 1 Cor. by Paul and Sosthenes, 2 Cor. by Paul and Timothy, Gal. (at least in the exordium) by Paul and all the brethren who were with him; so also Phil., Col. and Philem., by Paul and Timothy, 1 and 2 Thess. by Paul, Silvanus, and Timothy. The object is to make it appear as if these persons were still living at the time of composition of the writings, though in point of fact they belonged to an earlier generation. Their 'epistles' accordingly, even in the circle of their first readers, gave themselves out as voices from the past. They were from the outset intended to exert an influence in as wide a circle as possible; more particularly, to be read aloud at the religious meetings for the edification of the church, or to serve as a standard for doctrine and morals. Hence it comes that, among other consequences, we never come upon any trace in tradition of the impression which the supposed letters of Paul may have made—though, of course, each of them must, if genuine, have produced its own impression—upon the Christians at Rome, at Corinth, in Galatia; and the same can be said of all the other canonical epistles of Paul. Hence, also, the surprising and otherwise unaccountable features in the addresses of the epistles: 'to all that are in Rome, beloved of God, called to be saints' (Rom. 17), 'to the church of God which is at Corinth, them that are

sanctified in Christ Jesus, called to be saints, *with all* who invoke the name of our Lord Jesus Christ, in all places, theirs and ours' (1 Cor. 12); 'to the church of God which is at Corinth, *with all* the saints in the whole of Achaia' (2 Cor. 11), 'to the churches of Galatia' (Gal. 12). The artificial character of the epistolary form comes further to light with special clearness when we direct our attention to the composition of the writings. In such manner real letters are never written.

i. In a very special degree does this hold true no doubt of 2 Cor. Many scholars, belonging in other respects to very different schools, have been convinced for more than a century and have sought to persuade others that this epistle was not written at one gush or even at intervals; that it consists of an aggregation of fragments which had not originally the same destination.

ii. 1 Cor. allows us to see no less clearly that there underlie the finished epistle as known to us several greater or smaller treatises, having such subjects as the following:—parties and divisions in the church (120-323), the authority of the apostles (4), unchastity (5-6), married and unmarried life (7), the eating of that which has been offered to idols (8-11), the veiling of women (112-15 [16]), love feasts (117-34), spiritual gifts (12-14), the resurrection (15), a collection for the saints (161-4)—other passages being introduced relating to the superiority of the preaching of the cross above the wisdom of this world (118-31), the spirit in which Paul had laboured (21-16), the right of litigation between Christians (61-11), circumcised and uncircumcised, bond and free (718-24), the apostolic service (9), Christian love (13).

iii. With regard to Rom. it is even more obvious that the author accomplished his task with the help of writings, perhaps older 'epistles,' treatises, sayings handed down whether orally or in writing—although we must admit, as in the case of so many other books, both older and more recent, that we are not in a position to indicate with any detail what has been borrowed from this source and what from that, or what has been derived from no previous source whatever, and is the exclusive property of the author, editor, or adapter.

iv. With Gal. the case is in some respects different, and various reasons lead us, so far as the canonical text is concerned, to think of a catholic adaptation of a letter previously read in the circle of the Marcionites, although we are no longer in a position to restore the older form. We have in view the employment of such words as Peter (Πέτρος) alongside of Cephas (Κηφᾶς), of two forms of the name Jerusalem (Ἱεροσόλυμα alongside of Ἱερουσαλήμ), the presence of discrepant views (as in 3729 and 310) of Abraham's seed; the zeal against circumcision in 524612-13 alongside of the frank recognition that it is of no significance (56615)—the cases in which the ancients charged Marcion with having falsified the text, though the textual criticism of modern times has found it necessary to invert the accusation.

There are to be detected, accordingly, in the composition of the 'principal epistles' phenomena which, whatever be the exact explanation arrived at in each case, all point at least to a peculiarity in the manner of origin of these writings which one is not accustomed to find, and which indeed is hardly conceivable, in ordinary letters.

The contents of the epistles, no less than the results of an attentive consideration of their form, lead to the conclusion that the 'principal contents: epistles' cannot be the work of the apostle Paulinism.¹ Paul.

i. Is it likely that Paul, a man of authority and recognised as such at the time, would have written to the Christians at Rome—men who were personally unknown to him—what, on the assumption of the genuineness of the epistle, we must infer he did write? That he would have taken so exalted a tone, whilst at the same time forcing himself to all kinds of shifts in writing to his spiritual children at Corinth and in Galatia? One cannot form to oneself any intelligible conception of his attitude either to the one or to the other; nor yet of the mutual relations of the parties and schools which we must conceive to have been present and to some extent in violent conflict with one another if Paul really thought and said about them what we find in the 'principal epistles.'

ii. Even if we set all this aside, however, the doctrinal and religious-ethical contents betoken a development in Christian life and thought of such magnitude and depth as Paul could not possibly have reached within a few

years after the crucifixion. So large an experience, so great a widening of the field of vision, so high a degree of spiritual power as would have been required for this it is impossible to attribute to him within so limited a time.

It does not avail as a way of escape from this difficulty to assume, as some do, a slow development in the case of Paul whereby it becomes conceivable that when he wrote the 'principal epistles' he had reached a height which he had not yet attained fourteen or twenty years previously. There is no evidence of any such slow development as is thus assumed. It exists only in the imagination of exegetes who perceive the necessity of some expedient to remove difficulties that are felt though not acknowledged. Moreover, the texts speak too plainly in a diametrically opposite sense. It is only necessary to read the narrative of Paul's conversion as given by himself according to Gal. 110-16 in order to see this. The bigoted zealot for the law who persecuted the infant church to the death did not first of all attach himself to those who professed the new religion in order to become by little and little a reformer of their ideas and intuitions. On the contrary, on the very instant that he had suddenly been brought to a breach with his Jewish past, he publicly and at once came forward with all that was specially great and new in his preaching. The gospel he preached was one which he had received directly. It was not the glad tidings of the Messiah, the long expected One, who was to come to bless his people Israel; it was the preaching of a new divine revelation, and this not communicated to him through or by man, but immediately from above, from God himself, God's Son revealed *in him*. With this revelation was at the same time given to him the clear insight and the call to go forth as a preacher to the Gentiles.

iii. Underlying the principal epistles there is, amongst other things, a definite spiritual tendency, an inherited type of doctrine (Rom. 617)—let us say the older Paulinism—with which the supposed readers had long been familiar. They are wont to follow it, now in childlike simplicity, now with eager enthusiasm, or to assail it, not seldom obstinately, with all sorts of weapons and from various sides. Some have already got beyond this and look upon Paulinism more as if it were a past stage, a surmounted point of view. One might designate them technically as Hyperpaulinists. They are met with especially amongst Paul's opponents at Corinth according to 1 and 2 Cor. Others remain in the rear or have returned to the old view, the Jewish or Jewish-Christian view which had preceded Paulinism. They are the Judaisers against whom above all others the Galatians are warned and armed. Both are groups which one can hardly imagine to oneself as subsisting, at least in the strength here supposed, during the lifetime of Paul. Plainly Paul is not a contemporary, but a figure of the past. He is the object or, if you will, the central point of all their zeal and all their efforts.

iv. Paulinism itself, as it is held up and defended in the 'principal epistles,' apart from diversities in the elaboration of details by the various writers, is nothing more or less than the fruit of a thorough-going reformation of the older form of Christianity. Before it could be reached the original expectations of the first disciples of Jesus had to be wholly or partly given up. The conception of Jesus as the Messiah in the old Jewish meaning of the word had to give place to a more spiritual conception of the Christ the Son of God; the old divine revelation given in the sacred writings of Israel had to make way for the newer revelation vouchsafed immediately by God, in dreams and visions, by day and by night, and through the mediation, if mediation it can be called, of the Holy Ghost; the law had to yield to the gospel. For these things time—no little time—was needed, even in days of high spiritual tension such as must have been those in which the first Christians lived and in which many are so ready to take refuge in

¹ Cp § 47.

order to be able to think it possible that the 'principal epistles,' with their highly varied contents could have been written so soon after the death of Jesus as the theory of Pauline authorship compels us to assume.

v. Writers and readers, as we infer from the contents, live in the midst of problems which—most of them at all events—when carefully considered are seen not to belong to the first twenty or thirty years after the death of Jesus. We refer to questions as to the proper relation between law and gospel, justification by faith or by works, election and reprobation, Christ according to the flesh and Christ according to the Spirit, this Jesus or another, the value of circumcision, the use of clean or unclean things, sacrificial flesh, common flesh and other ordinary foods and drinks, the Sabbath and other holy days, revelations and visions, the married and the unmarried condition, the authority of the apostles, the marks of true apostleship and a multitude of others.

We must not be taken in by superfluous appearances. Though Paul is represented as speaking, in reality he himself and his fellow apostles alike are no longer alive. Everywhere there is a retrospective tone. It is always possible to look back upon them and upon the work they achieved.

Paul has planted, another has watered (1 Cor. 8.6). He as a wise master-builder has laid the foundation; another has built thereupon (3.10). He himself is not to come again (4.18). He and his fellow-apostles have already 'been made a spectacle unto the world, both to angels and to men,' God has 'set them forth as men doomed to death, lowest and last'—*i.e.*, given them the appearance of being persons of the lowest sort (4.9). Their fight has been fought, their sufferings endured. It is already possible to judge as to the share of each in the great work. Paul, to whom Christ appeared after his resurrection 'last of all,' 'the least of the apostles,' has 'laboured more abundantly than they all' (15.8-10); he has run his course in the appointed way (9.26-7), a follower of Christ (even as others may be followers of himself, 11.1), whose walk in the world can readily stand comparison with that of others, even the most highly placed in Christian circles (2 Cor. 1.12 11.5 12.11), who has been ever victorious, whom God has always led in triumph, making manifest the savour of his knowledge by him in every place; 'unto God a sweet savour of Christ,' by his coming forward testifying, as in the sight of God, of the sacrifice made by Christ in his death; sufficient for all things (2.14-16); a pattern of long-suffering, patience, and perseverance, who had more to endure than any other man (4.8-10 6.4-5 7.5 11.23-27), an ideal form whose sufferings have accrued to the benefit of others and been a source of comfort to many (4.10-7, 1.4-7).

vi. A special kind of Christian gnosis, a wisdom that far transcends the simplicity of the first disciples and their absorption with Messianic expectations haunts and occupies many of the more highly-developed minds (1 Cor. 1.17-31 2.6 16 and elsewhere). In Rom. 9-11 the rejection of Israel is spoken of in a manner that cannot be thought to have been possible before the fall of the Jewish state in 70 A.D. The church is already conceived of as exposed to bloody persecutions, whereas, during Paul's lifetime, so far as is known to us, no such had as yet arisen (Rom. 5.3-5 8.17-39 12.12 14 2 Cor. 1.3-7); she has undoubtedly been in existence for more than a few years merely, as is usually assumed, and indeed requires to be assumed, on the assumption of the genuineness of the epistles.

The church has already, from being in a state of spiritual poverty, come to be rich (1 Cor. 1.5). Originally in no position to sound the depths, consisting of a company of but little developed persons, the majority of its members though still in a certain sense 'carnal' are able to follow profound discussions on questions so difficult as those of speaking with tongues, prophecy, or the resurrection (1 Cor. 12.13). There are already 'perfect' ones who can be spoken to about the matters of the higher wisdom; spiritual ones who can digest strong nourishment; understanding ones who have knowledge (2.6-16 8.1-3 10.15). The church is in possession of their traditions (11.2 23 15.2); epistles of Paul which presented a picture of him different from the current tradition received from those who had associated with him (2 Cor. 1.13 10.10). There is an ordered church life to the following of which the members are held bound. There are fixed and definite customs and usages—such as regular collections of charitable gifts (2 Cor. 9.13) or the setting apart, when required, of persons whose names were in good repute, and who had been chosen, by the laying on of hands (6.18.7).

In a word, the church has existed not for a few years merely. The historical background of the epistles, even of the principal epistles, is a later age. The Christianity

therein professed, presupposed, and avowed, in a number of its details does not admit of being explained by reference to the period preceding the date of Paul's captivity or even that of his death in 64 A.D. Everything points to later days—at least the close of the first or the beginning of the second century.

Necessary limitations of space do not allow of fuller elucidations here. The reader who wishes to do real justice to the view here taken of the question as to the genuineness of Paul's epistles will not stop at the short sketch given here, but will consult the following works among others:—

(a) On the subject as a whole, Loman, 'Quæstiones Paulinæ' in *Th. T.*, 1882, pp. 141-185; cp 593-616, 1886, 55-113; cp 319-349 and 387-406; Steck, *Galatærbrief*, 1-23, 152-386. (b) On Rom. and Cor., Van Manen, *Paulus*, 2 and 3. (c) On Gal., Steck, *Galatærbrief*; cp Loman, 'Quæst. Paul.' in *Th. T.*, 1882, pp. 302-323, 452-487; 1883, pp. 14-57; 1886, pp. 42-55; and Loman's *Nalatenschap*, 1899; (d) for a general survey of the entire Pauline group, Van Manen, *Handleiding*, iii., §§ 1-98 (pp. 30-63).

To the question as to the bearing of the conclusions of criticism upon our knowledge of the life and activity

41. Paul's life and work: negative results.

of Paul, the answer must frankly be that in the first instance the result is of a purely negative character. In truth, this is common to all the results of criticism when seriously applied. Criticism must always begin by pulling down everything that has no solid or enduring foundation.

Thus all the representations formerly current—alike in Roman Catholic and Protestant circles—particularly during the nineteenth century—regarding the life and work of Paul the apostle of Jesus Christ, of the Lord, of the Gentiles, must be set aside, in so far as they rest upon the illusory belief that we can implicitly rely on what we read in Acts and the 13 (14) epistles of Paul, or in the epistles alone whether in their entirety or in a restricted group of them. These representations are very many and—let it be added in passing—very various and discrepant in character: far from showing any resemblance to one another, they exhibit the most inconsistent proportions and features. But, however different they were, they all of them have disappeared; they rested upon a foundation not of solid rock, but of shifting sand.

So, too, with all those surveys of Paulinism, the 'ideas,' the 'theology,' the 'system' of Paul, set forth in accordance with the voice of tradition, as derived from a careful study of the contents of Acts and the epistles, whether taken in their entirety or curtailed or limited to the 'principal epistles' alone. Irrevocably passed away, never more to be employed for their original purpose, are such sketches, whether on a large or on a smaller scale, whether large or narrow in their scope, sketches among which are many highly important studies, especially within the last fifty years. Henceforward, they possess only a historical interest as examples of the scientific work of an older school. They do not and could not give any faithful image or just account of the life and teaching of Paul, the right foundation being wanting.

This, however, does not mean, as some would have us believe, that the later criticism has driven history from the lists, banished Paul from the world of realities, and robbed us even of the scanty light which a somewhat older criticism had allowed us, to drive away the darkness as to the past of early Christianity. These are impossibilities. No serious critic has ever attempted them or sought to obscure any light that really shone. The question was and is simply this: what is it that can be truly called history? Where does the light shine? To see that one has been mistaken in one's manner of apprehending the past is not a loss but a gain. It is always better, safer, and more profitable, to know that one does not know, than to go on building on a basis that is imaginary.

The results of criticism, even of the most relentless

criticism, thus appear to be after all not purely negative.

42. Positive results. Though at first sight they may, and indeed must, seem to be negative, they are not less positive in contents and tendency.

Foundations. The ultimate task of criticism is to build up, to diffuse light, to bring to men's knowledge the things that have really happened. As regards Paul's life and work, now that the foundations have been changed, it teaches us in many respects to judge in another sense than we have been accustomed to do. Far from banishing his personality beyond the pale of history, criticism seeks to place him and his labours in the juster light of a better knowledge. For this it is unable any longer in all simplicity to hold by the canonical Acts and epistles, or even to the epistles solely, or yet to a selection of them. The conclusion it has to reckon with is this:—(a) That we possess no epistles of Paul; that the writings which bear his name are pseudepigrapha containing seemingly historical data from the life and labours of the apostle, which nevertheless must not be accepted as correct without closer examination, and are probably, at least for the most part, borrowed from 'Acts of Paul' which also underlie our canonical book of Acts (see above, § 37). (b) Still less does the Acts of the Apostles give us, however incompletely, an absolutely historical narrative of Paul's career; what it gives is a variety of narratives concerning him, differing in their dates and also in respect of the influences under which they were written. Historical criticism must, as far as lies in its power, learn to estimate the value of what has come down to us through both channels, Acts and the epistles, to compare them, to arrange them and bring them into consistent and orderly connection. On these conditions and with the help of these materials, the attempt may be made to frame some living conception of the life and work of the apostle, and of the manner in which the figure of the apostle was repeatedly recast in forms which superseded one another in rapid succession.

Towards this important work little more than first essays have hitherto been made. The harvest promises to be plentiful; but the labourers as yet are too few. We must, for the time being, content ourselves with indicating briefly what seem to be the main conclusions.

Paul was the somewhat younger contemporary of Peter and other disciples of Jesus, and probably a Jew by birth, a native of Tarsus in Cilicia.

43. The historical Paul. At first his attitude towards the disciples was one of hostility. Later, originally a tentmaker by calling, he cast in his lot with the followers of Jesus, and, in the service of the higher truth revealed through them, spent the remainder of a life of vicissitude as a wandering preacher. In the course of his travels he visited various lands: Syria, Asia Minor, Greece, Italy. Tradition adds to the list a journey to Spain, then back to the East again, and once more westwards till at last his career ended in martyrdom at Rome. With regard to his journeys, we can in strictness speak with reasonable certainty and with some detail only of one great journey which he undertook towards the end of his life: from Troas to Philippi, back to Troas, Assos, Mitylene, Samos, Miletus, Rhodes, Patara, Tyre, Ptolemais, Caesarea, Jerusalem, back to Caesarea, Sidon, Myra, Fair Havens, Melita, Syracuse, Rhegium, Puteoli, Rome (Acts 16 10-17 20 5-15 21 1-18 27 1-28 16).

Perhaps at an earlier date he had been one of the first who, along with others of Cyprus and Cyrene, proclaimed to Jews and Gentiles outside of Palestine the principles and the hopes of the disciples of Jesus (Acts 11 19 f.). Possibly, indeed probably, we may infer further details of the same sort from what Lk. and the authors of the epistles have borrowed from the 'Acts of Paul,' as to the places visited by Paul, and the measure of his success in each; in which of them he met with opposition, in which with indifference; what

particular discouragements and adventures he encountered; such facts as that he seldom or never came into contact with the disciples in Palestine; that even after years had passed he was still practically a stranger to the brethren dwelling in Jerusalem; that on a visit there he but narrowly escaped suffering the penalty of death on a charge of contempt for the temple, which would show in how bad odour he had long been with many.

As regards all these details, however, we have no certain knowledge. The Acts of Paul, so far as known to us, already contained both truth and fiction. In no case did it claim to give in any sense a complete account of the doings and sufferings of the apostle in the years of his preaching activity. The principal source which underlies it, the journey narrative, the so-called 'We-source,' is exceedingly scanty in its information. It says not much more, apart from what has been already indicated about the great Troas-Philippi-Troas-Rome journey, than that Paul, sometimes alone, sometimes in company with others, visited many regions, and preached in all of them for at least some days, in some cases for a longer period.

It does not appear that Paul's ideas differed widely from those of the other 'disciples,' or that he had emancipated himself from Judaism or had outgrown the law more than they. Rather do one or two expressions of the writer of the journey-narrative tend to justify the supposition that, in his circle, there was as yet no idea of any breach with Judaism. At any rate, the writer gives his dates by the Jewish calendar and speaks of 'the days of unleavened bread' (*i.e.*, after the passover), Acts 20 6, and of 'the fast' (*i.e.*, the great day of atonement in the end of September), 27 9. He is a 'disciple' among the 'disciples.' What he preaches is substantially nothing else than what their mind and heart are full of, 'the things concerning Jesus' (τὰ περὶ τοῦ Ἰησοῦ).

It may be that Paul's journeyings, his protracted sojourn outside of Palestine, his intercourse in foreign parts with converted Jews and former heathen, may have emancipated him (as it did so many other Jews of the dispersion), without his knowing it, more or less—perhaps in essence completely—from circumcision and other Jewish religious duties, customs, and rites. But even so he had not broken with these. He had, like all the other disciples, remained in his own consciousness a Jew, a faithful attender of temple or synagogue, only in this one thing distinguished from the children of Abraham, that he held and preached 'the things concerning Jesus,' and in connection with this devoted himself specially to a strict life and the promotion of mutual love. What afterwards became 'Paulinism,' 'the theology of Paul,' was not yet. Still less does it ever transpire that Paul was a writer of epistles of any importance; least of all, of epistles so extensive and weighty as those now met with in the Canon. So also there is no word, nor any trace, of any essential difference as regards faith and life between him and other disciples. He is and remains their spiritual kinsman; their 'brother,' although moving in freedom and living for the most part in another circle.

For doubting, as is done by E. Johnson, the formerly anonymous writer of *Antiqua Mater* (1887), the historical existence of Paul and his activity as an itinerant preacher outside the limits of Palestine, there is no reason. Such doubt has no support in any ancient document, nor in anything in the journey-narrative that, in itself considered, ought to be regarded as improbable; on the other hand, it is sufficiently refuted by the universality of the tradition among all parties regarding Paul's life and work (cp Van Manen, *Paulus*, 1 192-200).

It is true that the picture of Paul drawn by later times differs utterly in more or fewer of its details from the original. Legend has made itself master of his person. The simple truth has been mixed up with invention; Paul has become the hero of an admiring band

of the more highly developed Christians; the centre, at the same time, of a great movement in the line of the development of the faith and expectations of the first disciples; the father of Paulinism—that system which, at first wholly unnoticed by the majority, or treated with scorn and contempt (cp § 4, n. 2), soon met with general appreciation, and finally found world-wide fame, however at all times imperfectly understood.

It is difficult, or almost impossible, to indicate with distinctness how far Paul himself, by his personal influence and testimony, gave occasion for the formation of that which afterwards came to be associated with his name, and which thenceforward for centuries—indeed inseparably for all time, it might seem—has continued to be so conjoined, though very probably, if not certainly, it had another origin. We find ourselves here confronted with a question involving a problem similar to that relating to the connection between John, originally a simple fisherman of Galilee, one of the first disciples of Jesus, and John the Divine, the father of the illustrious Johannine school which speaks to us in the Fourth Gospel and in the three epistles bearing his name.

The following seems certain: Paul, of whom so little in detail is known, the artisan-preacher, who travelled so widely for the advancement and diffusion of those principles which, once he had embraced them, he held so dear, was portrayed in a no longer extant work which can most suitably be named after him Acts of Paul, based partly on legend, partly on a trustworthy tradition to which the well-known journey-narrative may be reckoned. There he comes before us, now enveloped in clouds and now standing out in clear light; now a man among men, and now an ideal figure who is admired but not understood. At once the younger contemporary of the first disciples, and yet as it seems already reverentially placed at a distance apart from them; a 'disciple' like them, yet exercising his immediate activity far outside their circle; full of quite other thoughts; in a special sense guided by the Holy Spirit; a 'Christian' who bows the knee before the Son of God and is entrusted with 'the gospel of the grace of God' (Acts 20:24); in the main, perhaps, so far as his wanderings and outward fortunes are concerned, drawn from the life, yet at the same time, even in that case, in such a manner that the reader at every point is conscious of inaccuracy and exaggeration, and finds himself compelled to withhold his assent where he comes across what is manifestly legendary.

So in the story of Paul's conversion, his seeing of Jesus in heaven, his hearing of Jesus' voice, his receiving of a mandate from him (Acts 22:21, 26:16-18); the word to Ananias that he is to be instructed by Jesus himself and filled with the Holy Ghost (9:16-17); the representation of Paul as receiving visions and revelations (22:17-21, 16:9, 18:9, 27:23); the record of how he was wont to be led by the Holy Spirit (13:4, 16:6, 19:21, 20:22, 21:4, 10-12); the description of his controversy with Elymas Barjesus, whom he vanquishes and punishes with blindness (13:6-12); the healing of the lame man at Lystra and the dedication that followed (14:8-18); the vision of the man of Macedonia at Troas (16:9); the casting out of the evil spirit at Philippi (16:16-18); the liberation from prison at the same place (16:25-34); the imparting of the Holy Ghost to disciples of the old school at Ephesus by the laying on of hands (19:1-7); the cures there wrought and castings out of evil spirits (19:11, 17); the vengeance of the evil spirit who recognises indeed the superiority of Paul, but not that of other men (19:16); the giving up and burning of precious books at Ephesus (19:19); perhaps also the affair of Eutyclus at Troas (20:7-12), and the details respecting Paul's sojourn at Melita (28:1-10).¹

We are here already a good distance along the road upon which a younger generation, full of admiration for its great men, yet not too historically accurate, is moving, setting itself to describe the lives of Peter, Paul, Thomas, John, and others, in the so-called apocryphal Acts, or, more particularly (Gnostic), 'circuits' (Ἰεπλοδοί).

¹ For a fuller list see Van Manen, *Paulus*, I 176-192.

Lk. also moves in the same direction, but with this difference, that his Paul (see Van Manen, *Paulus*, I 164-169), under the influence of the current in which his spiritual life is lived, stands nearer again to Peter, yet in such a manner that it is still more impossible to present before one's mind an image of anything recorded of him among the often discrepant and mutually conflicting details, not a few of which are manifestly incorrect (*id.*, *l.c.* 169-176).

The writer of the Acts of Paul never shows any acquaintance with epistles of Paul, however much one might expect the opposite when his way of thinking is taken into account. On the contrary, the 'historical details' in the epistles, or at least a good part of them, appear themselves to be taken from the Acts of Paul, since they are not always in agreement with what Lk. relates in his second book, although they are manifestly speaking of the same things. Lk. must have modified, rearranged, supplemented, perhaps also in some cases more accurately preserved, what he and the writers of the epistles had read in the book consulted by them, a work lost to us, or, if you will, surviving in a kind of second edition as the Acts of the Apostles. In this lost Acts of Paul, Paul had become (in contrast to what, even by the admission of the journey-narrative, he really was) the hero of a reforming movement, the exponent of wholly new principles in the circle of those who wrought for the emancipation of Christianity from the bonds of Judaism and its development into a universal religion.

Where that circle, under the patronage of 'Paul,' must be looked for cannot be said with certainty.

46. Home of Paulinism. Probably it was in Syria, more particularly in Antioch; yet it may have been somewhere in Asia Minor. We may be practically certain, at all events, that it was not in Palestine; it was in an environment where no obstruction was in the first instance encountered from the Jews or, perhaps still worse, from the 'disciples' too closely resembling them; where men as friends of gnosis, of speculation, and of mysticism, probably under the influence of Greek and, more especially, Alexandrian philosophy, had learned to cease to regard themselves as bound by tradition, and felt themselves free to extend their flight in every direction. To avail ourselves of a somewhat later expression: it was among the heretics. The epistles first came to be placed on the list among the gnostics. The oldest witnesses to their existence, as Meyer and other critics with a somewhat wonderful unanimity have been declaring for more than half a century, are Basilides, Valentinus, Heracleon. Marcion is the first in whom, as we learn from Tertullian, traces are to be found of an authoritative group of epistles of Paul. Tertullian still calls him 'haereticorum apostolus' (*adv. Marc.* 35) and (addressing Marcion) 'apostolus vester' (1:15).

Whencesoever coming, however, the Paulinism of the lost Acts of Paul and of our best authority for that way of

47. Paulinism: characteristic of epistles. thinking, our canonical epistles of Paul, is not the 'theology,' the 'system' of the historical Paul, although it ultimately came to be, and in most

quarters still is, identified with it. It is the later development of a school, or, if the expression is preferred, of a circle, of progressive believers who named themselves after Paul and placed themselves as it were under his ægis. The epistles explain this movement from different sides, apart from what some of them, by incorporating and working up older materials, tell us in addition as to its historical development and the varying contents of its doctrines.

i. Romans, with its account of what the gospel, regarded as a religious doctrine, is (1:18-11:36), and of what those who profess it are exhorted to (12:1-13), throws a striking light upon what

Paulinism is, both dogmatically and ethically, for the Christian faith and life.

ii. 1 Cor. shows in a special way how deeply and in what sense Paulinism has at heart the practice of the Christian life, as regards, for example, parties and disputes within the church (110-323), the valid authority in it (4), purity of morals (5 and 61-11), the judging of matters of dispute between Christians (61-11), their mutual relations, such as those of the circumcised and the uncircumcised, of bondmen and freemen (7 18-24); the married and the unmarried life (8-11 1), the veiling of women (11 2-15 16), the love feasts (11 17-34), spiritual gifts (12-14), and the collection for the saints (16 1-4), along with which only one subject of a more doctrinal nature is treated: the resurrection (15).

iii. 2 Cor. gives above all else the impression how the person and work of 'Paul' in the circle addressed, or, rather, throughout the Christian world, had to be defended and glorified (13:7 16 10-18 10); and, in a passage introduced between its two main portions, how the manifestation of mutual love, by the gathering of collections for the saints, must not be neglected (8, f.).

iv. Gal. gives us an earnest argument on behalf of 'Paul' and the view of Christianity set forth by him, particularly his doctrine of justification by faith, not by the works of the law; as also for the necessity for a complete breach with Judaism.

v. In Eph. it is the edification of 'Pauline' Christians that comes most into prominence. So also in Phil., although here we have also a bitter attack on the apostle's enemies, and, in close connection with this, a glorification of his person and work (3 1-4 1). In Col., along with edification and exhortation, the doctrinal significance of Christ is expatiated upon (113-22 2 11-15); also that of 'Paul' (123-25); and an earnest warning is given against doctrinal errors (2 20-23).

vi. In 1 and 2 Thess., respectively, the condition of those who have fallen asleep (1 Thess. 4 13-18) and the exact time of the parousia (5 1-11) on the one hand, and the things which may yet have to precede that event (2 Thess. 2 1-12), on the other, are discussed.

vii. The Pastoral Epistles occupy themselves chiefly with the various affairs of the churches within 'Pauline' circles; Philemon with the relations which ought to subsist between slaves and their masters in the same circles.

Here we have variety enough, and many historical traits which, once arranged in proper order, can supply us with a conception of what 'Paul,' through all the vicissitudes of earnest opposition and equally earnest support among Christians, finally became—first in narrower, anon in wider circles, and at last in the whole catholic world—the apostle (*ὁ Ἀπόστολος*), the equal of Peter, or, strictly speaking, his superior.

At the outset we find 'Paul' standing outside the circle of the Catholic church just coming into being,

48. History of Paulinism.

but held in honour by Marcion and his followers. Already, however, Lk., in virtue of the right he exercises of curtailing, expanding, modifying aught that may not suit his purpose in the material he has derived from other sources, has in Acts given 'Paul' a position of pre-eminence. Older fragments, whether of the nature of 'acts' or of the nature of 'epistles,' that had passed into circulation under Paul's name were, in whole or in part, taken up into writings on a larger scale, and remodelled into what are now our canonical 'Epistles of Paul.' A Justin can still, it would seem, pass him over, although spiritually Justin stands very close to Paul and shows acquaintance with him. Irenæus in his turn has no difficulty in using the Pauline group of Epistles, at least twelve of the thirteen—Philemon is not spoken of, nor is there as yet any word of Hebrews—as canonical, although not from predilection for their contents, but simply because he wishes to vanquish his great enemies, the gnostics, with their own weapons. That in doing so he frequently had failed to understand 'Paul' is clearly manifest (see Werner, *Der Paulinismus des Irenæus*, 1889). Tertullian advances along the path opened by Irenæus. Without really having much heart for the Paul of the Pauline Epistles, he brings out the 'apostle of the heretics' against the heretics, though, as regards 'history,' he holds to the older view that Christianity owed its diffusion among the nations to the activity of the Twelve. In association with these in their solitary greatness no one deserves for a moment to be mentioned, not even the historical Paul, unless, indeed, as their somewhat younger contemporary, 'posterior apostolus,' who might be regarded

as having sat at their feet (*adv. Marc.* 4 2 5 2; see van Manen, *Paulus*, 2262-276). In the so-called Muratorian Canon, among the authoritative writings of the NT, thirteen epistles of Paul are enumerated. Apollonius, about the year 210, brings it against the Montanist Themiso as a particularly serious charge that some forty years previously he had ventured to write an epistle in imitation of the apostle (*μιμούμενος τὸν Ἀπόστολον*; i.e., Paul; Eus. *HE* v. 185). In truth, from that time onwards, in orthodox circles no one doubted any longer the high authority of 'Paul' the assumed writer of the thirteen (fourteen) epistles. It was only with regard to Hebrews that a few continued to hesitate for some time longer.

For our knowledge of Paulinism the thirteen epistles are of inestimable value. They are, when thus regarded, no less important than they were when they were considered—all of them, or some of them—as unimpeachable witnesses for the life and activities, especially the Christian thoughts and feelings, of the historical Paul, the only slightly younger contemporary of Peter and other original disciples of Jesus.

In a complete study of Paulinism there come into

consideration also Heb. 1 Pet. Ja. and other writings which breathe more or less the same spirit, or, as the case may be, take a polemical attitude towards it.

i. Hebrews, as being the expression of an interesting variation from the older Paulinism; a doctrinal treatise, rich in earnest exhortations, given forth as a 'word of exhortation' (*λόγος τῆς παρακλήσεως*, 13 22) in the form of an Epistle of Paul, though not bearing his name.

ii. 1 Pet., as being a remarkable evidence of attachment to 'Paul' among people who know that the group of letters associated with his name is closed, although they desire to bear witness in his spirit; in point of fact, a letter of consolation written for those who stand exposed to persecution and suffering.

iii. James, as an instance of seriously-meant imitation of a Pauline epistle, written by some one who had misunderstood and was seeking to controvert Paul's view of the connection between faith and works (2 14-26).

On the other hand, there is a great deal that must be

regarded as the product of a later time, and, however closely associated with the name of Paul, as lying beyond the scope of the present article.

i. (*a*) *Epistle to the Laodiceans*.—Antiquity knew of such an epistle, alongside of (*b*) the epistle *ad Alexandrinus*, mentioned in the Muratorian Canon (63-65) with the words added 'Pauli nomine fictæ ad hæresem Marcionis,' 'feigned in the name of Paul to the use of the heresy of Marcion.' This epistle to the Laodiceans, mentioned also in Jerome (*Vir. Ill.* 5, and elsewhere) was very probably our Epistle of Paul to the Ephesians, just as that to the Alexandrians was probably our Epistle to the Hebrews, or, it may be, a Marcionite redaction of it.

(*c*) Another Epistle of Paul to the Laodiceans occurs in many Latin MSS of the NT, and in old printed editions of the NT; in Luther's Bible, Worms, 1529; in the Dutch of 1560 by L.D.K.—probably Leendert der Kinderen; in 1600, after a copy by Nicolaus Biestkens van Diest; in 1614, Dordrecht, Isaack Jansz. Canin; and in English, cp Harnack, *ACL* 1 (1893) 33-37. See, further, Anger, *Ueber den Laodicenerbrief* (1843), and Lightf. *Colossians*, 274, who also gives a convenient summary of the views which have 'been held respecting this letter' (Hatch). The writing is composed of NT words of 'Paul,' probably to meet the demand for an epistle to the Laodiceans raised by Col. 4 16, and actually dating from the fifth, perhaps even from the fourth century.

ii. An *Epistle from the Corinthians to Paul* and the apostle's answer (= 3 Cor.) which is brought into connection with the epistle named in 1 Cor. 5 9, were included in the Syrian Bible in the days of Aphraates and Ephraim, and centuries afterwards were still found in that of the Armenians.

They occur also in a MS of the Latin Bible dating from the fifteenth century and have been repeatedly printed, the best edition being that of Aucher (*Armenian and English Grammar*, 1819 p. 183). 'An English translation will be found in Stanley, *Epistles of St. Paul to the Corinthians*, 593' (Hatch). There are German and French translations in Rinck (1823) and Berger

(1891). They appear to belong to the third century and are conjectured to have been written against the Bardesaites, originally in Greek or Syriac, perhaps as portions of the *Acta Pauli*. Cp Harnack, *ACL* 137-39; Krüger, *ACL*, 1895, p. 11; *Nachträge*, 1897, p. 10; also Sanday, above, *CORINTHIANS*, §§ 19, 20 b.

iii. Fourteen epistles of Paul and Seneca are given in a number of later MSS; first named and cited by Jerome, 1712, although hardly by that time read by very many.

The correspondence is reproduced in most editions of Seneca —c.g., ed. Haase, 1878, vol. iii. 476-481—and discussed by (among others) Funk, 'Der Briefwechsel des Paulus mit Seneca', *Theol. Quartalschr.*, 1867, p. 602; Lightf. *Philippians*(³), 327; Kreyher, *Seneca u. seine Beziehungen zum Christenthum*, 1887; Harnack, *ACL* 1762-765. Their 'genuineness' is not for a moment to be thought of.

iv. Other special writings of a later date relating to Paul are found (apart from the Ebionite Acts of the Apostles already alluded to, mentioned by Epiphanius, *Haer.* 30 16, and the *Acta Pauli* = Παύλου πράξεις [also lost] mentioned by Origen, perhaps identical with the work called *Pauli Prædicatio* in Pseudo-Cyprian) in the *Acts of Peter and Paul*; the *Acts of Paul and Thecla*; the *Apocalypse of Paul*; Ἀναβατικὸν Παύλου mentioned in Epiphanius (see 2 Cor. 12 4; cp *PRE*(³) 1670).

The Acts of Peter and Paul, as also those of Paul and Thecla, are printed in Tischendorf (*Acta Apostolorum Apocrypha* denuo ediderunt R. A. Lipsius et M. Bonnet, 1, 1891; cp Ἀποκρυφὰ, § 25, 2); the Revelation of Paul in Tischendorf (*Apocalypses Apocrypha*). [References to the literature of the Apocalypse of Paul in Lat. Syr. Gk. and Ar. will be found in *Catalogue of Syr. MSS Unvers. of Camb.* (1901), p. 1167 f. ET of all three by A. Walker, *The Apocryphal Gospels, Acts, and Revelations*, (1870).]

The best and most exhaustive discussion of the contents of these writings, alike with regard to Paul's life and activity, and with regard to his relation to Peter and other disciples of Jesus, though too exclusively under the influence of the Tübingen construction of history (see van Manen, *Th. T.*, 1888, pp. 94-101), is given by R. A. Lipsius in his standard work—*Die apokryphen Apostelgeschichten u. Apostellegenden*, 1883-1890 (reviewed in *Th. T.*, 1883, pp. 377-393; 1884, pp. 598-611; 1888, pp. 93-108; 1891, pp. 450-451), with which cp also the *Prolegomena* to the second edition of the *Acta* 1, 1891, and *PRE*(³) 1664-666.

The literature which bears upon St. Paul is so extensive that a complete account of it would be as much beyond the compass of this article as it would be bewildering to its readers.' So, rightly, Hatch at the close of his article 'Paul' in *Ency. Brit.*(⁹), 1885.

i. For the life of Paul Hatch cited A. Neander, *Pflanzung*, etc., vol. i.(4), 1847, ET in Bohn's Standard Library and New York, 1880; F. C. Baur, *Paulus der Apostel Jesu Christi*, 1845, 1866-1867(2), ET 1875-1876; E. Renan, *Les Apôtres*, 1866, and *Saint Paul*, 1869; Krenkel, *Paulus der Apostel der Heiden*, 1869; A. Hausrath, *Der Apostel Paulus*, 1872(2), and art. 'Paulus' in Schenkel's *BL*; J. W. Straatman, *Paulus de Apostel van Jezus Christus* (1874); Beyschlag in Riehm's *HWB*; W. Schmidt in *PRE*(²); Conybeare and Howson, *Life and Epp. of St. Paul*, 1851 (and often); F. W. Farrar, *Life and Work of St. Paul*; Lewin, *Life and Epp. of St. Paul*; [W. M. Ramsay, *St. Paul the Traveller and Roman Citizen*, 1896].

ii. With regard to the theology of Paul, in addition to several of the works already named: Usteri, *Die Entw. des paulin. Lehrbegriffs*, 1824, 1851(6); Dahne's book with the same title, 1835; A. Ritschl, *Die Entsch. der altkathol. Kirche*(²), 1857; E. Reuss, *Hist. de la théol. chrétienne au siècle apostolique*(³), 1864; the essays appended to Jowett's *Epistles of St. Paul to the Thess., Gal., and Rom.*(²), 1859; C. Holsten, *Zum Evang. des Paulus u. Petrus*, 1868, and *Das Evang. des Paulus*, 1, 1880 [2, 1898]; O. Pfeiderer, *Der Paulinismus*, 1873, ET 1877; Sabatier, *L'apôtre Paul*(²), 1881; Menegoz, *Le Pêché et la Rédemption d'après S. Paul*, 1882; Ernesti, *Die Ethik des Apostels Paulus*, 1882(3).

To these may be added C. C. Everett, *The Gospel of Paul*, 1893, and a number of other studies in books and periodicals; general works on Old Christianity, such as [W. R. Cassels] *Supernatural Religion*(³), 3 vols. 1875-1877; R. J. Knowling, *The Witness of the Epistles*, 1892; C. Weissäcker, *Das Apostolische Zeitalter*(²), 1892, ET 1894-1895; J. B. Lightfoot, *Dissertations on the Apostolic Age*, 1892; F. J. A. Hort, *Judaistic Christianity*, 1898, and *The Christian Ecclesia*, 1898; O. Cone, *Paul: the Man, the Missionary, and the Teacher*, 1898; the various works on New Testament Introduction, such as those of Credner (1836); Reuss, 1874(4); ET, 1884; Bleek-Mangold, 1886(4); Hilgenfeld, 1875; B. Weiss, 1897(3); ET, 1880, 1889(2); G. Salmon, 1896(7); S. Davidson, 1894(3); H. J. Holtzmann, 1892(3); W. Brückner, 1890; A. Jülicher, 1901(2); Th. Zahn,

1900(2); the commentaries on Acts and the Pauline Epistles, such as those in the later editions of Meyer, in the *Hand-Commentar zum NT*(²) 1899 ff.; 'Acts' in (³) 1901, or in the International Critical Commentary (in which Romans [1893], Ephesians and Colossians [1897], Philippians and Philemon [1897], have already appeared); C. J. Ellicott, *Crit. and Exeg. Comm. on St. Paul's Epistles* (except Rom. and 2 Cor.), 1889-1890, etc., and cp the bibliographies in Acts and the separate articles on the several epistles in this work. For advanced criticism see further the discussions already referred to (§ 34) by Bruno Bauer, Pierson, Naber, Loman, Steck, Völter, and van Manen.

The student who wishes further information upon the Pauline literature of recent years is recommended to consult the sections 'Apostelgeschichte und apostolisches Zeitalter' and 'Paulus' under the heading 'Literature of the New Testament' in the *Theologisches Jahrbuch* (vol. xix., edited by Holtzmann and Krüger, was published in 1900), which regularly, for the last nineteen years, has given a survey of the principal publications—mainly German, but not to the exclusion of foreign works—of the preceding year. A selection of the most recent literature relating to Paul, which is to be from time to time revised and supplemented, will be found in a list of the 'best books for general New Testament study at the present time' in *The Biblical World*, July 1900, pp. 53-80. Cp 'Theological and Semitic Literature' for the year 1900, a Supplement to the *American Journal of Theology*, April 1901, especially the NT and The First Three Centuries, pp. 35-49.

E. H., §§ 4-32; W. C. v. M., §§ 1-3, 33-51.

PAULUS, LUCIUS SERGIUS, 'deputy' (AV) or 'proconsul' (RV; ἈΝΘΥΠΑΤΟΥC) of Cyprus at the time of Paul's visit, about 47 A.D. (Acts 13 7f). See *CYPRUS*, § 4.

PAVEMENT. The word is used occasionally in OT to translate פֶּסֶחַ, *rispah* (פֶּסֶחַ, Ass. *rasāru*, 'to join together'; cp Ar. *rasafa*, 'to put together stones' in building), 2 Ch. 7 3 Ezek. 40 17 f. 42 3 Esth. 1 6.

In 2 K. 16 17 occurs the compound phrase כֶּרֶפֶס אֲבָנִים (cp Syr. *rasiphā d' kēphē* in Jn. 19 13 for λιθόστρωτον); in Jer. 43 9 RVmg. gives 'pavement' for כֶּרֶפֶס, but RV has 'brick-work' and AV translates the word here as elsewhere 'brick-kiln'; see *BRICK*.

Ⓢ has in Ezek. 40 17 f. 42 3 τὸ περίστρωτον, in 2 K. 16 17 βάσιν λιθίνην, and in 2 Ch. 7 3 Esth. 1 6 and Cant. 3 10 (in the last passage for פֶּסֶחַ) λιθόστρωτον. For Esth. 1 6, see *MARBLE*, and for Cant. 3 10, *LITTEr*.

The word λιθόστρωτον occurs once in NT, in a passage peculiar to the fourth gospel (Jn. 19 13). The writer tells us that after Pilate had questioned Jesus in the PRÆTORIUM [q.v.] (Jn. 18 28), he led him outside and sat (or set him ?; see Blass, *Gramm. of NT*, 54, cp Justin, *Apol.* 1 35) upon the *bēma* in a place called 'lithostroton, but in Hebrew GABBATHA' (εἰς τόπον λεγόμενον Λιθόστρωτον Ἑβραϊστὶ δὲ Γαββαθα).

Tatian (*Diatess.* § 126) uses the same words; OS 189 87 Γαββαθα λιθόστρωτον, 202 6 Λιθόστρωτον; Vg. *Lithostrotos*, *Gabbatha*; Pesh. *rasiphā d' kēphē*, *gēphiphā*, 'pavement of stones, etc.'; Delitzsch (*Heb. New Test.*(¹)) renders by פֶּסֶחַ.

Here λιθόστρωτον is generally taken to mean a 'pavement' on which the *bēma* was placed to give it a suitable elevation. Borrowed from the Greeks, the word was used by Latin authors to denote a pavement of natural stones or of different coloured marbles¹ (see Rich, *Dict. of Gk. and Latin Antiqq.*, s.v., 'Lithostroton'). Such pavements were first introduced into Rome, according to Pliny (*HN* 36 64), in the time of Sulla; in Pliny's own day there were fragments of a pavement dating from Sulla's time still at Præneste. Glass mosaics came into use later. Julius Cæsar is even said to have carried about with him on his military expeditions 'tessellata et scitilia pavimenta' to be laid down, wherever he camped, in the prætorium (Suet. *Vit. Div. Jul.* 46); and we are told by Josephus (*Ant.* xviii. 4 6) that Philip the tetrarch's tribunal 'on which he sat in judgment, followed him in his progress.' Now it is thought by some scholars that Pilate, like Cæsar, had a portable pavement in the place (τόπος λιθόστρωτος) where his tribunal was set up. It is

¹ Cp Farrar, *Life of Christ*, 'the elevated pavement of many-coloured marble—in this case a picturesque but doubtful description.

difficult, however, to understand how a mere portable pavement could have given a name to a locality. Other commentators think that the forecourt of the temple (*BJ* vi. 18 and 32), which is known to have been paved, is intended.¹ Pilate, however, can hardly have held his inquiry on a spot consecrated by the Jews. Nor is there much to be said in favour of the view that the *לשכת הנויה*, the meeting-place of the great Sanhedrin, which was half within, half without, the temple forecourt (see Schür. ⁽²⁾ 2163, ⁽³⁾ 211) is meant (Lightfoot, Selden). Again, the view that the pavement intended was inlaid on a terrace running along one side of the pratorium does not seem to do justice to the Greek expressions.

The author speaks of a locality. It may be presumed, therefore, that he was thinking of some public place 'paved-with-stones' (cp *BJ* ii. 93, where we are told that on the occasion of the Jewish uprising when Pilate introduced the so-called 'ensigns' into Jerusalem, 'he sat upon his tribunal in the open market-place') where it was customary to place the *bema*.²

We now have to consider the relation of this word to Gabbatha. Two views of this relationship have been held.

3. Relation to Gabbatha. 1. The words have been supposed to be practically synonymous. But the word 'Gabbatha' does not seem to mean 'pavement' or the like.

An Aramaic form (גבחה) of Heb. גב, 'back,' 'elevation,' is unknown. Nor is it likely that גבחה is for גבחה with some such meaning as 'open space' (cp Heb. גבחה, and see Dalman, *Worte Jesu*, 6). To suppose, again, that Gabbatha, if it can bear this meaning, means 'elevated place' = 'elevated pavement' is equally unsatisfactory. If the word means 'elevated place' the correct form would be גבחה (st. emph. of a fem. גבחה from גבחה); so Zahn, Winer. Nestle however, points out (Hastings, *DB*, under 'Gabbatha')³ that both origin and meaning of the word are doubtful. Winer gives as an alternative גבחה = גבחה; but this could only mean 'hill' or the like.

2. The terms have been thought to be different names of the same spot. On this view 'elevated place' might, some commentators think, mean 'terrace,' the pavement (*λιθόστρωτον*) being set in the terrace. But we have already found 'terrace' unsuitable.

Brandt translates 'terrace,' but explains the use of גבחה differently. He thinks that the evangelist perhaps misunderstood some notice about the place where the sittings of the college of elders were held (he quotes *Sanh.* 18*A*), and that he has made use of it in his narrative in a false connection.

There is perhaps more to be said in favour of the view of Meyer and Grimm—viz., that the different names were chosen from different characteristics of the place. Grimm thinks the Aramaic name 'was given to the spot from its *shape*, the Greek name from the nature of its pavement.' But here again, even if the Aramaic name means 'elevation,' it is too indefinite, one would think, to be a likely one.

Nestle is of opinion that 'the exact form and meaning' of the word 'must be left in suspense.'

It has been suggested as the most probable solution of the difficulty (Riehm, *HVB*) that the author thought of the proceedings as having taken place in the palace of Herod. In this case we are to understand by *λιθόστρωτον* a paved, open space, either immediately in front of the palace or at a short distance from it. But Lk. 23:6-16, if historical (see, however, *GOSPELS*, § 108), hardly seems to favour this. Josephus, indeed, tells us (*BJ* ii. 143) that Florus 'took up his headquarters at the palace, and on the next day had his tribunal set before it.' But we have no good reasons for supposing that

¹ So apparently Westcott (*Comm.* 272), who (comparing Talm. *Jerus. Sanh. f.* 18*A*, quoted by Wünsche) thinks Gabbatha represents *Gab Bailtha*, גב בייטה, 'the ridge (back) of the House,' i.e., of the temple. Westcott ignores the difficulties of the word, both here and in his 'Introduction' (p. xii).

² Cp Renan, *Vie de Jésus*, 412. 'Pilate, averti de leur préférence monta au *bima* ou tribunal situé en plein air à l'endroit qu'on nommait *Gabbatha* ou, en grec, *Lithostrotos*, à cause du carrelage qui revêtait le sol.'

³ The article treats fully the philological difficulties of the word.

Pilate was so privileged; and had the author been thinking of Herod's palace he would surely have been more explicit.

No such place as *λιθόστρωτον*-Gabbatha is known to have existed. The NT narrative in which the words

4. Conclusion. occur is hardly to be relied upon as a historical source;¹ it consists, as Keim has pointed out, of a series of dialogues. It seems not unlikely, therefore, that the place *Lithostrotos*-Gabbatha existed, as a definite locality, only in the mind of the author. The writer realised that he must represent the sentence as given, after the Roman custom, in a public place. He knew that such open spaces were often paved with stones; whence the name *λιθόστρωτον*. He, or some editor, added as a Hebrew name Gabbatha. What suggested this name it is difficult, if not impossible, to determine. It may have been a purely artificial formation, the writer himself attaching no meaning to it.² Or possibly the *bema* itself was sometimes alluded to as *הגבהה* (Aramaised גבחה), 'the [artificial] hump' (fem. from גב),³ and this suggested the name 'Gabbatha.'

M. A. C.

PAVILION. 1. פָּבִיּוֹן, *sukkah*, is rendered 'pavilion' in 1 K. 20:12-16 (cp *SUCCOTH*, 1), Ps. 18:11 [12] = 2 S. 22:12 Ps. 27:5 31:20 (also Job 36:29, which alludes to Ps. 18:11 and Is. 46, RV). AV, in fact, takes פָּבִיּוֹן as a synonym of אֹהֶל, and like Milton uses 'pavilion' as well as 'tabernacle' as a choicer expression for 'tent.' Elsewhere rendered 'booth' (Jonah 4:5 and often), 'covert' (Job 38:40), 'hut' (1 K. 20:12 16 RV^{mg}: a misread passage; see *SUCCOTH*, 1), 'tabernacle' or 'tent.' See *TABERNAACLE, TENT*.

2. קֶבֶה, *kubbāh*, Nu. 25:8† RV. RV^{mg} 'alcove' (Sp. *alcova* = Ar. *al-kubbah*, 'vaulted recess'). The antiquity of the reading is vouched for by G (if for εἰς τὴν κάμνον we may read εἰς τὴν καμάραν [cod. 15 has σκαφήν]; so Rödiger). But what can an 'arched pavilion' do in this narrative? Nothing indicates that a sacred tent of Baal-Peor or anything like it is meant.⁴ *Kubbāh* must be a corruption due to the neighbouring word קֶבֶה. The true reading is clearly הַקֶּה, which is practically 'nuptial chamber.' See *TENT*.

3. שֹׁפְרִיר, *shaphrir* (from שֹׁפֵר to glitter), Jer. 43:10† EV. The word probably means the glittering hangings of the royal canopy (G. Hoffmann, *ZATW* 268), and possibly occurs again in Mic. 1:11 (see *SHAPHIR*). See *THRONE*.

T. K. L.

PEACE OFFERING. See *SACRIFICE*.

PEACOCKS (תֹּרְנֵיפִי, תֹּרְנֵיפִי; τῶνες; *pau*).

1. Peacocks are mentioned, if an old opinion is correct, with 'apes' or 'monkeys' among the rarities brought to Solomon by the 'navy of Tarshish' (1 K. 10:22; cp 2:11; om. BL; and 2 Ch. 9:21; om. BA, *τεχειμ* [L]). The rendering 'peacocks' is favoured by most moderns,

1 Brandt (*Evang. Gesch.* 133) says it 'presupposes a regular government-building, with a raised terrace, where the procurator had a *sella curulis* set up and performed the duties of his judicial office—a building, which, so far as we know (and the elaborate histories of Flavius Josephus would hardly fail us here), did not exist.' But if we are unable to accept his explanation of תֹּרְנֵיפִי (= 'terrace'), Brandt's words lose some of their force. On the whole question of the value of the fourth gospel as a historical source, see besides JOHN (SON OF ZEBEDEF), § 37, Oscar Holtzmann's recently published *Leben Jesu* (1901), 31 ff., and J. Réville, *Le quatrième Évangile* (1901; for Jn. 19, especially pp. 265 ff.).

2 The writer would naturally wish, with no idea of deceiving his readers, to give a certain definiteness to the narrative, especially as he was making its general form so artificial. On the ancient idea of history cp Bolingbroke, *Letters on the Study and Use of History*, 1:4; Tylor, *Anthropology*, chap. 15.

3 The forms תֹּרְנֵיפִי, Ezek. 1:18, and תֹּרְנֵיפִי perhaps presuppose a feminine תֹּרְנֵיפִי.

4 Aq. *τέγος*; Sym. *πορνεῖον* (*πορνέιον*, etc.); Vg. *lupanar*; cp AV^{mg}'s view of תֹּרְנֵיפִי in Ezek. 16:24 etc.; see *HIGH PLACE*, § 6, n. 3.

following Tg., Pesh., Vg., and the Jewish expositors. The philological basis of the theory, however, is very weak.

It is supposed that תְּכֵי (tukki?) is derived from the Tamil *tokai*, which in the old classical tongue means the peacock, though now it generally signifies the peacock's tail (so, e.g., Max Müller, *Sc. of Lang.*, 209). Of course, if Ophir is somewhere on the Indian coast, as Lassen supposed, a Tamil origin gains in plausibility; but OPHIR [q.v.] is at any rate not in India.

It should also be noticed that ט (except טו, in 1 K.) knows nothing of 'apes and peacocks,' and that שְׁתַּבִּיִּים, which precedes the תְּכֵי, is certainly corrupt (cp EBONY, § 2 (b), IVORY, n. 3). In 1 K. 10:11 we read of 'precious stones' as coming from Ophir. It is therefore neither rare animals nor vessels full of aromatic oil, etc. (Halévy; see APE), that we should expect to find mentioned in v. 22, but some precious stone. If Klostermann's emendation of the corrupt שְׁתַּבִּיִּים be accepted, we shall do well to look out for the name of some precious stone which might be corrupted both into תְּכֵי and into תְּבֵי (for these words probably represent the same original). Probably (see OPHIR) we should read תְּבֵי—i.e., 'and the *hipindu* stone' (written twice over in error). Cp HAVILAH.

On the peacock of Ceylon (*Pavo cristatus*), see Tennent, *Ceylon*, 1165. In the Talmud this bird is called פֶּטִיט; cp τῶς, Persian *tauws*. The Greeks called it 'Persian bird' (Aristoph. *Aves*, 484).

2. 'Peacock' (רִנְיָיִם) in Job 39:13, AV, should rather be OSTRICH [q.v.] T. K. C.

PEARL. Pearls (μαργαρίται) are referred to in the NT several times (Mt. 7:6 13:45f. 1 Tim. 2:9 Rev. 21:21), and in a manner which shows the great value then as now attached to them.

That they were well known in OT times also may be taken for granted, though the word μαργαρίται does not occur in G. In AV 'pearl' renders *gābiš* in Job 28:18; but see CRYSTAL. In RVMS of Job 28:18 it is suggested as a possible rendering for *pēnīnīm*; see CORAL. 1 Pearl or mother-of-pearl is at any rate probably the correct interpretation of the נֶחֶם of Esth. 1:6; cp Ar. *durrūn*, and see MARBLE.

Pearls are formed from the inner nacreous layer of the shell of a species of bivalved mollusc, *Avicula margaritifera*, which, although allied to the Ostreidae, is not a true oyster. They are not produced in perfectly healthy animals, but are, as a rule, met with where overcrowding and the presence of parasitic worms, etc., have induced abnormalities. The inner layer of the shell of the same mollusc is known commercially as mother-of-pearl; this is still an article of commerce in Palestine, where it is frequently carved into religious ornaments. The shells are usually obtained by divers, and to this day the pearl-fisheries of the Red Sea and the Gulf of Persia rank amongst the most important. Pearls of an inferior colour and size are produced by several other species of mollusc. A. E. S.

PECULIAR TREASURE, PECULIAR PEOPLE. The former is the (Latinising) rendering (in EV of OT) of two Hebrew phrases; the latter, in AV of NT, of two Septuagint Greek phrases. It was only to be expected that expressions of such an origin would obtain a deeper significance in NT. This is not so marked, perhaps, in the case of the phrase in 1 Pet. 2:9, where λαός εἰς περιποίησιν (AV 'peculiar people,' RV 'people for God's own possession') mainly expresses the fact that the Christian body, like Israel of old, is God's purchased possession—a privilege, however, which involves moral duties—but certainly in the case of that in Tit. 2:14, where λαός περιούσιος (EV as before) is primarily, not 'a people acquired as a possession' (ὁ ἕκτιστος, Suidas), but 'a people fit to be God's own.' This is in fact the explanation of Vg. ('acceptabilem'; Wycliffe, 'acceptable'), which, although Bishop Ellicott

1 The Targ. reads טְבֵי—i.e., really 'precious stones.' In Syr., too, the word has an extended meaning and includes chrysolite (cp Payne Smith, *Thes.*, s.v.).

thinks it too remote from the primary meaning, seems fairly to express the writer's meaning. Render, therefore, in Tit. 2:14, 'and (that he might) purify for himself a people fit to be his own, zealous of good works,' and in 1 Pet. 2:9, 'a nation devoted to God, a people owned by him' (cp CLEAN AND UNCLEAN, § 1 [6]). This last rendering (a people owned by God) is also the most suitable in Dt. 7:6 14:2 26:18. In Ex. 19:5 Mal. 3:17 Ps. 135:4 render 'a prized possession'; in Eccles. 2:8 'treasure' will suffice. So also in 1 Ch. 29:3. RV of OT needlessly retains, or even inserts, 'peculiar everywhere except in 1 Ch. 29:3; in Dt. 7:6 'special' takes the place of 'peculiar,' and in Mal. 3:17, ng., 'jewels' becomes 'special treasure' (RV 'a peculiar treasure').

The primary meaning of סִנְיָה (8 times in OT) is no doubt 'possession' (*peculium*; cp ASS. *sugullāte*, 'herds,' Del. *Ass. III B* 499). In 1 Ch. 2:6 (ὁ περιποίημα) and Eccl. 2:6 (περιουσιασμούς) it denotes the private property ('privy purse') of a king. Elsewhere it is applied metaphorically to Israel (סִנְיָה, Ex. 19:5 Mal. 3:17 [AV, 'jewels'], Ps. 135:4; סִנְיָה, Dt. 7:6 14:2 26:18; λαός περιούσιος in Ex. and Dt. [also Ex. 23:22], cp Tit. 2:14; εἰς περιποίησιν in Mal.; εἰς περιουσιασμόν in Ps.; Vg. *peculium, peculiaris*, except in Ps. [*possessio*], and Eccl. [*substantias*]).

PEDAHEL (פְּדָהֵל [see Ginsb.], § 30; as if 'El has redeemed,' cp PEDIAIAH; ΦΑΔΔΑΗΛ [BAFL]). α Naphtalite prince; Nu. 34:28f.

Lagarde (*Sym.* 1877, p. 107) supposes a Pedahel to have written Ps. 25, which closes with a supernumerary *Pe*-distich (פְּדָה אֱלֹהִים). The suggestion, however, might produce an embarrassing crop of similar theories elsewhere (B. Jacob, *ZATW* 16 [1896], p. 153, n.). On the origin of the name see PEDAHZUR.

PEDAHZUR (פְּדָהצֹר, § 43; as if 'the Rock [God] has redeemed,' but see below; ΦΑΔΔΑΚΟΥΡ [BAFL]), a Manassite prince; Nu. 1:20 (ΦΑΔΔΑΚΟΥΡ [B]). 2:20 7:54 59 10:23.† all P.

The other names containing the divine title צֹר (ZUR) having aroused suspicion, it is not unlikely that Pedahzur may also be a corrupt form. The meaning given above is indeed plausible; but it was natural that P., like the Chronicler, should endeavour to suggest a possible meaning for distorted names. If צֹרִי (ZURISHADDAD) and צֹרִיָּה have arisen out of Ashūri (=Geshūri), Pedahzur probably sprang from some S. Palestinian or N. Arabian ethnic. Pedahzur's son is called Gamaliel, which is probably (like Gemali and Ammiel in Nu. 13:12) one of the many distortions of Jerahmeel. Observe, too, that in Nu. 34:23 'Hanniel b. Ephod' corresponds to 'Gamaliel b. Pedahzur' in Nu. 1:20. 'Ephod' (אֶפֶד) is probably a corruption of 'Rephael' (רִפְאֵל), 'Hanniel' (חַנְיָאֵל) of 'Hamael' (חַמָּאֵל)—i.e., Jerahmeel. Very possibly then Pedahzur, Pedahel, and Padi came out of Sarephathi (ז seems to be an affirmative). The Jerahmeelites, also called Zarephathites, were most probably one of the most widely spread of the tribes of Canaan. See JERAHMEEL; cp also PASHUR. T. K. C.

PEDIAIAH (פְּדִיָּה and פְּדִיָּה no. 3, perhaps [so Che.] adapted from an ethnic name Padi [so a king of Ekron, temp. Hezekiah, is called], but as it stands='Yahwé has redeemed,' see NAMES, §§ 30, 53, and PEDAHEL).

1. 'of RUMAH,' father of Jehoiakim's mother Zebudah (2 K. 23:36). In 2 Ch. 36:5 (טָרָא) the name is given as Neriah (נְרִיָּה and נ confounded), whilst טָרָא both in K. and Ch. introduces from 2 K. 24:18 Amital (Hamutal) the daughter of Jeremiah (ερεμιου) of Libnah, and טָרָא substitutes JIDLAPH, the daughter of εδελ [B], or εεδδילא [A], which perhaps comes from Phadael (=Phadaia), a variant to Jidlaph (Che.).

2. b. JECONIAH [q.v.] (1 Ch. 3:18 7, φα[λ]δαίας [BA], φαδαία [L]; in v. 19 טָרָא substitutes σαλαβίη).

3. Father of JOEL [q.v.], a Manassite (1 Ch. 27:20 יוֹהָן, φαλαβία [B], φαλδו [A], φαδαιου [L]).

4. b. PAROSH [q.v.] (Neh. 3:25, φαδאי[א] [BNAL]).

5. A priest (Neh. 8:4, φαδαίας), in 1 Esd. 9:44 PHALDAIUS, RV PHALDEUS (φαλαιδαιος [BA], φαδαίας [L]). Was he also a Psalmist? Lagarde thought so (see PEDAHEL), deducing this from the supernumerary distich beginning with the letter *pe* in Ps. 34.

6. A Benjamite (Neh. 11:7, φαλαία [BN], -δ. [AL]).

7. A Levite overseer (Neh. 13:13, φαδαία [BNAL]).

PEDESTAL (פֶּדֶסְטַל, 1 K. 7:31 RV, AV BASE. See LAVER.

1 Cp Judith 15:14 [11], where Vg. has 'universa quæ Holofernis peculiaria probata sunt.'

PEDIAS (πεδίας [B], παιδείας [A]), 1 Esd. 9:34 RV = Ezra 10:35, ΒΕΔΕΙΑΗ.

PEKAH (פקח, § 50, see PEKAHIAH; פֶּכָע [BNAQL], פֶּכָעס [Γ]). Son of Remaliah, king of Israel (735-730? See CHRONOLOGY, §§ 32, 34), perhaps a Jerahmeelite or Gileadite (see REMALIAH, ARGOB, 2), 2 K. 15:25 ff., 16:15 Is. 7:1 2 Ch. 28:67. We hear more than usual of the successful usurper (originally a *šāliš* or 'high officer' under PEKAHIAH) because he came into collision with the kingdom of Judah (see AHAZ, 1). A few years afterwards another revolution hurled him from the throne. His death is referred to by Tiglath-pileser, who, according to Schrader (COT 1:247; KB 2:32), claims to have killed Pekah himself. Winckler, however, reads differently, and makes Tiglath-pileser ascribe Pekah's death to his subjects, who probably felt the necessity of having a ruler who was acceptable to the Assyrian king (cp HOSEA). See ISRAEL, § 32, and on the war with the kingdom of Judah, in which Pekah is said to have taken part, see REZIN.

T. K. C.

PEKAHIAH (פקחיה, 'Yahwè opens [or enlightens, the mind], § 26, or else a clan-name = Pīkhi; פֶּכָעסִיָּא [B], פֶּכָעסִיָּא [A], פֶּכָעסִיָּא [L]), son and successor of Menahem, was murdered by Pekah (cp ARGOB, 2) after a reign of two years (737-736 B.C.); but 6^l gives him ten years (2 K. 15:22 ff.).

It may be questioned whether this king does not owe his literary existence to a misunderstanding. The author of Kings made Jotham and Ahaz of Judah contemporaneous with Zechariah, Shallum, Menahem, Pekahiah, and Pekah, kings of Israel. We infer this from the circumstance that 2 K. 15:8-31, which relates to these five kings, is interposed between 2 K. 15:7 (accession of Jotham) and 16:1 (accession of Ahaz). This allows very short reigns for these five kings, and although the revolutionary tendencies of N. Israel, produced by the swift alternations of political parties, may partly account for such short reigns, it will be some slight gain to remove Pekahiah from the list, as due to the error of a Jewish chronologist, who found the bold usurper Pekah sometimes referred to by the fuller name Pekahiah.

T. K. C.

PEKOD (פֶּקֶד; in Jer. εκδικησον [BNAQ], visita [Vg.]; פֶּקֶדוֹן [L]); in Ezek. פֶּקֶדוֹן [B], και φοϋδ [A], פֶּקֶדוֹן [Q]; *nobiles* [?], פֶּקֶד), a Babylonian district mentioned in Jer. 50:21 Ezek. 23:23, † Granting that Merathaim should be Marrathim, S. Babylonia, we may naturally hold that Pekod, or rather Pekūd, is not a symbolic name meaning 'punishment,' but a geographical name = Pukudu. In the Taylor cylinder inscription of Sennacherib, col. 1, line 45 (KB 2:34 f.), a people called the Pukudu are mentioned with the Hamranu, the Hagaranu, and the Nabatu; and one of the Egibi tablets refers to a city called Pikudu (Pinches, RP xi. 92) which is evidently in Babylonia. At the same time, it is not certain that the prophetic writers meant this place. Both Jer. 50 and (partly) Ezek. 23 have probably been edited so as to refer to peoples not originally meant (see PROPHECY, § 45). For פֶּקֶד the prophets may have written [ת]רְבוֹת, Rehoboth. See MERATHAIM; also Crit. Bib. T. K. C.

PELAIAH. 1. (פלתי, as if 'Yahwè has done a wonder' [cp 2 P^h 1:25]), but originally an ethnic name to be explained like PALLU [q.v.]; the ה is an accretion [Che.], a descendant of Zerubbabel; 1 Ch. 3:24 (פֶּלַיָּא [B], פֶּלַיָּא [A], פֶּלַיָּא [L]).

2. (פלתי, פֶּלַיָּא [L]), a Levite, expounder of the law (see EZRA ii., § 13 [L]; cp i., § 8, ii., § 16 [L], § 15 [L]; Neh. 8:7 [BNA om., פֶּלַיָּא [L]] = 1 Esd. 9:48, ΒΙΑΤΑΣ, RV PHALIAS [פֶּלַיָּא [B], פֶּלַיָּא [A], פֶּלַיָּא [L]), and signatory to the covenant (see EZRA i., § 7; Neh. 10:11 [I] [BN* om., פֶּלַיָּא [Nc. mg. inf. A], פֶּלַיָּא [L]).

PELALIAH (פלתי, as if 'Yahwè judges,' § 36; but this name, like Jeroboam, presumably comes from 'Jerahmeel,' cp PELALIAH), a name in the genealogy of

* For the origin of this term see EUNUCH.

Adaiah; Neh. 11:12 (BN* om., פֶּלַלְיָא [Nc. mg. inf. A], פֶּלַלְיָא [L]). T. K. C.

PELATIAH (פלתי, as if 'Yahwè delivers,' §§ 30, 53, but really an ethnic name = PALTU [q.v.], the ה being probably an accretion [Che.]).

1. A descendant of Zerubbabel; 1 Ch. 3:21 (פֶּלַתִּיָּא [B], פֶּלַתִּיָּא [A], פֶּלַתִּיָּא [L]).

2. A Simeonite captain, temp. Hezekiah; 1 Ch. 4:42 (פֶּלַתִּיָּא [B], פֶּלַתִּיָּא [A], פֶּלַתִּיָּא [L]).

3. Signatory to the covenant (see EZRA i., § 7; Neh. 10:22 [23], פֶּלַתִּיָּא [BA], פֶּלַתִּיָּא [N], פֶּלַתִּיָּא [N], פֶּלַתִּיָּא [L]).

4. b. Benaiah, a 'prince of the people'; Ezek. 11:13 (פֶּלַתִּיָּא [BAQ], פֶּלַתִּיָּא [B* in v. 1]).

Pelatih and Jaazaniah are mentioned as belonging to a party of twenty-five men whom Ezekiel saw (in an ecstasy) at the door of the gateway of the temple. 'And while I was prophesying,' says Ezekiel, 'Pelatih ben Benaiah died. And I fell on my face, and cried with a loud voice, Alas, O Lord, Yahwè, wilt thou make an end of the remnant of Israel?' Possibly Ezekiel regarded this as prophetic of the lot in store for those who resembled Pelatih. See Davidson, Kraetzschmar, Bertholet.

PELEG (פלג, פֶּלַעַק [AEL] Phaleg), elder son of EBER, brother of JOKTAN, and father of REU; Gen. 10:25 11:16 ff. (פֶּלַעַק A* in v. 17) 1 Ch. 1:19 25 (פֶּלַעַק [B*^b], פֶּלַעַק [B^{ab}L]); Lk. 3:35† (AV PHALEC). Taking this to be a geographical name, Knobel connected it with Phalga, a place situated at the confluence of the Chaboras and the Euphrates; † for another suggestion see Lagarde, Or. 2:50. The root-meaning is commonly thought to be 'division' (cp Gen. 10:25 [R₁]; 'in his days was the [people of the] earth divided,' פֶּלְגָה); cp. Judg. 5:15^b, מִזְבְּזָה, 'tribal divisions' (Moore, Bu.; AV 'divisions'; RV 'watercourses'); cp DISTRICT. In connection with a wider study of the names in Gen. 10 ff., however, it is doubtful whether we can attach weight to conjectures based on the traditional reading 'Peleg.' 'Arpachshad' is very possibly a corruption of 'Aráb-cush' or 'Cush-aráb.' When we consider how often, in the OT genealogical lists, old names are split into two, it is very possible that Peleg and his son Re'u represent different fragments of Jerahme'el (לְיֶרְחָמֶ־עֵל)—i.e., פֶּלַג = פֶּלַג, and רְעוּ = רְעוּ. Cp PAGIEL. T. K. C.

PELET (פלתי, § 50). 1. Perhaps a secondary Calebite clan; cp BETH-PALET (1 Ch. 2:47; פֶּלַעַק [B], פֶּלַעַק [A], פֶּלַעַק [L]).

2. b. AZMAVETH, one of David's warriors; 1 Ch. 12:3 (פֶּלַעַק [B], פֶּלַעַק [A], פֶּלַעַק [L]). See DAVID, § 11 (c).

PELETH (פלתי; on the origin of the form see ZAREPHATH).

1. A Reubenite, father of On, the associate of Korah, Dathan, and Abiram; Nu. 16:1 (פֶּלַעַת [BAF], פֶּלַעַק [L]).

2. A Jerahmeelite; 1 Ch. 2:33 (פֶּלַעַת [B], פֶּלַעַת [A], פֶּלַעַת [L]). Cp JERAHMEEL, § 3.

PELETHITES, constantly coupled with the CHE-RETHITES [q.v.], 2 S. 8:18 and elsewhere—i.e., probably, the Rehobothites (see REHOBOTH). The connection of the Pelethites with the Negeb, and more particularly with Zarephath, may be regarded as in the highest degree probable (see ZAREPHATH). Their true name indeed was 'Zarephathites,' and a severe struggle seems to have been necessary before they became David's faithful servants.

This depends, however, on the correctness of the view (in itself extremely plausible; see ZAREPHATH) that 'Pelethites' or 'Zarephathites' should be restored in place of 'Philistines,' not only in 1 S. 23:1 f. etc., 30:17, but also in 2 S. 21:15 ff. Cp PELETH; SAUL, § 3.

Winckler (GZ 185) supposes that Plēthi (or rather Palti) is derived from Peleth, and that Krēthi (original form Karti?) and Palti are the names of the *gentes* of the Negeb from which David was descended. Peleth, according to him, is the same as Peleṭ in Beth-peleṭ (בֵּית־פֶּלֶט), a place in the far S. of Judah towards Edom (Josh. 15:27). This ingenious view, however, does not take account of all the difficult textual phenomena. Probably Peleṭ = Peleth = Zarephath. For another view see JERAHMEEL, § 3. T. K. C.

1 On the site of Phaliga see Peters, *Niḡârur*, 1:123, 311.

PELIAS

PELIAS (ΠΕΛΙΑΣ [B], ΠΑΙΔΕΙΑΣ [A]), AV 1 Esd. 9:34 = Ezra 10:35, ΒΕΔΕΙΑΗ.

PELICAN (ΠΗΛΙΚ; ΠΕΛΕΚΑΝ; ΟΡΝΕΟΝ, ΚΑΤΑΡΑΚΤΗΚ, ΧΑΜΑΙΛΕΩΝ [οἱ κοραῖ?—transposition; see Zeph.]; *onocrotalus*, but in Ps. *pellicanus*). One of the unclean birds, Lev. 11:18 Dt. 14:17. The reference in Is. 34:11, however, seems due to thoughtlessness, at least if *ka'ath* means the 'pelican,' for this bird (like the bittern) loves marshy ground, whereas Edom (to the fate of which Is. 34 is devoted) was to become parched. On the other hand, the 'pelican' is well placed in the ruins of Nineveh (Zeph. 2:14), for there are many reedy marshes near the Tigris. In Ps. 102:6, again, the reference to the pelican (if *תקק* means this bird) indicates a conventionalized zoology; for though it may be true that the term *תקק* (EV in Ps. 'wilderness') does not convey the meaning of 'desert,' it is certainly applied to relatively dry districts where the pelican would not be at home. The rendering 'pelican,' however, is by no means free from doubt.

It has been suggested by the supposed etymology of *תקק*, *ka'ath*, viz. *קיא*, 'to vomit,' which accords with the pelican's well-known habit of regurgitating its food; cp Talm. *תקק* (= *תקק*). One would certainly have expected, however, to find the pelican indicated by more characteristic features in the OT literature. Noticing that in Ps. 102:6 the *ka'ath* and the *kos* (i.e., 'owl') are mentioned in parallel lines, the question arises whether the former word may not be a mutilated form of *ka'dyath*, and mean 'owl.' We find *קדקד*, *ka'dya* (Ass. *ka'du*), in Tg. Onk. of Lev. 11:17 for *kos*, and it is not impossible that two species of owl (a great and a small?) may have been combined by the psalmist as images of desolation.

The pelican's habit of 'storing great quantities of fish in the capacious pouch under its lower mandible, and then disgorging them to feed its young' is well known; the fable of its feeding its young with its blood arose in Egypt, and was attached originally to the vulture (see Houghton, letter in *Acad.*, Apr. 5, 1884, p. 243 f.). There are, according to Tristram, two species of pelican found on the coasts of Syria—*Pelicanus onocrotalus*, or the White Pelican, and *P. crispus*, the Dalmatian Pelican, both birds of enormous size, about 6 ft. long, and the spread of their wings reaching over 12 ft. Tristram thinks that the allusion in Ps. 102:6a is to 'the melancholy attitude of this bird as, after gorging itself, it sits for hours or even days with its bill resting on its breast' (*NHP* 251). T. K. C.—A. E. 5.

PELONITE (פֶּלֹנִי). 1. 1 Ch. 11:27 27:10, a corruption for PALTITE (*q.v.*)—i.e., man of BETH-PELET (*q.v.*). 2. 1 Ch. 11:36, a corruption for GILONITE—i.e., man of GILON (*q.v.*); see ELIAM, I, AHITHOPHEL (end).

PELUSIUM (פֶּלִיִּס), Ezek. 30:15 AV¹⁹ EV SIN.

PEN. The earliest writing implement was probably the stylus (γραφικ, ¹γραφ[ε]ιον, in late writers *στυλος*), a pointed bodkin of metal, bone, or ivory, used for making incised or engraved letters on lead, clay, stone, wood, or wax. Such was the pen of Isaiah (Is. 8:1; עֵתֶךָ, *γραφίς*, *stylus*). The same word occurs in Ex. 32:4 (EV 'graving tool'; the implement with which the molten calf was fashioned; F has *pa'phis*), and should perhaps be read in Is. 44:13. See **PENCIL**. The iron pen (בִּרְזֵית עֵץ, *γραφειῶν σιδηροῦν*, *stylus ferreus*) is also mentioned in Job 19:24 Jer. 17:1. The calamus or arundo, the hollow tubular stalk of grasses growing in marshy lands, was the true ancient representative of the modern pen. The use of such reed pens can be traced to a remote antiquity among the civilised nations of the East.² To make and mend them, a penknife (כַּתָּבִי: Jer. 36:23†) or 'scribes' razor' (see **BEARD**) was required. A reed pen is probably intended in Ps. 45:2 (עֵץ, *καλαμος*, *calamus*) and in Jer. 8:8 (עֵץ; *σχοινός*, *stylus*), and in 3 Jn. 13 (*καλαμος*). The earliest specific allusion to the quill pen is in the *Etymologies* of Isidore

¹ *γραφίς* was also used for a fine brush (*penicillus*, pencil) used in drawing.
² Hollow joints of bamboo were similarly employed.

PENNY

of Seville, who died 636 A.D. ('instrumenta scribæ calamus et penna . . . sed calamus arboris est, penna avis, cujus acumen dividitur in duo'). That, however, does not prove that the quill pen was not in use earlier. A bronze pen, nibbed like a modern steel pen, found at Pompeii, is now preserved in the Museum at Naples.

On the 'pen of the writer' (Judg. 5:14, מִשְׁכַּחַט שֵׁשֶׁת־רִבְעֵי אֶלֶף RV 'marshal's staff') see **SCRIBE**, 5.

PENALTY (Pr. 19:19 RV). See **TRIBUTE**, 7; cp **FINE**.

PENCIL (רִבְזֵית, *ired*; **G** incomplete and corrupt; Is. 44:13† RV), the instrument with which the wood-carver made his first rough sketch of the image he was to produce. Kimhi and others think of a red-coloured thread (hence AV's 'line'); RV¹⁹¹⁹ records the sense 'red ochre'; RV gives 'pencil' (cp Aq. *παπαγραφίς*—i.e., stylus); Vg. *vincina*—i.e., 'plane.' All plausible meanings, if justifiable.

רִבְזֵית, however, seems to be corrupt; the root would mean 'to weave together.' We should expect רִבְזֵית (see **PEN**). Haupt, however, would render שֵׁשֶׁת־רִבְעֵי אֶלֶף 'compasses,' and connect Ass. *sirdu* 'yoke' (see *BOT*, *Isaiah*, Heb. 137).

PENDANTS (נְטִיפוֹת), Judg. 8:26 RV, AV 'collars'; נְטִיפוֹת Is. 3:19 RV, AV 'chains'. See **RING**, 2.

PENIEL (פְּנִיֵאל), Gen. 32:30 [31], in v. 31 [32] **PENUEL**.

PENINNAH (פְּנִינָה, § 71; ΠΕΝΝΑΝΑ [BAL]), wife of Elkanah (1 S. 1:2).¹ The name is apparently the singular of *peninim*, a word of doubtful signification, in AV 'rubies' (see **RUBY**). As a woman's name it probably alludes to the complexion; cp Lam. 4:7.

W. A. 5.

PENKNIFE (חַבֵּר הַפֶּסֶף; τὸ ζύρον τοῦ γραμματέως; *scalpellum scribæ*), Jer. 36:23†. See **PEN**.

PENNY. Under this head we treat of the various coins of which the Greek names are translated by 'penny,' 'farthing,' and 'nute' respectively, reserving the 'drachm' and 'stater' for separate discussion (see **STATER**).

Penny is used in both AV and RV to represent *δηνάριον* (*denarius*), the silver coin issued by the Roman Imperial mint; it was current in all parts 1. 'Denarius.' of the Empire, and in terms of it and its sixteenth part, the *as*, all public accounts were presented. Its normal weight during the time of Christ and until the reign of Nero was $\frac{3}{4}$ of the Roman pound—i.e., 60 grains troy.² Its nominal value was $\frac{2}{5}$ of the Imperial gold coin, or *aureus*; of lower denominations, which were issued in bronze or copper, it contained 4 *sestertii*, or 16 *asses*. As an almost invariable rule it bore on one side (the *obverse*) the head of the Emperor or some member of the Imperial family, with titles—the 'image and superscription' mentioned in Mt. 22:20 Mk. 12:16 Lk. 20:24. On the *reverse* is a representation (usually historical or mythological) with an inscription either alluding to the object represented, or amplifying the titles of the person who figures on the obverse.

The denarius of Tiberius reproduced in next col. was issued between 16 and 37 A.D., and therefore current about the time of Christ. Around the laureate head of the Emperor runs the inscription TI. CAESAR. DIVI. AVG. F. AVGVSTVS ('Tiberius Caesar Augustus, son of the deified Augustus'). On the reverse the inscription PONTIFEX MAXIMVS completes the titles of Tiberius, whilst the seated figure, with her right hand resting on a sceptre, her left holding a flower, is the Empress Livia.

This then is the kind of coin in which the tribute was paid. A standard silver coin of the same normal weight (60 grs. troy) would at the present time be equivalent to 8½d. The legal value of the denarius, however, is better estimated by its relation to the aureus. That coin weighed normally 126.3 grs. troy, and the denarius

¹ Bateson-Wright (*Has Israel ever in Egypt?* 231) connects Peninnah with Jephunneh, Elkanah being a son of Jeroham.
² The standard weight of the British shilling is 87.27272 grains, that of the sixpence 43.63636.

PENNY

was therefore legally equivalent to $\frac{1}{16}$ of the same amount of gold, which, at the present rate of £3 : 17 : 10½ for the ounce troy, works out at 9.83d. The best idea of the actual purchasing power of the denarius is gained from its employment as a fair day's wage for the agricultural labourer (Mt. 20:14), from the payment of two denarii by the good Samaritan, and from the fact that the Roman legionary's pay in those times was 225

Denarius of Tiberius.

denarii a year, or 5 denarius a day. Hence it is clear that the American RV translation 'shilling,' if not entirely satisfactory, is nearer the mark than the English 'penny.'

Farthing is the rendering adopted for two Greek words, the *κοδράντης*, *kodranthes* (τὸν ἑσχατὸν κοδράντην,

2. 'Farthing.' ὁ ἑστὶν κοδράντης, 'the last farthing,' Mt. 5:26; λεπτὰ δύο make a farthing,' Mk. 12:42) and the *ἀσάριον*, *assarion* (δύο στρουθία ἀσάριον πωλεῖται, 'two sparrows sold for a farthing,' Mt. 10:29, cp Lk. 12:6). Both names are of Latin origin, *assarion* being a by-form of *as*, and *quadranthus* representing the fourth part of the *as* in the Roman divisional system. *Assarion* must be the name of a provincial coin which corresponds in some way to the Roman *as*. In the Hellenistic system the unit was the silver drachm (for ordinary purposes ranking as equivalent to the denarius, but by the Romans for official purposes tarified at $\frac{1}{2}$ denarius or 12 asses). This drachm contained 6 ὀβολοὶ or 48 χαλκοί. Now the evidence of the coins of Chios (see Imhoof-Blumer, *Griechische Münzen*, 660) shows that, in that island at least, the obol was equivalent to 2 assaria, and the drachm to 12 assaria. Since assarion thus corresponds to *as*, it follows that the *χαλκοῦς*, *chalkous* (or $\frac{1}{8}$ of the obol of 2 assaria) corresponds to the quadrans (or $\frac{1}{4}$ *as*). *Kodranthes* may therefore be regarded as an alternative name for this *chalkous*, used especially where it was desirable to be understood by non-Hellenistic readers. Hence its occurrence in the explanatory clause in Mk. 12:42; its use by Mt. 5:26, where Lk. 12:59 has λεπτὸν (see § 2), has been explained by Mt.'s familiarity with the Roman system of accounting. As regards the quadrans itself, the Roman coin of that name ceased to be issued early in the first century B.C., and was revived for a short period under the Empire (from Nero to Trajan). There is no good evidence of its existence in the Roman currency during the time with which we are immediately concerned, nor is there any probability that a provincial coin was at any time known in common speech by the name of *kodranthes*. The bearing of this point on the text need not be discussed here.

The word λεπτὸν, *lepton*, already mentioned, is fittingly translated *mite* (Mk. 12:42 Lk. 21:2 and 12:59). As to

3. 'Mite.' this coin there is much evidence confirming the equation of two lepta to one *kodranthes* given in the first passage, although most of that evidence seems to be derived from the same source. In Hebrew literature, however, we find the smallest Jewish coin, *pèrùtah*, equated with $\frac{1}{2}$ Roman *as*. We need not hesitate to identify *lepton* and *pèrùtah*. From this, since we have identified *chalkous* and quadrans, it would seem to follow that the *lepton* was half the *chalkous*. Nevertheless, numismatists have serious difficulty in finding, among the small coins of Judæa, separate denominations for *chalkous* and *lepton*. The minute pieces of the Hasmonæan and Idumæan rulers, which it has been proposed to regard as a different

PENNY

denomination from the larger, seem to owe their small size and low weight to carelessness on the part of the moneys, or to long circulation. On the other hand, the following consideration will show that *chalkous* and *lepton* are probably the same, and that the apparent discrepancy is due to different systems of valuation.

In addition to the system (A), in which the drachm was equivalent to 12 *assarion-asses*, there was in

4. *Chalkous* Judæa, at least during the second century, and *lepton*. another system (B). According to it (see Kennedy, 429) the drachm was divided into 6 obols (μᾶϑη) and 24 *assarion* (*issarim*). To the same system presumably belonged the *lepton-pèrùtah*, which would bear the same relation to the *assarion* of system B as the *chalkous-kodranthes* did to the *assarion* of the system A.

There is much probability in the view advocated by Kennedy that we have in this double system a case of 'tariff' and 'current' values. System A represents the values adopted for accounting, B those according to which coins passed in ordinary transactions. The three systems with which we have to reckon may thus be stated in tabular form, where in each column *x* is placed opposite the unit in terms of which the other denominations in that column are calculated.

Denomination.	Roman System.	Provincial.	
		System A.	System B.
Denarius	1	.. }	1
Δραχμή, <i>drachme</i>	[12]	x }	
Sesterlius	$\frac{1}{4}$..	$\frac{1}{2}$
Ὄβολος, <i>obolos</i>	[6]	$\frac{1}{2}$	$\frac{1}{3}$
As	$\frac{1}{16}$
Ἀσάριον, <i>assarion</i>	[12]	$\frac{1}{12}$	$\frac{1}{24}$
Quadrans	$\frac{1}{4}$
Χαλκοῦς-λεπτόν, <i>chalkous-lepton</i>	[63]	$\frac{1}{63}$	$\frac{1}{126}$

On system A, the *assarion*, as $\frac{1}{12}$ of the denarius estimated at 9.83d., is to be rated at 1d., and the *κοδράντης*, *kodranthes* (*chalkous*) at $\frac{1}{2}$ d. On system B the *assarion* would be worth $\frac{1}{3}$ d., and the *χαλκοῦς-λεπτόν*, *chalkous-lepton* $\frac{1}{6}$ d. It is probably the lower values that we must assign to the words *assarion* (*assarion*) and *λεπτόν* (*lepton*) wherever they are used in the N.T., since there is nothing to show that they are not used in a popular sense.

If it is desirable not to use the actual Greek names, practical purposes are best served by the use of 'penny' for *assarion*, 'farthing' for *kodranthes*, and 'mite' for *lepton*.

The identification of these minor denominations with extant pieces is hampered by two facts; very few ancient coins bear their names; and bronze and copper, being token currency, were not issued according to accurate weight-standards. Size, in fact, rather than weight, seems to have been the distinctive mark of denomination. Among Jewish coins we have pieces of Herod I. which bear the letter X (Madden, p. 111), and of Agrippa II. with the inscription ΧΑΑΚΟΤΣ (*ib. p. 146*; the same legend occurs on other small coins issued perhaps from Antioch). The coin of Herod is probably

Coin issued (by Pontius Pilate) in 29-30 A.D.

like the latter, the *χαλκοῦς-λεπτόν*, *chalkous-lepton*. Of coins actually issued during the time of Christ, the small pieces of the Procurators (from $\frac{1}{16}$ to $\frac{1}{8}$ of an inch in diameter, and weighing from 40 to 23 grs. troy), may be regarded as of the same denomination, since they most nearly approach the two coins of Herod I. and Agrippa II.

As an instance, we give the accompanying coin, which was issued in the 16th year (LIS) of the Emperor Tiberius (ΤΙΒΕΡΙΟΥ ΚΑΙΣΑΡΟΣ), and therefore by Pontius Pilate in the year 29-30 A.D. The types are a sacrificial ladle (*simpulum*) and three ears

of corn bound together; on the reverse is the name of Julia (Livia), mother of the Emperor—ΙΟΥΛΙΑ ΚΑΙΣΑΡΟC.

The assaria may have been coins like the larger pieces of Herod I. (Madden, 107; two specimens in the British Museum weigh 107.9 and 97 grs.

5. Assaria. respectively). More probably, however, these were pieces of three χαλκοί, chalkoi (Madden, 108), and the commonest assaria were coins of the Syrian Antioch. In addition to its coins with Greek inscriptions meant chiefly for local use, this mint issued a series with Latin inscriptions, and with the letters S. C. (*i.e.*, *Senatus consulto*). These coins, resembling the issues of the Roman mint, were meant for more than local circulation. Under Augustus and Tiberius we find two denominations; the larger weigh from over 300 to 225 grs., and measure $1\frac{1}{2}$ to $1\frac{1}{8}$ inch; the smaller, from 150 to 114 grs., measure 1 to $\frac{5}{16}$ inch. The two denominations are generally supposed to be the *sestertius* and the *as*. In the smaller, therefore, we probably see the *assaria* of the NT.

Assaria of the year 31 A.D.

The assaria here illustrated was struck in the year 31 A.D. On the obverse, it bears a laureate head of the emperor with the titles TR(iberius) CAESAR AVGVSTVS TR(ibuniciã) POT(estate) XXXIII; on the reverse the letters S. C. within a wreath.

Literature.—See especially F. W. Madden, *Coins of the Jews* (1881); A. R. S. Kennedy's art. 'Money' in *Hastings' DB* 3 (1900), 417 ff. G. F. H.

PENTATEUCH. See HEXATEUCH.

PENTECOST. In J and E¹ (Ex. 34:18-26, cp 23:10-17) the feast of weeks is the second of the three festivals

1. In J and E. to be celebrated by the attendance of all males at the sanctuary. The expressions in the two forms of the law are not quite the same.

Ex. 34:22 runs 'thou shalt observe the feast of weeks (תִּתֵּן פְּעוּסָה), [the feast] of the first-fruits of the wheat-harvest (תְּבַרֵּת קִצְרֵי הַשֵּׂבִי); Ex. 23:16, on the other hand, has 'the feast of harvest, the first-fruits of thy labours which thou sowest in the field (תִּתֵּן הַקִּצְרֵי בְּתֵבֶלֶךָ קִצְרֵי הָאָרֶץ).'

Substantially, both come to the same thing; Ex. 34:22 is merely expressed more precisely. It is not the feast of corn-harvest as a whole that is spoken of, but the festival at its conclusion, the wheat-harvest being the last to be reaped.

The time of celebration is thus clearly and distinctly fixed for the end of harvest. The first-fruits of the new harvest (בְּכִרֵי כְעִשְׂרֵי) are now presented—more precisely, the first-fruits of the wheat-harvest, for the first-fruits of the barley-harvest are presented at the beginning of harvest, at the feast of unleavened bread. A more exact, yet equally relative determination of the date seems to lie in the plainly ancient name Šabū'oth; at least it is so taken in Dt. 16:9, where the feast of weeks is brought into a close time connection with the feast at the beginning of harvest. The duration of the corn-harvest (it is only the corn-harvest that is to be taken into account) is computed at seven weeks—an estimate which still answers fairly well to the climatic conditions of Palestine. These seven weeks of the harvest are the great annual season of gladness, the weeks of joy, the weeks κατ' ἐξοχήν. The 'joy of harvest' is proverbial among the ancient Hebrews (cp Is. 9:3[2]); the period opens and closes with the two feasts we have named.

¹ The question of the literary relationship of the two passages is discussed elsewhere (PASSOVER, § 1; cp EXODUS II., §§ 3, 4), but may be disregarded here, the answer to it having no bearing on the history of the development of the Pentecost feast.

The old law contains no further detailed enactment of any kind regarding this feast, the manner of its celebration, the sacrifices to be offered, or the like. Indeed, this is no case where definite offerings and legally fixed dues are to be rendered; it is a question of voluntary presentation of first-fruits, as it still stands enacted in Dt. (16:10): 'Thou shalt keep the feast of weeks unto Yahwè thy God with a tribute of a freewill offering of thine hand which thou shalt give according as Yahwè thy God hath blessed thee.'

The meaning of the gifts and of the feast as a whole is easily recognised when we hear in Hosea (9:4), that in exile the people shall have nought to eat but mourners' bread, since none of it shall have come up into the house of Yahwè. By this gift made to God, a gift which in turn is consumed by men in the joyous sacrificial meal, the whole is made holy (see TAXATION). That at the same time the gift has the character of a thank-offering is also manifest. The next step is easy: such an offering came to be regarded as a tribute of homage in which the deity is recognised as the 'lord,' the Baal of the land, and the bestower of the gifts of the soil. At how early a date this last conception came to be the leading and normative one we do not know. It finds explicit expression first in the passage of Dt. already quoted, where the offering to be offered at the feast is determined by the wealth of the offerer, in other words by the produce of his fields.

The law of Dt., as already seen, adds nothing to the ancient custom; all that it does is to lay greater stress

2. In D. on the character of the offering as a divine tribute which may be rightly claimed by the deity as due to him out of that which he has bestowed on his human vassal. This appears also in the precept of Dt. 26:1 f. (see below). In spite of the general tendency of Dt. to assign a historical origin to the feasts, we do not find in it in the present case any such definite reference to the Exodus as is found in that of the passover (see PASSOVER, § 6). Even here it is only in a quite general way that reference is made to the exodus when in Dt. 26:1 there is prescribed a sort of confession to be made at the bringing of the first-fruits (= tithes; see TAXATIONS), in which amongst other things the offering of the produce of the land is represented as a thanksgiving for the bestowal of the land. After the offering of the first-fruits at the autumn festival (see TABERNACLES, FEAST OF) had come to be so regarded, only a very short step was needed in order to bring the offering of the first-fruits at the harvest festival into connection with the same thought.

More important, however, than the points just mentioned are the changes which, though not indeed intended and enjoined by Dt., inevitably arose in the case of this feast as a consequence of the concentration of the worship at a central sanctuary; the fixing of a definite day in the calendar, and the transformation of the celebration from being a popular festival to being an act of public worship. On these points see, further, FEASTS, § 10.

The third stage in the development of the three feasts is marked by H in Lev. 23:15-21. Here again we find

3. In H and in Ezek. the date of the feast of weeks still left vague, just as it is in Dt. On the other hand, the amount and kind of the festal offering is more precisely determined in the law of H than before. It is no longer left to the discretion of the individual to bring as he chooses according to the yield of his land—this tribute of first-fruits has already become a fixed tithe to be paid at the sanctuary (see TAXATION)—but it is now laid upon the entire community¹ to bring a definite first-fruit offering; two first-fruit loaves (לֶחֶם תְּבַרִיתִים) of new meal, of two tenths of an

¹ 'Out of your dwellings' (מִמִּשְׁבֹּתֵיכֶם) in Lev. 23:17 does not mean, as has been supposed (so Graf and others), 'out of each several house,' so that every householder or owner of land would have had the duty of bringing this offering; it means 'out of your land'—*i.e.*, of home-grown flour (see Dillm. *ad loc.*).

ephah, baked with leaven. With the loaves is performed the ceremony of waving, whence the loaves are called 'wave loaves.' They were to be leavened, for they were to be taken from what was in common daily use. In this we may safely conjecture a survival from ancient custom: at the beginning of harvest in the feast of unleavened bread the grain was offered raw, or roasted, or in the form of quickly-baked unleavened cakes (see PASSOVER); at the end of the harvest what was offered was fully prepared bread. It must not be taken as an argument against the antiquity of this religious custom that it is not mentioned in D or JE; JE has no ritual prescriptions at all as to the bringing of these offerings, and D has them only in the case of the passover, not in that of the harvest festival or of the autumn (ingathering) festival with its peculiar customs. For the pentecost offering H (Lev. 23 19) further orders two yearling lambs¹ as a sacrifice of peace offerings. The bread and the flesh, after having been presented to Yahwé, fall to the lot of the priests.

In the programme of Ezekiel, singularly enough, the pentecostal offering finds no mention; in 45 21, it has been introduced by a later hand and is absent from G.

The omission is perhaps connected with the fact that Ezekiel divides the entire ecclesiastical year into two portions, with two parallel series of feasts; thus no suitable place is left for pentecost. In any case, however, this proves that Ezekiel does not regard the feast of pentecost as of particular interest; and from this we can infer further that in his time it was the least important of the great yearly festivals.

In P (Nu. 28 26 f.) pentecost still continues to be a purely harvest feast. In agreement with the name

4. In P. 'feast of the first-fruits' is the specific ritual prescription, the bringing of a meal offering of new meal. To this characteristic pentecostal offering P adds, besides the stated daily offering, an accumulated series of animal sacrifices, just as in the case of the passover: two young bullocks, one ram, seven he-lambs of the first year as a burnt offering, besides a meal offering of three tenth-parts mingled with oil for each bullock, two tenth-parts for the ram and one tenth-part for each lamb. Lastly, there is a sin-offering, consisting of one he-goat. The fixing of a definite date is in the case of pentecost the natural consequence of the passover being fixed for 15th-21st Nisan. In P also we observe that a less value is attached to this feast than to the others: it is held only for one day, whilst the passover and tabernacle feasts are spread over a longer time. This valuation is also reflected in the fact that no significance as commemorating any event in the redemptive history of the nation is assigned to the festival.

Later Judaism made up for what was lacking in the law in this respect, and gave the feast the historical interpretation which it had hitherto lacked.

5. In later Judaism. It was assumed, in accordance with Ex. 19 1, where the giving of the law is dated on the third month after the Exodus, that the promulgation of the law on Sinai was on the sixth or seventh of Siwan, the day of the feast of pentecost (*Pisäsch.* 68 b; cp *Jubil.* 1: 8 17 14 1 15 1 where God's covenants with Moses, Noah, Abraham, are made at new moon, or, as the case may be, on the sixteenth day of the third month). It is certain, however, that this metamorphosis of the feast of the corn harvest into the feast of the law-giving was late, probably not earlier than the destruction of the temple when the system of sacrifices and offerings came to an end. Even in Josephus and Philo we still find no trace of it. In Josephus (*Ant.* iii. 106, § 252) the feast is called Asartha (*ασαρθα* = Heb. עֲשָׂרֹת, Aram. עֲשָׂרֹת); so also in the Talmud (*Pisäsch.* 42 b and often). This expression will be intended to characterise the feast either as the 'conclusion' of the great feast of unleavened bread, or as the closing harvest festival. In the more precise dating of the feast the second day of the feast of unleavened bread was taken as the starting point for which the fifty days were reckoned and the 'sabbath' of Lev. 23 15 was taken to mean the first day of that feast.

We have dealt so far with the development of the

¹ In *vv.* 18 19 various other offerings are also enjoined as in Nu. 28 27 f. These, however, do not belong to the original text. See Dillm. *ad loc.*

feast as shown in the various stages of the written legislation. Unfortunately, in the case of the feast of pentecost we are not in a position to show from the historical books

at what period it began to be celebrated, or what part it played in the religious life of the Israelites, although many passages allude in quite general terms to various feasts. It is not till the period of later Judaism is reached that we are expressly informed of its regular celebration. The narrative in Acts shows a multitude of worshippers from foreign parts as attending the festival in Jerusalem (Acts 2; cp Jos. *BJ* ii. 31, *Ant.* xiv. 134 xvii. 152). The silence of the older literature of course proves nothing against the observance of the feast in earlier times as attested by Josephus. As bearing on the question of the antiquity of the festival, however, the following circumstance is not without interest. So far as the great spring festival at the beginning of harvest is concerned, we hear that even the pre-Mosaic period knew something of the kind (see PASSOVER); of the autumn feast we are told that even the Canaanites had observed a closely allied festival and this festival had already become almost fully naturalised in Israel at the time of the division of the monarchy, as we see from 1 K. 12 32 (see TABERNACLES, FEAST OF). Pentecost, on the other hand, is not only relegated to a very subordinate part in P and passed over in complete silence by Ezekiel, but is also left unmentioned as existing in the older time. It would be too much to infer from this single circumstance that the feast was of late origin; and even from the difference of name in J and E (see above, § 1) it is by no means safe to conclude that it did not arise till after the revolt of the ten tribes (so Steuernagel on Dt. 16 1). Even on the assumption that E belonged to the northern kingdom and J to the southern (though this is by no means certain), all that could with certainty be inferred, would be a diversity of local designation, which there may very well have been, even in the case of an ancient feast.

There are other considerations, however, which, taken in conjunction with what has been already adduced, suggest the secondary character of pentecost. Under FEASTS (*q.v.*) the general thesis has already been propounded that all three feasts of harvest and ingathering were of Canaanite origin. This applies to pentecost in particular, in so far as it at least presupposes settlement in the country, and if it is of equal antiquity with the feast of the ingathering it will in all probability have had its origin also in the Canaanite worship. If, however, we closely scrutinise the significance of the feast we shall find that, coming between passover and tabernacles, it is, strictly, a superfluity. For this reason Ezekiel is able quietly to set it aside. If the purpose of the feast is to consecrate the harvest by offering the first-fruits to God, that has already been done at the passover feast, and very fittingly, at the beginning of harvest. If the chief stress is to be laid on its character as a harvest thanksgiving, then again it seems somewhat superfluous alongside of the great feast of the ingathering which was held at the close of the entire year's husbandry; there was no real occasion for a special feast of thanksgiving or consecration for each separate kind of produce. Strict symmetry is somewhat broken if a feast is held at the beginning and at the end of the corn harvest whilst there is only one to celebrate the ingathering of the fruits of vineyard and orchard. Thus arises the conjecture that perhaps the opening and closing feasts connected with the corn harvest were not, originally, essentially distinct feasts celebrated invariably and everywhere as separate; that it was one and the same feast celebrated at different times, according to the nature of the case, in different parts of the country. The difference between the times at which harvest begins is in Palestine very considerable; between the climate of the Jordan valley and that of Jerusalem and the colder

PENUEL

districts of the 'hill country' it amounts to some three or four weeks. The beginning of the harvest at Jerusalem and the close of the harvest in the Jordan valley approximately coincide. In this way it becomes easy to see how, out of a single harvest festival, when celebrated at such different times, there should ultimately have arisen, as the separate districts of the country were brought into closer relations and religious customs tended more and more to be assimilated, a double feast, or to speak more accurately, a double celebration of the same festival idea. The connection of the passover with the feast of unleavened bread—a connection whereby the latter was thrust into the background by the passover feast—could not but favour the rise of an independent harvest festival.

See the relative sections in the *Archaeologies of Saalschütz*, De Wette, Ewald, Keil, De Visser, Benzinger, Nowack; Orelli's art. 'Pingensten' in *PRE⁹*, vol. xi.; also the literature cited under FEASTS and PASSOVER.

7. **Literature.** פְּנִיֵּאל [Gen. 32³⁰[31] 31 [32]]; Egyptianised as Penu'ary [WALM, *As. u. Eur.* 168]; ΦΑΝΟΥΓΓΑ [BNAŁ], but in Gen. εἶδος τοῦ θεοῦ).

1. A place mentioned in connection with Jacob's wrestling with a divine being (Gen. 32³¹[32], cp 33¹⁰), and with the story of Gideon (Judg. 8^{8f.}, 17); fortified, it is said, by Jeroboam (1 K. 12²⁵). In Phœnicia the name Θεοῦ πρόσωπον was given to a promontory near Tripolis (Strabo, xvi. 215^{f.}), perhaps because in profile it suggested a huge face. The god referred to in Penuel, 'face of God', would be the God, originally hostile to the Jacob-tribe, who was worshipped at the sanctuary of the city (?) of Penuel. Where was this city situated? From the story in Genesis, as it stands, no sure conclusion can be reached, since it is uncertain (1) on which side of the JABBOK (*q.v.*) J's narrative means us to place Penuel, and (2) whether originally the story of Jacob at Penuel may not have been quite unconnected with the crossing of the Jabbok (or Yarmuk?). Conder thinks of the summit of the Jebel Ōsha in S. Gilead; Merrill (*East of the Jordan*, 370) of the Tulūl ed-Dahab ('Hills of Gold'), between which the Jabbok forces its way into the Jordan. It was at any rate on a hill (Judg. 8⁸), and it was near Succoth (if the received reading is correct), as both the Gideon-story and the Jacob-story agree. If the present writer's view of the true form of the name now read 'Succoth' be accepted, Penuel will be the Hebrew name of the 'tower,' or castle, of Salhad (the true reading, not only for JEGAR-SAHADUTHA in Gen. 31⁴⁷, but also for 'Succoth' in Gen. 33^{17a}, Judg. 8^{5f.}). See SUCCOTH, and cp WRESTLING.

The reference to 'Penuel' in 1 K. 12²⁵ is due to corruption of the text. פְּנִיֵּאל should probably be בני ישראל, 'the Israelites.'

2. Penuel appears twice as a personal name: (a) in the genealogy of Judah, 1 Ch. 4⁴, cp 2. 18 JERED; (b) in that of BENJAMIN (§ 9, ii. B) in 1 Ch. 8²⁵ פְּנִיֵּאל [Kt.]; φεληηλ [B].

T. K. C.

PEOPLE (עַם), Gen. 11⁶. See GENTILES.

PEOR (פְּעוֹר), 'the Peor,' as if 'the cleft'; or, if the name is correct, cp פְּעוֹרָא, PARAN; ΦΟΥΡΩΡ¹.

1. A mountain 'that looketh toward Jeshimon' (AV), or 'that looketh down upon the desert' (RV), *i.e.*, NE of the Dead Sea (Nu. 23²⁸); cp 'Baal (of) Peor.' It was on 'the top of the Peor' that Balaam is said to have delivered his third oracle, and though a Mt. Peor is mentioned nowhere else, it is conceivable that a mountain not far from Beth-peor might have borne this name; Eusebius (233⁷⁹; 300²) at any rate asserts this. It is, however, as Bennett (Hastings, *DB*, 3743^a) truly says, 'not certainly identified.' Conder's eloquent description of the prospect from his 'cliff of Peor'—*i.e.*, the narrow spur which runs out to Minyeh, overlooking the Dead Sea (*Heth and Moab*⁽³⁾, 146^{f.})—may indeed make one wish to adopt his view of the scene of Balaam's

¹ There is mention of a φογωρ in Tobit 12 [N].

PEREZ-UZZAH

prophecy; but, even if we accept the text as it stands, there are reasons against it, as well as against rival theories. Cp BETH-PEOR; Driver, *Dt.* 62, Buhl, *Pal.* 123. Wellhausen (*CH* 113) and Ed. Meyer (*ZAT* 1129) assume the identity of 'Peor' and 'Pisgah,' which may be practically right, but raises a serious critical problem. Recognising this, B. W. Bacon (*Trip. Trav.* 229) supposes 'the Peor' in Nu., *l.c.*, to have been substituted by R_{JR} for 'the Pisgah' (cp Nu. 21²⁰). The problem of 'Peor,' however, cannot be treated alone; the set of names to which it belongs needs critical examination. 'Peor,' wherever it occurs, may be corrupt. See NEBO, § 2.

2. A late abbreviation of BAAL-PEOR (*q.v.*), Nu. 25¹⁸ 31¹⁶ Josh. 22¹⁷ (cp Dillm.).

3. See PAU.

4. A Judahite town, mentioned only by EBAL in Josh. 15^{59a} (φαγωρ) and by Eusebius (*OS* 300, 4 φογωρ), identified with the mod. *Kh. Fāghūr*, SW. from Bethlehem on the way to Hebron. T. K. C.

PERAZIM, MOUNT (הַר פְּרָצִים); for פ see BAAL-PERAZIM, Is. 28^{21f.}, commonly identified with Baal-perazim.

In *Crit. Bib.*, however, Cheyne reads for פְּרָצִים, הַר פְּרָצִים, '(against) the city of liars, || עַם בְּרָצִים || (On פְּרָצִים see Cheyne, *Ps.*(2), on Ps. 174^b.)

PERESH (פְּרֵשִׁי); B om. φαρεσ [AL]; *Phares*; a Machirite name; 1 Ch. 7^{16f.} Peresh has a brother called Sheres, and yet the text continues 'his sons were Ulam and Rekem.' 'Sheresh' is possibly a corrupt variant of 'Peresh' (Che.). Cp MANASSEH, § 9, ii.

PEREZ (פְּרִי), apparently 'a breach,' but see below; φαρεσ, son of Judah by Tamar (Gen. 38²⁹ [J], 46¹² [P], Ruth 4¹² 18, where AV PHAREZ; Mt. 13 AV PHARES). In Neh. 11⁴ (σερες [B], cp Peresh and Sheres in last article) the 'children of Perez,' are the Perez clan, called in Num. 26²⁰ [P] the PHARZITE, RV **Perezite** (פְּרִיזִי [gentilic], ὁ φαρεσ[ι] [L]). Probably a place-name as well as a clan-name; see 2 S. 5²⁰, where, 'perazim' in BAAL-PERAZIM is popularly explained by 'perez-maim (an outburst of water). In 2 S. 5^{23f.}, it has been maintained elsewhere (see MULBERRY), we should probably restore a place-name Perez-jerahme'elim (see below), and the same place-name meets us in 2 S. 6⁸ as PEREZ-UZZAH. The special mention of 'the house of Perez' in Ruth 4¹² and the appending of the 'generations of Perez' in Ruth 4¹⁸⁻²² (cp RUTH, BOOK OF) are completely accounted for by the theory that there is an older story underlying the narrative of Ruth, in which certain members of a Jerahmeelite family were made to take a journey to Mišsur (not Moab). Zarephath of Mišsur was a natural refuge for a Jerahmeelite family. Bethlehem (a corruption of Beth-jerahmeel?) had a Jerahmeelite or Calebite connection (1 Ch. 2¹⁹ 24^{50f.}), and the post-exilic genealogical theorists regarded Hezron b. Perez as the father of Jerahmeel and Caleb (1 Ch. 2⁹). See RUTH.

As to the origin of the name: the origins suggested in Gen. 38²⁹ and 2 S. 5²⁰, to which we may add 2 S. 6⁷ (on the theory that the Zarephathites and not the Philistines were the captors of the ark) are popular fancies. 'Perez,' we may reasonably conjecture, is a mutilation and corruption of Zarephath, just as TAMAR (*q.v.*) is perhaps a corruption of Jerahmeelith. It is very significant that in Neh. 11⁴ Shephathiah, who in Ezra 8⁸ is closely related to Michael—*i.e.*, Jerahmeel (see MICHAEL, 10)—appears as son of MAHALALEL (*q.v.*) which is another popular or literary distortion of Jerahmeel, and that Mahaleel is called a son of Perez. 'Perez Jerahmeelim' is therefore fully justified. Cp SHEPHATHIAH, 9. T. K. C.

PEREZ-UZZAH (2 S. 6⁸, or **Perez-uzza** 1 Ch. 13¹¹; ΔΙΑΚΟΤΗ [BNAŁ] ΟΖΑ [or ΔΖΖΑ]), as if 'Breach of Uzzah.' The name of the place where Uzzah (*q.v.*) died, on the way from Kirjath-jearim to the 'city of David.' Probably, however, the name was rather different in the ancient story on which 2 S. 6¹⁻¹³ is based. The name which seems to be required is Šārefath (שָׂרֶפֶת), out of which Peres (פְּרֵשִׁי) may easily have arisen; 'Uzzah' has perhaps come from 'azzah (עֲזָה), which was appended to

death of Alexander the Great. On its strong hill King Lysimachus deposited 9000 talents of his treasure, and this was appropriated by its guardian, Philetærus of Tion in Pontus to found the independent kingdom of the Attalids (Strabo, 623 *f.*). With the support of Seleucus, the King of Syria, Philetærus consolidated his power (284-263 B.C.) and bequeathed it to his nephew Eumenes I. (263-241 B.C.). The glory of Pergamos began with the reign of Attalus I., another nephew of Philetærus (241-197 B.C.). The prestige of the Pergamene kings was gained by their championship of Hellenic civilisation against the Gauls or Galatians, who for long terrorised western Asia (see GALATIA, § 1). After defeating the Gauls near the sources of the Caicus (cp Paus. i. 82), Attalus took the title of king. His success inspired Pergamene art.¹ Other victories added to the dominions of Attalus a large part of western Asia Minor, as far as Pamphylia (Pol. 18.41); and he enlarged his capital so that it became the fairest city in the East. Then the Seleucid power increased, and the Pergamene kingdom was reduced to its original narrow limits; but having sided with Rome in the struggle with the Seleucid monarchy Attalus gradually reconquered his lost possessions, and by the peace of 189 B.C. received from Rome all within the Taurus. Under his son, Eumenes II. (197-159 B.C.), Pergamos reached the zenith of her splendour. He carried on the artistic and scientific schemes of his father. He it was who built the great Altar of Zeus, and beautified the temple and grove of Athena Nicæphorus below the Acropolis (cp Strabo, 624, Pol. 161). He also enlarged the library founded by Attalus, which rivalled ultimately that of Alexandria, and contained 200,000 books (Strabo, 609). Attalus II., his brother (159-138 B.C.), founded Attalia and PHILADELPHIA (*q.v.*). Attalus III., the last king (138-133 B.C.), who inherited little of the capacity of his ancestors, left a will² stipulating that Pergamos and other cities should be free, whilst the rest of his kingdom was bequeathed to the Romans. One Arstonicus, who claimed to have the blood of the Attalids in his veins, made an abortive attempt to seize the kingdom.

Pergamos continued to be the capital of the Roman province³ (from 129 B.C.), even as it had been the capital of the Attalid monarchy—a position which had its justification in history, and was recognised for at least the next two hundred years. There is, however, nowhere any express statement to this effect.⁴

The three cities, Smyrna, Pergamos, and Ephesus were in fact rivals for the honour of being capital of the Province (each called itself *πρωτη Ἀσία*), and in this struggle Pergamos had nothing but her history to set against the steadily growing commercial supremacy of her rivals; and in the end the rivals won. Ephesus, lying on the main route of eastern trade, asserted her superiority over both Smyrna and Pergamos.⁵ Probably the practical fact of the supremacy of Ephesus was recognised popularly long before it became the official view, and the change came about gradually and without any official imperial enactment. The order of enumeration in Rev. 1.11, Ephesus, Smyrna, Pergamos, etc., is true to the facts of the time, and the two commercial cities stand at the head of the list.

That for the first two centuries of the Roman occupation of Asia Pergamos was in the official view the chief

¹ Plin. *HN* 34.84; Paus. i. 252. See Harrison, *Myth. and Mon. of Anc. Athens*, 474*f.*; Gardner, *Hist. of Gk. Sculpture*, 452*f.*

² Suspicion has sometimes been cast upon the genuineness of the will; but an inscription has vindicated the honour of Rome (see Fränkel, *Inscriften von Perg.* i., no. 249).

³ Phrygia Magna had been separated from the rest of the Pergamos realm; it was given to Mithridates of Pontus until 120 B.C., when he died. It was not definitely attached to the Province of Asia until Sulla's time, 84 B.C.

⁴ For the expression of Pliny, *HN* 5.30, *longe clarissimum Asia*, is simply on a level with that of Strabo, 623, *ἐπιφανής πόλις*, both primarily referring to the place of the city in history and art. Strabo's remark, *ἔχει δὲ τινα ἡγεμονίαν πρὸς τοὺς τόπους τοῦτους τὸ Ἰεργάμιον*, shows how little we have to do with any definite officially-fixed status.

⁵ The long struggle for supremacy has continued, and Ephesus has had to yield the palm to Smyrna, which is now the greatest city in Asia Minor (see Murray, *Handbook to AM*, 70*f.*, and cp SMYRNA).

city of the province, is to be gathered indirectly from the fact that, as early as 29 B.C., the city possessed a temple dedicated to Rome and Augustus by the Provincial Synod (*Κοινὸν Ἀσίας*) as its place of meeting (Tac. *Ann.* 4.37). Ephesus was not then recognised as a leading city. Pergamos thus gained the honour of the Neokorate before either Smyrna (temple erected to Tiberius, 26 A.D., Tac. *Ann.* 4.56) or Ephesus¹ (temple to Claudius, 41-54 A.D. possibly). The second Neokorate (and second temple of the Emperors) in the case of Pergamos dates from the reign of Trajan; in the case of Ephesus only after 127 A.D., in the reign of Hadrian (see NEOCOROS). The discussion of this point is necessary as upon a correct appreciation of the position of the city depends the interpretation of the striking phrase of Rev. 2.13, 'thou dwellest, even where Satan's seat is' (so AV; better, RV 'where Satan's throne is,' *ἔθρον ὁ θρόνος τοῦ Σατανᾶ*).

Various interpretations have been proposed.

(a) In view of the special prominence at Pergamos of the worship of four of the greatest deities² of the pagan religion—Zeus, Athena, Dionysus, and Asclepius—some have referred the phrase thereto. Zeus Soter (the Saviour), Athena Nicæphorus (Bringer of Victory) were honoured as having given victory over the Galatai. Athena's greatest temple as Warden of the City (Polias) occupied nearly the highest point of the Acropolis. This view must be rejected on the ground that Pergamos in no wise stood in the position of champion of pagan ritual against Christianity. Moreover, in Asia Minor the most formidable rival of the new religion was not the religion of Greece, but the development of that primitive Oriental nature-worship which presented itself with overpowering might in the cult of the so-called Aphrodite of Paphos and Diana of Ephesus.

If any city and worship merited the figure in the Apocalypse, it was Ephesus with her goddess Diana; more especially as perhaps already at the time of the composition of the Apocalypse there had occurred a pagan revival at Ephesus (this revival took place as early as 104 A.D. See Hicks, *Inscr. of Brit. Mus.* 367-87, and cp Rams. *Ch. in Rom. Emp.* 143).

(b) More specifically, some have seen in the phrase a reference to the great Altar of Zeus on the terrace below the temple of Athena Polias.

The sacrificial altar proper consisted, like that at Olympia, of the ashes of the sacrifices (Paus. v. 138), but rose in this case from the centre of a platform about 90 feet square and 20 feet high, with a flight of steps cut into it on the western side. This substructure has been recovered, together with the famous frieze of the Gigantomachia which ran round it. This frieze is 'a theatrical work of tremendous energy' (Holm, *Gk. Hist.*, ET, 4.468): in it the whole Hellenic pantheon appeared in conflict with the Giants, many of the latter being represented with a human body ending in serpents' coils (see Mitchell, *Hist. of Gk. Sculpture*, 573*f.*).

Artists' skill combined with the natural grandeur of its position to make the great altar a fit emblem of the kingdom of Satan as the smoke of the sacrifice rose into the air from the huge platform 800 feet above the city. Still, we must be on our guard against our modern feeling for what is picturesque or grand. Would a dweller in the great cities of Asia, among the treasures of an art which lived only through its connection with religion, feel that the altar at Pergamos was something apart and typical?

(c) A third view is that the reference is to the worship of Asclepius, whose temple was, as usual, the centre of a medical school, with the right of asylum (Tac. *Ann.* 3.63; Paus. ii. 268). Under the empire this cult was fashionable (cp coins), and Asclepius ultimately became the representative deity of the city. The snake was his special attribute (cp art. 'Asklepios' in Roscher's *Lex.*

¹ The temple dedicated to Augustus some time before 5 B.C. was not one that entitled the city to be called *Neocoros*, because (1) it was a dedication by the city merely, not by the *Κοινόν*, (2) it stood in the precinct of Artemis, not independently. Cp Hicks, *Inscr. of Brit. Mus.*, no. 522.

² Cp the oracle in Fränkel, *Inscr. von Perg.* 2.239, of date about 167 A.D., where all four are mentioned.

der Myth. 1615 ff., and Pauly-Wiss. *Realenc.* 21642 ff.; Farnell, *Cults of the Greek States*), and the snake was to the Christians the symbol of evil (cp Rev. 12.9 20.2 2 Cor. 11.3). His special title was 'Saviour' (Σωτήρ, or Σωτήρ τῶν θλων), which would have very different associations for the Christian. In spite of these striking features, the reference in Rev. can hardly be to this worship.

Laodicea also had an Asklepieion, and SMYRNA (*g.v.*). The word θρόνος also undoubtedly refers to the Acropolis hill; but the temple of Asclepius lay in the plain, at some little distance from the town (Pol. 32.27, cp Paus. v. 13.3).

(d) The reference is to the primacy of the city as a centre of the worship of the emperors; it was the earliest and the chief centre of that worship, which was the outward expression of loyalty to the imperial system. 'Refusal to comply with the established and official worship of the emperors' became the 'regular test and touchstone of persecution' (Rams. *Church in the Rom. Emp.* 250 f.), for the imperial cultus was part of the machinery of government, and such refusal constituted treason. The whole history of early Christianity is the story of the passage from legality to absolute proscription. If Rev. 2.13 was written after the accession of Trajan (98 A.D.) the expression 'throne of Satan' becomes specially appropriate. For, towering at the very summit of the Acropolis, there had recently been erected the temple of Trajan, a symbol visible far and wide of that worship which was the declared foe of Christianity. The primacy of Pergamos in the province, and as the seat of the imperial cult, explains the allusion to the martyr Antipas. For Antipas must be taken to typify a long series of 'faithful witnesses' who had defied the power of 'Satan' at the tribunal of the Roman governor, whose duty it was to proceed against the illegal religion. The reference of v. 13 may be to the persecution of Domitian (after 95 A.D.). [CP ROMAN EMPIRE.] The thought of official persecution has suggested the words of v. 12, 'he that hath the sharp two-edged sword,' selected from the description in Rev. 1.12 ff. (cp v. 16). The actuality of the message to Pergamos as compared with the colourlessness of most of the other messages (especially of that to Ephesus) probably throws some light upon the place of composition.

For the history of the Pergamene kingdom see Holm, *Gk. Hist.*, E.T., 4279 f., 464 f., with references there. Good account of history and recent discoveries by Using, *Pergamos* (1899). The results of the German excavations are as yet only partially published. W. J. W.

PERIDA (φερεΐδα [BN]), Neh. 7.57 = Ezra 2.55 PERUDA (*g.v.*).

PERIZZITES, RV PERIZZITE (פְּרִיזִי); ΟΙ ΦΕΡΕΖΑΙΟΙ [or -zeoi] [BNADEFL]; in Ezra 9.1 φερεσθει [B], -pezi [A], one of the pre-Israelitish populations of Palestine (Gen. 15.20 Ex. 3.8.17, etc.; see AMORITES); also PHERESITES¹ (in 1 Esd. 8.69; RV -EZITES, so EV 2 Esd. 1.21 and AV Judith 5.6). The name, however, requires renewed investigation, the prevalent theory being open to serious objection.

We begin by collecting the biblical notices. According to Judg. 14 f. the 'Perizzites' were overcome by

1. References. Judah and Simeon; but Josh. 17.15 (as the text now stands; 6^{BA} omits the two names) mentions 'the Perizzites and the Rephaim' as occupying a wild un-cleared region (רָפָי), perhaps N. of Shechem, which was to be taken from them and cleared by the b'ne Joseph. According to Josh. 11.3 they dwelt in the hill-country (like the Amorites, etc.). In Gen. 13.7 34.30 (J) the Canaanites and the Perizzites are mentioned together; also in 2 Esd. 1.21 (*feresei*), with the addition of the Philistines. In Gen. 10.16 f. (R) the Philistines are not mentioned at all (but cp v. 14), and the Perizzites too are conspicuous by their absence.

Some of these data have been thought (*e.g.*, by Dill-

¹ 1 Esd. 8.69 agrees with Ezra 9.1 (glossed, see Guthe, *SBOT*).

mann and Kautzsch¹) to favour the theory that the

Perizzites were survivors of the pre-Canaanitish population of W. Palestine, which, after the Canaanitish invasion, could maintain itself only in the open country. But to infer from Gen. 10.15, where the Perizzites are not mentioned, that they were pre-Canaanitish, is difficult in the face of Gen. 13.7 34.30 (see, however, Kautzsch). J no doubt believed that the Perizzites (if that be really the name) were a separate people, contemporary with the Canaanites. As to the reference to the 'Perizzites and the Rephaim' in Josh. 17.15, it gives no support to Dillmann's theory, פְּרִיזִי and רִפְתָּיִם being most probably alternative readings (cp REPHAIM).

Since פְּרִי, Dt. 3.5 1 S.6.18 (cp VILLAGE), means the inhabitants of unvalled villages, it is plausible to deny any distinction between פְּרִיזִי and פְּרִי, and to

3. Later theories. suppose that the term 'Perizzite' is really a clan-name equivalent to פְּרִי (so Moore, *Judges*, 17). But there are still stronger grounds for thinking that פְּרִיזִי is really an early corruption of גִּרְזִי, GIRZITE.

It may be quoted for the theory that 'Perizzite' is the name of a clan, for in Dt. and 1 S. it has φερεζαίου (-ζε. 6^A in Sam.); the other Gk. versions have ἀτειχιστοί, ἀτειχιστος (cp Symm. in Judg. 5.11 Zech. 2.4). It appears to be more probable, however, that the older view that Perizzites is the name of a people is nearer the truth. פְּרִיזִי may be a corrupt form either of זַרְפָּתִי, 'Zarephathite' (see PELETHITES), or of גִּרְזִי, 'Girzite' (*i.e.*, Gesburite). It is somewhat in favour of 'Zarephathite' that in Josh. 17.15 'Perizzite' and 'Rephaim' are put side by side for the same people, and that זַרְפָּתִי is almost certainly (like רִפְתָּיִם) a corruption of זַרְפָּתִי. It is also true, however, that ז and פ are liable to confusion, and in 1 S. 27.8 H. P. Smith proposes to emend גִּרְזִי into פְּרִיזִי (the Perizzites and those dwelling in Gezer are combined in 6 of Josh. 16.10). At any rate, the people referred to cannot be safely described as a remnant of the pre-Canaanitish population of Palestine. T. K. C.

PERSEPOLIS (Περσέπολιν [A], Περσιπολιν [V], in accus.). The city where, according to 2 Macc. 9.21, Antiochus Epiphanes attempted to plunder a temple (or temples, *ιεροσυλεύει*); he was put to flight by the people of the country, and broke up his camp with disgrace (shortly before his death). See ELYMAIS, where it is pointed out that the name Elymais in the || passage, 1 Macc. 6.1, is probably corrupt. From 2 Macc. 1.13 it appears that a temple of Nanæa was meant. Now NANÆA (*g.v.*) was an ancient Elamite goddess. It would be not unnatural that out of the statement 'Persepolis is a city renowned for wealth' (Περσέπολις ἐστὶ πόλις ἐνδοξος πλούτω) should arise the corrupt reading, 'Elym(a)is in Persia is a city renowned for wealth' (ἐστὶν ἐλυμ(α)ῖς² π. ε. πλ.). But that there was a temple of Nanæa near the ruins of Persepolis in 164-163 B.C. is not probable. For Persepolis was not in Elymais; it was the capital of Persia proper, and had long since been shorn of its splendour by Alexander the Great, who gave up the city to be plundered, and caused the royal palaces (those can hardly have been temples—only fire-altars) to be set on fire. It is, therefore, not as having any direct connection with biblical history (like Susa), but simply as the original home of the Achæmenian dynasty, and as the seat of the sepulchres of its kings, that Persepolis with its still magnificent ruins interests us.

See Nöldeke, art. 'Persepolis,' *EB*(⁹); Stolze, *Persepolis*, 2 vols., Berl. 1882 (an account of the expedition of F. C. Andrus, with introd. on the inscriptions by Nöldeke); Flandin et Coste, *Persie ancienne, et Voyage en Perse* (1851-52); Dieulafoy, *L'art antique de la Perse* (1881); Curzon, *Persia* (1892), 2.248 ff. T. K. C.

PERSEUS (Περσεύς), 'king of Chittim' (see KITTIM, end), is alluded to in 1 Macc. 8.5. The reference is to the battle of Pydna (168 B.C.),³ in which

¹ Riehm, *HWB*(²) 1211.
² ἐπολις would be confounded with ἐλυμ(α)ῖς (ἐμυλ(α)ῖς) under the influence of the tradition that Nanæa's was the temple referred to.

³ Near modern *Asam* on the coast-road on the west shore of the gulf of Salonica.

PERSIA

Perseus was defeated and the Macedonian kingdom brought to an end (cp MACEDONIA).

His conqueror was L. Aemilius Paulus. At SAMOTHRACE [*q.v.*], Perseus surrendered to the victor, and was taken as a captive to Rome, but allowed to pass the remainder of his days as a state-prisoner at Alba on Lake Fucinus. This was the end of the empire of Alexander which had lasted for 144 years. For the character and aims of Perseus, see Mommsen, *Rom. Hist.* ET 2287 f. 293 f. W. J. W.

PERSIA

Name (§ 1).	Religion and culture (§§ 7-9).
Biblical references (§ 2).	Chronology (§ 10).
Land and people (§ 3).	History (§§ 11-20).
Language and literature (§§ 4-6).	Bibliography (§ 21).

Under the name Persia Media also is included, Persia and Media, when known to the Hebrews, having been closely united.

1. Name.

Media in Hebrew is מֵדִי: ethnic, מֵדָה a Mede.

Persia is מֶרְסַשׁ; Περσων [B.N.A.L.; both Theod. and Ⓞ in Dan.], but in Dan. 11 2 ῥῆ περσίδε [B.A.Q., 87], in 2 Ch. 36 20 μεδων [B.A.L.] (so, in the reverse way, Περσων for מֵדִי in Is. 21 2); adj. Persian, מֵרְסִי, Neh. 12 22; מֵרְסִיָּה [A.L.], מֵרְסִיָּה [A.L.] in Dan. 6 28 [29] (Aram.); מֵדִי Περσων [B.N.A.L.]; five times plur. in EV Persians. In the inscriptions of the Achaemenids, O. Persian *Parsa uta Māda*, Semitic version *Parsu* (gentilic *Parsā*), and *Mādāi (ā-a-a)* [Nabūn. Cyl. *Parsū*], Sus. or Elam. version *Parsin* and *Mata* (gentilic *Parsir*).

'Persia' and 'Persians' are the designations of the kingdom and dynasty (respectively) of Cyrus and his successors after the commencement of the Greek period (on מֵדִי in Ezek. 27 10 see PARAS).

The passages both Hebrew and Aramaic are 2 Ch. 36 20 22 f. = Ezra 1 1 f. 8 37 4 35 7 24 6 14 7 1 9 9 Neh. 12 22, besides Dan. (11 2) and Esth. (5 11 10), which are later than the Chronicler. The only one of the passages in Ezra-Neh. that appears on the surface to be free from the Chronicler's redaction is Ezra 9 9, and even if this passage be really from Ezra's hand, the presumption from the usage as exhibited is strong against the authenticity of the word מֵדִי; of course, if the contention of C. C. Torrey (see EZRA, § 1, n. 2) be right, and the Chronicler's hand is the only one to be recognised in Ezra, the case is still clearer. Even in Dan. 9 1, where Darius is said to have been made king over the kingdom of the Kasdim, he is called not 'the Persian,' but 'son of Ahasuerus, of the seed of the Medes.'

With these phenomena agrees the usage of Babylonian contract tablets from Cyrus to Artaxerxes, where the king's name appears as 'Cyrus (Cambyses, Darius, etc.), king of Babylon, king of the countries,' or simply 'king of the countries' (see KB 4, 1896, p. 258 ff., Peiser's transl.).

No doubt Cyrus is called 'king of Persia' (*Parsu*) in the Chronicles of Nabonidus, 2, l. 15, but also king of *Anšan* (an Elamitic province; on the relation between these see Tiele, BAG 469), Id. *ib.* l. 1, Cyrus Cylinder, l. 12; but these both represent him prior to the capture of Babylon. The Cyrus Cylinder, ll. 20-22, gives his formal title thereafter: 'Cyrus, king of hosts, great king, mighty king, king of Babylon (lit. *Tintinbi*), king of Šumer and Akkad (entire Babylonia), king of the four quarters (of the world), son of Cambyses, the great king, king of (the city) Anšan, grandson of Šišpiš (= Old Pers. Cīšpiš, Gk. Teispes), the great king, king of [the city] Anšan,' etc. (For all these see KB 3 2 ff. 120 ff., and especially Hagen in Delitzsch and Haupt, Beitr. 2 205 ff.).

Even in the Old Persian inscriptions, where we find Darius naming himself 'king in Persia' (*Parsaiy*), this title does not appear alone.

Thus, *Behistun*, 1 1, 'I, Darius, the great king, the king of kings, king in Persia, king of the provinces,' and the much more common expression 'I, Darius, the great king, king of kings, king of the countries of many tribes, king of this great earth far and wide' (Inscr. Alvend, ll. 11 ff.), or more briefly 'the great king, king of kings, king of these many regions' (Inscr. Persepolis, 2, ll. 1 ff.), and the like, in connection with which he sometimes calls himself 'a Persian' (as Inscr. Naksh-i-Rustam, 1, l. 13); these more general titles are those exclusively found in the (Persian) inscriptions of Xerxes and his successors, Artaxerxes I., Artax. Mnemon, and Artax. Ochus (see for these Spiegel, APK, esp. 2, 42, 46, 48, 50, 52, 58, 60, 62, 64, 66, 68—transl. on opp. pp.; especially Weissbach and Bang, APK 12, 30, 32, 34, 36, 38, 40, 42, 44, 46—transl. on opp. pp.).

PERSIA

Persia (*Parsā*) is mentioned repeatedly as one province of the empire (*Behistun*, 1 14 34 27, etc.). In the first inscription of Persepolis (Spiegel, 46 ff., Weissbach, 34 f.) Darius speaks of 'this land Persia' more particularly, as is natural. In accord with these facts is the assumption by the Greek kings of a title similar to that of the earlier Babylonian kings; so Antiochus Soter (280-260 B.C.) in his cuneiform inscr. 1 1 f. (Schr. KB 3 2 136, transl. by Peiser):—'Antiochus, the great king, the mighty king, the king of hosts, king of Babylon, king of the countries, . . . princely son of Seleucus the Macedonian (*Makkadunai*) king, king of Babylon.'

It seems probable that the Chronicler's frequent use of the name מֵדִי is intended to distinguish the empire that began with Cyrus from the Macedonian power that overthrew and assumed it.

F. B.

Some scholars identify the Persians with the Paršuaš or Baršuaš of the Assyrian inscriptions; but this is very doubtful as, even in the time of the Sargonids, they still lived much more to the N. than the Persians did during the Median rule. Paršuaš seems rather to be an Assyrian form of Parthavaš, the Parthians, called Παρθαῖοι by the Greeks.

In Gen. 10 2 MADAI [*q.v.*] is named among the sons of Japheth, following Gomer and [Ma]jlog—*i.e.*, the Gimirrihi and the Lydians—and preceding Javan—*i.e.*, the Ionians and others.

2. Biblical references.

Persia is not mentioned, but is certainly regarded by the author as belonging to Media. 2 K. 17 6 and 18 11 relate how the king of Assyria, after having conquered Samaria, transferred the captives from the kingdom of Israel to 'the towns of Media.' In Is. 13 17 the Medes 'who do not care for silver nor desire gold' are called upon by Yahwē to fight the Babylonians. Cp Is. 21 2, where Elam is added to Media. 'The kings of Media' are mentioned among others in Jer. 25 25 and 51 11 as enemies of Babylon. In Ezra 6 2 a decree of Cyrus is found at Ahmetha (Ecbatana) in the country of Media.

The references in the OT to the Persians, either singly or joined to the Medes, are rather many, but only in the later historical books and in Daniel and Esther. It is very improbable that they are meant in Ezek. 27 10 38 5, where they are said to serve in foreign armies with LUD and PUT or with CUSH (cp PARAS). Perhaps מֵדִי should be read instead of מֵרְסִי.

Kings of Persia are mentioned in Ezra 9 9; Cyrus in 2 Ch. 36 22 f. Ezra 1 1 f. 8 37 4 35; Darius in 4 24 Neh. 12 22; Artaxerxes in Ezra 7 1; all three in 6 14. Cyrus the Persian also in Dan. 6 29 [28] 10 1, and *passim*. For Darius the Mede in Dan. 6 and *passim*, see DARIUS. The prince or angel of the Persians is mentioned in Dan. 10 13 20. By 'the kings of Medes and Persians,' Dan. 8 20, is meant the whole Medo-Persian empire. Belshazzar's empire is given to the Medes and Persians, Dan. 5 28. The immutable laws of the Medes and Persians are referred to in Dan. 6 9 13 16 [8 12 15] (cp Esth. 1 19); their army, seven princes, princesses in Esth. 1 3 14 18, and the chronicles of their kings in 10 2.

In the NT the Persians and Persia never occur, only, in Acts 2 9, Μῆδοι with the Parthians and Elamites.

The Medes and Persians mentioned in the Bible inhabited in historical times only a part of Irān or Erān,

3. Land and people.

the land of the Aryans, which extended W. to E. from the Zagros range to the Hindu Kush and the Indus, and N. to S. from the Caspian Sea and the Turanian steppes to the Erythraean Sea or Persian Gulf. The western countries Persia, Media proper, and Little Media (Atropatene) are separated from the eastern provinces, of which Bactria, Margiana (Merv), and Sogdiana (Sughda) are the best known, by an immense barren desert, running from N. to S. and ending only where the coastland, in a corresponding degree inhabitable, of the Persian Sea begins. It is only along the SE. shore of the Caspian Sea that the land of the Hyrcanians unites the eastern and western parts of Irān.

As a whole, Irān, lacking large rivers and extended valleys, and for the most part mountainous and cold, is

not particularly fertile. There are several exceptions, however, such as Persia itself, and especially the north-eastern provinces, Bactria and Sogdiana, where the climate is mild and the soil rich. It is remarkable that just those two important satrapies did not rise against Darius, whilst rebellion everywhere prevailed. In general it may be said, that Irān was a country well fitted to foster an industrious, proud, manly, and warlike race, and to be for some centuries the centre of a mighty empire.

It is quite certain that the founders of this empire, the Medo-Persians, were not the original inhabitants of the country. They belonged to the Aryan stock. When the Assyrians, as they often did, directed their expeditions to Media, and even built there some strong places to maintain their supremacy, the kings they fought did not bear Aryan names, which become more frequent only in the time of the Sargonids. Aryan tribes, coming from the NW. or the N., and spreading first in the eastern part of the land, seem to have conquered the western regions little by little, and to have settled there in small independent kingdoms, before the Median monarchy was established. If there is any truth in what Bērosos tells about a Median dynasty reigning over Babylon in the remotest times, this dynasty has nothing in common with the Aryan Medes, but probably was of the same origin as the Kassites, Elamites, and other eastern neighbours of Babylonia.

A complete ethnology and glossology of the Iranian peoples would be out of place here, as our scope is
